# Fund Summary

## DREYFUS NEW YORK AMT-FREE MUNICIPAL MONEY MARKET FUND

### INVESTMENT OBJECTIVE

The fund seeks as high a level of current income exempt from federal, New York state and New York city income taxes as is consistent with the preservation of capital and the maintenance of liquidity.

### FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the fund.

<b>Annual fund operating expenses</b> ( <i>expenses that you pay each year as a percentage of the value of your investment</i> )	
Management fees	0.50
Other expenses (including shareholder services fees)	0.18
<b>Total annual fund operating expenses</b>	<b>0.68</b>

### EXPENSE EXAMPLE

The Example below is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
\$69	\$218	\$379	\$847

### PRINCIPAL INVESTMENT STRATEGY

As a money market fund, the fund is subject to maturity, quality and diversification requirements designed to help it maintain a stable share price. To pursue its goal, the fund normally invests substantially all of its assets in short-term, high quality municipal obligations that provide income exempt from federal and New York state and New York city personal income taxes. The fund also seeks to provide income exempt from the federal alternative minimum tax.

### PRINCIPAL RISKS

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

The fund's yield will fluctuate as the short-term securities in its portfolio mature and the proceeds are reinvested in securities with different interest rates. Additionally, while the fund has maintained a constant share price since inception, and will continue to try to do so, neither Dreyfus nor its affiliates are required to make a capital infusion, enter into a capital support agreement or take other actions to prevent

the fund's share price from falling below \$1.00. The following are the principal risks that could reduce the fund's income level and/or share price:

- Interest rates could rise sharply, causing the value of the fund's investments and its share price to drop
- Interest rates could drop, thereby reducing the fund's yield
- Any of the fund's holdings could have its credit rating downgraded or could default
- New York's economy and revenues underlying its municipal obligations may decline
- The fund's portfolio securities may be more sensitive to risks that are specific to investing primarily in a single state.

The fund is non-diversified, meaning that a relatively high percentage of the fund's assets may be invested in a limited number of issuers.

## PERFORMANCE

The following bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the performance of the fund's shares from year to year. The table shows the fund's average annual total return over time. The fund's past performance is no guarantee of future results. All returns assume reinvestment of dividends and distributions.

*Year-by-year total returns as of 12/31 each year (%)*

*Best Quarter (Q4, 2000) 0.90%. Worst Quarter (Q3, 2003) 0.08%*

*The fund's year-to-date total return as of 6/30/09 was 0.22%*

Average annual total returns as of 12/31/08		
1 Year	5 Years	10 Years
1.80%	2.01%	1.96%

For the fund's current 7-day yield, please call toll free: **1-800-645-6561**

## PORTFOLIO MANAGEMENT

The fund's investment adviser is The Dreyfus Corporation.

## PURCHASE AND SALE OF FUND SHARES

---

In general, the fund's minimum initial investment is \$2,500 and the minimum subsequent investment is \$100. Certain types of accounts are eligible for lower minimum investments. You may sell your shares by mail, telephone or online at [www.Dreyfus.com](http://www.Dreyfus.com). Your shares will be sold at the next net asset value calculated after your order is received in proper form.

## TAX INFORMATION

---

The fund anticipates that virtually all dividends paid will be exempt from federal and New York state and New York city personal income taxes. However, for federal tax purposes, certain distributions, such as distributions of short-term capital gains, are taxable as ordinary income, while long-term capital gains are taxable as capital gains.

## PAYMENTS TO BROKER DEALERS AND OTHER FINANCIAL INTERMEDIARIES

---

If you purchase shares through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

# Fund Summary

## Dreyfus New York Tax-Exempt Bond Fund, Inc.

### INVESTMENT OBJECTIVE

---

The fund seeks as high a level of current income exempt from federal, New York state and New York city income taxes, as is consistent with the preservation of capital.

### FEES AND EXPENSES

---

This table describes the fees and expenses that you may pay if you buy and hold shares of the fund.

<b>Annual fund operating expenses</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management fees	0.60
Other expenses (including shareholder services fees)	0.16
<b>Total annual fund operating expenses</b>	<b>0.76</b>

### EXPENSE EXAMPLE

The Example below is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
\$78	\$243	\$422	\$942

### PORTFOLIO TURNOVER

---

The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 16.88% of the average value of its portfolio.

### PRINCIPAL INVESTMENT STRATEGY

---

To pursue its goal, the fund normally invests substantially all of its assets in municipal bonds that provide income exempt from federal and New York state and New York city personal state personal income taxes. The fund invests primarily in municipal bonds rated investment grade (Baa/BBB or higher), or the unrated equivalent as determined by Dreyfus. The fund seeks bonds with the potential to offer attractive current income, typically looking for bonds that can provide consistently attractive current yields or that are trading at competitive market prices.

## PRINCIPAL RISKS

---

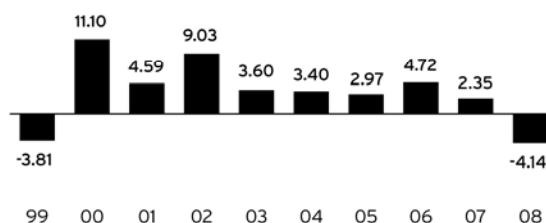

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. The fund's share price fluctuates, which means you could lose money.

- *Municipal bond market risk.* The amount of public information available about municipal bonds is generally less than that for corporate equities or bonds. Special factors, such as legislative changes, a state's economy and local and business developments, may adversely affect the yield and/or value of the fund's investments in municipal bonds. Other factors include the general conditions of the municipal bond market, the size of the particular offering, the maturity of the obligation and the rating of the issue.
- *Interest rate risk.* Prices of municipal bonds tend to move inversely with changes in interest rates. The longer the effective maturity and duration of the fund's portfolio, the more the fund's share price is likely to react to interest rates.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a municipal bond, can cause the bond's price to fall, potentially lowering the fund's share price. To the extent the fund invests in high yield ("junk") bonds, its portfolio is subject to heightened credit risk.
- *Liquidity risk.* The secondary market for certain municipal bonds tends to be less well developed or liquid than many other securities markets, which may adversely affect the fund's ability to sell such municipal bonds at attractive prices.
- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to securities, indexes, and interest rates) and inverse floaters. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments.
- *Non-diversification risk.* The fund is non-diversified, meaning that a relatively high percentage of the fund's assets may be invested in a limited number of issuers.

## PERFORMANCE

The following bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows changes in the performance of the fund's shares from year to year. The table compares the average annual total returns of the fund's shares to those of a broad measure of market performance. The fund's past performance (before and after taxes) is no guarantee of future results. All returns assume reinvestment of dividends and distributions.

*Year-by-year total returns as of 12/31 each year (%)*

*Best Quarter (Q3, 2002) 4.87%. Worst Quarter (Q3, 2008) -3.72%*

*The fund's year-to-date total return as of 6/30/09 was 6.88%*

After-tax returns are calculated using the historical highest individual federal marginal tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Average annual total returns as of 12/31/08			
	1 Year	5 Years	10 Years
<b>Fund</b> returns before taxes	-4.14%	1.81%	3.28%
<b>Fund</b> returns after taxes on distributions	-4.16%	1.79%	3.21%
<b>Fund</b> returns after taxes on distributions and sale of fund shares	-1.26%	2.16%	3.43%
<b>Barclays Capital Municipal Bond Index</b>	-2.47%	2.71%	4.26%
<i>reflects no deduction for fees, expenses or taxes</i>			

## PORTFOLIO MANAGEMENT

---

The fund's investment adviser The Dreyfus Corporation. Joseph P. Darcy has served as the fund's primary portfolio manager since November 2001 and has been employed by Dreyfus since 1994.

## PURCHASE AND SALE OF FUND SHARES

---

In general, the fund's minimum initial investment is \$2,500 and the minimum subsequent investment is \$100. Certain types of accounts are eligible for lower minimum investments. You may sell your shares by mail, telephone or online at [www.Dreyfus.com](http://www.Dreyfus.com). Your shares will be sold at the next net asset value calculated after your order is received in proper form.

## TAX INFORMATION

---

The fund anticipates that virtually all dividends paid will be exempt from federal and New York state and New York city personal income taxes. However, for federal tax purposes, certain distributions, such as distributions of short-term capital gains, are taxable as ordinary income, while long-term capital gains are taxable as capital gains.

## PAYMENTS TO BROKER DEALERS AND OTHER FINANCIAL INTERMEDIARIES

---

If you purchase shares through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

# Fund Details

## GOAL AND APPROACH

---

### **Dreyfus New York AMT-Free Municipal Money Market Fund**

The fund seeks to provide as high level a level of current income exempt from federal, New York state and New York city income taxes as is consistent with the preservation of capital and the maintenance of liquidity. As a money market fund, the fund is subject to maturity, quality and diversification requirements designed to help it maintain a stable share price of \$1.00.

To pursue its goal, the fund normally invests substantially all of its assets in short-term, high quality municipal obligations that provide income exempt from federal, New York state and New York city income taxes. The fund also seeks to provide income exempt from the federal alternative minimum tax.

The fund also may invest in high quality short-term structured notes, which are derivative instruments whose value is tied to underlying municipal obligations.

Generally, the fund is required to invest its assets in the securities of issuers with the highest or second-highest credit rating or the unrated equivalent as determined by Dreyfus. Additionally, the fund is required to maintain an average dollar weighted portfolio maturity of 90 days or less and buy individual securities that have remaining maturities of 13 months or less.

Although the fund seeks to provide income exempt from federal and New York state and New York city income taxes, the fund temporarily may invest in high quality, taxable money market instruments and/or municipal obligations that pay income exempt only from federal income tax, including when the portfolio manager believes acceptable New York municipal obligations are not available for investment.

### **Dreyfus New York Tax Exempt Bond Fund, Inc.**

The fund seeks as high a level of current income exempt from federal, New York state and New York city income taxes as is consistent with the preservation of capital. To pursue this goal, the fund normally invests substantially all of its assets in municipal bonds that provide income exempt from federal, New York state and New York city personal income taxes.

The fund invests at least 80% of its assets in municipal bonds rated investment grade (Baa/BBB or higher), or the unrated equivalent as determined by Dreyfus. The fund may invest up to 20% of its assets in municipal bonds rated below investment grade ("high yield" or "junk" bonds) or the unrated equivalent as determined by Dreyfus.

The dollar-weighted average maturity of the fund's portfolio normally exceeds ten years, but the fund may invest without regard to maturity. Dollar-weighted average maturity is an average of the stated maturities of the securities held by the fund, based on their dollar-weighted proportions in the fund.

The portfolio manager may buy and sell bonds based on credit quality, market outlook and yield potential. In selecting municipal bonds for investment, the portfolio manager may assess the current interest rate environment and the municipal bond's potential volatility in different rate environments. The portfolio manager focuses on bonds with the potential to offer attractive current income, typically looking for bonds that can provide consistently attractive current yields or that are trading at competitive market prices. A portion of the fund's assets may be allocated to "discount" bonds, which are bonds that sell at a price below their face value, or to "premium" bonds, which are bonds that sell at a price above their face value. The fund's allocation to either discount bonds or to premium bonds will change along with the

portfolio manager's changing views of the current interest rate and market environment. The portfolio manager also may look to select bonds that are most likely to obtain attractive prices when sold.

Although the fund seeks to provide income exempt from federal, New York state and New York city income taxes, interest from some of the fund's holdings may be subject to the federal alternative minimum tax. In addition, the fund temporarily may invest in taxable bonds and municipal bonds that pay income exempt only from federal income tax, including when the portfolio manager believes acceptable New York municipal bonds are not available for investment.

The fund may, but is not required to, use derivatives, such as options, futures, options on futures (including those relating to securities, indexes and interest rates), swaps and inverse floaters, as a substitute for investing directly in an underlying asset, to increase returns, to manage credit or interest rate risk, or as part of a hedging strategy. The fund may buy securities that pay interest at rates that float inversely with changes in prevailing interest rates (inverse floaters) and may make forward commitments in which the fund agrees to buy or sell a security in the future at a price agreed upon today. Inverse floaters are created by depositing municipal bonds in a trust which divides the bond's income stream into two parts: a short term variable rate demand note and a residual interest bond (the inverse floater) which receives interest based on the remaining cash flow of the trust after payment of interest on the note and various trust expenses. Interest on the inverse floater usually moves in the opposite direction as the interest on the variable rate demand note.

The fund also may make forward commitments in which the fund agrees to buy and sell a security in the future at a price agreed upon today.

## INVESTMENT RISKS

---

### **Dreyfus New York AMT-Free Municipal Money Market Fund**

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

The fund's yield will fluctuate as the short-term securities in its portfolio mature and the proceeds are reinvested in securities with different interest rates. Additionally, while the fund has maintained a constant share price since inception, and will continue to try to do so, neither Dreyfus nor its affiliates are required to make a capital infusion, enter into a capital support agreement or take other actions to prevent the fund's share price from falling below \$1.00. The following are the principal risks that could reduce the fund's income level and/or share price:

- *Interest rate risk.* This risk refers to the decline in the prices of fixed-income securities that may accompany a rise in the overall level of interest rates. The fund's yield will vary; it is not fixed for a specific period like the yield on a bank certificate of deposit. A sharp and unexpected rise in interest rates could cause a money market fund's share price to drop below a dollar. However, the extremely short maturities of the securities held in money market portfolios - a means of achieving an overall fund objective of principal safety - reduces their potential for price fluctuation.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a municipal obligation, can cause the obligation's price to fall, potentially lowering the fund's share price. Although the fund invests only in high quality debt securities, any of the fund's holdings could have its credit rating downgraded or could default. The credit quality of the securities held by the fund can change rapidly in certain market environments, and the default of a single holding could have the potential to cause significant deterioration of the fund's net asset value.
- *Derivatives risk.* Derivative securities, such as structured notes, can be volatile, and the possibility of default by the financial institution or counterparty may be greater for these securities than for other types of money market instruments. Structured notes typically are purchased in privately negotiated transactions from financial institutions and, thus, an active trading market for such instruments may not exist.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities may fall dramatically, potentially lowering the fund's share price, even during periods of declining interest rates. Also, during such periods, redemptions by a few large investors in the fund may have a significant adverse effect on the fund's net asset value and remaining fund shareholders.
- *Tax risk.* To be tax-exempt, municipal bonds generally must meet certain regulatory requirements. Although the fund will normally invest all or a substantial portion of its assets in municipal bonds that pay interest that is exempt, in the opinion of counsel to the issuer (or on the basis of other authority believed by the adviser to be reliable), from federal New York state and New York city personal income taxes, if any such municipal bond fails to meet these regulatory requirements, the interest received by the fund from its investment in such bonds and distributed to fund shareholders will be taxable.

- *State-specific risk.* The fund is subject to the risk that New York's economy, and the revenues underlying its municipal bonds, may decline. Investing primarily in a single state makes the fund more sensitive to risks specific to the state and may magnify other risks.
- *Non-diversification risk.* The fund is non-diversified, which means that a relatively high percentage of the fund's assets may be invested in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer or group of issuers and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.

## **Dreyfus New York Tax Exempt Bond Fund, Inc.**

The fund's principal risks are discussed below. An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Municipal bond market risk.* The amount of public information available about municipal bonds is generally less than that for corporate equities or bonds. Special factors, such as legislative changes and local and business developments, may adversely affect the yield and/or value of the fund's investments in municipal bonds. Other factors include the general conditions of the municipal bond market, the size of the particular offering, the maturity of the obligation and the rating of the issue.
- *Interest rate risk.* Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the fund's portfolio, the more the fund's share price is likely to react to interest rates.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a bond, can cause a bond's price to fall, potentially lowering the fund's share price. Although the fund invests primarily in bonds rated investment grade, it may invest to a limited extent in high yield bonds. High yield ("junk") bonds involve greater credit risk, including the risk of default, than investment grade bonds, and are considered predominantly speculative with respect to the issuer's ability to make principal and interest payments. The prices of high yield bonds can fall dramatically in response to bad news about the issuer or its industry, or the economy in general.
- *Call risk.* Some bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the fund might have to reinvest the proceeds in an investment offering a lower yield, and therefore might not benefit from any increase in value as a result of declining interest rates. During periods of market illiquidity or rising interest rates, prices of "callable" issues are subject to increased price fluctuation.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically, even during periods of declining interest rates. Liquidity risk also exists when a particular derivative instrument is difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, including swap agreements), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price. The secondary market for certain municipal bonds tends to be less developed and less liquid than many other securities markets, which may adversely affect the fund's ability to sell such municipal bonds at attractive prices.
- *State-specific risk.* The fund is subject to the risk that New York's economy, and the revenues underlying its municipal bonds, may decline. Investing primarily in a single state makes the fund more sensitive to risks specific to the state and may magnify other risks.
- *Market sector risk.* The fund's overall risk level will depend on the market sectors in which the fund is invested and the current interest rate, liquidity and credit quality of such sectors. The fund may significantly overweight or underweight certain companies, industries or market sectors, which may

cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.

- *Tax risk.* To be tax-exempt, municipal bonds generally must meet certain regulatory requirements. Although the fund will normally invest all or a substantial portion of its assets in municipal bonds that pay interest that is exempt, in the opinion of counsel to the issuer (or on the basis of other authority believed by the investment adviser to be reliable), from federal and New York state and New York city income taxes, if any such municipal bond fails to meet these regulatory requirements, the interest received by the fund from its investment in such bonds and distributed to fund shareholders will be taxable.
- *Derivatives risk.* A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms. Certain types of derivatives involve greater risks than the underlying obligations because, in addition to general market risks, they are subject to illiquidity risk, counterparty risk and credit risk. Additionally, some derivatives involve economic leverage, which could increase the volatility of these investments as they may fluctuate in value more than the underlying instrument. Certain derivatives may cause taxable income.
- *Leveraging risk.* The use of leverage, such as lending portfolio securities, entering into futures contracts, investing in inverse floaters, and engaging in forward commitment transactions may cause taxable income and may magnify the fund's gains or losses.
- *Non-diversification risk.* The fund is non-diversified, which means that a relatively high percentage of the fund's assets may be invested in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer or group of issuers and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.
- *Other potential risks.* The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of loaned securities. If the borrower of the securities fails financially, there could be delays in recovering the loaned securities or exercising rights to the collateral.

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities or money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

## MANAGEMENT

---

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$334 billion in 187 mutual fund portfolios. For the past fiscal year, Dreyfus New York AMT-Free Municipal Money Market Fund and Dreyfus New York Tax Exempt Bond Fund, Inc. each paid Dreyfus a management fee at an annual rate of 0.50% and 0.60%, respectively, of the fund's average daily net assets. A discussion regarding the basis for the board's approving each fund's management agreement with Dreyfus is available in the fund's semi-annual report for the six months ended November 30, 2008. Dreyfus is the primary mutual fund business of The Bank of New York Mellon Corporation (BNY Mellon), a global financial services company focused on helping clients move and manage their financial assets, operating in 34 countries and serving more than 100 markets. BNY Mellon is a leading provider of financial services for institutions, corporations and high-net-worth individuals, providing asset and wealth management, asset servicing, issuer services, and treasury services through a worldwide client-focused team. BNY Mellon has more than \$20.7 trillion in assets under custody and administration and \$926 billion in assets under management, and it services more than \$11.8 trillion in outstanding debt. Additional information is available at [www.bnymellon.com](http://www.bnymellon.com).

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

The primary portfolio manager for Dreyfus New York Tax Exempt Bond Fund, Inc. is Joseph Darcy, a position he has held since November 2001. Mr. Darcy is a portfolio manager for Standish Mellon Asset Management Company LLC, (Standish) an affiliate of Dreyfus, where he has been employed since April 2009. Mr. Darcy is a portfolio manager for a number of national and state-specific municipal bond funds managed by Dreyfus, where he has been employed since 1994. Steven Harvey serves as an additional portfolio manager of the fund, a position he has held since April 2009. Mr. Harvey is a senior portfolio manager for tax sensitive strategies at Standish, where he has been employed since 2000. Mr. Harvey manages tax-sensitive portfolios for institutional, insurance, mutual fund, and high net work clients. Mr. Harvey also has been employed by Dreyfus since April 2009.

The fund's Statement of Additional Information (SAI) provides additional portfolio manager information, including compensation, other accounts managed and ownership of fund shares.

MBSC Securities Corporation (MBSC), a wholly owned subsidiary of Dreyfus, serves as distributor of the fund and for the other funds in the Dreyfus Family of Funds. Dreyfus or MBSC may provide cash payments out of its own resources to financial intermediaries that sell shares of funds in the Dreyfus Family of Funds or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses that may be paid by a fund to those intermediaries. Because those payments are not made by fund shareholders or the fund, the fund's total expense ratio will not be affected by any such payments. These payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or MBSC's own resources to intermediaries for inclusion of a fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or MBSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets

or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

The fund, Dreyfus and MBSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each code of ethics restricts the personal securities transactions of employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the respective codes is to ensure that personal trading by employees does not disadvantage any of the firms' other clients.

# Shareholder Guide

## BUYING AND SELLING SHARES

---

### Valuing Shares

You pay no sales charges to invest in these funds. Your price for fund shares is the net asset value per share (NAV), which is generally calculated, for the Money Market Fund as of 12:00 noon Eastern time, and for the Bond Fund as of the close of trading on the New York Stock Exchange (usually 4:00 p.m. Eastern time), on days the exchange is open for regular business.

Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The Money Market Fund's investments are valued based on amortized cost, which does not take into account unrealized gains or losses. As a result, portfolio securities are valued at their acquisition cost, adjusted over time based on the discounts of premiums reflected in their purchase price. The Money Market Fund uses the amortized cost method of valuation pursuant to Rule 2a-7 under the Investment Company Act of 1940 in order to be able to its shares at \$1.00 per share. In accordance with Rule 2a-7, the fund is subject to certain maturity, quality and diversification requirements to help it maintain the \$1.00 per share price. When calculating its NAV, the Money Market Fund compares the NAV using amortized cost to its NAV using available market quotations or market equivalents, which generally are provided by an independent pricing service approved by the fund's board. The pricing service's procedures are reviewed under the general supervision of the board.

When calculating NAVs, the Bond Fund's investments generally are valued by one or more independent pricing services approved by the fund's board or on the basis of market quotations. The pricing service's procedures are reviewed under the general supervision of the board. If market quotations or prices from a pricing service are not readily available, or are determined not to reflect accurately fair value, the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Under certain circumstances, the fair value of foreign equity securities will be provided by an independent pricing service. Using fair value to price investments may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Funds that seek tax-exempt income are not recommended for purchase in IRAs or other qualified retirement plans. Foreign securities held by a fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in certain municipal bonds and thinly traded securities may provide short-term traders arbitrage opportunities. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors of the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## How to Buy Shares

**By Mail.** To open a regular account, complete an application and mail, together with a check payable to The Dreyfus Family of Funds, to:

The Dreyfus Family of Funds  
P.O. Box 55299  
Boston, MA 02205-8502

To purchase additional shares in a regular account, mail a check payable to The Dreyfus Family of Funds (with your account number on your check), together with an investment slip, to:

The Dreyfus Family of Funds  
P.O. Box 105  
Newark, NJ 07101-0105

**Electronic Check or Wire.** To purchase shares by wire or electronic check, please call 1-800-645-6561 (outside the U.S. 516-794-5452) for more information.

**Dreyfus TeleTransfer.** To purchase additional shares by Dreyfus TeleTransfer, which will transfer money from a pre-designated bank account, request the account service on your application. Call us at 1-800-645-6561 (outside the U.S. 516-794-5452) or visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction.

**Automatically.** You may purchase additional shares account by selecting one of Dreyfus' automatic investment services made available to the fund on your account application or service application. See "Services for Fund Investors."

**In Person.** Visit a Dreyfus Financial Center. Please call us for locations.

The minimum initial and subsequent investment for regular accounts is \$2,500 and \$100, respectively. Investments made through Dreyfus TeleTransfer are subject to a \$100 minimum and a \$150,000 maximum. All investments must be in U.S. dollars. Third-party checks, cash, travelers' checks or money orders will not be accepted. You may be charged a fee for any check that does not clear.

## How to Sell Shares

**You may sell (redeem) shares at any time.** Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

**Before selling** or writing a check against shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds (or selling the shares in the case of the Money Market Fund) for up to eight business days following the purchase of those shares;
- the fund will not honor redemption checks, or process wire, telephone, online or Dreyfus TeleTransfer redemption requests, for up to eight business days following the purchase of those shares.

**By Mail.** To redeem shares by mail, send a letter of instruction that includes your name, your account number, the name of the fund, the dollar amount to be redeemed and how and where to send the proceeds. Mail your request to:

The Dreyfus Family of Funds  
P.O. Box 55263  
Boston, MA 02205-8501

**A signature guarantee** is required for some written sell orders. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address
- amounts of \$100,000 or more

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call to ensure that your signature guarantee will be processed correctly.

**Telephone or Online.** To sell shares, call Dreyfus at 1-800-645-6561 (outside the U.S. 516-794-5452) or visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction.

A check will be mailed to your address of record or you may request a wire or electronic check (Dreyfus TeleTransfer). For wires or Dreyfus TeleTransfer, be sure that the fund has your bank account information on file. Proceeds will be wired or sent by electronic check to your bank account.

You may request that redemption proceeds be paid by check and mailed to your address (maximum \$250,000 per day). You may request that redemption proceeds be sent to your bank by wire (minimum \$1,000/maximum \$20,000) or by Dreyfus TeleTransfer (minimum \$500/maximum \$20,000). Holders of jointly registered fund or bank accounts may redeem by wire or through Dreyfus TeleTransfer for up to \$500,000 within any 30-day period.

**Automatically.** You may sell shares by calling 1-800-645-6561 (outside the U.S. 516-794-5452) for instructions to establish the Dreyfus Automatic Withdrawal Plan.

**In Person.** Visit a Dreyfus Financial Center. Please call us for locations.

## **General Policies**

**Unless you decline teleservice privileges** on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

If you invest through a financial intermediary (rather than directly with the distributor), the policies and fees may be different than those described herein. Banks, brokers, 401(k) plans, financial advisers and financial supermarkets may charge transaction fees and may set different minimum investments or limitations on buying or selling shares. Please consult your financial representative or the SAI.

**Money market funds generally** are used by investors for short-term investments, often in place of bank checking or savings accounts, or for cash management purposes. Investors value the ability to add and withdraw their funds quickly, without restriction. For this reason, although Dreyfus discourages excessive trading and other abusive trading practices, the Money Market Fund has not adopted policies and procedures, or imposed redemption fees or other restrictions such as minimum holding periods, to deter frequent purchases and redemptions of Money Market Fund shares. Dreyfus also believes that money market funds, such as the Money Market Fund, are not targets of abusive trading practices, because money market funds seek to maintain a \$1.00 per share price and typically do not fluctuate in value based on market prices. However, frequent purchases and redemptions of the Money Market Fund's shares could increase the fund's transaction costs, such as market spreads and custodial fees, and may interfere with the efficient management of the fund's portfolio, which could detract from the fund's performance. Accordingly, the Money Market Fund reserves the right to refuse any purchase or exchange

request. Fund in the Dreyfus Family of Funds that are not money market mutual funds have approved policies and procedures that are intended to discourage and prevent abusive trading practices in those mutual funds, which may apply to exchanges from or into the Money Market Fund. If you plan to exchange your Money Market Fund shares for shares of another Dreyfus fund, including the Bond Fund, please read the prospectus of that other Dreyfus fund for more information.

**The Bond Fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

**The fund also reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges, automatic non-discretionary rebalancing programs, and minimum required retirement distributions generally are not considered to be frequent trading. For employer-sponsored benefit plans, generally only participant-initiated exchange transactions are subject to the roundtrip limit.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus Funds and BNY Mellon Funds, and if known, in nonaffiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus and to

provide Dreyfus, upon request, with information concerning the trading activity of investors whose shares are held in omnibus accounts. If Dreyfus determines that any such investor has engaged in frequent trading of fund shares, Dreyfus may require the intermediary to restrict or prohibit future purchases or exchanges of fund shares by that investor.

Certain retirement plans and intermediaries that maintain omnibus accounts with the fund may have developed policies designed to control frequent trading that may differ from the fund's policy. At its sole discretion, the fund may permit such intermediaries to apply their own frequent trading policy. If you are investing in fund shares through an intermediary (or in the case of a retirement plan, your plan sponsor), please contact the intermediary for information on the frequent trading policies applicable to your account.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. Dreyfus has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

### **Small Account Policy**

To offset the relatively higher costs of servicing smaller accounts, each fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; IRA accounts; Education Savings Accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

**The fund earns dividends, interest** and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends once a month and capital gain distributions annually. Fund dividends and distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**The fund anticipates** that virtually all dividends paid to you will be exempt from federal and New York state and New York city personal income taxes. However, for federal tax purposes, certain distributions, such as distributions of short-term capital gains, are taxable to you as ordinary income, while long-term capital gains are taxable to you as capital gains.

**For New York state personal income tax purposes,** distributions derived from interest on municipal securities of New York issuers and from interest on qualifying securities issued by U.S. territories and possessions are generally exempt from New York state and New York city income taxes. Distributions that are federally taxable as ordinary income or capital gains are generally subject to state personal income taxes.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value.

**The tax status of any distribution** generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

---

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. If you purchase shares through a third party, the third party may impose different restrictions on these services and privileges, or may not make them available at all. For information, call your financial representative or 1-800-645-6561.

**Dreyfus Automatic Asset Builder®** permits you to purchase fund shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

**Dreyfus Payroll Savings Plan** permits you to purchase fund shares (minimum of \$100 per transaction) automatically through a payroll deduction.

**Dreyfus Government Direct Deposit** permits you to purchase fund shares (minimum of \$100 and maximum of \$50,000 per transaction) automatically from your federal employment, Social Security or other regular federal government check.

**Dreyfus Dividend Sweep** permits you to automatically reinvest dividends and distributions from the fund into another Dreyfus Fund (not available for IRAs).

**Dreyfus Auto-Exchange Privilege** permits you to exchange at regular intervals your fund shares for shares of other Dreyfus Funds.

**Dreyfus Automatic Withdrawal Plan** permits you to make withdrawals (minimum of \$50) on a monthly or quarterly basis, provided your account balance is at least \$5,000.

### **Exchange privilege**

**Generally, you can exchange shares worth \$500 or more** (no minimum for retirement accounts) into other Dreyfus Funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange generally will have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has one.

### **Dreyfus TeleTransfer privilege**

**To move money between your bank account and your Dreyfus Fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### **Account Statements**

**Every Dreyfus Fund investor** automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

### **Checkwriting privilege**

**You may write redemption checks** against your account in amounts of \$500 or more. These checks are free; however, a fee will be charged if you request a stop payment or if the transfer agent cannot honor a redemption check due to insufficient funds or another valid reason. Please do not postdate your checks or use them to close your account.

### **Dreyfus Express® voice-activated account access**

**You can easily manage your Dreyfus accounts**, check your account balances, purchase fund shares, transfer money between your Dreyfus Funds, get price and yield information, and much more, by calling **1-800-645-6561**. Certain requests require the services of a representative.

## FINANCIAL HIGHLIGHTS

### Dreyfus New York AMT-Free Municipal Money Market Fund

These financial highlights describe the performance of the fund's shares for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distributions. These financial highlights have been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

	Year Ended May 31,				
	2009	2008	2007	2006	2005
<b>Per Share Data (\$):</b>					
Net asset value, beginning of period	1.00	1.00	1.00	1.00	1.00

**SEC file number: 811-5160**

## **Dreyfus New York Tax Exempt Bond Fund, Inc.**

**SEC file number: 811-3726**

More information on each fund is available free upon request, including the following:

### **Annual/Semiannual Report**

Describes each fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at **www.dreyfus.com**.

### **Statement of Additional Information (SAI)**

Provides more details about a fund and its policies. A current SAI is available at **www.dreyfus.com** and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

### **Portfolio Holdings**

Dreyfus funds generally disclose their complete schedule of portfolio holdings monthly with a 30-day lag at **www.dreyfus.com** under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. Complete holdings as of the end of the calendar quarter are disclosed 15 days after the end of such quarter. Dreyfus money market funds generally disclose their complete schedule of holdings daily. The schedule of holdings for a fund will remain on the website until the fund files its Form N-Q or Form N-CSR for the period that includes the dates of the posted holdings.

A complete description of the funds' policies and procedures with respect to the disclosure of the funds' portfolio securities is available in the funds' SAI.
