- a Variable rate security--interest rate subject to periodic change.
- b Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At April 30, 2008, these securities amounted to \$7,087,770,313 or 26.2% of net assets.
- c This note was acquired for investment, and not with the intent to distribute or sell. Security restricted as to public resale. This security was acquired on 9/21/07 at a cost of \$150,000,000. At April 30, 2008, the aggregate value of this security was \$150,000,000 representing 0.6% of net assets and is valued at amortized cost.

At April 30, 2008, the cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes.

Securities valuation policies and other investment related disclosures are hereby incorporated by reference to the annual and semi-annual reports previously filed with the Securities and Exchange Commission on Form N-CSR.

Various inputs are used in determining the value of the fund's investments relating to Financial Accounting Standard No. 157 (FAS 157), Fair Value Measurements.

These inputs are summarized in the three broad levels listed below.

Level 1 - quoted prices in active markets for identical securities.

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 - significant unobservable inputs (including fund's own assumption in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For example, money market securities are valued using amortized cost, in accordance with rules under the Investment Company Act of 1940. Generally, amortized cost approximates the current fair value of a security, but since the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2.

The following is a summary of the inputs used as of April 30, 2008 in valuing the fund's assets carried at fair value:

Valuation Inputs	Investments in Securities (\$)	Other Financial Instruments* (\$)
Level 1 - Quoted Prices	0	0
Level 2 - Other Significant Observable Inputs	27,480,927,724	0
Level 3 - Significant Unobservable Inputs	0	0
Total	27,480,927,724	0

*Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.
