Item 1.

Business

1.1 Organization and Corporate Structure

Great-West Life & Annuity Insurance Company and its subsidiaries (collectively, the “Company”) is a stock life insurance company originally organized on March 28, 1907. Great-West Life & Annuity Insurance Company is domiciled in the state of Colorado.

The Company is a wholly owned subsidiary of GWL&A Financial Inc. (“GWL&A Financial”), a Delaware holding company. The Company is indirectly owned by Great-West Lifeco Inc. (“Lifeco”), a Canadian holding company. Lifeco operates in the United States primarily through the Company and through Putnam Investments, LLC, and in Canada and Europe through The Great-West Life Assurance Company (“Great-West Life”) and its subsidiaries, London Life Insurance Company and The Canada Life Assurance Company (“CLAC”). Lifeco is a subsidiary of Power Financial Corporation (“Power Financial”), a Canadian holding company with substantial interests in the financial services industry. Power Corporation of Canada (“Power Corporation”), a Canadian holding and management company, has voting control of Power Financial. Mr. Paul Desmarais, through a group of private holding companies that he controls, has voting control of Power Corporation.

The shares of Lifeco, Power Financial and Power Corporation are traded publicly in Canada on the Toronto Stock Exchange.

1.2 Business of the Company

The Company offers a wide range of life insurance and retirement and investment products to individuals, businesses and other private and public organizations throughout the United States, Puerto Rico, Guam and the United States Virgin Islands. Through its Individual Markets segment, the Company offers various forms of life insurance and annuity products. Through its Retirement Services segment, the Company provides retirement plan enrollment services, communication materials, various retirement plan investment options and educational services to employer-sponsored defined contribution/defined benefit plans and 401(k) and 403(b) plans, as well as comprehensive administrative and record-keeping services for financial institutions and employers.

On April 1, 2008, the Company and certain of its subsidiaries completed the sale of substantially all of their healthcare insurance business to a subsidiary of CIGNA Corporation (“CIGNA”). The Company recognized a gain in the amount of \$682 million, net of income taxes, upon completion of the transaction. The business that was sold, formerly reported as the Company’s Healthcare segment, was the vehicle through which it marketed and administered group life and health insurance to small, mid-sized and national employers. CIGNA acquired from the Company the stop loss, group life, group disability, group medical, group dental, group vision, group prescription drug coverage and group accidental death and dismemberment insurance business in the United States and the Company’s supporting information technology infrastructure through a combination of 100% indemnity reinsurance agreements, renewal rights, related administrative service agreements and the acquisition of certain of the Company’s subsidiaries. The Company retained a small portion of its Healthcare business and reports it within its Individual Markets segment. The Company’s business is now comprised of its Individual Markets, Retirement Services and Other segments. The financial statements of the disposed business activities are presented as discontinued operations for all periods presented in the accompanying consolidated financial statements.

Financial information, including revenues, net income and total assets of the Company’s three operating segments is provided in Note 17 “Segment Information” of the accompanying consolidated financial statements. No customer accounted for 10% or more of the Company’s consolidated revenues during the years 2009, 2008 or 2007. In addition, no segment of the Company’s business is dependent upon a single customer or a few customers, the loss of which would have a significant effect on it or its business segments’ operations. The loss of business from any one, or a few, independent brokers or agents would not have a material adverse effect on the Company or its business segments.

Through December 31, 2007, the Company held an undistributed earnings liability on participating business in connection with a long-standing assumption reinsurance agreement under which the Company had reinsured a block of participating policies. During the first quarter of 2008, the Company was no longer required to maintain the \$208 million liability to meet the obligations under the terms of the agreement so the liability was decreased with a corresponding decrease to policyholder benefits. An income tax provision was recorded on the undistributed earnings when those earnings occurred. Accordingly, there was no income tax provision recorded at the time of the liability release. On January 1, 2008, the Company began recognizing the net earnings on these policies in its Individual Markets segment net income.

On August 1, 2007, the Company announced that it had reached an agreement with Franklin Templeton Investments whereby Franklin Templeton would transition its 401(k) recordkeeping business to the Company. The Company's subsidiary, FASCore, LLC, has been supporting Franklin Templeton's recordkeeping business since 2006. Under the new agreement, the Company entered into a direct contractual relationship with each plan sponsor and assumed additional product servicing and custodial responsibilities for approximately 300 plans, representing approximately 60,000 participants. The transaction was completed during the fourth quarter of 2007.

On December 30, 2005, Great-West Life & Annuity Insurance Company of South Carolina ("GWSC"), a wholly owned subsidiary of the Company, was licensed as a special purpose financial captive insurance company. Following licensing, an affiliate, The Canada Life Assurance Company ("CLAC") retroceded, on a funds withheld basis, a particular block of United States term life insurance business to GWSC, whereby the excess of U.S. statutory reserves over funds withheld is backed by a letter of credit in the current amount of \$1,006 million. A second letter of credit, in the amount of \$70 million, is available to fund the capital in GWSC. On July 3, 2007, GWSC and CLAC amended their reinsurance agreement pursuant to which GWSC assumed additional term life insurance from CLAC.

On August 31, 2003, the Company and CLAC entered into an indemnity reinsurance agreement pursuant to which the Company reinsured 80% (originally 45% coinsurance and 35% coinsurance with funds withheld) of certain United States life, health, and annuity business of CLAC's United States branch. On June 1, 2007, the Company terminated this reinsurance agreement. The Company recorded the following in its consolidated statement of income in connection with the termination of the reinsurance agreement (In thousands):

| | |
|---|----------------|
| Premium income | \$ (1,387,179) |
| Net investment income | 58,569 |
| Net realized losses on investments | (14,797) |
| Total revenues | (1,343,407) |
| Decrease in reserves | (1,453,145) |
| Provision for policyholders' share of earnings on participating business | 8,161 |
| Amortization of deferred acquisition costs and value of business acquired | 62,961 |
| Total benefits and expenses | (1,382,023) |
| Income before income taxes | 38,616 |
| Income taxes | 16,372 |
| Net income | \$ 22,244 |

On December 31, 2006, the Company purchased the full service defined contribution business from U.S. Bank. The results of operations of this business have been included in the Company's consolidated financial statements since that date. The acquired business primarily relates to the administration of approximately 1,900 401(k) plans which represent approximately 195,000 members and more than \$9.0 billion in retirement plan assets. The acquisition includes the retention of relationship managers and sales and client service specialists. The Company purchased \$6 million of assets with \$71 million cash. The asset amount consisted of \$77 million of goodwill and intangibles and \$6 million in liabilities.

On October 2, 2006, the Company purchased several parts of the full service small and midsize 401(k) as well as certain defined benefit plan business from Metropolitan Life Insurance Company and its affiliates (“MetLife”). The assets acquired and liabilities assumed and the results of operations have been included in the Company’s consolidated financial statements since that date. The acquisition included the associated dedicated distribution group, including wholesalers, relationship managers and sales associates. As a result of the acquisition, the Company added approximately 280,000 participants in the 401(k) full service segment and increased its distribution capacity. The Company recorded assets and liabilities in the amount of \$1.5 billion, including net cash acquired of \$1.4 billion. In addition, the Company acquired the rights to provide administrative services and recordkeeping functions for approximately \$3.2 billion of participant account values.

1.3 Company Segments

Individual Markets Segment Principal Products

The Company’s Individual Markets segment distributes life insurance and individual annuity products to both individuals and businesses through various distribution channels. Life insurance products in-force include participating and non-participating term life, whole life, universal life and variable universal life. Participating policyholders share in the financial results of the participating business in the form of policyholder dividends that reflect the difference between the assumptions used in the premium charged and the actual experience on those policies. The Company no longer actively markets participating products. The participating policyholder earnings that cannot be distributed to the shareholder are not included in the Company’s consolidated net income and are reflected in liabilities in undistributed earnings on participating business in the Company’s consolidated balance sheets.

Term life insurance provides coverage for a stated period and pays a death benefit only if the insured dies within the period. Whole life insurance provides guaranteed death benefits and level premium payments for the life of the insured. Universal life insurance products include a cash value component that is credited with interest at regular intervals. The Company’s universal life insurance earnings result from the difference between the investment income and interest credited on customer cash values and from differences between charges for mortality and actual death claims. Universal life cash values are charged for the cost of insurance coverage and for administrative expenses.

Sales of life insurance products typically have initial marketing expenses which are deferred. These expenses are shown as deferred acquisition costs in the Company’s consolidated balance sheets and are amortized over the life of the contracts in proportion to the emergence of gross profits or premium revenues recognized. Therefore, retention is an important factor in profitability and is encouraged through product features. For example, the Company’s universal and whole life insurance contracts typically impose a surrender charge on policyholder balances withdrawn within the first ten years of the contract’s inception. The period of time and level of the charge vary by product.

At December 31, 2009 and 2008, the Company had \$5.1 billion and \$4.9 billion, respectively, of future policy benefits on individual insurance products sold to corporations insuring the lives of certain employees, also known as corporate-owned life insurance (COLI) or business-owned life insurance (BOLI). The Company has shifted its emphasis from corporate owned to the business-owned life insurance market.

The primary BOLI products are single premium universal life insurance, private placement variable universal life insurance (“PPVUL”) and PPVUL with a stable value wrapper. The insurance policies indirectly fund post-retirement benefits for all employees and non-qualified benefit plans for executives. Community banks are the primary purchasers of the universal life product (general account); while regional and community banks typically purchase PPVUL with a stable value wrapper (separate account). Corporations indirectly funding executive benefits purchase the PPVUL product (separate account) which offers an array of equity and bond funds. At December 31, 2009, the Company had \$2.3 billion of general account and \$3.3 billion of separate account BOLI future policy benefits, compared to \$2.0 billion of fixed and \$3.0 billion of separate account BOLI future policy benefits at December 31, 2008.

Distribution relationships for BOLI were expanded significantly during 2009 and 2008, which contributed to sales success. In excess of 160 and 130 clients were added during 2009 and 2008, respectively.

The Company partners with leading retail financial institutions to distribute individual life and annuity products. During 2009, the Company continued its efforts to partner with large financial institutions to provide individual term and whole life insurance to the general population. Through institutional partners such as Bank of America Corporation, Citigroup Inc., U.S. Bancorp, Regions Financial Corporation and Huntington Bancshares Incorporated, the Company has in excess of 15,000 individual branch and brokerage sales representatives, as well as direct exposure to on-line banking customers. Making life insurance easy to understand in the retail bank environment is vital to the successful execution of this strategy. Most recently, management's attention has turned to meeting the insurance related needs of the growing retiree marketplace. During 2009, management focused on distributing wealth transfer solutions to their bank partners' customers via single premium whole life insurance. Evidencing the Company's rapid growth and ability to reach a broad bank customer base, the Company was selected by SunTrust, Bancorp South, and First Merit as their wealth transfer partner in 2009. During 2010 and beyond, the Company intends to build on its bank market experience and continue to focus on simplifying insurance to meet the needs of its bank partners and their customers.

The Company also has a distribution partnership with Charles Schwab & Co. ("Schwab") to market variable annuities. As of December 31, 2009, the Company's Schwab OneSource and Schwab Select variable annuities had in excess of \$1 billion in assets. The Company believes its variable annuities are among the top selling annuities at Schwab and are sold in both the institutional markets ("IM") and retail distribution channels. As a leading (top five) independent financial advisor group, Schwab's IM distribution channel provides the Company with access to an important retirement market segment. With a continued focus on product simplicity, customer value and product development collaboration, the Company and Schwab are together working on ways to serve this market with valuable accumulation and income products during 2010.

On a limited basis, the Company also offers single premium annuities and guaranteed certificates that provide guarantees of principal and interest with a fixed maturity date.

See Note 17 to the accompanying consolidated financial statements for certain financial information of the Company's Individual Markets segment.

Retirement Services Segment Principal Products

Through its Retirement Services segment, the Company provides retirement plan enrollment services, communication materials, various retirement plan investment options and educational services to employer-sponsored defined contribution/defined benefit plans and 401(k) and 403(b) plans, as well as comprehensive administrative and record-keeping services for financial institutions and employers. Defined contribution plans provide for benefits based upon the value of contributions to, and investment returns on, an individual's account. This has been the fastest growing portion of the pension marketplace in recent years. Defined benefit plans are plans where employee benefits are determined by formulas using factors such as salary history and duration of employment.

The marketing focus is directed towards providing full service and investment products under Internal Revenue Code Sections 401(a), 401(k), 403(b), 408, and 457 to state and local governments, hospitals, non-profit organizations, public school districts and corporations. Record-keeping and administrative services for defined contribution plans may also be provided to this target market. Through a subsidiary, FASCore, LLC, the Company is focused on partnering with other large institutions to provide third-party record-keeping and administration services.

The Company offers both guaranteed interest rate investment options for various lengths of time and variable annuity products designed to meet the specific needs of the customer. In addition, the Company offers both customized annuity and non-annuity products.

From the guaranteed interest rate option, the Company earns investment margins on the difference between the income earned on investments in its general account and the interest credited to the participant's account balance. The Company's general account assets support the guaranteed investment product. The Company also manages separate account fixed interest rate options where it is paid a management fee.

The Company's variable investment options provide the opportunity for participants to assume the risks of, and receive the benefits from, the investment of retirement assets. The variable product assets are invested, as designated by the participant, in separate accounts that in turn invest in shares of underlying funds managed by the Company or its affiliates and by selected external fund managers.

The Company is compensated by separate account fees for mortality and expense risks pertaining to the variable annuity contract and/or for providing administrative services. The Company is reimbursed by external mutual funds for marketing, sales and service costs under various revenue sharing agreements.

The Company also receives fees for providing third-party administrative and record-keeping services to financial institutions and employer-sponsored retirement plans.

Customer retention is a key factor for the profitability of group annuity products. To encourage customer retention, annuity contracts may impose a surrender charge on policyholder balances withdrawn for a period of time after the contract's inception. The period of time and level of the charge vary by product as well as other factors such as size of the prospective group, projected annual contributions for all participants in the group, frequency of projected withdrawals, type and frequency of administrative and sales services provided, level of other charges, type and level of communication services provided and the number and types of plans. Existing federal tax penalties on distributions prior to age 59½ provide an additional disincentive to premature surrenders of balances held under the group annuity contract, but do not impede transfers of those balances to products of competitors.

See Note 17 to the accompanying consolidated financial statements for certain financial information of the Company's Retirement Services segment.

Method of Distribution of Products Within the Individual Markets and Retirement Services Segments

The Individual Markets segment distributes individual life insurance through marketing agreements with various retail financial institutions. BOLI is distributed through specialized benefit consulting organizations and through financial services organizations such as Great-West Retirement Services. As discussed above, annuity products are also offered through a distribution relationship with Schwab.

The Retirement Services segment distributes pension products through a subsidiary, GWFS Equities, Inc., as well as through in excess of 470 pension consultants, representatives and service personnel. Record-keeping and administrative services are also marketed through institutional partners.

Competition Within the Individual Markets and Retirement Services Segments

The life insurance, savings and investment marketplaces are highly competitive. The Company's competitors include mutual fund companies, insurance companies, banks, investment advisers and certain service and professional organizations. No one competitor or small number of competitors is dominant. Competition focuses on service, technology, cost, variety of investment options, investment performance, product features and price and financial strength as indicated by ratings issued by nationally recognized agencies.

See Item 1.6, Ratings, for more information on the Company's ratings strength.

Life Insurance In-Force and Future Policy Benefits Liabilities

The amount of fixed annuity products in-force is measured by future policy benefits. The following table shows group and individual annuity policy benefits supported by the Company's general account as well as the annuity balances in Individual Markets and Retirement Services separate accounts for the years indicated:

| Year Ended December 31, | (In millions) | | |
|-------------------------|----------------------------------|---------------------------------------|--|
| | General Account Annuity Benefits | Retirement Services Separate Accounts | Individual Markets Annuity Separate Accounts |
| 2009 | \$ 8,874 | \$ 14,288 | \$ 1,262 |
| 2008 | 8,598 | 10,403 | 1,144 |
| 2007 | 8,193 | 13,482 | 1,533 |
| 2006 | 8,635 | 12,487 | 1,405 |
| 2005 | 7,913 | 11,378 | 1,237 |

The following table summarizes individual life insurance in-force prior to reinsurance ceded, future policy benefits and separate account balances for the years indicated:

| Year Ended December 31, | (In millions) | | |
|-------------------------|---------------------------------------|---|-------------------------|
| | Life Insurance Future Policy Benefits | Individual Markets Life Insurance Separate Accounts | Life Insurance In-Force |
| 2009 | \$ 9,756 | \$ 3,337 | \$ 137,049 |
| 2008 | 9,183 | 3,575 | 142,177 |
| 2007 | 8,906 | 3,075 | 146,297 |
| 2006 | 10,345 | 2,398 | 138,410 |
| 2005 | 9,964 | 1,841 | 141,282 |

In the Individual Markets segment, future policy benefits for all fixed individual life insurance contracts are computed on the basis of assumed investment yield, mortality, morbidity and expenses, including a margin for adverse deviation. These future policy benefits are calculated as the present value of future benefits (including dividends) and expenses less the present value of future net premiums. The assumptions used in calculating the future policy benefits generally vary by plan, year of issue and policy duration.

For all life insurance contracts, policy and contract claim liabilities are established for claims that have been incurred but not reported based on factors derived from past experience.

In both the Individual Markets and Retirement Services segments, policy benefit liabilities for investment-type policies, primarily deferred annuities and 401(k) plans, are established at the contractholder's account value, which is equal to cumulative deposits and credited interest, less withdrawals and mortality and expense and/or administrative service charges.

Policy benefit liabilities for limited payment contracts (immediate annuities) are computed on the basis of assumed investment yield, mortality (where payouts are contingent on survivorship) and expenses. These assumptions generally vary by plan, year of issue and policy duration. Policy benefit liabilities for immediate annuities without life contingent payouts are computed on the basis of assumed investment yield and expenses.

The aforementioned policy benefit liabilities are computed amounts that, with additions from premiums and deposits to be received and with interest on such liabilities, are expected to be sufficient to meet the Company's policy obligations (such as paying expected death or retirement benefits or surrender requests) and to generate profits.

Reinsurance Within the Individual Markets and Retirement Services Segments

The Company enters into reinsurance transactions as both a provider and a purchaser of reinsurance. When purchasing reinsurance, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding risks to other insurance enterprises under excess coverage and coinsurance contracts. Under the terms of these contracts, the reinsurer agrees to reimburse the Company for the ceded amount in the event a claim is paid. However, the Company remains liable to its policyholders with respect to the ceded insurance if a reinsurer fails to meet the obligations it assumed. Accordingly, the Company only cedes insurance to highly rated, well-capitalized companies. The Company retains a maximum of \$3.5 million of coverage per individual life.

Individual Markets Outlook

During 2009, Individual Markets' financial institutions markets business line continued its strong growth driven by the addition of several new large financial institution partners and strong single premium life sales.

During 2009, the Individual Markets segment continued to strengthen its relationships with key distributors which have translated into substantial sales growth. In excess of 130 new BOLI clients were added during 2008 and 2009. New relationships developed in these years should contribute to continued sales growth in 2010.

With a continued emphasis on product simplicity, customer value and product development collaboration, the Company and Schwab are together working on ways to serve the annuity markets with accumulation and income products in 2010.

During 2010, the Individual Markets segment intends to continue its focus on providing excellent customer service and diversity of product offerings and distribution channels.

Retirement Services Outlook

The Retirement Services segment continues its emphasis on reinvestment in infrastructure through technology, service and product enhancements while also maintaining a solid internal control foundation.

In 2009 Great-West Retirement Services introduced the next generation of target date funds with the launch of the Maxim Lifetime Asset Allocation SeriesSM mutual funds (Maxim Lifetime funds) which offer a choice of multiple glide paths from conservative to aggressive, a variety of investment managers, and an asset allocation approach that extends beyond retirement. The Maxim Lifetime funds are well positioned to allow Retirement Services to participate in the increasing popularity of target date investment options within defined contribution plans, particularly through their use as Qualified Default Investment Alternatives as provided for under the Pension Protection Act.

The Maxim Lifetime funds are the latest addition to the Retirement Services investment product shelf; a set of products and services designed by Retirement Services specifically for the retirement markets. The Maxim Lifetime funds are expected to contribute significantly to the growth of assets under management by Retirement Services and/or its affiliates.

The Retirement Services segment will continue to focus on developing and expanding new distribution channels in 2010 ensuring that through its successful partnerships with other distributors, it will create a solid base for future growth.

Other Segment

The Company's Other segment includes corporate items not directly allocated to any of its other two business segments, interest expense on long-term debt and the activities of GWSC whose sole business is the assumption of certain blocks of term life insurance retroceded by CLAC under a reinsurance agreement, as amended. Future policy benefits under these policies are calculated as the present value of future benefits (including dividends) and expenses less the present value of future net premiums. The assumptions used in calculating the future policy benefits generally vary by plan, year of issue and policy duration. Future policy benefits are also established for claims that have been incurred but not reported based on factors derived from past experience.

The following table shows policy reserves and life insurance in-force in the Other segment for the years indicated:

| (In millions) | December 31, | | | | |
|-------------------------|--------------|--------|--------|--------|--------|
| | 2009 | 2008 | 2007 | 2006 | 2005 |
| Future policy benefits | \$ 342 | \$ 321 | \$ 277 | \$ 221 | \$ 167 |
| Life insurance in-force | 76,768 | 80,992 | 85,618 | 70,281 | 74,282 |

1.4 Investment Operations

The Company's investment division manages and administers the investments of its general and separate accounts in support of the cash and liquidity requirements of its insurance and investment products. The Company's principal general account investments are in fixed maturities and mortgage loans on real estate, all of which are exposed to three primary sources of investment risk: credit, interest rate and market valuation. Total investments at December 31, 2009, were \$39.3 billion, comprised of general account investment assets in the amount of \$20.4 billion and separate account assets in the amount of \$18.9 billion. Total investments at December 31, 2008, were \$33.2 billion, comprised of general account investment assets in the amount of \$18.1 billion and separate account assets in the amount of \$15.1 billion.

The Company's general account investments are in a broad range of asset classes, primarily domestic fixed maturities. Fixed maturity investments include public and privately placed corporate bonds, government bonds and mortgage-backed and asset-backed securities. The Company's mortgage loans on real estate are comprised exclusively of commercial loans. The Company does not originate any single family residential mortgage loans.

The Company manages the characteristics of its investment assets, such as liquidity, currency, yield and duration, to reflect the underlying characteristics of related insurance and policyholder liabilities that vary among its principal product lines. The Company observes strict asset and liability matching guidelines designed to ensure that the investment portfolio will appropriately meet the cash flow requirements of its liabilities. In connection with its investment strategy, the Company makes limited use of derivative instruments in hedging transactions to manage certain portfolio related risks such as variability in cash flows or changes in the fair value of an asset or a liability. Derivative instruments are not used for speculative purposes.

For more information on derivatives see Notes 1 and 6 to the Company's consolidated financial statements which are included in Item 8, Financial Statements and Supplementary Data.

The Company routinely monitors and evaluates the status of its investments in light of current economic conditions, trends in capital markets and other factors. These other factors include investment size, quality, concentration by issuer and industry and other diversification considerations relevant to the Company's fixed maturity investments.

The Company reduces credit risk for the portfolio as a whole by investing primarily in investment grade fixed maturities. At December 31, 2009 and 2008, 96% and 98%, respectively, of the Company's fixed maturity portfolio carried an investment grade rating.

See Item 7.1, Executive Summary, for a discussion of current market conditions and their impact on the Company's investment operations.

[Table of Contents](#)

The following table sets forth the distribution of invested assets, cash and accrued investment income for the Company's general account as of December 31 for the years indicated. Information is presented at December 31, 2006 and 2005 as previously disclosed and has not been restated for any reclassifications:

| Carrying Value (In millions) | December 31, | | | | |
|---|--------------|-----------|-----------|-----------|-----------|
| | 2009 | 2008 | 2007 | 2006 | 2005 |
| Fixed maturities, available-for-sale: | | | | | |
| U.S. government direct obligations and U.S. agencies | \$ 2,039 | \$ 2,431 | \$ 2,734 | \$ 3,675 | \$ 3,368 |
| Obligations of U.S. states and their foreign subdivisions | 1,364 | 1,149 | 1,273 | 1,318 | 1,302 |
| Foreign governments | - | 1 | 2 | 14 | 21 |
| Corporate debt securities | 7,130 | 5,025 | 5,324 | 5,755 | 5,489 |
| Mortgage-backed and asset-backed securities | 3,385 | 3,367 | 4,218 | 4,548 | 3,587 |
| Total fixed maturities, available-for-sale | 13,918 | 11,973 | 13,551 | 15,310 | 13,767 |
| Other investments: | | | | | |
| Fixed maturities, held for trading | 140 | 39 | 23 | - | - |
| Mortgage loans on real estate | 1,554 | 1,380 | 1,200 | 1,338 | 1,461 |
| Equity investments available-for-sale | 26 | 18 | 30 | 29 | 159 |
| Policy loans | 3,972 | 3,979 | 3,768 | 3,798 | 3,716 |
| Short-term investments, available-for-sale | 488 | 367 | 473 | 961 | 1,070 |
| Limited partnership and limited liability corporation interests | 254 | 294 | 327 | 345 | 365 |
| Other investments | 24 | 32 | 11 | 4 | 5 |
| Total investments | \$ 20,376 | \$ 18,082 | \$ 19,383 | \$ 21,785 | \$ 20,543 |
| Cash | \$ 171 | \$ 28 | \$ 55 | \$ 33 | \$ 58 |
| Accrued investment income | 225 | 146 | 143 | 160 | 151 |

The following table summarizes the Company's general account investment results:

| Year Ended December 31, | (In millions) | Earned Net |
|-------------------------|-----------------------|------------------------|
| | Net Investment Income | Investment Income Rate |
| 2009 | \$1,149 | 6.39% |
| 2008 | 1,078 | 6.16% |
| 2007 | 1,140 | 5.98% |
| 2006 | 1,110 | 5.81% |
| 2005 | 1,044 | 5.82% |

1.5 Regulation

Insurance Regulation

The Company and its insurance subsidiaries are licensed to transact life insurance business, accident and health insurance business (although substantially all of the Company's healthcare business was sold on April 1, 2008) and annuity business in, and are subject to regulation and supervision by all 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands and Guam. The extent of such regulation varies, but most jurisdictions have laws and regulations governing the financial aspects of insurers, including standards of solvency, statutory reserves, reinsurance and capital adequacy and the business conduct of insurers. In addition, statutes and regulations usually require the licensing of insurers and their agents, the approval of policy forms and certain other related materials and, for certain lines of insurance, the approval of rates. Such statutes and regulations also prescribe the permitted types and concentration of investments.

The Company and certain of its subsidiaries are subject to, and comply with, insurance holding company regulations in applicable states. The Company's insurance subsidiaries are each required to file reports, generally including detailed annual financial statements, with insurance regulatory authorities in each of the jurisdictions in which they do business, and their operations and accounts are subject to periodic examination by such authorities. These subsidiaries must also file, and in many jurisdictions and in some lines of insurance, obtain regulatory approval for rules, rates and forms relating to the insurance written in the jurisdictions in which they operate.

The National Association of Insurance Commissioners (the "NAIC") has established a program of accrediting state insurance departments. NAIC accreditation permits accredited states to conduct periodic examinations of insurers domiciled in such states. NAIC-accredited states will not accept reports of examination of insurers from unaccredited states, except under limited circumstances. As a direct result, insurers domiciled in unaccredited states may be subject to financial examination by accredited states in which they are licensed, in addition to any examinations conducted by their domiciliary states. The Colorado Department of Insurance (the "CO DOI"), the Company's principal insurance regulator, has received this NAIC accreditation.

State and federal insurance and securities regulatory authorities and other state law enforcement agencies and attorneys general from time to time make inquiries regarding compliance by the Company and its insurance subsidiaries with insurance, securities and other laws and regulations regarding the conduct of the Company's insurance and securities business.

A discussion of certain regulations the Company is subjected to follows:

- **Insurance Company Regulation** - The Company and its insurance subsidiaries are subject to regulation under the insurance company laws of various jurisdictions. The insurance company laws and regulations vary from jurisdiction to jurisdiction, but generally require an insurance company that is a member of an insurance holding company system (two or more affiliated persons, one or more of which is an insurer) to register with state regulatory authorities and to file with those authorities certain reports, including information concerning their capital structure, ownership, financial condition, certain intercompany transactions and general business operations. In addition, various state jurisdictions have broad administrative powers with respect to such matters as admittance of assets, premium rating methodology, policy forms, establishing reserve requirements and solvency standards, maximum interest rates on life insurance policy loans and minimum rates for accumulation of surrender values, the type and amounts and valuation of investments permitted. State insurance statutes also typically place restrictions and limitations on the amount of dividends or other distributions payable by insurance companies to their parent companies, as well as on transactions between an insurer and its affiliates.

See Note 12 to the accompanying consolidated financial statements for a discussion of the Company's dividend transactions.

- **Guaranty Associations and Similar Arrangements** - Most of the jurisdictions in which the Company and its insurance subsidiaries are admitted to transact business require life insurers doing business within their jurisdiction to participate in guaranty associations, which are organized to pay certain contractual insurance benefits owed pursuant to insurance policies issued by impaired, insolvent or failed insurers. These associations levy assessments, up to prescribed limits, on all member insurers in a particular state on the basis of the proportionate share of the premiums written by member insurers in the lines of business in which the impaired, insolvent or failed insurer is engaged. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets. The Company has historically recovered more than half of the guaranty assessments through these offsets. The Company has a prepaid asset associated with guaranty fund assessments in the amounts of \$1.2 million and \$1.5 million at December 31, 2009 and 2008, respectively.

- **Statutory Insurance Examinations** - As part of their regulatory oversight process, state insurance departments conduct periodic detailed examinations of the books, records, accounts and business practices of insurers domiciled in their states. During the three-year period ended December 31, 2009, these examinations produced no significant adverse findings regarding the operations or accounts of the Company and its insurance subsidiaries.
- **Policy and Contract Reserve Sufficiency Analysis** - Annually, the Company and its insurance subsidiaries are required to conduct an analysis of the sufficiency of all statutory reserves. In each case, a qualified actuary must submit an opinion which states that the statutory reserves, when considered in light of the assets held with respect to such reserves, make good and sufficient provision for the associated contractual obligations and related expenses of the insurer. If such an opinion cannot be provided, the insurer must set up additional reserves by moving funds from surplus. Since inception of this requirement, the Company and its insurance subsidiaries which are required by their states of domicile to provide these opinions have provided such opinions without qualification.
- **Surplus and Capital** - The Company and its insurance subsidiaries are subject to the supervision of the regulators in each jurisdiction in which they are licensed to transact business. Regulators have discretionary authority, in connection with the continued licensing of these insurance subsidiaries, to limit or prohibit sales to policyholders if, in their judgment, the regulators determine that such insurer has not maintained the minimum surplus or capital or that the further transaction of business will be hazardous to policyholders. As of December 31, 2009, the Company and its insurance subsidiaries have surplus and capital in excess of that required by the regulators.
- **Risk-Based Capital (“RBC”)** - The Company and its insurance subsidiaries are subject to certain RBC requirements and report their RBC based on a formula calculated by applying factors to various asset, premium and statutory reserve items. The formula takes into account the risk characteristics of the insurer, including asset risk, insurance risk, interest rate risk and business risk. The formula is used as an early warning regulatory tool to identify possible inadequately capitalized insurers for purposes of initiating regulatory action and not as a means to rank insurers generally. As of the date of the most recent statutory financial statements filed with insurance regulators, the total adjusted capital of the Company and its insurance subsidiaries was in excess of the RBC amount.
- **Regulation of Investments** - The Company and its insurance subsidiaries are subject to state laws and regulations that require diversification of its investment portfolios and limit the amount of investments in certain asset categories, such as below investment grade fixed income securities, other equity investments, and derivatives. Failure to comply with these laws and regulations would cause investments exceeding regulatory limitations to be treated as non-admitted assets for purposes of measuring statutory surplus, and, in some instances, would require divestiture of such non-qualifying investments.
- **Federal Initiatives** - Although the federal government generally does not directly regulate the insurance business, federal initiatives often have an impact on the Company’s business in a variety of ways. From time to time, federal measures are proposed which may significantly affect the insurance business; the potential for this resides primarily in the tax-writing committees. At the present time, management is not aware of any federal legislative initiatives that, if enacted, would adversely impact the Company’s business, results of operations or financial condition.
- **Broker-Dealer and Securities Regulation** - One of the Company’s subsidiaries is subject to regulation by the U.S. Securities and Exchange Commission (the “SEC”) and the Financial Industry Regulatory Authority. This subsidiary acts as the underwriter and distributor for variable annuity contracts and variable life insurance policies issued by the Company and for Maxim Series Fund, Inc., an affiliated open-end management investment company.

Environmental Considerations

As an owner and operator of real property, the Company is subject to federal, state and local environmental laws and regulations. Inherent in such ownership and operation is also the risk that there may be potential environmental liabilities and costs in connection with any required remediation of such properties. Management cannot provide assurance that unexpected environmental liabilities will not arise. However, based on information currently available to management, it believes that any costs associated with compliance with environmental laws and regulations or any remediation of such properties will not have a material adverse effect on the Company's business, results of operations or financial condition.

ERISA Considerations

The Company provides products and services to certain employee benefit plans that are subject to the Employee Retirement Income Security Act of 1974 ("ERISA"), or the Internal Revenue Code of 1986, as amended (the "Code"). As such, the Company's activities are subject to the restrictions imposed by ERISA and the Code, including the requirement under ERISA that fiduciaries must perform their duties solely in the interests of ERISA plan participants and beneficiaries and the requirement under ERISA and the Code that fiduciaries may not cause a covered plan to engage in prohibited transactions with persons who have certain relationships with respect to such plans. The applicable provisions of ERISA and the Code are subject to enforcement by the Department of Labor, the Internal Revenue Service and the Pension Benefit Guaranty Corporation.

1.6 Ratings

The Company is rated by a number of nationally recognized rating agencies. The ratings represent the opinion of the rating agencies regarding the financial strength of the Company and its ability to meet ongoing obligations to policyholders. The Company's financial strength ratings as of the date of this filing are as follows:

| Rating Agency | Measurement | Current Rating |
|-----------------------------------|--|------------------|
| A.M. Best, Inc. | Financial strength, operating performance and business profile | A+ ¹ |
| Fitch Ratings | Financial strength | AA+ ² |
| Moody's Investor Service | Financial strength | Aa3 ³ |
| Standard & Poor's Rating Services | Financial strength | AA ² |

¹ Superior (highest category out of ten categories).

² Very Strong (second highest category out of nine categories).

³ Excellent (second highest category out of nine categories).

1.7 Employees

The Company had approximately 3,100 and 3,000 employees at December 31, 2009 and 2008, respectively.

1.8 Available Information

The Company files periodic reports and other information with the SEC. Such reports and other information may be obtained by visiting the Public Reference Room of the SEC at its Headquarters Office, 100 F Street, N.E., Room 1580, Washington D.C. 20549 or by calling the SEC at 1-202-551-8090 (Public Reference Room) or 1-800-SEC-0330 (Office of Investor Education and Assistance). In addition, the SEC maintains an internet website (www.sec.gov) that contains reports and other information regarding issuers that file electronically with the SEC, including the Company.

Item 1A.

Risk Factors

In the normal course of its business, the Company is exposed to certain operational, regulatory and financial risks and uncertainties. The most significant risks include the following.

Competition could negatively affect the ability of the Company to maintain or increase market share or profitability.

The industry in which the Company operates is highly competitive. The Company's competitors include insurance companies, mutual fund companies, banks, investment advisers and certain service and professional organizations. Although there has been consolidation in some sectors, no one competitor is dominant. Customer retention is a key factor for continued profitability. Management cannot assure that the Company will be able to maintain its current competitive position in the markets in which it operates, or that it will be able to expand its operations into new markets. If the Company fails to do so, its business, results of operations and financial condition could be materially and adversely affected.

See Item 1.3, Company Segments, for a further discussion of competition.

The insurance industry is heavily regulated and changes in regulation may reduce profitability.

Federal and state regulatory reform that increases the compliance requirements imposed on the Company or that change the way that the Company is able to do business may significantly harm its business or adversely impact the results of operations in the future. It is not possible to predict whether future legislation or regulation adversely affecting the Company's business will be enacted and, if enacted, the extent to which such legislation will have an effect on the Company or its competitors. Furthermore, there can be no assurance as to which of the Company's specific products would be impacted by any such legislative or regulatory reform.

The Company's operations and accounts are subject to examination by the CO DOI and other regulators at specified intervals. The NAIC has also prescribed RBC rules and other financial ratios for life insurance companies. The calculations set forth in these rules are used by regulators to assess the sufficiency of an insurer's capital and measure the risk characteristics of an insurer's assets, liabilities and certain off-balance sheet items. RBC is calculated by applying factors to various asset, premium and liability items. Although the Company has risk-based capital levels well in excess of those required by its regulators, there can be no assurances made that it will continue to maintain these levels.

See Item 1.5, Regulation, for a further discussion of regulation.

A downgrade or potential downgrade in the Company's financial strength or claims paying ratings could result in a loss of business and negatively affect results of operations and financial condition.

The Company is rated by a number of nationally recognized rating agencies. The ratings represent the opinion of the rating agencies regarding the Company's financial strength and its ability to meet ongoing obligations to policyholders. Claims paying ability and financial strength ratings are factors in establishing the competitive position of insurers. A rating downgrade, or the potential for such a downgrade, of the Company or any of its rated insurance subsidiaries could, among other things, materially increase the number of policy surrenders and withdrawals by policyholders of cash values from their policies, adversely affecting relationships with broker-dealers, banks, agents, wholesalers and other distributors of its products and services. This may result in cash payments requiring the Company to sell invested assets, including illiquid assets such as privately placed fixed maturity investments and mortgage loans on real estate, at a price that may result in realized investment losses. These cash payments to policyholders result in a decrease in total invested assets and a decrease in net income. Among other things, early withdrawals may also cause the Company to accelerate amortization of policy acquisition costs and value of business acquired, reducing net income. In addition, a downgrade may negatively impact new sales and adversely affect the Company's ability to compete and thereby have a material effect on its business, results of operations, and financial condition. Negative changes in credit ratings may also increase the Company's cost of funding.

See Item 1.6, Ratings, for the Company's current credit ratings.

Deviations from assumptions regarding future persistency, mortality and interest rates used in calculating liabilities for future policyholder benefits and claims could adversely affect the Company's results of operations and financial condition.

The Company maintains policy and contract claim liabilities to cover its estimated liability for unpaid losses and loss adjustment expenses for both reported and unreported claims incurred. Future policy benefits do not represent an exact calculation of liability. Rather, future policy benefits represent an estimate of what management expects the ultimate settlement and administration of claims will cost. These estimates, which generally involve actuarial projections, are based upon management's assessment of facts and circumstances then known, as well as estimates of future trends in persistency (how long a contract stays with the Company), claims severity and frequency, judicial theories of liability, interest rates and other factors. These variables are affected by both internal and external events, such as changes in claims handling procedures, catastrophic events, inflation, judicial trends and legislative changes. Many of these items are not directly quantifiable in advance. The Company's life insurance products are exposed to the risk of catastrophic events, such as a pandemic, terrorism, or other such events that cause a large number of deaths. Additionally, there may be a significant reporting delay between the occurrence of an insured event and the time it is reported.

The inherent uncertainties of estimating policy and contract claim liabilities are greater for certain types of liabilities, particularly those in which the various considerations affecting the type of claim are subject to change and in which long periods of time may elapse before a definitive determination of liability is made. Liability estimates are continually refined in a regular and ongoing process as experience develops including estimated premiums the Company will receive over the assumed life of the policy and further claims are reported and settled. Adjustments to policy benefit liabilities are reflected in the Company's consolidated statement of income in the period in which adjustments are determined. Because setting policy benefit liabilities is inherently uncertain, there can be no assurance that current liability will prove to be adequate in light of subsequent events.

See Item 1.3, Company Segments, for a further discussion of policy benefit liabilities.

The Company may be required to accelerate the amortization of deferred acquisition costs or valuation of business acquired, or recognize impairment in the value of goodwill, which could adversely affect its results of operations and financial condition.

Deferred acquisition costs ("DAC") represent the costs that vary with and are related primarily to the acquisition of new insurance and annuity contracts and is amortized over the expected lives of the contracts. Valuation of business acquired ("VOBA") represents the present value of future profits associated with acquired insurance, annuity and investment-type contracts and is amortized over the expected effective lives of the acquired contracts. Goodwill represents the excess of the amounts the Company paid to acquire subsidiaries and other businesses over the fair value of their net assets at the date of acquisition. The Company, on an ongoing basis, tests the DAC and VOBA recorded on the consolidated balance sheets to determine if these amounts are recoverable under current assumptions. In addition, management regularly reviews the estimates and assumptions underlying DAC and VOBA for those products for which DAC and VOBA are amortized in proportion to gross profits or gross premiums. The Company tests goodwill for impairment at least annually based upon estimates of the fair value of the reporting unit to which the goodwill relates. Given changes in facts and circumstances, these tests and reviews could lead to reductions in DAC, VOBA and/or goodwill that could have an adverse effect on the results of operations and financial condition.

If the companies that provide reinsurance default or fail to perform or the Company is unable to obtain adequate reinsurance for some of the risks underwritten, the Company could incur significant losses adversely affecting results of operations and financial condition.

The Company purchases reinsurance by transferring, or ceding, part of the risk it assumes to a reinsurance company in exchange for part of the premium it receives in connection with the risk. The part of the risk the Company retains for its own account is known as the retention. Through reinsurance, the Company has the contractual right to collect the amount above its retention from its reinsurers. Although reinsurance makes the reinsurer liable to the Company to the extent the risk is transferred or ceded to the reinsurer, it does not relieve it of its full liability to its policyholders. Accordingly, the Company bears credit risk with respect to its reinsurers. Management cannot make assurances that the Company's reinsurers will pay all of its reinsurance claims, or that they will pay claims on a timely basis. If the Company becomes liable for risks it has ceded to reinsurers or if its reinsurers cease to meet their obligations to the Company, whether because they are in a weakened position as a result of incurred losses or otherwise, the Company's results of operations, financial position and cash flows could be materially adversely affected.

As related to the Company's reinsurance facilities, there are no assurances that the Company can maintain its current reinsurance facilities or that it can obtain other reinsurance facilities in adequate amounts and at favorable rates. If the Company is unable to obtain new reinsurance facilities, either its net exposures would increase or, if it is unwilling to bear an increase in net exposures, it would have to reduce the level of its underwriting commitments. Either of these potential developments could have a material adverse effect on the Company's business, results of operations and financial position.

See Item 1.3, Company Segments, for a further discussion of reinsurance.

Interest rate fluctuations could have a negative impact on results of operations and financial condition.

In periods of rapidly increasing interest rates, policy loans, surrenders and withdrawals may increase. Premiums in flexible premium policies may decrease as policyholders seek investments with higher perceived returns. This activity may result in the Company making cash payments requiring that it sell invested assets at a time when the prices of those assets are adversely affected by the increase in market interest rates. Among other things, early withdrawals may also cause the Company to accelerate the amortization of deferred acquisition costs and value of business acquired, reducing net income.

During periods of sustained low interest rates, life insurance and annuity products may be affected by increased premium payments on products with flexible premium features and a higher percentage of insurance policies remaining in-force from year to year. During such a period, investment earnings may be lower because the interest earnings on new fixed income investments will likely have declined with the market interest rates. Although the Company invests in a broad range of asset classes, it is primarily invested in domestic fixed income securities. Accordingly, during periods of sustained low interest rates, net income may decline as a result of a decrease in the spread between either the interest rates credited to policyholders or the rates assumed in reserve calculations. Several products are at or approaching their minimum guaranteed credit rate, which could have a negative effect on net income due to spread compression.

Although the Company engages in hedging activities including investing in interest rate derivatives, there can be no assurance that it would be fully insulated from realizing any losses on sales of securities. In addition, regardless of whether the Company realized an investment loss, potential withdrawals would produce a decrease in invested assets, with an adverse effect on future earnings.

Market fluctuations and general economic conditions may adversely affect results of operations and financial condition.

Global credit, equity and foreign exchange markets continue to experience volatility as a result of credit and liquidity concerns relating ultimately to the deterioration in the United States mortgage and housing markets. These concerns have led to the disruption in the normal functioning of credit markets around the world. This marketplace leads to the concerns of possible credit losses in 2010. The U.S. government has implemented a number of initiatives to restore stability and provide liquidity to financial institutions and financial markets. Furthermore, governments throughout the world are taking steps to provide significant support to financial institutions in their markets and to restore liquidity. The Company did not obtain financial relief by participating in any of these initiatives.

The risk of fluctuations in market value of substantially all of the separate account assets is borne by the policyholders. The Company's fee income for administering separate account assets, however, is generally set as a percentage of those assets. Accordingly, fluctuations in the market value of separate account assets may result in fluctuations in revenue from policy charges.

The Company's fee income has declined during 2009 due to the decline in equity markets and lower average assets. Fee income may be negatively impacted in 2010 if the equity markets decline.

The Company manages or administers its general and separate accounts in support of cash and liquidity requirements of its insurance and investment products. The Company's general account investment portfolio is diversified over a broad range of asset classes, primarily domestic fixed income securities. The fair value of these and other general account invested assets fluctuate depending upon, among other factors, general economic and market conditions. In general, the market value of the Company's general account fixed maturity securities portfolio increases or decreases in inverse relationship with fluctuations in interest rates.

The occurrence of a major economic downturn, acts of corporate malfeasance or other events that adversely affect the issuers of the Company's fixed maturity and equity securities could cause the value of these securities and net income to decline and the default rate of the fixed maturity securities to increase. A ratings downgrade affecting particular issuers or securities could have a similar effect. Any event reducing the value of these securities other than on a temporary basis could have an adverse effect on the results of operations and financial condition.

Additionally, the Company may, from time to time, for business, regulatory, or other reasons, elect or be required to sell certain of its general account invested assets at a time when their fair values are less than their original cost, resulting in realized capital losses, which would reduce net income.

See Item 7A, Quantitative and Qualitative Disclosure About Market Risk, for a further discussion of market risk.

Changes in U.S. federal income tax law could make some of the Company's products less attractive to consumers and increase its tax costs.

Changes in U.S. federal income tax law could make some of the Company's products less attractive to consumers. For example, the following events could adversely affect the Company's business:

- changes in tax laws that would reduce or eliminate tax-deferred accumulation of earnings on the premiums paid by the holders of annuities and life insurance products;
- reductions in the federal income tax that investors are required to pay on long-term capital gains and on some dividends paid on stock may provide an incentive for some of the Company's customers and potential customers to shift assets into mutual funds and away from products, including life insurance and annuities, designed to defer taxes payable on investment returns;
- changes in applicable regulations that could restrict the ability of some companies to purchase certain BOLI products;

- changes in the availability of, or rules concerning the establishment and operation of, Section 401, 403(b), 408 and 457 plans and
- repeal of the federal estate tax.

The Company cannot predict whether any other legislation will be enacted, what the specific terms of any such legislation will be or how, if at all, this legislation or any other legislation could have an adverse effect on its results of operations or financial condition.

Congress, as well as state and local governments, also considers from time to time legislation that could increase the Company's tax costs. If such legislation is adopted, the results of operations could decline.

The Company may be subject to litigation resulting in substantial awards or settlements, and this may adversely affect its reputation and results of operations.

In recent years, life and accident insurance and financial service companies have been named as defendants in lawsuits, including class actions. A number of these lawsuits have resulted in substantial jury awards and settlements. There can be no assurance that any future litigation relating to matters such as the provision of insurance coverage or pricing and sales practices will not have a material adverse affect on the Company's results of operations or financial position.

The Company's risk management policies and procedures may leave it exposed to unidentified or unanticipated risk, which could adversely affect its business, results of operations and financial condition.

Management of operational, legal and regulatory risks requires, among other things, policies and procedures to record properly and verify a large number of transactions and events. Management has devoted significant resources to develop the Company's risk management and disaster recovery policies and procedures. However, policies and procedures may not be fully effective and may leave the Company exposed to unidentified and unanticipated risks. The Company may be subject to disruptions of its operating systems or its ability to conduct business from events that are wholly or partially beyond its control such as a natural catastrophe, act of terrorism, pandemic, or electrical/telecommunications outage. A failure of the computer systems or a compromise of their security could also subject the Company to regulatory sanctions or other claims, harm its reputation, interrupt operations and adversely affect its business, results of operations and financial condition.

The Company may experience difficulty in marketing and distributing products through its current and future distribution channels.

The Company distributes its life and savings products through a variety of distribution channels, including brokers, independent agents, consultants, retail financial institutions and its own internal sales force. In some areas the Company generates a significant portion of its business through third-party arrangements. Management periodically negotiates provisions and renewals of these relationships and there can be no assurance that such terms will remain acceptable to either party. An interruption in the continuing relationship with certain of these third parties could materially affect the Company's ability to market its products. The Company must attract and retain productive internal sales representatives to sell its products. If the Company is unsuccessful in attracting and retaining sales representatives with demonstrated abilities, its results of operations and financial condition could be adversely affected.

Item 2. Properties

The Company's corporate office facility is comprised of an 882,000 square foot complex located in Greenwood Village, Colorado. The Company owns its corporate office facilities. The Company leases approximately 234,000 square feet of the complex to CIGNA for a variety of time periods. The Company also leases sales and administrative offices throughout the United States. Management believes that the Company's properties are suitable and adequate for its current and anticipated business operations.

Item 3.

Legal Proceedings

The Company is one of two defendants in an action filed in the Colorado District Court for Arapahoe County, Colorado by a disease management vendor in an action relating to its healthcare business (which was sold to Connecticut General Life Insurance Company in a transaction that closed on April 1, 2008). The plaintiff alleges that the Company breached a contract with it and engaged in tortious conduct, for which the plaintiff seeks both compensatory and punitive damages. The Company believes it has meritorious defenses against the plaintiff's claims and is vigorously contesting them. The Company's motion for partial summary judgment is pending. The lawsuit is scheduled for trial commencing March 1, 2010.

See Note 20 to the accompanying consolidated financial statements for a further discussion.

Item 4.

Submission of Matters to a Vote of Security Holders

No matter was submitted to a vote of security holders during the fourth quarter of 2009.

Part II

Item 5.

Market for Registrant's Common Equity and Related Stockholder Matters

5.1 Equity Security Holders and Market Information

There is no established public trading market for the Company's common equity. GWL&A Financial is the sole shareholder of the Company's common equity securities.

5.2 Dividends

In the three most recent fiscal years, the Company has paid dividends on its common shares. Dividends paid on the Company's common stock were \$25 million, \$1,722 million and \$605 million during the years ended December 31, 2009, 2008 and 2007, respectively. Dividends paid during the year ended December 31, 2008 were paid in part using the proceeds from the sale of the Healthcare segment as discussed in Item 1, Business.

Under Colorado law, the Company cannot, without the approval of the Colorado Commissioner of Insurance, pay a dividend if as a result of such payment, the total of that dividend and all dividends paid in the preceding twelve months, would exceed the greater of (i) 10% of the Company's statutory surplus as regards policyholders as of the preceding year ended December 31; or (ii) the Company's statutory net gain, not including realized capital gains, for the twelve-month period ending the preceding December 31 not including pro rata distributions of the Company's own securities.

Item 6.

Selected Financial Data

The following is a summary of selected consolidated financial information for the Company. The selected consolidated financial information for the years ended December 31, 2009, 2008 and 2007, and at December 31, 2009 and 2008 has been derived in part from the Company's audited consolidated financial statements included in Item 8, Financial Statements and Supplementary Data. Note 1 to the consolidated financial statements discusses the significant accounting policies of the Company. The selected consolidated income statement data for the years ended December 31, 2006 and 2005 and the selected consolidated balance sheet data at December 31, 2007, 2006 and 2005 have been derived in part from the Company's consolidated financial statements not included elsewhere herein. The selected consolidated balance sheet data at December 31, 2005 has not been restated for discontinued operations. The following information should be read in conjunction with and is qualified in its entirety by the information contained in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and the consolidated financial statements appearing in Item 8.

| (In millions) | As of and for the Year Ended December 31, | | | | |
|--|---|-----------|-----------|-----------|-----------|
| | 2009 | 2008 | 2007 | 2006 | 2005 |
| Total revenues | \$ 2,028 | \$ 2,011 | \$ 744 | \$ 2,024 | \$ 2,012 |
| Total benefits and expenses | 1,859 | 1,470 | 385 | 1,768 | 1,764 |
| Income from continuing operations | 169 | 541 | 359 | 256 | 248 |
| Provision for income taxes | 47 | 96 | 119 | 72 | 66 |
| Income from discontinued operations ¹ | - | 653 | 179 | 153 | 190 |
| Net income | \$ 122 | \$ 1,098 | \$ 419 | \$ 337 | \$ 372 |
| Dividends declared | \$ 25 | \$ 1,772 | \$ 605 | \$ 249 | \$ 221 |
| Investment assets | \$ 20,376 | \$ 18,082 | \$ 19,383 | \$ 21,785 | \$ 20,543 |
| Separate account assets | 18,887 | 15,122 | 18,090 | 16,290 | 14,456 |
| Total assets | 41,798 | 36,176 | 40,335 | 41,526 | 37,779 |
| Due to parent and affiliates | 538 | 534 | 535 | 548 | 241 |
| Total stockholder's equity | 1,350 | 609 | 2,035 | 2,173 | 2,062 |

¹ See Item 1.2, Business of the Company and Note 3 to the accompanying consolidated financial statements for a discussion of the Company's discontinued operations.

Item 7.

Management's Discussion and Analysis of Financial Condition and Results of Operations

This Form 10-K contains forward-looking statements. Forward-looking statements are statements not based on historical information and that relate to future operations, strategies, financial results, or other developments. In particular, statements using verbs such as "expected," "anticipate," "believe," or words of similar import generally involve forward-looking statements. Without limiting the foregoing, forward-looking statements include statements that represent the Company's beliefs concerning future or projected levels of sales of its products, investment spreads or yields, or the earnings or profitability of the Company's activities. Forward-looking statements are necessarily based upon estimates and assumptions that are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond the Company's control and many of which, with respect to future business decisions, are subject to change. These uncertainties and contingencies can affect actual results and could cause actual results to differ materially from those expressed in any forward-looking statements made by, or on behalf of, the Company. Whether or not actual results differ materially from forward-looking statements may depend on numerous foreseeable and unforeseeable events or developments, some of which may be national in scope, such as general economic conditions and interest rates, some of which may be related to the insurance industry generally, such as pricing competition, regulatory developments and industry consolidation and others of which may relate to the Company specifically, such as credit, volatility and other risks associated with its investment portfolio and other factors. Readers should also consider other matters, including any risks and uncertainties, discussed in documents filed by the Company and certain of its subsidiaries with the Securities and Exchange Commission. This discussion should be read in conjunction with the Company's consolidated financial statements included in Item 8, Financial Statements and Supplementary Data.

Management's discussion and analysis of financial condition and results of operations of the Company for the three years ended December 31, 2009 follows. This management discussion and analysis should be read in conjunction with the financial data contained in Item 6, Selected Financial Data, and in Item 8, Financial Statements and Supplementary Data.

7.1 Executive Summary

The Company and its subsidiaries are providers of insurance and other financial service products to a large spectrum of individual, corporate, institutional and governmental customers. The Company offers life insurance and annuities to individuals, while corporations and other institutions are offered retirement and savings products and services.

On April 1, 2008, the Company and certain of its subsidiaries completed the sale of substantially all of their healthcare insurance business to a subsidiary of CIGNA Corporation (“CIGNA”). The business that was sold, formerly reported as the Company’s Healthcare segment, was the vehicle through which it marketed and administered group life and health insurance to small, mid-sized and national employers. CIGNA acquired from the Company the stop loss, group life, group disability, group medical, group dental, group vision, group prescription drug coverage and group accidental death and dismemberment insurance business in the United States and the Company’s supporting information technology infrastructure through a combination of 100% indemnity reinsurance agreements, renewal rights, related administrative service agreements and the acquisition of certain of the Company’s subsidiaries. The Company retained a small portion of its Healthcare business and reports it within its Individual Markets segment. The statements of income and balance sheets of the disposed business activities are presented as discontinued operations for all periods presented in the accompanying consolidated financial statements.

The Company’s operations are organized into three business segments: Individual Markets, Retirement Services and Other. There is no legal separation of the three segments.

Management considers the ability to continue to expand its presence in the United States defined contribution and institutional insurance markets to be its primary points of focus. The life insurance, savings and investments marketplace is also highly competitive. Competitors include mutual fund companies, insurance companies, banks, investment advisors and certain service and professional organizations.

Strong sales and strategic partnerships led the way to another year of growth for both the Individual Markets and Retirement Services segments during 2009.

During 2008 and 2009, the Individual Markets segment focused on strengthening relationships with key distributors which translated into substantial sales growth. New relationships developed during 2008 and 2009 should contribute to continued sales growth in 2010.

The Retirement Services segment expanded distribution in 2009 by adding new advisory and brokerage relationships as well as new national distribution channels. The combined sales force, including wholesalers, relationship managers and client service specialists, now includes in excess of 470 individuals who are fully dedicated to expanding the retirement block of business along with providing excellent customer service.

The Company is committed to providing exceptional service and high value to life and annuity policyholders. It has a dedicated service unit to work in collaboration with its brokers and agents to ensure that policyholders continue to receive the information and service they need to make sound financial decisions with respect to their policies.

Current Market Conditions

During the latter part of 2009, the financial markets have shown some recovery from the turmoil experienced in the latter part of 2008 and early 2009. The S&P 500 index is up by 23% at December 31, 2009 when compared to December 31, 2008 and it is down by 38% at December 31, 2008 when compared to December 31, 2007. The average of the S&P 500 index during the year ended December 31, 2009 is down 22% when compared to the average for the year ended December 31, 2008 and it is down by 17% for the year ended December 31, 2008 when compared to the year ended December 31, 2007.

| S&P 500 Index | Year Ended December 31, | | |
|---------------|-------------------------|-------|-------|
| | 2009 | 2008 | 2007 |
| Index close | 1,115 | 903 | 1,468 |
| Index average | 948 | 1,220 | 1,477 |

Variable asset-based fees received by the Company fluctuate with changes in participant account balances. Participant account balances change due to cash flow and unrealized market gains and losses associated with changes in the United States equities market. Fee income decreased by \$43 million, or 10%, to \$386 million for the year ended December 31, 2009 when compared to 2008. The decrease is primarily related to lower variable fee income as a result of lower average account balances due to the weak performance of the U.S. equities market.

Although the U.S. equities market has recovered somewhat in recent months, market declines in the future could result in additional decreases in fee income as well as adjustments to the amortization of deferred policy acquisition and other costs.

The significant deterioration in the capital markets had an impact on the financial results for the year ended December 31, 2009. During the year ended December 31, 2009, the Company recorded other-than-temporary impairments on fixed maturities primarily related to asset-backed investments with home improvement loan collateral in the amount of \$113 million. The Company recorded other-than-temporary impairments of \$88 million during 2008 primarily related to corporate debt backed by Lehman Brothers Holdings, Inc. and General Motors Corporation.

A recovery in market liquidity and tightening of credit spreads have resulted in improved market values for the Company's fixed maturity and equity investments since December 31, 2008. The Company has recorded a decrease in gross unrealized losses of \$841 million and an increase in gross unrealized gains of \$386 million during the year ended December 31, 2009. This resulted in a \$614 million increase to accumulated other comprehensive income (loss), net of policyholder related amounts and deferred taxes. See Notes 6 and 13 to the accompanying consolidated financial statements for a discussion of these and other investment losses.

The deterioration in the credit markets has not had a significant impact on the Company's sources of liquidity. The Company has met its operating requirements by maintaining appropriate liquidity in its investment portfolio and utilizing cash flows from operations. The Company's credit rating has remained stable. If necessary, the Company has continued access to a \$50 million line of credit which currently has no amounts outstanding.

7.2 Summary of Critical Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires the Company's management to adopt accounting policies to enable them to make a significant variety of accounting and actuarial estimates and assumptions. These estimates and assumptions affect, among other things, the reported amounts of assets and liabilities, the disclosure of contingent liabilities and the reported amounts of revenues and expenses. Actual results can differ from the amounts previously estimated, which were based on information available at the time the estimates were made.

Critical accounting estimates are those that management believes are important to the portrayal of the Company's results of operations and financial condition and which require them to make difficult, subjective and/or complex judgments. Critical accounting estimates cover accounting and actuarial matters that are inherently uncertain because the future resolution of such matters is unknown. Many of these policies, estimates and related judgments are common in the insurance and financial services industries. The Company believes that its most critical accounting estimates include the following:

- Valuation of investments and other-than-temporary impairments.
- Recognition of income on certain investments.
- Valuation and accounting for derivative instruments.
- Policy and contract benefits and claims.
- Deferred acquisition costs and value of business acquired.
- Goodwill.
- Employee benefit plans.
- Taxes on income

Valuation of investments, other-than-temporary impairments and recognition of income on certain investments

The Company's principal investments are in fixed maturity and equity securities, mortgage and policy loans, limited partnership interests and other invested assets. The Company's investments are exposed to three primary sources of risk: credit, interest rate and market valuation. The financial statement risks, stemming from such investment risks, are those associated with the determination of fair values, the recognition of impairments and the recognition of income on certain investments.

The Company classifies the majority of its fixed maturity and all of its equity investments as available-for-sale and records them at their estimated fair value with the related net unrealized gains or losses, net of policyholder related amounts and deferred taxes, being recorded in accumulated other comprehensive income (loss) in the stockholder's equity section in its consolidated balance sheets.

The fair values for fixed maturity and equity securities are based upon a fair value hierarchy. Fair values of Level 1 investments are determined using quoted prices in active markets for identical assets. Level 2 investments have fair values determined from inputs that are observable, either directly or indirectly. Approximately 60% of all fixed maturity investments are priced from an external pricing service. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. The inputs are considered observable and the valuations are classified as Level 2. Fixed maturity investments are also priced using a matrix which is based on credit quality and average life which are deemed Level 2 observable inputs. Other fixed maturity investments may be priced by other means such as broker quotes or internal models where the significant inputs are observable. Inputs used to derive fair values classified as Level 3 fixed maturity investments are unobservable and include situations where there is little, if any, market activity for the investment. In late 2007, broker/dealers largely discontinued their practice of holding securitized products in inventory, removing an important source of liquidity for the asset-backed security market. Based on this inactivity, the Company determined that internal models utilizing asset-backed securities index spreads rather than credit default swap spreads was a better measurement of fair value for certain asset-backed securities. The Company also prices fixed maturity investments utilizing broker quotes. If the broker's inputs are largely unobservable, the valuation is classified as a Level 3. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts of the Company's financial instruments.

One of the significant estimates related to the fair value of available-for-sale securities is the evaluation of investments for other-than-temporary impairments. The assessment of whether an other-than-temporary impairment has occurred on securities where management does not intend to sell the fixed maturity investment and it is not more likely than not the Company will be required to sell the fixed maturity investment before recovery of its amortized cost basis, is based upon management's case-by-case evaluation of the underlying reasons for the decline in fair value. Management considers a wide range of factors, as described below, regarding the security issuer and uses its best judgment in evaluating the cause of the decline in its estimated fair value and in assessing the prospects for near-term recovery. Inherent in management's evaluation of the security are assumptions and estimates about the issuer's operations and ability to generate future cash flows. While all available information is taken into account, it is difficult to predict the ultimate recoverable amount from a distressed or impaired security.

Considerations used by the Company's management in the impairment evaluation process include, but are not limited to, the following:

- Fair value is below cost.
- The decline in fair value is attributable to specific adverse conditions affecting a particular instrument, its issuer, an industry or geographic area.
- The decline in fair value has existed for an extended period of time.
- The fixed maturity investment has been downgraded by a credit rating agency.
- The financial condition of the issuer has deteriorated.
- The payment structure of the fixed maturity investment and the likelihood of the issuer being able to make payments that increase in the future.
- Dividends have been reduced or eliminated or scheduled interest payments have not been made.

The Company recognizes in earnings an other-than-temporary impairment on a fixed maturity investment in an unrealized loss position when an entity either (a) has the intent to sell the fixed maturity investment or (b) more likely than not will be required to sell the fixed maturity investment before its anticipated recovery. The other-than-temporary impairment is the difference between the fixed maturity investment's amortized cost basis and its fair value at the balance sheet date.

If management does not intend to sell the fixed maturity investment and it is not more likely than not that the Company will be required to sell the fixed maturity investment before recovery of its amortized cost basis, but the present value of the cash flows expected to be collected (discounted at the effective interest rate implicit in the fixed maturity investment prior to impairment) is less than the amortized cost basis of the fixed maturity investment (referred to as the credit loss portion), an other-than-temporary impairment is considered to have occurred. In this instance, total other-than-temporary impairment is bifurcated into two components: the amount related to the credit loss, which is recognized in earnings; and the amount attributed to other factors (referred to as the non-credit portion), which is recognized as a separate component in accumulated other comprehensive income (loss). After the recognition of an other-than-temporary impairment, the fixed maturity investment is accounted for as if it had been purchased on the measurement date of the other-than-temporary impairment, with an amortized cost basis equal to the previous amortized cost basis less the other-than-temporary impairment recognized in earnings.

Mortgage loans, which comprise 8% of the Company's investments at both December 31, 2009 and 2008, respectively, are carried at their unpaid principal balances adjusted for any unamortized premiums or discounts and allowance for credit losses. The determination of the calculation and the adequacy of the mortgage loan allowance and mortgage impairments are subjective. Management's periodic evaluation and assessment of the adequacy of the allowance for losses and the need for mortgage impairments is based on known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the fair value of the underlying collateral, composition of the loan portfolio, current economic conditions, loss experience and other relevant factors. In determining the ultimate adequacy of the allowance for mortgage loans, greater consideration is given to the individual mortgage characteristics and related collateral.

See Notes 6 and 7 to the accompanying consolidated financial statements for more information regarding the Company's invested assets and their fair values.

The recognition of income on certain investments (e.g. loan-backed securities including mortgage-backed and asset-backed securities) is dependent upon market conditions, which could result in prepayments and changes in amounts to be earned.

Valuation and accounting for derivative instruments

The Company enters into limited derivative transactions which include the use of interest rate swaps, interest rate swaptions, foreign currency exchange contracts and exchange-traded United States government treasury futures. The Company uses these derivative instruments to manage various risks, including interest rate and foreign exchange risk associated with its invested assets and liabilities. Derivative instruments are not used for speculative reasons.

The Company controls the credit risk of its derivative contracts through credit approvals, limits, monitoring procedures and in some cases, requiring collateral. Risk of loss is generally limited to the portion of the fair value of derivative instruments which exceeds the value of the collateral held and not to the notional or contractual amounts of the derivatives. As the Company enters into derivative transactions only with high quality institutions, no losses associated with non-performance of derivative financial instruments have occurred.

The fair value of derivatives is determined by quoted market prices or through the use of pricing models. The determination of fair value, when quoted market values are not available, is based on valuation methodologies and assumptions deemed appropriate under the circumstances. Essential to the analysis of fair value is the risk of counterparty default. Counterparty credit risk was evaluated and fair values were adjusted accordingly at December 31, 2009 and 2008. Values can also be affected by changes in interest rates, foreign exchange rates, financial indices, credit spreads, market volatility and liquidity. Changes in the values of the derivatives are expected to be offset by changes in value of the hedged item.

The accounting for derivative instruments is complex. The Company designates its derivative financial instruments as (i) fair value hedges, (ii) cash flow hedges and (iii) derivatives not qualifying for hedge accounting.

- Fair value hedges - Interest rate futures are used to manage the risk of the change in the fair value of certain fixed rate maturity investments. Changes in the fair value of a derivative instrument that has been designated as a fair value hedge are recorded in current period net investment income.

- Cash flow hedges - Interest rate swap agreements are used to convert the interest rate on certain debt securities from a floating rate to a fixed rate. Foreign currency exchange contracts are used to manage the foreign exchange rate risk associated with bonds denominated in other than U.S. dollars. Interest rate futures are used to manage the interest rate risks of forecasted acquisitions of fixed rate maturity investments. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one party to the agreement at each due date. The effective portion of the changes in the fair value of a derivative instrument that is designated as a cash flow hedge is recorded in accumulated other comprehensive income on the consolidated balance sheet and is reclassified to earnings when the cash flow of the hedged item impacts earnings. The ineffective portion of the changes in the fair value of cash flow hedges is recorded as an adjustment to net investment income.

- Derivatives not designated as hedging instruments - The Company attempts to match the timing of when interest rates are committed on insurance products with other new investments. However, timing differences may occur and can expose the Company to fluctuating interest rates. To offset this risk, the Company uses exchange-traded United States government treasury futures contracts. Interest rate swaptions are used to manage the potential variability in future interest payments on certain insurance products due to a change in credited interest rates and the related change in cash flows due to increased surrenders. A change in the fair value of a derivative instrument that does not qualify for hedge accounting treatment is recognized in net investment income in the period of the change and may result in significant volatility of earnings. Changes in the fair value of derivative instruments that have not been designated as hedging instruments are recorded in current period net investment income. Net realized investment gains and losses result from the termination of derivative contracts prior to expiration that are not designated as hedge for accounting purposes and certain fair-value hedge relationships.

See Note 6 to the accompanying consolidated financial statements for more information regarding the Company's derivative instruments.

Policy benefit liabilities

- Future policy benefits - The Company establishes liabilities for amounts payable under insurance policies and annuity contracts. Generally, amounts are payable over an extended period of time and related liabilities are calculated as the present value of future expected benefits to be paid, reduced by the present value of future expected premiums. Such liabilities are established based upon methods and underlying assumptions in accordance with GAAP and applicable actuarial standards. Principal assumptions used in the establishment of liabilities for future policy benefits are mortality, morbidity, policy lapse, renewal, retirement, investment returns, inflation, expenses and other contingent events as appropriate to the respective product type. These assumptions are established at the time the policy is issued and are intended to estimate the experience for the period the policy benefits are payable. Utilizing these assumptions, liabilities are established on a block of business basis. If experience is less favorable than the assumptions employed, additional liabilities may be required, resulting in a charge to current period earnings.

- Policy and contract claims - Policy and contract liabilities for unpaid claims and claim expenses for life and health policies represent the amount estimated for claims that have been reported but not yet settled and claims incurred but not yet reported. Liabilities for unpaid claims are valued in accordance with the terms of the related policies and contracts. Liabilities for claims incurred but not yet reported are estimated based upon the Company's historical experience and other actuarial assumptions that consider the effects of current developments, anticipated trends and risk management programs. The effects of changes in estimated liabilities are included in the results of operations in the period in which the changes occur.

- Reinsurance - The Company enters into reinsurance transactions as both a provider and a purchaser of reinsurance. Policy benefits ceded to other insurance companies are presented as reinsurance receivables in the Company's consolidated balance sheets. The cost of reinsurance related to long-duration contracts is accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies. Ceded reinsurance contracts do not relieve the Company from its obligations to policyholders. Failure of reinsurers to honor their obligations under these contracts could result in losses to the Company. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the reinsurers to minimize its exposure to significant losses from reinsurer defaults.

See Notes 1 and 8 to the accompanying consolidated financial statements for more information regarding the Company's future policy benefits.

Deferred acquisition costs and value of business acquired

The Company incurs significant costs in connection with acquiring new and renewal insurance business. Deferred acquisition costs ("DAC") vary with and relates to costs that consist primarily of commissions and agency and policy issue expenses. Value of business acquired ("VOBA") is an intangible asset that reflects the estimated fair value of in-force life insurance contracts acquired and represents the portion of the purchase price allocated to the value of the right to receive future cash flows from the acquired business. VOBA is based upon actuarially determined projections, by block of business, of future policy and contract charges, premiums, mortality and morbidity, performance, surrenders, operating expenses, investment returns and other factors. DAC and VOBA are amortized over the expected lives of the related contracts based upon the level and timing of either gross profits or gross premiums, depending upon the type of contract as discussed below. The recovery of both DAC and VOBA is dependent upon the future profitability of the related business. DAC and VOBA are aggregated in the consolidated financial statements for reporting purposes.

DAC and VOBA associated with annuity and investment-type products are being amortized over the life of the contracts in proportion to the emergence of estimated gross profits. DAC and VOBA associated with traditional life insurance products are amortized over the premium-paying period of the related policies in proportion to the present value of estimated premium revenues recognized.

Each reporting period, the Company updates the estimated present values of gross profits for that period. When the actual gross profits change from previous estimates, the cumulative DAC and VOBA amortization is re-estimated and adjusted by the cumulative charge or credit to current period earnings. When actual gross profits exceed those previously estimated, the DAC and VOBA amortization will increase, resulting in a current period charge to earnings. The opposite result occurs when the actual gross profits are below those previously estimated. These adjustments are made when the Company revises its estimates for such factors as investment yield, realized investment gains and losses and policyholder retention.

See Note 9 to the accompanying consolidated financial statements for more information regarding the Company's recorded DAC and VOBA.

Goodwill

Goodwill is the excess of the cost over the fair value of assets acquired less the fair value of liabilities assumed. The establishment of goodwill requires management to make significant estimates and assumptions about the fair value of the assets acquired and liabilities assumed. The allocation process includes, among other measures, a review of relevant information about the assets and liabilities, independent appraisals and other valuation methodologies. Goodwill is assigned to the Company's operating segment where the assets and liabilities are recorded.

The Company tests goodwill for impairment at least annually or more frequently if events or circumstances, such as adverse changes in the business climate or a segment's future earning potential, indicate that there may be justification for conducting an interim test.

The fair value of the reporting segment is determined using an earnings and equity analysis which is compared with a similar measure of peer companies. If the carrying value of recorded goodwill exceeds its fair value, the excess is recognized as an impairment and recorded as a charge against earnings in the period in which the impairment was identified.

See Note 10 to the accompanying consolidated financial statements for more information regarding the Company's recorded goodwill.

Employee benefit plans

The Company sponsors pension and other post retirement benefit plans in various forms covering employees who meet specified eligibility requirements. The obligations and expenses associated with these plans require an extensive use of estimates and assumptions, such as the discount rate applied to pension obligations, expected rate of return on plan assets, rate of future compensation increases, healthcare cost trend rates, as well as assumptions regarding participant demographics such as rate and age of retirements, withdrawal rates and mortality. Management, in consultation with its independent consulting actuarial firm, determines these assumptions based upon a variety of factors such as historical performance of the plan and its assets, currently available market and industry data and expected benefit payout streams. The assumptions used will differ, and may differ materially, from actual results due to, among other factors, changing market and economic conditions, higher or lower withdrawal rates and changes in participant demographics. These assumptions are subjective in many cases and have an important effect on the Company's pension and post retirement benefit obligations.

See Note 15 to the accompanying consolidated financial statements for more information regarding the Company's employee benefit plans.

Taxes on income

The Company's effective tax rate is based upon expected income and statutory income tax rates and prudent available tax planning opportunities. In the determination of the Company's effective income tax rate, management considers judgments regarding its business plans, planning opportunities and expectations about their future outcomes. Certain changes or future events, such as changes in tax legislation and the commencement or completion of tax audits, could have an impact on management's estimates and the Company's effective tax rate.

Accounting and tax regulations require that items be included in income tax returns at different times from when they are reflected in financial statements. These timing differences give rise to deferred tax assets and liabilities. A deferred tax liability is recognized for temporary differences that will result in taxable amounts or nondeductible expenses in future years. A deferred tax asset is recognized for temporary differences that will result in tax deductible amounts or nontaxable income in future years, including carryforwards.

The application of GAAP requires management to evaluate the recoverability of its deferred tax assets. Although realization is not assured, management believes that it is more likely than not that the deferred tax assets will be realized.

The Company determines whether it is more-likely-than-not that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the consolidated financial statements. A tax position is measured as the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Unrecognized tax benefits due to tax uncertainties that do not meet the threshold are included within other liabilities and are charged to earnings in the period that such determination is made.

The amount of income taxes paid by the Company is subject to ongoing audits in the various jurisdictions in which it carries on business. The Company has executed closing agreements with the Internal Revenue Service (the "IRS") for all federal examinations on tax years 2004 and prior. The Company is currently under federal examination by the IRS for the 2005 tax year. The Company does not expect significant increases or decreases to the unrecognized tax benefits in 2010 as a result of the federal audit. Also, the Company does not expect significant increases or decreases relating to state and local audits.

See Note 16 to the accompanying consolidated financial statements for more information regarding taxes on income.

7.3 Company Results of Operations

The Company has three reportable segments: Individual Markets, Retirement Services and Other. The Individual Markets segment distributes life insurance and individual annuity products to both individuals and businesses through various distribution channels. Life insurance products in force include participating and non-participating term life, whole life, universal life and variable universal life. The Retirement Services segment provides retirement plan enrollment services, communication materials, various retirement plan investment options and educational services to employer-sponsored defined contribution/defined benefit plans and 401(k) and 403(b) plans, as well as comprehensive administrative and record-keeping services for financial institutions and employers. Defined contribution plans provide for benefits based upon the value of contributions to, and investment returns on, an individual's account. The Company's Other segment includes corporate items not directly allocated to any of its other business segments, interest expense on long-term debt and the activities of a wholly-owned subsidiary whose sole business is the assumption of certain blocks of term life insurance from an affiliated company.

Some of the more significant transactions impacting the Company's results of operations are:

On April 1, 2008, the Company and certain of its subsidiaries completed the sale of substantially all of their healthcare insurance business to a subsidiary of CIGNA Corporation ("CIGNA"). The Company recognized a gain in the amount of \$682 million, net of income taxes, upon completion of the transaction. The business that was sold, formerly reported as the Company's Healthcare segment, was the vehicle through which it marketed and administered group life and health insurance to small, mid-sized and national employers. CIGNA acquired from the Company the stop loss, group life, group disability, group medical, group dental, group vision, group prescription drug coverage and group accidental death and dismemberment insurance business in the United States and the Company's supporting information technology infrastructure through a combination of 100% indemnity reinsurance agreements, renewal rights, related administrative service agreements and the acquisition of certain of the Company's subsidiaries. The statements of income and balance sheets of the disposed business activities are presented as discontinued operations for all periods presented in the consolidated financial statements. See Note 3 to the accompanying consolidated financial statements for further information regarding this transaction.

The Company adopted a restructuring plan in connection with the sale of its Healthcare segment. The restructuring plan consisted of a structural reorganization which will enable the Company to operate effectively in its present business environment. The liability is included in other liabilities in the consolidated balance sheet. The amounts incurred during the period and adjustments to original estimates during the period have been charged (credited) to income from discontinued operations in the consolidated statement of income.

During the first quarter of 2008, undistributed earnings on participating business decreased by \$208 million with a corresponding decrease to policyholder benefits in connection with a long-standing assumption reinsurance agreement under which the Company had reinsured a block of participating policies. On January 1, 2008, the Company was no longer required to maintain the liability to meet its obligations under the terms of the agreement. An income tax provision was recorded on the undistributed earnings when those earnings occurred. Accordingly, there was no income tax provision recorded at the time of the liability release. On January 1, 2008, the Company began recognizing the net earnings on these policies in its Individual Markets segment net income.

On June 1, 2007 the Company's Individual Markets segment terminated one of its reinsurance agreements with an affiliate, The Canada Life Assurance Company ("CLAC"), pursuant to which it had assumed 80% of certain United States life, health and annuity business on a coinsurance and coinsurance with funds withheld basis. See Note 5 to the accompanying consolidated financial statements for further information regarding this transaction.

Year ended December 31, 2009 compared with the year ended December 31, 2008

The following is a summary of certain financial data of the Company for the years ended December 31, 2009 and 2008:

| Income Statement Data (In millions) | Year Ended December 31, | |
|---|-------------------------|----------|
| | 2009 | 2008 |
| Premium income | \$ 560 | \$ 525 |
| Fee income | 386 | 429 |
| Net investment income | 1,149 | 1,079 |
| Net realized investment losses | (67) | (22) |
| Total revenues | 2,028 | 2,011 |
| Policyholder benefits | 1,326 | 948 |
| Operating expenses | 533 | 522 |
| Total benefits and expenses | 1,859 | 1,470 |
| Income from continuing operations before income taxes | 169 | 541 |
| Income tax expense | 47 | 96 |
| Income from continuing operations | 122 | 445 |
| Income from discontinued operations | - | 653 |
| Net income | \$ 122 | \$ 1,098 |

Income from Continuing Operations

The Company's consolidated income from continuing operations decreased by \$323 million, or 73%, to \$122 million for the year ended December 31, 2009 when compared to 2008. This decrease is primarily due to a gain in 2008 in the amount of \$208 million as a result of the release of the liability associated with certain participating policies of the Company's Other segment as discussed in Note 3 to the accompanying consolidated financial statements and a \$98 million (\$64 million net of income taxes) liability release on these policies. In addition, fee income decreased and realized losses on investments increased in 2009 when compared to 2008.

Premium income increased by \$35 million, or 7%, to \$560 million for the year ended December 31, 2009 when compared to 2008. This increase is primarily related to \$102 million increase in sales of the single premium whole life product partially offset by a \$51 million decrease in other insurance products, primarily term insurance products, in the Company's Individual Markets segment further offset by a \$16 million decrease of reinsurance activity in the Company's Other segment.

Fee income decreased by \$43 million, or 10%, to \$386 million for the year ended December 31, 2009 when compared to 2008. The decrease is primarily related to lower variable fee income as a result of lower average account balances due to the weak performance of the U.S. equities market.

Net investment income increased by \$70 million, or 6%, to \$1,149 million for the year ended December 31, 2009 when compared to 2008. The increase is primarily due to a \$25 million increase in policy loan interest income in the Individual Markets segment and a \$31 million increase in net investment income in 2009 due to increases in general account assets in the Company's Retirement Services segment.

Net realized losses on investments increased by \$45 million to \$67 million during the year ended December 31, 2009 when compared to 2008. The \$67 million loss in 2009 is due to \$99 million of write-downs primarily on fixed maturity securities guaranteed by Financial Guaranty Insurance Company ("FGIC") partially offset by \$32 million of net realized gains on the sale of investments. The \$22 million loss during the year ended December 31, 2008 is due to \$87 million of write-downs including \$36 million on a fixed maturity security backed by Lehman Brothers Holdings Inc. and \$25 million on securities backed by General Motors Corporation. These write-downs are partially offset by \$65 million of net realized gains on the sale of investments.

Policyholder benefit expenses include amounts paid or credited to policyholders, changes in policy liabilities, claims, surrenders and annuity and maturity payments. Excluding the impact of the aforementioned \$306 million decrease in future policy benefits in 2008 related to the participating policy liabilities, benefits and expenses increased by \$72 million, or 6%, to \$1,326 million for the year ended December 31, 2009 when compared to 2008. The increase is primarily due to increased future policy benefits of \$91 million related to the increase in the fixed single premium whole life product as mentioned above and an increase in interest credited to contractholders of \$24 million in the Company's Individual Markets segment.

Income tax expense decreased by \$49 million to \$47 million during the year ended December 31, 2009 when compared to 2008 due to the \$164 million decrease in income from continuing operations, excluding the aforementioned \$208 million gain in 2008 which was taxed in previous years.

The segment information below discusses the reasons for these changes.

Year ended December 31, 2008 compared with the year ended December 31, 2007

The following is a summary of certain financial data of the Company for the years ended December 31, 2008 and 2007:

| Income Statement Data (In millions) | Year Ended December 31, | |
|---|-------------------------|----------|
| | 2008 | 2007 |
| Premium income | \$ 525 | \$ (857) |
| Fee income | 429 | 463 |
| Net investment income | 1,079 | 1,140 |
| Net realized investment losses | (22) | (2) |
| Total revenues | 2,011 | 744 |
| Policyholder benefits | 948 | (225) |
| Operating expenses | 522 | 610 |
| Total benefits and expenses | 1,470 | 385 |
| Income from continuing operations before income taxes | 541 | 359 |
| Income tax expense | 96 | 119 |
| Income from continuing operations | 445 | 240 |
| Income from discontinued operations | 653 | 179 |
| Net income | \$ 1,098 | \$ 419 |

Income from Continuing Operations

The Company's consolidated income from continuing operations increased by \$205 million, or 85%, to \$445 million during the year ended December 31, 2008 from \$240 million during 2007. The increase in income from continuing operations is primarily related to a \$208 million gain as a result of the aforementioned release of the liability associated with certain participating policies and a \$98 million (\$64 million net of income taxes) liability release on these policies. This increase is partially offset by a \$20 million (\$12 million net of policyholder related amounts and income taxes) increase in net realized investment losses and poor mortality results.

Excluding the one-time recording of negative premium revenue in the amount of \$1,387 million during the year ended December 31, 2007 resulting from the termination of the CLAC reinsurance agreement, premium revenues decreased by \$5 million, or less than 1%, to \$525 million during the year ended December 31, 2008 from \$530 million in 2007. This decrease is primarily the result of a \$20 million decrease in Other segment due to the July 2007 amended reinsurance agreement between Great-West Life & Annuity Insurance Company of South Carolina, a wholly-owned subsidiary of the Company, and CLAC as discussed in Note 5 to the consolidated financial statements. This decrease is partially offset by an \$18 million premium increase in the Individual Markets segment primarily through improved sales of the single premium whole life product.

Fee income decreased by \$34 million, or 7%, to \$429 million during the year ended December 31, 2008 from \$463 million in 2007. The decrease is attributable to lower variable fee income in both the Individual Markets and Retirement Services segments due to the weakness of the U.S. equity markets, \$4 million of fee income in 2007 that is absent in 2008 as a result of the termination of the CLAC reinsurance agreement and one time fees on the BOLI block of business in 2007 due to surrender activity.

Excluding the one-time recording of \$59 million of net investment income resulting from the termination of the CLAC reinsurance agreement, net investment income decreased by \$2 million, or less than 1%, to \$1,079 million during the year ended December 31, 2008 from \$1,081 million in 2007. The decrease is primarily due to \$43 million of net investment income in 2007 that is absent in 2008 as a result of the termination of the CLAC reinsurance agreement offset by higher policy loan interest income and an increase in the earned net investment income rate.

Net realized losses on investments increased by \$20 million to \$22 million during the year ended December 31, 2008 from a loss of \$2 million in 2007. The loss during the year ended December 31, 2008 is due to \$87 million of write-downs including \$36 million on a fixed maturity security backed by Lehman Brothers Holdings Inc. and \$25 million on securities backed by General Motors Corporation. These write-downs are partially offset by \$65 million of net realized gains on the sale of investments.

Policyholder benefit expenses include amounts paid or credited to policyholders, changes in policy liabilities, claims, surrenders and annuity and maturity payments. Excluding the one time recording of a decrease in future policy benefits of \$1,453 million resulting from the termination of the CLAC reinsurance agreement during 2007 policyholder benefits decreased by \$280 million, or 23%, to \$948 million during the year ended December 31, 2008 from \$1,228 million in 2007. The decrease is primarily related to the aforementioned \$208 million gain as a result of the release of the liability associated with certain participating policies and a \$98 million liability release on those policies during 2008.

Operating expenses include general and administrative expenses, commissions, premium taxes, interest on long-term debt and amortization of deferred acquisition costs and value of business acquired. Total operating expenses decreased by \$88 million, or 14%, to \$522 million during the year ended December 31, 2008 from \$610 million in 2007. The decrease is attributable to \$92 million of expenses associated with the termination of the CLAC reinsurance agreement.

Although income from continuing operations before income taxes increased by \$182 million during the year ended December 31, 2008 when compared to 2007, income tax expense decreased. This decrease is primarily because the income tax provision on the aforementioned \$208 million gain resulting from the release of the liability associated with certain participating policies was recorded in previous years, as discussed in Note 4 to the consolidated financial statements.

Income From Discontinued Operations

Income from discontinued operations was \$653 million and \$179 million during the years ended December 31, 2008 and 2007, respectively. As aforementioned, the Company sold substantially all of its healthcare insurance business on April 1, 2008 resulting in a gain in the amount of \$1,090 million (\$682 million net of income taxes) upon completion of the transaction. Income from discontinued operations for the year ended December 31, 2008 includes charges in the amount of \$101 million (\$64 million net of income taxes) which represents costs associated with the sale. The healthcare insurance business comprised substantially all of the Company's discontinued operations. The Company ceased recording operating activity from its discontinued operations on April 1, 2008.

7.4 Individual Markets Segment Results of Operations

Year ended December 31, 2009 compared with the year ended December 31, 2008

The following is a summary of certain financial data of the Individual Markets segment for the years ended December 31, 2009 and 2008:

| Income Statement Data (In millions) | Year Ended December 31, | |
|-------------------------------------|-------------------------|--------|
| | 2009 | 2008 |
| Premium income | \$ 428 | \$ 378 |
| Fee income | 50 | 56 |
| Net investment income | 718 | 692 |
| Net realized investment losses | (38) | (12) |
| Total revenues | 1,158 | 1,114 |
| Policyholder benefits | 982 | 890 |
| Operating expenses | 102 | 109 |
| Total benefits and expenses | 1,084 | 999 |
| Income before income taxes | 74 | 115 |
| Income tax expense | 19 | 36 |
| Income from continuing operations | \$ 55 | \$ 79 |

The following is a summary of the Individual Markets segment participant accounts at December 31, 2009 and 2008:

| (In thousands) | December 31, | |
|----------------------|--------------|------|
| | 2009 | 2008 |
| Participant Accounts | 521 | 533 |

Income from continuing operations for the Individual Markets segment decreased by \$24 million, or 30%, to \$55 million during the year ended December 31, 2009 when compared to 2008 primarily due to a decrease in fee income and an increase in realized losses on investments.

Premium income increased by \$50 million, or 13%, to \$428 million for the year ended December 31, 2009 when compared to 2008. The increase is primarily related to sales in the single premium whole life product marketed through banks which increased by \$102 million partially offset by a \$51 million decrease in other insurance products, primarily term insurance products.

Fee income decreased by \$6 million, or 11%, to \$50 million for the year ended December 31, 2009 when compared to 2008. The decrease is due to lower front-end loads as a result of lower sales of the BOLI product in 2009.

Net investment income increased by \$26 million, or 4%, to \$718 million for the year ended December 31, 2009 when compared to 2008. The increase is primarily due to a \$25 million increase in policy loan interest income as the result of higher interest rates charged.

Net realized losses on investments increased by \$26 million to \$38 million for the year ended December 31, 2009 when compared to 2008. The \$38 million loss in 2009 is due to \$47 million of write-downs primarily on fixed maturity securities guaranteed by FGIC partially offset by \$9 million of net realized gains on the sale of investments. The \$12 million loss in 2008 is due to \$49 million of write-downs primarily on a fixed maturity security backed by Lehman Brothers Holdings Inc. and on securities backed by General Motors Corporation. These write-downs are partially offset by \$37 million of net realized gains on the sale of investments.

Total benefits and expenses increased by \$85 million, or 9%, to \$1,084 million during the year ended December 31, 2009 when compared to 2008. The increase is attributable to an increase in future policy benefits related to the increased sales premium as mentioned above and higher interest credited to policyholders.

Income tax expense decreased by \$17 million, to \$19 million during the year ended December 31, 2009 when compared to 2008 primarily due to the \$41 million decrease in income from continuing operations before income taxes.

The slight decrease in participant accounts is primarily the result of policy maturities and policy surrenders.

Year ended December 31, 2008 compared with the year ended December 31, 2007

As more fully described in Note 5 to the accompanying consolidated financial statements, on June 1, 2007 the Company's Individual Markets segment terminated one of its reinsurance agreements with an affiliate, CLAC, pursuant to which the Company had assumed 80% of certain United States life, health and annuity business on a coinsurance and coinsurance with funds withheld basis.

The following is a summary of certain financial data of the Individual Markets segment for the years ended December 31, 2008 and 2007:

| Income Statement Data (In millions) | Year Ended December 31, | |
|-------------------------------------|-------------------------|------------|
| | 2008 | 2007 |
| Premium income | \$ 378 | \$ (1,027) |
| Fee income | 56 | 69 |
| Net investment income | 692 | 759 |
| Net realized investment losses | (12) | (8) |
| Total revenues | 1,114 | (207) |
| Policyholder benefits | 890 | (578) |
| Operating expenses | 109 | 191 |
| Total benefits and expenses | 999 | (387) |
| Income before income taxes | 115 | 180 |
| Income tax expense | 36 | 60 |
| Income from continuing operations | \$ 79 | \$ 120 |

The following is a summary of the Individual Markets segment participant accounts at December 31, 2008 and 2007:

| (In thousands) | December 31, | |
|----------------------|--------------|------|
| | 2008 | 2007 |
| Participant Accounts | 533 | 556 |

The Individual Markets segment income from continuing operations decreased by \$41 million, or 34%, to \$79 million during the year ended December 31, 2008 from \$120 million during 2007. The decrease is primarily related to a gain of \$22 million resulting from the termination of the CLAC reinsurance agreement and \$10 million of net income associated with the CLAC reinsurance activity during 2007 that is absent in 2008.

Excluding the one time recording of negative premium revenue of \$1,387 million resulting from the termination of the CLAC reinsurance agreement during 2007, total premiums increased by \$18 million, or 5%, to \$378 million during the year ended December 31, 2008 from \$360 million during 2007. The increase is primarily attributable to higher premiums in 2008 from improved sales, primarily of the single premium whole life product marketed through banks. This increase is partially offset by \$59 million of reinsured life, health, and annuity premiums in 2007 that are absent in 2008 as a result of the termination of the CLAC reinsurance agreement.

Fee income decreased by \$13 million, or 19%, to \$56 million during the year ended December 31, 2008 from \$69 million in 2007. The decrease is primarily related to lower variable fee income due to the weak performance of the U.S. equities market in 2008, one time gains on the business owned life insurance block of business in 2007 due to surrender activity and \$4 million of fee income in 2007 that is absent in 2008 as a result of the termination of the CLAC reinsurance agreement. Variable asset-based fees fluctuate with changes in participant account balances. Participant account balances change due to cash flow and unrealized market gains and losses associated with changes in the United States equities market.

Net investment income decreased by \$67 million, or 9%, to \$692 million during the year ended December 31, 2008 from \$759 million in 2007. The decrease is primarily due to \$58 million of net investment income recorded in connection with the 2007 termination of the reinsurance agreement with CLAC and \$43 million of net investment income in 2007 that is absent in 2008 as a result of the termination of the CLAC reinsurance agreement. These decreases are partially offset by higher policy loan interest income.

Net realized losses on investments increased by \$4 million to a loss of \$12 million during the year ended December 31, 2008 when compared to a loss of \$8 million during 2007. The loss during the year ended December 31, 2008 is due to \$49 million of write-downs primarily on a fixed maturity security backed by Lehman Brothers Holdings Inc. and on securities backed by General Motors Corporation. These write-downs are partially offset by \$37 million of net realized gains on the sale of investments.

Excluding the one time recording of a negative benefits and expenses of \$1,382 million resulting from the termination of the CLAC reinsurance agreement during 2007, total benefits and expenses increased by \$4 million, or less than 1% to \$999 million during the year ended December 31, 2008 when compared to 2007. The increase is primarily due to an increase in future policy benefits due to increased sales of guaranteed products and increases in interest paid or credited to contractholders due to larger account balances. These increases are offset by \$96 million of benefits and expenses in 2007 that were absent in 2008 as a result of the termination of the CLAC reinsurance agreement.

The slight decrease in participant accounts is primarily the result of policy maturities and policy surrenders.

7.5 Retirement Services Segment Results of Operations

Year ended December 31, 2009 compared with the year ended December 31, 2008

The following is a summary of certain financial data of the Retirement Services segment for the years ended December 31, 2009 and 2008:

| Income Statement Data (In millions) | Year Ended December 31, | |
|-------------------------------------|-------------------------|--------|
| | 2009 | 2008 |
| Premium income | \$ 3 | \$ 2 |
| Fee income | 331 | 368 |
| Net investment income | 383 | 352 |
| Net realized investment losses | (23) | (10) |
| Total revenues | 694 | 712 |
| Policyholder benefits | 231 | 230 |
| Operating expenses | 360 | 324 |
| Total benefits and expenses | 591 | 554 |
| Income before income taxes | 103 | 158 |
| Income tax expense | 28 | 41 |
| Income from continuing operations | \$ 75 | \$ 117 |

The following is a summary of the Retirement Services segment participant accounts at December 31, 2009 and 2008:

| (In thousands) | December 31, | |
|----------------------|--------------|-------|
| | 2009 | 2008 |
| Participant Accounts | 4,201 | 3,739 |

Income from continuing operations for the Retirement Services segment decreased by \$42 million, or 36%, to \$75 million during the year ended December 31, 2009 when compared to 2008 primarily due to a decrease in fee income, an increase in amortization of DAC and an increase in realized losses on investments. These are partially offset by an increase in interest margins on guaranteed products.

Fee income decreased by \$37 million, or 10%, to \$331 million for the year ended December 31, 2009 when compared to 2008. The decrease is primarily related to lower variable fee income as a result of lower average account balances due to the weak performance of the U.S. equities market as seen by the lower S&P 500 Index average in 2009 compared to 2008.

Net investment income increased by \$31 million, or 9%, to \$383 million for the year ended December 31, 2009 when compared to 2008. The increase is primarily due to an increase in the average account value of the general accounts during 2009 when compared to 2008. This average asset increase is primarily due to transfers from variable investment options to the general account.

Net realized losses on investments increased by \$13 million to \$23 million during the year ended December 31, 2009 when compared to 2008. The \$23 million loss in 2009 is due to \$46 million of write-downs primarily on fixed maturity securities guaranteed by FGIC partially offset by \$23 million of net realized gains on the sale of investments. The \$10 million loss during 2008 is due to \$35 million of write-downs primarily on a fixed maturity security backed by Lehman Brothers Holdings Inc. and on securities backed by General Motors Corporation. These write-downs are partially offset by \$25 million of net realized gains on the sale of investments.

Operating expenses increased by \$36 million, or 11%, to \$360 million for the year ended December 31, 2009 when compared to 2008. The increase is primarily related to a \$22 million increase in amortization of DAC, value of business acquired and other intangibles due to lower estimated future gross profits in 2009 compared to the estimated future gross profits in 2008 due to a decrease in projected fee income. In addition, pension and post-retirement expenses increased \$5 million and state assessments increased \$2 million.

Income tax expense decreased by \$13 million to \$28 million during the year ended December 31, 2009 when compared to 2008 is due to the \$55 million decrease in income from continuing operations before income taxes.

Retirement participant accounts, including third-party administration and institutional accounts, increased by 462 thousand, or 12%, to 4,201 thousand at December 31, 2009 from 3,739 thousand at December 31, 2008 primarily due to the acquisition of an additional block of business from an existing institutional client and from the sale of a large plan in the public/non-profit government market. The following table provides information for the Retirement Services' participant account values at December 31, 2009 and 2008:

| (In millions) | Year Ended December 31, | |
|--|-------------------------|------------------|
| | 2009 | 2008 |
| General Account - Fixed Options: | | |
| Public / Non-profit | \$ 3,408 | \$ 3,302 |
| 401(k) | 3,563 | 3,269 |
| | <u>\$ 6,971</u> | <u>\$ 6,571</u> |
| Separate Accounts - Variable Options: | | |
| Public / Non-profit | \$ 7,628 | \$ 5,639 |
| 401(k) | 6,282 | 4,651 |
| | <u>\$ 13,910</u> | <u>\$ 10,290</u> |
| Unaffiliated Retail: | | |
| Investment Options and Administrative Services Only: | | |
| Public / Non-profit | \$ 46,496 | \$ 36,829 |
| 401(k) | 19,905 | 14,639 |
| Institutional | 35,815 | 23,603 |
| | <u>\$ 102,216</u> | <u>\$ 75,071</u> |

Account values invested in the general account fixed investment options have increased by \$400 million, or 6%, at December 31, 2009 compared to December 31, 2008 primarily due to transfers from variable investment options to the general account.

Account values invested in the separate account variable investment options have increased by \$3,620 million, or 35%, at December 31, 2009 compared to December 31, 2008. The increase is primarily due new sales and the higher U.S. equity markets at December 31, 2009 compared to December 31, 2008.

Participant account values invested in unaffiliated retail investment options and participant account values where only administrative services and record-keeping functions are provided have increased by \$27,145 million, or 36%, at December 31, 2009 compared to December 31, 2008. The increase is primarily due to new sales and the higher U.S. equity markets at December 31, 2009 compared to December 31, 2008.

Year ended December 31, 2008 compared with the year ended December 31, 2007

The following is a summary of certain financial data of the Retirement Services segment for the years ended December 31, 2008 and 2007:

| Income Statement Data (In millions) | Year Ended December 31, | |
|--|-------------------------|--------|
| | 2008 | 2007 |
| Premium income | \$ 2 | \$ 5 |
| Fee income | 368 | 389 |
| Net investment income | 352 | 351 |
| Net realized investment gains (losses) | (10) | 5 |
| Total revenues | 712 | 750 |
| Policyholder benefits | 230 | 225 |
| Operating expenses | 324 | 339 |
| Total benefits and expenses | 554 | 564 |
| Income before income taxes | 158 | 186 |
| Income tax expense | 41 | 58 |
| Income from continuing operations | \$ 117 | \$ 128 |

The following is a summary of the Retirement Services segment participant accounts at December 31, 2008 and 2007:

| (In thousands) | December 31, | |
|----------------------|--------------|-------|
| | 2008 | 2007 |
| Participant Accounts | 3,739 | 3,520 |

The Retirement Services segment income from continuing operations decreased by \$11 million, or 9%, to \$117 million during the year ended December 31, 2008 from \$128 million during 2007. The decrease was primarily due to a decrease in fee income and a decrease in net realized investment gains (losses).

Fee income decreased by \$21 million, or 5%, to \$368 million during the year ended December 31, 2008 from \$389 million during 2007. The decrease is primarily related to lower variable fee income due to the weak performance of the U.S. equities market in 2008. Variable asset-based fees fluctuate with changes in participant account balances. Participant account balances change due to cash flow and unrealized market gains and losses associated with changes in the United States equities market.

Net realized gains (losses) on investments decreased by \$15 million to a loss of \$10 million during the year ended December 31, 2008 when compared to a gain of \$5 million during 2007. The loss during the year ended December 31, 2008 is due to \$35 million of write-downs primarily on a fixed maturity security backed by Lehman Brothers Holdings Inc. and on securities backed by General Motors Corporation. These write-downs are partially offset by \$25 million of net realized gains on the sale of investments.

Policyholder benefits remained stable, increasing by \$5 million, or 2%, to \$230 million during the year ended December 31, 2008 when compared to 2007.

Operating expenses decreased by \$15 million, or 4%, to \$324 million for the year ended December 31, 2008 when compared to 2007. The decrease is primarily due to expenses incurred in 2007 related to the acquisition of business from the Metropolitan Life Insurance Company ("MetLife") and cost saving measures taken in 2008.

Retirement participant accounts, including third-party administration and institutional accounts, increased by 219 thousand or 6% to 3,739 thousand at December 31, 2008 from 3,520 thousand at December 31, 2007 primarily as the result of acquiring the Commonwealth of Massachusetts deferred compensation plan reflecting 254 thousand accounts during the current year.

The following table provides information for the Retirement Services' participant account values at December 31, 2008 and 2007:

| (In millions) | Year Ended December 31, | |
|--|-------------------------|------------------|
| | 2008 | 2007 |
| General Account - Fixed Options: | | |
| Public / Non-profit | \$ 3,302 | \$ 3,342 |
| 401(k) | 3,269 | 2,656 |
| | <u>\$ 6,571</u> | <u>\$ 5,998</u> |
| Separate Accounts - Variable Options: | | |
| Public / Non-profit | \$ 5,639 | \$ 6,457 |
| 401(k) | 4,651 | 6,920 |
| | <u>\$ 10,290</u> | <u>\$ 13,377</u> |
| Unaffiliated Retail: | | |
| Investment Options and Administrative Services Only: | | |
| Public / Non-profit | \$ 36,829 | \$ 46,319 |
| 401(k) | 14,639 | 22,386 |
| Institutional | 23,603 | 27,509 |
| | <u>\$ 75,071</u> | <u>\$ 96,214</u> |

Account values invested in the general account fixed investment options have increased by \$573 million, or 10% at December 31, 2008 compared to December 31, 2007 primarily due to transfers from variable investment options to the general account.

Account values invested in the separate account variable investment options have decreased by \$3,087 million, or 23% at December 31, 2008 compared to December 31, 2007. The decrease is primarily due to the decrease in the U.S. equity markets and participant redemptions.

Participant account values invested in unaffiliated retail investment options and participant account values where only administrative services and recordkeeping functions are provided have decreased by \$21.1 billion, or 22% at December 31, 2008 compared to December 31, 2007. The decrease is primarily attributable to the decrease in the U.S. equity markets partially offset by a large deposit of \$4.4 billion from the Commonwealth of Massachusetts deferred compensation plan.

7.6 Other Segment Results of Operations

Year ended December 31, 2009 compared with the year ended December 31, 2008

The following is a summary of certain financial data of the Company's Other segment for the years ended December 31, 2009 and 2008:

| Income Statement Data (In millions) | Year Ended December 31, | |
|--|-------------------------|--------|
| | 2009 | 2008 |
| Premium income | \$ 129 | \$ 145 |
| Fee income | 5 | 5 |
| Net investment income | 48 | 35 |
| Net realized investment gains (losses) | (6) | - |
| Total revenues | 176 | 185 |
| Policyholder benefits | 113 | (172) |
| Operating expenses | 71 | 89 |
| Total benefits and expenses | 184 | (83) |
| Income before income taxes | (8) | 268 |
| Income tax expense (benefit) | - | 19 |
| Income (loss) from continuing operations | \$ (8) | \$ 249 |

The results of operations of the Company's Other segment is substantially comprised of activity under the assumption reinsurance agreement between GWSC and CLAC and corporate items not directly allocated to the other business segments. Loss from continuing operations for the Company's Other segment was \$8 million for the year ended December 31, 2009 compared to net income of \$249 million for 2008. The decrease is primarily related to a \$208 million gain as a result of the release of the liability associated with certain participating policies on January 1, 2008 and a \$98 million (\$64 million net of income taxes) liability release on these policies in 2008. See Note 3 to the accompanying consolidated financial statements. These decreases are partially offset by a \$13 million increase in investment income.

Premium income decreased by \$16 million, or 11% during the year ended December 31, 2009 compared to 2008 primarily due to lower reinsurance premiums from the GWSC agreement.

Excluding the impact of the aforementioned \$208 million benefit release of the liability associated with certain participating policies and the \$98 million adjustment to the future policy benefits of these policies, total benefits and expenses decreased by \$39 million to \$184 million during the year ended December 31, 2009 when compared to 2008. The decrease is primarily due to a \$27 million decrease in GWSC reinsurance agreement benefits and expenses primarily as the result of a \$22 million decrease in future policy benefits in 2009.

Income tax expense decreased by \$19 million to a \$0 million benefit during the year ended December 31, 2009 when compared to 2008 due to the \$68 million decrease in income from continuing operations, excluding the aforementioned \$208 million gain in 2008 which was taxed in previous years and prior period tax true-ups.

Year ended December 31, 2008 compared with the year ended December 31, 2007

The following is a summary of certain financial data of the Company's Other segment for the years ended December 31, 2008 and 2007:

| Income Statement Data (In millions) | Year Ended December 31, | |
|-------------------------------------|-------------------------|--------|
| | 2008 | 2007 |
| Premium income | \$ 145 | \$ 165 |
| Fee income | 5 | 5 |
| Net investment income | 35 | 30 |
| Net realized investment gains | - | 1 |
| Total revenues | 185 | 201 |
| Policyholder benefits | (172) | 128 |
| Operating expenses | 89 | 80 |
| Total benefits and expenses | (83) | 208 |
| Income before income taxes | 268 | (7) |
| Income tax expense | 19 | 1 |
| Income from continuing operations | \$ 249 | \$ (8) |

Income from continuing operations in the Other segment increased by \$257 million to \$249 million during the year ended December 31, 2008 compared to a net loss of \$8 million during 2007. The increase in net income is primarily related to a \$208 million gain as a result of the release of the liability associated with certain participating policies and a \$98 million (\$64 million net of income taxes) liability release on these policies.

Premium income decreased by \$20 million, or 12% during the year ended December 31, 2008 compared to 2007. The decrease is due to the one-time return premium income recorded in the amount of \$34 million at the time of the 2007 CLAC reinsurance agreement amendment partially offset by an increase in reinsurance activity as the result of the amendment.

Policyholder benefits decreased by \$300 million during the year ended December 31, 2008 compared to 2007. The decrease is due the aforementioned \$208 million release of the liability associated with certain participating policies, the \$98 million adjustment to the policy benefits of these policies and the one-time increase in policy benefits recorded in the amount of \$34 million at the time of the 2007 CLAC reinsurance agreement amendment. These decreases are partially offset by an increase in reinsurance activity as the result of the amendment.

Operating expenses increased by \$9 million, or 11% during the year ended December 31, 2008 compared to 2007. The increase is mainly due to an adjustment to cumulative deferred policy acquisition cost amortization related to additional overhead that the Individual Markets and Retirement Service segments will incur as a result of the sale of the Company's Healthcare segment.

Although income from continuing operations before income taxes increased by \$257 million during the year ended December 31, 2008 when compared to 2007, income tax expense did not increase proportionately because the income tax provision on the aforementioned \$208 million gain resulting from the release of the liability associated with certain participating policies was recorded in previous years.

7.7 Investment Operations

The Company's primary investment objective is to acquire assets with duration and cash flow characteristics reflective of its liabilities, while meeting industry, size, issuer and geographic diversification standards. Formal liquidity and credit quality parameters have also been established.

The Company follows rigorous procedures to control interest rate risk and observes strict asset and liability matching guidelines. These guidelines ensure that even under changing market conditions, the Company's assets should meet the cash flow and income requirements of its liabilities. Using dynamic modeling to analyze the effects of a range of possible market changes upon investments and policyholder benefits, the Company works to ensure that its investment portfolio is appropriately structured to fulfill financial obligations to its policyholders.

A summary of the Company's general account investment assets and the assets as a percentage of total general account investments at December 31, 2009 and 2008 follows:

| (In millions) | December 31, | | | |
|---|--------------|--------|-----------|--------|
| | 2009 | | 2008 | |
| Fixed maturities, available-for-sale | \$ 13,918 | 68.3% | \$ 11,973 | 66.2% |
| Fixed maturities, held for trading | 140 | 0.7% | 39 | 0.2% |
| Mortgage loans on real estate | 1,554 | 7.6% | 1,380 | 7.6% |
| Equity investments, available-for-sale | 26 | 0.1% | 18 | 0.1% |
| Policy loans | 3,972 | 19.5% | 3,979 | 22.0% |
| Short-term investments, available-for-sale | 488 | 2.4% | 367 | 2.1% |
| Limited partnership and limited liability corporation interests | 254 | 1.3% | 294 | 1.6% |
| Other investments | 24 | 0.1% | 32 | 0.2% |
| Total investment assets | \$ 20,376 | 100.0% | \$ 18,082 | 100.0% |

Fixed Maturity Investments

Fixed maturity investments include public and privately placed corporate bonds, government bonds and mortgage-backed and asset-backed securities. The Company's strategy related to mortgage-backed and asset-backed securities is to focus on those investments with low prepayment risk and minimal credit risk. The Company does not invest in higher-risk collateralized mortgage obligations such as interest-only and principal-only strips, and currently has no plans to invest in such securities.

Private placement investments are generally less marketable than publicly traded assets, yet they typically offer enhanced covenant protection that allows the Company, if necessary, to take appropriate action to protect its investment. The Company believes that the cost of the additional monitoring and analysis required by private placement investments is more than offset by their enhanced yield.

One of the Company's primary objectives is to ensure that its fixed maturity portfolio is maintained at a high average quality to limit credit risk. If not externally rated, the securities are rated by the Company on a basis intended to be similar to that of the rating agencies. The Company's internal rating methodology takes into account ratings from Standard & Poors and Moody's Investor Services, Inc.

The distribution of the Company's fixed maturity portfolio by the Company's internal credit rating at December 31, 2009 and 2008 is summarized as follows:

| Credit rating | December 31, | |
|-------------------------------------|--------------|--------|
| | 2009 | 2008 |
| AAA | 39.2% | 50.1% |
| AA | 12.3% | 9.4% |
| A | 20.8% | 20.3% |
| BBB | 23.4% | 18.4% |
| BB and below (Non-investment grade) | 4.3% | 1.8% |
| Total | 100.0% | 100.0% |

The change in the percentage of assets rated AAA was related to decreases in the fair value, decreases in credit ratings and dispositions during the year. The majority of the decreases in credit ratings were related to assets in the mortgage-backed and asset-backed securities class. The increase in the percentage of assets rated AA and BBB was primarily related to purchases of assets since the beginning of the year. The increase in the percentage of assets rated BB and below was related to decreases in credit ratings.

The following table contains the sector distribution of the Company's fixed maturity investment portfolio, calculated as a percentage of fixed maturities:

| Sector | December 31, | |
|-------------------|--------------|-------|
| | 2009 | 2008 |
| Utility | 15.0% | 11.9% |
| Finance | 10.1% | 8.8% |
| Consumer | 8.6% | 6.6% |
| Natural resources | 6.3% | 4.4% |
| Transportation | 2.6% | 2.8% |
| Other | 8.6% | 7.3% |

The Company holds fixed maturity investments guaranteed by monoline insurers. Monoline insurers provide guarantees on debt for issuers, often in the form of credit wraps, which enhance the credit of the issuer. Monoline insurers guarantee the timely repayment of bond principal and interest when a bond issuer defaults and generally provide credit enhancement for certain securities. During 2009, FGIC, a monoline insurer, was ordered to suspend all claims payments. The financial health of several other monoline insurers has been in question recently and several insurers have experienced ratings downgrades.

The Company does not have any direct bond holdings of the actual monoline insurers. The Company's insured holdings, excluding FGIC guaranteed fixed maturity investments, are as follows:

| Guarantor (In millions) | Guarantor Quality Rating | | Indirect Exposure December 31, 2009 |
|---|--------------------------|---------|---|
| | S&P | Moody's | |
| AMBAC | CC | Caa2 | \$ 269 |
| MBIA, Inc. | BB+ | B3 | 269 |
| Assured Guaranty Corp. (formerly Financial Security Assurance, Inc) | AAA | Aa3 | 113 |
| Berkshire Hathaway Assurance Corp. | AAA | Aaa | 34 |
| National Public Finance Guaranty Corporation | A | Baa1 | 100 |
| | | | <u>\$ 785</u> |

At December 31, 2009 and 2008, the Company had \$624 million and \$611 million of asset-backed securities insured by monolines other than FGIC. At December 31, 2009 and 2008, the overall credit quality of the Company's monoline-insured asset-backed securities, including the benefits of monoline insurance was BBB+ and AA-, respectively, and excluding the benefits of monoline insurance, the overall credit quality was BB+ and A-. The Company has other insured securities with a fair value of \$161 million primarily exposed to state/municipal bond authorities and utilities and financial services companies.

The Company has exposure to the subprime market in the form of home equity loan asset-backed securities in the amount of \$889 million, or 4% of total investments of \$20,376 million as of December 31, 2009 and \$873 million, or 5% of total investments of \$18,082 million as of December 31, 2008. The majority of these securities are investment grade rated, 91% of which have a rating of AAA. The weighted average credit enhancement level for these securities is 33% (excluding any monoline guarantees) as of December 31, 2009.

Fair Value Measurement and Impairment of Fixed Maturity and Equity Investments Classified as Available-for-Sale

Security valuation methods can be subjective. Each fixed maturity and equity investment is categorized in a hierarchy based on the observability of inputs into the valuation methodology with Level 3 being the least observable. Total assets and liabilities measured using significant unobservable inputs (Level 3) decreased by \$151 million from December 31, 2008. Total Level 3 assets and liabilities at December 31, 2009 and 2008 were \$648 million and \$799 million, respectively, or 2% of total assets and liabilities. The decrease is primarily due to transfers out of Level 3 during 2009 due to the availability of observable prices as a result of the return of market liquidity in some sectors. Due to market conditions during 2008 which continued in 2009, the Company used internal models to determine fair value for asset-backed securities backed by prime home improvement loans. Using these internal models instead of an external source resulted in a decrease to unrealized losses in the amount of \$99 million. The internal models utilized asset-backed index spread assumptions versus credit default spread assumptions used by the external source. The change in Level 3 assets did not affect the Company's operations, liquidity or capital resources during the period.

The Company classifies the majority of its fixed maturity and all of its equity investments as available-for-sale and records them at fair value with the related net gain or loss, net of policyholder related amounts and deferred taxes, being recorded in accumulated other comprehensive income in the stockholder's equity section in the accompanying consolidated balance sheets. All available-for-sale securities with gross unrealized losses at the balance sheet date are subjected to the Company's process for identification and evaluation of other-than-temporary impairments.

The following tables summarize the fair values and gross unrealized losses on fixed maturity investments where the estimated fair value has declined and remained below amortized cost by 20% or more at December 31, 2009 and 2008:

| (Dollars in thousands) December 31, 2009 | Number of Securities | Estimated Fair Value | Unrealized Loss |
|---|-------------------------|-------------------------|--------------------|
| Six months or less | 20 | \$ 98,033 | \$ 45,888 |
| Six to twelve months | 45 | 214,024 | 113,489 |
| More than twelve months | 132 | 594,523 | 279,670 |
| Total | 197 | \$ 906,580 | \$ 439,047 |

| (Dollars in thousands) December 31, 2008 | Number of Securities | Estimated Fair Value | Unrealized Loss |
|---|-------------------------|-------------------------|--------------------|
| Six months or less | 309 | \$ 1,324,517 | \$ 602,736 |
| Six to twelve months | 99 | 495,713 | 373,329 |
| More than twelve months | 30 | 49,029 | 52,547 |
| Total | 438 | \$ 1,869,259 | \$ 1,028,612 |

While many unrealized losses have now existed for longer than twelve months, the Company believes this is attributable to general market conditions and not reflective of the financial condition of the issuer or collateral backing the securities. The Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before the recovery of their amortized cost basis, which may be maturity. The Company also believes the present value of cash flows expected to be collected is greater than amortized cost; therefore, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2009. While the Company has experienced unrealized losses across all classes within its fixed maturity investments, the majority of total unrealized losses are related to mortgage-backed, asset-backed and corporate debt securities as described below.

- The Company holds approximately \$5,246 million in various mortgage-backed and asset-backed collateralized mortgage securities including securities backed by U.S. agencies, of which \$3,178 million are experiencing unrealized losses of approximately \$509 million at December 31, 2009. Included in this amount is \$308 million which has declined and remained below amortized cost by 20% or more. Of the \$509 million in unrealized losses, approximately \$189 million is related to securities on which there had been a credit rating downgrade since December 31, 2008. Of the \$189 million, \$72 million are rated investment grade and \$117 million are rated non-investment grade at December 31, 2009. The non-investment grade rated securities are primarily asset-backed securities with home improvement and home equity loan collateral. Future changes in the fair value of these securities will be dependent upon market liquidity and general market conditions.
- The Company holds approximately \$7,075 million of corporate debt securities of which \$1,824 million are experiencing unrealized losses of approximately \$216 million at December 31, 2009. Included in this amount is \$131 million which has declined and remained below amortized cost by 20% or more. Approximately \$123 million of the \$216 million was related to securities on which there had been a credit rating downgrade since December 31, 2008. Of the \$123 million, \$57 million are rated investment grade and \$66 million are rated non-investment grade at December 31, 2009.

During the year ended December 31, 2009, the Company recorded other-than-temporary impairments of \$99 million on its fixed maturity investments. Write-downs in the amount of \$11 million were primarily related to assets the Company sold at a loss. The Company recognized \$88 million of losses related to credit impairment on asset-backed securities with home improvement loan collateral guaranteed by FGIC. FGIC, a monoline insurer, was ordered to suspend all claims payments by the New York Insurance Department. The impact of the order to suspend all claims payable has resulted in a shortfall of the payments on \$216 million of par value of the Company's holdings with a FGIC monoline guarantee. These securities are now carried at \$113 million with an estimated realizable value of \$127 million. The estimated realizable value was determined using pricing cashflow models with an exclusion of the adjustment for illiquidity.

At December 31, 2009, the Company had nine fixed maturities, other than asset-backed securities discussed above, which had missed either a principal or interest payment, compared to 1 fixed maturity at December 31, 2008. These securities had carrying values in the amounts of \$17 million (0.12% of the total fixed maturity investment portfolio) and \$4 million (0.03% of the total fixed maturity investment portfolio) at December 31, 2009 and 2008, respectively.

Following the recognition of the other-than-temporary impairment for fixed maturities, the Company accretes the new cost basis to par or to estimated future value over the remaining life of the security based on the future estimated cash flows by adjusting the security's yields. See Note 6 to the accompanying consolidated financial statements for a further discussion of impaired fixed maturity investments.

Securities Lending and Cash Collateral Reinvestment Practices

All cash collateral received from the securities lending program, repurchase agreements and dollar roll practices is invested in U.S. Government or U.S. Government Agency securities. Some cash collateral may be invested in short-term repurchase agreements which are also collateralized by U.S. Government or U.S. Government Agency securities. In addition, the securities lending agent indemnifies the Company against borrower risk, meaning that the lending agent agrees contractually to replace securities not returned due to a borrower default. As of December 31, 2009, the Company had \$37 million of securities out on loan, \$418 million in repurchase agreements and \$491 million in dollar rolls, all of which are fully collateralized as described above. The Company does not enter into these types of transactions for liquidity purposes, but rather for yield enhancement on its investment portfolio.

Derivative Counterparty Collateral

All collateral received from derivative counterparties, at December 31, 2009, is in the form of cash. As of December 31, 2009, the \$4.3 million unrestricted cash received is included in the consolidated balance sheet.

Mortgage Loans

The Company's mortgage loans on real estate are comprised exclusively of commercial loans and are carried at their unpaid principal balances, net of allowances for credit losses. The Company does not originate any single family residential mortgage loans. The Company follows a comprehensive approach with the management of mortgage loans that includes ongoing analysis of key mortgage characteristics such as debt service coverage, property condition, loan-to-value ratios and market conditions. Collateral valuations are performed for all mortgages to identify possible risks and exposures. These valuations are then incorporated into the determination of the Company's allowance for credit losses.

The weighted average loan-to-value ratio for the Company's mortgage loans on real estate was 50% and 46% at December 31, 2009 and 2008, respectively. The debt service coverage ratio was 1.92 and 1.77 times at December 31, 2009 and 2008, respectively. During 2009 and 2008, the Company originated 23 and 47 new loans, respectively. At origination, the weighted average loan-to-value ratio was 46% and 50% and debt service coverage ratio was 2.14 and 1.94 times in 2009 and 2008, respectively.

The Company originates interest only and amortizing commercial mortgage loans. During 2009, the Company originated interest only mortgage loans in the amount of \$222 million compared to a total mortgage loan portfolio at December 31, 2009 of \$1,554 million. The weighted average loan-to-value ratio of the interest only loans originated in 2009 was 47%.

The average balance of impaired loans increased to \$0.3 million during the year ended December 31, 2009 compared to \$0 million during the year ended December 31, 2008. There were no properties acquired through foreclosure during 2009 or 2008. The low levels of problematic mortgage loans relative to the Company's overall financial position are due to its active loan management program.

Occasionally, the Company elects to restructure certain mortgage loans if the economic benefits to it are believed to be more advantageous than those achieved by acquiring the collateral through foreclosure. At December 31, 2009 and 2008, there were no restructured loans. The Company anticipates moderate but disciplined participation in the real estate market during 2010.

See Note 6 to the accompanying consolidated financial statements for a further discussion of mortgage loans.

Other Investments

Other investments consist primarily of equity investments, policy loans, short-term investments, limited partnerships and investment in real estate. The Company anticipates limited participation in equity markets during 2010.

See Note 6 to the accompanying consolidated financial statements for a further discussion of impaired equity investments.

Derivatives

The Company uses certain derivatives, such as futures, swaps and interest rate swaptions for purposes of managing interest rate and foreign currency exchange risks. These derivatives, when taken alone, may subject the Company to varying degrees of market and credit risk; however, when used for hedging purposes, these instruments typically reduce risk. The Company controls the credit risk of its derivative contracts through credit approvals, limits, monitoring procedures and in some cases, requiring collateral.

The Company has also developed controls within its operations to ensure that only derivative transactions authorized by the Board of Directors are executed. Notes 1 and 6 to the consolidated financial statements contain a discussion of the Company's derivative position.

7.8 Liquidity and Capital Resources

Liquidity refers to a company's ability to generate sufficient cash flows to meet the needs of its operations. The Company manages its operations to create stable, reliable and cost-effective sources of cash flows to meet all of its obligations.

The principal sources of the Company's liquidity are premiums and contract deposits, fees, investment income and investment maturities and sales. Funds provided from these sources are reasonably predictable and normally exceed liquidity requirements for payment of policy benefits, payments to policy and contractholders in connection with surrenders and withdrawals and general expenses. However, since the timing of available funds cannot always be matched precisely to commitments, imbalances may arise when demands for funds exceed those on hand. A primary liquidity concern regarding cash flows from operations is the risk of early policyholder and contractholder withdrawals. A primary liquidity concern regarding investment activity is the risks of defaults and market volatilities. In addition, a demand for funds may arise as a result of the Company taking advantage of current investment opportunities. The sources of the funds that may be required in such situations include the issuance of commercial paper or other debt instruments. Management believes that the liquidity profile of its assets is sufficient to satisfy the liquidity requirements of reasonably foreseeable scenarios.

Generally, the Company has met its operating requirements by utilizing cash flows from operations and maintaining appropriate levels of liquidity in its investment portfolio. Net cash flows from operating activities were \$569 million and \$333 million, including the cash flows of the discontinued operations, for the for the years ended December 31, 2009 and 2008, respectively. Liquidity for the Company has remained strong, as evidenced by the amounts of short-term investments and cash that totaled \$659 million and \$395 million as of December 31, 2009 and 2008, respectively. In addition, 96% and 98% of the bond portfolio carried an investment grade rating at December 31, 2009 and 2008, respectively, thereby providing significant liquidity to the Company's overall investment portfolio.

The Company continues to be well capitalized, with sufficient borrowing capacity to meet the anticipated needs of its business. The Company's financial strength provides the capacity and flexibility to enable it to raise funds in the capital markets through the issuance of commercial paper. The Company had \$98 million and \$97 million of commercial paper outstanding at December 31, 2009 and 2008, respectively. The commercial paper has been given a rating of A-1+ by Standard & Poor's Ratings Services and a rating of P-1 by Moody's Investors Service, each being the highest rating available. Through the recent financial market volatility, the Company continued to have the ability to access the capital markets for funds. The loss of this access in the future would not have a significant impact to the Company's liquidity as the commercial paper is not used to fund daily operations and is an insignificant amount in relation to total invested assets.

The Company also has available a corporate credit facility agreement in the amount of \$50 million for general corporate purposes. The Company had no borrowings under the credit facility at either December 31, 2009 or 2008. The Company does not anticipate the need for borrowings under this facility and the loss of its availability would not significantly impact the Company's liquidity.

Capital resources provide protection for policyholders and financial strength to support the underwriting of insurance risks and allow for continued business growth. The amount of capital resources that may be needed is determined by the Company's senior management and Board of Directors, as well as by regulatory requirements. The allocation of resources to new long-term business commitments is designed to achieve an attractive return, tempered by considerations of risk and the need to support the Company's existing business.

7.9 Off-Balance Sheet Arrangements

The Company makes commitments to fund limited partnership interests in the normal course of its business. The amounts of these unfunded commitments at December 31, 2009 and 2008 were \$27 million and \$33 million, respectively. The precise timing of the fulfillment of the commitment cannot be predicted, however, these amounts are due within one year of the dates indicated. There are no other obligations or liabilities arising from such arrangements that are reasonably likely to become material.

The Company makes commitments to lend funds for mortgage loan investments in the normal course of its business. The amounts of mortgage loan commitments at December 31, 2009 and 2008 were \$30 million and \$5 million, respectively. There are no other obligations or liabilities arising from such arrangements that are reasonably likely to become material.

The Company, as lessee, has entered into various lease and sublease agreements primarily for the rental of office space. See Note 19 to the accompanying consolidated financial statements for a further discussion of operating leases.

The Company maintains a corporate credit facility agreement in the amount of \$50 million for general corporate purposes. The Company had no borrowings under the credit facility at either December 31, 2009 or 2008. See Note 20 to the accompanying consolidated financial statements for a further discussion of the credit facility.

7.10 Contractual Obligations

The following table summarizes the Company's major contractual obligations at December 31, 2009:

| (In thousands) | Payment due by period | | | | |
|---|-----------------------|-----------------------|------------------------|-------------------------|----------------------|
| | Less than one year | One to three years | Three to five years | More than five years | Total |
| Future policy benefits | \$ 2,029,442 | \$ 3,634,481 | \$ 3,115,341 | \$ 37,662,565 | \$ 46,441,829 |
| Policy and contract claims ² | 201,861 | 24,675 | 19,905 | 79,193 | 325,634 |
| Policyholders' funds ³ | 358,795 | - | - | - | 358,795 |
| Provision for policyholder dividends ⁴ | 69,494 | - | - | - | 69,494 |
| Undistributed earnings on participating business ⁵ | - | - | - | 3,580 | 3,580 |
| Related party long-term debt - principal ⁶ | - | - | - | 528,400 | 528,400 |
| Related party long-term debt - interest ⁷ | 37,177 | 74,365 | 74,365 | 1,015,069 | 1,200,976 |
| Repurchase agreements ⁸ | 491,338 | - | - | - | 491,338 |
| Commercial paper ⁸ | 97,613 | - | - | - | 97,613 |
| Payable under securities lending agreements ⁹ | 38,296 | - | - | - | 38,296 |
| Investment purchase obligations ¹⁰ | 126,882 | - | - | - | 126,882 |
| Operating leases ¹¹ | 11,872 | 7,644 | 4,959 | 1,227 | 25,702 |
| Other liabilities ¹² | 136,558 | 33,754 | 36,162 | 113,799 | 320,273 |
| Total | <u>\$ 3,599,328</u> | <u>\$ 3,774,919</u> | <u>\$ 3,250,732</u> | <u>\$ 39,403,833</u> | <u>\$ 50,028,812</u> |

^{1, 2} **Future policy benefits and policy and contract claims** - The Company has estimated payments to be made to policy and contractholders for future policy benefits. Insurance and investment contract liabilities include various investment-type products with contractually scheduled maturities, including periodic payments of a term certain nature. However, a significant portion of policy benefits and claims to be paid do not have stated contractual maturity dates and ultimately may not result in any payment obligation.

Estimated future policyholder obligations have been developed in accordance with industry accepted actuarial standards based upon the estimated timing of cash flows related to the policies or contracts, the Company's historical experience and its expectation of future payment patterns. Management has incorporated significant assumptions in developing these estimates, many of which are outside of the Company's control and include assumptions relating to mortality, morbidity, policy renewals and terminations, retirement, inflation, disability recovery rates, investment returns, future interest crediting levels, policy loans, future premium receipts on current policies in-force and other contingent events as may be appropriate to the respective product type. Due to the significance of the assumptions used, the amounts presented could materially differ from actual results.

The amounts presented in the table above are undiscounted as to interest. Accordingly, the sum of the estimated cash payment presented significantly exceeds the liability amount on the Company's consolidated balance sheet principally due to the time value of money.

Separate account liabilities have been excluded from the table above. Separate account obligations are legally insulated from general account assets. Separate account liabilities represent funds maintained by the Company to meet the specific investment objectives of the contractholders who bear the related investment risk. It is generally expected that the separate account liabilities will be fully funded by the separate account assets.

Policy and contract claims consist of liabilities associated with installment claims on certain long-term disability policies. Because the timing of the payment of these obligations is based upon assumptions of disability recovery rates, the amounts presented could differ from actual results.

³ **Policyholders' funds** - Policyholders' funds consist primarily of future policy benefits associated with policyholder deposits, participating policy dividends left on deposit and provisions for experience rating refunds. Because the timing of the payment of some of these obligations is unknown and beyond the control of the Company, the obligations related to these liabilities are presented in the table above in the less than one year category in the amounts of the liabilities presented in the Company's consolidated balance sheet.

⁴ **Provision for policyholder dividends** - The provision for policyholders' dividends payable represents the liabilities related to dividends payable in the following year on participating policies. As such, the obligations related to these liabilities are presented in the table above in the less than one year category in the amounts of the liabilities presented in the Company's consolidated balance sheet.

⁵ **Undistributed earnings on participating business** - The timing of the payment of the liability for undistributed earnings on participating business is unknown by its nature and subject to significant long-term uncertainty. As such, the obligation related to this liability is presented in the table above in the more than five year category in the amount of the liability presented in the Company's consolidated balance sheet.

⁶ **Related party long-term debt principal** - Represents contractual maturities of principal due to the Company's parent, GWL&A Financial, under the terms of two long-term surplus notes. The amounts shown in this table differ from the amounts included in the Company's consolidated balance sheet because the amounts shown above do not consider the discount upon the issuance of one of the surplus notes.

⁷ **Related party long-term debt interest** - One long-term surplus note bears interest at a fixed rate through maturity. The second surplus note bears interest initially at a fixed rate that will change in the future based upon the then current three-month London Interbank Offering Rate. The interest payments shown in this table are calculated based upon the contractual rates in effect on December 31, 2009 and do not consider the impact of future interest rate changes.

⁸ **Repurchase agreements and commercial paper** - The Company's obligations under its commercial paper and repurchase agreement programs are short-term in nature. The amounts presented represent the amounts due upon maturity of the instrument. The obligations related to these liabilities are presented in the table above in the less than one year category as presented in the Company's consolidated balance sheet.

⁹ **Payable under securities lending agreements** - The Company accepts both cash and non-cash collateral in connection with its securities lending program. Since the securities lending transactions generally expire within one year or the timing of the return of the collateral is uncertain, the obligations related to these liabilities are presented in the table above in the less than one year category in the amounts of the liabilities presented in the Company's consolidated balance sheet.

¹⁰ **Investment purchase obligations** - The Company commits to fund limited partnership interests, mortgage loan and other investments in the normal course of its business. As the timing of the fulfillment of the commitment to fund partnership interests cannot be predicted, such obligations are presented in the less than one year category. The timing of the funding of mortgage loans is based on the expiration date of the commitment.

¹¹ **Operating leases** - The Company is obligated under various non-cancelable operating leases, primarily for office space. Contractual provisions exist that could increase the lease obligations presented, including operating expense escalation clauses. Management does not consider the impact of any such clauses to be material to the Company's operating lease obligations.

From time to time, the Company enters into agreements or contracts, including capital leases, to purchase goods or services in the normal course of its business. However, these agreements and contracts are not material and are excluded from the table above.

¹² **Other liabilities** - Other liabilities include those other liabilities which represent contractual obligations not included elsewhere in the table above. If the timing of the payment of any other liabilities was sufficiently uncertain, the amounts were included in the less than one year category. Other liabilities presented in the table above include:

- Liabilities under reinsurance arrangements.
- Liabilities related to securities purchased but not yet settled.
- Liabilities related to derivative obligations.
- Liabilities related to derivative counterparty collateral
- Statutory state escheat liabilities.
- Expected benefit payments to the Company's defined benefit pension and post-retirement medical plans through 2019.
- Unrecognized tax benefits.

7.11 Application of Recent Accounting Pronouncements

Recently adopted accounting pronouncements

In June 2009, the Financial Accounting Standards Board (the "FASB") issued Statement of Financial Accounting Standards No. 168, "The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles - a replacement of FASB Statement No. 162" ("SFAS No. 168"). SFAS No. 168 establishes the FASB Accounting Standards Codification™ (the "ASC") as the single source of authoritative accounting principles recognized by the FASB to be applied in the preparation of financial statements in conformity with generally accepted accounting principles in the United States ("GAAP") applied by nongovernmental entities. All previously issued GAAP authoritative pronouncements are superseded and replaced by the ASC and are considered non-authoritative. The ASC also established that rules and interpretative releases of the Securities and Exchange Commission (the "SEC") under authority of federal securities laws are also sources of GAAP for SEC registrants. SFAS No. 168 and the ASC are effective for interim or annual financial periods ending after September 15, 2009. The Company adopted SFAS No. 168 and the ASC for its fiscal quarter ended September 30, 2009.

In February 2006, the FASB issued Statement of Financial Accounting Standards No. 155, "Accounting for Certain Hybrid Financial Instruments" ("SFAS No. 155"). Effective July 1, 2009, SFAS No. 155 was superseded and replaced by certain provisions of ASC topic 815, "Derivatives and Hedging" ("ASC topic 815"). These provisions of ASC topic 815 permit any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation to be carried at fair value in its entirety, with changes in fair value recognized in earnings. In addition, these provisions of ASC topic 815 require that beneficial interests in securitized financial assets be analyzed to determine whether they are freestanding derivatives or contain an embedded derivative. These provisions of ASC topic 815 are applicable to new or modified financial instruments in fiscal years beginning after September 15, 2006, however they may be applied to instruments that an entity holds at the date of adoption on an instrument-by-instrument basis. The Company adopted these provisions on January 1, 2007. The adoption increased stockholder's equity by \$115.

In June 2006, the FASB issued Financial Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN 48"). Effective July 1, 2009, FIN 48 was superseded and replaced by certain provisions of ASC topic 740, "Income Taxes" ("ASC topic 740"). These provisions of ASC topic 740 clarify the accounting for uncertainty in income taxes. In addition, they prescribe a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. They also provide guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. These provisions of ASC topic 740 are effective for fiscal years beginning after December 15, 2006. The Company adopted these provisions on January 1, 2007. The adoption decreased stockholder's equity by \$6,195.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, “Fair Value Measurements” (“SFAS No. 157”). Effective July 1, 2009, SFAS No. 157 was superseded and replaced by certain provisions of ASC topic 820, “Fair Value Measurements and Disclosures” (“ASC topic 820”). These provisions enhance guidance for using fair value to measure assets and liabilities. These provisions also provide expanded information about the extent to which a company measures assets and liabilities at fair value, the information used to measure fair value and the effect of fair value measurements on earnings. These provisions of ASC topic 820 are applicable whenever other authoritative pronouncements require or permit assets or liabilities to be measured at fair value and are effective for fiscal years beginning after November 15, 2007. The Company adopted these provisions on January 1, 2008. The adoption did not have a material impact on the Company’s financial position or results of its operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans” (“SFAS No. 158”). Effective July 1, 2009, SFAS No. 158 was superseded and replaced by certain provisions of ASC topic 715, “Compensation – Retirement Benefits” (“ASC topic 715”). For fiscal years ending after December 15, 2006, these provisions of ASC topic 715 require a company to recognize in its balance sheet an asset for a defined benefit postretirement plan’s overfunded status or a liability for a plan’s underfunded status and recognize changes in the funded status of a defined benefit postretirement plan in the other comprehensive income section of stockholder’s equity in the year in which the changes occur, and provide additional disclosures. The Company adopted the recognition and disclosure provisions of these provisions of ASC topic 715 as of December 31, 2006, decreasing accumulated other comprehensive income (loss) by \$6,734. In addition, for fiscal years ended after December 15, 2008, these provisions of ASC topic 715 require a company to measure a defined benefit postretirement plan’s assets and obligations that determine its funded status as of the end of its fiscal year. The Company adopted these measurement provisions for its fiscal year ended December 31, 2008, decreasing stockholder’s equity by \$206. The adoption did not affect the results of operations for the years ended December 31, 2008, 2007, or 2006.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115” (“SFAS No.159”). Effective July 1, 2009, SFAS No. 159 was superseded and replaced by certain provisions of ASC topic 825, “Financial Instruments” (“ASC topic 825”). These provisions of ASC topic 825 permit an entity to measure financial instruments and certain other items at estimated fair value. Most of these provisions are elective; however, certain amendments to ASC topic 320, “Investments - Debt and Equity Securities” (“ASC topic 320”) apply to all entities that own trading and available-for-sale securities. The fair value option permits an entity to measure eligible items at fair value as of specified election dates. The fair value option (a) may generally be applied instrument by instrument, (b) is irrevocable unless a new election date occurs, and (c) must be applied to the entire instrument and not to only a portion of the instrument. These provisions of ASC topic 825 are effective as of the beginning of the first fiscal year that begins after November 15, 2007. The Company adopted these provisions on January 1, 2008. The adoption did not have an impact on the Company’s financial position or results of its operations.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141(R), “Business Combinations” (“SFAS No. 141(R)”) and Statement of Financial Accounting Standards No. 160, “Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51” (“SFAS No. 160”). Effective July 1, 2009, SFAS No. 141(R) was superseded and replaced by certain provisions of ASC topic 805, “Business Combinations” (“ASC topic 805”). Effective July 1, 2009, SFAS No. 160 was superseded and replaced by certain provisions of ASC topic 810, “Consolidation”, (“ASC topic 810”). These provisions of the codification topics change the accounting for and reporting of business combination transactions and non-controlling (minority) interests in consolidated financial statements. Some of the significant changes include the recognition of 100% percent of the fair value of assets acquired, liabilities assumed and non-controlling interest of acquired businesses; recognition of contingent consideration arrangements at their acquisition date fair values, with subsequent changes in fair value reflected in net income; recognition of acquisition related transaction costs as expense when incurred; and recognition of acquisition related restructuring cost accruals in acquisition accounting only if certain criteria are met as of the acquisition date. These provisions of ASC topic 805 and ASC topic 810 are required to be adopted simultaneously and are effective for fiscal years beginning after December 15, 2008. The Company adopted these provisions of the codification topics for its fiscal year beginning January 1, 2009. The adoption of these provisions of ASC topic 805 and ASC topic 810 did not have an impact on the Company’s consolidated financial position or the results of its operations.

In February 2008, the FASB issued Staff Position No. 157-2, “Effective Date of FASB Statement No. 157” (“FSP No. 157-2”). Effective July 1, 2009, FSP No. 157-2 was superseded and replaced by certain provisions of ASC topic 820, “Fair Value Measurements and Disclosures” (“ASC topic 820”). These provisions of ASC topic 820 defer the effective date for all nonrecurring fair value measurements of non-financial assets and non-financial liabilities until fiscal years beginning after November 15, 2008. Non-financial assets include assets associated with business acquisitions and impairment testing of tangible and intangible assets. The Company adopted these provisions of ASC topic 820 for its fiscal year beginning January 1, 2009. The adoption of these provisions of ASC topic 820 did not have a material impact on the Company’s consolidated financial position or the results of its operations.

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, “Disclosures About Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133” (“SFAS No. 161”). Effective July 1, 2009, SFAS No. 161 was superseded and replaced by certain provisions of ASC topic 815, “Derivatives and Hedging” (“ASC topic 815”). These provisions of ASC topic 815 apply to all derivative instruments and related hedged items. These provisions of ASC topic 815 require entities to provide enhanced disclosures regarding (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for and (c) how derivative instruments and related hedged items affect an entity’s financial position, results of operations and cash flows. These provisions of ASC topic 815 are effective for fiscal years beginning after November 15, 2008. The Company adopted these provisions of ASC topic 815 for its fiscal year beginning January 1, 2009.

In April 2008, the FASB issued Staff Position No. FAS 142-3, “Determination of the Useful Life of Intangible Assets” (“FSP FAS No. 142-3”). Effective July 1, 2009, FSP FAS No. 142-3 was superseded and replaced by certain provisions of ASC topic 350, “Intangibles - Goodwill and Other” (“ASC topic 350”). These provisions of ASC topic 350 require, among other things, the amendment of factors that must be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. In determining the useful life of an intangible asset for amortization purposes, an entity shall consider, among other things, the periods of expected cash flows, adjusted for certain entity-specific factors. These provisions of ASC topic 350 are effective for fiscal years beginning after December 15, 2008. The Company adopted these provisions of ASC topic 350 for its fiscal year beginning January 1, 2009. The adoption of these provisions of ASC topic 350 did not have an impact on the Company’s consolidated financial position or the results of its operations.

In October 2008, the FASB issued Staff Position No. 157-3, “Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active” (“FSP No. 157-3”). Effective July 1, 2009, FSP No. FAS 157-3 was superseded and replaced by certain provisions of ASC topic 820. These provisions of ASC topic 820 apply to financial assets within the scope of accounting pronouncements that require or permit fair value measurements. These provisions of ASC topic 820 clarify when a market that is not active and provide an example to illustrate key conditions in determining the fair value of a financial asset when the market for that financial asset is not active. These provisions became effective upon issuance including prior periods for which financial statements have not been issued. The Company adopted these provisions effective September 30, 2008. The adoption did not have a material impact on the Company’s financial position or results of its operations.

In December 2008, the FASB issued Staff Position No. FAS 132(R)-1, “Employers’ Disclosures About Postretirement Benefit Plan Assets” (“FSP No. FAS 132(R)-1”). Effective July 1, 2009, FSP No. FAS 132(R)-1 was superseded and replaced by certain provisions of ASC topic 715, “Compensation - Retirement Benefits” (“ASC topic 715”). Certain provisions of ASC topic 715 require, among other things, additional disclosures about assets held in an employer’s defined benefit pension plan including disclosures regarding investment policies and strategies, categories of plan assets, fair value measurements of plan assets and significant concentrations of risk. The requirements of ASC topic 715 relating to these disclosures are effective for fiscal years ending after December 15, 2009. The Company adopted these provisions of ASC topic 715 for its fiscal year ending December 31, 2009. The adoption of these provisions of ASC topic 715 did not have an impact on the Company’s consolidated financial position or the results of its operations.

In January 2009, the FASB issued EITF 99-20-1, “Amendments to the Impairment Guidance of EITF Issue No. 99-20” (“EITF 99-20-1”). Effective July 1, 2009, EITF 99-20-1 was superseded and replaced by certain provisions of ASC topic 325, “Investments - Other” (“ASC topic 325”). These provisions of ASC topic 325 are an interpretative amendment to impairment guidance and align impairment guidance to that of ASC topic 320, “Investments - Debt and Equity Securities” (“ASC topic 320”). These provisions are effective for reporting periods ending after December 15, 2008. The Company adopted these provisions for its year ended December 31, 2008. The adoption did not have an impact on the Company’s financial position or results of its operations.

In April 2009, the FASB issued Staff Position No. FAS 157-4, “Determining Fair Value When the Volume and Level of Activity for an Asset or Liability Have Significantly Decreased and Identifying Transactions That are Not Orderly” (“FSP No. FAS 157-4”). Effective July 1, 2009, FSP No. FAS 157-4 was superseded and replaced by certain provisions of ASC topic 820. These provisions of ASC topic 820 relate to determining fair values when there is no active market or where the price inputs being used represent distressed sales. These provisions of ASC topic 820 reaffirm the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. These provisions of ASC topic 820 apply to all assets and liabilities within the scope of accounting pronouncements that require or permit fair value measurements. The provisions of ASC topic 820 that relate to the determination of fair value when the volume and level of activity for an asset or liability have significantly decreased and identifying transactions that are not orderly, is effective for interim and annual periods ending after June 15, 2009. The Company adopted these provisions of ASC topic 820 relating to these considerations for its fiscal quarter ended June 30, 2009. The adoption of ASC topic 820 relating to these considerations did not have a material impact on the Company’s fair value measurements.

In April 2009, the FASB issued Staff Position No. FAS 115-2 and FAS 124-2, “Recognition and Presentation of Other-Than-Temporary Impairments” (“FSP No. FAS 115-2 and FAS 124-2”). Effective July 1, 2009, FSP No. FAS 115-2 and FAS 124-2 was superseded and replaced by certain provisions of ASC topic 320, “Investments - Debt and Equity Securities” (“ASC topic 320”). These provisions of ASC topic 320 require companies, among other things, to bring greater consistency to the timing of impairment recognition and provide for greater clarity about the credit and non-credit components of impaired debt securities that are not expected to be sold. These provisions of ASC topic 320 also require increased and timelier disclosures regarding expected cash flows, credit losses and an aging of securities with unrealized losses. These provisions of ASC topic 320 are effective for interim and annual periods ending after June 15, 2009. The Company adopted these provisions of ASC topic 320 for its fiscal quarter ended June 30, 2009 and recognized the effect of applying them as a change in accounting principle. The Company recognized an \$8,528, net of income taxes, cumulative effect adjustment upon initially applying these provisions of ASC topic 320 as an increase to retained earnings with a corresponding decrease to accumulated other comprehensive income (loss).

In May 2009, the FASB issued Statement of Financial Accounting Standards No. 165, “Subsequent Events” (“SFAS No. 165”). Effective July 1, 2009, SFAS No.165 was superseded and replaced by certain provisions of ASC topic 855, “Subsequent Events” (“ASC topic 855”). These provisions of ASC topic 855 require companies to establish principles and requirements for subsequent events. Specifically, these provisions of ASC topic 855 require the disclosure of the period after the balance sheet date through which management has evaluated events and transactions that may occur for potential recognition or disclosure in a company’s financial statements. In addition, these provisions of ASC topic 855 provide the circumstances under which the disclosures are required of an entity regarding events and circumstances that have occurred after the balance sheet date but before financial statements are issued or are available to be issued. These provisions of ASC topic 855 are effective for interim or annual financial periods ending after June 15, 2009. The Company adopted these provisions of ASC topic 855 for its fiscal quarter ended June 30, 2009. The adoption of these provisions of ASC topic 855 did not have an impact on the Company’s consolidated financial position or the results of its operations.

Future adoption of new accounting pronouncements

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 166 “Accounting for Transfers of Financial Assets - an amendment of FASB Statement No. 140” (“SFAS No. 166”). Effective July 1, 2009, SFAS No.166 was superseded and replaced by certain provisions of ASC topic 860, “Transfers and Servicing” (“ASC topic 860”). Among other things, provisions of ASC topic 860 improve the relevance, representational faithfulness and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets, the effects of a transfer on its financial position, financial performance and cash flows, and a transferor’s continuing involvement, if any, in transferred financial assets. The ASC topic 860 has been further amended relating to derecognition guidance and eliminating the exemption from consolidation for qualifying special-purpose entities. These amendments to ASC topic 860 are effective as of the beginning of interim and annual reporting periods that begin after November 15, 2009. The Company adopted the amended provisions of ASC topic 860 for its fiscal year beginning January 1, 2010. The adoption of these provisions of ASC topic 860 did not have a material impact on the Company’s consolidated financial position or the results of its operations.

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 167 “Amendments to FASB Interpretation No. 46(R)” (“SFAS No. 167”). Effective July 1, 2009, SFAS No.167 was superseded and replaced by certain provisions of ASC topic 810. These provisions of ASC topic 810 require reconsideration of whether an enterprise was the primary beneficiary of a variable interest entity (“VIE”) only when specific events had occurred. The amended provisions of ASC topic 810 change the consolidation guidance applicable to a VIE. They also amend the guidance governing the determination of whether an entity is the primary beneficiary of a VIE, and is, therefore, required to consolidate the VIE. The amended provisions of ASC topic 810 also requires enhanced disclosures about an entity’s involvement with a VIE. The amended provisions of ASC topic 810 are effective as of the beginning of interim and annual reporting periods that begin after November 15, 2009. The Company adopted the amended provisions of ASC topic 810 for its fiscal year beginning January 1, 2010. The adoption of these provisions of ASC topic 810 did not have a material impact on the Company’s consolidated financial position or the results of its operations. In January 2010, the FASB moved to finalize an Accounting Standards Update (“ASU”) to defer the effective date of ASC topic 810 as it relates to a reporting enterprise’s interest in certain entities and for certain money market mutual funds.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company has established processes and procedures to effectively identify, monitor, measure and manage the risks associated with its invested assets and its interest rate sensitive insurance and annuity products. Management has identified investment portfolio management, including the use of derivative instruments, insurance and annuity product design and asset/liability management as three critical means to accomplish a successful risk management program.

The major risks to which the Company is exposed include the following:

- Market risk - the potential of loss arising from adverse fluctuations in interest rates and equity market prices and the levels of their volatility.
- Insurance risk - the potential of loss resulting from claims and expenses exceeding liabilities held.
- Credit risk - the potential of loss arising from an obligator’s inability or unwillingness to meet its obligations to the Company.
- Operational and corporate risk - the potential of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from other external events.

Market risk

The Company's exposure to interest rate changes results from its significant holdings of fixed maturity securities and its interest rate sensitive liabilities. The fixed maturity security holdings primarily consist of direct obligations of the U.S. government and its agencies, direct obligations of U.S. states and their subdivisions, corporate debt securities and asset-backed and mortgage-backed securities. All of these securities are exposed to changes in medium and long-term interest rates. Interest rate sensitive product liabilities, primarily those liabilities associated with guaranteed income contracts and annuity contracts, have the same type of interest rate risk exposure as fixed maturity securities.

To reduce interest rate risk, the Company performs periodic projections of asset and liability cash flows in order to evaluate the interest rate sensitivity of its fixed maturity securities and its product liabilities to interest rate movements. For determinate liabilities, i.e. liabilities with stable, predictable cash flows on products that can't be repriced (for example, certificate annuities and payout annuities), asset/liability cash flow mismatches are monitored and the asset portfolios are rebalanced as necessary to keep the mismatches within tolerance limits. For these determinate liabilities, the investment policy predominately requires assets with stable, predictable cash flows so that changes in interest rates will not cause changes in the timing of asset cash flows resulting in mismatches. For indeterminate liabilities, i.e. liabilities that have less predictable cash flows but that can be repriced (for example, portfolio annuities and universal life insurance), the potential mismatch of assets and liabilities is tested under a wide variety of interest scenarios. The potential cost of this mismatch is calculated. If the potential cost is considered to be too high, actions considered would include rebalancing the asset portfolio and/or purchasing derivatives that reduce the risk as part of the hedging strategy program discussed below. For each major block of indeterminate liabilities, the asset and liability positions are reviewed regularly in senior management meetings to proactively recommend changes in the current investment strategy and/or rebalance of the asset portfolio.

As referenced above, the Company supports a hedging strategy program. The hedging program consists of the use of various derivative instruments including financial futures, financial forwards, interest rate swaps, caps, floors and options such as interest rate swaptions. The Company has strict operating policies which prohibit the use of derivative instruments for speculative purposes, permit derivative transactions only with approved counterparties, specify limits on concentration of risk and provide requirements of reporting and monitoring systems.

- Financial futures and financial forwards are commitments to either purchase or sell designated financial instruments at a future date for a specified price.
- Interest rate swaps involve the periodic exchange of cash flows with third parties at specified intervals calculated using agreed upon rates or other financial variables.
- Interest rate cap and floor contracts entitle the purchaser to receive from the issuer at designated dates the amount by which a specified market rate exceeds the cap strike interest rate or falls below the floor strike interest rate.
- Option contracts grant the purchaser, in consideration for the payment of a premium, the right to either purchase from or sell to the issuer a financial instrument at a specified price within a specified time period or on a stated date. Interest rate swaptions grant the purchaser the right to enter into a swap with predetermined fixed-rate payments over a predetermined time period on the exercise date.

The Company has estimated the possible effects of interest rate changes at December 31, 2009. If interest rates increased by 100 basis points (1.00%), the December 31, 2009 fair value of the fixed income assets in the general account would decrease by approximately \$767 million. This calculation uses projected asset cash flows, discounted back to December 31, 2009. The cash flow projections are shown in the table below. The table below shows cash flows rather than expected maturity dates because many of the Company's assets have substantial expected principal payments prior to the final maturity date. The fair value shown in the table below was calculated using spot discount interest rates that varied by the year in which the cash flows are expected to be received. The spot rates in the benchmark calculation range from 0.75% to 6.09%.

| Projected cash flows by calendar years (In millions) | Benchmark | Interest rate increase one percent |
|---|------------------|--|
| 2010 | \$ 2,534 | \$ 2,433 |
| 2011 | 2,297 | 2,217 |
| 2012 | 2,248 | 2,207 |
| 2013 | 2,421 | 2,342 |
| 2014 | 2,139 | 2,138 |
| Thereafter | 9,915 | 10,411 |
| Undiscounted total | <u>\$ 21,554</u> | <u>\$ 21,748</u> |
| Fair value | \$ 16,993 | \$ 16,226 |

The Company does not have significant equity risk exposure associated with its equity invested assets as this type of investment is minimal.

The Company administers separate account variable annuities and provides other investment and retirement services where fee income is earned and profitability is determined based upon a percentage of account balances or assets under management. Fluctuations in fund asset levels occur as a result of both changes in cash flow and general market conditions. There is a market risk of reduced fee income if equity markets decline. If equity markets were to decline by 10%, the Company's associated fee income in 2010 would decline by approximately \$21 million.

The Company's surplus assets include equity investments. There is a market risk of reduced asset values if equity markets decline. If equity markets were to decline by 10%, the Company would have an unrealized loss of approximately \$9 million on equity investments in non-affiliates. This unrealized loss would not impact net income but would reduce stockholder's equity.

The Company has sold variable annuities with various forms of guaranteed minimum death benefits. The Company is required to hold future policy benefit liabilities for these guaranteed death benefits. If equity markets were to decline by 10%, the liability for these benefits would increase by approximately \$1 million.

The Company's exposure to foreign currency exchange rate fluctuations is minimal since only nominal foreign investments are held. To manage foreign currency exchange risk, the Company uses currency swaps to convert foreign currency back to United States dollars. These swaps are purchased each time a foreign currency denominated asset is purchased.

Insurance risk

The Company utilizes reinsurance programs to control its exposure to general insurance risks. Reinsurance agreements do not relieve the Company from its direct obligations to its insureds. However, an effective reinsurance program limits the Company's exposure to potentially large losses. The failure of reinsurers to honor their obligations could result in losses to the Company. To manage this risk, the Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk relative to the reinsurers in order to minimize its exposure to significant losses from reinsurer insolvencies. The Company currently retains a maximum liability in the amount of \$3.5 million of coverage per individual life.

The Company manages the risks associated with its insurance and other contractual liabilities through the use of actuarial modeling techniques. These techniques utilize significant assumptions including morbidity, mortality, persistency, product pricing and the cash flow stream of benefit payments. Through these techniques, the Company attempts to match the anticipated cash flow streams of its invested assets with the anticipated cash flow streams of its insurance and other contractual obligations. The cash flows associated with determinate policy liabilities are not interest rate sensitive but will vary based upon the timing and amount of benefit payments. The primary risks associated with these liabilities are that the benefits will exceed those anticipated in the actuarial modeling or that the actual timing of the payment of benefits will differ from what was anticipated.

Credit risk

Credit risk is the risk the Company assumes if its debtors, customers or other counterparties and intermediaries may be unable or unwilling to pay their contractual obligations when they come due and may manifest itself through the downgrading of credit ratings of counterparties. It is the Company's policy to acquire only investment grade assets to enable it to provide for future policy obligations and to minimize undue concentrations of assets in any single geographic area, industry or entity. To minimize this risk, management regularly reviews the credit ratings of the entities in which the Company invests. These credit ratings are obtained from recognized external credit rating agencies and/or by internal credit review.

Monoline insurers guarantee the timely payment of principal and interest of certain securities. Entities will often purchase monoline insurance to guarantee a security issuance in order to benefit from better market execution. As of December 31, 2009, the fair value of the Company's total monoline insured asset-backed securities was \$624 million, BBB+ and AA-. At December 31, 2009 and 2008, the overall credit quality of the insured portfolio, including the benefits of the monoline insurance, was A- and A, respectively.

A component of credit risk is the risk of exposure to sub-prime mortgage securities. Sub-prime mortgage securities are backed by mortgage loans made to borrowers with lower than average credit scores. The Company's sub-prime exposure is \$889 million, of which 91% of the Company's sub-prime securities are rated AAA. The majority of the mortgages backing these securities are fixed rate loans, which typically have lower default and loss rates than adjustable rate loans. Fifty-eight percent of these pools were originated before 2005, which is associated with lower default and loss rates compared to pools that were originated from 2005 through 2007. The weighted average credit enhancement level for these securities is 33%. This credit enhancement represents subordinated securities or surplus collateral that would absorb losses prior to losses being allocated to the Company's securities.

The Company has no exposure to sub-prime collateralized debt obligations, asset-backed commercial paper or structured investment vehicles. The Company's exposure to Alt-A mortgage-backed securities is \$4 million. The underlying mortgages of Alt-A securities have a risk potential that is greater than prime but less than sub-prime. The borrowers behind these mortgages typically have clean credit histories, but the mortgage itself will generally have some issues that increase its risk profile. These issues may include higher loan-to-value and debt-to-income ratios or inadequate documentation of the borrower's income.

Operational and corporate risk

The Company manages and mitigates internal operational risk through integrated and complementary policies, procedures, processes and practices. Human Resource hiring practices, performance evaluations and promotion and compensation practices are designed to attract, retain and develop the skilled personnel required. A comprehensive job evaluation process is in place and training and development programs are supported. Each business area provides training designed for their specific needs and has developed internal controls for significant processes. Processes and controls are monitored and redefined by the business areas and subject to review by the Company's internal audit staff. The Company applies a robust project management discipline to all significant initiatives.

Appropriate security measures protect premises and information. The Company has emergency procedures in place for short-term incidents and is committed to maintaining business continuity and disaster recovery plans at every business location for the recovery of critical functions in the event of a disaster, including offsite data backup and work area facilities. The Company maintains various corporate insurance coverages such as property, general liability, excess liability, automobile liability, workers' compensation, financial institution bonds, other regulatory bonds and professional liability insurance to protect its owned property assets and to insure against certain third-party liabilities.

The Company's businesses are subject to various regulatory requirements imposed by regulation or legislation applicable to insurance companies and companies providing financial services. These regulations are primarily intended to protect policyholders and beneficiaries. Material changes in the regulatory framework or the failure to comply with legal and regulatory requirements could have a material adverse effect on the Company. The Company monitors compliance with the legal and regulatory requirements in all jurisdictions in which it conducts business and assesses trends in legal and regulatory change to keep business areas current and responsive.

In the course of its business activities, the Company may be exposed to the risk that some actions may lead to damaging its reputation and hence damage its future business prospects. These actions may include unauthorized activities of employees or others associated with the Company, inadvertent actions of the Company that become publicized and damage its reputation, regular or past business activities of the Company that become the subject of regulatory or media scrutiny and, due to a change of public perception, cause damage to the Company. To manage or mitigate this risk, the Company has ongoing controls to limit the unauthorized activities of people associated with it. The Company has adopted a Code of Business Conduct and Ethics which sets out the standards of business conduct to be followed by all of its directors, officers and employees.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholder of
Great-West Life & Annuity Insurance Company
Greenwood Village, Colorado

We have audited the accompanying consolidated balance sheets of Great-West Life & Annuity Insurance Company and subsidiaries (the "Company") as of December 31, 2009 and 2008, and the related consolidated statements of income, stockholder's equity, and cash flows for each of the three years in the period ended December 31, 2009. Our audits also included the financial statement schedule listed in the Index at Item 15. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Great-West Life & Annuity Insurance Company and subsidiaries as of December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 2, the Company changed its accounting for the recognition and presentation of other-than-temporary impairments for certain investments, as required by accounting guidance adopted on April 1, 2009.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

1. Organization, Basis of Presentation and Significant Accounting Policies

Organization - Great-West Life & Annuity Insurance Company ("GWLA") and its subsidiaries (collectively, the "Company") is a direct wholly-owned subsidiary of GWL&A Financial Inc. ("GWL&A Financial"), a holding company formed in 1998. GWL&A Financial is a wholly-owned subsidiary of Great-West Lifeco U.S. Inc. ("Lifeco U.S.") and an indirect wholly-owned subsidiary of Great-West Lifeco Inc. ("Lifeco"). The Company offers a wide range of life insurance, retirement and investment products to individuals, businesses and other private and public organizations throughout the United States. The Company is an insurance company domiciled in the State of Colorado and is subject to regulation by the Colorado Division of Insurance.

Basis of presentation - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates are required to account for valuation of investments and other-than-temporary impairments, recognition of income on certain investments, valuation and accounting for derivative instruments, goodwill, deferred acquisition costs and value of business acquired, policy and contract benefits and claims, employee benefits plans and taxes on income. Actual results could differ from those estimates.

The consolidated financial statements include the accounts of the Company and its subsidiaries. Intercompany transactions and balances have been eliminated in consolidation.

Significant Accounting Policies

Investments - Investments are reported as follows:

1. The Company classifies the majority of its fixed maturity and all of its equity investments as available-for-sale and records them at fair value with the related net unrealized gain or loss, net of policyholder related amounts and deferred taxes, in accumulated other comprehensive income (loss) in the stockholder's equity section of the consolidated balance sheets. Net unrealized gains and losses related to participating contract policies that cannot be distributed are recorded as undistributed earnings on participating business in the Company's consolidated balance sheets. The Company recognizes the acquisition of its fixed maturity and equity investments on a trade date basis.

Premiums and discounts are recognized as a component of net investment income using the scientific interest method. Realized gains and losses are included in net realized investment gains (losses). Declines in value determined to be other-than-temporary are included in total other-than-temporary impairment losses recognized.

The Company purchases fixed maturity securities which are classified as held for trading. Assets in the held for trading category are carried at fair value with changes in fair value reported in net investment income.

The recognition of income on certain investments (e.g. loan-backed securities, including mortgage-backed and asset-backed securities) is dependent upon market conditions, which may result in prepayments and changes in amounts to be earned. Prepayments on all mortgage-backed and asset-backed securities are monitored monthly and amortization of the premium and/or the accretion of the discount associated with the purchase of such securities are adjusted by such prepayments.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

2. Mortgage loans on real estate are commercial loans and are carried at their unpaid balances adjusted for any unamortized premiums or discounts and allowances for credit losses. Interest income is accrued on the unpaid principal balance. Discounts and premiums are amortized to net investment income using the scientific interest method. Accrual of interest is discontinued on any impaired loans where collection of interest is doubtful.

The Company maintains an allowance for credit losses at a level that, in management's opinion, is sufficient to absorb credit losses on its impaired loans. Management's judgment is based upon situational analysis of each individual loan and may consider past loss experience and current and projected economic conditions. The measurement of impaired loans is based upon the fair value of the underlying collateral.

3. Equity investments classified as available-for-sale are carried at fair value with net unrealized gains and losses, net of deferred taxes, reported as accumulated other comprehensive income (loss) in the stockholder's equity section of the Company's consolidated balance sheets. The Company uses the equity method of accounting for investments in which it has more than a minor interest and has influence in the entity's operating and financial policies, but does not have a controlling interest. Realized gains and losses are included in net realized gains (losses) on investments. Declines in value, determined to be other-than-temporary, are included in total other-than-temporary impairment losses recognized.
4. Limited partnership interests are accounted for using the cost method of accounting. The Company uses this method since it has a minor equity interest and virtually no influence over the entity's operations. Also included in limited partnership interests are limited partnerships established for the purpose of investing in low-income housing that qualify for federal and state tax credits. These securities are carried at amortized cost as determined using the effective yield method.
5. Policy loans are carried at their unpaid balances.
6. Short-term investments include securities purchased with initial maturities of one year or less and are carried at amortized cost, which approximates fair value. The Company classifies its short-term investments as available-for-sale.
7. Gains and losses realized on disposal of investments are determined on a specific identification basis. See item 10 below for a description of realization of other-than-temporary impairments.
8. The Company may employ a trading strategy that involves the sale of securities with a simultaneous agreement to repurchase similar securities at a future date at an agreed-upon price. Proceeds of the sale are reinvested in other securities and may enhance the current yield and total return. The difference between the sales price and the future repurchase price is recorded as an adjustment to net investment income. During the period between the sale and repurchase, the Company will not be entitled to receive interest and principal payments on the securities sold. Losses may arise from changes in the value of the securities or if the counterparty enters bankruptcy proceedings or becomes insolvent. In such cases, the Company's right to repurchase the security may be restricted. Amounts owed to brokers under these arrangements are included in repurchase agreements in the accompanying consolidated balance sheets. The liability is collateralized by securities with approximately the same fair value.
9. The Company receives collateral for lending securities that are held as part of its investment portfolio. The Company requires collateral in an amount greater than or equal to 102% of the market value of domestic securities loaned and 105% of foreign securities loaned. Such collateral is used to replace the securities loaned in event of default by the borrower. The Company's securities lending transactions are accounted for as collateralized borrowings. Collateral is defined as government securities, letters of credit and/or cash collateral. The borrower can return and the Company can request the loaned securities at any time. The Company maintains ownership of the loaned securities at all times and is entitled to receive from the borrower any payments for interest or dividends received on such securities during the loan term.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

10. One of the significant estimates inherent in the valuation of investments is the evaluation of investments for other-than-temporary impairments. The evaluation of impairments is a quantitative and qualitative process, which is subject to risks and uncertainties and is intended to determine whether declines in the fair value of investments should be recognized in current period earnings. The risks and uncertainties include changes in general economic conditions, the issuer's financial condition or near term recovery prospects, the effects of changes in interest rates or credit spreads and the recovery period. The Company's accounting policy requires that a decline in the value of a security below its cost or amortized cost basis be assessed to determine if the decline is other-than-temporary. If management either (a) has the intent to sell the fixed maturity investment or (b) it is more likely than not the Company will be required to sell the fixed maturity investment before its anticipated recovery, a charge is recorded in net realized losses on investments equal to the difference between the fair value and cost or amortized cost basis of the security. If management does not intend to sell the security and it is not more likely than not the Company will be required to sell the fixed maturity investment before recovery of its amortized cost basis, but the present value of the cash flows expected to be collected (discounted at the effective interest rate implicit in the fixed maturity investment prior to impairment) is less than the amortized cost basis of the fixed maturity investment (referred to as the credit loss portion), an other-than-temporary impairment is considered to have occurred. In this instance, total other-than-temporary impairment is bifurcated into two components: the amount related to the credit loss, which is recognized in earnings; and the amount attributed to other factors (referred to as the non-credit portion), which is recognized as a separate component in accumulated other comprehensive income (loss). After the recognition of an other-than-temporary impairment, the fixed maturity investment is accounted for as if it had been purchased on the measurement date of the other-than-temporary impairment, with an amortized cost basis equal to the previous amortized cost basis less the other-than-temporary impairment recognized in earnings.

If management does not have the ability and intent to hold an impaired available-for-sale equity investment for a period of time sufficient to allow for the recovery of its value to an amount equal or greater than its cost, then the investment shall be deemed other-than-temporarily impaired. An impairment loss is recorded in earnings for the difference between the equity investment's cost and fair value at the balance sheet date of the reporting period for which the assessment is made.

Derivative financial instruments - All derivatives, whether designated in hedging relationships or not, are recorded on the consolidated balance sheets in other assets and other liabilities at fair value. Accounting for the ongoing changes in the fair value of a derivative depends upon the intended use of the derivative and its designation as determined when the derivative contract is entered into. If the derivative is designated as a fair value hedge, the changes in its fair value and of the fair value of the hedged item attributable to the hedged risk are recognized in earnings in net investment income. If the derivative is designated as a cash flow hedge, the effective portions of the changes in the fair value of the derivative are recorded in accumulated other comprehensive income (loss) in the Company's consolidated balance sheets and are recognized in the consolidated income statements when the hedged item affects earnings. Changes in the fair value of derivatives not qualifying for hedge accounting and the over effective portion of cash flow hedges are recognized in net investment income in the period of the change. Certain derivatives in a net asset position have cash pledged as collateral to the Company in accordance with the collateral support agreements with the counterparty. This collateral is held directly by the Company. This unrestricted cash collateral is included in other assets and the obligation to return is included in other liabilities.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Cash - Cash includes only amounts in demand deposit accounts.

Bank overdrafts - The Company's cash management system provides for the reimbursement of all major bank disbursement accounts on a daily basis. Checks issued but not yet presented to banks for payment can result in overdraft balances for accounting purposes and are included in other liabilities in the accompanying consolidated balance sheets. At December 31, 2009 and 2008, these liabilities were \$28,674 and \$8,817, respectively.

Internal use software - Purchased software costs, as well as certain internal and external costs incurred to develop internal use computer software during the application development stage are capitalized. Capitalized internal use software development costs, net of accumulated amortization, in the amounts of \$20,590 and \$14,944, are included in other assets at December 31, 2009 and 2008, respectively. The Company capitalized \$8,014, \$2,324 and \$3,504 of internal use software development costs during the years ended December 31, 2009, 2008 and 2007, respectively.

Deferred acquisition costs and value of business acquired - Deferred acquisition costs ("DAC"), which primarily consists of sales commissions and costs associated with the Company's sales representatives related to the production of new business or through the acquisition of insurance or annuity contracts through indemnity reinsurance transactions, have been deferred to the extent recoverable. The value of business acquired ("VOBA") represents the estimated fair value of insurance or annuity contracts acquired either directly through the acquisition of another insurance company or through the acquisition of insurance or annuity contracts through assumption reinsurance transactions. The recoverability of such costs is dependent upon the future profitability of the related business. DAC and VOBA associated with the annuity products and flexible premium universal life insurance products are being amortized over the life of the contracts in proportion to the emergence of gross profits. Retrospective adjustments of these amounts are made when the Company revises its estimates of current or future gross profits. DAC and VOBA associated with traditional life insurance are amortized over the premium-paying period of the related policies in proportion to premium revenues recognized. See Note 9 for additional information regarding deferred acquisition costs and the value of business acquired.

Goodwill and other intangible assets - Goodwill is the excess of cost over the fair value of assets acquired and liabilities assumed in connection with an acquisition and is considered an indefinite lived asset and therefore is not amortized. The Company tests goodwill for impairment annually or more frequently if events or circumstances indicate that there may be justification for conducting an interim test. If the carrying value of goodwill exceeds its fair value, the excess is recognized as an impairment and recorded as a charge against net income in the period in which the impairment is identified. There were no impairments of goodwill recognized during the years ended December 31, 2009, 2008 or 2007.

Other intangible assets represent the estimated fair value of the portion of the purchase price that was allocated to the value of customer relationships and preferred provider relationships in various acquisitions. These intangible assets have been assigned values using various methodologies, including present value of projected future cash flows, analysis of similar transactions that have occurred or could be expected to occur in the market, and replacement or reproduction cost. The initial valuations of these intangible assets were supported by an independent valuation study that was commissioned by the Company and executed by qualified valuation experts. Other identified intangible assets with finite lives are amortized over their estimated useful lives, which initially ranged from 4 to 14 years (weighted average 13 years), primarily based upon the cash flows generated by these assets.

Separate accounts - Separate account assets and related liabilities are carried at fair value in the accompanying consolidated balance sheets. The Company's separate accounts invest in shares of Maxim Series Fund, Inc. and Putnam Funds, open-end management investment companies, which are affiliates of the Company, and shares of other non-affiliated mutual funds and government and corporate bonds. Investment income and realized capital gains and losses of the separate accounts accrue directly to the contractholders and, therefore, are not included in the Company's consolidated statements of income. Revenues to the Company from the separate accounts consist of contract maintenance fees, administrative fees and mortality and expense risk charges. The Company's separate accounts include mutual funds or other investment options that purchase guaranteed interest annuity contracts issued by the Company. During the years ended December 31, 2009 and 2008, these purchases totaled \$149,302 and \$64,723, respectively. As the general account investment contracts are also included in the separate account balances in the accompanying consolidated balance sheets, the Company has reduced the separate account assets and liabilities by \$364,233 and \$265,299 at December 31, 2009 and 2008, respectively, to eliminate these amounts in its consolidated balance sheets at those dates.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Life insurance and annuity future benefits - Life insurance and annuity future benefits with life contingencies in the amounts of \$11,807,570 and \$11,322,866 at December 31, 2009 and 2008, respectively, are computed on the basis of estimated mortality, investment yield, withdrawals, future maintenance and settlement expenses and retrospective experience rating premium refunds. Annuity contract benefits without life contingencies in the amounts of \$7,117,591 and \$6,736,101 at December 31, 2009 and 2008, respectively, are established at the contractholder's account value.

Reinsurance - The Company enters into reinsurance transactions as both a provider and purchaser of reinsurance. In the normal course of its business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding risks to other insurance enterprises under excess coverage and coinsurance contracts. For each of its reinsurance agreements, the Company determines if the agreement provides indemnification against loss or liability relating to insurance risk in accordance with applicable accounting standards. If the Company determines that a reinsurance agreement does not provide indemnification against loss or liability relating to insurance risk, the Company records the agreement using the deposit method of accounting. The Company reviews all contractual features, particularly those that may limit the amount of insurance risk to which the reinsurer is subject or features that delay the timely reimbursement of claims.

Policy benefits and policy and contract claims ceded to other insurance companies are carried as a reinsurance receivable in the accompanying consolidated balance sheets. The cost of reinsurance related to long duration contracts is accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies.

Policy and contract claims - Policy and contract claims include provisions for claims incurred but not reported and claims in the process of settlement. The provision for claims incurred but not reported is valued based primarily on the Company's prior experience. The claims in the process of settlement are valued in accordance with the terms of the related policies and contracts.

Participating business - The Company has participating policies in which the policyholder shares in the Company's earnings through policyholder dividends that reflect the difference between the assumptions used in the premium charged and the actual experience on those policies. The amount of dividends to be paid is determined by the Board of Directors.

Participating life and annuity policy benefits are \$6,354,261 and \$6,155,890 at December 31, 2009 and 2008, respectively. Participating business approximates 9% of the Company's individual life insurance in-force at December 31, 2009 and 2008 and 19%, 24% and 32% of individual life insurance premium income for the years ended December 31, 2009, 2008 and 2007, respectively. The policyholder's share of net income on participating policies that cannot be distributed is excluded from stockholder's equity by a charge to operations and a credit to a liability.

The Company had established a Participating Policyholder Experience Account ("PPEA") for the benefit of all participating policyholders, which was included in the accompanying consolidated balance sheets at December 31, 2007. The Company had also established a Participation Fund Account ("PFA") for the benefit of the participating policyholders previously assumed from The Great-West Life Assurance Company ("GWL") under an assumption reinsurance transaction. The PFA was part of the PPEA. As discussed in Note 4, on January 1, 2008, the Company was no longer required to maintain the PPEA.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Recognition of premium and fee income and benefits and expenses - Life insurance premiums are recognized when due. Annuity contract premiums with life contingencies are recognized as received. Revenues for annuity and other contracts without significant life contingencies consist of contract charges for the cost of insurance and contract administration and surrender fees that have been assessed against the contract account balance during the period and are recognized when earned. Fees from assets under management, which consist of contract maintenance fees, administration fees and mortality and expense risk charges, are recognized when due. Benefits and expenses on policies with life contingencies are associated with earned premiums so as to result in recognition of profits over the life of the contracts. Premiums and policyholder benefits and expenses are presented net of reinsurance.

Net investment income - Interest and dividend income from fixed maturities and mortgage loans on real estate is recognized when earned. Net investment income on equity securities available-for-sale is primarily comprised of dividend income and is recognized on ex-dividend date.

Net realized gains and losses on investments and derivative financial instruments - Net realized gains and losses from investment sales are reported as a component of revenues and are determined on a specific identification basis. Net realized gains and losses also result from the termination of derivative contracts prior to expiration that are not designated as hedges for accounting purposes and certain fair-value hedge relationships. Impairments are recognized as other-than-temporary impairment losses when investment losses in value are deemed other-than-temporary. Non-credit impairments are reclassified to accumulated other comprehensive income (loss).

Income taxes - Income taxes are recorded using the asset and liability method in which deferred tax assets and liabilities are recorded for expected future tax consequences of events that have been recognized in either the Company's consolidated financial statements or consolidated tax returns. In estimating future tax consequences, all expected future events, other than the enactments or changes in the tax laws or rules, are considered. Although realization is not assured, management believes it is more likely than not that the deferred tax asset will be realized.

Share-based compensation - Lifeco maintains the Great-West Lifeco Inc. Stock Option Plan (the "Lifeco plan") that provides for the granting of options on its common shares to certain of its officers and employees and those of its subsidiaries, including the Company. The Company uses the fair value method to recognize the cost of share-based employee compensation under the Lifeco plan.

Regulatory requirements - In accordance with the requirements of the Colorado Division of Insurance, GWLA must demonstrate that it maintains adequate capital. At December 31, 2009 and 2008, GWLA was in compliance with the requirement. See Note 12.

In accordance with the requirements of the regulatory authorities in the states in which the Company conducts its business, it is required to maintain deposits with those authorities for the purpose of security for policy and contractholders. The Company fulfills this requirement generally with the deposit of United States government obligations.

2. Application of Recent Accounting Pronouncements

Recently adopted accounting pronouncements

In June 2009, the Financial Accounting Standards Board (the "FASB") issued Statement of Financial Accounting Standards No. 168, "The FASB Accounting Standards CodificationTM and the Hierarchy of Generally Accepted Accounting Principles - a replacement of FASB Statement No. 162" ("SFAS No. 168"). SFAS No. 168 establishes the FASB Accounting Standards CodificationTM (the "ASC") as the single source of authoritative accounting principles recognized by the FASB to be applied in the preparation of financial statements in conformity with generally accepted accounting principles in the United States ("GAAP") applied by nongovernmental entities. All previously issued GAAP authoritative pronouncements are superseded and replaced by the ASC and are considered non-authoritative. The ASC also established that rules and interpretative releases of the Securities and Exchange Commission (the "SEC") under authority of federal securities laws are also sources of GAAP for SEC registrants. SFAS No. 168 and the ASC are effective for interim or annual financial periods ending after September 15, 2009. The Company adopted SFAS No. 168 and the ASC for its fiscal quarter ended September 30, 2009.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

In February 2006, the FASB issued Statement of Financial Accounting Standards No. 155, "Accounting for Certain Hybrid Financial Instruments" ("SFAS No. 155"). Effective July 1, 2009, SFAS No. 155 was superseded and replaced by certain provisions of ASC topic 815, "Derivatives and Hedging" ("ASC topic 815"). These provisions of ASC topic 815 permit any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation to be carried at fair value in its entirety, with changes in fair value recognized in earnings. In addition, these provisions of ASC topic 815 require that beneficial interests in securitized financial assets be analyzed to determine whether they are freestanding derivatives or contain an embedded derivative. These provisions of ASC topic 815 are applicable to new or modified financial instruments in fiscal years beginning after September 15, 2006, however they may be applied to instruments that an entity holds at the date of adoption on an instrument-by-instrument basis. The Company adopted these provisions on January 1, 2007. The adoption increased stockholder's equity by \$115.

In June 2006, the FASB issued Financial Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN 48"). Effective July 1, 2009, FIN 48 was superseded and replaced by certain provisions of ASC topic 740, "Income Taxes" ("ASC topic 740"). These provisions of ASC topic 740 clarify the accounting for uncertainty in income taxes. In addition, they prescribe a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. They also provide guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. These provisions of ASC topic 740 are effective for fiscal years beginning after December 15, 2006. The Company adopted these provisions on January 1, 2007. The adoption decreased stockholder's equity by \$6,195.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("SFAS No. 157"). Effective July 1, 2009, SFAS No. 157 was superseded and replaced by certain provisions of ASC topic 820, "Fair Value Measurements and Disclosures" ("ASC topic 820"). These provisions enhance guidance for using fair value to measure assets and liabilities. These provisions also provide expanded information about the extent to which a company measures assets and liabilities at fair value, the information used to measure fair value and the effect of fair value measurements on earnings. These provisions of ASC topic 820 are applicable whenever other authoritative pronouncements require or permit assets or liabilities to be measured at fair value and are effective for fiscal years beginning after November 15, 2007. The Company adopted these provisions on January 1, 2008. The adoption did not have a material impact on the Company's financial position or results of its operations.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans" ("SFAS No. 158"). Effective July 1, 2009, SFAS No. 158 was superseded and replaced by certain provisions of ASC topic 715, "Compensation – Retirement Benefits" ("ASC topic 715"). For fiscal years ending after December 15, 2006, these provisions of ASC topic 715 require a company to recognize in its balance sheet an asset for a defined benefit postretirement plan's overfunded status or a liability for a plan's underfunded status and recognize changes in the funded status of a defined benefit postretirement plan in the other comprehensive income section of stockholder's equity in the year in which the changes occur, and provide additional disclosures. The Company adopted the recognition and disclosure provisions of these provisions of ASC topic 715 as of December 31, 2006, decreasing accumulated other comprehensive income (loss) by \$6,734. In addition, for fiscal years ended after December 15, 2008, these provisions of ASC topic 715 require a company to measure a defined benefit postretirement plan's assets and obligations that determine its funded status as of the end of its fiscal year. The Company adopted these measurement provisions for its fiscal year ended December 31, 2008, decreasing stockholder's equity by \$206. The adoption did not affect the results of operations for the years ended December 31, 2008, 2007, or 2006.

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115" ("SFAS No.159"). Effective July 1, 2009, SFAS No. 159 was superseded and replaced by certain provisions of ASC topic 825, "Financial Instruments" ("ASC topic 825"). These provisions of ASC topic 825 permit an entity to measure financial instruments and certain other items at estimated fair value. Most of these provisions are elective; however, certain amendments to ASC topic 320, "Investments - Debt and Equity Securities" ("ASC topic 320") apply to all entities that own trading and available-for-sale securities. The fair value option permits an entity to measure eligible items at fair value as of specified election dates. The fair value option (a) may generally be applied instrument by instrument, (b) is irrevocable unless a new election date occurs, and (c) must be applied to the entire instrument and not to only a portion of the instrument. These provisions of ASC topic 825 are effective as of the beginning of the first fiscal year that begins after November 15, 2007. The Company adopted these provisions on January 1, 2008. The adoption did not have an impact on the Company's financial position or results of its operations.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141(R), "Business Combinations" ("SFAS No. 141(R)") and Statement of Financial Accounting Standards No. 160, "Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51" ("SFAS No. 160"). Effective July 1, 2009, SFAS No. 141(R) was superseded and replaced by certain provisions of ASC topic 805, "Business Combinations" ("ASC topic 805"). Effective July 1, 2009, SFAS No. 160 was superseded and replaced by certain provisions of ASC topic 810, "Consolidation", ("ASC topic 810"). These provisions of the codification topics change the accounting for and reporting of business combination transactions and non-controlling (minority) interests in consolidated financial statements. Some of the significant changes include the recognition of 100% percent of the fair value of assets acquired, liabilities assumed and non-controlling interest of acquired businesses; recognition of contingent consideration arrangements at their acquisition date fair values, with subsequent changes in fair value reflected in net income; recognition of acquisition related transaction costs as expense when incurred; and recognition of acquisition related restructuring cost accruals in acquisition accounting only if certain criteria are met as of the acquisition date. These provisions of ASC topic 805 and ASC topic 810 are required to be adopted simultaneously and are effective for fiscal years beginning after December 15, 2008. The Company adopted these provisions of the codification topics for its fiscal year beginning January 1, 2009. The adoption of these provisions of ASC topic 805 and ASC topic 810 did not have an impact on the Company's consolidated financial position or the results of its operations.

In February 2008, the FASB issued Staff Position No. 157-2, "Effective Date of FASB Statement No. 157" ("FSP No. 157-2"). Effective July 1, 2009, FSP No. 157-2 was superseded and replaced by certain provisions of ASC topic 820, "Fair Value Measurements and Disclosures" ("ASC topic 820"). These provisions of ASC topic 820 defer the effective date for all nonrecurring fair value measurements of non-financial assets and non-financial liabilities until fiscal years beginning after November 15, 2008. Non-financial assets include assets associated with business acquisitions and impairment testing of tangible and intangible assets. The Company adopted these provisions of ASC topic 820 for its fiscal year beginning January 1, 2009. The adoption of these provisions of ASC topic 820 did not have a material impact on the Company's consolidated financial position or the results of its operations.

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, "Disclosures About Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133" ("SFAS No. 161"). Effective July 1, 2009, SFAS No. 161 was superseded and replaced by certain provisions of ASC topic 815, "Derivatives and Hedging" ("ASC topic 815"). These provisions of ASC topic 815 apply to all derivative instruments and related hedged items. These provisions of ASC topic 815 require entities to provide enhanced disclosures regarding (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for and (c) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. These provisions of ASC topic 815 are effective for fiscal years beginning after November 15, 2008. The Company adopted these provisions of ASC topic 815 for its fiscal year beginning January 1, 2009.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

In April 2008, the FASB issued Staff Position No. FAS 142-3, "Determination of the Useful Life of Intangible Assets" ("FSP FAS No. 142-3"). Effective July 1, 2009, FSP FAS No. 142-3 was superseded and replaced by certain provisions of ASC topic 350, "Intangibles - Goodwill and Other" ("ASC topic 350"). These provisions of ASC topic 350 require, among other things, the amendment of factors that must be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. In determining the useful life of an intangible asset for amortization purposes, an entity shall consider, among other things, the periods of expected cash flows, adjusted for certain entity-specific factors. These provisions of ASC topic 350 are effective for fiscal years beginning after December 15, 2008. The Company adopted these provisions of ASC topic 350 for its fiscal year beginning January 1, 2009. The adoption of these provisions of ASC topic 350 did not have an impact on the Company's consolidated financial position or the results of its operations.

In October 2008, the FASB issued Staff Position No. 157-3, "Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active" ("FSP No. 157-3"). Effective July 1, 2009, FSP No. FAS 157-3 was superseded and replaced by certain provisions of ASC topic 820. These provisions of ASC topic 820 apply to financial assets within the scope of accounting pronouncements that require or permit fair value measurements. These provisions of ASC topic 820 clarify when a market that is not active and provide an example to illustrate key conditions in determining the fair value of a financial asset when the market for that financial asset is not active. These provisions became effective upon issuance including prior periods for which financial statements have not been issued. The Company adopted these provisions effective September 30, 2008. The adoption did not have a material impact on the Company's financial position or results of its operations.

In December 2008, the FASB issued Staff Position No. FAS 132(R)-1, "Employers' Disclosures About Postretirement Benefit Plan Assets" ("FSP No. FAS 132(R)-1"). Effective July 1, 2009, FSP No. FAS 132(R)-1 was superseded and replaced by certain provisions of ASC topic 715, "Compensation - Retirement Benefits" ("ASC topic 715"). Certain provisions of ASC topic 715 require, among other things, additional disclosures about assets held in an employer's defined benefit pension plan including disclosures regarding investment policies and strategies, categories of plan assets, fair value measurements of plan assets and significant concentrations of risk. The requirements of ASC topic 715 relating to these disclosures are effective for fiscal years ending after December 15, 2009. The Company adopted these provisions of ASC topic 715 for its fiscal year ending December 31, 2009. The adoption of these provisions of ASC topic 715 did not have an impact on the Company's consolidated financial position or the results of its operations.

In January 2009, the FASB issued EITF 99-20-1, "Amendments to the Impairment Guidance of EITF Issue No. 99-20" ("EITF 99-20-1"). Effective July 1, 2009, EITF 99-20-1 was superseded and replaced by certain provisions of ASC topic 325, "Investments - Other" ("ASC topic 325"). These provisions of ASC topic 325 are an interpretative amendment to impairment guidance and align impairment guidance to that of ASC topic 320, "Investments - Debt and Equity Securities" ("ASC topic 320"). These provisions are effective for reporting periods ending after December 15, 2008. The Company adopted these provisions for its year ended December 31, 2008. The adoption did not have an impact on the Company's financial position or results of its operations.

In April 2009, the FASB issued Staff Position No. FAS 157-4, "Determining Fair Value When the Volume and Level of Activity for an Asset or Liability Have Significantly Decreased and Identifying Transactions That are Not Orderly" ("FSP No. FAS 157-4"). Effective July 1, 2009, FSP No. FAS 157-4 was superseded and replaced by certain provisions of ASC topic 820. These provisions of ASC topic 820 relate to determining fair values when there is no active market or where the price inputs being used represent distressed sales. These provisions of ASC topic 820 reaffirm the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. These provisions of ASC topic 820 apply to all assets and liabilities within the scope of accounting pronouncements that require or permit fair value measurements. The provisions of ASC topic 820 that relate to the determination of fair value when the volume and level of activity for an asset or liability have significantly decreased and identifying transactions that are not orderly, is effective for interim and annual periods ending after June 15, 2009. The Company adopted these provisions of ASC topic 820 relating to these considerations for its fiscal quarter ended June 30, 2009. The adoption of ASC topic 820 relating to these considerations did not have a material impact on the Company's fair value measurements.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

In April 2009, the FASB issued Staff Position No. FAS 115-2 and FAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments" ("FSP No. FAS 115-2 and FAS 124-2"). Effective July 1, 2009, FSP No. FAS 115-2 and FAS 124-2 was superseded and replaced by certain provisions of ASC topic 320, "Investments - Debt and Equity Securities" ("ASC topic 320"). These provisions of ASC topic 320 require companies, among other things, to bring greater consistency to the timing of impairment recognition and provide for greater clarity about the credit and non-credit components of impaired debt securities that are not expected to be sold. These provisions of ASC topic 320 also require increased and timelier disclosures regarding expected cash flows, credit losses and an aging of securities with unrealized losses. These provisions of ASC topic 320 are effective for interim and annual periods ending after June 15, 2009. The Company adopted these provisions of ASC topic 320 for its fiscal quarter ended June 30, 2009 and recognized the effect of applying them as a change in accounting principle. The Company recognized an \$8,528, net of income taxes, cumulative effect adjustment upon initially applying these provisions of ASC topic 320 as an increase to retained earnings with a corresponding decrease to accumulated other comprehensive income (loss).

In May 2009, the FASB issued Statement of Financial Accounting Standards No. 165, "Subsequent Events" ("SFAS No. 165"). Effective July 1, 2009, SFAS No.165 was superseded and replaced by certain provisions of ASC topic 855, "Subsequent Events" ("ASC topic 855"). These provisions of ASC topic 855 require companies to establish principles and requirements for subsequent events. Specifically, these provisions of ASC topic 855 require the disclosure of the period after the balance sheet date through which management has evaluated events and transactions that may occur for potential recognition or disclosure in a company's financial statements. In addition, these provisions of ASC topic 855 provide the circumstances under which the disclosures are required of an entity regarding events and circumstances that have occurred after the balance sheet date but before financial statements are issued or are available to be issued. These provisions of ASC topic 855 are effective for interim or annual financial periods ending after June 15, 2009. The Company adopted these provisions of ASC topic 855 for its fiscal quarter ended June 30, 2009. The adoption of these provisions of ASC topic 855 did not have an impact on the Company's consolidated financial position or the results of its operations.

Future adoption of new accounting pronouncements

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 166 "Accounting for Transfers of Financial Assets - an amendment of FASB Statement No. 140" ("SFAS No. 166"). Effective July 1, 2009, SFAS No.166 was superseded and replaced by certain provisions of ASC topic 860, "Transfers and Servicing" ("ASC topic 860"). Among other things, provisions of ASC topic 860 improve the relevance, representational faithfulness and comparability of the information that a reporting entity provides in its financial statements about a transfer of financial assets, the effects of a transfer on its financial position, financial performance and cash flows, and a transferor's continuing involvement, if any, in transferred financial assets. The ASC topic 860 has been further amended relating to derecognition guidance and eliminating the exemption from consolidation for qualifying special-purpose entities. These amendments to ASC topic 860 are effective as of the beginning of interim and annual reporting periods that begin after November 15, 2009. The Company adopted the amended provisions of ASC topic 860 for its fiscal year beginning January 1, 2010. The adoption of these provisions of ASC topic 860 did not have a material impact on the Company's consolidated financial position or the results of its operations.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 167 “Amendments to FASB Interpretation No. 46(R)” (“SFAS No. 167”). Effective July 1, 2009, SFAS No. 167 was superseded and replaced by certain provisions of ASC topic 810. These provisions of ASC topic 810 require reconsideration of whether an enterprise was the primary beneficiary of a variable interest entity (“VIE”) only when specific events had occurred. The amended provisions of ASC topic 810 change the consolidation guidance applicable to a VIE. They also amend the guidance governing the determination of whether an entity is the primary beneficiary of a VIE, and is, therefore, required to consolidate the VIE. The amended provisions of ASC topic 810 also requires enhanced disclosures about an entity’s involvement with a VIE. The amended provisions of ASC topic 810 are effective as of the beginning of interim and annual reporting periods that begin after November 15, 2009. The Company adopted the amended provisions of ASC topic 810 for its fiscal year beginning January 1, 2010. The adoption of these provisions of ASC topic 810 did not have a material impact on the Company’s consolidated financial position or the results of its operations. In January 2010, the FASB moved to finalize an Accounting Standards Update (“ASU”) to defer the effective date of ASC topic 810 as it relates to a reporting enterprise’s interest in certain entities and for certain money market mutual funds.

3. Discontinued Operations

On April 1, 2008, the Company and certain of its subsidiaries completed the sale of substantially all of their healthcare insurance business to a subsidiary of CIGNA Corporation (“CIGNA”) for \$1.5 billion in cash. During the year ended December 31, 2008, the Company recognized a gain in the amount of \$681,528, net of income taxes, upon completion of the transaction. Income from discontinued operations for the year ended December 31, 2008 includes charges in the amount of \$63,739, net of income taxes, related to costs associated with the sale. The business that was sold, formerly reported as the Company’s Healthcare segment, was the vehicle through which it marketed and administered group life and health insurance to small, mid-sized and national employers. CIGNA acquired from the Company the stop loss, group life, group disability, group medical, group dental, group vision, group prescription drug coverage and group accidental death and dismemberment insurance business in the United States and the Company’s supporting information technology infrastructure through a combination of 100% indemnity reinsurance agreements, renewal rights, related administrative service agreements and the acquisition of certain of the Company’s subsidiaries. The Company retained a small portion of its healthcare business and reports it within its Individual Markets segment. As discussed in Note 17, the Company’s business is now comprised of its Individual Markets, Retirement Services and Other segments. The statements of income and balance sheets of the disposed business activities are presented as discontinued operations for all periods presented in the consolidated financial statements.

In addition, the Company and CIGNA entered into a Transition Services Agreement (the “Transition Agreement”) whereby the Company will provide certain information technology and administrative and legal services on behalf of CIGNA for a period of up to twenty-four months. CIGNA pays the Company pre-determined monthly fees for these services and reimburses it for other expenditures it makes under the terms of the Transition Agreement.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The following table summarizes the classifications of assets and liabilities of discontinued operations at December 31, 2009 and 2008:

| | December 31, | |
|----------------------------|--------------|------------|
| | 2009 | 2008 |
| Assets | | |
| Reinsurance receivable | \$ 87,719 | \$ 124,089 |
| Total assets | \$ 87,719 | \$ 124,089 |
| Liabilities | | |
| Future policy benefits | \$ 56,219 | \$ 39,776 |
| Policy and contract claims | 31,500 | 84,313 |
| Total liabilities | \$ 87,719 | \$ 124,089 |

The following table summarizes selected financial information included in income from discontinued operations in the consolidated statements of income for the years ended December 31, 2009, 2008 and 2007:

| | Year Ended December 31, | | |
|---|-------------------------|------------|--------------|
| | 2009 | 2008 | 2007 |
| Revenues from discontinued operations | \$ - | \$ 317,658 | \$ 1,343,961 |
| Benefits and expenses from discontinued operations | - | 346,398 | 1,165,108 |
| Income (loss) from discontinued operations, net of income tax expense (benefit) \$ - , (\$19,258), and \$85,707 | - | (28,740) | 178,853 |
| Gain on sale of discontinued operations, net of income taxes of \$ - , \$408,094 and \$ - | - | 681,528 | - |
| Income from discontinued operations | \$ - | \$ 652,788 | \$ 178,853 |

The Company adopted a restructuring plan in connection with the sale of its Healthcare segment. The restructuring plan consisted of a structural reorganization which will enable the Company to operate effectively in its present business environment. The liability is included in other liabilities in the consolidated balance sheets. The amounts incurred during the period and adjustments to original estimates during the period have been charged (credited) to income from discontinued operations in the consolidated statement of income for the year ended December 31, 2008. At December 31, 2009, the restructuring plan was substantially complete.

The following is a reconciliation of the liability that the Company recorded related to the restructuring plan:

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

| | Severance, retention and other employee related costs |
|--|---|
| Balance, April 1, 2008 | \$ - |
| Amount incurred | 49,202 |
| Adjustments to original estimates, net | (6,268) |
| Cash payments and other settlements | (30,222) |
| Balance, December 31, 2008 | 12,712 |
| Cash payments and other settlements | (13,283) |
| Other adjustments | 1,726 |
| Balance, December 31, 2009 | \$ 1,155 |

The Company incurred net expenses in the amount of \$42,934 during the year ended December 31, 2008 related to the restructuring plan and does not anticipate incurring significant additional costs in the future. The restructuring plan is substantially complete at December 31, 2009.

4. Undistributed Earnings on Participating Business

During the first quarter of 2008, the liability for undistributed earnings on participating business decreased by \$207,785 in connection with a long-standing assumption reinsurance agreement under which the Company had reinsured a block of participating policies. In addition, the agreement also required the Company to perform an analysis as of March 31, 2008, to determine whether the policyholders were eligible for a special dividend. Based on the Company's analysis, it was determined that a special dividend was not required and, accordingly, the liability was released. An income tax provision was recorded on the undistributed earnings when those earnings occurred. Accordingly, there was no income tax provision recorded at the time of the liability release. On January 1, 2008, the Company began recognizing the net earnings on these policies in its net income. A liability for undistributed earnings on participating business remains for those participating policies that are not subject to this reinsurance agreement.

5. Related Party Transactions

Included in the consolidated balance sheets at December 31, 2009 and 2008 are the following related party amounts:

| | December 31, | |
|------------------------|--------------|------------|
| | 2009 | 2008 |
| Reinsurance receivable | \$ 452,510 | \$ 425,369 |
| Future policy benefits | 2,293,712 | 2,393,013 |

Included in the consolidated statements of income for the years ended December 31, 2009, 2008 and 2007 are the following related party amounts:

(Dollars in Thousands)

| | Year Ended December 31, | | |
|---|-------------------------|------------|----------------|
| | 2009 | 2008 | 2007 |
| Premium income, net of related party premiums ceded of \$3,411, \$3,662, and \$1,391,518 | \$ 137,085 | \$ 155,752 | \$ (1,146,908) |
| Life and other policy benefits, net of reinsurance recoveries of \$7,415, \$7,356 and \$737 | 118,624 | 120,999 | 103,765 |
| Increase (decrease) in future policy benefits | (45,960) | (42,180) | (1,539,777) |

The Company provides administrative and operational services for the United States operations of The Great-West Life Assurance Company (“GWL”) and the United States operations of The Canada Life Assurance Company (“CLAC”), wholly-owned subsidiaries of Lifeco. The Company also provides investment services for London Reinsurance Group, an indirect subsidiary of GWL. The following table presents revenue and expense reimbursement from related parties for services provided pursuant to these service agreements for the years ended December 31, 2009, 2008 and 2007. These amounts, in accordance with the terms of the various contracts, are based upon estimated costs incurred, including a profit charge, and resources expended based upon the number of policies, certificates in-force and/or administered assets.

| GWL&A Financial Inc. ² | Surplus note | May 2046 | 333,400 | 333,400 |
| GWL&A Financial Inc. | Note interest | May 2010 | 4,701 | 4,701 |
| Great-West Lifeco Finance LP II | On account | On demand | 2,223 | - |
| The Great-West Life Assurance Company | On account | On demand | 1,352 | - |
| The Canada Life Assurance Company | On account | On demand | 1,669 | 1,563 |
| Total | | | <u>\$ 537,563</u> | <u>\$ 533,870</u> |

¹ A note payable to GWL&A Financial was issued as a surplus note on November 15, 2004, with a face amount of \$195,000 and carrying amounts of \$194,218 and \$194,206 at December 31, 2009 and 2008, respectively. The surplus note bears interest at the rate of 6.675% per annum, payable in arrears on each May 14 and November 14. The note matures on November 14, 2034.

² A note payable to GWL&A Financial was issued as a surplus note on May 19, 2006, with a face amount and carrying amount of \$333,400. The surplus note bears interest initially at the rate of 7.203% per annum, payable in arrears on each May 16 and November 16 until May 16, 2016. After May 16, 2016, the surplus note bears an interest rate of 2.588% plus the then-current three-month London Interbank Offering Rate. The surplus note is redeemable by the Company at the principal amount plus any accrued and unpaid interest after May 16, 2016. The note matures on May 16, 2046.

Payments of principal and interest under the surplus notes shall be made only out of surplus funds of the Company and only with prior written approval of the Commissioner of Insurance of the State of Colorado when the Commissioner of Insurance is satisfied that the financial condition of the Company warrants such action pursuant to applicable Colorado law. Payments of principal and interest on the surplus notes are payable only if at the time of such payment and after giving effect to the making thereof, the Company's surplus would not fall below two and one half times the authorized control level as required by the most recent risk-based capital calculations.

Interest expense attributable to these related party debt obligations was \$37,042, for each of the three years ended December 31, 2009.

On June 1, 2007, the Company's Individual Markets segment terminated its reinsurance agreement with an affiliate, CLAC, pursuant to which it had assumed 80% of certain United States life, health and annuity business on a coinsurance and coinsurance with funds withheld basis. The Company recorded, at fair value, the following in its consolidated statement of income in connection with the termination of the reinsurance agreement:

| | |
|---|------------------|
| Premium income | \$ (1,387,179) |
| Net investment income | 58,569 |
| Net realized losses on investments | (14,797) |
| Total revenues | (1,343,407) |
| Decrease in reserves | (1,453,145) |
| Provision for policyholders' share of earnings on participating business | 8,161 |
| Amortization of deferred acquisition costs and value of business acquired | 62,961 |
| Total benefits and expenses | (1,382,023) |

The Company's wholly owned subsidiary, Great-West Life & Annuity Insurance Company of South Carolina ("GWSC") and CLAC are parties to a reinsurance agreement pursuant to which GWSC assumes term life insurance from CLAC. GWL&A Financial obtained two letters of credit for the benefit of the Company as collateral under the GWSC and CLAC reinsurance agreement for policy liabilities and capital support. The first letter of credit is for \$1,006,200 and renews annually until it expires on December 31, 2025. The second letter of credit is for \$70,000 and renews annually for an indefinite period of time. At December 31, 2009 and 2008 there were no outstanding amounts related to the letters of credit.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Included within reinsurance receivable in the consolidated balance sheets are \$407,154 and \$376,378 of funds withheld assets as of December 31, 2009 and 2008, respectively. CLAC pays the Company interest on the funds withheld balance at a rate of 4.55% per annum.

A subsidiary of the Company, GW Capital Management, LLC, serves as a Registered Investment Advisor to Maxim Series Fund, Inc. an affiliated open-end management investment company and to several affiliated insurance company separate accounts. Included in fee income on the consolidated statements of income is \$52,540, \$61,403 and \$73,495 of advisory and management fee income from these affiliated entities for the years ended December 31, 2009, 2008 and 2007, respectively.

The Company's separate accounts invest in shares of Maxim Series Fund, Inc. and Putnam Funds which are affiliates of the Company, and shares of other non-affiliated mutual funds and government and corporate bonds. The Company's separate accounts include mutual funds or other investment options that purchase guaranteed interest annuity contracts issued by the Company. During the years ended December 31, 2009 and 2008, these purchases totaled \$149,302 and \$64,723 respectively. As the general account investment contracts are also included in the separate account balances in the accompanying consolidated balance sheets, the Company has reduced the separate account assets and liabilities by \$364,233 and \$265,299 at December 31, 2009 and 2008, respectively, to eliminate these amounts in its consolidated balance sheets at those dates.

On September 30, 2009, the Company's wholly-owned subsidiary, Canada Life Insurance Company of America, merged into GWLA with GWLA being the surviving entity. The completion of the merger did not have an impact on the Company's consolidated financial statements.

6. Summary of Investments

The following table summarizes fixed maturity investments and equity securities classified as available-for-sale and the amount of other-than-temporary impairments ("OTTI") included in accumulated other comprehensive income (loss) ("AOCI") at December 31, 2009:

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

See Note 7 for additional information on policies regarding estimated fair value of fixed maturity and equity investments.

The amortized cost and estimated fair value of fixed maturity investments classified as available-for-sale at December 31, 2009, by contractual maturity date, are shown in the table below. Actual maturities will likely differ from these projections because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

| | December 31, 2009 | |
|---|----------------------|-------------------------|
| | Amortized cost | Estimated fair value |
| Maturing in one year or less | \$ 608,935 | \$ 635,230 |
| Maturing after one year through five years | 2,790,982 | 2,950,213 |
| Maturing after five years through ten years | 2,759,990 | 2,926,744 |
| Maturing after ten years | 2,317,073 | 2,185,437 |
| Mortgage-backed and asset-backed securities | 5,640,819 | 5,220,189 |
| | <u>\$ 14,117,799</u> | <u>\$ 13,917,813</u> |

Mortgage-backed and asset-backed securities include collateralized mortgage obligations that consist primarily of sequential and planned amortization classes with final stated maturities up to thirty years and expected average lives of up to fifteen years.

The following table summarizes information regarding the sales of fixed maturity investments classified as available-for-sale for the years ended December 31, 2009, 2008 and 2007:

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

| | Year Ended December 31, | | |
|---|-------------------------|--------------|--------------|
| | 2009 | 2008 | 2007 |
| Proceeds from sales | \$ 2,258,653 | \$ 2,696,635 | \$ 2,488,042 |
| Gross realized investment gains from sales | 42,375 | 50,173 | 30,834 |
| Gross realized investment losses from sales | (267) | (1,456) | (4,309) |

Gross realized gains and losses from sales were primarily attributable to changes in interest rates, sales of securities acquired in the current year and gains on repurchase agreement transactions. These gains and losses are determined on a specific identification basis.

The Company has fixed maturity securities with fair values in the amounts of \$7,979 and \$0 that have been non-income producing for the twelve months preceding December 31, 2009 and 2008, respectively. These securities were written down to their fair value in the period they were deemed to be other-than-temporarily impaired.

Derivative financial instruments - The Company makes limited use of derivative financial instruments for risk management purposes associated with its invested assets. Derivatives are not used for speculative purposes. While the Company purchases all derivatives as hedges to manage risk, hedge accounting has not been elected for some derivative transactions. To manage the Company's interest rate risk on certain floating rate debt securities, interest rate swap agreements are used to effectively convert the floating rate on the underlying asset to a fixed rate. In order to manage the risk of a change in the fair value of certain assets, interest rate futures are utilized. Interest rate futures are also used to manage the interest rate risks of forecasted acquisitions of fixed rate maturity investments. Foreign currency exchange rate risk associated with bonds denominated in other than U.S. dollars is managed through the use of foreign currency exchange contracts. Interest rate swaptions are used to manage the potential variability in future interest payments on certain insurance products due to a change in credited interest rates and the related change in cash flows due to increased surrenders. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one party to the other on a daily basis, periodic payment dates, or at the due date, expiration or termination of the agreement.

The Company controls the credit risk of its derivative contracts through credit approvals, limits, monitoring procedures and in some cases, requiring collateral. The Company's exposure is limited to the portion of the fair value of derivative instruments which exceeds the value of the collateral held and not to the notional or contractual amounts of the derivatives. Counterparty credit risk was evaluated and fair values were adjusted accordingly at December 31, 2009 and 2008. As the Company enters into derivative transactions only with high quality institutions, no realized losses associated with non-performance of derivative financial instruments have occurred. The Company had no derivatives with credit-risk-related contingent features at either December 31, 2009 or 2008.

Interest rate swaptions in a net asset position have cash pledged as collateral to the Company in accordance with the collateral support agreements with the counterparty. As of December 31, 2009, the \$4.3 million unrestricted cash received is included in other assets and the obligation to return is included in other liabilities.

The Company may purchase a financial instrument that contains a derivative instrument that is "embedded" in the financial instrument. Upon purchasing the instrument, the Company determines if (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument. If the Company determines that these conditions are met, the embedded derivative is bifurcated from the host contract and accounted for as a freestanding derivative.

Fair value hedges - Interest rate futures are used to manage the risk of the change in the fair value of certain fixed rate maturity investments. The Company's derivatives treated as fair value hedges are eligible for hedge accounting. Changes in the fair value of the hedging derivative, including amounts measured as ineffective, and changes in the fair value of the hedged item are reported within net investment income. Hedges closed are reported in realized investment gains (losses).

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The Company's use of derivatives treated as fair value hedges has been nominal during the last three years. There was no hedge ineffectiveness during the years ended December 31, 2009, 2008 and 2007.

Cash flow hedges - Interest rate swap agreements are used to convert the interest rate on certain debt securities from a floating rate to a fixed rate. Foreign currency exchange contracts are used to manage the foreign exchange rate risk associated with bonds denominated in other than U.S. dollars. Interest rate futures are used to manage the interest rate risks of forecasted acquisitions of fixed rate maturity investments. Unrealized derivative gains and losses from the effective portion of cash flow hedges are included in accumulated other comprehensive income (loss) and are reclassified into earnings at the time interest income is recognized on the hedged item.

Hedge ineffectiveness in the amount of \$6, \$1,510 and \$606 was recorded as an increase to net investment income during the years ended December 31, 2009, 2008, and 2007, respectively.

Derivative net gains in the amounts of \$606 and \$4,732 were reclassified to net investment income during the years ended December 31, 2009 and 2008, respectively while a derivative net loss in the amount of \$1,275 was reclassified to net investment income during the year ended December 31, 2007. As of December 31, 2009, the Company estimates that \$8,828 of net derivative gains included in accumulated other comprehensive income (loss) will be reclassified into net income within the next twelve months.

Derivatives not designated as hedging instruments - The Company attempts to match the timing of when interest rates are committed on insurance products with other new investments. However, timing differences may occur and can expose the Company to fluctuating interest rates. To offset this risk, the Company uses U.S. Treasury futures contracts. The Company also utilizes U.S. Treasury futures as a method of adjusting the duration of the overall portfolio. Interest rate swaptions are used to manage the potential variability in future interest payments on certain insurance products due to a change in credited interest rates and the related change in cash flows due to increased surrenders. Although management believes the above-mentioned derivatives are effective hedges from an economic standpoint, they do not meet the requirements for hedge accounting treatment. Changes in the fair value of a derivative instrument that has not been designated as a hedging instrument are recorded in current period net investment income and total realized investment gains (losses).

During the years ended December 31, 2009, 2008 and 2007, decreases in the amounts of \$2,627, \$0 and \$75, respectively, were recognized in net income from market value changes of derivatives not receiving hedge accounting treatment.

The following tables summarize derivative financial instruments at December 31, 2009 and 2008:

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Mortgage loans - In 2009, the average balance of impaired mortgage loans during the year was \$289. There were no impaired mortgage loans at December 31, 2008 or December 31, 2007.

The following table summarizes activity in the allowance for mortgage loan credit losses for the years 2009, 2008 and 2007:

| | Year Ended December 31, | | |
|-----------------------|-------------------------|-----------------|-----------------|
| | 2009 | 2008 | 2007 |
| Balance, January 1 | \$ 8,834 | \$ 9,448 | \$ 15,661 |
| Release of provision | (152) | (614) | (6,213) |
| Increase of provision | 6,172 | - | - |
| Balance, December 31 | <u>\$ 14,854</u> | <u>\$ 8,834</u> | <u>\$ 9,448</u> |

The changes to the allowance for mortgage loan credit losses are recorded in net realized gains (losses) on investments.

Equity investments - The carrying value of the Company's equity investments was \$25,679 and \$17,790 at December 31, 2009 and 2008, respectively.

Limited partnership interests and limited liability corporation interests - Limited partnership interests are accounted for using the cost method of accounting. The Company uses this method since it has a minor equity interest and virtually no influence over the entity's operations. Also included in limited partnership interests are limited partnerships established for the purpose of investing in low-income housing that qualify for federal and state tax credits. These securities are carried at amortized cost as determined using the effective yield method. At December 31, 2009 and 2008, the Company had \$253,605 and \$293,956, respectively, invested in limited partnerships and limited liability corporations.

The Company makes commitments to fund partnership interests in the normal course of its business. The amounts of unfunded commitments at December 31, 2009 and 2008 were \$27,034 and \$33,289, respectively.

Securities pledged, special deposits and securities lending - The Company pledges investment securities it owns to unaffiliated parties related to interest rate futures transactions. The fair value of margin deposits related to futures contracts was approximately \$4,955 and \$1,600 at December 31, 2009 and 2008, respectively.

The Company had securities on deposit with governmental authorities as required by certain insurance laws with fair values in the amounts of \$13,599 and \$37,220 at December 31, 2009 and 2008, respectively.

The Company participates in a securities lending program whereby securities, which are included in invested assets in the accompanying consolidated balance sheets, are loaned to third parties. Securities with a cost or amortized cost in the amounts of \$34,940 and \$32,788 and estimated fair values in the amounts of \$37,081 and \$41,321 were on loan under the program at December 31, 2009 and 2008, respectively. The Company received restricted cash collateral in the amounts of \$38,296 and \$43,205 at December 31, 2009 and 2008, respectively.

Impairment of fixed maturity and equity investments classified as available-for-sale - The Company classifies the majority of its fixed maturity investments and all of its equity investments as available-for-sale and records them at fair value with the related net unrealized gain or loss, net of policyholder related amounts and deferred taxes, in accumulated other comprehensive income (loss) in the stockholder's equity section in the accompanying consolidated balance sheets. All available-for-sale securities with gross unrealized losses at the balance sheet date are subjected to the Company's process for the identification and evaluation of other-than-temporary impairments.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The assessment of whether an other-than-temporary impairment has occurred on securities where management does not intend to sell the fixed maturity investment and it is not more likely than not the Company will be required to sell the fixed maturity investment before recovery of its amortized cost basis, is based upon management's case-by-case evaluation of the underlying reasons for the decline in fair value. Management considers a wide range of factors, as described below, regarding the security issuer and uses its best judgment in evaluating the cause of the decline in its estimated fair value and in assessing the prospects for near-term recovery. Inherent in management's evaluation of the security are assumptions and estimates about the issuer's operations and ability to generate future cash flows. While all available information is taken into account, it is difficult to predict the ultimate recoverable amount from a distressed or impaired security.

Considerations used by the Company in the impairment evaluation process include, but are not limited to, the following:

- Fair value is below cost.
- The decline in fair value is attributable to specific adverse conditions affecting a particular instrument, its issuer, an industry or geographic area.
- The decline in fair value has existed for an extended period of time.
- The fixed maturity investment has been downgraded by a credit rating agency.
- The financial condition of the issuer has deteriorated.
- The payment structure of the fixed maturity investment and the likelihood of the issuer being able to make payments that increase in the future.
- Dividends have been reduced or eliminated or scheduled interest payments have not been made.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Fixed maturity investments - Total unrealized losses decreased by \$840,160 and the total number of securities in an unrealized loss position decreased by 2,010, or 80%, from December 31, 2008 to December 31, 2009. This significant decrease in unrealized losses was across most asset classes and reflects overall recovery in market liquidity and tightening of credit spreads, although the economic uncertainty in these markets still remains.

Unrealized losses on corporate fixed maturity investments decreased by \$398,761 from December 31, 2008 to December 31, 2009. The valuation of these securities has been significantly influenced by market conditions with increased liquidity and tightening of credit spreads. Management has classified these securities by sector, calculated as a percentage of total unrealized losses as follows:

| Sector | December 31, | |
|-------------------|--------------|------|
| | 2009 | 2008 |
| Finance | 77% | 51% |
| Utility | 10% | 20% |
| Natural resources | 4% | 9% |
| Consumer | 4% | 8% |
| Transportation | 2% | 4% |
| Other | 3% | 8% |
| | 100% | 100% |

All sectors across the corporate fixed maturity investment class had a decrease in unrealized losses. While the proportionate percentage in the finance sector increased, the actual unrealized losses decreased by \$146,978. The finance sector has recovered more slowly than the other sectors in 2009. At December 31, 2009, 57% of total unrealized losses on corporate debt securities (approximately \$122,795 of the \$216,886), were related to securities on which there has been a ratings downgrade since December 31, 2008. Of the downgraded securities, 47% (approximately \$57,135 of the \$122,795) continue to be rated BBB or above.

Unrealized losses on asset-backed, residential and commercial mortgage-backed securities decreased by \$283,041, \$51,145, and \$75,127 respectively, since December 31, 2008, generally due to tightening of credit spreads and increased market liquidity. Although markets have improved, the continued market disruption has influenced valuations at December 31, 2009. Unless otherwise noted below in the other-than-temporary impairment recognition section, the underlying collateral on the securities within the portfolio along with credit enhancement and/or guarantees is sufficient to expect full repayment of the principal. See Note 7 for additional discussion regarding fair value measurements.

Future recoveries in the fair value of all available-for-sale securities will be dependent upon the return of normal market liquidity and changes in general market conditions. While the decline in fair value has decreased, there has not yet been a full recovery in the markets and many unrealized losses have existed for longer than twelve months. The Company believes this is attributable to general market conditions and not reflective of the financial condition of the issuer or collateral backing the securities. The Company continually monitors its credit risk exposure to identify potential losses.

Equity investments - The decrease in unrealized losses of \$507 from December 31, 2008 to December 31, 2009 is primarily due to the financial services industry.

Other-than-temporary impairment recognition - The Company adopted ASC section 320-10-65 for its fiscal quarter ended June 30, 2009. The adoption resulted in the reclassification of the non-credit portion of previously recorded other-than-temporary impairments on securities held as of April 1, 2009. A cumulative effect adjustment of \$8,528 was recorded as an increase to retained earnings with a corresponding decrease to accumulated other comprehensive income (loss) in the consolidated statement of stockholder's equity. The following table summarizes the components of the cumulative effect adjustment:

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

| | |
|--|-----------------|
| Increase in amortized cost of fixed maturity available-for-sale securities | \$ 16,680 |
| Change in deferred acquisition costs and value of business acquired | (3,560) |
| Income tax | (4,592) |
| Net cumulative effect | <u>\$ 8,528</u> |

The Company recorded other-than-temporary impairments on fixed maturity investments of \$112,757, \$87,886 and \$34,485 during the years ended December 31, 2009, 2008 and 2007, respectively. Of the \$112,757, \$88,134 was credit-related other-than-temporary impairment on asset-backed securities with underlying collateral backed by home improvement loans guaranteed by Financial Guaranty Insurance Company. During 2009, \$13,422 was non-credit other-than-temporary impairment reclassified to other comprehensive income. During 2009, all other-than-temporary impairments on fixed maturity investments were related to continuing operations. Of the \$87,886 recorded during the years ended December 31, 2008, \$4,372 was related to discontinued operations and \$83,514 was related to continuing operations. The Company recorded other-than-temporary impairments on equity securities of \$7, \$3,512 and \$389 during the years ended December 31, 2009, 2008 and 2007, respectively.

The other-than-temporary impairments of fixed maturity securities where a portion was related to non-credit losses which were recognized in net realized capital gains (losses) in the consolidated statement of income, is summarized as follows:

| | |
|--|-------------------|
| Bifurcated credit loss balance, April 1, 2009 | \$ 43,871 |
| Non-credit losses reclassified out of retained earnings into AOCI | (16,680) |
| Additions: | |
| Initial impairments - credit loss recognized on securities not previously impaired | 88,134 |
| Bifurcated credit loss balance, December 31, 2009 | <u>\$ 115,325</u> |

The credit loss portion on fixed maturities was determined as the difference between the securities' amortized cost and the present value of expected future cash flows. These expected cash flows were determined using judgment and the best information available to the Company and were discounted at the securities' original effective interest rate. Inputs used to derive expected cash flows included default rates, credit ratings, collateral characteristics and current levels of subordination.

Net Investment Income

The following table summarizes net investment income for the years ended December 31, 2009, 2008 and 2007:

| | Year Ended December 31, | | |
|---|-------------------------|---------------------|---------------------|
| | 2009 | 2008 | 2007 |
| Investment income: | | | |
| Fixed maturity and short-term investments | \$ 795,323 | \$ 766,625 | \$ 782,013 |
| Equity investments | 532 | 1,240 | 2,260 |
| Mortgage loans on real estate | 85,116 | 73,838 | 66,994 |
| Policy loans | 244,140 | 218,687 | 205,772 |
| Limited partnership interests | 2,514 | 2,601 | 10,887 |
| Interest on funds withheld balances under reinsurance agreements | 18,779 | 14,413 | 21,199 |
| Change in fair value of an embedded derivative contained in a reinsurance agreement | - | - | (5,521) |
| Other, including interest income (expense) from related parties of \$(331), (\$444) and \$5,240 | 16,240 | 14,331 | 71,734 |
| | <u>1,162,644</u> | <u>1,091,735</u> | <u>1,155,338</u> |
| Investment expenses | (13,560) | (13,266) | (15,797) |
| Net investment income | <u>\$ 1,149,084</u> | <u>\$ 1,078,469</u> | <u>\$ 1,139,541</u> |

Realized Gains (Losses) on Investments

The following table summarizes net realized gains (losses) on investments for the years ended December 31, 2009, 2008 and 2007:

| | Year Ended December 31, | | |
|---|-------------------------|--------------------|-------------------|
| | 2009 | 2008 | 2007 |
| Net realized gains (losses): | | | |
| Fixed maturity and short-term investments | \$ (58,208) | \$ (30,797) | \$ (9,570) |
| Equity investments | 7 | (4,162) | (48) |
| Mortgage loans on real estate | 1,091 | 2,568 | 3,202 |
| Limited partnership interests | - | 1,112 | (38) |
| Other | (4,258) | 9,583 | 590 |
| Provision for mortgage impairments, net of recoveries | (6,172) | - | 3,836 |
| Net realized gains (losses) on investments | <u>\$ (67,540)</u> | <u>\$ (21,696)</u> | <u>\$ (2,028)</u> |

Included in net investment income are unrealized gains (losses) in the amounts of \$4,749, (\$969) and (\$205) on held-for-trading fixed maturity investments still held at December 31, 2009, 2008 and 2007, respectively.

Included in net investment income and net realized gains (losses) on investments are amounts allocable to the participating fund account. This allocation is based upon the activity in a specific block of invested assets that are segmented for the benefit of the participating fund account. The amounts of net investment income allocated to the participating fund account were \$4,799, \$4,823 and \$373,244 for the years ended December 31, 2009, 2008 and 2007, respectively. The amounts of net realized gains (losses) allocated to the participating fund account were \$234, \$177 and (\$4,669) for the years ended December 31, 2009, 2008 and 2007, respectively.

| Separate account liabilities | 18,886,901 | 18,886,901 | 15,121,943 | 15,121,943 |

Fixed maturity and equity securities

The fair values for public fixed maturity and equity securities are based upon quoted market prices or estimates from independent pricing services. However, in cases where quoted market prices are not readily available, such as for private fixed maturity investments, fair values are estimated. To determine estimated fair value for these instruments, the Company generally utilizes discounted cash flows calculated at current market rates on investments of similar quality and term. Fair value estimates are made at a specific point in time, based on available market information and judgments about financial instruments, including estimates of the timing and amounts of expected future cash flows and the credit standing of the issuer or counterparty. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts of the Company's financial instruments.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Short-term investments, securities lending agreements, repurchase agreements and commercial paper

The carrying value of short-term investments, collateral and payable under securities lending agreements, repurchase agreements and commercial paper is a reasonable estimate of fair value due to their short-term nature.

Mortgage loans on real estate

Mortgage loan fair value estimates are generally based on discounted cash flows. A discount rate matrix is incorporated whereby the discount rate used in valuing a specific mortgage generally corresponds to that mortgage's remaining term and credit quality. The rates selected for inclusion in the discount rate matrix reflect rates that the Company would quote if placing loans representative in size and quality to those currently in its portfolio.

Policy loans

Policy loans accrue interest at variable rates with no fixed maturity dates; therefore, estimated fair values approximate carrying values.

Other investments

Other investments include the Company's percentage ownership of a foreclosed lease interest in aircraft. The estimated fair value is based on the present value of anticipated lease payments plus the residual value of the aircraft. Also included in other investments is real estate held for investment. The estimated fair value is based on appraised value.

Derivative counterparty agreements

Included in other assets and other liabilities at December 31, 2009 is cash collateral received from counterparties and the obligation to return the cash collateral to the counterparties.

Derivative instruments

Included in other assets at December 31, 2009 and 2008 are derivative financial instruments in the amounts of \$23,150 and \$92,713, respectively. Included in other liabilities at December 31, 2009 and 2008 are derivative financial instruments in the amounts of \$3,317 and \$0, respectively. The estimated fair values of over-the-counter derivatives, primarily consisting of interest rate swaps and interest rate swaptions which are held for other than trading purposes, are the estimated amounts the Company would receive or pay to terminate the agreements at the end of each reporting period, taking into consideration current interest rates, counterparty credit risk and other relevant factors. Counterparty credit risk was evaluated and adjusted accordingly at both December 31, 2009 and 2008.

Reinsurance receivable

The carrying value of the reinsurance receivable is a reasonable estimate of fair value due to their short-term nature.

Annuity contract benefits without life contingencies

The estimated fair values of annuity contract benefits without life contingencies are estimated by discounting the projected expected cash flows to the maturity of the contracts utilizing risk-free spot interest rates plus a provision for credit risk.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Policyholders' funds

The estimated fair values of policyholders' funds are the same as the carrying amounts since the Company can change the interest crediting rates with thirty days notice.

Notes payable

The estimated fair values of the notes payable to GWL&A Financial are based upon discounted cash flows at current market rates on high quality investments.

Separate account assets and liabilities

Separate account assets and liabilities are adjusted to net asset value on a daily basis, which approximates fair value.

Fair value hierarchy

The Company's assets and liabilities recorded at fair value have been categorized based upon the following fair value hierarchy:

- Level 1 inputs utilize observable, quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Financial assets and liabilities utilizing Level 1 inputs include actively exchange-traded equity securities.
- Level 2 inputs utilize other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. The fair values for some Level 2 securities were obtained from a pricing service. The list of inputs used by the pricing service is reviewed on a quarterly basis. The pricing service inputs include, but are not limited to, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, offers and reference data. Level 2 securities include those priced using a matrix which are based on credit quality and average life, U.S. government and agency securities, restricted stock, some private equities, certain fixed maturity investments and some over-the-counter derivatives. See Note 6 for further discussions of derivatives and their impact on the Company's consolidated financial statements.
- Level 3 inputs are unobservable and include situations where there is little, if any, market activity for the asset or liability. The prices of the majority of Level 3 securities were obtained from single broker quotes and internal pricing models. Financial assets and liabilities utilizing Level 3 inputs include certain private equity, fixed maturity and over-the-counter derivative investments.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements

| Transfers in (out) of Level 3 | (16,682) | (7,464) | (98,930) | - | 11,951 | - | - |
| Balance, December 31, 2009 | \$ - | \$ 188,936 | \$ 392,365 | \$ 58,270 | \$ 1,729 | \$ (3,317) | \$ 9,960 |
| Total gains (losses) for the period included in net income attributable to the change in unrealized gains and losses relating to assets held at December 31, 2009 | \$ - | \$ - | \$ - | \$ - | \$ - | \$ - | \$ - |

¹ Includes derivative financial instruments.

Realized and unrealized gains and losses due to the changes in fair value on assets classified as Level 3 included in net income for the year ended December 31, 2009 are as follows:

| | Year Ended December 31, 2009 | |
|--|---|-----------------------------|
| | Net realized gains (losses) on investments | Net investment income |
| Realized and unrealized gains and losses included in net income for the period | \$ (87,587) | \$ - |

Non-recurring fair value measurements - At December 31, 2009, the Company held \$1,900 of cost basis in other assets comprised of head office properties which were impaired during the year. The property was recorded at estimated fair value and represents a non-recurring fair value measurement. The estimated fair value was categorized as Level 2 since the fair value was based on an independent third party appraisal. The Company has no liabilities measured at fair value on a non-recurring basis at December 31, 2009.

8. Reinsurance

In the normal course of its business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding risks to other insurance enterprises under excess coverage and coinsurance contracts. The Company retains a maximum liability in the amount of \$3,500 of coverage per individual life.

Ceded reinsurance contracts do not relieve the Company from its obligations to policyholders. The failure of reinsurers to honor their obligations could result in losses to the Company. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the reinsurers to minimize its exposure to significant losses from reinsurer insolvencies. At December 31, 2009 and 2008, the reinsurance receivables had carrying values in the amounts of \$573,963 and \$546,491, respectively. Included in these amounts are \$452,510 and \$425,369 at December 31, 2009 and 2008, respectively, associated with reinsurance agreements with related parties. At December 31, 2009 and 2008, 71% and 69% of the total reinsurance receivable was due from CLAC, respectively. There were no allowances for potential uncollectible reinsurance receivables at either December 31, 2009 or 2008. Included within life insurance in the tables below is a small portion of Healthcare business as discussed in Note 17.

9. Deferred Acquisition Costs and Value of Business Acquired

The following table summarizes activity in deferred acquisition costs ("DAC") and value of business acquired ("VOBA") for the years ended December 31, 2009, 2008 and 2007:

| | DAC | VOBA | Total |
|--------------------------------------|-------------------|------------------|-------------------|
| Balance, January 1, 2007 | \$ 451,215 | \$ 53,919 | \$ 505,134 |
| Capitalized additions | 73,062 | - | 73,062 |
| Amortization and writedowns | (128,575) | (6,995) | (135,570) |
| Unrealized investment (gains) losses | 1,121 | 118 | 1,239 |
| Purchase accounting adjustment | - | (563) | (563) |
| Balance, December 31, 2007 | <u>396,823</u> | <u>46,479</u> | <u>443,302</u> |
| Capitalized additions | 65,108 | - | 65,108 |
| Amortization and writedowns | (55,551) | 2,852 | (52,699) |
| Unrealized investment (gains) losses | 251,940 | 6,380 | 258,320 |
| Balance, December 31, 2008 | <u>658,320</u> | <u>55,711</u> | <u>714,031</u> |
| Capitalized additions | 80,977 | - | 80,977 |
| Amortization and writedowns | (64,837) | (1,161) | (65,998) |
| Unrealized investment (gains) losses | (242,085) | (5,881) | (247,966) |
| Balance, December 31, 2009 | <u>\$ 432,375</u> | <u>\$ 48,669</u> | <u>\$ 481,044</u> |

The estimated future amortization of VOBA for the years ended December 31, 2010 through December 31, 2014 is as follows:

| Year Ended December 31, | Amount |
|-------------------------|----------|
| 2010 | \$ 2,213 |
| 2011 | 2,421 |
| 2012 | 2,699 |
| 2013 | 2,929 |
| 2014 | 3,119 |

10. Goodwill and Other Intangible Assets

The balances of and changes in goodwill, all of which is within the Retirement Services segment, for the years ended December 31, 2009 and 2008 are as follows:

| | |
|--------------------------------------|-------------------|
| Balance, January 1, 2008 | \$ 101,655 |
| Purchase price accounting adjustment | 3,600 |
| Balance, December 31, 2008 and 2009 | <u>\$ 105,255</u> |

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The following tables summarize other intangible assets, all of which are within the Retirement Services segment, as of December 31, 2009 and 2008:

| | December 31, 2009 | | |
|-------------------------------|--------------------------|-----------------------------|-------------------|
| | Gross carrying amount | Accumulated amortization | Net book value |
| Customer relationships | \$ 36,314 | \$ (10,039) | \$ 26,275 |
| Preferred provider agreements | 7,970 | (4,613) | 3,357 |
| Total | \$ 44,284 | \$ (14,652) | \$ 29,632 |

| | December 31, 2008 | | |
|-------------------------------|--------------------------|-----------------------------|-------------------|
| | Gross carrying amount | Accumulated amortization | Net book value |
| Customer relationships | \$ 36,314 | \$ (7,249) | \$ 29,065 |
| Preferred provider agreements | 7,970 | (3,211) | 4,759 |
| Total | \$ 44,284 | \$ (10,460) | \$ 33,824 |

Amortization expense for other intangible assets included in general insurance expenses was \$4,192, \$4,725 and \$4,699 for the years ended December 31, 2009, 2008 and 2007, respectively. Except for goodwill, the Company has no intangible assets with indefinite lives.

The estimated future amortization of other intangible assets using current assumptions, which are subject to change, for the years ended December 31, 2010 through December 31, 2014 is as follows:

| Year Ended December 31, | Amount |
|-------------------------|----------|
| 2010 | \$ 3,996 |
| 2011 | 3,793 |
| 2012 | 3,590 |
| 2013 | 3,410 |
| 2014 | 3,215 |

11. Commercial Paper

The Company maintains a commercial paper program that is partially supported by a \$50,000 corporate credit facility (See Note 20).

The following table provides information regarding the Company's commercial paper program at December 31, 2009 and 2008:

| | December 31, | |
|------------------------------|--------------|-------------|
| | 2009 | 2008 |
| Commercial paper outstanding | \$ 97,613 | \$ 97,167 |
| Maturity range (days) | 7 - 20 | 6 - 28 |
| Interest rate range | 0.3% - 0.4% | 0.6% - 2.4% |

12. Stockholder's Equity and Dividend Restrictions

At December 31, 2009 and 2008, the Company had 50,000,000 shares of \$1 par value preferred stock authorized, none of which were issued or outstanding at either date. In addition, the Company has 50,000,000 shares of \$1 par value common stock authorized, 7,032,000 of which were issued and outstanding at both December 31, 2009 and 2008.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

GWLA's net income and capital and surplus, as determined in accordance with statutory accounting principles and practices as prescribed by the National Association of Insurance Commissioners, for the years ended December 31, 2009, 2008 and 2007 are as follows:

| | Year Ended December 31, | | |
|---------------------|-------------------------|------------|------------|
| | 2009 | 2008 | 2007 |
| | (Unaudited) | | |
| Net income | \$ 282,033 | \$ 247,957 | \$ 562,309 |
| Capital and surplus | 1,375,267 | 901,429 | 1,846,170 |

Dividends are paid as determined by the Board of Directors, subject to restrictions as discussed below. During the years ended December 31, 2009, 2008 and 2007, the Company paid dividends in the amounts of \$24,682, \$1,772,293 and \$604,983, respectively, to its parent company, GWL&A Financial. Dividends paid during 2008 were paid in part using the proceeds received from the sale of the Company's Healthcare business as discussed in Note 3.

The maximum amount of dividends that can be paid to stockholders by insurance companies domiciled in the State of Colorado, without prior approval of the Insurance Commissioner, is subject to restrictions relating to statutory capital and surplus and statutory net gain from operations. Unaudited statutory capital and surplus and net gain from operations at and for the year ended December 31, 2009 were \$1,375,267 and \$337,553, respectively. GWLA may pay up to \$337,553 (unaudited) of dividends during the year ended December 31, 2010 without the prior approval of the Colorado insurance commissioner. Prior to any payments of dividends, the Company seeks approval from the Colorado Insurance Commissioner.

13. Other Comprehensive Income

The following table presents the composition of other comprehensive income (loss) for the year ended December 31, 2009:

| | Year Ended December 31, 2009 | | |
|--|------------------------------|-----------------------|-------------------|
| | Before-tax Amount | Tax (Expense) Benefit | Net-of-tax Amount |
| Unrealized holding gains (losses) arising during the year on available-for-sale fixed maturity investments | \$ 1,174,693 | \$ (411,143) | \$ 763,550 |
| Net changes during the year related to cash flow hedges | (57,218) | 20,027 | (37,191) |
| Reclassification adjustment for (gains)losses realized in net income | 71,473 | (25,016) | 46,457 |
| Net unrealized gains (losses) | 1,188,948 | (416,132) | 772,816 |
| Future policy benefits, deferred acquisition costs and value of business acquired adjustments | (250,468) | 87,664 | (162,804) |
| Net unrealized gains (losses) | 938,480 | (328,468) | 610,012 |
| Employee benefit plan adjustment | 43,797 | (15,329) | 28,468 |
| Other comprehensive income (loss) | \$ 982,277 | \$ (343,797) | \$ 638,480 |

| Other comprehensive income (loss) | <u>\$ 69,078</u> | <u>\$ (24,177)</u> | <u>\$ 44,901</u> |

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

14. General Insurance Expenses

The following table summarizes the components of general insurance expenses for the years ended December 31, 2009, 2008 and 2007:

| | Year Ended December 31, | | |
|----------------------------------|-------------------------|------------|------------|
| | 2009 | 2008 | 2007 |
| Compensation | \$ 273,934 | \$ 282,502 | \$ 281,670 |
| Commissions | 114,461 | 118,978 | 128,003 |
| Premium and other taxes | 22,947 | 25,704 | 21,366 |
| Capitalization of DAC | (80,977) | (65,108) | (73,062) |
| Depreciation and amortization | 15,603 | 19,240 | 22,362 |
| Rent, net of sublease income | 6,767 | 3,875 | 5,752 |
| Other | 76,408 | 44,504 | 46,335 |
| Total general insurance expenses | \$ 429,143 | \$ 429,695 | \$ 432,426 |

15. Employee Benefit Plans

Defined Benefit Pension, Post-Retirement Medical and Supplemental Executive Retirement Plans - The Company has a noncontributory Defined Benefit Pension Plan covering substantially all of its employees that were hired before January 1, 1999. Pension benefits are based principally on an employee's years of service and compensation levels near retirement. The Company's policy for funding the defined benefit pension plans is to make annual contributions, which equal or exceed regulatory requirements.

The Company sponsors an unfunded Post-Retirement Medical Plan (the "Medical Plan") that provides health benefits to retired employees who are not Medicare eligible. The medical plan is contributory and contains other cost sharing features which may be adjusted annually for the expected general inflation rate. The Company's policy is to fund the cost of the medical plan benefits in amounts determined at the discretion of management.

The Company also provides supplemental executive retirement plans to certain key executives. These plans provide key executives with certain benefits upon retirement, disability or death based upon total compensation. The Company has purchased individual life insurance policies with respect to each employee covered by this plan. The Company is the owner and beneficiary of the insurance contracts.

Prior to the adoption of the measurement provisions of ASC topic 715 for its year ended December 31, 2008, the Company utilized a November 30 measurement date for the Defined Benefit Pension and Post-Retirement Medical plans. Upon adoption of the measurement provision of ASC topic 715, the Company changed the measurement date to correspond to the end of its fiscal year, December 31. The impact of adopting the measurement date provisions of ASC 715 was a decrease to stockholder's equity of \$206. Prepaid benefit costs and intangible assets are included in other assets and accrued benefit costs and unfunded status amounts are included in other liabilities in the accompanying consolidated balance sheets.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The following tables provide a reconciliation of the changes in the benefit obligations, fair value of plan assets and the under funded status for the Company's Defined Benefit Pension, Post-Retirement Medical and Supplemental Executive Retirement plans as of the years ended December 31, 2009 and 2008:

| | Defined benefit pension plan | | Post-retirement medical plan | | Supplemental executive retirement plan | | Total | |

| Funded (under funded) status at December 31 | \$ (67,200) | \$ (101,413) | \$ (12,136) | \$ (16,483) | \$ (44,430) | \$ (45,765) | \$ (123,766) | \$ (163,661) |

A recovery in market liquidity has resulted in improved market values for the Company's Defined Benefit Pension Plan assets since December 31, 2008.

The following table presents amounts recognized in the consolidated balance sheets at December 31, 2009 and 2008 for the Company's Defined Benefit Pension, Post-retirement Medical and Supplemental Executive Retirement plans:

| | Defined benefit pension plan | | Post-retirement medical plan | | Supplemental executive retirement plan | | Total | |
|--|------------------------------|-----------|------------------------------|--------|--|---------|----------|-----------|
| | 2009 | 2008 | 2009 | 2008 | 2009 | 2008 | 2009 | 2008 |
| Amounts recognized in consolidated balance sheets: | | | | | | | | |
| Accumulated other comprehensive (expense)income (loss) | (79,353) | (116,920) | 17,964 | 14,925 | (4,484) | (7,676) | (65,873) | (109,671) |

The accumulated benefit obligation for the Defined Benefit Pension Plan was \$303,352 and \$289,525 at December 31, 2009 and 2008, respectively.

The following table provides information regarding amounts in accumulated other comprehensive income that have not yet been recognized as

components of net periodic benefit costs at December 31, 2009:

| | Defined benefit pension plan | | Post-retirement medical plan | | Supplemental executive retirement plan | | Total | |
|-----------------------------------|------------------------------|--------------------|------------------------------|------------------|--|-------------------|--------------------|--------------------|
| | Gross | Net of tax | Gross | Net of tax | Gross | Net of tax | Gross | Net of tax |
| Net gain (loss) | \$ (81,955) | \$ (53,271) | \$ 6,522 | \$ 4,239 | \$ (238) | \$ (155) | \$ (75,671) | \$ (49,187) |
| Net prior service (cost) credit | (300) | (195) | 11,442 | 7,437 | (4,246) | (2,760) | 6,896 | 4,482 |

| | <u>\$ (79,353)</u> | <u>\$ (51,580)</u> | <u>\$ 17,964</u> | <u>\$ 11,676</u> | <u>\$ (4,484)</u> | <u>\$ (2,915)</u> | <u>\$ (65,873)</u> | <u>\$ (42,819)</u> |

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The following table provides information regarding amounts in accumulated other comprehensive income that are expected to be recognized as components of net periodic benefit costs during the year ended December 31, 2010:

| | Defined benefit pension plan | | Post-retirement medical plan | | Supplemental executive retirement plan | | Total | |
|-----------------------------------|------------------------------|-------------------|------------------------------|-----------------|--|-----------------|-------------------|-------------------|
| | Gross | Net of tax | Gross | Net of tax | Gross | Net of tax | Gross | Net of tax |
| Net gain (loss) | \$ (6,285) | \$ (4,085) | \$ 407 | \$ 265 | \$ - | \$ - | \$ (5,878) | \$ (3,820) |
| Net prior service (cost) credit | (82) | (53) | 1,650 | 1,072 | (675) | (439) | 893 | 580 |
| Net transition asset (obligation) | 1,514 | 984 | - | - | - | - | 1,514 | 984 |
| | <u>\$ (4,853)</u> | <u>\$ (3,154)</u> | <u>\$ 2,057</u> | <u>\$ 1,337</u> | <u>\$ (675)</u> | <u>\$ (439)</u> | <u>\$ (3,471)</u> | <u>\$ (2,256)</u> |

The expected benefit payments for the Company's Defined Benefit Pension, Post-Retirement Medical and Supplemental Executive Retirement plans for the years indicated are as follows:

| | Defined benefit pension plan | Post-retirement medical plan | Supplemental executive retirement plan |
|-------------------|------------------------------|------------------------------|--|
| 2010 | \$ 10,891 | \$ 768 | \$ 2,699 |
| 2011 | 11,359 | 806 | 2,916 |
| 2012 | 12,142 | 810 | 2,913 |
| 2013 | 12,911 | 829 | 2,908 |
| 2014 | 13,742 | 933 | 2,721 |
| 2015 through 2019 | 88,795 | 5,977 | 18,181 |

Net periodic (benefit) cost of the Defined Benefit Pension, Post-Retirement Medical and Supplemental Executive Retirement plans included in general insurance expenses in the accompanying consolidated statements of income for the years ended December 31, 2009, 2008 and 2007 includes the following components:

| | Defined benefit pension plan | | |
|---|------------------------------|-----------------|------------------|
| | 2009 | 2008 | 2007 |
| Components of net periodic (benefit) cost: | | | |
| Service cost | \$ 4,087 | \$ 5,743 | \$ 9,685 |
| Interest cost | 19,135 | 18,356 | 17,293 |
| Expected return on plan assets | (16,073) | (20,499) | (20,166) |
| Amortization of transition obligation | (1,514) | (1,514) | (1,514) |
| Amortization of unrecognized prior service cost | 88 | 120 | 218 |
| Amortization of loss from earlier periods | 10,131 | 679 | 4,877 |
| Net periodic (benefit) cost | <u>\$ 15,854</u> | <u>\$ 2,885</u> | <u>\$ 10,393</u> |

| | Post-retirement medical plan | | |
|---|------------------------------|---------------|---------------|
| | 2009 | 2008 | 2007 |
| Components of net periodic (benefit) cost: | | | |
| Service cost | \$ 680 | \$ 1,263 | \$ 2,050 |
| Interest cost | 709 | 1,254 | 1,489 |
| Amortization of unrecognized prior service cost | (1,650) | (2,169) | (3,727) |
| Amortization of loss from earlier periods | (440) | 85 | 651 |
| Net periodic (benefit) cost | <u>\$ (701)</u> | <u>\$ 433</u> | <u>\$ 463</u> |

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

| | Supplemental executive retirement plan | | |
|---|--|-----------------|-----------------|
| | 2009 | 2008 | 2007 |
| Components of net periodic (benefit) cost: | | | |
| Service cost | \$ 716 | \$ 665 | \$ 1,044 |
| Interest cost | 2,856 | 2,735 | 2,589 |
| Amortization of unrecognized prior service cost | 675 | 814 | 986 |

| Net periodic (benefit) cost | <u>\$ 4,247</u> | <u>\$ 4,214</u> | <u>\$ 4,869</u> |

The following tables present the assumptions used in determining benefit obligations of the Defined Benefit Pension, Post-Retirement Medical and the Supplemental Executive Retirement plans for the years ended December 31, 2009, 2008 and 2007:

| | Defined benefit pension plan | | |
|--------------------------------|------------------------------|-------|-------|
| | 2009 | 2008 | 2007 |
| Discount rate | 6.37% | 6.40% | 6.75% |
| Expected return on plan assets | 8.00% | 8.00% | 8.00% |
| Rate of compensation increase | 4.94% | 4.94% | 3.19% |

| | Post-retirement medical plan | | |
|---------------|------------------------------|-------|-------|
| | 2009 | 2008 | 2007 |
| Discount rate | 6.37% | 6.40% | 6.75% |

| | Supplemental executive retirement plan | | |
|-------------------------------|--|-------|-------|
| | 2009 | 2008 | 2007 |
| Discount rate | 6.37% | 6.40% | 6.75% |
| Rate of compensation increase | 6.00% | 6.00% | 6.00% |

The discount rate has been set based upon the rates of return on high-quality fixed-income investments currently available and expected to be available during the period the benefits will be paid. In particular, the yields on bonds rated AA or better on the measurement date have been used to set the discount rate.

Assumed healthcare cost trend rates have a significant effect on the amounts reported for the Post-Retirement Medical Plan. For measurement purposes, an 8.00% annual rate of increase in the per capita cost of covered healthcare benefits was assumed and that the rate would gradually decrease to a level of 5.25% by 2016.

The following table presents what a one-percentage-point change would have on assumed healthcare cost trend rates:

| | One percentage point increase | One percentage point decrease |
|--|-------------------------------------|-------------------------------------|
| Increase (decrease) on total service and interest cost on components | \$ 182 | \$ (156) |
| Increase (decrease) on post-retirement benefit obligation | 1,264 | (1,107) |

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

(Dollars in Thousands)

The following table presents how the Company's Defined Benefit Pension Plan assets are invested at December 31, 2009 and 2008:

| | December 31, | |
|-------------------|--------------|------|
| | 2009 | 2008 |
| Equity securities | 65% | 62% |
| Debt securities | 33% | 30% |
| Other | 2% | 8% |
| Total | 100% | 100% |

The following table presents information about the Defined Benefit Retirement Plan's assets measured at fair value on a recurring basis as of December 31, 2009 and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value. See Note 7 for a description of Level 1, Level 2 and Level 3 hierarchies and for valuation methods applied.

Defined Benefit Plan Assets Measured at Fair Value on a Recurring Basis
December 31, 2009

| | Quoted prices in active markets for identical assets (Level 1) | Significant other observable inputs (Level 2) | Significant unobservable inputs (Level 3) | Total |
|-----------------------------------|---|---|--|------------|
| Common collective trust funds | \$ - | \$ 162,635 | \$ - | \$ 162,635 |
| Long-term asset-backed securities | - | 82,370 | - | 82,370 |
| Money market funds | 1,490 | - | - | 1,490 |
| Preferred stock | - | 88 | - | 88 |
| Limited partnership interests | - | - | 4,495 | 4,495 |
| Total | \$ 1,490 | \$ 245,093 | \$ 4,495 | \$ 251,078 |

The following tables present additional information about assets and liabilities of the Defined Benefit Retirement Plan measured at fair value on a recurring basis and for which the Company has utilized Level 3 inputs to determine fair value:

| | Fair Value Measurements Using Significant Unobservable Inputs (Level 3) | | |
|---|--|---|----------|
| | Limited partnership interests | Long-term asset-backed securities | Total |
| Balance, December 31, 2008 | \$ 2,750 | \$ 3,627 | \$ 6,377 |
| Actual return on plan assets: | | | |
| Relating to assets held at the reporting date | 142 | - | 142 |
| Purchases, sales and settlements | 1,603 | - | 1,603 |
| Transfers in (out) of Level 3 | - | (3,627) | (3,627) |
| Balance, December 31, 2009 | \$ 4,495 | \$ - | \$ 4,495 |

The investment objective of the Defined Benefit Pension Plan is to provide a risk-adjusted return that will ensure the payment of benefits while protecting against the risk of substantial investment losses. Correlations among the asset classes are used to identify an asset mix that the Company believes will provide the most attractive returns. Long-term return forecasts for each asset class using historical data and other qualitative considerations to adjust for projected economic forecasts are used to set the expected rate of return for the entire portfolio.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The Defined Benefit Pension Plan utilizes various investment securities. Generally, investment securities are exposed to various risks, such as interest rate risks, credit risk and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur and that such changes could materially affect the amounts reported.

The following table presents the ranges the Company targets for the allocation of invested Defined Benefit Pension Plan assets at December 31, 2010:

| | December 31, 2010 |
|-------------------|----------------------|
| Equity securities | 25% - 75% |
| Debt securities | 25% - 75% |
| Other | 0% - 15% |

Management estimates the value of these investments will be recoverable. The Company does not expect any plan assets to be returned to it during the year ended December 31, 2010. The Company made contributions in the amounts of \$12,500 and \$11,500 to its Defined Benefit Pension Plan during the years ended December 31, 2009 and 2008, respectively. The Company expects to contribute approximately \$768 to its Post-Retirement Medical Plan and \$2,699 to its Supplemental Executive Retirement Plan during the year ended December 31, 2010. The Company will make a contribution at least equal to the minimum contribution of \$3,600 to its Defined Benefit Pension Plan during the year ended December 31, 2010.

During the second quarter of 2008, the Company recorded defined benefit pension plan costs of \$672, post-retirement medical plan benefits of \$19,346 and supplemental executive retirement plan costs of \$1,833 as adjustments to income from discontinued operations due to plan curtailments related to the sale of the Healthcare segment.

Other employee benefit plans - The Company sponsors a defined contribution 401(k) retirement plan which provides eligible participants with the opportunity to defer up to 50% of base compensation. The Company matches 50% of the first 5% of participant pre-tax contributions for employees hired before January 1, 1999. For all other employees, the Company matches 50% of the first 8% of participant pre-tax contributions. Company contributions for the years ended December 31, 2009, 2008 and 2007 were \$5,006, \$7,384 and \$9,573, respectively.

The Company has an executive deferred compensation plan providing key executives with the opportunity to participate in an unfunded deferred compensation program. Under the program, participants may defer base compensation and bonuses and earn interest on the amounts deferred. The program is not qualified under Section 401 of the Internal Revenue Code. Participant balances, which are reflected in other liabilities in the accompanying consolidated balance sheets, are \$15,286 and \$16,752 at December 31, 2009 and 2008, respectively. The participant deferrals earned interest at the average rates of 6.93% and 7.06% during the years ended December 31, 2009 and 2008, respectively. The interest rate is based on the Moody's Average Annual Corporate Bond Index rate plus 0.45% for actively employed participants and fixed rates ranging from 6.37% to 8.30% for retired participants. Interest expense related to this plan was \$1,110, \$1,224 and \$1,261 for the years ended December 31, 2009, 2008 and 2007, respectively, and is included in general insurance expenses in the consolidated statements of income.

The Company has a deferred compensation plan for select sales personnel with the opportunity to participate in an unfunded deferred compensation program. Under this program, participants may defer compensation and earn interest on the amounts deferred. The program is not qualified under Section 401 of the Internal Revenue Code. Effective January 1, 2005, this program no longer accepted participant deferrals. Participant balances, which are included in other liabilities in the accompanying consolidated balance sheets, are \$3,772 and \$4,369 at December 31, 2009 and 2008, respectively. The participant deferrals earned interest at the average rate of 4.4% and 4.5% during the years ended December 31, 2009 and 2008, respectively. The interest rate is based on an annual rate determined by the Company. The interest expense related to this plan was \$187, \$233 and \$258 for the years ended December 31, 2009, 2008 and 2007, respectively, and is included in general insurance expense in the consolidated statements of income.

The Company offers an unfunded, non-qualified deferred compensation plan to a select group of management and highly compensated individuals. Participants defer a portion of their compensation and realize potential market gains or losses on the invested contributions. The program is not qualified under Section 401 of the Internal Revenue Code. Participant balances, which are included in other liabilities in the accompanying consolidated balance sheets, are \$12,240 and \$9,238 at December 31, 2009 and 2008, respectively. Unrealized gains (losses) on invested participant deferrals were \$2,053, (\$3,709) and \$997 for the years ended December 31, 2009, 2008 and 2007, respectively.

16. Federal Income Taxes

The provision for income taxes from continuing operations is comprised of the following:

| | Year Ended December 31, 2009 | | |
|---|------------------------------|-----------|------------|
| | 2009 | 2008 | 2007 |
| Current | \$ (47,842) | \$ 14,828 | \$ 60,813 |
| Deferred | 93,950 | 81,010 | 57,978 |
| Total income tax provision from continuing operations | \$ 46,108 | \$ 95,838 | \$ 118,791 |

The following table presents a reconciliation between the statutory federal income tax rate and the Company's effective federal income tax rate from continuing operations for the years ended December 31, 2009, 2008 and 2007:

| | Year Ended December 31, | | |
|--|-------------------------|---------|--------|
| | 2009 | 2008 | 2007 |
| Statutory federal income tax rate | 35.0% | 35.0% | 35.0% |
| Income tax effect of: | | | |
| Investment income not subject to federal tax | (4.9%) | (1.4%) | (1.6%) |
| Tax credits | (4.9%) | (2.5%) | (2.8%) |
| State income taxes, net of federal benefit | (2.8%) | 1.1% | 0.5% |
| Provision for policyholders' share of earnings on participating business | 0.3% | (13.2%) | 2.0% |
| Prior period adjustment | 1.7% | (0.3%) | 1.4% |
| Income tax contingency provisions | 0.9% | 1.0% | 2.0% |
| Other, net | 2.1% | (2.0%) | (3.4%) |
| Effective federal income tax rate from continuing operations | 27.4% | 17.7% | 33.1% |

Included above in the provision for policyholder's share of earnings on participating business is the income tax effect of the \$207,785 decrease in undistributed earnings on participating business as discussed in Note 4.

The Company adopted the income tax contingency provisions contained in ASC topic 740 on January 1, 2007. As a result of the adoption of these provisions, the Company recognized an \$87,427 increase in the liability for unrecognized tax benefits, of which \$6,195 was accounted for as a reduction to the January 1, 2007 balance of retained earnings. The Company recognized increases in unrecognized tax benefits of \$24,843 and \$6,600 during the tax years ended December 31, 2009 and 2008, respectively. During the twelve months ended December 31, 2009, the Company recognized an increase of \$21,268 in the current period unrecognized tax benefits relating to changes in the composition of the consolidated tax group. Because of the impact of deferred tax accounting, the increase in the unrecognized tax benefit does not effect the effective tax rate. The Company anticipates additional increases in its unrecognized tax benefits of \$18,000 to \$20,000, in the next twelve months, due to changes in the composition of the consolidated group. The Company does not anticipate that this increase in its unrecognized tax benefit will impact the effective tax rate.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

A reconciliation of unrecognized tax benefits for the years ended December 31, 2009 and 2008 is as follows:

| | | |
|---|----|----------|
| Balance, January 1, 2008 | \$ | 61,286 |
| Additions for tax positions in the current year | | 6,600 |
| Reductions for tax positions in current year | | (1,935) |
| Additions for tax positions in prior years | | 17,349 |
| Reductions for tax positions in prior years | | (23,221) |
| Balance, December 31, 2008 | | 60,079 |
| Additions for tax positions in the current year | | 24,843 |
| Reductions for tax positions in current year | | (2,670) |
| Reductions for tax positions in prior years | | (862) |
| Balance, December 31, 2009 | \$ | 81,390 |

Included in the unrecognized tax benefits of \$81,390 at December 31, 2009 was \$5,351 of tax benefits that, if recognized, would increase the annual effective tax rate. Also included in the balance at December 31, 2009 is \$76,039 of tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective rate but would accelerate the payment of cash to the taxing authority to an earlier period.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in current income tax expense. The Company recognized approximately \$2,430, \$6,916 and \$1,300 in interest and penalties related to the uncertain tax positions during the years ended December 31, 2009, 2008 and 2007, respectively. The Company had approximately \$14,978 and \$12,548 accrued for the payment of interest and penalties at December 31, 2009 and 2008, respectively.

The Company files income tax returns in the U.S. federal jurisdiction and various states. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years 2004 and prior. Tax years 2005, 2006, 2007 and 2008 are open to federal examination by the Internal Revenue Service (the "I.R.S."). The Company is currently under federal examination by the I.R.S. for the 2005 tax year. The Company does not expect significant increases or decreases to unrecognized tax benefits relating to federal, state or local audits.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

Deferred income taxes represent the tax effect of the differences between the book and tax bases of assets and liabilities. The tax effect of temporary differences, which give rise to the deferred tax assets and liabilities as of December 31, 2009 and 2008, are as follows:

| | December 31, | | | |
|--|-----------------------|---------------------------|-----------------------|---------------------------|
| | 2009 | | 2008 | |
| | Deferred Tax Asset | Deferred Tax Liability | Deferred Tax Asset | Deferred Tax Liability |
| Policyholder reserves | \$ - | \$ 278,700 | \$ - | \$ 105,049 |
| Deferred acquisition costs | - | 168,255 | - | 144,069 |
| Investment assets | 244,168 | - | 542,104 | - |
| Policyholder dividends | 19,861 | - | 20,298 | - |
| Net operating loss carryforward | 212,635 | - | 267,074 | - |
| Pension plan accrued benefit liability | 21,330 | - | 39,571 | - |
| Goodwill | - | 22,426 | - | 19,833 |
| Experience rated refunds | 87,397 | - | 29,086 | - |
| Other | 9,868 | - | - | 51,383 |
| Total deferred taxes | <u>\$ 595,259</u> | <u>\$ 469,381</u> | <u>\$ 898,133</u> | <u>\$ 320,334</u> |

Amounts presented for investment assets above include \$58,348 and \$400,339 related to the net unrealized losses (gains) on the Company's fixed maturity and equity investments, which are classified as available-for-sale at December 31, 2009 and 2008, respectively.

The Company, together with certain of its subsidiaries, and Lifeco U.S. have entered into an income tax allocation agreement whereby Lifeco U.S. files a consolidated federal income tax return. Under the agreement, these companies are responsible for and will receive the benefits of any income tax liability or benefit computed on a separate tax return basis.

The Company has federal net operating loss carry forwards generated by a subsidiary that files an income tax return separate from the Lifeco U.S. consolidated federal income tax return. As of December 31, 2009, the subsidiary had net operating loss carry forwards expiring as follows:

| Year | Amount |
|-------|-------------------|
| 2020 | \$ 170,077 |
| 2021 | 113,002 |
| 2022 | 136,796 |
| 2023 | 81,693 |
| Total | <u>\$ 501,568</u> |

Included in due from parent and affiliates at December 31, 2009 and 2008 is \$177,716 and \$37,097, respectively, of income taxes receivable from Lifeco U.S. related to the consolidated income tax return filed by the Company and certain subsidiaries. Included in the consolidated balance sheets at December 31, 2009 and 2008 is \$34,905 and \$31,205 of income taxes receivable in other assets related to the separate federal income tax returns filed by certain subsidiaries, state income tax returns and unrecognized tax benefits.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

17. Segment Information

The Company has three reportable segments: Individual Markets, Retirement Services and Other. The Individual Markets segment distributes life insurance and individual annuity products to both individuals and businesses through various distribution channels. Life insurance products in-force include participating and non-participating term life, whole life, universal life and variable universal life. The Retirement Services segment provides retirement plan enrollment services, communication materials, various retirement plan investment options and educational services to employer-sponsored defined contribution/defined benefit plans and 401(k) and 403(b) plans, as well as comprehensive administrative and record-keeping services for financial institutions and employers. The Company's Other segment includes corporate items not directly allocated to any of its other business segments, interest expense on long-term debt and the activities of a wholly owned subsidiary whose sole business is the assumption of a certain block of term life insurance from an affiliated company.

As discussed in Note 3, substantially all of the Company's former Healthcare segment has been sold and reclassified as discontinued operations and, accordingly, is no longer reported as a separate business segment. The Company retained a small portion of its Healthcare business and reports it within its Individual Markets segment. The segment reporting for prior periods has been restated to reflect these changes in business segments.

The accounting policies of each of the reportable segments are the same as those described in Note 1. The Company evaluates performance of its reportable segments based on their profitability from operations after income taxes. Inter-segment transactions and balances have been eliminated in consolidation. The Company's operations are not materially dependent on one or a few customers, brokers or agents.

The following tables summarize segment financial information for the year ended and as of December 31, 2009:

| | Year Ended December 31, 2009 | | | |

18. Share-Based Compensation

Lifeco, of which the Company is an indirect wholly-owned subsidiary, has a stock option plan (the “Lifeco plan”) that provides for the granting of options on its common shares to certain of its officers and employees and those of its subsidiaries, including the Company. Options are granted with exercise prices not less than the average market price of the shares on the five days preceding the date of the grant. Termination of employment prior to the vesting of the options results in the forfeiture of the unvested options. The Lifeco plan provides for the granting of options with varying terms and vesting requirements with vesting commencing on the first anniversary of the grant and expiring ten years from the date of grant. Lifeco did not grant stock options to employees of the Company during the year ended December 31, 2009.

The following table presents information regarding the share-based compensation expense the Company recognized during the years ended December 31, 2009, 2008 and 2007. Share-based compensation expense of continuing operations is included in general insurance expenses in the consolidated statements of income. Share-based compensation expense of discontinued operations is included in income from discontinued operations in the consolidated statements of income.

| | Year ended December 31, | | |
|-------------------------|-------------------------|----------|----------|
| | 2009 | 2008 | 2007 |
| Continuing operations | \$ 2,181 | \$ 3,143 | \$ 3,816 |
| Discontinued operations | - | 1,980 | - |
| | \$ 2,181 | \$ 5,123 | \$ 3,816 |

The Lifeco plan contains a provision that permits a retiring option holder with unvested stock options on the date of retirement to continue to vest in them after retirement for a period of up to five years. Upon the retirement of an option holder with unvested options, the Company accelerates the recognition period to the date of retirement for any unrecognized share-based compensation cost related thereto and recognizes it in its earnings at that time. At December 31, 2009, the Company had \$2,632, net of estimated forfeitures, of unrecognized share-based compensation costs, which will be recognized in its earnings through 2015. The weighted-average period over which these costs will be recognized in earnings is 2.1 years.

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

The following table summarizes the status of, and changes in, the Lifeco plan options granted to Company employees which are outstanding at December 31, 2009. The options granted relate to underlining stock traded in Canadian dollars on the Toronto Stock Exchange, therefore, the amounts, which are presented in United States dollars, will fluctuate as a result of exchange rate fluctuations.

| | Shares Under Option | Weighted Average | | |
|---|------------------------|---|--|--|
| | | Exercise Price (Whole Dollars) | Remaining Contractual Term (Years) | Aggregate Intrinsic Value ¹ |
| Outstanding, January 1, 2009 | 4,317,541 | \$ 19.47 | | |
| Exercised | (572,239) | 11.67 | | |
| Outstanding, December 31, 2009 | <u>3,745,302</u> | 24.30 | 4.8 | 15,247 |
| | | | | |
| Vested and expected to vest, December 31, 2009 | 3,739,342 | \$ 24.29 | 4.8 | \$ 15,247 |
| Exercisable, December 31, 2009 | 2,828,902 | \$ 21.96 | 3.9 | \$ 15,247 |

¹ The aggregate intrinsic value is calculated as the difference between the market price of Lifeco common shares on December 31, 2009 and the exercise price of the option (only if the result is positive) multiplied by the number of options.

The following table presents other information regarding stock options under the Lifeco plan during the year ended December 31, 2009:

| | Year Ended December 31, 2009 |
|---|------------------------------------|
| Intrinsic value of options exercised ¹ | \$ 7,039 |
| Fair value of options vested | 1,361 |

¹ The intrinsic value of options exercised is calculated as the difference between the market price of Lifeco common shares on the date of exercise and the exercise price of the option multiplied by the number of options exercised.

19. Obligations Relating to Debt and Leases

The Company enters into operating leases primarily for the rental of office space. The following table shows, as of December 31, 2009, scheduled related party debt principal repayments and minimum annual rental commitments for operating leases having initial or remaining non-cancelable lease terms in excess of one year during the years ended December 31, 2010 through 2014 and thereafter:

| Year Ended December 31, | Related Party Notes | Operating Leases | Total Debt and Lease Obligations |
|-------------------------|------------------------|---------------------|---|
| 2010 | \$ - | \$ 11,872 | \$ 11,872 |
| 2011 | - | 4,315 | 4,315 |
| 2012 | - | 3,329 | 3,329 |
| 2013 | - | 2,018 | 2,018 |
| 2014 | - | 2,941 | 2,941 |
| Thereafter | 528,400 | 1,227 | 529,627 |

GREAT-WEST LIFE & ANNUITY INSURANCE COMPANY

Notes to Consolidated Financial Statements
Years Ended December 31, 2009, 2008 and 2007
(Dollars in Thousands)

20. Commitments and Contingencies

The Company is one of two defendants in an action filed in the Colorado District Court for Arapahoe County, Colorado by a disease management vendor in an action relating to its healthcare business (which was sold to Connecticut General Life Insurance Company in a transaction that closed on April 1, 2008). The plaintiff alleges that the Company breached a contract with it and engaged in tortious conduct, for which the plaintiff seeks both compensatory and punitive damages. The Company believes it has meritorious defenses against the plaintiff's claims and is vigorously contesting them. The Company's motion for partial summary judgment is pending. The lawsuit is scheduled for trial commencing March 1, 2010.

The extent of the losses beyond any amounts that may be accrued is not readily determinable at this time. However, based on facts and circumstances presently known, in the opinion of management, an unfavorable outcome will not materially affect the equity of the Company, although its results of discontinued operations may be adversely affected.

The Company is involved in various other legal proceedings that arise in the ordinary course of its business. In the opinion of management, after consultation with counsel, the resolution of these proceedings are not expected to have a material adverse effect on the Company's consolidated financial position or the results of its operations.

The Company has entered into a corporate credit facility agreement in the amount of \$50,000 for general corporate purposes. The credit facility matures on May 26, 2010. Interest accrues at a rate dependent upon various conditions and terms of borrowings. The agreement requires, among other things, the Company to maintain a minimum adjusted statutory net worth of \$900,000 plus 50% of its statutory net income, if positive, for each quarter ending after June 30, 2008. The Company had no borrowings under the credit facility at either December 31, 2009 or 2008 and was in compliance with all covenants.

The Company makes commitments to fund partnership interests and other investments in the normal course of its business. The amounts of these unfunded commitments at December 31, 2009 and 2008 were \$126,882 and \$49,334, respectively, all of which is due within one year from the dates indicated.

21. Subsequent Events

Management has evaluated subsequent events for potential recognition or disclosure in the Company's consolidated financial statements through February 19, 2010, the date on which the Company's consolidated financial statements were issued. No subsequent event has occurred requiring its recognition or disclosure in the Company's consolidated financial statements.

On February 8, 2010, the Company's Board of Directors declared a dividend in the amount of \$66,000 to be paid during the first quarter of 2010.

(1) A reclassification of \$29,500 was made from unearned premium reserves to future policy benefits, losses, claims and expenses for consistency with the presentation as of December 31, 2009.

Item 9.

Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

There has been no change in the Company's independent registered public accounting firm nor have there been any disagreements on accounting or financial disclosure matters.

Item 9A(T).

Controls and Procedures

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2009. In making this evaluation, management used criteria set forth in "Internal Control - Integrated Framework" issued by the committee of Sponsoring Organizations of the Treadway Commission. Based on their evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's internal control over financial reporting is effective as of December 31, 2009.

The Chief Executive Officer and Chief Financial Officer hereby confirm that there were no changes in the Company's internal control over financial reporting during the fourth quarter of 2009 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Item 9B.

Other Information

None.

Part III

Item 10.

Directors and Executive Officers of the Registrant

| T. Timothy Ryan, Jr. 1 2 | 64 | 2009 | President and Chief Executive Officer of the Securities Industry and Financial Markets Association since January 2008; previously Vice Chairman of JPMorgan Chase |
| Brian E. Walsh 1 2 4 6 8 | 56 | 1995 | Managing Partner, Saguenay Capital, LLC |

1 Member of the Executive Committee.

2 Member of the Investment and Credit Committee.

3 Member of the Audit Committee.

4 Member of the Compensation Committee.

5 Member of the Conduct Review Committee.

6 Member of the Governance and Nominating Committee.

7 Mr. André Desmarais and Mr. Paul Desmarais, Jr. are brothers.

8 Also a director of Great-West Life.

Unless otherwise indicated, all of the directors have been engaged for not less than five years in their present principal occupations or in another executive capacity with the companies or firms identified.

The appointments of directors are confirmed annually.

The following is a list of directorships held by the directors of the Company, on companies whose securities are traded publicly in the United States or that are investment companies (other than the Company) registered under the Investment Company Act of 1940.

| | |
|-------------------|---------------------------------|
| A. Desmarais | CITIC Pacific Limited |
| P. Desmarais, Jr. | TOTAL S.A. |
| M.T.G. Graye | Maxim Series Fund, Inc. |
| P.K. Ryan | Panagora Asset Management, Inc. |
| T. T. Ryan, Jr. | Lloyds Banking Group |
| B.E. Walsh | Saguenay Capital, LLC |

10.2 Identification of Executive Officers

| Executive | Age | Served as Executive Officer from | Principal Occupation(s) for Last Five Years |
|--|-----|----------------------------------|--|
| Mitchell T.G. Graye President and Chief Executive Officer | 54 | 1997 | President and Chief Executive Officer of the Company |
| Charles P. Nelson President, Great-West Retirement Services | 49 | 2008 | President, Great-West Retirement Services of the Company |
| S. Mark Corbett Executive Vice President and Chief Investment Officer | 50 | 2008 | Executive Vice President and Chief Investment Officer of the Company |
| Robert K. Shaw Executive Vice President, Individual Markets | 54 | 2008 | Executive Vice President, Individual Markets of the Company |
| James L. McCallen Senior Vice President and Chief Financial Officer | 59 | 2008 | Senior Vice President and Chief Financial Officer of the Company |
| Graham R. McDonald Senior Vice President, Corporate Resources | 63 | 2008 | Senior Vice President, Corporate Resources of the Company |
| Scot A. Miller Senior Vice President and Chief Information Officer | 51 | 2008 | Senior Vice President and Chief Information Officer of the Company |
| Richard G. Schultz Senior Vice President, General Counsel and Secretary | 49 | 2008 | Senior Vice President, General Counsel and Secretary of the Company |

Unless otherwise indicated, all of the executive officers have been engaged for not less than five years in their present principal occupations or in another executive capacity with the companies or firms identified.

The appointments of executive officers are confirmed annually.

10.3 Code of Ethics

The Company has adopted a Code of Business Conduct and Ethics (the “Code”) that is applicable to its senior financial officers, as well as to other officers and employees. All of the items identified as elements of a “code of ethics” as defined in Securities and Exchange Commission regulations adopted pursuant to the Sarbanes-Oxley Act of 2002 are substantively covered by the Code. A copy of the Code is available without charge upon written request to Beverly A. Byrne, Chief Compliance Officer, 8525 East Orchard Road, Greenwood Village, Colorado 80111.

10.4 Security Holder Communications

As a wholly-owned subsidiary, the Board of Directors of the Company does not have a process for security holders to send communications to the Board of Directors.

10.5 Audit Committee Financial Expert

The Board of Directors has reviewed the qualifications and backgrounds of the members of the Audit Committee and determined that, although no one member of the Audit Committee is an “audit committee financial expert” within the meaning of the Rules under the Securities Exchange Act of 1934, the combined qualifications and experience of the members of the Audit Committee give the Committee collectively the financial expertise necessary to discharge its responsibilities.

Item 11.

Executive Compensation

11.1 Compensation Discussion and Analysis

1. General

The executive compensation program adopted by the Company and applied to the executive officers (including the Named Executive Officers) is designed to support the primary objective of generating added value for shareholders and policyholders over the long term. The Compensation Committee of the Board of Directors of the Company oversees the executive compensation program. The Board and the Compensation Committee recognize the importance of executive compensation decisions to the management and shareholders of the Corporation, and have given careful consideration to the process which is followed to make decisions.

The main objectives of the executive compensation program are to:

- attract, retain and reward qualified and experienced executives who will contribute to the success of the Company;
- motivate executive officers to meet annual corporate, divisional, and individual performance goals; and
- enhance long-term shareholder and policyholder value.

More specifically, the executive compensation program is designed to reward the following:

- excellence in crafting and executing strategies that will produce significant value for the shareholders and policyholders over the long term;
- management vision and an entrepreneurial approach;
- quality of decision-making;
- strength of leadership;
- record of performance over the long term; and
- initiating and implementing transactions and activities that create shareholder and policyholder value.

In designing and administering the individual elements of the executive compensation program, the Compensation Committee strives to balance short-term and long-term incentive objectives and to apply prudent judgment in establishing performance criteria, evaluating performance, and determining actual incentive awards. The total compensation of each Named Executive Officer is reviewed by the Compensation Committee from time to time for market competitiveness, and reflects each Named Executive Officer’s job responsibilities, experience and proven and/or expected performance.

The executive compensation programs consist of four primary components:

- base salary;
- annual incentive bonus;
- options for Lifeco common shares; and
- retirement benefits.

The primary role of each of these components is presented in the table below:

| ELEMENT | PRIMARY ROLE |
|--|---|
| Base Salary | Reflect skills, competencies, experience and performance appraisal of the Named Executive Officers |
| Annual Incentive Bonus | Reflect performance for the year |
| Long-Term Incentive (Lifeco Stock Option Plan) | Link interests of Named Executive Officers with interests of the shareholders |
| Retirement Benefits | Provide for appropriate replacement income upon retirement based on years of service with the Company |

Base salary, annual incentive bonus and retirement benefits are determined by the Compensation Committee for the executive officers (including the Named Executive Officers) other than the President and Chief Executive Officer, whose base salary and annual incentive bonus are recommended by the Compensation Committee for approval by the Board of Directors. The long-term compensation component in the form of options for Lifeco common shares is determined and administered by Lifeco's Compensation Committee. For the Named Executive Officers, the annual incentive bonus and stock option components are an essential part of their compensation.

The President and Chief Executive Officer participates in the compensation setting process for the other Named Executive Officers by evaluating individual performance, establishing individual performance targets and objectives and recommending salary levels.

2. Base Salary

Base salaries for the Named Executive Officers are set annually, taking into account the individual's job responsibilities, experience and proven or expected performance, as well as market conditions. The Company gathers market data in relation to the insurance and financial services industries and also considers surveys prepared by external professional compensation consultants such as Tower Perrin, Hewitt, Mercer and McLagan Partners with regard to peer groups in these industries.

3. Bonuses

(a) Annual Incentive Bonus Plan

To relate the compensation of the Named Executive Officers to the performance of the Company, an annual incentive bonus plan (the "Annual Incentive Bonus Plan") is provided. Target objectives are set annually, and may include earnings, expense or sales targets of the Company and/or a business unit of the Company or specific individual objectives related to strategic initiatives, acquisition related integration or synergy achievements.

These objectives are designed to be integrated with the Company's overall goals and initiatives. These targets are set high enough to drive performance while still being reasonable in terms of the likelihood of being met if individuals perform to the levels expected by the Company.

See Section 11.5 below for information on the participation of the Named Executive Officers in the Annual Incentive Bonus Plan and a further description of the terms of the Annual Incentive Bonus Plan.

(b) Special Bonuses

From time to time, special bonuses may be provided related to significant projects such as acquisitions or dispositions or for retention purposes.

4. Stock Options

To provide a long-term component to the executive compensation program, the Named Executive Officers participate in Lifeco's Stock Option Plan (the "Lifeco Option Plan").

While the Company's Compensation Committee makes recommendations from time to time with respect to the granting of Lifeco options, Lifeco's Compensation Committee is responsible for the granting of options to participants under the Lifeco Option Plan. Lifeco options are not granted on a fixed schedule. Options are not granted based on the timing of the disclosure of non-public material information with respect to Lifeco or the Company.

The duties, responsibilities and contributions of participants to the success of the Company are taken into account when the Lifeco Compensation Committee determines whether, and how many, new option grants should be made. The granting of options is subject to the terms and conditions contained in the Lifeco Stock Option Plan and any additional terms and conditions fixed by the Lifeco Compensation Committee at the time of the grant.

See Section 11.5 below for information on the participation of the Named Executive Officers in the Lifeco Option Plan and a further description of the terms of the Lifeco Option Plan.

The Compensation Committees of the Company and Lifeco believe that long-term incentives in the form of stock options, with delayed vesting provisions, play an important part in retaining key executive officers and in aligning the interests of the executive officers with those of the shareholders, and in contributing to the achievement of the results that have been attained by the Company.

5. Pension Benefits

(a) Defined Benefit Plan

The Company has a qualified defined benefit pension plan (the "Defined Benefit Plan") which is available to all employees hired before January 1, 1999. See Section 11.8 below for information on the participation of the Named Executive Officers in the Defined Benefit Plan and a description of the terms of the Defined Benefit Plan.

(b) SERP

To provide a competitive retirement benefit to certain key executives, the Company also has a nonqualified supplemental executive retirement plan (the "SERP"), which provides benefits above the compensation limits applicable to the Defined Benefit Plan. See Section 11.8 below for information on the participation of the Named Executive Officers in the SERP and a description of the terms of the SERP.

(c) 401(k) Plan

All employees, including the Named Executive Officers, may participate in the Company's qualified defined contribution 401(k) Plan (the "401(k) Plan"). Under the 401(k) Plan, employees may make contributions of between 1% and 50% of base salary, subject to applicable Internal Revenue Service ("IRS") limits. For employees participating in the Defined Benefit Plan, the Company matches 50% of the first 5% of pre-tax and/or Roth contributions. For employees who do not participate in the Defined Benefit Plan, the Company matches 50% of the first 8% of pre-tax and/or Roth contributions. The 401(k) Plan offers a variety of investment options, including variable funds, collective funds, guaranteed certificate funds, Lifeco common shares (company matching contributions only) and a self-directed investment option.

6. Nonqualified Deferred Compensation

To provide market competitive compensation to certain key executives, the Company also has a nonqualified deferred compensation plan ("NQDCP") and a nonqualified executive deferred compensation plan ("EDCP"). See Section 11.9 below for information on the participation of the Named Executive Officers in these plans and a description of the terms of the plans.

7. Perquisites Program

The Company has a limited perquisites program in which the Named Executive Officers participate.

A perquisites account of up to \$5,500 is available to officers at the level of Senior Vice President and above for reimbursement of expenses such as club dues, employee recognition or other miscellaneous expenses. In addition, these officers have available a one time membership perquisite of up to \$10,000.

The President and Chief Executive Officer receives a yearly car lease benefit. Executive Vice Presidents and the Chief Financial Officer receive a fixed car allowance of \$800 per month and Senior Vice Presidents receive a fixed car allowance of \$600 per month. For individuals promoted during the year, the car allowance for the year is prorated based on the different benefits applicable to the two positions held.

11.2 Compensation Committee Report

The Compensation Committee has reviewed and discussed the Compensation Discussion and Analysis with management of the Company and based on such review and discussions, recommends to the Board of Directors that the Compensation and Analysis be included in this Form 10-K.

Compensation Committee Members:

R. J. Orr (Chairman)
A. Desmarais
P. Desmarais, Jr.
R.L. McFeetors
B.E. Walsh

11.3 Compensation Committee Interlocks and Insider Participation

R.L. McFeetors retired as President and Chief Executive Officer of the Company effective May 1, 2008 and is currently Chairman of the Board of Directors. Mr. McFeetors is a member of the Compensation Committee.

11.4 Summary Compensation Table

The following table sets out compensation paid by the Company to the individuals who (i) served as Chief Executive Officer or Chief Financial Officer of the Company during 2009; and (ii) were the other three most highly compensated executive officers of the Company at December 31, 2009 (collectively, the “Named Executive Officers”).

| Name and Principal Position | Year | Salary (\$) | Bonus (\$) | Option Awards \$(4) | Non-Equity Incentive Plan Compensation \$(5) | Change in Pension Value and Nonqualified Deferred Compensation Earnings (\$) (6) | All Other Compensation \$(7) | Total (\$) |
|--|------|-------------|-------------------------|---------------------|--|--|------------------------------|------------|
| Mitchell T.G. Graye President and Chief Executive Officer | 2009 | 900,000 | - | 327,962 | 1,125,000 | 298,978 | 136,399 | 2,788,339 |
| | 2008 | 788,333 | 300,000(1) | 291,760 | 1,062,500 | 262,256 | 693,727 | 4,898,576 |
| | 2007 | 658,750 | 1,500,000(2) - | 291,760 | 658,750 | - | 20,500 | 1,629,760 |
| James L. McCallen Senior Vice President and Chief Financial Officer | 2009 | 357,500 | - | 12,367 | 255,612 | 122,400 | 21,435 | 769,314 |
| | 2008 | 319,130 | 51,000(1) 80,000(2) | 28,640 | 220,200 | 158,469 | 19,598 | 877,037 |
| Charles P. Nelson President, Great-West Retirement Services | 2009 | 611,250 | - | 64,363 | 611,250 | 207,582 | 80,408 | 1,574,853 |
| | 2008 | 565,000 | 92,000(1) | 28,160 | 452,000 | 233,822 | 53,560 | 1,424,542 |
| | 2007 | 455,334 | 50,000(3) | - | 341,500 | - | 18,039 | 864,873 |
| S. Mark Corbett Executive Vice President and Chief Investment Officer | 2009 | 475,000 | - | 53,284 | 475,000 | 61,612 | 21,225 | 1,086,121 |
| | 2008 | 389,474 | 100,000(1) 40,000(2) | 51,680 | 341,000 | 76,284 | 19,550 | 1,017,988 |
| Robert K. Shaw Executive Vice President, Individual Markets | 2009 | 412,500 | - | - | 371,250 | 141,913 | 21,025 | 946,688 |
| | 2008 | 371,750 | - | 28,640 | 251,000 | 178,239 | 18,450 | 848,079 |

(1) These were special bonuses paid with respect to the acquisition of Putnam Investments by Lifeco.

(2) These were special bonuses paid with respect to the sale of the Company’s healthcare business.

(3) This was a special bonus paid with respect to the acquisition of a block of defined contribution business.

(4) This relates to Lifeco options granted under the Lifeco Option Plan. The amounts reflected are the dollar amount recognized for financial statement reporting purposes in accordance with the provisions of Accounting Standards Codification topic 718 in 2009 (without regard to the estimate of forfeitures related to service based vesting conditions), with respect to all options granted to the Named Executive Officers which vested in 2009. For further information, see Footnote 18 to the Company’s December 31, 2009 Financial Statements contained in Item 8 of this Form 10-K.

- (5) These are bonuses earned under the Annual Incentive Bonus Plan.
- (6) The change in pension value and nonqualified deferred compensation earning are as follows:
 - (a) Mr. Graye had a change in actuarial present value under the Defined Benefit Plan of \$42,285 and a change in actuarial present value under the SERP of \$256,693.
 - (b) Mr. McCallen had a change in actuarial present value under the Defined Benefit Plan of \$122,400.

- (c) Mr. Nelson had a change in actuarial present value under the Defined Benefit Plan of \$71,840, a change in actuarial present value under the SERP of \$129,460 and above market earnings under the EDCP of \$6,282. For each of the Named Executive Officers participating in the EDCP, above average earnings equaled total earnings less 5.02% of total earnings (5.02% being 120% of the applicable federal long-term rate at December 31, 2008).
- (d) Mr. Corbett had a change in actuarial present value under the Defined Benefit Plan of \$61,612.
- (e) Mr. Shaw had a change in actuarial present value under the Defined Benefit Plan of \$84,090, a change in actuarial present value under the SERP of \$54,121 and above market earnings under the EDCP of \$3,702.
- (7) The components of other compensation for each of the Named Executive Officers are as follows:
- (a) Mr. Graye received (i) a car lease benefit of \$16,235; (ii) a perquisites account reimbursement of \$5,000; (iii) a 401(k) Plan employer contribution of \$6,125; and (iv) \$109,039 in respect of directors' fees.
- (b) Mr. McCallen received (i) a car allowance of \$9,600; (ii) a perquisites account reimbursement of \$5,710; and (iii) a 401(k) Plan employer contribution of \$6,125.
- (c) Mr. Nelson received (i) a housing benefit of \$59,183 (determined by calculating a lost investment return on the money used by the Company to contribute toward the purchase of a house for use by Mr. Nelson equal to the 30-year agency mortgage backed security rate of 6.07% in effect on June 9, 2008, the purchase date, less a 35% corporate tax rate on income earned); (ii) a car allowance of \$9,600; (iii) a perquisites account reimbursement of \$5,500; and (iv) a 401(k) Plan employer contribution of \$6,125.
- (d) Mr. Corbett received (i) a car allowance of \$9,600; (ii) a perquisites account reimbursement of \$5,500; and (iii) a 401(k) plan employer contribution of \$6,125.
- (e) Mr. Shaw received (i) a car allowance of \$ 9,400; (ii) a perquisites account reimbursement of \$5,500; and (iii) a 401(k) Plan employer contribution of \$6,125.

11.5 Grants of Plan-Based Awards for 2009

1. Table

The following table sets out information with respect to grants to the Named Executive Officers under the Annual Incentive Bonus Plan and Lifeco Option Plan.

| Name | Estimated Future Payouts Under Non-Equity Incentive Plan Awards | | | All Other Option Awards: Number of Securities Underlying Options (#) | Exercise or Base Price of Option Awards (\$/Share) |
|---------------|--|------------|--------------|--|--|
| | Thresholds | Target | Maximum | | |
| M.T.G. Graye | \$ - | \$ 900,000 | \$ 1,125,000 | - | \$ - |
| J.L. McCallen | - | 268,125 | 268,125 | - | - |
| C.P. Nelson | - | 611,250 | 611,250 | - | - |
| S.M. Corbett | - | 475,000 | 475,000 | - | - |
| R.K. Shaw | - | 412,500 | 412,500 | - | - |

2. Narrative Description of the Annual Incentive Bonus Plan

Under the Annual Incentive Bonus Plan, bonus opportunity is expressed as a percentage of base salary and varies by office. The President and Chief Executive Officer, Executive Vice Presidents and Senior Vice Presidents can generally earn bonuses of up to 125%, 100% and 75%, respectively, of base salary if all targets and objectives are met. For individuals promoted during the year, the bonus opportunity for the year is prorated based on the different percentages applicable to the two positions held.

Bonus amounts are established against each target or objective. If objectives are not met, the President and Chief Executive Officer is not entitled to any bonus. Lower bonus amounts may be earned by Executive Vice Presidents and Senior Vice Presidents on partial achievement of bonus objectives.

For 2009:

- (i) M.T.G. Graye had an opportunity to earn 100% of annualized year end base salary if earnings targets were met and up to 125% of annualized year end base salary if earnings targets were exceeded by specified amounts;
- (ii) J.L. McCallen had an opportunity to earn up to 75% of base salary earned in 2009 - 40% based on earnings targets, 15% based on expense related targets and 20% based on specific individual objectives;
- (iii) C.P. Nelson had an opportunity to earn up to 100% of base salary earned in 2009 - 60% based on earnings targets, 10% based on expense related targets and 30% based on sales related targets;
- (iv) S.M. Corbett had an opportunity to earn up to 100% of base salary earned in 2009 - 50% based on earnings targets, 10% based on expense related targets and 40% on specific individual objectives; and
- (v) R.K. Shaw had an opportunity to earn up to 100% of base salary earned in 2009 - 60% based on earnings targets, 10% based on expense related targets and 30% based on sales related targets.

3. Narrative Description of the Lifeco Option Plan

Under the Lifeco Option Plan, the Lifeco Compensation Committee sets the exercise price of the options but under no circumstances can it be less than the weighted average trading price per Lifeco common share on the Toronto Stock Exchange for the five trading days preceding the date of the grant.

Options are either regular options or contingent options. Regular options are generally granted in multi-year allotments. Regular options, if granted prior to February, 2007, become exercisable at the rate of 20% per year commencing one year after the date of the grant and, if granted during or after February, 2007, become exercisable over a seven and one-half year period commencing one year after the date of the grant at a rate of 4%, 8%, 14.66%, 14.66%, 14.66%, 14.66%, and 14.66% per year, with the final 14.66% becoming exercisable six months later. Contingent options do not become exercisable unless and until conditions prescribed by the Lifeco Compensation Committee have been satisfied.

Options generally expire ten years after the date of the grant, except that if options would otherwise expire during a blackout period or within ten business days of the end of a blackout period, the expiry date for the options is extended to the tenth business day after the expiry date of the blackout period.

In the event of the death of a participant or the termination of a participant's employment, then the period within which the options may be exercised is generally reduced depending on the circumstances surrounding the death or termination of employment. Options are not assignable by participants otherwise than by will or pursuant to the laws of succession. Lifeco does not provide any financial assistance to participants to facilitate the purchase of common shares under the Lifeco Option Plan. Subject to any regulatory or shareholder approval required by law, the Lifeco Board of Directors may amend the Lifeco Option Plan or the terms of a grant.

11.6 Outstanding Equity Awards at 2009 Fiscal Year End

The following table sets out Lifeco options held by the Named Executive Officers under the Lifeco Option Plan as of December 31, 2009. Lifeco options are issued with an exercise price in Canadian dollars, which have been translated to U.S. dollars at 1/1.15 which was Lifeco's average rate for the year (the "Conversion Rate").

| Name | Option Awards | | | |
|---------------|---|---|-----------------------|------------------------|
| | Number of Securities Underlying Unexercised Options (#) Exercisable | Number of Securities Underlying Unexercised Options (#) Unexercisable | Option Exercise Price | Option Expiration Date |
| | | | | |
| M.T.G. Graye | 125,002 | - | \$ 9.68 | April 26,2010 |
| | 80,000 | - | 15.25 | April 25, 2011 |
| | 100,000 | - | 16.89 | July 9, 2013 |
| | 224,000 | 56,000 | (1) 25.94 | December 13, 2015 |
| | 11,000 | 264,000 | (2) 27.19 | May 12, 2018 |
| J.L. McCallen | 32,830 | - | 14.90 | December 3, 2011 |
| | 20,000 | - | 16.89 | July 9, 2013 |
| | 4,000 | 96,000 | (3) 27.19 | May 12, 2018 |
| C.P. Nelson | 120,000 | - | 14.90 | December 3, 2011 |
| | 13,200 | 96,800 | (4) 32.37 | February 27, 2017 |
| | 4,400 | 105,600 | (5) 24.86 | March 24, 2018 |
| S.M. Corbett | 80,000 | - | 14.90 | December 3, 2011 |
| | 20,000 | - | 16.89 | July 9, 2013 |
| | 10,800 | 79,200 | (6) 32.37 | February 27, 2017 |
| | 2,000 | 48,000 | (7) 27.19 | May 12, 2018 |
| R.K. Shaw | 100,000 | - | 14.90 | December 3, 2011 |
| | 20,000 | - | 16.89 | July 9, 2013 |

(1) These 56,000 options vest on December 14, 2010.

(2) These options vest as follows: 22,000 on May 13, 2010; 40,333 on each of May 13, 2011, 2012, 2013, 2014 and 2015; and 40,335 on November 13, 2015.

(3) These options vest as follows: 8,000 on May 13, 2010; 14,667 on each of May 13, 2011, 2012, 2013, 2014 and 2015; and 14,665 on November 13, 2015.

(4) These options vest as follows: 16,132 on each of February 28, 2010, 2011, 2012, 2013 and 2014; and 16,140 on August 28, 2014.

(5) These options vest as follows: 8,800 on March 25, 2010; 16,133 on each of March 25, 2011, 2012, 2013, 2014 and 2015; and 16,135 on September 25, 2015.

(6) These options vest as follows: 13,199 on each of February 28, 2010, 2011, 2012, 2013 and 2014; and 13,205 on August 28, 2014.

(7) These options vest as follows: 4,000 on May 13, 2010; 7,333 on each of May 13, 2011, 2012, 2013, 2014 and 2015; and 7,335 on November 13, 2015.

11.7 Option Exercises for 2009

No Lifeco options were exercised by the Named Executive Officers in 2009.

11.8 Pension Benefits for 2009

1. Table

The following table sets out information with respect to the participation of the Named Executive Officers in the Defined Benefit Plan and the SERP.

| Name | Plan Name | Number of Years of Credited Service | Present Value of Accumulated Benefit (\$) (1) | Payments During Last Fiscal Year |
|---------------|----------------------|--|--|--|
| M.T.G. Graye | Defined Benefit Plan | 17 | \$ 279,705 | \$ - |
| | SERP | 17 | 1,038,800 | - |
| J.L. McCallen | Defined Benefit Plan | 35 | 1,222,004 | - |
| C.P. Nelson | Defined Benefit Plan | 27 | 541,193 | - |
| | SERP | 27 | 619,540 | - |
| S.M. Corbett | Defined Benefit Plan | 23 | 472,783 | - |
| R.K. Shaw | Defined Benefit Plan | 32 | 819,122 | - |
| | SERP | 32 | 457,624 | - |

(1) The amounts shown in the table are calculated according to the terms of the plans based on age and years of service as of December 31, 2009. These amounts are based on pay through December 31, 2009. The assumptions used for these calculations are consistent with actuarial valuations of the plans. The present value of accumulated benefit under the plans equals the actuarial present value of the annuity earned as of December 31, 2009, payable at age 65 for the Defined Benefit Plan and age 62 for the SERP, discounted to December 31, 2009 at the applicable discount rate for December 31, 2009. Benefits calculated under the SERP are the termination benefit.

2. Narrative Description of the Defined Pension Plan

The Defined Benefit Plan is designed to provide regular income at retirement to eligible employees. In general, an eligible employee is any employee hired prior to January 1, 1999. Participants in the Defined Benefit Plan are entitled to benefits at age 65 if they have 5 or more years of service.

The benefit formula for participants hired before January 1, 1992 is 1.5% for each of the first 30 years of service multiplied by the participant's average annual compensation, plus 0.5% for each of the next 5 years of service multiplied by the participant's average annual compensation, plus 0.5% for each year of service to retirement up to a maximum of 35 years multiplied by the participant's average annual compensation minus the covered compensation amount (as determined by the IRS). If a participant made required or voluntary contributions to the Defined Benefit Plan prior to July 1, 1979, the participant's benefit is increased to reflect these contributions and interest accrued thereon, so long as the employee contributions plus interest have not been withdrawn in a lump sum.

The benefit formula for participants hired on and after January 1, 1992 is 1.0% for each of the first 30 years of service multiplied by the participant's average annual compensation, plus 0.5% for each of the next 5 years of service multiplied by the participant's average annual compensation, plus 0.5% for each year of service to retirement up to a maximum of 35 years multiplied by the participant's average annual compensation minus the covered compensation amount (as determined by the IRS).

Average annual compensation is the highest average of compensation paid during 5 consecutive years of credited service out of the last 7 years of credited service.

Participants who have terminated service prior to age 65 and who have at least 5 years of service may begin receiving benefits as early as age 55. Benefits that begin prior to age 65 are reduced by approximately 5% for each year prior to age 65.

The normal form of benefit for a married participant is a joint and 50% survivor annuity. The normal form of benefit for an unmarried participant is a life only annuity. Other optional forms of pension payment are available on an actuarially equivalent basis.

3. Narrative Description of the SERP

The SERP is designed to provide retirement benefits to certain key executive officers who are subject to qualified plan compensation limits. At the Company's discretion, executive officers may be designated to participate in the SERP. Participants in the SERP are generally entitled to benefits if they have 15 or more years of service.

The following describes the retirement benefit amount under the SERP based on age at the time of separation of service.

(1) For participants who separate from service at or after age 62, the normal retirement benefit is equal to 60% of final average compensation if the participant has 30 years of service. The benefit is prorated for less than 30 years of service. Final average compensation is the average of the highest 60 consecutive months of compensation during the last 84 months of employment. Compensation includes salary, bonuses and commissions prior to any deferrals to other benefit plans. Benefits are offset by benefits under the Defined Benefit Plan and 50% of estimated social security benefits as of retirement.

(2) For participants who separate from service between ages 57 and 62, the early retirement benefit is calculated by reducing the bonus used in determining final average compensation by 5/6% for each month prior to age 62 and by further reducing the early retirement benefit by 5/12% for each month prior to age 62. Benefits are offset by benefits under the Defined Benefit Plan and 50% of estimated social security benefits as of age 62.

(3) For participants who separate from service prior to age 57, the termination benefit is equal to 60% of final average salary if the participant has 30 years of service. The benefit is prorated for less than 30 years of service. If the participant has less than 35 years of service, the termination benefit is also reduced by 5% for each of the first three years of service below 35. Final average salary is the average of the highest 60 consecutive months of salary during the last 84 months of employment. Salary includes deferrals of any salary to other benefit plans. Benefits are offset by benefits under the Defined Benefit Plan and 50% of estimated social security benefits payable as of age 62.

Payments under the normal retirement benefit and the early retirement benefit commence upon retirement. Payments under the termination benefit commence at age 62.

The normal form of benefit under the SERP is a life only annuity. Other optional forms of payment are available on an actuarially equivalent basis.

11.9 Nonqualified Deferred Compensation for 2009

1. Table

The following table sets out information with respect to the participation of the Named Executive Officers in the NQDP and/or EDCP.

| Name | Plan Name | Executive Contributions in Last Fiscal Year \$(1) | Aggregate Earnings in Last Fiscal Year (\$) | Aggregate Withdrawals or Distributions (\$) | Aggregate Balance at Last Fiscal Year End (\$) |
|---------------|-----------|---|---|---|--|
| J.L. McCallen | NQDC | - | 29,473 | - | 138,318 |
| C.P. Nelson | EDCP | - | 23,739 | - | 363,567 |
| R.K. Shaw | NQDC | - | 52,555 | - | 234,469 |
| | EDCP | - | 14,151 | - | 236,400 |

(1) Amounts contributed are included in the Salary column of the Summary Compensation Table.

2. Narrative Description of the Nonqualified Deferred Compensation Plan and Executive Deferred Compensation Plan

All officers at the level of Vice President and above, and others at the discretion of the Company, are eligible to participate in the NQDCP. At the Company's discretion, executive officers may be designated to participate in the EDCP.

Under the NQDCP and EDCP, a participant may defer (i) a minimum of the greater of \$2,500 or 5% of base salary (including sales related compensation under the NQDCP) and a maximum of 90% of base salary; and (ii) a minimum of 5% and a maximum of 90% of bonus.

Under the NQDCP, participants specify one or more investment preferences in which deferrals are deemed to be invested. Participant accounts are adjusted for interest, earnings or losses equal to the actual results of the underlying investment(s). Under the EDCP, participant deferrals earn an interest rate equal to the Moody's Average Annual Corporate Bond Index rate plus .45% for actively employed participants and fixed rates ranging from 6.41% to 8.3% for retired participants.

Amounts deferred under both plans and the earnings from the plans are distributed to a participant upon termination of employment, if not distributed earlier. Amounts distributed under the plans are generally paid in either a lump sum or installments over 3, 5, 10 or 15 years at the election of the participant.

Following a change in control of the Company, the Board of Directors may terminate one or both plans in its discretion and pay all amounts due under a terminated plan to participants. Certain payments following termination of employment or after a change in control may be delayed to comply with requirements under the Internal Revenue Code.

11.10 Compensation of Directors for 2009

1. Table

The following sets out compensation earned in 2009 by the Directors identified in part 10.1 of this Form 10-K, and by O.T. Dackow, K.P. Kavanagh, W. Mackness and D.A. Nield, who retired as Directors on May 4, 2009.

| Name | Fees Earned or Paid in Cash \$(1) | Stock Awards \$(2) | All Other Compensation \$(3) | Total (\$) |
|-------------------|---|-----------------------|------------------------------------|------------|
| J. Balog | 79,883 | 45,000 | 156 | 125,039 |
| J.L. Bernbach | 51,883 | 45,000 | 156 | 97,039 |
| O.T. Dackow | 26,262 | 15,453 | 54 | 41,769 |
| A. Desmarais | 27,826 | - | - | 27,826 |
| P. Desmarais, Jr. | 24,348 | - | - | 24,348 |
| M.T.G. Graye | 63,883 | 45,000 | 156 | 109,039 |
| K.P. Kavanagh | 10,435 | - | - | 10,435 |
| A. Louvel | 56,883 | 45,000 | 156 | 102,039 |
| W. Mackness | 24,560 | 13,438 | 47 | 38,044 |
| R.L. McFeetors | 34,783 | - | - | 34,783 |
| J.E.A. Nickerson | 17,391 | - | - | 17,391 |
| D.A. Nield | 6,957 | - | - | 6,957 |
| R.J. Orr | 34,783 | - | - | 34,783 |
| M. Plessis-Bélair | 15,652 | - | - | 15,652 |
| H. P. Rousseau | 19,130 | - | - | 19,130 |
| R. Royer | 8,696 | - | - | 8,696 |
| P.K. Ryan | 31,304 | - | - | 31,304 |
| T.T. Ryan, Jr. | 41,621 | 29,547 | 106 | 71,274 |
| B.E. Walsh | 49,292 | 15,453 | 54 | 64,799 |

(1) These amounts are cash payments and contributions made under the voluntary component of the Great-West Life U.S. Resident Director Deferred Share Unit Plan ("U.S. DSUP") or the Great-West Life Canadian Resident Deferred Share Unit Plan ("Canadian DSUP"), as applicable. Director fees are paid in the currency of the country of residence of the Director. Amounts paid or contributed in Canadian dollars have been translated to U.S. dollars at the Conversion Rate.

(2) These amounts represent contributions made by the Company under the mandatory component of the U.S. DSUP or Canadian DSUP, as applicable. Contributions made in Canadian dollars have been translated to U.S. dollars at the Conversion Rate.

(3) Life insurance premiums paid under the Great-West Life Director's Group Life Insurance Plan. Premiums paid in Canadian dollars have been translated to U.S. dollars at the Conversion Rate.

2. Narrative Description of Directors Compensation

For each Director of the Company who is not also a Director of Great-West Life, the Company pays an annual retainer fee in the amount of \$75,000. \$45,000 of this retainer is paid in Deferred Share Units of Lifeco ("Deferred Share Units") under the mandatory component of the U.S. DSUP or Canadian DSUP, as applicable. The remaining \$30,000 is available in cash.

A Director serving on the Audit Committee who is not also a Director of Great-West Life receives an additional retainer fee in the amount of \$3,000. The Company pays all Directors a meeting fee in the amount of \$2,000 for each meeting of the Board of Directors or a committee thereof attended. The Chairman of the Executive Committee receives an annual fee in the amount of \$25,000 and the Chairman of the Investment Committee receives an annual fee in the amount of \$20,000.

At their option, in lieu of cash payments, Directors may receive additional Deferred Share Units for 50% or 100% of the cash payments under the voluntary component of the U.S. DSUP or Canadian DSUP, as applicable.

Under both the mandatory and voluntary components of the U.S. DSUP and Canadian DSUP the number of Deferred Share Units granted is determined by dividing the amount of remuneration payable to the Director by the weighted average Canadian dollar trading price per Lifeco common share on the Toronto Stock Exchange for the last five trading days of the preceding fiscal quarter (such weighted average trading price being the "value of a Deferred Share Unit"). Directors receive additional Deferred Share Units in respect of dividends payable on the common shares based on the value of a Deferred Share Unit at that time.

Deferred Share Units are redeemable at the time that an individual ceases to be a Director by a lump sum cash payment, based on the value of the Deferred Share Units on the date of redemption. This amount is fully taxable as income in the year in which it is received.

The following are the number of Deferred Share Units held by the Directors, as of December 31, 2009, with respect to contributions made by the Company and/or its subsidiaries.

| Name | Deferred Share Units |
|-------------------|-------------------------|
| J. Balog | 47,096 |
| J.L. Bernbach | 6,712 |
| A. Desmarais | 10,713 |
| P. Desmarais, Jr. | - |
| M.T.G. Graye | 9,186 |
| A. Louvel | 6,556 |
| R.L. McFeetors | 5,581 |
| J.E.A. Nickerson | - |
| R.J. Orr | 6,178 |
| M. Plessis-Bélair | - |

| Name | Deferred Share Units |

| H.P. Rousseau | - |
| R. Royer | - |
| P.K. Ryan | 2,553 |
| T.T. Ryan | 3,403 |
| B.E. Walsh | 24,556 |

Item 12.

Security Ownership of Certain Beneficial Owners and Management

12.1 Security Ownership of Certain Beneficial Owners

Set forth below is certain information, as of January 1, 2010, concerning beneficial ownership of the voting securities of the Company by entities and persons who beneficially own more than 5% of the voting securities of the Company. The determinations of “beneficial ownership” of voting securities are based upon Rule 13d-3 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). This rule provides that securities will be deemed to be “beneficially owned” where a person has, either solely or in conjunction with others, (1) the power to vote or to direct the voting of securities and/or the power to dispose or to direct the disposition of the securities or (2) the right to acquire any such power within 60 days after the date such “beneficial ownership” is determined.

(1) 100% of the Company's 7,032,000 outstanding common shares are owned by GWL&A Financial Inc., 8515 East Orchard Road, Greenwood Village, Colorado 80111.

(2) 100% of the outstanding common shares of GWL&A Financial Inc. are owned by Great-West Lifeco U.S. Inc., 8515 East Orchard Road, Greenwood Village, Colorado 80111.

(3) 100% of the outstanding common shares of Great-West Lifeco U.S. Inc. are owned by Great-West Financial (Nova Scotia) Co., Suite 800, 1959 Upper Water Street, Halifax, Nova Scotia, Canada B3J 2X2.

(4) 100% of the outstanding common shares of Great-West Financial (Nova Scotia) Co. are owned by Great-West Financial (Canada) Inc., 100 Osborne Street North, Winnipeg, Manitoba, Canada R3C 3A5.

(5) 100% of the outstanding common shares of Great-West Financial (Canada) Inc. are owned by Great-West Lifeco Inc., 100 Osborne Street North, Winnipeg, Manitoba, Canada R3C 3A5.

(6) 68.59% of the outstanding common shares of Great-West Lifeco Inc. are controlled by Power Financial Corporation, 751 Victoria Square, Montréal, Québec, Canada H2Y 2J3, representing approximately 65% of the voting rights attached to all outstanding voting shares of Great-West Lifeco Inc.

(7) 66.3% of the outstanding common shares of Power Financial Corporation are owned by 171263 Canada Inc., 751 Victoria Square, Montréal, Québec, Canada H2Y 2J3.

(8) 100% of the outstanding common shares of 171263 Canada Inc. are owned by Power Corporation of Canada, 751 Victoria Square, Montréal, Québec, Canada H2Y 2J3.

(9) Mr. Paul Desmarais, 751 Victoria Square, Montréal, Québec, Canada H2Y 2J3, directly and through a group of private holding companies which he controls, has voting control of Power Corporation of Canada.

As a result of the chain of ownership described in paragraphs (1) through (9) above, each of the entities and persons listed in paragraphs (1) through (9) would be considered under Rule 13d-3 of the Exchange Act to be a “beneficial owner” of 100% of the outstanding voting securities of the Company.

12.2 Security Ownership of Management

The following tables set out the number of equity securities and exercisable options (including options that will become exercisable within 60 days) for equity securities of the Company or any of its parents or subsidiaries, beneficially owned, as of January 1, 2010, by (i) the directors of the Company (ii) the Named Executive Officers and (iii) the directors and executive officers of the Company as a group.

| Directors | Great-West Lifeco Inc. (1) | Power Financial Corporation (2) | Power Corporation of Canada (3) |
|-------------------|-----------------------------------|--|---------------------------------------|
| J. Balog | - | - | - |
| J.L. Bernbach | - | - | - |
| A. Desmarais | 103,318 | 43,200 | 1,163,065 1,076,063 options |
| P. Desmarais, Jr. | 100,000 | - | 54,420 1,476,063 options |
| M.T.G. Graye | 6,087 540,002 options | 75,000 | - |
| A. Louvel | - | - | - |
| R.L. McFeetors | 1,605,810 1,900,000 options | 170,500 514,484 options | 7,335 |
| J.E.A. Nickerson | 5,000 | 14,166 | 14,572 |
| R.J. Orr | 20,000 | 400,400 1,772,000 options | 20,000 |
| M. Plessis-Bélair | 40,000 | 6,000 | 162,426 181,000 options |
| H. Rousseau | 2,800 | 5,400 | - |
| R. Royer | 15,000 | 174,000 | - |
| P.K. Ryan | - | 28,283 options | 28,977 options |
| T.T. Ryan, Jr. | - | - | - |
| B.E. Walsh | - | - | - |

| Named Executive Officers | Great-West Lifeco Inc. (1) | Power Financial Corporation (2) | Power Corporation of Canada (3) |
|---|---|--|---|
| M.T.G. Graye | 6,087 540,002 | 75,000 | - |
| J.L. McCallen | 14,274 56,830 options | - | - |
| C.P. Nelson | 21,951 137,600 options | - | - |
| S.M. Corbett | 5,239 112,800 options | - | - |
| R.K. Shaw | 32,657 120,000 options | - | - |
| Directors and Executive Officers as a Group | Great-West Lifeco Inc. (1) 1,990,136 2,945,563 options | Power Financial Corporation (2) 888,666 2,314,767 options | Power Corporation of Canada (3) 1,421,818 2,762,103 options |

- (1) All holdings are common shares, or where indicated, preferred shares or exercisable options for common shares of Great-West Lifeco Inc.
- (2) All holdings are common shares, or where indicated, exercisable options for common shares of Power Financial Corporation.
- (3) All holdings are subordinate voting shares, or where indicated, exercisable options for subordinate voting shares of Power Corporation of Canada.

The number of subordinate voting shares and exercisable options for subordinate voting shares of Power Corporation of Canada held by the directors and executive officers as a group represents 1.01% of the total number of subordinate voting shares and exercisable options for subordinate voting shares of Power Corporation of Canada outstanding.

None of the remaining holdings set out above exceeds 1% of the total number of shares and exercisable options for shares of the class outstanding.

Item 13. Transactions with Related Persons, Promoters and Certain Control Persons

- (a) There are no transactions to report.
- (b) The Company's Board of Directors has a Conduct Review Committee which acts pursuant to a written Charter and procedures (together, the "procedures"). Messrs. Balog, Bernbach and Mackness serve on the Conduct Review Committee.

The Conduct Review Committee, in accordance with the procedures, considers and approves transactions between the Company or its subsidiaries and (i) the directors and senior officers of the Company or its affiliates, including their spouses and minor children; (ii) its affiliates; and (iii) companies controlled by a director or senior officer of the Company or its affiliates, or their spouses or minor children. Control and affiliation is defined as a 10% voting interest or 25% ownership interest, but does not include subsidiaries of the Company.

Among other criteria, the Conduct Review Committee considers whether such transactions were on market terms and conditions, including interest rates and fees, as those prevailing at the time for comparable transactions with third parties. Such review also considers the Company's established conflict of interest guidelines with respect to the transaction, as set forth in the Company's Code.

There were no reportable related party transactions during the Registrant's most recently completed fiscal year, following the establishment of the Conduct Review Committee, where the aforementioned procedures did not require review, approval or ratification or where the procedures were not followed.

Item 14.

Principal Accounting Fees and Services

14.1 Principal Accounting Fees

For the years ended December 31, 2009 and 2008, professional services were performed by Deloitte & Touche LLP ("D&T"). The total fees for these services were \$5,183,160 and \$7,600,600 for the years ended December 31, 2009 and 2008, respectively, and were composed of the following:

Audit Fees - The aggregate fees billed for the audit of the Company's and its subsidiaries' annual financial statements for the fiscal years ended December 31, 2009 and 2008, and for the review of the financial statements included in the Company's quarterly reports on Form 10-Q, were \$4,111,500 and \$3,827,800, respectively.

Audit Related Fees - The aggregate fees billed for audit related services for the fiscal years ended December 31, 2009 and 2008 were \$355,200 and \$426,500, respectively. These services included "SAS 70" internal control reports and audits of the Company's employee benefit plans.

Tax Fees - The aggregate fees billed for tax services for the fiscal years ended December 31, 2009 and 2008 were \$330,500 and \$484,700, respectively. These services included tax compliance services for the Company's affiliated mutual fund, Maxim Series Fund, Inc., as well as tax planning and compliance services for the Company and its subsidiaries.

All Other Fees - The aggregate fees for services not included above were \$385,960 and \$2,861,600, respectively, for the years ended December 31, 2009 and 2008, respectively.

14.2 Pre-approval Policies and Procedures

The Audit Committee pre-approves all services, including both audit and non-audit services, provided by D&T. Each year, the Committee receives a schedule of the audit, audit-related and tax services that it is asked to approve for the year before D&T may be engaged.

None of the services described in this Item 14 were approved by the Committee pursuant to paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X, the de minimis safe harbor exemption from pre-approval requirements. The amount of hours expended on D&T's audit of the Company's financial statements for 2008 attributable to work performed by persons other than D&T's full-time, permanent employees was less than 50%.

Part IV

Item 15.
