NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation and Significant Accounting Policies

These Consolidated Financial Statements are unaudited and have been prepared pursuant to instructions for the Quarterly Report on Form 10-Q required to be filed with the Securities and Exchange Commission and do not include all information and footnotes normally included in financial statements prepared in accordance with generally accepted accounting principles. Management has reflected all adjustments that it believes are necessary to present fairly Oceaneering's financial position at March 31, 2001 and its results of operations and cash flows for the periods presented. All such adjustments are of a normal recurring nature. The financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in Oceaneering's Report on Form 10-K for the period ended December 31, 2000. The results for interim periods are not necessarily indicative of annual results.

2. Shareholders' Equity

Shareholders' Equity consisted of the following:

	March 31, 2001	December 31, 2000
	<i>(in thousands)</i>	
Common Stock, par value \$0.25; 90,000,000 shares authorized; 24,017,046 shares issued	\$ 6,004	\$ 6,004

Accumulated other elements of comprehensive income	<u>(19,977)</u>	<u>(16,738)</u>
Total shareholders' equity	<u>\$214,004</u>	<u>\$206,894</u>

3. Income Taxes

Cash taxes paid were \$1.9 million and \$0.8 million for the three months ended March 31, 2001 and 2000, respectively.

4. Earnings Per Share

Oceaneering has computed earnings per share in accordance with Financial Accounting Standards Board Standard Number ("SFAS") 128, "Earnings Per Share."

5. Business Segment Information

Oceaneering supplies a comprehensive range of technical services and specialty products to a variety of industries. Oceaneering's Offshore Oil and Gas business consists of four business segments: Remotely Operated Vehicles ("ROVs"); Subsea Products; Mobile Offshore Production Systems; and Other Services. Oceaneering's Advanced Technologies business is a separate segment that provides project management, engineering services and equipment for applications outside the oil and gas industry.

There are no differences in the basis of segmentation or in the basis of measurement of segment profit or loss from those used in Oceaneering's consolidated financial statements for the period ended December 31, 2000. The following summarizes certain financial data by business segment:

6. Comprehensive Income

Effective April 1, 1998, Oceaneering adopted SFAS 130, "Reporting Comprehensive Income." This statement establishes standards for reporting and displaying comprehensive income and its components. Comprehensive income is the total of net income and all nonowner changes in equity. The amounts of comprehensive income for each of the three-month periods ended March 31, 2001 and 2000 are as follows:

	Three Months Ended	
	March 31, <u>2001</u>	March 31, <u>2000</u>

Accumulated Foreign Currency Translation Adjustments	<u>\$(19,977)</u>	<u>\$(16,738)</u>

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

All statements in this Form 10-Q, other than statements of historical facts, including, without limitation, statements regarding our business strategy, plans for future operations, and industry conditions, are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are subject to various risks, uncertainties and assumptions, including those we refer to under the headings "Business – Risks and Insurance" and "Cautionary Statement Concerning Forward-Looking Statements" in Part I of our Report on Form 10-K for the period ended December 31, 2000. Although we believe that the expectations reflected in such forward-looking statements are reasonable, because of the inherent limitations in the forecasting process, as well as the relatively volatile nature of the industries in which we operate, we can give no assurance that those expectations will prove to be correct. Accordingly, evaluation of our future prospects must be made with caution when relying on forward-looking information.

Material Changes in Financial Condition

We consider our liquidity and capital resources adequate to support our operations and capital commitments. At March 31, 2001, we had working capital of \$69 million and we had \$35 million available for borrowing under our bank revolving credit facility.

Our capital expenditures were \$15 million during the three months ended March 31, 2001, as compared to \$37 million during the corresponding period of the prior fiscal year. Capital expenditures in the current fiscal year consisted of ongoing costs related to the conversion of a jackup drilling rig to a mobile offshore production unit, the *Ocean Legend*, and additions to our fleet of ROVs. Capital expenditures in the corresponding period of the prior year consisted of the start of the conversion of the jackup drilling rig to a mobile offshore production unit, additions to our fleet of ROVs and multiservice vessel construction.

We had no material commitments for capital expenditures at March 31, 2001.

Results of Operations

We operate in five business segments. The segments are contained within two businesses - services and products provided to the offshore oil and gas industry ("Offshore Oil and Gas") and all other services and products ("Advanced Technologies"). Our segments within the Offshore Oil and Gas business are Remotely Operated Vehicles ("ROVs"), Subsea Products, Mobile Offshore Production Systems and Other Services. We report our Advanced Technologies business as one segment.

Consolidated revenue and margin information is as follows:

	For the Three Months Ended		
	Mar. 31, <u>2001</u>	Mar. 31, <u>2000</u>	Dec. 31, <u>2000</u>
	(in thousands)		
Revenues	\$104,254	\$111,043	\$103,227
Gross margin	20,804	17,477	19,325
Gross margin %	20%	16%	19%
Operating margin %	10%	7%	9%

We generate a material amount of our consolidated revenue from contracts for marine services in the Gulf of Mexico and North Sea, which are usually more active from April through November compared to the rest of the year. However, our exit from the diving sector in the North Sea in early 1998 and the substantial number of multiyear ROV contracts that we have entered into since calendar year 1997 have reduced the seasonality of our ROV and Other Services operations. Revenues in our Mobile Offshore Production Systems, Subsea Products and Advanced Technologies segments are generally not seasonal.

Our Offshore Oil and Gas business results are influenced by the level of capital spending by oil and gas companies in the offshore sector. We have seen increases in activity compared to the quarter ended December 31, 2000, and anticipate that this trend will continue through this year and into 2002.

Offshore Oil and Gas.

The table below sets forth our revenues and gross margins for our Offshore Oil and Gas business for the periods indicated.

Gross margin %	21%	14%	22%

ROV segment operating income has been increasing due to both additional units available for service and higher utilization. The higher utilization rates have resulted from the return to service of more floating deepwater drilling rigs and a rise in offshore construction-related activities.

Our Subsea Products revenues were lower compared to the corresponding period of the prior year due to a large steel tube umbilical order in our U.K. plant, which had higher activity levels in the prior year. The margin effect of this decrease has not been material as this order has earned a low margin. Subsea Products results for the first quarter of 2001 were similar to those achieved in the immediately preceding quarter, with a slight increase in gross margin from our umbilical plants in the U.S. and Brazil. During the first quarter of 2001, we were awarded a new contract to supply approximately \$30 million of umbilicals to Halliburton Company for the Barracuda and Caratinga Fields offshore Brazil. These will be manufactured in our Brazil plant with delivery anticipated to be in September 2002.

Our Mobile Offshore Production Systems revenues were higher in the first quarter of 2001 compared to both the immediately preceding quarter and the corresponding quarter of the prior year as we started receiving partial dayrate revenue from the *Ocean Legend*. We anticipate that the *Ocean Legend* will go on full dayrate during May 2001. Gross margins were lower than those of the corresponding period of the prior year due to lower project management fees from the *Zafiro Producer* and lower production-based revenues from the *Ocean Producer*. During the first quarter of 2001, we entered into a letter of intent to contract the *Ocean Producer* for seven years at another field in Angola. We anticipate that we will disconnect the *Ocean Producer* from its present location in May 2001 and commence moving it to a shipyard for modification, life extension and repair as required for the new location. We anticipate the *Ocean Producer* will be on its new location in the third quarter of 2001. Margins were lower than those of the immediately preceding quarter as that quarter included a gain of \$1.8 million from the sale of an out-of-service semisubmersible rig. Although the prior year included a full year of operation of the *Ocean Producer* and a total \$1.8 million of net gain from

two sales and a writedown of out-of-service equipment, we anticipate that our Mobile Offshore Production Systems revenues and margins will be higher in 2001 than those of 2000 as a result of operations of the *Ocean Legend*.

Other Services revenues were lower than those of the corresponding quarter of the prior year due to the exchange of our Asia, Australia and Middle East diving operations in September 2000 for ROVs. Margins increased as the March 2000 quarter included losses incurred on two large jobs in India. Compared to the immediately preceding quarter, margins were lower on Gulf of Mexico projects and from inspection services. We anticipate that Other Services will operate at improved margins for the balance of 2001 as we expect higher utilization of our Ocean Intervention-class vessels doing project work.

Advanced Technologies.

Revenue and gross margin information is as follows:

	<u>For the Three Months Ended</u>		
	<u>Mar. 31,</u> <u>2001</u>	<u>Mar. 31,</u> <u>2000</u>	<u>Dec.31,</u> <u>2000</u>
	<i>(in thousands)</i>		
Revenues	\$ 23,113	\$ 28,667	\$ 25,712
Gross margin	4,018	6,009	2,266
Gross margin %	17%	21%	9%

Advanced Technologies revenues and margins were lower in the first quarter of 2001 than the corresponding quarter of last year due to lower results from our space services division and lower telecommunication activities, most of which were put into an unconsolidated joint venture in March 2000. The results in the first quarter of 2000 also included a large outfall job in Southeast Asia, which was performed using resources associated with our Other Services segment.

The related assets were among those we later exchanged for ROVs. Compared to the immediately preceding quarter, margins were higher as that quarter reflected a \$1.1 million loss provision related to a division which we no longer own.

Our Advanced Technologies segment results depend on the level of government funding for NASA and U.S. Navy programs in which we currently participate or are pursuing.

Other.

Our equity in the earnings of our telecommunications joint venture was \$377,000 for the quarter ended March 31, 2001, compared to a loss of \$180,000 for the quarter ended March 31, 2000.

Interest expense for the quarter ended March 31, 2001 increased compared to the corresponding period of the prior year as we had higher debt levels. This debt had been incurred to fund the acquisition of additional equipment and expansion of our subsea products production capacity. Interest expense of \$1,879,000 for the quarter ended March 31, 2001 was net of capitalized interest of \$1,345,000.

Other expense in the first quarter of 2001 included the writeoff of \$600,000 related to shares of Friede Goldman Halter, Inc. received as proceeds for the sale of an out-of-service jackup rig in the fourth quarter of 1999. Friede Goldman Halter, Inc. filed a voluntary petition for reorganization under Chapter 11 of the U.S. Bankruptcy Code on April 19, 2001. Friede Goldman Halter, Inc. was delisted from the New York Stock Exchange on April 19, 2001, at a closing price of \$0.20 a share. It now trades on the Over the Counter Bulletin Board of NASDAQ (OTCBB) under the symbol FGHLQ.

The provisions for income taxes were related to U.S. income taxes that we provided at estimated annual effective rates using assumptions as to earnings and other factors that would affect the tax calculation for the remainder of the fiscal year and to the operations of foreign branches and subsidiaries that were subject to local income and withholding taxes.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There are no material changes from the information provided in Item 7A of our Report on Form 10-K for the period ended December 31, 2000.
