- *Loans increase to \$577 million*
- *Allowance for loan losses increases to 1.40% of loans*
- *Net interest margin increases from prior quarter to 3.90%*
- *Sold remaining investment in Freddie Mac preferred stock*

Danville, VA -- American National Bankshares Inc. (NASDAQ: AMNB), parent company of American National Bank and Trust Company, today announced third quarter net income of \$2.22 million. Earnings per share were \$0.36 on both a basic and diluted basis. This net income produced annualized returns on average assets and average equity of 1.13% and 8.72%, respectively. The annualized return on average tangible equity for the quarter was 11.84%. Net income for the first nine months of 2008 was \$6.34 million, which resulted in annualized returns on average assets and average equity of 1.08% and 8.26%, respectively. The annualized return on average tangible equity for the first nine months of 2008 was 11.25%.

Economic Conditions

National economic conditions, including those in the housing and financial markets, deteriorated during the third quarter. As a result, the U.S. Government has taken numerous measures to provide liquidity and stability to the financial markets. American National continues to perform well, even during this period of uncertainty in the economy.

Capital Remains High

American National maintains strong levels of capital, and its capital ratios are among the highest in the country. At the end of the quarter, total equity was 12.8% of assets, and the ratio of tangible equity-to-assets was 9.8%. "Strong capital levels and earnings are critical during this period of economic turmoil, and American National has achieved both," stated Charles H. Majors, President and Chief Executive Officer. "During the third quarter, American National continued its tradition of operating soundly and profitably."

On October 14, 2008, the United States Treasury Department announced its voluntary Capital Purchase Program. Given American National's already strong capital position, the Company is evaluating the program to determine whether participation would be beneficial to the Company's financial performance.

Allowance for Loan Losses Increases to 1.40% of Loans

American National increased its allowance for loan losses to \$8.08 million, or 1.40% of loans, at the end of the third quarter. "It is prudent to increase the allowance for loan losses, given the current conditions in the economy and the related impact on customers' ability to repay their debt," commented Majors. Nonperforming assets increased \$435,000 over the prior quarter-end, and represented 0.92% of total assets at September 30, 2008, compared to 0.88% at June 30, 2008, and 0.42% at September 30, 2007. Loans 30-89 days delinquent remain well below industry averages, at 0.25% of loans as of September 30, 2008. Loan loss provision expense was \$280,000 during the quarter.

Sale of Remaining Investment in Freddie Mac Stock

During the quarter, the Company sold its remaining investment in Federal Home Loan Mortgage Corporation ("Freddie Mac") preferred stock and recorded a \$108,000 loss on the sale. American National no longer owns any Fannie Mae or Freddie Mac stock.

Net Interest Income \$6.86 Million

Net interest income during the third quarter was \$6.86 million, up 1.9% from the second quarter, and down 6.7% from the third quarter of 2007. Net interest income was adversely impacted by a series of rate reductions enacted by the Federal Reserve from September 2007 to April 2008. The net interest margin was 3.90% during the recently completed quarter, up from 3.83% in the previous quarter, and down from 4.27% in the third quarter of 2007. After the end of the quarter, the Federal Reserve further lowered the federal funds rate by one-half of one percent. This rate reduction, coupled with the overall low level of interest rates, will place pressure on the Company's net interest margin in the fourth quarter.

Noninterest Income \$2.06 Million

Noninterest income totaled \$2.06 million in the third quarter of 2008. Noninterest income during the quarter included \$87,000 of net losses on securities, including the aforementioned \$108,000 loss on the Company's remaining investment in Freddie Mac stock.

Noninterest Expense \$5.49 Million

Noninterest expense totaled \$5.49 million in the third quarter of 2008. Increases in noninterest expense over the prior year have been modest, due to expense control practices. Noninterest expense increased 2.0% over the same quarter of 2007, and decreased 2.8% from the second quarter of 2008. Included in noninterest expense for the quarter was \$101,000 to increase the reserve for unfunded lending commitments. During 2007 and through the first nine months of 2008, the Company, like many other financial institutions, incurred no FDIC insurance premium expense, due to a credit that was used to offset the expense. During the fourth quarter, American National expects to exhaust the credit and begin incurring FDIC insurance premium expense. The amount of the expense is determined based on the level of deposits and other factors. Based upon deposit levels as of September 30, 2008 and current premium rates, the Company estimates that quarterly FDIC insurance premium expense would be approximately \$75,000. Additionally, on October 7, 2008, the FDIC proposed to raise insurance premiums in 2009. The FDIC is seeking public comment on the proposal.

About American National
