The Fund

GOAL/APPROACH

The fund seeks long-term total return. To pursue this goal, the fund normally invests at least 80% of its assets in stocks. The fund's investments will be focused on companies located in the developed markets, such as the United States, Canada, Japan, Australia, Hong Kong and Western Europe. The fund ordinarily invests in at least three countries, and, at times, may invest a substantial portion of its assets in a single country. The fund may invest in the securities of companies of any market capitalization. The fund's stock investments may include common stocks, preferred stocks, convertible securities and warrants. Although the fund typically invests in seasoned issuers, it may purchase securities of companies in initial public offerings (IPOs) or shortly thereafter.

The fund's sub-investment adviser, Walter Scott & Partners Limited (WSPL), seeks investment opportunities in companies with fundamental strengths that indicate the potential for sustainable growth. WSPL focuses on individual stock selection, building the fund's portfolio from the bottom up through extensive fundamental research.

The investment process begins with the screening of reported company financials. Companies that meet certain broad absolute and trend criteria are candidates for more detailed financial analysis. For these companies, WSPL restates the company's income statement, flow of funds, and balance sheet to a cash basis. This analysis assists WSPL in identifying the nature of operating margin and value added, the variables contributing to value added, the operating efficiencies, the working capital management, the profitability and the financing model of the company. If a company passes WSPL's more stringent financial criteria, WSPL then conducts a detailed investigation of the company's products, cost and pricing, competition and industry position and outlook. Companies that meet the collective criteria of WSPL are visited with a view to under-

standing whether the company has the ability to generate sustained growth in the future. WSPL uses various valuation measures, including price-to-earnings ratio versus growth rate, price-to-cash and price-to-book. The fund's portfolio managers select those stocks that meet WSPL's criteria where the expected growth rate is available at reasonable valuations.

Geographic and sector allocations are results of, not part of, the investment process. WSPL does not use benchmark indices as a tool for active portfolio management. Traditional benchmark indices, however, may be helpful in measuring investment returns, and the fund's investment returns generally will be compared to those of the Morgan Stanley Capital International (MSCI) World Index.

Although the fund's investments will be focused among the major developed markets of the world, the fund may invest up to 20% of its assets in emerging markets.

WSPL believes that a patient investment approach is necessary to give the companies in which the fund invests an opportunity to realize their growth potential. Accordingly, it is expected that the fund typically will maintain a low annual portfolio turnover rate.

WSPL typically sells a stock when it no longer possesses the characteristics that caused its purchase. A stock may be a sell candidate when its valuation reaches or exceeds its calculated fair value, or there are deteriorating fundamentals. WSPL may reduce the weighting of a stock held by the fund if it becomes overweighted as determined by WSPL.

The fund may, but is not required to, use derivatives, such as futures, options and forward contracts, as a substitute for investing directly in an underlying asset, to increase returns, to manage foreign currency risk, or as part of a hedging strategy. The currency exposure of the fund's portfolio may be substantially unhedged to the U.S. dollar, but, at times, WSPL may seek to manage currency risk by hedging a portion of the fund's currency exposure to the U.S. dollar.

Concepts to understand

Growth companies: companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

MSCI World Index: an unmanaged, market capitalization-weighted index that is designed to measure the performance of publicly traded stocks issued by companies in developed markets, including the United States, Canada, Australia, Europe, New Zealand and the Far East.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Smaller company risk.* To the extent the fund invests in small and midsize companies, it will be subject to additional risks because the earnings and revenues of these companies tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities.
- *Growth stock risk.* Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing value stocks).
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. The securities of issuers located in emerging markets can be more volatile and less liquid than those of issuers in more mature economies.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time. A decline in the value of foreign currencies relative to the U.S. dollar will reduce the value of securities held by the fund and denominated in those currencies. Foreign currencies also are subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government controls.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically. Investments in foreign securities tend to have greater exposure to liquidity risk than domestic securities.

- *Leveraging risk.* The use of leverage, such as engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.
- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes and foreign currencies), and forward contracts. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *IPO risk.* The fund may purchase securities of companies in IPOs. The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

As a new fund, past performance information is not available for the fund as of the date of this prospectus.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

Fee table

	Class A	Class C	Class I	Class T
Shareholder transaction fees (<i>fees paid from your account</i>)				
Maximum front-end sales charge on purchases <i>% of offering price</i>	5.75	none	none	4.50
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	none*	1.00	none	none*
Annual fund operating expenses (<i>expenses paid from fund assets</i>) <i>% of average daily net assets</i>				
Management fees	.85	.85	.85	.85
Rule 12b-1 fee	none	.75	none	.25
Shareholder services fee	.25	.25	none	.25
Other expenses	.40	.40	.40	.40
Total	1.50	2.25	1.25	1.75

* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

Expense example

	1 Year	3 Years
Class A	\$719	\$1,022
Class C		
<i>with redemption</i>	\$328	\$703
<i>without redemption</i>	\$228	\$703
Class I	\$127	\$397
Class T	\$620	\$976

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. Dreyfus has contractually agreed, until November 30, 2007, to waive receipt of its fees and/or assume the expenses of the fund so that the expenses of none of the classes (excluding Rule 12b-1 fees, shareholder services fees, taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) exceed 1.25%.

Rule 12b-1 fee: the fee paid to the fund's distributor for financing the sale and distribution of Class C and Class T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

Shareholder services fee: the fee paid to the fund's distributor for providing shareholder services.

Other expenses: estimated fees to be paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund. Actual expenses may be greater or less than the amounts listed in the table above.

MANAGEMENT

Investment advisers

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$199 billion in approximately 180 mutual fund portfolios. The fund has agreed to pay Dreyfus a management fee at the annual rate of 0.85% of the fund's average daily net assets. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations, and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.8 trillion in assets under management, administration or custody, including \$1.034 trillion under management.

On May 24, 2007, the shareholders of Mellon Financial and The Bank of New York Company, Inc. (BNY) approved the proposed merger of the two companies. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, Dreyfus would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged its affiliate, Walter Scott & Partners Limited (WSPL), located at One Charlotte Square, Edinburgh, Scotland, UK, to serve as the fund's sub-investment adviser. WSPL is a wholly-owned subsidiary of Mellon Financial. As of September 30, 2006, WSPL had approximately \$28 billion in assets under management. WSPL, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

Investment decisions for the fund are made by a team of portfolio managers, which has managed the fund since the fund's inception. Dr. Ken Lyall and Dr. Walter Scott are the investment directors who lead the investment team with responsibility for the fund's portfolio. Dr. Scott founded WSPL in 1983 and currently is Chairman of WSPL. Dr. Lyall joined WSPL in 1983 and currently is a Director—Global Investments at WSPL.

The fund's Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, Dreyfus, WSPL and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each of the Dreyfus and WSPL code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the relevant code's preclearance and disclosure procedures. The primary purpose of each code is to ensure that personal trading by Dreyfus or WSPL employees does not disadvantage any fund managed by Dreyfus or WSPL, as the case may be.

Performance Information for Related Accounts

Although the fund is newly organized and does not yet have its own performance record, the fund's portfolio managers follow substantially the same investment policies and strategies managing the fund's assets as they do managing certain discretionary investment management accounts managed by WSPL (collectively, the "Related Accounts"). The tables below show the returns for the Related Accounts and for the MSCI World Index. The Index information is provided to represent the investment environment existing at the time periods shown. The Index is unmanaged and an investor may not invest directly in the Index. **No performance information is shown for the fund, which did not have its own performance record as of the date of this prospectus.** Investors should not consider this performance data as an indication of the future performance of the fund or the Related Accounts.

The performance figures for the Related Accounts reflect the deduction of the highest management fee charged any investor in the Related Accounts during the periods shown, and not that charged to the fund. Actual fees charged investors in the Related Accounts may vary. The fee schedule is disclosed in Part II of WSPL's Form ADV. The performance of the Related Accounts could have been adversely affected by the imposition of certain regulatory requirements, restrictions and limitations, if such accounts had been regulated as investment companies under the U.S. federal securities and tax laws. Additionally, although it is anticipated that the fund and the Related Accounts may hold similar securities, their investment results are expected to differ. In particular, differences in asset size and in cash flow resulting from purchases and redemptions of fund shares may result in different security selections, differences in the relative weightings of securities or differences in the price paid for particular fund holdings. The performance information does

not reflect the deduction of any applicable sales loads which, if reflected, would reduce the performance quoted. In addition, the fund's total operating expenses are expected to be higher than those of the Related Accounts; if the fund's expenses were reflected, the performance shown would be lower. Please remember that past performance is not indicative of future returns, and that the investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

Historical performance information for the Related Accounts and the MSCI World Index is shown below. The performance information was prepared and presented in compliance with the Global Investment Performance Standards (GIPS®). All returns are calculated in U.S. dollars and reflect the reinvestment of dividends and other distributions.

Additional information regarding WSPL's policies and procedures for calculating and reporting performance returns, and a listing and description of all of its composites, is available upon request for financial advisors by calling 1-800-334-6899 and for individual shareholders by calling 1-800-554-4611. WSPL's performance data (gross of fees) has been verified by an independent verifier on an annual basis from January 1, 1994 through December 31, 2006.

FINANCIAL HIGHLIGHTS

As a new fund, financial highlights information is not available for the fund as of the date of this prospectus.

Your Investment

SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

Deciding which class of shares to buy

This prospectus offers Class A, C, T and I shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

When you invest in Class A or Class T shares you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than Class C shares. Each class, except Class I shares, is subject to a shareholder service fee. Class I shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	Class A	Class C	Class T	Class I
Initial sales charge	up to 5.75%	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	no	no	no
Recommended purchase maximum	none	\$1 million	\$1 million	none

Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the Rule 12b-1 fee on Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class I shares), Class A shares will always be the most advantageous choice.

Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more*	none	none

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T shares may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more*	none	none

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Dreyfus Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at www.dreyfus.com and in the SAI.

You can reduce your initial sales charge in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds that are subject to a sales charge. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Dreyfus Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain Dreyfus Premier Funds or Dreyfus Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See “How to Buy Shares” in the SAI.)

Class A shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund’s distributor
- “wrap” accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund’s distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- qualified investors who (i) purchase Class A shares directly through the fund’s distributor, and (ii) have, or whose spouse or minor children have, beneficially owned shares and continuously maintained an open account directly through the distributor in a Dreyfus-managed fund, including the fund, or a Founders-managed fund since on or before February 28, 2006

- investors with cash proceeds from the investor's exercise of employment-related stock options, whether invested in the fund directly or indirectly through an exchange from a Dreyfus-managed money market fund, provided that the proceeds are processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing stock options. Upon establishing the account in the fund or the Dreyfus-managed money market fund, the investor and the investor's spouse or minor children become eligible to purchase Class A shares of the fund at NAV, whether or not using the proceeds of the employment-related stock options
- members of qualified affinity groups who purchase Class A shares directly through the fund's distributor, provided that the qualified affinity group has entered into an affinity agreement with the distributor

Class A and Class T shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the distribution proceeds from qualified and non-qualified retirement plans or a Dreyfus-sponsored 403(b)(7) plan, provided that, in the case of a qualified or non-qualified retirement plan, the rollover is processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing rollovers. Upon establishing the Dreyfus-sponsored IRA rollover account in the fund, the shareholder becomes eligible to make subsequent purchases of Class A or Class T shares of the fund at NAV in such account

Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay higher ongoing Rule 12b-1 fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Because Class A shares will always be a more favorable investment than Class C shares for investments of \$1 million or more, the fund will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC.

Class I share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class I shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on redemptions of Class I shares, and you do not pay any ongoing service or distribution fees.

Class I shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

CDSC waivers

The CDSC on Class A, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and non-qualified employee benefit plans

Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. When calculating NAV, the fund's equity investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Forward currency contracts will be valued at the current cost of offsetting the contract. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities, small-capitalization equity securities and certain other thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes C and R are offered at NAV, but Class C generally is subject to higher annual operating expenses and a CDSC.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
Regular accounts	\$1,000	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum <i>after the first year</i>

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on fund shares you acquired by reinvesting your fund dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or the SAI for additional details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
Check*	no minimum	\$250,000 per day
Wire	\$1,000	\$500,000 for joint accounts every 30 days/ \$20,000 per day
Dreyfus TeleTransfer	\$500	\$500,000 for joint accounts every 30 days/ \$20,000 per day

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing, and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders, and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control, or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policy

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

For investing

Dreyfus Automatic Asset Builder®	For making automatic investments from a designated bank account.
Dreyfus Payroll Savings Plan	For making automatic investments through a payroll deduction.
Dreyfus Government Direct Deposit Privilege	For making automatic investments from your federal employment, Social Security or other regular federal government check.
Dreyfus Dividend Sweep	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Dreyfus Founders funds (not available for IRAs).

For exchanging shares

Dreyfus Auto-Exchange Privilege	For making regular exchanges from the fund into another Dreyfus fund or certain Dreyfus Founders funds.
--	---

For selling shares

Dreyfus Automatic Withdrawal Plan	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	--

Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Dreyfus Founders fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call, or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

Reinvestment privilege

Upon written request, you can reinvest up to the number of Class A or Class T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

Account statements

Every fund investor automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

The Fund

GOAL/APPROACH

The fund seeks long-term total return. To pursue this goal, the fund normally invests at least 80% of its assets in stocks. The fund normally invests primarily in foreign companies located in the developed markets, such as Canada, Japan, Australia, Hong Kong and Western Europe. The fund ordinarily invests in at least three foreign countries, and, at times, may invest a substantial portion of its assets in a single foreign country. The fund may invest in the securities of companies of any market capitalization. The fund's stock investments may include common stocks, preferred stocks, convertible securities and warrants. Although the fund typically invests in seasoned issuers, it may purchase securities of companies in initial public offerings (IPOs) or shortly thereafter.

The fund's sub-investment adviser, Walter Scott & Partners Limited (WSPL), seeks investment opportunities in companies with fundamental strengths that indicate the potential for sustainable growth. WSPL focuses on individual stock selection, building the fund's portfolio from the bottom up through extensive fundamental research.

The investment process begins with the screening of reported company financials. Companies that meet certain broad absolute and trend criteria are candidates for more detailed financial analysis. For these companies, WSPL restates the company's income statement, flow of funds, and balance sheet to a cash basis. This analysis assists WSPL in identifying the nature of operating margin and value added, the variables contributing to value added, the operating efficiencies, the working capital management, the profitability and the financing model of the company. If a company passes WSPL's more stringent financial criteria, WSPL then conducts a detailed investigation of the company's products, cost and pricing, competition and industry position and outlook. Companies that meet the collective

criteria of WSPL are visited with a view to understanding whether the company has the ability to generate sustained growth in the future. WSPL uses various valuation measures, including price-to-earnings ratio versus growth rate, price-to-cash and price-to-book. The fund's portfolio managers then select those stocks that meet WSPL's criteria where the expected growth rate is available at reasonable valuations.

Geographic and sector allocations are results of, not part of, the investment process. WSPL does not use benchmark indices as a tool for active portfolio management. Traditional benchmark indices, however, may be helpful in measuring investment returns, and the fund's investment returns generally will be compared to those of the Morgan Stanley Capital International (MSCI) Europe, Australasia and Far East (EAFE®) Index.

Although the fund's investments will be focused among the major developed markets of the world, excluding the United States, the fund may invest up to 20% of its assets in emerging markets.

WSPL believes that a patient investment approach is necessary to give the companies in which the fund invests an opportunity to realize their growth potential. Accordingly, it is expected that the fund typically will maintain a low annual portfolio turnover rate.

WSPL typically sells a stock when it no longer possesses the characteristics that caused its purchase. A stock may be a sell candidate when its valuation reaches or exceeds its calculated fair value, or there are deteriorating fundamentals. WSPL may reduce the weighting of a stock held by the fund if it becomes overweighted as determined by WSPL.

The fund may, but is not required to, use derivatives, such as futures, options and forward contracts, as a substitute for investing directly in an underlying asset, to increase returns, to manage foreign currency risk, or as part of a hedging strategy. The currency exposure of the fund's portfolio may be substantially unhedged to the U.S. dollar, but, at times, WSPL may seek to manage currency risk by hedging a portion of the fund's currency exposure to the U.S. dollar.

Concepts to understand

Foreign companies: companies (i) that are organized under the laws of a foreign country; (ii) whose principal trading market is in a foreign country; or (iii) that have a majority of their assets, or that derive a significant portion of their revenue or profits from businesses, investments or sales, outside the United States.

Growth companies: companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

MSCI EAFE Index: an unmanaged, market capitalization-weighted index that is designed to measure the performance of publicly traded stocks issued by companies in developed markets, excluding the United States and Canada. While the EAFE Index excludes stocks of Canadian companies, the fund may invest in such stocks.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Foreign investment risk.* The fund's performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. The securities of issuers located in emerging markets can be more volatile and less liquid than those of issuers in more mature economies.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time. A decline in the value of foreign currencies relative to the U.S. dollar will reduce the value of securities held by the fund and denominated in those currencies. Foreign currencies also are subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government controls.
- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Smaller company risk.* To the extent the fund invests in small and midsize companies, it will be subject to additional risks because the earnings and revenues of these companies tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities.
- *Growth stock risk.* Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing value stocks).
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically. Investments in foreign securities tend to have greater exposure to liquidity risk than domestic securities.
- *Leveraging risk.* The use of leverage, such as engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.

- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes and foreign currencies), and forward contracts. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *IPO risk.* The fund may purchase securities of companies in IPOs. The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in securities of U.S. issuers, U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

As a new fund, past performance information is not available for the fund as of the date of this prospectus.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

Fee table

	Class A	Class C	Class I	Class T
Shareholder transaction fees (<i>fees paid from your account</i>)				
Maximum front-end sales charge on purchases <i>% of offering price</i>	5.75	none	none	4.50
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	none*	1.00	none	none*
Annual fund operating expenses (<i>expenses paid from fund assets</i>) <i>% of average daily net assets</i>				
Management fees	.85	.85	.85	.85
Rule 12b-1 fee	none	.75	none	.25
Shareholder services fee	.25	.25	none	.25
Other expenses	.40	.40	.40	.40
Total	1.50	2.25	1.25	1.75

* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

Expense example

	1 Year	3 Years
Class A	\$719	\$1,022
Class C		
<i>with redemption</i>	\$328	\$703
<i>without redemption</i>	\$228	\$703
Class I	\$127	\$397
Class T	\$620	\$976

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. Dreyfus has contractually agreed, until November 30, 2007, to waive receipt of its fees and/or assume the expenses of the fund so that the expenses of none of the classes (excluding Rule 12b-1 fees, shareholder services fees, taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) exceed 1.25%.

Rule 12b-1 fee: the fee paid to the fund's distributor for financing the sale and distribution of Class C and Class T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

Shareholder services fee: the fee paid to the fund's distributor for providing shareholder services.

Other expenses: estimated fees to be paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund. Actual expenses may be greater or less than the amounts listed in the table above.

MANAGEMENT

Investment advisers

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$199 billion in approximately 180 mutual fund portfolios. The fund has agreed to pay Dreyfus a management fee at the annual rate of 0.85% of the fund's average daily net assets. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations, and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.8 trillion in assets under management, administration or custody, including \$1.034 trillion under management.

On May 24, 2007, the shareholders of Mellon Financial and The Bank of New York Company, Inc. (BNY) approved the proposed merger of the two companies. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, Dreyfus would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged its affiliate, Walter Scott & Partners Limited (WSPL), located at One Charlotte Square, Edinburgh, Scotland, UK, to serve as the fund's sub-investment adviser. WSPL is a wholly-owned subsidiary of Mellon Financial. As of September 30, 2006, WSPL had approximately \$28 billion in assets under management. WSPL, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

Investment decisions for the fund are made by a team of portfolio managers, which has managed the fund since the fund's inception. Dr. Ken Lyall and Dr. Walter Scott are the investment directors who lead the investment team with responsibility for the fund's portfolio. Dr. Scott founded WSPL in 1983 and currently is Chairman of WSPL. Dr. Lyall joined WSPL in 1983 and currently is a Director—Global Investment at WSPL.

The fund's Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, Dreyfus, WSPL and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each of the Dreyfus and WSPL code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the relevant code's preclearance and disclosure procedures. The primary purpose of each code is to ensure that personal trading by Dreyfus or WSPL employees does not disadvantage any fund managed by Dreyfus or WSPL, as the case may be.

Performance Information for Related Accounts

Although the fund is newly organized and does not yet have its own performance record, the fund's portfolio managers follow substantially the same investment policies and strategies managing the fund's assets as they do managing certain discretionary investment management accounts managed by WSPL (collectively, the "Related Accounts"). The tables below show the returns for the Related Accounts and for the MSCI EAFE Index. The Index information is provided to represent the investment environment existing at the time periods shown. The Index is unmanaged and an investor may not invest directly in the Index. **No performance information is shown for the fund, which did not have its own performance record as of the date of this prospectus.** Investors should not consider this performance data as an indication of the future performance of the fund or the Related Accounts.

The performance figures for the Related Accounts reflect the deduction of the highest management fee charged any investor in the Related Accounts during the periods shown, and not that charged to the fund. Actual fees charged investors in the Related Accounts may vary. The fee schedule is disclosed in Part II of WSPL's Form ADV. The performance of the Related Accounts could have been adversely affected by the imposition of certain regulatory requirements, restrictions and limitations, if such accounts had been regulated as investment companies under the U.S. federal securities and tax laws. Additionally, although it is anticipated that the fund and the Related Accounts may hold similar securities, their investment results are expected to differ. In particular, differences in asset size and in cash flow resulting from purchases and redemptions

of fund shares may result in different security selections, differences in the relative weightings of securities or differences in the price paid for particular fund holdings. The performance information does not reflect the deduction of any applicable sales loads which, if reflected, would reduce the performance quoted. In addition, the fund's total operating expenses are expected to be higher than those of the Related Accounts; if the fund's expenses were reflected, the performance shown would be lower. Please remember that past performance is not indicative of future returns, and that the investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

Historical performance information for the Related Accounts and the MSCI EAFE Index is shown below. The performance information was prepared and presented in compliance with the Global Investment Performance Standards (GIPS®). All returns are calculated in U.S. dollars and reflect the reinvestment of dividends and other distributions.

Additional information regarding WSPL's policies and procedures for calculating and reporting performance returns, and a listing and description of all of its composites, is available upon request for financial advisors by calling 1-800-334-6899 and for individual shareholders by calling 1-800-554-4611. WSPL's performance data (gross of fees) has been verified by an independent verifier on an annual basis from January 1, 1994 through December 31, 2006.

FINANCIAL HIGHLIGHTS

As a new fund, financial highlights information is not available for the fund as of the date of this prospectus.

Your Investment

SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

Deciding which class of shares to buy

This prospectus offers Class A, C, T and I shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

When you invest in Class A or Class T shares you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than Class C shares. Each class, except Class I shares, is subject to a shareholder service fee. Class I shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	Class A	Class C	Class T	Class I
Initial sales charge	up to 5.75%	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	no	no	no
Recommended purchase maximum	none	\$1 million	\$1 million	none

Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See "Sales charge reductions and waivers.")

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the Rule 12b-1 fee on Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class I shares), Class A shares will always be the most advantageous choice.

Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more*	none	none

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See "Sales charge reductions and waivers.")

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T shares may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more*	none	none

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Dreyfus Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at www.dreyfus.com and in the SAI.

You can reduce your initial sales charge in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds that are subject to a sales charge. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Dreyfus Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain Dreyfus Premier Funds or Dreyfus Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See “How to Buy Shares” in the SAI.)

Class A shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund’s distributor
- “wrap” accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund’s distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- qualified investors who (i) purchase Class A shares directly through the fund’s distributor, and (ii) have, or whose spouse or minor children have, beneficially owned shares and continuously maintained an open account directly through the distributor in a Dreyfus-managed fund, including the fund, or a Founders-managed fund since on or before February 28, 2006

- investors with cash proceeds from the investor's exercise of employment-related stock options, whether invested in the fund directly or indirectly through an exchange from a Dreyfus-managed money market fund, provided that the proceeds are processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing stock options. Upon establishing the account in the fund or the Dreyfus-managed money market fund, the investor and the investor's spouse or minor children become eligible to purchase Class A shares of the fund at NAV, whether or not using the proceeds of the employment-related stock options
- members of qualified affinity groups who purchase Class A shares directly through the fund's distributor, provided that the qualified affinity group has entered into an affinity agreement with the distributor

Class A and Class T shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the distribution proceeds from qualified and non-qualified retirement plans or a Dreyfus-sponsored 403(b)(7) plan, provided that, in the case of a qualified or non-qualified retirement plan, the rollover is processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing rollovers. Upon establishing the Dreyfus-sponsored IRA rollover account in the fund, the shareholder becomes eligible to make subsequent purchases of Class A or Class T shares of the fund at NAV in such account

Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay higher ongoing Rule 12b-1 fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Because Class A shares will always be a more favorable investment than Class C shares for investments of \$1 million or more, the fund will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC.

Class I share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class I shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on redemptions of Class I shares, and you do not pay any ongoing service or distribution fees.

Class I shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

CDSC waivers

The CDSC on Class A, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and non-qualified employee benefit plans

Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. When calculating NAV, the fund's equity investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Forward currency contracts will be valued at the current cost of offsetting the contract. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities, small-capitalization equity securities and certain other thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes C and R are offered at NAV, but Class C generally is subject to higher annual operating expenses and a CDSC.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
Regular accounts	\$1,000	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum <i>after the first year</i>

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on fund shares you acquired by reinvesting your fund dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or the SAI for additional details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
Check*	no minimum	\$250,000 per day
Wire	\$1,000	\$500,000 for joint accounts every 30 days/ \$20,000 per day
Dreyfus TeleTransfer	\$500	\$500,000 for joint accounts every 30 days/ \$20,000 per day

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing, and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders, and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control, or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policy

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

For investing

Dreyfus Automatic Asset Builder®	For making automatic investments from a designated bank account.
Dreyfus Payroll Savings Plan	For making automatic investments through a payroll deduction.
Dreyfus Government Direct Deposit Privilege	For making automatic investments from your federal employment, Social Security or other regular federal government check.
Dreyfus Dividend Sweep	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Dreyfus Founders funds (not available for IRAs).

For exchanging shares

Dreyfus Auto-Exchange Privilege	For making regular exchanges from the fund into another Dreyfus fund or certain Dreyfus Founders funds.
--	---

For selling shares

Dreyfus Automatic Withdrawal Plan	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	--

Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Dreyfus Founders fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call, or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

Reinvestment privilege

Upon written request, you can reinvest up to the number of Class A or Class T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

Account statements

Every fund investor automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

This prospectus offers Class I shares of the fund and is designed to be used only by clients of Mellon's Private Wealth Management group that maintain qualified fiduciary, custody, advisory or other accounts with Mellon Bank, N.A. or Mellon Trust of New England, N.A., or their affiliates.

GOAL/APPROACH

The fund seeks long-term total return. To pursue this goal, the fund normally invests at least 80% of its assets in stocks. The fund's investments will be focused on companies located in the developed markets, such as the United States, Canada, Japan, Australia, Hong Kong and Western Europe. The fund ordinarily invests in at least three countries, and, at times, may invest a substantial portion of its assets in a single country. The fund may invest in the securities of companies of any market capitalization. The fund's stock investments may include common stocks, preferred stocks, convertible securities and warrants. Although the fund typically invests in seasoned issuers, it may purchase securities of companies in initial public offerings (IPOs) or shortly thereafter.

The fund's sub-investment adviser, Walter Scott & Partners Limited (WSPL), seeks investment opportunities in companies with fundamental strengths that indicate the potential for sustainable growth. WSPL focuses on individual stock selection, building the fund's portfolio from the bottom up through extensive fundamental research.

The investment process begins with the screening of reported company financials. Companies that meet certain broad absolute and trend criteria are candidates for more detailed financial analysis. For these companies, WSPL restates the company's income statement, flow of funds, and balance sheet to a cash basis. This analysis assists WSPL in identifying the nature of operating margin and value added, the variables contributing to value added, the operating efficiencies, the working capital management, the profitability and the financing model of the company. If a company passes WSPL's more stringent financial criteria, WSPL then conducts a detailed investigation of the company's products, cost and pricing, competition and industry position and outlook. Companies that meet the collective criteria of WSPL are visited with a view to under-

standing whether the company has the ability to generate sustained growth in the future. WSPL uses various valuation measures, including price-to-earnings ratio versus growth rate, price-to-cash and price-to-book. The fund's portfolio managers select those stocks that meet WSPL's criteria where the expected growth rate is available at reasonable valuations.

Geographic and sector allocations are results of, not part of, the investment process. WSPL does not use benchmark indices as a tool for active portfolio management. Traditional benchmark indices, however, may be helpful in measuring investment returns, and the fund's investment returns generally will be compared to those of the Morgan Stanley Capital International (MSCI) World Index.

Although the fund's investments will be focused among the major developed markets of the world, the fund may invest up to 20% of its assets in emerging markets.

WSPL believes that a patient investment approach is necessary to give the companies in which the fund invests an opportunity to realize their growth potential. Accordingly, it is expected that the fund typically will maintain a low annual portfolio turnover rate.

WSPL typically sells a stock when it no longer possesses the characteristics that caused its purchase. A stock may be a sell candidate when its valuation reaches or exceeds its calculated fair value, or there are deteriorating fundamentals. WSPL may reduce the weighting of a stock held by the fund if it becomes overweighted as determined by WSPL.

The fund may, but is not required to, use derivatives, such as futures, options and forward contracts, as a substitute for investing directly in an underlying asset, to increase returns, to manage foreign currency risk, or as part of a hedging strategy. The currency exposure of the fund's portfolio may be substantially unhedged to the U.S. dollar, but, at times, WSPL may seek to manage currency risk by hedging a portion of the fund's currency exposure to the U.S. dollar.

Concepts to understand

Growth companies: companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

MSCI World Index: an unmanaged, market capitalization-weighted index that is designed to measure the performance of publicly traded stocks issued by companies in developed markets, including the United States, Canada, Australia, Europe, New Zealand and the Far East.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Smaller company risk.* To the extent the fund invests in small and midsize companies, it will be subject to additional risks because the earnings and revenues of these companies tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities.
- *Growth stock risk.* Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing value stocks).
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. The securities of issuers located in emerging markets can be more volatile and less liquid than those of issuers in more mature economies.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time. A decline in the value of foreign currencies relative to the U.S. dollar will reduce the value of securities held by the fund and denominated in those currencies. Foreign currencies also are subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government controls.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically. Investments in foreign securities tend to have greater exposure to liquidity risk than domestic securities.

- *Leveraging risk.* The use of leverage, such as engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.
- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes and foreign currencies), and forward contracts. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *IPO risk.* The fund may purchase securities of companies in IPOs. The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

As a new fund, past performance information is not available for the fund as of the date of this prospectus.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Because annual fund operating expenses are paid out of fund assets, their effect is included in the share price. The fund's Class I shares have no sales charge (load) or Rule 12b-1 distribution fees.

Fee table

	Class I
Annual fund operating expenses <i>% of average daily net assets</i>	
Management fees	.85
Other expenses	.40
Total	1.25

Expense example

	1 Year	3 Years
Class I	\$127	\$397

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to the fund's investment adviser for managing the fund's portfolio and assisting in all aspects of the fund's operations. The fund's investment adviser has contractually agreed, until November 30, 2007, to waive receipt of its fees and/or assume the expenses of the fund so that the expenses of the fund's Class I shares (excluding taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) do not exceed 1.25%.

Other expenses: estimated fees to be paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund. Actual expenses may be greater or less than the amounts listed in the Fee table.

MANAGEMENT

Investment advisers

The investment adviser for the fund is The Dreyfus Corporation (investment adviser), 200 Park Avenue, New York, New York 10166. Founded in 1947, the investment adviser manages approximately \$199 billion in approximately 180 mutual fund portfolios. The fund has agreed to pay the investment adviser a management fee at the annual rate of 0.85% of the fund's average daily net assets. The investment adviser is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations, and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.8 trillion in assets under management, administration or custody, including \$1.034 trillion under management.

On May 24, 2007, the shareholders of Mellon Financial and The Bank of New York Company, Inc. (BNY) approved the proposed merger of the two companies. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, the investment adviser would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The investment adviser has engaged its affiliate, Walter Scott & Partners Limited (WSPL), located at One Charlotte Square, Edinburgh, Scotland, UK, to serve as the fund's sub-investment adviser. WSPL is a wholly-owned subsidiary of Mellon Financial. As of September 30, 2006, WSPL had approximately \$28 billion in assets under management. WSPL, subject to the investment adviser's supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

Investment decisions for the fund are made by a team of portfolio managers, which has managed the fund since the fund's inception. Dr. Ken Lyall and Dr. Walter Scott are the investment directors who lead the investment team with responsibility for the fund's portfolio. Dr. Scott founded WSPL in 1983 and currently is Chairman of WSPL. Dr. Lyall joined WSPL in 1983 and currently is a Director—Global Investments at WSPL.

The fund's Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of the investment adviser. The investment adviser or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, the investment adviser or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your account officer for details about any payments the account officer's firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, the investment adviser, WSPL and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The code of ethics of each of the investment adviser and WSPL restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the relevant code's preclearance and disclosure procedures. The primary purpose of each code is to ensure that personal trading by employees of the investment adviser or WSPL does not disadvantage any fund managed by the investment adviser or WSPL, as the case may be.

Performance Information for Related Accounts

Although the fund is newly organized and does not yet have its own performance record, the fund's portfolio managers follow substantially the same investment policies and strategies managing the fund's assets as they do managing certain discretionary investment management accounts managed by WSPL (collectively, the "Related Accounts"). The tables below show the returns for the Related Accounts and for the MSCI World Index. The Index information is provided to represent the investment environment existing at the time periods shown. The Index is unmanaged and an investor may not invest directly in the Index. **No performance information is shown for the fund, which did not have its own performance record as of the date of this prospectus.** Investors should not consider this performance data as an indication of the future performance of the fund or the Related Accounts.

The performance figures for the Related Accounts reflect the deduction of the highest management fee charged any investor in the Related Accounts during the periods shown, and not that charged to the fund. Actual fees charged investors in the Related Accounts may vary. The fee schedule is disclosed in Part II of WSPL's Form ADV. The performance of the Related Accounts could have been adversely affected by the imposition of certain regulatory requirements, restrictions and limitations, if such accounts had been regulated as investment companies under the U.S. federal securities and tax laws. Additionally, although it is anticipated that the fund and the Related Accounts may hold similar securities, their investment results are expected to differ. In particular, differences in asset size and in cash flow resulting from purchases and redemptions of fund shares may result in different security selections, differences in the relative weightings of securities or differences in the price paid for particular fund holdings. The performance information does

not reflect the deduction of any applicable sales loads which, if reflected, would reduce the performance quoted. In addition, the fund's total operating expenses are expected to be higher than those of the Related Accounts; if the fund's expenses were reflected, the performance shown would be lower. Please remember that past performance is not indicative of future returns, and that the investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

Historical performance information for the Related Accounts and the MSCI World Index is shown below. The performance information was prepared and presented in compliance with the Global Investment Performance Standards (GIPS®). All returns are calculated in U.S. dollars and reflect the reinvestment of dividends and other distributions.

Additional information regarding WSPL's policies and procedures for calculating and reporting performance returns, and a listing and description of all of its composites, is available upon request for financial advisors by calling 1-800-334-6899 and for individual shareholders by calling 1-800-554-4611. WSPL's performance data (gross of fees) has been verified by an independent verifier on an annual basis from January 1, 1994 through December 31, 2006.

FINANCIAL HIGHLIGHTS

As a new fund, financial highlights information is not available for the fund as of the date of this prospectus.

Your Investment

ACCOUNT POLICIES

Buying shares

The fund is offering its Class I shares in this prospectus.

Clients of Mellon's Private Wealth Management group that maintain qualified fiduciary, custody, advisory or other accounts with Mellon Bank, N.A. or Mellon Trust of New England, N.A., or their affiliates, are eligible to purchase Class I shares of the fund.

To purchase Class I shares of the fund, contact your account officer.

You pay no sales charges to invest in Class I shares of the fund. Your price for Class I shares is the net asset value per share (NAV) for that class, which is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. When calculating NAV, the fund's equity investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures con-

tracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Forward currency contracts will be valued at the current cost of offsetting the contract. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities, small-capitalization equity securities and certain other thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding.

Selling shares

To sell (redeem) Class I shares of the fund, contact your account officer.

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Your order will be processed promptly and you will generally receive the proceeds within a week.

General policies

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, the investment adviser and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing, and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. The investment adviser and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in the investment adviser's view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

The investment adviser monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, the investment adviser evaluates trading activity in the account for evidence of frequent trading. The investment adviser considers the investor's trading history in other accounts under common ownership or control, in certain other funds managed by the investment adviser or its affiliates, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while the investment adviser seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, the investment adviser seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If the investment adviser concludes the account is likely to engage in frequent trading, the investment adviser may cancel or revoke the purchase or exchange on the following business day. The investment adviser may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, the investment adviser may apply these restrictions across all accounts under common ownership, control, or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. The investment adviser's ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through automatic investment plans, automatic withdrawal plans, auto-exchange privileges and automatic non-discretionary rebalancing programs approved in writing by the investment adviser generally are not considered to be frequent trading.

Small account policy

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

This prospectus offers Class I shares of the fund and is designed to be used only by clients of Mellon's Private Wealth Management group that maintain qualified fiduciary, custody, advisory or other accounts with Mellon Bank, N.A. or Mellon Trust of New England, N.A., or their affiliates.

GOAL/APPROACH

The fund seeks long-term total return. To pursue this goal, the fund normally invests at least 80% of its assets in stocks. The fund normally invests primarily in foreign companies located in the developed markets, such as Canada, Japan, Australia, Hong Kong and Western Europe. The fund ordinarily invests in at least three foreign countries, and, at times, may invest a substantial portion of its assets in a single foreign country. The fund may invest in the securities of companies of any market capitalization. The fund's stock investments may include common stocks, preferred stocks, convertible securities and warrants. Although the fund typically invests in seasoned issuers, it may purchase securities of companies in initial public offerings (IPOs) or shortly thereafter.

The fund's sub-investment adviser, Walter Scott & Partners Limited (WSPL), seeks investment opportunities in companies with fundamental strengths that indicate the potential for sustainable growth. WSPL focuses on individual stock selection, building the fund's portfolio from the bottom up through extensive fundamental research.

The investment process begins with the screening of reported company financials. Companies that meet certain broad absolute and trend criteria are candidates for more detailed financial analysis. For these companies, WSPL restates the company's income statement, flow of funds, and balance sheet to a cash basis. This analysis assists WSPL in identifying the nature of operating margin and value added, the variables contributing to value added, the operating efficiencies, the working capital management, the profitability and the financing model of the company. If a company passes WSPL's more stringent financial criteria, WSPL then conducts a detailed investigation of the company's products, cost and pricing, competition and industry position and outlook. Companies that meet the collective

criteria of WSPL are visited with a view to understanding whether the company has the ability to generate sustained growth in the future. WSPL uses various valuation measures, including price-to-earnings ratio versus growth rate, price-to-cash and price-to-book. The fund's portfolio managers then select those stocks that meet WSPL's criteria where the expected growth rate is available at reasonable valuations.

Geographic and sector allocations are results of, not part of, the investment process. WSPL does not use benchmark indices as a tool for active portfolio management. Traditional benchmark indices, however, may be helpful in measuring investment returns, and the fund's investment returns generally will be compared to those of the Morgan Stanley Capital International (MSCI) Europe, Australasia and Far East (EAFE®) Index.

Although the fund's investments will be focused among the major developed markets of the world, excluding the United States, the fund may invest up to 20% of its assets in emerging markets.

WSPL believes that a patient investment approach is necessary to give the companies in which the fund invests an opportunity to realize their growth potential. Accordingly, it is expected that the fund typically will maintain a low annual portfolio turnover rate.

WSPL typically sells a stock when it no longer possesses the characteristics that caused its purchase. A stock may be a sell candidate when its valuation reaches or exceeds its calculated fair value, or there are deteriorating fundamentals. WSPL may reduce the weighting of a stock held by the fund if it becomes overweighted as determined by WSPL.

The fund may, but is not required to, use derivatives, such as futures, options and forward contracts, as a substitute for investing directly in an underlying asset, to increase returns, to manage foreign currency risk, or as part of a hedging strategy. The currency exposure of the fund's portfolio may be substantially unhedged to the U.S. dollar, but, at times, WSPL may seek to manage currency risk by hedging a portion of the fund's currency exposure to the U.S. dollar.

Concepts to understand

Foreign companies: companies (i) that are organized under the laws of a foreign country; (ii) whose principal trading market is in a foreign country; or (iii) that have a majority of their assets, or that derive a significant portion of their revenue or profits from businesses, investments or sales, outside the United States.

Growth companies: companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

MSCI EAFE Index: an unmanaged, market capitalization-weighted index that is designed to measure the performance of publicly traded stocks issued by companies in developed markets, excluding the United States and Canada. While the EAFE Index excludes stocks of Canadian companies, the fund may invest in such stocks.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Foreign investment risk.* The fund's performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. The securities of issuers located in emerging markets can be more volatile and less liquid than those of issuers in more mature economies.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time. A decline in the value of foreign currencies relative to the U.S. dollar will reduce the value of securities held by the fund and denominated in those currencies. Foreign currencies also are subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government controls.
- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Smaller company risk.* To the extent the fund invests in small and midsize companies, it will be subject to additional risks because the earnings and revenues of these companies tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities.
- *Growth stock risk.* Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing value stocks).
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically. Investments in foreign securities tend to have greater exposure to liquidity risk than domestic securities.
- *Leveraging risk.* The use of leverage, such as engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.

- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes and foreign currencies), and forward contracts. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *IPO risk.* The fund may purchase securities of companies in IPOs. The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in securities of U.S. issuers, U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

As a new fund, past performance information is not available for the fund as of the date of this prospectus.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Because annual fund operating expenses are paid out of fund assets, their effect is included in the share price. The fund's Class I shares have no sales charge (load) or Rule 12b-1 distribution fees.

Fee table

	Class I
Annual fund operating expenses	
<i>% of average daily net assets</i>	
Management fees	.85
Other expenses	.40
Total	1.25

Expense example

	1 Year	3 Years
Class I	\$127	\$397

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to the fund's investment adviser for managing the fund's portfolio and assisting in all aspects of the fund's operations. The fund's investment adviser has contractually agreed, until November 30, 2007, to waive receipt of its fees and/or assume the expenses of the fund so that the expenses of the fund's Class I shares (excluding taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) do not exceed 1.25%.

Other expenses: estimated fees to be paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund. Actual expenses may be greater or less than the amounts listed in the Fee table.

MANAGEMENT

Investment advisers

The investment adviser for the fund is The Dreyfus Corporation (investment adviser), 200 Park Avenue, New York, New York 10166. Founded in 1947, the investment adviser manages approximately \$199 billion in approximately 180 mutual fund portfolios. The fund has agreed to pay the investment adviser a management fee at the annual rate of 0.85% of the fund's average daily net assets. The investment adviser is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations, and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.8 trillion in assets under management, administration or custody, including \$1.034 trillion under management.

On May 24, 2007, the shareholders of Mellon Financial and The Bank of New York Company, Inc. (BNY) approved the proposed merger of the two companies. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, the investment adviser would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The investment adviser has engaged its affiliate, Walter Scott & Partners Limited (WSPL), located at One Charlotte Square, Edinburgh, Scotland, UK, to serve as the fund's sub-investment adviser. WSPL is a wholly-owned subsidiary of Mellon Financial. As of September 30, 2006, WSPL had approximately \$28 billion in assets under management. WSPL, subject to the investment adviser's supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

Investment decisions for the fund are made by a team of portfolio managers, which has managed the fund since the fund's inception. Dr. Ken Lyall and Dr. Walter Scott are the investment directors who lead the investment team with responsibility for the fund's portfolio. Dr. Scott founded WSPL in 1983 and currently is Chairman of WSPL. Dr. Lyall joined WSPL in 1983 and currently is a Director—Global Investment at WSPL.

The fund's Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of the investment adviser. The investment adviser or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, the investment adviser or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your account officer for details about any payments the account officer's firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, the investment adviser, WSPL and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The code of ethics of each of the investment adviser and WSPL restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the relevant code's preclearance and disclosure procedures. The primary purpose of each code is to ensure that personal trading by employees of the investment adviser or WSPL does not disadvantage any fund managed by the investment adviser or WSPL, as the case may be.

Performance Information for Related Accounts

Although the fund is newly organized and does not yet have its own performance record, the fund's portfolio managers follow substantially the same investment policies and strategies managing the fund's assets as they do managing certain discretionary investment management accounts managed by WSPL (collectively, the "Related Accounts"). The tables below show the returns for the Related Accounts and for the MSCI EAFE Index. The Index information is provided to represent the investment environment existing at the time periods shown. The Index is unmanaged and an investor may not invest directly in the Index. **No performance information is shown for the fund, which did not have its own performance record as of the date of this prospectus.** Investors should not consider this performance data as an indication of the future performance of the fund or the Related Accounts.

The performance figures for the Related Accounts reflect the deduction of the highest management fee charged any investor in the Related Accounts during the periods shown, and not that charged to the fund. Actual fees charged investors in the Related Accounts may vary. The fee schedule is disclosed in Part II of WSPL's Form ADV. The performance of the Related Accounts could have been adversely affected by the imposition of certain regulatory requirements, restrictions and limitations, if such accounts had been regulated as investment companies under the U.S. federal securities and tax laws. Additionally, although it is anticipated that the fund and the Related Accounts may hold similar securities, their investment results are expected to differ. In particular, differences in asset size and in cash flow resulting from purchases and redemptions

of fund shares may result in different security selections, differences in the relative weightings of securities or differences in the price paid for particular fund holdings. The performance information does not reflect the deduction of any applicable sales loads which, if reflected, would reduce the performance quoted. In addition, the fund's total operating expenses are expected to be higher than those of the Related Accounts; if the fund's expenses were reflected, the performance shown would be lower. Please remember that past performance is not indicative of future returns, and that the investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

Historical performance information for the Related Accounts and the MSCI EAFE Index is shown below. The performance information was prepared and presented in compliance with the Global Investment Performance Standards (GIPS®). All returns are calculated in U.S. dollars and reflect the reinvestment of dividends and other distributions.

Additional information regarding WSPL's policies and procedures for calculating and reporting performance returns, and a listing and description of all of its composites, is available upon request for financial advisors by calling 1-800-334-6899 and for individual shareholders by calling 1-800-554-4611. WSPL's performance data (gross of fees) has been verified by an independent verifier on an annual basis from January 1, 1994 through December 31, 2006.

FINANCIAL HIGHLIGHTS

As a new fund, financial highlights information is not available for the fund as of the date of this prospectus.

Your Investment

ACCOUNT POLICIES

Buying shares

The fund is offering its Class I shares in this prospectus.

Clients of Mellon's Private Wealth Management group that maintain qualified fiduciary, custody, advisory or other accounts with Mellon Bank, N.A. or Mellon Trust of New England, N.A., or their affiliates, are eligible to purchase Class I shares of the fund.

To purchase Class I shares of the fund, contact your account officer.

You pay no sales charges to invest in Class I shares of the fund. Your price for Class I shares is the net asset value per share (NAV) for that class, which is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. When calculating NAV, the fund's equity investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities

and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Forward currency contracts will be valued at the current cost of offsetting the contract. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities, small-capitalization equity securities and certain other thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding.

Selling shares

To sell (redeem) Class I shares of the fund, contact your account officer.

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Your order will be processed promptly and you will generally receive the proceeds within a week.

General policies

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, the investment adviser and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing, and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. The investment adviser and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in the investment adviser's view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

The investment adviser monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, the investment adviser evaluates trading activity in the account for evidence of frequent trading. The investment adviser considers the investor's trading history in other accounts under common ownership or control, in certain other funds managed by the investment adviser or its affiliates, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while the investment adviser seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, the investment adviser seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If the investment adviser concludes the account is likely to engage in frequent trading, the investment adviser may cancel or revoke the purchase or exchange on the following business day. The investment adviser may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, the investment adviser may apply these restrictions across all accounts under common ownership, control, or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. The investment adviser's ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through automatic investment plans, automatic withdrawal plans, auto-exchange privileges and automatic non-discretionary rebalancing programs approved in writing by the investment adviser generally are not considered to be frequent trading.

Small account policy

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

For More Information

International Stock Fund

A series of Strategic Funds, Inc.

SEC file number: 811-3940

More information on this fund is available free upon request, including the following:

Statement of Additional Information (SAI)

Provides more details about the fund and its policies. A current SAI is available at www.dreyfus.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at www.dreyfus.com its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.
