
DREYFUS PREMIER GNMA FUND, INC.
CLASS A, CLASS B, CLASS C AND CLASS Z SHARES

STATEMENT OF ADDITIONAL INFORMATION
SEPTEMBER 1, 2008

This Statement of Additional Information, which is not a prospectus, supplements and should be read in conjunction with the current Prospectus of Dreyfus Premier GNMA Fund, Inc. (the "Fund"), dated September 1, 2008, as the Prospectus may be revised from time to time. To obtain a copy of the Fund's Prospectus, please call your financial adviser, or write to the Fund at 144 Glenn Curtiss Boulevard, Uniondale, New York 11556-0144, visit www.dreyfus.com, or call 1-800-554-4611 (holders of Class Z shares should call 1-800-645-6561).

The Fund's most recent Annual Report and Semi-Annual Report to Shareholders are separate documents supplied with this Statement of Additional Information, and the financial statements, accompanying notes and report of the independent registered public accounting firm appearing in the Annual Report are incorporated by reference into this Statement of Additional Information.

DESCRIPTION OF THE FUND

The Fund is a Maryland corporation that commenced operations on May 29, 1985. The Fund is an open-end management investment company, known as a mutual fund. The Fund is a diversified fund, which means that, with respect to 75% of its total assets, the Fund will not invest more than 5% of its assets in the securities of any single issuer nor hold more than 10% of the outstanding voting securities of any single issuer (other than, in each case, securities of other investment companies, and securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities, such as Ginnie Maes).

The Dreyfus Corporation (the "Manager" or "Dreyfus") serves as the Fund's investment adviser.

MBSC Securities Corporation (the "Distributor") is the distributor of the Fund's shares.

Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Ginnie Maes. The Fund normally invests at least 80% of its assets, and it is a fundamental policy of the Fund that it will invest at least 65% of its net assets (except when maintaining a temporary defensive position), in Ginnie Mae Certificates. The Fund will invest in Ginnie Maes only of the "fully modified pass-through" type which are guaranteed as to timely payment of principal and interest by the Government National Mortgage Association ("GNMA"), a U.S. Government corporation. Ginnie Mae Certificates also may include other securities that in the future are guaranteed by the GNMA.

Ginnie Maes are created by an "issuer," which is a Federal Housing Administration ("FHA") approved mortgagee that also meets criteria imposed by the GNMA. The issuer assembles a pool of FHA, Farmers' Home Administration or Veterans' Administration ("VA") insured or guaranteed mortgages which are homogeneous as to interest rate, maturity and type of dwelling. Upon application by the issuer, and after approval by the GNMA of the pool, the GNMA provides its commitment to guarantee timely payment of principal and interest on the Ginnie Maes backed by the mortgages included in the pool. The Ginnie Maes, endorsed by the GNMA, then are sold by the issuer through securities dealers. Ginnie Maes bear a stated "coupon rate" which represents the effective FHA-VA mortgage rate at the time of issuance, less the GNMA's and issuer's fees.

The GNMA is authorized under the National Housing Act to guarantee timely payment of principal and interest on Ginnie Maes. This guarantee is backed by the full faith and credit of the United States. The GNMA may borrow U.S. Treasury funds to the extent needed to make payments under its guarantee.

When mortgages in the pool underlying a Ginnie Mae are prepaid by mortgagors or by result of foreclosure, such principal payments are passed through to the certificate holders. Accordingly, the life of the Ginnie Mae is likely to be substantially shorter than the stated

maturity of the mortgages in the underlying pool. Because of such variation in prepayment rates, it is not possible to predict the life of a particular Ginnie Mae.

Payments to holders of Ginnie Maes consist of the monthly distributions of interest and principal less the GNMA's and issuer's fees. The actual yield to be earned by a holder of a Ginnie Mae is calculated by dividing interest payments by the purchase price paid for the Ginnie Mae (which may be at a premium or a discount from the face value of the certificate). Monthly distributions of interest, as contrasted to semi-annual distributions which are common for other fixed interest investments, have the effect of compounding and thereby raising the effective annual yield earned on Ginnie Maes.

Additional Mortgage-Related Securities. The Fund also may invest in other mortgage-related securities, including those issued by government-related organizations such as Fannie Mae and Freddie Mac, private mortgage pass-through securities and collateralized mortgage obligations, including real estate mortgage investment conduits or REMICs. The mortgage-related securities in which the Fund may invest include those with fixed, floating or variable interest rates, those with interest rates that change based on multiples of changes in a specified index of interest rates and those with interest rates that change inversely to changes in a specified index of interest rates, as well as those that do not bear interest. The Fund also may invest in stripped mortgage-backed securities.

Government-Related Securities--Mortgage-related securities issued by Fannie Mae include Fannie Mae Guaranteed Mortgage Pass-Through Certificates (also known as "Fannie Maes") which are solely the obligations of Fannie Mae and are not backed by or entitled to the full faith and credit of the United States. Fannie Mae is a government-sponsored organization owned entirely by private stockholders, which guarantees Fannie Maes as to timely payment of principal and interest by the FNMA.

Mortgage-related securities issued by the Freddie Mac include Freddie Mac Mortgage Participation Certificates (also known as "Freddie Macs" or "PCs"). Freddie Mac is a corporate instrumentality of the United States, created pursuant to an Act of Congress, which is owned entirely by Federal Home Loan Banks. Freddie Macs are not guaranteed by the United States or by any Federal Home Loan Bank and do not constitute a debt or obligation of the United States or of any Federal Home Loan Bank. Freddie Macs entitle the holder to timely payment of interest, which is guaranteed by Freddie Mac. Freddie Mac guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. While Freddie Mac does not guarantee timely payment of principal, Freddie Mac may remit the amount due on account of its guarantee of ultimate payment of principal at any time after default on an underlying mortgage, but in no event later than one year after it becomes payable.

Private Entity Securities--These mortgage-related securities are issued by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other non-governmental issuers. Timely payment of principal and interest on mortgage-related securities backed by pools created by non-governmental issuers often is supported partially by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance. The insurance and guarantees are issued by government entities, private insurers and the mortgage poolers. There can be no assurance that the private insurers or mortgage poolers

can meet their obligations under the policies, so that if the issuers default on their obligations the holders of the security could sustain a loss. No insurance or guarantee covers the Fund or the price of the Fund's shares. Mortgage-related securities issued by non-governmental issuers generally offer a higher rate of interest than government-agency and government-related securities because there are no direct or indirect government guarantees of payment.

Commercial Mortgage-Related Securities--The Fund may invest in commercial mortgage-related securities, which generally are multi-class debt or pass-through certificates secured by mortgage loans on commercial properties. These mortgage-related securities generally are structured to provide protection to the senior classes investors against potential losses on the underlying mortgage loans. This protection generally is provided by having the holders of subordinated classes of securities ("Subordinated Securities") take the first loss if there are defaults on the underlying commercial mortgage loans. Other protection, which may benefit all of the classes or particular classes, may include issuer guarantees, reserve funds, additional Subordinated Securities, cross-collateralization and over-collateralization.

Residential Mortgage-Related Securities--The Fund may invest in mortgage-related securities representing participation interests in pools of one-to four-family residential mortgage loans issued by private entities, as well as those issued or guaranteed by governmental agencies or instrumentalities. Residential mortgage-related securities may be issued using a variety of structures, including multi-class structures featuring senior and subordinated classes.

Subordinated Securities--The Fund may invest in Subordinated Securities issued or sponsored by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other non-governmental issuers. Subordinated Securities have no governmental guarantee, and are subordinated in some manner as to the payment of principal and/or interest to the holders of more senior mortgage-related securities arising out of the same pool of mortgages. The holders of Subordinated Securities typically are compensated with a higher stated yield than are the holders of more senior mortgage-related securities. On the other hand, Subordinated Securities typically subject the holder to greater risk than senior mortgage-related securities and tend to be rated in a lower rating category, and frequently a substantially lower rating category, than the senior mortgage-related securities issued in respect of the same pool of mortgage. Subordinated Securities generally are likely to be more sensitive to changes in prepayment and interest rates and the market for such securities may be less liquid than is the case for traditional fixed-income securities and senior mortgage-related securities.

Collateralized Mortgage Obligations ("CMOs") and Multi-Class Pass-Through Securities--A CMO is a multiclass bond backed by a pool of mortgage pass-through certificates or mortgage loans. CMOs may be collateralized by (a) Ginnie Mae, Fannie Mae, or Freddie Mac pass-through certificates, (b) unsecuritized mortgage loans insured by the Federal Housing Administration or guaranteed by the Department of Veterans' Affairs, (c) unsecuritized conventional mortgages, (d) other mortgage-related securities, or (e) any combination thereof.

Each class of CMOs, often referred to as a "tranche," is issued at a specific coupon rate and has a stated maturity or final distribution date. Principal prepayments on collateral underlying a CMO may cause it to be retired substantially earlier than the stated maturities or final distribution dates. The principal and interest on the underlying mortgages may be allocated

among the several classes of a series of a CMO in many ways. One or more tranches of a CMO may have coupon rates which reset periodically at a specified increment over an index, such as the London Interbank Offered Rate ("LIBOR") (or sometimes more than one index). These floating rate CMOs typically are issued with lifetime caps on the coupon rate thereon. The Fund also may invest in inverse floating rate CMOs. Inverse floating rate CMOs constitute a tranche of a CMO with a coupon rate that moves in the reverse direction to an applicable index such as LIBOR. Accordingly, the coupon rate thereon will increase as interest rates decrease. Inverse floating rate CMOs are typically more volatile than fixed or floating rate tranches of CMOs.

Many inverse floating rate CMOs have coupons that move inversely to a multiple of the applicable indexes. The effect of the coupon varying inversely to a multiple of an applicable index creates a leverage factor. Inverse floaters based on multiples of a stated index are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and loss of principal. The markets for inverse floating rate CMOs with highly leveraged characteristics at times may be very thin. The Fund's ability to dispose of its positions in such securities will depend on the degree of liquidity in the markets for such securities. It is impossible to predict the amount of trading interest that may exist in such securities, and therefore the future degree of liquidity.

Stripped Mortgage-Backed Securities--The Fund also may invest in stripped mortgage-backed securities, which are created by segregating the cash flows from underlying mortgage loans or mortgage securities to create two or more new securities, each with a specified percentage of the underlying securities' principal or interest payments. Mortgage securities may be partially stripped so that each investor class receives some interest and some principal. When securities are completely stripped, however, all of the interest is distributed to holders of one type of security, known as an interest-only security, or IO, and all of the principal is distributed to holders of another type of security known as a principal-only security, or PO. Strips can be created in a pass-through structure or as tranches of a CMO. The yields to maturity on IOs and POs are very sensitive to the rate of principal payments (including prepayments) on the related underlying mortgage assets. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IOs. Conversely, if the underlying mortgage assets experience less than anticipated prepayments of principal, the yield on POs could be materially and adversely affected.

Adjustable-Rate Mortgage Loans ("ARMs")--ARMs eligible for inclusion in a mortgage pool generally will provide for a fixed initial mortgage interest rate for a specified period of time, generally for either the first three, six, twelve, thirteen, thirty-six, or sixty scheduled monthly payments. Thereafter, the interest rates are subject to periodic adjustment based on changes in an index. ARMs typically have minimum and maximum rates beyond which the mortgage interest rate may not vary over the lifetime of the loans. Certain ARMs provide for additional limitations on the maximum amount by which the mortgage interest rate may adjust for any single adjustment period. Negatively amortizing ARMs may provide limitations on changes in the required monthly payment. Limitations on monthly payments can result in monthly payments that are greater or less than the amount necessary to amortize a negatively amortizing ARM by its maturity at the interest rate in effect during any particular month.

Other Mortgage-Related Securities--Other mortgage-related securities that the Fund may invest in include securities other than those described above that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property, including CMO residuals. Other mortgage-related securities may be equity or debt securities issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, homebuilders, mortgage banks, commercial banks, investment banks, partnerships, trusts and special purpose entities of the foregoing.

U.S. Treasury Securities. The Fund may invest in U.S. Treasury securities, including Treasury Bills, Treasury Notes and Treasury Bonds that differ in their interest rates, maturities and times of issuance. Treasury Bills have initial maturities of one year or less; Treasury Notes have initial maturities of one to ten years; and Treasury Bonds generally have initial maturities of greater than ten years.

The Fund may invest in Treasury Inflation Protection Securities ("TIPS"), which are issued by the U.S. Treasury and are designed to provide investors a long term investment vehicle that is not vulnerable to inflation. The interest rate paid by TIPS is fixed, while the principal value rises or falls semi-annually based on changes in a published Consumer Price Index. Thus, if inflation occurs, the principal and interest payments on the TIPS are adjusted accordingly to protect investors from inflationary loss. During a deflationary period, the principal and interest payments decrease, although the TIPS' principal will not drop below its face amount at maturity.

In exchange for the inflation protection, TIPS generally pay lower interest rates than typical Treasury securities. Only if inflation occurs will TIPS offer a higher real yield than a conventional Treasury bond of the same maturity. In addition, it is not possible to predict with assurance how the market for TIPS develop; initially, the secondary market for these securities may not be as active or liquid as the secondary market for conventional Treasury securities. Principal appreciation and interest payments on TIPS will be taxed annually as ordinary interest income for Federal income tax calculations. As a result, any appreciation in principal must be counted as interest income in the year the increase occurs, even though the investor will not receive such amounts until the TIPS are sold or mature. Principal appreciation and interest payments will be exempt from state and local income taxes.

Variable and Floating Rate Securities. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be event based, such as based on a change in the prime rate.

The Fund may invest in floating rate debt instruments ("floaters"). The interest rate on a floater is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. The interest rate on a floater resets periodically, typically every six months. Because of the interest rate reset feature, floaters provide the Fund with a certain degree of protection against rises in interest rates, although the Fund will participate in any declines in interest rates as well.

The Fund also may invest in inverse floating rate debt instruments ("inverse floaters"). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed or inversely to a multiple of the applicable index. An inverse floating rate security may exhibit greater price volatility than a fixed rate obligation of similar credit quality.

Asset-Backed Securities. Asset-backed securities are a form of derivative. The securitization techniques used for asset-backed securities are similar to those used for mortgage-related securities. These securities include debt securities and securities with debt-like characteristics. The collateral for these securities has included home equity loans, automobile and credit card receivables, boat loans, computer leases, airplane leases, mobile home loans, recreational vehicle loans and hospital account receivables. The Fund may invest in these and other types of asset-backed securities that may be developed in the future.

Asset-backed securities present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may provide the Fund with a less effective security interest in the related collateral than do mortgage-backed securities. Therefore, there is the possibility that recoveries on the underlying collateral may not, in some cases, be available to support payments on these securities.

Investment Companies. The Fund may invest in securities issued by other investment companies. Under the Investment Company Act of 1940, as amended (the "1940 Act"), the Fund's investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund's total assets with respect to any one investment company and (iii) 10% of the Fund's total assets in the aggregate. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. The Fund also may invest its uninvested cash reserves, or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund's securities lending program, in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above.

Illiquid Securities. The Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund's investment objective. Such securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, repurchase agreements providing for settlement in more than seven days after notice, and certain privately negotiated, non-exchange traded options and securities used to cover such options. As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price that the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

Repurchase Agreements. The Fund may enter into repurchase agreements. In a repurchase agreement, the Fund buys, and the seller agrees to repurchase, a security at a mutually agreed upon time and price (usually within seven days). The repurchase agreement

thereby determines the yield during the purchaser's holding period, while the seller's obligation to repurchase is secured by the value of the underlying security. The Fund's custodian or sub-custodian will have custody of, and will hold in a segregated account, securities acquired by the Fund under a repurchase agreement. Repurchase agreements are considered by the staff of the Securities and Exchange Commission (the "SEC") to be loans by the Fund. Repurchase agreements could involve risks in the event of a default or insolvency of the other party to the agreement, including possible delays or restrictions upon the Fund's ability to dispose of the underlying securities. In an attempt to reduce the risk of incurring a loss on a repurchase agreement, the Fund will require that additional securities be deposited with it if the value of the securities purchased should decrease below resale price.

Ratings. Mortgage-related securities issued by non-governmental entities will be purchased only if rated investment grade (i.e., Baa/BBB and above) by a rating agency or, if unrated, deemed to be of comparable quality by the Manager. The Fund currently intends, however, to purchase such securities only if rated "A" or better, without reference to rating subcategories, or, if unrated, determined by the Manager to be of comparable quality. The rating assigned by a rating agency to a mortgage-related security issued by a non-governmental entity is based on many factors, including the structure of the security, the level of subordination, the quality and adequacy of the collateral, and the past performance of the originators and servicing companies. The rating of any commercial mortgage-related security is determined to a substantial degree by the debt service coverage ratio (i.e., the ratio of the current net operating income from the commercial properties, in the aggregate, to the current debt service obligations on the properties) and the loan-to-value ratio of the pooled properties. Loan-to-value ratios may be particularly important in the case of commercial mortgages because most commercial mortgage loans provide that the lender's sole remedy in the event of a default is against the mortgaged property, and the lender is not permitted to pursue remedies with respect to other assets of the borrower. Accordingly, loan-to-value ratios, in certain circumstances, may determine the amount realized by the holder of the commercial mortgage-related security in the event of a default.

The ratings of the rating agencies represent their opinions as to the quality of the obligations which they undertake to rate. Ratings are relative and subjective and, although ratings may be useful in evaluating the safety of interest and principal payments, they do not evaluate the market value risk of such obligations. Although these ratings may be an initial criterion for selection of portfolio investments, the Manager also will evaluate these securities and the ability of the issuers of such securities to pay interest and principal.

Investment Techniques

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Borrowing Money. The Fund is permitted to borrow to the extent permitted under the 1940 Act, which permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. Such borrowings may be for temporary or emergency purposes or for leveraging as described below. While borrowings for temporary or emergency purposes exceed 5% of the Fund's total assets, the Fund will not make any additional investments. The Fund also

may borrow for investment purposes on a secured basis through entering into reverse repurchase agreements, as described below.

Leverage. Leveraging (buying securities using borrowed money) exaggerates the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio. These borrowings will be subject to interest costs which may or may not be recovered by appreciation of the securities purchased; in certain cases, interest costs may exceed the return received on the securities purchased. For borrowings for investment purposes, the 1940 Act, requires the Fund to maintain continuous asset coverage (total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed. If the required coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the amount of its borrowings and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. The Fund also may be required to maintain minimum average balances in connection with such borrowing or pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements with banks, brokers or dealers. This form of borrowing involves the transfer by the Fund of an underlying debt instrument in return for cash proceeds based on a percentage of the value of the security. The Fund retains the right to receive interest and principal payments on the security. At an agreed upon future date, the Fund repurchases the security at principal plus accrued interest. Reverse repurchase agreements may be preferable to a regular sale and later repurchase of the securities because they avoid certain market risks and transaction costs. Such transactions, however, may increase the risk of potential fluctuations in the market value of the Fund's assets. In addition, interest costs on the cash received may exceed the return on the securities purchased. To the extent the Fund enters into a reverse repurchase agreement, the Fund will segregate permissible liquid assets at least equal to the aggregate amount of its reverse repurchase obligations, plus accrued interest, in certain cases, in accordance with releases promulgated by the SEC. The SEC views reverse repurchase transactions as collateralized borrowings by the Fund. Except for these transactions, the Fund's borrowings generally will be unsecured.

Short-Selling. In these transactions, the Fund sells a security it does not own in anticipation of a decline in the market value of the security. The Fund may make short-sales to hedge positions, for duration and risk management, to maintain portfolio flexibility or to enhance returns. To complete a short-sale transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is obligated to replace the security borrowed by purchasing it subsequently at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund, which would result in a loss or gain, respectively.

The Fund will not sell securities short if, after effect is given to any such short sale, the total market value of all securities sold short would exceed 25% of the value of the Fund's net assets.

The Fund also may make short sales "against the box," in which the Fund enters into a short sale of a security it owns or has the immediate and unconditional right to acquire at no additional cost at the time of the sale.

Until the Fund closes its short position or replaces the borrowed security, it will: (a) segregate permissible liquid assets in an amount that, together with the amount provided as collateral, always equals the current value of the security sold short; or (b) otherwise cover its short position.

Forward Roll Transactions. To enhance current income, the Fund may enter into forward roll transactions with respect to Ginnie Maes and other mortgage-related securities. In a forward roll transaction, the Fund sells a mortgage-related security to a financial institution, such as a bank or broker-dealer, and simultaneously agrees to repurchase a similar security from the institution at a later date at an agreed upon price. The securities that are repurchased will bear the same interest rate as those sold, but generally will be collateralized by different pools of mortgages with different prepayment histories than those sold. During the period between the sale and repurchase, the Fund will not be entitled to receive interest and principal payments on the securities sold. Proceeds of the sale will be invested in short-term instruments, particularly repurchase agreements, and the income from these investments, together with any additional fee income received on the sale, will generate income for the Fund exceeding the yield on the securities sold. Forward roll transactions involve the risk that the market value of the securities sold by the Fund may decline below the purchase price of those securities. The Fund will segregate permissible liquid assets at least equal to the amount of the repurchase price (including accrued interest).

Forward Commitments. The Fund may purchase or sell Ginnie Maes and other mortgage-related securities on a forward commitment, when-issued or delayed-delivery basis, which means delivery and payment take place in the future after the date of the commitment to purchase or sell the securities at a predetermined price and/or yield. Typically, no interest accrues to the purchaser until the security is delivered. When purchasing a security on a forward commitment basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its net asset value. Because the Fund is not required to pay for these securities until the delivery date, these risks are in addition to the risks associated with the Fund's other investments. If the Fund is fully or almost fully invested when forward commitment purchases are outstanding, such purchases may result in a form of leverage. The Fund intends to engage in forward commitments to increase its portfolio's financial exposure to the types of securities in which it invests. Leveraging the portfolio in this manner will increase the Fund's exposure to changes in interest rates and will increase the volatility of its returns. The Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Ginnie Maes and other mortgage-related securities purchased on a forward commitment basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of

interest rates. Securities purchased on a forward commitment basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a forward commitment basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share.

Lending Portfolio Securities. The Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund's investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund's total assets (including the value of assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The Fund may participate in a securities lending program operated by The Bank of New York Mellon, as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Derivatives. In addition to mortgage-related securities and asset-backed securities, the Fund may invest in, or enter into, other derivatives for a variety of reasons, including to hedge certain market and interest rate risks, to provide a substitute for purchasing or selling particular securities or to increase potential returns. Generally, a derivative is a financial contract whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities and related indexes. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to invest than "traditional" securities would. Examples of derivative instruments that the Fund may use include options contracts, futures contracts and options on futures contracts, swap agreements and other credit derivatives. The Fund's portfolio manager may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by the Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance.

If the Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund's return or result in a loss. The Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. By contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Manager will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by the Fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Some derivatives the Fund may use may involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index). This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable. Pursuant to regulations and/or published positions of the SEC, the Fund may be required to segregate permissible liquid assets, or engage in other measures approved by the SEC or its staff, to "cover" the Fund's obligations relating to its transactions in derivatives. For example, in the case of futures contracts that are not contractually required to cash settle, the Fund must set aside liquid assets equal to such contracts' full notional value (generally, the total numerical value of the asset underlying a futures contract at the time of valuation) while the positions are open. With respect to futures contracts that are contractually required to cash settle, however, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligation (i.e., the Fund's daily net liability) under the contracts, if any, rather than such contracts' full notional value. By setting aside assets equal to only its net obligations under cash-settled futures

contracts, the Fund may employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional value of such contracts.

The Fund will not be a commodity pool. The Fund has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility, as a registered investment company, for an exclusion from the definition of commodity pool operator and that the Fund is not subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

Futures Transactions--In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date. The Fund may invest in futures contracts and options on futures contracts, including those with respect to interest rates, commodities, and security or commodity indexes. To the extent the Fund may invest in foreign currency-denominated securities, it also may invest in foreign currency futures contracts and options thereon.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying securities or index, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. Transaction costs also are included in these calculations.

The Fund may enter into futures contracts in U.S. domestic markets. Engaging in these transactions involves risk of loss to the Fund which could adversely affect the value of the Fund's net assets. Although the Fund intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures by the Fund also is subject to the Manager's ability to predict correctly movements in the direction of the relevant market, and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the

benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Specific Futures Transactions. The Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

The Fund may also purchase and sell index futures contracts. A securities index future obligates the Fund to pay or receive an amount of cash equal to a fixed dollar amount specified in the futures contract multiplied by the difference between the settlement price of the contract on the contract's last trading day and the value of the index based on the prices of the securities that comprise it at the opening of trading in such securities on the next business day.

Options--In General. The Fund may invest up to 5% of its assets, represented by the premium paid, in the purchase of call and put options with respect to specific securities or futures contracts. The Fund may write (i.e., sell) covered call and put option contracts to the extent of 20% of the value of its net assets at the time such option contracts are written. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by the Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction such as by segregating permissible liquid assets. A put option written by the Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken or otherwise covers the transaction. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be

able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. The Fund may purchase and sell call and put options in respect of specific securities (or groups or "baskets" of specific securities) or indices listed on national securities exchanges or traded in the over-the-counter market. An option on an index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the securities index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. Thus, the effectiveness of purchasing or writing securities index options will depend upon price movements in the level of the index rather than the price of a particular security.

The Fund may purchase cash-settled options on interest rate swaps, described below, in pursuit of its investment objective. A cash-settled option on a swap gives the purchaser the right, but not the obligation, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date.

Successful use by the Fund of options will be subject to the Manager's ability to predict correctly movements in interest rates and prices of securities underlying options. To the extent the Manager's predictions are incorrect, the Fund may incur losses.

Swap Transactions and Other Credit Derivatives. The Fund may engage in swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, credit default swaps, and index swap agreements and other credit derivative products, to seek to mitigate risk, manage maturity and duration, reduce portfolio turnover, or obtain a particular desired return at a lower cost to the Fund than if the Fund had invested directly in an instrument that yielded the desired return. The Fund also may enter into options on swaps, sometimes called "swaptions."

Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are generally calculated with respect to a "notional amount" (i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, or in a "basket" of credit default swaps or securities representing a particular index.) The "notional amount" of swap agreement is only used as a basis upon which to calculate the obligations that the parties to a swap agreement have agreed to exchange.

Most swap agreements entered into by the Fund are cash settled and calculate the obligations of the parties to the agreement on a "net basis." Thus, the Fund's current obligations (or rights) under a swap agreement generally will be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid new amounts owed to a swap counterparty will be covered by the segregation of permissible liquid assets of the Fund.

A swap option is a contract that gives counterparty the right (but not the obligation) in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. A cash-settled option on a swap gives the purchaser the right in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms. Depending on the terms of particular option agreement, the Fund generally will incur a greater degree of risk when it writes a swap option than it will incur when it purchases a swap option. When the Fund purchases a swap option, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when the Fund writes a swap option, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.

Interest rate swaps are over-the-counter contracts in which one party agrees to make a periodic interest payment based on an index or the value of an asset in return for a periodic payment from the other party based on a different index or asset. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index rises above a predetermined interest rate, to receive payments of interest on a notional principal amount from party selling such interest rate cap. Interest rate collars involve selling a cap and purchasing a floor or vice versa to protect the Fund against interest rate movements exceeding given minimum or maximum levels.

The Fund may enter into credit default swap agreements and similar agreements, which may have as reference obligations securities that are or are not currently held by the Fund. The protection “buyer” in a credit default contract may be obligated to pay the protection “seller” an up front payment or a periodic stream of payments over the term of the contract provided generally that no credit event on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the “par value” (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. The Fund may be either the buyer or the seller in the transaction. If the Fund is a buyer and no credit event occurs, the Fund recovers nothing if the swap is held through its termination date. However, if a credit event occurs, the Fund may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. As a seller, the Fund generally receives as up front payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller may pay the buyer the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. Credit default swaps and similar instruments involve greater risks than if the Fund had invested in the reference obligation directly, since, in addition to general market risks, they are subject to illiquidity risk, counterparty risk and credit risk.

The Fund may invest in credit linked securities issued by a limited purpose trust or other vehicle that, in turn, invests in a derivative instrument or basket of derivative instruments, such as credit default swaps or interest rate swaps, to obtain exposure to certain fixed income markets or to remain fully invested when more traditional income producing securities are not available. Like an investment in a bond, an investment in these credit linked securities represents the right to receive periodic income payments (in the form of distributions) and payments of principal at the end of the term of the security. However, these payments are conditioned on the issuer's receipt of payment from, and the issuer's potential obligations to, the counterparties to certain derivative instruments entered into by the issuer of the credit linked security. For example, the issuer may sell one or more credit default swaps entitling the issuer to receive a stream of payments over the term of the swap agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par (or other agreed upon value) of the referenced debt obligation.

The use of credit derivatives is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If the Manager is incorrect in its forecasts of default risks, market spreads or other applicable factors, or a counterparty defaults, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. In addition, it is possible that developments in the credit derivatives market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap or other credit derivative agreements or to realize amounts to be received under such agreements.

The Fund will enter into swap and other credit derivatives transactions only when the Manager believes it would be in the best interests of the Fund to do so. In addition, the Fund will enter into swap and other credit derivative agreements only with counterparties that meet certain standards of creditworthiness (generally, such counterparties would have to be eligible counterparties under the terms of the Fund's repurchase agreement guidelines).

Future Developments. The Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before the fund enters into such transactions or makes any such investment, the Fund will provide appropriate disclosure in the Prospectus or this Statement of Additional Information.

Certain Investment Considerations and Risks

Fixed-Income Securities. Even though interest-bearing securities are investments which promise a stable stream of income, the prices of such securities generally are inversely affected by changes in interest rates and, therefore, are subject to the risk of market price fluctuations. Certain securities that may be purchased by the Fund, such as those with interest rates that fluctuate directly or indirectly based on multiples of a stated index, are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and possibly loss of principal. The values of fixed-income securities also may be affected

by changes in the credit rating or financial condition of the issuer. Once the rating of a portfolio security has been changed, the Fund will consider all circumstances deemed relevant in determining whether to continue to hold the security.

Mortgage-Related Securities. Mortgage-related securities are complex derivative instruments, subject to both credit and prepayment risk, and may be more volatile and less liquid than more traditional debt securities. Although certain mortgage-related securities are guaranteed by a third party (such as a U.S. Government agency or instrumentality with respect to government-related mortgage-backed securities) or otherwise similarly secured, the market value of these securities, which may fluctuate, is not secured. If a mortgage-related security is purchased at a premium, all or part of the premium may be lost if there is a decline in the market value of the security, whether resulting from changes in interest rates or prepayments on the underlying mortgage collateral. Mortgage-related securities are subject to credit risks associated with the performance of the underlying mortgage properties. Adverse changes in economic conditions and circumstances are more likely to have an adverse impact on mortgage-related securities secured by loans on certain types of commercial properties than those secured by loans on residential properties. In addition, these securities are subject to prepayment risk, although commercial mortgages typically have shorter maturities than residential mortgages and prepayment protection features. Some mortgages-related securities have structures that make their reactions to interest rate changes and other factors difficult to predict, making their value highly volatile.

Investment Restrictions

Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in Ginnie Mae certificates which are guaranteed as to the timely payment of interest and principal by the GNMA (or other instruments with similar economic characteristics). The Fund has adopted a policy to provide its shareholders with at least 60 days' prior written notice of any change in its policy to so invest its assets.

The Fund's investment objective is a fundamental policy, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. In addition, the Fund has adopted investment restrictions numbered 1 through 7 as fundamental policies. Investment restrictions numbered 8 through 11 are not fundamental policies and may be changed by a vote of a majority of the Fund's Board members at any time. The Fund may not:

1. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowing to no more than 33-1/3% of the value of the Fund's total assets). For purposes of this Investment Restriction, the entry into options, forward contracts, futures contracts, including those relating to indexes, and options on futures contracts or indexes shall not constitute borrowing.

2. Purchase securities on margin, but the Fund may make margin deposits in connection with transactions in options, forward contracts, futures contracts, including those related to indexes, and options on futures contracts or indexes.

3. Underwrite the securities of other issuers, except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.

4. Purchase or sell real estate, real estate investment trust securities, commodities, or oil and gas interests, provided that the Fund may purchase and sell securities that are secured by real estate or issued by companies that invest or deal in real estate or acquire real estate as a result of ownership of such securities or instruments, and provided further that the Fund may purchase and sell options, forward contracts, futures contracts, including those relating to indexes, and options on futures contracts or indexes.

5. Make loans to others, except through the purchase of debt obligations referred to in the Prospectus or the entry into repurchase agreements. However, the Fund may lend its portfolio securities in an amount not to exceed 33-1/3% of the value of its total assets. Any loans of portfolio securities will be made according to guidelines established by the SEC and the Fund's Board.

6. Invest more than 25% of the value of its total assets in the securities of issuers in any single industry, provided that there shall be no limitation on the purchase of securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. For purposes of this Investment Restriction, securities and instruments backed directly or indirectly by real estate and real estate mortgages and securities of companies engaged in the real estate business are not considered an industry.

7. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except to the extent that the activities permitted in Investment Restriction Nos. 1, 2, 4 and 9 may be deemed to give rise to a senior security.

8. Invest in securities of other investment companies, except to the extent permitted under the 1940 Act.

9. Pledge, hypothecate, mortgage or otherwise encumber its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the deposit of assets in escrow in connection with the purchase of securities on a when-issued or delayed-delivery basis and collateral and initial or variation margin arrangements with respect to options, forward contracts, futures contracts, including those related to indexes, and options on futures contracts or indexes.

10. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities which are illiquid if, in the aggregate, more than 15% of the value of the Fund's net assets would be so invested.

11. Purchase common stocks, preferred stocks, warrants or other equity securities, or purchase corporate bonds or debentures, state bonds, municipal bonds or industrial revenue bonds.

With respect to Investment Restriction No. 1, however, if borrowings exceed 33-1/3% of the value of the Fund's total assets as a result of a change in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

MANAGEMENT OF THE FUND

The Fund's Board is responsible for the management and supervision of the Fund, and approves all significant agreements with those companies that furnish services to the Fund. These companies are as follows:

The Dreyfus Corporation	Investment Adviser
MBSC Securities Corporation	Distributor
Dreyfus Transfer, Inc.	Transfer Agent
The Bank of New York Mellon.	Custodian

Board members of the Fund, together with information as to their positions with the Fund, principal occupations and other board memberships and affiliations, are shown below.

Board Members of the Fund¹

Name (Age) <u>Position with Fund (Since)</u>	<u>Principal Occupation</u> <u>During Past 5 Years</u>	<u>Other Board Memberships and Affiliations</u>
Joseph S. DiMartino (64) Chairman of the Board (1995)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium sized companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i> Sunair Services Corporation, a provider of certain outdoor-related services to homes and businesses, <i>Director</i>
David W. Burke (72) Board Member (1994)	Corporate Director and Trustee	John F. Kennedy Library Foundation, <i>Director</i>
William Hodding Carter III (73) Board Member (2006)	Professor of Leadership & Public Policy, University of North Carolina, Chapel Hill (January 1, 2006-present) President and Chief Executive Officer of the John S. and James L. Knight Foundation (February 1, 1998–February 1, 2006)	The Century Foundation, a tax exempt research foundation, <i>Emeritus Director</i> The Enterprise Corporation of the Delta, a non-profit economic development organization <i>Director</i>
Gordon J. Davis (66) Board Member (1995)	Partner in the law firm of LeBoeuf, Lamb, Greene & MacRae, LLP	Consolidated Edison, Inc., a utility company, <i>Director</i> Phoenix Companies, Inc., a life insurance company,

¹ None of the Board members are "interested persons" of the Fund, as defined in the 1940 Act.

	President, Lincoln Center for The Performing Arts, Inc. (2001)	<i>Director</i> Board Member/Trustee for several not-for-profit groups
Joni Evans (66) Board Member (1985)	Chief Executive Officer, www.wowOwow.com , an online community dedicated to women's conversations and publications Principal, Joni Evans Ltd. Senior Vice President of the William Morris Agency (2005)	None
Ehud Houminer (67) Board Member (2006)	Executive-in-Residence at the Columbia Business School, Columbia University	Avnet Inc., an electronics distributor, <i>Director</i> International Advisory Board to the MBA Program School of Management, Ben Gurion University, <i>Chairman</i>
Richard C. Leone (68) Board Member (2006)	President of the Century Foundation (formerly, The Twentieth Century Fund, Inc.), a tax exempt research foundation engaged in the study of economic, foreign policy and domestic issues	The American Prospect, <i>Director</i> Center for American Progress, <i>Director</i>
Hans C. Mautner (70) Board Member (2006)	President – International Division and an Advisory Director of Simon Property Group, a real estate investment company (1998-present) Director and Vice Chairman of Simon Property Group (1998 – 2003) Chairman and Chief Executive Officer of Simon Global Limited, a real estate company (1999 – present)	Capital and Regional PLC, a British co-investing real estate asset manager, <i>Director</i> Member – Board of Managers of: Mezzacappa Long/Short Fund LLC Mezzacappa Partners LLC Member, Advisory Board, Lehman Brothers European Real Estate Private Equity Fund
Robin A. Melvin (44) Board Member (2006)	Director, Boisi Family Foundation, a private family foundation that supports youth-serving organizations that promote the sufficiency of youth from disadvantaged circumstances Senior Vice President, Mentor, a national non-profit youth mentoring organization (2005)	None
Burton N. Wallack (57) Board Member (1991)	President and Co-owner of Wallack Management Company, a real estate	None

management company

John E. Zuccotti (71)
Board Member (2006)

Chairman of Brookfield
Financial Properties, Inc.
Senior Counsel of Weil, Gotshal
& Manges, LLP
Emeritus Chairman of the Real
Estate
Board of New York

Emigrant Savings Bank, *Director*
Wellpoint, Inc., *Director*
Columbia University, *Trustee*
Doris Duke Charitable Foundation, *Trustee*

Board members are elected to serve for an indefinite term. The Fund has standing audit, nominating and compensation committees, each comprised of its Board members who are not "interested persons" of the Fund, as defined in the 1940 Act. The function of the audit committee is (i) to oversee the Fund's accounting and financial reporting processes and the audits of the Fund's financial statements and (ii) to assist in the Board's oversight of the integrity of the Fund's financial statements, the Fund's compliance with legal and regulatory requirements and the independent registered public accounting firm's qualifications, independence and performance. The Fund's nominating committee is responsible for selecting and nominating persons as members of the Board for election or appointment by the Board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the committee takes into consideration various factors listed in the nominating committee charter, including character and integrity, business and professional experience, and whether the committee believes the person has the ability to apply sound and independent business judgment and would act in the interest of the Fund and its shareholders. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Fund, c/o The Dreyfus Corporation Legal Department, 200 Park Avenue, 8th Floor East, New York, New York 10166, which includes information regarding the recommended nominee as specified in the nominating committee charter. The function of the compensation committee is to establish the appropriate compensation for serving on the Board. The Fund also has a standing pricing committee comprised of any one Board member. The function of the pricing committee is to assist in valuing the Fund's investments. The Fund's audit committee met four times and the compensation and nominating committees each met once during the fiscal year ended April 30, 2008. The Fund's pricing committee did not meet during the last fiscal year.

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2007.

<u>Name of Board Member</u>	<u>The Fund</u>	<u>Aggregate Holding of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member</u>
Joseph S. DiMartino	None	Over \$100,000
David W. Burke	None	Over \$100,000
William Holding Carter III	None	Over \$100,000
Gordon J. Davis	None	\$50,001-\$100,000
Joni Evans	None	None

<u>Name of Board Member</u>	<u>The Fund</u>	<u>Aggregate Holding of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member</u>
Ehud Houminer	None	Over \$100,000
Richard C. Leone	None	Over \$100,000
Hans C. Mautner	None	Over \$100,000
Robin A. Melvin	None	Over \$100,000
Burton N. Wallack	None	None
John E. Zuccotti	None	Over \$100,000

As of December 31, 2007, none of the Board members or their immediate family members owned securities of the Manager, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager or the Distributor.

The Fund currently pays its Board members an annual retainer of \$50,000 and a fee of \$6,500 per meeting (with a minimum of \$500 per meeting and per telephone meeting) attended for the Fund and 17 other funds (comprised of 28 portfolios) in the Dreyfus Family of Funds, and reimburses them for their expenses. The Chairman of the Board receives an additional 25% of such compensation. Emeritus Board members receive an annual retainer and a per meeting attended fee of one-half the amount payable to them as Board members. The aggregate amount of compensation paid to each Board member by the Fund for the fiscal year ended April 30, 2008, and by all funds in the Dreyfus Family of Funds for which such person was a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) during the year ended December 31, 2007, were as follows:

<u>Name of Board Member</u>	<u>Aggregate Compensation From the Fund*</u>	<u>Total Compensation From the Fund and Fund Complex Paid to Board Member(**)</u>
Joseph S. DiMartino	\$6,845	\$819,865 (196)
David W. Burke	\$4,733	\$347,479 (83)
William Hodding Carter III	\$5,094	\$84,729 (30)
Gordon J. Davis	\$5,094	\$137,942 (39)
Joni Evans	\$4,725	\$78,229 (30)
Arnold S. Hiatt [†]	\$1,249	\$43,346 (30)
Ehud Houminer	\$5,094	\$223,500 (79)
Richard C. Leone	\$4,334	\$78,000 (30)
Hans C. Mautner	\$4,334	\$77,729 (30)
Robin A. Melvin	\$4,714	\$78,729 (30)

<u>Name of Board Member</u>	<u>Aggregate Compensation From the Fund*</u>	<u>Total Compensation From the Fund and Fund Complex Paid to Board Member(**)</u>
Burton N. Wallack	\$5,094	\$85,229 (30)
<u>John E. Zuccotti</u>	\$5,094	\$84,729 (30)

* Amount does not include the cost of office space, secretarial services and health care benefits for the Chairman and expenses reimbursed to Board members for attending Board meetings, which in the aggregate amounted to \$9,127.

** Represents the number of separate portfolios comprising the investment companies in the Fund Complex, including the Fund, for which the Board member serves.

† Emeritus Board member since May 26, 2007.

Officers of the Fund

J. DAVID OFFICER, President since December 2006. Chief Operating Officer, Vice Chairman and a director of the Manager, and an officer of 76 investment companies (comprised of 160 portfolios) managed by the Manager. He is 59 years old and has been an employee of the Manager since April 1998.

PHILLIP N. MAISANO, Executive Vice President since July 2007. Chief Investment Officer, Vice Chair and a director of the Manager, and an officer of 76 investment companies (comprised of 160 portfolios) managed by the Manager. Mr. Maisano also is an officer and/or board member of certain other investment management subsidiaries of The Bank of New York Mellon Corporation (“BNY Mellon”), each of which is an affiliate of the Manager. He is 61 years old and has been an employee of the Manager since November 2006. Prior to joining the Manager, Mr. Maisano served as Chairman and Chief Executive Officer of EACM Advisors, an affiliate of the Manager, since August 2004, and served as Chief Executive Officer of Evaluation Associates, a leading institutional investment consulting firm, from 1988 until 2004.

MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005. Assistant General Counsel of BNY Mellon, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 48 years old and has been an employee of the Manager since October 1991.

JAMES BITETTO, Vice President and Assistant Secretary since August 2005. Senior Counsel of BNY Mellon and Secretary of the Manager, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 42 years old and has been an employee of the Manager since December 1996.

JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005. Senior Counsel of BNY Mellon, and an officer of 77 investment companies (comprised of 177

portfolios) managed by the Manager. She is 52 years old and has been an employee of the Manager since October 1988.

JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005. Senior Counsel of BNY Mellon, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 46 years old and has been an employee of the Manager since June 2000.

JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005. Assistant General Counsel of BNY Mellon, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. She is 45 years old and has been an employee of the Manager since February 1984.

JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005. Managing Counsel of BNY Mellon, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since February 1991.

ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005. Managing Counsel of BNY Mellon, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 56 years old and has been an employee of the Manager since May 1986.

JEFF PRUSNOFSKY, Vice President and Assistant Secretary since August 2005. Managing Counsel of BNY Mellon, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since October 1990.

JAMES WINDELS, Treasurer since November 2001. Director-Mutual Fund Accounting of the Manager, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since April 1985.

GAVIN C. REILLY, Assistant Treasurer since December 2005. Tax Manager of the Investment Accounting and Support Department of the Manager, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 39 years old and has been an employee of the Manager since April 1991.

RICHARD CASSARO, Assistant Treasurer since January 2008. Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since 1982.

ROBERT S. ROBOL, Assistant Treasurer since August 2003. Senior Accounting Manager – Fixed Income Funds of the Manager, and an officer of 77 investment companies

(comprised of 177 portfolios) managed by the Manager. He is 44 years old and has been an employee of the Manager since October 1988.

ROBERT SALVIOLO, Assistant Treasurer since July 2007. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since June 1989.

ROBERT SVAGNA, Assistant Treasurer since August 2005. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 77 investment companies (comprised of 177 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since November 1990.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since October 2002. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 73 investment companies (comprised of 173 portfolios) managed by the Manager. He is 37 years old and has been an employee of the Distributor since October 1998.

JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004. Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (77 investment companies, comprised of 177 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 51 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

The address of each Board member and officer of the Fund is 200 Park Avenue, New York, New York 10166.

The Fund's Board members and officers, as a group, owned less than 1% of the Fund's voting securities outstanding on August 11, 2008. See "Information About the Fund" for a list of shareholders known by the Fund, to own of record 5% or more of the Fund's outstanding voting securities as of August 11, 2008.

MANAGEMENT ARRANGEMENTS

The Manager is a wholly-owned subsidiary of BNY Mellon, a global financial services company focused on helping clients move and manage their financial assets, operating in 34 countries and serving more than 100 markets. BNY Mellon is a leading provider of financial services for institutions, corporations and high-net-worth individuals, providing asset and wealth management, asset servicing, issuer, and treasury services through a worldwide client-focused team.

The Manager provides management services pursuant to a Management Agreement (the "Agreement") between the Fund and the Manager. The Agreement is subject to annual approval by (i) the Fund's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event its continuance also is approved by a majority of the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. The Agreement is terminable without penalty, on not more than 60 days' notice, by the Fund's Board or by vote of the holders of a majority of the Fund's shares, or, upon not less than 90 days' notice, by the Manager. The Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of the Manager: Jonathan Little, Chair of the Board; Jonathan Baum, Chief Executive Officer and a director; J. Charles Cardona, President and a director; Diane P. Durnin, Vice Chair and a director; Phillip N. Maisano, Chief Investment Officer, Vice Chair and a director; J. David Officer, Chief Operating Officer, Vice Chair and a director; Dwight Jacobsen, Executive Vice President; Patrice M. Kozlowski, Senior Vice President-Corporate Communications; Jill Gill, Vice President-Human Resources; Anthony Mayo, Vice President-Information Systems; Theodore A. Schachar, Vice President-Tax; John E. Lane, Vice President; Jeanne M. Login, Vice President; Gary Pierce, Controller; Joseph W. Connolly, Chief Compliance Officer; James Bitetto, Secretary; and Mitchell E. Harris, Ronald P. O'Hanley III and Scott E. Wennerholm, directors.

The Manager maintains office facilities on behalf of the Fund, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Fund. The Manager may pay the Distributor for shareholder services from the Manager's own assets, including past profits but not including the management fee paid by the Fund. The Distributor may use part or all of such payments to pay certain financial institutions (which may include banks), securities dealers ("Selected Dealers") and other industry professional (collectively, "Service Agents") in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

BNY Mellon and its affiliates may have deposit, loan and commercial banking or other relationships with the issuers of securities purchased by the Fund. The Manager has informed management of the Fund that in making its investment decisions it does not obtain or use material inside information that BNY Mellon or its affiliates may possess with respect to such issuers.

The Fund, the Manager and the Distributor each have adopted a Code of Ethics, that permits its personnel, subject to such Code of Ethics, to invest in securities that may be purchased or held by the Fund. The Code of Ethics subjects the personal securities transactions of the Manager's employees to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics and are also subject to the oversight of BNY Mellon's Investment Ethics Committee (the "Committee").

Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

Portfolio Managers. The Manager provides day-to-day management of the Fund's portfolio of investments in accordance with the stated policies of the Fund, subject to the approval of the Fund's Board members. The Manager is responsible for investment decisions, and provides the Fund with portfolio managers who are authorized by the Fund's Board to execute purchases and sales of securities. The Fund's portfolio managers are Robert Bayston and Peter Vaream, each of whom is employed by Dreyfus and Standish Mellon Asset Management Company, LLC ("Standish"), a subsidiary of BNY Mellon and an affiliate of Dreyfus. The Manager and/or its affiliates also maintain research departments each with a professional staff of portfolio managers and securities analysts who provide research services for the Fund and for other funds advised by the Manager.

Portfolio Manager Compensation. Portfolio manager compensation is comprised of a market-based salary, an annual incentive plan and a long-term incentive plan. The portfolio managers are compensated by Standish and not by the Fund. Portfolio managers are eligible to join the BNY Mellon deferred compensation program, and the BNY Mellon defined contribution pension plan, pursuant to which employer contributions are invested in BNY Mellon common stock.

Under the annual incentive plan, portfolio managers may receive a bonus of up to two times their annual salary, at the discretion of management. In determining the amount of the bonus, significant consideration is given to the portfolio manager's one-year (weighted 50%) and three-year (weighted 50%) pre-tax performance compared to that of appropriate peer groups. Other factors considered are individual qualitative performance, asset size and revenue growth of the product managed by the portfolio manager.

Under the long-term incentive plan, restricted BNY Mellon stock and phantom Standish stock is awarded based on the discretion of management based on individual performance and contributions to the BNY Mellon organization.

Additional Information About Portfolio Managers. The following table lists the number and types of other accounts advised by the Fund's primary portfolio manager and assets under management in those accounts as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Registered Investment Company Accounts</u>	<u>Assets Managed</u>	<u>Pooled Accounts</u>	<u>Assets Managed</u>	<u>Other Accounts</u>	<u>Assets Managed</u>
Robert Bayston	4	\$422.67 Million	0	0.00	34	15,010.17 Million

None of the funds or accounts are subject to a performance-based advisory fee.

The dollar range of Fund shares beneficially owned by the primary portfolio manager are as follows as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Fund Name</u>	<u>Dollar Range of Fund Shares Beneficially Owned</u>
Robert Bayston	Dreyfus Premier GNMA Fund, Inc.	None

Portfolio managers may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of institutions such as pension funds, insurance companies and foundations), bank common trust accounts and wrap fee programs ("Other Accounts").

Potential conflicts of interest may arise because of Dreyfus' management of the Funds and Other Accounts. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Dreyfus may be perceived as causing accounts it manages to participate in an offering to increase Dreyfus' overall allocation of securities in that offering, or to increase Dreyfus' ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as Dreyfus may have an incentive to allocate securities that are expected to increase in value to preferred accounts. Initial public offerings, in particular, are frequently of very limited availability. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the Fund, that they are managing on behalf of Dreyfus. Dreyfus periodically reviews each portfolio manager's overall responsibilities to ensure that he or she is able to allocate the necessary time and resources to effectively manage the Fund. In addition, Dreyfus could be viewed as having a conflict of interest to the extent that Dreyfus or its affiliates and/or portfolio managers have a materially larger investment in Other Accounts than their investment in the Fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the Fund. For these or other reasons, the portfolio managers may purchase different securities for the Fund and the Other Accounts, and the performance of securities purchased for the Fund may vary from the performance of securities purchased for Other Accounts. The portfolio managers may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the Fund, which could have the potential to adversely impact the Fund, depending on market conditions.

A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in another account, such as when a purchase increases the value of securities previously purchased by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Conflicts of interest similar to those described above arise when portfolio managers are employed by a sub-investment adviser or are dual employees of the Manager and an affiliated entity and such portfolio managers also manage Other Accounts.

Dreyfus' goal is to provide high quality investment services to all of its clients, while meeting Dreyfus' fiduciary obligation to treat all clients fairly. Dreyfus has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that it believes address the conflicts associated with managing multiple accounts for multiple clients. In addition, Dreyfus monitors a variety of areas, including compliance with Fund guidelines, the allocation of IPOs, and compliance with the Dreyfus' Code of Ethics. Furthermore, senior investment and business personnel at Dreyfus periodically review the performance of the portfolio managers for Dreyfus-managed funds.

Expenses. All expenses incurred in the operation of the Fund are borne by the Fund, except to the extent specifically assumed by the Manager. The expenses borne by the Fund include, without limitations: taxes, interest, loan commitment fees, interest and distributions paid on securities sold short, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager, or its affiliates, SEC fees and state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of independent pricing services, costs of maintaining corporate existence, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of shareholders' reports and corporate meetings, and any extraordinary expenses. In addition, each class of shares bears any class specific expenses allocated to such class, such as expenses related to the distribution and/or shareholder servicing of such class. Shares of Class A, Class B and Class C are subject to an annual shareholder services fee and Class B and Class C shares are subject to an annual distribution fee. Shares of Class Z are subject to a fee for distribution and servicing. See "Distribution Plan, Service Plan and Shareholder Services Plan."

As compensation for the Manager's services, the Fund has agreed to pay the Manager a monthly management fee at the annual rate of 0.60% of the value of the Fund's average daily net assets. The management fees paid by the Fund for the fiscal years ended April 30, 2006, 2007, and 2008, amounted to \$4,966,181, \$4,370,610 and 4,492,893, respectively. For the fiscal year ended April 30, 2006, the amount was reduced by \$702,239 and for the fiscal year ended April 30, 2008 the amount was reduced by \$341,961, pursuant to an undertaking by the Manager resulting in net fees of \$4,263,942 in fiscal 2006 and \$4,150,932 in fiscal 2008, respectively, being paid by the Fund to the Manager.

The Manager has agreed that if in any fiscal year the aggregate expenses of Class Z shares of the Fund, exclusive of taxes, brokerage fees, interest on borrowings and (with the prior written consent of the necessary state securities commissions) extraordinary expenses, but including the management fee, exceed 1½% of the value of the Fund's average net assets attributable to Class Z shares of the Fund for the fiscal year, the Fund may deduct from the payment to be made to the Manager under the Agreement, or the Manager will bear, such excess expense with respect to Class Z of the Fund. Such deduction or payment, if any, will be estimated, reconciled and effected or paid, as the case may be, on a monthly basis.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of the Fund's net assets increases.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager, located at 200 Park Avenue, New York, New York 10166, serves as the Fund's distributor on a best efforts basis pursuant to an agreement with the Fund which is renewable annually. The Distributor also acts as distributor for the other funds in the Dreyfus Family of Funds, BNY Mellon Funds Trust and the Mellon Institutional Funds. Before June 30, 2007, the Distributor was known as "Dreyfus Service Corporation."

The Distributor compensates Service Agents for selling Class A shares subject to a contingent deferred sales charge ("CDSC") and Class C shares at the time of purchase from its own assets. The Fund does not offer Class B shares except in connection with dividend reinvestment and permitted exchanges. The proceeds of the CDSC and fees pursuant to the Fund's Distribution Plan (described below), in part, are used to defray the expenses incurred by the Distributor in connection with the sale of the applicable Class of shares. The Distributor also may act as a Service Agent and retain sales loads and CDSCs and Distribution Plan fees. For purchases of Class A shares subject to a CDSC, the Distributor generally will pay Service Agents on new investments made through such Service Agents a commission of up to 1% of the amount invested. The Distributor generally will pay Service Agents 1% on new investments of Class C shares made through such Service Agents, and generally paid Service Agents 4% on new investments of Class B shares made through such Service Agents, of the net asset value of such shares purchased by their clients. With respect to Class B shares of the Fund issued to shareholders in exchange for shares originally issued by a series of The Bear Stearns Funds (the "Acquired Fund"), the proceeds of any CDSC and fees pursuant to the Distribution Plan with respect to such Class B shares are payable to the Acquired Fund's former distributor to defray the expenses it incurred in connection with the sale of such shares when originally issued by the Acquired Fund.

For the fiscal year ended April 30, 2008, the amounts retained by the Distributor from sales loads and from CDSC's, as applicable, with respect to Class A, Class B and Class C shares, were \$0, \$33,072 and \$0, respectively.

The Distributor may pay Service Agents that have entered into agreements with the Distributor a fee based on the amount invested through such Service Agents in Fund shares by employees participating in qualified or non-qualified employee benefit plans, including pension, profit-sharing and other deferred compensation plans, whether established by corporations, partnerships, non-profit entities or state and local governments ("Retirement Plans"), or other programs. The term "Retirement Plans" does not include IRAs, IRA "Rollover Accounts" or IRAs set up under Simplified Employee Pension Plans ("SEP-IRAs"). Generally, the Distributor may pay such Service Agents a fee of up to 1% of the amount invested through the Service Agents. The Distributor, however, may pay Service Agents a higher fee and reserves the right to cease paying these fees at any time. The Distributor will pay such fees from its own funds, other than amounts received from the Fund, including past profits or any other source available to it. Sponsors of such Retirement Plans or the participants therein should consult their Service Agent for more information regarding any such fee payable to the Service Agent.

The Manager or the Distributor may provide additional cash payments out of its own resources to financial intermediaries that sell shares of the Fund or provide other services. Such

payments are separate from to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the Fund to those intermediaries. Because those payments are not made by you or the Fund, the Fund's total expense ratio will not be affected by any such payments. These additional payments may be made to Service Agents, including affiliates that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid from the Manager's or the Distributor's own resources to Service Agents for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing". From time to time, the Manager or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations. In some cases, these payments or compensation may create an incentive for a Service Agent to recommend or sell shares of the Fund to you. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

Transfer and Dividend Disbursing Agent and Custodian. Dreyfus Transfer, Inc. (the "Transfer Agent"), a wholly-owned subsidiary of the Manager, located at 200 Park Avenue, New York, New York 10166, is the Fund's transfer and dividend disbursing agent. Under a transfer agency agreement with the Fund, the Transfer Agent arranges for the maintenance of shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by the Fund. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses.

The Bank of New York Mellon (the "Custodian"), an affiliate of the Manager, located at One Wall Street New York, New York 10286, is the Fund's custodian. Under a custody agreement with the Fund, the Custodian holds the Fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of the Fund's assets held in custody and receives certain securities transactions charges.

HOW TO BUY SHARES

General. Class A and Class C shares of the Fund may be purchased only by clients of Service Agents, including the Distributor. Subsequent purchases may be sent directly to the Transfer Agent or your Service Agent. You will be charged a fee if an investment check is returned unpayable. Share certificates are issued only upon your written request. No certificates are issued for fractional shares.

Class Z shares are offered only to shareholders of the Fund with Fund accounts that existed on the date the Fund's shares were classified as Class Z shares, and who continue to maintain accounts with the Fund at the time of purchase. In addition, certain broker-dealers and

other financial institutions maintaining accounts with the Fund at that time may open new accounts in Class Z on behalf of qualified retirement plans and "wrap accounts" or similar programs. Class Z shares generally are not available for new accounts.

Class B shares of the Fund are offered only in connection with dividend reinvestment and exchanges of Class B shares of certain other funds advised by Dreyfus or by Founders Asset Management LLC ("Founders"), an indirect subsidiary of Dreyfus, or shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. held in an Exchange Account (as defined under "Shareholder Services—Fund Exchanges") as a result of a previous exchange of Class B shares. No new or subsequent investments, including through automatic investment plans, are allowed in Class B shares of the Fund, except through dividend reinvestment or permitted exchanges. For Class B shares acquired upon reinvestment of dividends, all Class B attributes, including associated CDSC schedules, conversion to Class A features and Distribution and Shareholder Services Plan fees, will continue in effect.

The Fund reserves the right to reject any purchase order. The Fund will not establish an account for a "foreign financial institution," as that term is defined in Department of the Treasury rules implementing section 312 of the USA PATRIOT Act of 2001. Foreign financial institutions include: foreign banks (including foreign branches of U.S. depository institutions); foreign offices of U.S. securities broker-dealers, futures commission merchants, and mutual funds; non-U.S. entities that, if they were located in the United States, would be securities broker-dealers, futures commission merchants or mutual funds; and non-U.S. entities engaged in the business of a currency dealer or exchanger or a money transmitter.

When purchasing Fund shares, you must specify which Class is being purchased. Your Service Agent can help you choose the share class that is appropriate for your investment. The decision as to which Class of shares is most beneficial to you depends on a number of factors, including the amount and the intended length of your investment in the Fund. Please refer to the Fund's Prospectus for a further discussion of those factors.

In many cases, neither the Distributor nor the Transfer Agent will have the information necessary to determine whether a quantity discount or reduced sales charge is applicable to a purchase. You or your Service Agent must notify the Distributor whenever a quantity discount or reduced sales charge is applicable to a purchase and must provide the Distributor with sufficient information at the time of purchase to verify that each purchase qualifies for the privilege or discount.

Service Agents may receive different levels of compensation for selling different Classes of shares. Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this Statement of Additional Information, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. As discussed under "Management Arrangements – Distributor," Service Agents may receive revenue sharing payments from the Manager or the Distributor. The receipt of such payments could create an incentive for a Service Agent to recommend or sell shares of the Fund instead of other mutual funds where such payments are not received. You should consult your Service Agent for details about any payments they may receive in connection with the sale of Fund shares or the provision of services to the Fund.

For Class A, Class C and Class Z shares of the Fund, the minimum initial investment is \$1,000. Subsequent investments must be at least \$100. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. Fund shares are offered without regard to the minimum initial investment requirements to Board members of a fund advised by the Manager, including members of the Fund's Board, who elect to have all or a portion of their compensation for serving in that capacity automatically invested in the Fund. Fund shares are offered without regard to the minimum initial or subsequent investment amount requirements to investors purchasing Fund shares through wrap fee accounts or other fee-based programs. The Fund reserves the right to vary further the initial and subsequent investment minimum requirements at any time.

The minimum initial investment through an exchange for Class B shares of the Fund is \$1,000. Subsequent exchanges for Class B shares of the Fund must be at least \$500.

Class A, Class C and Class Z shares of the Fund also may be purchased through Dreyfus-Automatic Asset Builder[®], Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

The Fund's shares are sold on a continuous basis. Net asset value per share of each Class is determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern Time), on each day the New York Stock Exchange is open for regular business. For purposes of determining net asset value, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share of each Class is computed by dividing the value of the net assets of the Fund represented by such Class (i.e., the value of its assets less liabilities) by the total number of shares of such Class outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

If an order is received in proper form by the Transfer Agent or other entity authorized to receive orders on behalf of the Fund by the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time) on a business day, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange on the next business day, except where shares are purchased through a dealer as provided below.

Orders for the purchase of Fund shares received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee by the close of its business day (usually 5:15 p.m., Eastern time) will be based on the public offering price per share determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the orders will be based on the next determined public offering price. It is the dealer's responsibility to transmit orders so that they will be received by the Distributor or its designee before the close of its business day.

Class A Shares. The public offering price for Class A shares is the net asset value per share of that Class plus a sales load as shown below:

Amount of Transaction	Total Sales Load*		Dealers' Reallocation as a % of Offering Price
	As a % of Offering Price Per Share	As a % of Net Asset Value Per Share	
Less than \$50,000	4.50	4.70	4.25
\$50,000 to less than \$100,000	4.00	4.20	3.75
\$100,000 to less than \$250,000	3.00	3.10	2.75
\$250,000 to less than \$500,000	2.50	2.60	2.25
\$500,000 to less than \$1,000,000	2.00	2.00	1.75
\$1,000,000 or more	-0-	-0-	-0-

* Due to rounding, the actual sales load you pay may be more or less than that calculated using these percentages.

Class A shares purchased without an initial sales charge as part of an investment of \$1,000,000 or more will be assessed at the time of redemption a 1% CDSC if redeemed within one year of purchase. The Distributor may pay Service Agents an up-front commission of up to 1% of the net asset value of Class A shares purchased by their clients as part of a \$1,000,000 or more investment in Class A shares that are subject to a CDSC. See "Management Arrangements—Distributor."

The scale of sales loads applies to purchases of Class A shares made by any "purchaser," which term includes an individual and/or spouse purchasing securities for his, her or their own account or for the account of any minor children, or a trustee or other fiduciary purchasing securities for a single trust estate or a single fiduciary trust estate or a single fiduciary account (including a pension, profit-sharing or other employee benefit trust created pursuant to a plan qualified under Section 401 of the Internal Revenue Code of 1986, as amended (the "Code")), although more than one beneficiary is involved; or a group of accounts established by or on behalf of the employees of an employer or affiliated employers pursuant to an employee benefit plan or other program (including accounts established pursuant to Sections 403(b), 408(k) and 457 of the Code); or an organized group which has been in existence for more than six months, provided that it is not organized for the purpose of buying redeemable securities of a registered investment company and provided that the purchases are made through a central administration or a single dealer, or by other means which result in economy of sales effort or expense.

Set forth below is an example of the method of computing the offering price of the Fund's Class A shares. The examples assume a purchase of Class A shares aggregating less than \$50,000, subject to the schedule of sales charges set forth above at a price based upon the net asset value of \$14.54 per share as of April 30, 2008.

Class A Shares	
NET ASSET VALUE, per share	\$14.54

Per Share Sales Charge – 4.5% of offering price (4.7% of net asset value per share).....	0.68
Per Share Offering Price to Public	<u>\$15.22</u>

The dealer reallowance provided with respect to Class A shares may be changed from time to time but will remain the same for all dealers.

Full-time employees of the Financial Industry Regulatory Authority ("FINRA") member firms and full-time employees of other financial institutions which have entered into an agreement with the Distributor pertaining to the sale of Fund shares (or which otherwise have a brokerage related or clearing arrangement with an FINRA member firm or financial institution with respect to the sale of such shares) may purchase Class A shares for themselves directly or pursuant to an employee benefit plan or other program (if Fund shares are offered to such plan or program), or for their spouses or minor children, at net asset value without a sales load, provided they have furnished the Distributor with such information as it may request from time to time in order to verify eligibility for this privilege. This privilege also applies to full-time employees of financial institutions affiliated with FINRA member firms whose full-time employees are eligible to purchase Class A shares at net asset value. In addition, Class A shares are offered at net asset value to full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Fund's Board, or the spouse or minor child of any of the foregoing.

Class A shares may be purchased at net asset value without a sales load through certain broker-dealers and other financial institutions which have entered into an agreement with the Distributor, which includes a requirement that such shares be sold for the benefit of clients participating in a "wrap account" or a similar program under which such clients pay a fee to such broker-dealer or other financial institution.

Class A shares also may be purchased at net asset value without a sales load, subject to appropriate documentation, by (i) qualified separate accounts maintained by an insurance company pursuant to the laws of any State or territory of the United States, (ii) a State, county or city or instrumentality thereof, (iii) a charitable organization (as defined in Section 501(c)(3) of the Code) investing \$50,000 or more in Fund shares, and (iv) a charitable remainder trust (as defined in Section 501(c)(3) of the Code).

Class A shares may be purchased at net asset value without a sales load by qualified investors who (i) purchase Class A shares directly through the Distributor, and (ii) have, or whose spouse or minor children have, beneficially owned shares and continuously managed an open account directly through the Distributor in a Dreyfus-managed fund or Founders-managed fund since on or before February 28, 2006.

Class A shares may be purchased at net asset value without a sales load with the cash proceeds from an investor's exercise of employment-related stock options, whether invested in the Fund directly or indirectly through an exchange from a Dreyfus-managed money market fund, provided that the proceeds are processed through an entity that has entered into an agreement with the Distributor specifically relating to processing stock options. Upon

establishing the account in the Fund or Dreyfus-managed money market fund, the investor and the investor's spouse or minor children become eligible to purchase Class A shares of the Fund at net asset value, whether or not using the proceeds of the employment-related stock options.

Class A shares may be purchased at net asset value without a sales load by members of qualified affinity groups who purchase Class A shares directly through the Distributor, provided that the qualified affinity group has entered into an affinity agreement with the Distributor.

Class A shares are offered at net asset value without a sales load to employees participating in Retirement Plans. Class A shares also may be purchased (including by exchange) at net asset value without a sales load for Dreyfus-sponsored IRA "Rollover Accounts" with the distribution proceeds from a Retirement Plan or a Dreyfus-sponsored 403(b)(7) plan, provided that, in the case of a Retirement Plan, the rollover is processed through an entity that has entered into an agreement with the Distributor specifically relating to processing rollovers. Upon establishing the Rollover Account in the Fund, the shareholder becomes eligible to make subsequent purchases of Class A shares of the Fund at net asset value in such account.

Class B Shares. Class B shares of the Fund are offered only in connection with dividend reinvestment and permitted exchanges of Class B shares of certain other funds. The public offering price for such Class B shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of dividend reinvestment or exchange. A CDSC is imposed on certain redemptions of Class B shares as described in the Fund's Prospectus and in this Statement of Additional Information under "How to Redeem Shares—Contingent Deferred Sales Charge—Class B Shares."

Approximately six years after the date of exchange, Class B shares of the Fund automatically will convert to Class A shares of the Fund, based on the relative net asset values for shares of each such Class. Class B shares of the Fund that have been acquired through the reinvestment of the Fund's dividends and distributions will be converted on a pro rata basis together with other Class B shares, in the proportion that a shareholder's Class B shares converting to Class A shares bears to the total Class B shares not acquired through the reinvestment of the Fund's dividends and distributions.

Class B shares of the Fund acquired by shareholders in exchange for Class B shares originally issued by the Acquired Fund before December 1, 2003 are subject to different CDSC and conversion to Class A schedules. See "How to Redeem Shares—Contingent Deferred Sales Charge—Class B Shares."

Class C Shares. The public offering price for Class C shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of purchase. A CDSC is imposed, however, on redemptions of Class C shares made within the first year of purchase. See "Class B Shares" above and "How to Redeem Shares—Contingent Deferred Sales Charge—Class C Shares."

Class Z Shares. The public offering price for Class Z shares is the net asset value per share of that Class. Class Z shares generally are not available for new accounts.

Using Federal Funds. The Transfer Agent or the Fund may attempt to notify the investor upon receipt of checks drawn on banks that are not members of the Federal Reserve System as to the possible delay in conversion into immediately available funds ("Federal Funds" (monies of member banks within the Federal Reserve System which are held on deposit at a Federal Reserve Bank)) and may attempt to arrange for a better means of transmitting the money. If the investor is a customer of a Selected Dealer and his order to purchase Fund shares is paid for other than in Federal Funds, the Selected Dealer, acting on behalf of its customer, will complete the conversion into, or itself advance, Federal Funds generally on the business day following receipt of the customer order. The order is effective only when so converted and received by the Transfer Agent. An order for the purchase of Fund shares placed by an investor with sufficient Federal Funds or a cash balance in his brokerage account with a Selected Dealer will become effective on the day that the order, including Federal Funds, is received by the Transfer Agent.

Right of Accumulation—Class A Shares. Reduced sales loads apply to any purchase of Class A shares by you and any related "purchaser" as defined above, where the aggregate investment including such purchase is \$50,000 or more. If, for example, you previously purchased and still hold shares of the Fund or shares of certain other funds advised by the Manager or Founders, or shares of certain Mellon Institutional Funds, that are subject to a front-end sales load or CDSC, or shares acquired by a previous exchange of such shares (hereinafter referred to as "Eligible Funds"), or combination thereof, with an aggregate current market value of \$40,000 and subsequently purchase Class A shares of the Fund having a current value of \$20,000, the sales load applicable to the subsequent purchase would be reduced to 4.0% of the offering price. All present holdings of Eligible Funds may be combined to determine the current offering price of the aggregate investment in ascertaining the sales load applicable to each subsequent purchase.

To qualify for reduced sales loads at the time of purchase, you or your Service Agent must notify the Distributor if orders are made by wire, or the Transfer Agent if orders are made by mail. The reduced sales load is subject to confirmation of your holdings through a check of appropriate records.

Dreyfus TeleTransfer Privilege. You may purchase Class A, Class C or Class Z shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the public offering price determined on that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the public offering price determined on the next

business day following such purchase order. To qualify to use the Dreyfus TeleTransfer Privilege, the initial payment for purchase of shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares—Dreyfus TeleTransfer Privilege."

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

DISTRIBUTION PLAN, SERVICE PLAN AND SHAREHOLDER SERVICES PLAN

Class B and Class C shares are subject to a Distribution Plan, Class Z shares are subject to a Service Plan and Class A, Class B and Class C shares are subject to a Shareholder Services Plan.

Distribution Plan. Rule 12b-1 (the "Rule") adopted by the SEC under the 1940 Act provides, among other things, that an investment company may bear expenses of distributing its shares only pursuant to a plan adopted in accordance with the Rule. The Fund's Board has adopted such a plan (the "Distribution Plan") with respect to the Class B and Class C shares of the Fund, pursuant to which the Fund pays the Distributor for distributing each such Class of shares a fee at the annual rate of 0.50% of the value of the average daily net assets of Class B and 0.75% of the value of the average daily net assets of Class C. The Distributor may pay one or more Service Agents in respect of advertising, marketing and other distribution services, and determines the amounts, if any, to be paid to Service Agents and the basis on which such payments are made. The Fund's Board believes that there is a reasonable likelihood that the Distribution Plan will benefit the Fund and the holders of the Fund's Class B and Class C shares.

A quarterly report of the amounts expended under the Distribution Plan, and the purposes for which such expenditures were incurred, must be made to the Fund's Board for its review. In addition, the Distribution Plan provides that it may not be amended to increase materially the costs which holders of Class B or Class C shares may bear for distribution pursuant to the Distribution Plan without such shareholders' approval and that other material amendments of the Distribution Plan must be approved by the Fund's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Distribution Plan or in any agreements entered into in connection with the Distribution Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The Distribution Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Distribution Plan. As to each of Class B and Class C shares of the Fund, the Distribution Plan may be terminated at any time (i) by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Distribution Plan or in any agreements entered into in connection with the Distribution Plan or (ii) by vote of the holders of a majority of the outstanding shares of such Class.

For the fiscal year ended April 30, 2008, the Fund paid \$77,289 and \$66,691, with respect to its Class B and C shares, respectively, to the Distributor pursuant to the Distribution Plan.

Service Plan. The Fund's Board has adopted a service plan under the Rule (the "Service Plan"), pursuant to which the Fund reimburses the Distributor for expenses incurred in distributing Class Z shares, servicing shareholder accounts ("Servicing") and advertising and marketing the Fund, with respect to Class Z shares, at a maximum aggregate annual rate of up to 0.20% of the value of the average daily net assets of Class Z. The Fund's Board believes that there is a reasonable likelihood that the Service Plan will benefit the Fund and the holders of Class Z shares. The Distributor may pay one or more Service Agents a fee in respect of Class Z shares owned by shareholders with whom the Service Agent has a Servicing relationship or for whom the Service Agent is the dealer or holder of record. The Distributor determines the amounts, if any, to be paid to Service Agents under the Service Plan and the basis on which such payments are made.

Class Z shares of the Fund also bear the costs of preparing and printing prospectuses and statements of additional information used for regulatory purposes and for distribution to existing shareholders. Under the Service Plan, Class Z shares of the Fund bear (i) the costs of preparing, printing and distributing prospectuses and statements of additional information used for other purposes, and (ii) the costs associated with implementing and operating the Service Plan (such as costs of printing and mailing service agreements), the aggregate of such amounts not to exceed in any fiscal year of the Fund the greater of \$100,000 or .005% of the value of the average daily net assets of the Fund's Class Z shares for such fiscal year.

A quarterly report of the amounts expended under the Service Plan, and the purposes for which such expenditures were incurred, must be made to the Fund's Board for its review. In addition, the Service Plan provides that it may not be amended to increase materially the costs which holders of Class Z shares may bear for distribution pursuant to the Service Plan without shareholder approval and that other material amendments of the Service Plan must be approved by the Fund's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Service Plan or in the related service agreements, by vote cast in person at a meeting called for the purpose of considering such amendments. The Service Plan and the related service agreements are subject to annual approval by such vote cast in person at a meeting called for the purpose of voting on the Service Plan. The Service Plan is terminable at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Service Plan or in any of the related service agreements or by vote of a majority of holders of Class Z shares. Any service agreement is terminable without penalty, at any time, by such vote of the Board members or, upon not more than 60 days' written notice to the Service Agent, by vote of the holders of a majority of holders of Class Z shares, or, upon 15 days' notice by either party to such service agreement. Each service agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

For the fiscal year ended April 30, 2008, Class Z shares of the Fund reimbursed the Distributor \$881,079 for payments made to Service Agents for distributing and servicing Class Z shares. In addition, holders of Class Z shares paid \$16,947 for printing the Fund's Prospectus and Statement of Additional Information, as well as implementing and operating the Service Plan.

Shareholder Services Plan. The Fund has adopted a Shareholder Services Plan, pursuant to which it pays the Distributor for the provision of certain services to the holders of its Class A, Class B and Class C shares a fee at the annual rate of 0.25% of the value of the average daily net assets of each such Class. The services provided may include personal services relating to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of such shareholder accounts. Under the Shareholder Services Plan, the Distributor may make payments to Service Agents in respect of these services.

A quarterly report of the amounts expended under the Shareholder Services Plan, and the purposes for which such expenditures were incurred, must be made to the Fund's Board for its review. In addition, the Shareholder Services Plan provides that material amendments must be approved by the Fund's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The Shareholder Services Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Shareholder Services Plan. As to each of Class A, Class B and Class C shares of the Fund, the Shareholder Services Plan is terminable at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan.

For the fiscal year ended April 30, 2008, the Fund paid to the Distributor \$131,062, \$38,644 and \$22,230 with respect to its Class A, B and C shares, respectively, pursuant to the Shareholder Services Plan.

HOW TO REDEEM SHARES

General. If you hold more than one Class of Fund shares, any request for redemption must specify the Class of shares being redeemed. If you fail to specify the Class of shares to be redeemed or if you own fewer shares of the Class than specified to be redeemed, the redemption request may be delayed until the Transfer Agent receives further instructions from you or your Service Agent.

The Fund ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the rules of the SEC. However, if you have purchased Fund shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder[®] and subsequently submit a

written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for a period of up to eight business days after the purchase of such shares. In addition, the Fund will not honor redemption checks under the Checkwriting Privilege, and will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege, for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder order against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares may not be redeemed until the Transfer Agent has received your Account Application.

Contingent Deferred Sales Charge—Class B Shares. A CDSC payable to the Distributor is imposed on any redemption of Class B shares of the Fund which reduces the current net asset value of your Class B shares to an amount which is lower than the dollar amount of all payments by you for the purchase of Class B shares of the Fund held by you at the time of redemption. No CDSC will be imposed to the extent that the net asset value of the Class B shares of the Fund redeemed does not exceed (i) the current net asset value of the Class B shares of the Fund acquired through reinvestment of Fund dividends or capital gain distributions, plus (ii) increases in the net asset value of your Class B shares above the dollar amount of all your payments for the purchase of Class B shares of the Fund held by you at the time of redemption.

If the aggregate value of Class B shares redeemed has declined below their original cost as a result of the Fund's performance, a CDSC may be applied to the then-current net asset value rather than the purchase price.

In circumstances where the CDSC is imposed, the amount of the charge will depend on the number of years for the time you purchased the Class B shares until the time of redemption of such shares. Solely for purposes of determining the number of years from the time of any payment for the purchase of Class B shares, all payments during a month will be aggregated and deemed to have been made on the first day of the month.

The following table sets forth the rates of the CDSC and the conversion to Class A schedule for Class B shares, except for Class B shares purchased by shareholders who beneficially owned Class B shares on November 30, 1996, and except for certain Class B shares issued in exchange for shares originally issued by the Acquired Fund described below:

Year Since Purchase Payment Was Made	CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less)
First.....	4.00
Second	4.00
Third	3.00
Fourth	3.00

Fifth	2.00
Sixth.....	1.00*

* These Class B shares will automatically convert into Class A shares approximately six years after the date of purchase.

The following table sets forth the rates of the CDSC for Class B shares purchased by shareholders who beneficially owned Class B shares on November 30, 1996:

Year Since Purchase Payment Was Made	CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less)
First	3.00
Second.....	3.00
Third.....	2.00
Fourth.....	2.00
Fifth.....	1.00
Sixth.....	0.00**

**These Class B shares will automatically convert into Class A shares approximately six years after the date of purchase.

The following table sets forth the rates of the CDSC payable to the Acquired Fund's former distributor and the conversion to Class A schedule for Class B shares of the Fund issued in exchange for Class B shares originally issued by the Acquired Fund before December 1, 2003:

Year Since Purchase Payment Was Made	CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less)
First.....	5.00
Second.....	4.00
Third.....	3.00
Fourth.....	3.00
Fifth.....	2.00
Sixth.....	1.00
Seventh.....	0.00
Eighth.....	0.00***

*** These Class B shares will automatically convert into Class A shares at the end of the calendar quarter that is eight years after the initial purchase of the Class B shares of the Acquired Fund (applies to such Class B shares originally issued by the Acquired Fund before December 1, 2003).

In determining whether a CDSC is applicable to a redemption, the calculation will be made in a manner that results in the lowest possible rate. It will be assumed that the redemption is made first of amounts representing Class B shares of the Fund acquired pursuant to the reinvestment of Fund dividends and distributions; then of amounts representing the increase in net asset value of Class B shares above the total amount of payments for the purchase of Class B shares made during the preceding six years (five years for shareholders beneficially owning Class B shares on November 30, 1996 or eight years for certain shares issued in exchange for shares originally issued by the Acquired Fund); and finally, of amounts representing the cost of shares held for the longest period.

For example, assume an investor purchased 100 shares of the Fund at \$10 per share for a cost of \$1,000. Subsequently, the shareholder acquired five additional shares of the Fund through the reinvestment of Fund dividends. During the second year after the purchase the investor decided to redeem \$500 of the investment. Assuming at the time of the redemption the net asset value had appreciated to \$12 per share, the value of the investor's shares would be \$1,260 (105 shares at \$12 per share). The CDSC would not be applied to the value of the reinvested dividend shares and the amount which represents appreciation (\$260). Therefore, \$240 of the \$500 redemption proceeds (\$500 minus \$260) would be charged at a rate of 4% (the applicable rate in the second year after purchase) for a total CDSC of \$9.60.

Contingent Deferred Sales Charge—Class C Shares. A CDSC of 1% payable to the Distributor is imposed on any redemption of Class C shares within one year of the date of purchase. The basis for calculating the payment of any such CDSC will be the method used in calculating the CDSC for Class B shares. See "Contingent Deferred Sales Charge—Class B Shares" above.

Waiver of CDSC. The CDSC may be waived in connection with (a) redemptions made within one year after the death or disability, as defined in Section 72(m)(7) of the Code, of the shareholder, (b) redemptions by employees participating in qualified or non-qualified employee benefit plans or other programs, (c) redemptions as a result of a combination of any investment company with the Fund by merger, acquisition of assets or otherwise, (d) a distribution following retirement under a tax-deferred retirement plan or upon attaining age 70½ in the case of an IRA or Keogh plan or custodial account pursuant to Section 403(b) of the Code, and (e) redemptions pursuant to the Automatic Withdrawal Plan, as described below. If the Fund's Board determines to discontinue the waiver of the CDSC, the disclosure herein will be revised appropriately. Any Fund shares subject to a CDSC which were purchased prior to the termination of such waiver will have the CDSC waived as provided in the Fund's Prospectus or this Statement of Additional Information at the time of the purchase of such shares.

To qualify for a waiver of the CDSC, at the time of redemption you or your Service Agent must notify the Distributor. Any such qualification is subject to confirmation of your entitlement.

Checkwriting Privilege - Class A and Class Z Only. The Fund provides redemption checks ("Checks") to investors in Class A and Class Z shares automatically upon opening an account unless you specifically refuse the Checkwriting Privilege by checking the applicable "No" box on the Account Application. Checks will be sent only to the registered owner(s) of the account and only to the address of record. The Checkwriting Privilege may be established for an existing account by a separate signed Shareholder Services Form. The Account Application or Shareholder Services Form must be manually signed by the registered owner(s). Checks are drawn on your Fund account and may be made payable to the order of any person in an amount of \$500 or more. When a Check is presented to the Transfer Agent for payment, the Transfer Agent, as your agent, will cause the Fund to redeem a sufficient number of full and fractional Class A or Class Z shares in your account to cover the amount of the Check. Dividends are earned until the Check clears. After clearance, a copy of the Check will be returned to you. You generally will be subject to the same rules and regulations that apply to checking accounts,

although the election of this Privilege creates only a shareholder-transfer agent relationship with the Transfer Agent.

You should date your Checks with the current date when you write them. Please do not postdate your Checks. If you do, the Transfer Agent will honor, upon presentment, even if presented before the date of the Check, all postdated Checks which are dated within six months of presentment for payment, if they are otherwise in good order.

Checks are free, but the Transfer Agent will impose a fee for stopping payment of a Check upon your request or if the Transfer Agent cannot honor a Check due to insufficient funds or other valid reason. If the amount of the Check is greater than the value of the Class A or Class Z shares in the investor's account, the Check will be returned marked insufficient funds. Checks should not be used to close an account.

The Checkwriting Privilege will be terminated immediately, without notice, with respect to any account which is, or becomes, subject to backup withholding on redemptions. Any Check written on an account which has become subject to backup withholding on redemptions will not be honored by the Transfer Agent.

Redemption Through a Selected Dealer. If you are a customer of a Selected Dealer, you may make redemption requests to your Selected Dealer. If the Selected Dealer transmits the redemption request so that it is received by the Transfer Agent prior to the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time), the redemption request will be effective on that day. If a redemption request is received by the Transfer Agent after the close of trading on the floor of the New York Stock Exchange, the redemption request will be effective on the next business day. It is the responsibility of the Selected Dealer to transmit a request so that it is received in a timely manner. The proceeds of the redemption are credited to your account with the Selected Dealer. See "How to Buy Shares" for a discussion of additional conditions or fees that may be imposed upon redemption.

In addition, the Distributor or its designee will accept orders from Selected Dealers with which the Distributor has sales agreements for the repurchase of shares held by shareholders. Repurchase orders received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee prior to the close of its business day (usually 5:15 p.m., Eastern time) are effected at the price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the shares will be redeemed at the next determined net asset value. It is the responsibility of the Selected Dealer to transmit orders on a timely basis. The Selected Dealer may charge the shareholder a fee for executing the order. This repurchase arrangement is discretionary and may be withdrawn at any time.

Reinvestment Privilege. Upon written request, you may reinvest up to the number of Class A shares you have redeemed, within 45 days of redemption, at the then-prevailing net asset value without a sales load, or reinstate your account for the purpose of exercising Fund Exchanges. Upon reinstatement, if such shares were subject to a CDSC, your account will be credited with an amount equal to the CDSC previously paid upon redemption of the shares reinvested. The Reinvestment Privilege may be exercised only once.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you or a representative of your Service Agent and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Fund will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt by the Transfer Agent of a redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Share Certificates; Signatures."

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Shares held in an IRA or Education Savings Account may not be redeemed through the Dreyfus TeleTransfer Privilege. See "How to Buy Shares—Dreyfus TeleTransfer Privilege."

Share Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. A fee may be imposed to replace lost or stolen certificates, or certificates that were never received. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program ("STAMP"), and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and "Signature-Guaranteed" must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians, and may accept other suitable verification arrangements from foreign investors, such as consular verification.

Redemption Commitment. The Fund has committed itself to pay in cash all redemption requests by any shareholder of record of the Fund, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of the Fund's net assets at the beginning of such period.

Such commitment is irrevocable without the prior approval of the SEC. In the case of requests for redemption from the Fund in excess of such amount, the Fund's Board reserves the right to make payments in whole or in part in securities or other assets in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In this event, the securities would be valued in the same manner as the Fund's portfolio is valued. If the recipient sells such securities, brokerage charges might be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when trading in the markets the Fund ordinarily utilizes is restricted, or when an emergency exists as determined by the SEC so that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods as the SEC by order may permit to protect the Fund's shareholders.

SHAREHOLDER SERVICES

Fund Exchanges. Clients of certain Service Agents may purchase, in exchange for shares of the Fund, shares of the same class of another fund in the Dreyfus or Dreyfus Premier Family of Funds, shares of the same class of certain funds advised by Founders, shares of the same class of certain Mellon Institutional Fund, or shares of certain other funds in the Dreyfus Family of Funds, to the extent such shares are offered for sale in such client's state of residence. Shares of such other funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.
- E. Shares of funds subject to a CDSC that are exchanged for shares of another fund will be subject to the higher applicable CDSC of the two funds, and for purposes of calculating CDSC rates and conversion periods, if any, will be deemed to have been

held since the date the shares being exchanged were initially purchased.

To accomplish an exchange under item D above, you or your Service Agent must notify the Transfer Agent of your prior ownership of such Class A shares and your account number. Any such exchange is subject to confirmation of your holdings through a check of appropriate records.

As of June 31, 2006 (the "Effective Date"), you also may exchange your Class B shares for Class B shares of General Money Market Fund, Inc. (the "General Fund"), a money market fund advised by the Manager. The shares so purchased will be held in a special account created solely for this purpose ("Exchange Account"). Exchanges of shares for an Exchange Account only can be made into Class B shares of funds in the Dreyfus Premier Family of Funds or certain funds advised by Founders. No CDSC is charged when an investor exchanges into an Exchange Account; however, the applicable CDSC will be imposed when shares are redeemed from an Exchange Account or other applicable fund account. Upon redemption, the applicable CDSC will be calculated taking into account the time such shares were held in the General Fund's Exchange Account. In addition, the time Class B shares are held in the General Fund's Exchange Account will be taken into account for purposes of calculating when such shares convert to Class A shares. If your Class B shares are held in the General Fund's Exchange Account at the time such shares are scheduled to convert to Class A shares, you will receive Class A shares of the General Fund. Prior to the Effective Date, shareholders were permitted to exchange their Class B shares for shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. ("Worldwide Dollar Fund"), and such shares were held in an Exchange Account. Shareholders who held shares of Worldwide Dollar Fund in an Exchange Account on the Effective Date may continue to hold those shares and upon redemption from the Exchange Account or other applicable fund account, the applicable CDSC and conversion to Class A schedule will be calculated, except for Fund shares issued in exchange for shares originally issued by the Acquired Fund, without regard to the time such shares were held in Worldwide Dollar Fund's Exchange Account; for Fund shares issued in exchange for shares originally issued by the Acquired Fund, the applicable CDSC and conversion to Class A schedule will be calculated taking into account the time such shares were held in the Worldwide Dollar Fund's Exchange Account. Exchanges of shares from an Exchange Account in Worldwide Dollar Fund only can be made into Class B shares of funds in the Dreyfus Premier Family of Funds, certain funds advised by Founders and the General Fund. See "How to Redeem Shares." Redemption proceeds for Exchange Account shares are paid by Federal wire or check only. Exchange Account shares also are eligible for the Dreyfus Auto-Exchange Privilege and the Automatic Withdrawal Plan, as described below.

To request an exchange, you or your Service Agent acting on your behalf must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone or online is given to all shareholders automatically, unless you check the applicable "No" box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic and online instructions (including over the Dreyfus Express[®] voice response telephone system) from any person representing himself or herself to be you or a representative of your Service Agent, and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted.

Shares issued in certificate form may not be exchanged by telephone or online. No fees currently are charged shareholders directly in connection with exchanges, although the Fund reserves the right, upon not less than 60 days' written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the SEC.

During times of drastic economic or market conditions, the Fund may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate components -- redemption orders with a simultaneous request to purchase the other fund's shares. In such a case, the redemption request would be processed at the Fund's next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

To establish a personal retirement plan by exchange, shares of the fund being exchanged must have a value of at least the minimum initial investment required for the fund into which the exchange is being made.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of the Fund, shares of the same class of another fund in the Dreyfus or Dreyfus Premier Family of Funds, shares of the same class of certain funds advised by Founders, shares of the same class of certain Mellon Institutional Funds, or shares of certain other funds in the Dreyfus Family of Funds of which you are a shareholder (including, for Class B shares, Class B shares of the General Fund held in an Exchange Account). This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under "Fund Exchanges." Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by you. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-554-4611 (holders of Class Z shares of the Fund should call 1-800-645-6561), or visiting www.dreyfus.com. Fund Exchanges and the Dreyfus Auto-Exchange Privilege are available to shareholders resident in a state in which shares of the Fund being acquired may legally be sold. The Fund reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus-Automatic Asset Builder®. Dreyfus-Automatic Asset Builder permits you to purchase Class A, Class C and Class Z shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Class A, Class C and Class Z shares (minimum of \$100 and

maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the U.S. Government automatically deposited into your Fund account.

Dreyfus Payroll Savings Plan. Dreyfus Payroll Savings Plan permits you to purchase Class A, Class C and Class Z shares (minimum \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer's payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from Class A, Class C or Class Z shares of the Fund in shares of the same class of another fund in the Dreyfus Family of Funds, shares of the same class of certain funds advised by Founders, or shares of the same class of certain Mellon Institutional Funds, or shares of certain other funds in the Dreyfus Family of Funds of which you are a shareholder as described above under "Fund Exchanges". Shares of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund which does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that impose a CDSC and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from the Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends

and distributions, your shares will be reduced and eventually may be depleted. The Automatic Withdrawal Plan may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which share certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

No CDSC with respect to Class B shares (including Class B shares held in an Exchange Account) or Class C shares will be imposed on withdrawals made under the Automatic Withdrawal Plan, provided that any amount withdrawn under the plan does not exceed on an annual basis 12% of the greater of: (1) the account value at the time of the first withdrawal under the Automatic Withdrawal Plan, or (2) the account value at the time of the subsequent withdrawal. Withdrawals with respect to Class B or Class C shares under the Automatic Withdrawal Plan that exceed such amounts will be subject to a CDSC. Withdrawals of Class A shares subject to a CDSC under the Automatic Withdrawal Plan will be subject to any applicable CDSC. Purchases of additional Class A shares where the sales load is imposed concurrently with withdrawals of Class A shares generally are undesirable.

Letter of Intent—Class A Shares. By signing a Letter of Intent form, you become eligible for the reduced sales load on purchases of Class A shares based on the total number of shares of Eligible Funds purchased by you and any related "purchaser" (as defined above) in a 13-month period pursuant to the terms and conditions set forth in the Letter of Intent. Shares of any Eligible Fund purchased within 90 days prior to the submission of the Letter of Intent may be used to equal or exceed the amount specified in the Letter of Intent. A minimum initial purchase of \$5,000 is required. You can obtain a Letter of Intent form by calling 1-800-554-4611.

Each purchase you make during the 13-month period (which begins on the date you submit the Letter of Intent) will be at the public offering price applicable to a single transaction of the aggregate dollar amount you select in the Letter of Intent. The Transfer Agent will hold in escrow 5% of the amount indicated in the Letter of Intent, which may be used for payment of a higher sales load if you do not purchase the full amount indicated in the Letter of Intent. When you fulfill the terms of the Letter of Intent by purchasing the specified amount the escrowed amount will be released and additional shares representing such amount credited to your account. If your purchases meet the total minimum investment amount specified in the Letter of Intent within the 13-month period, an adjustment will be made at the conclusion of the 13-month period to reflect any reduced sales load applicable to shares purchased during the 90-day period prior to submission of the Letter of Intent. If your purchases qualify for a further sales load reduction, the sales load will be adjusted to reflect your total purchase at the end of 13 months. If total purchases are less than the amount specified, the offering price of the shares you purchased (including shares representing the escrowed amount) during the 13-month period will be adjusted to reflect the sales load applicable to the aggregate purchases you actually made (which will reduce the number of shares in your account), unless you have redeemed the shares in your account, in which case the Transfer Agent, as attorney-in-fact pursuant to the terms of the Letter of Intent, will redeem an appropriate number of Class A shares of the Fund held in escrow to realize the difference between the sales load actually paid and the sales load applicable to the aggregate purchases actually made and any remaining shares will be credited to your account. Signing a Letter of Intent does not bind you to purchase, or the Fund to sell, the full amount indicated at the sales load in effect at the time of signing, but you must complete the

intended purchase to obtain the reduced sales load. At the time you purchase Class A shares, you must indicate your intention to do so under a Letter of Intent. Purchases pursuant to a Letter of Intent will be made at the then-current net asset value plus the applicable sales load in effect at the time such Letter of Intent was submitted.

DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. The Fund's investments are valued each business day using available market quotations or at fair value as determined by one or more independent pricing services (collectively, the "Service") approved by the Fund's Board. The Service may use available market quotations, employ electronic data processing techniques and/or a matrix system to determine valuations. The Service's procedures are reviewed by the Fund's officers under the general supervision of the Fund's Board. The procedures need not be used to determine the value of securities held by the Fund if, in the opinion of a committee appointed by the Fund's Board, some other method would more accurately reflect the fair value of such securities. Fair value of investments may be done by the Fund's Board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. The factors that may be considered in fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased or sold, and public trading or similar securities of the issuer or comparable issuers. Expenses and fees, including the management fee (reduced by the expense limitation, if any) and the fees pursuant to the Distribution Plan, Service Plan and Shareholder Services Plan, as applicable, are accrued daily and are taken into account for the purpose of determining the net asset value of Fund shares.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Management believes that the Fund has qualified for treatment as a "regulated investment company" under the Code for the fiscal year ended April 30, 2008. The Fund intends to continue to so qualify if such qualification is in the best interests of its shareholders. As a regulated investment company, the Fund will pay no Federal income tax on net investment income and net realized capital gains to the extent that such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment company, the Fund must distribute at least 90% of its net income (consisting of net investment income from taxable and tax-exempt obligations and net short-term capital gains) to its shareholders, and must meet certain asset diversification and other requirements. If the Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

If you elect to receive dividends and distributions in cash and your dividend and distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividends or distributions and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Any dividend or distribution paid shortly after an investor's purchase may have the effect of reducing the aggregate net asset value of the shares below the cost of the investment. Such a dividend or distribution would be a return of capital in an economic sense, although taxable as described in the Prospectus. In addition, the Code provides that if a shareholder holds shares of the Fund for six months or less and has received a capital gain distribution with respect to such shares, any loss incurred on the sale of such shares will be treated as long-term capital loss to the extent of the capital gain distribution received.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gains or losses. However, all or a portion of any gains realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. In addition, all or a portion of the gain realized from engaging in "conversion transaction" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by the Fund from certain futures and options transactions ("Section 1256 contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing purchase transactions. In addition, any Section 1256 contracts remaining unexercised at the end of the Fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund characterized as described above.

Offsetting positions held by the Fund involving certain futures or forward contracts or options transactions with respect to actively traded personal property may constitute "straddles." To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by a Fund may constitute "mixed straddles." The Fund may make one or more elections with respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If the Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial position") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") with respect to the same or substantially identical property or (2) holds and appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Fund generally will be taxed as if the appreciated

financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively.

Investment by the Fund in securities issued or acquired at a discount or providing for deferred interest or for payment of interest in the form of additional obligations could under special tax rules affect the amount, timing and character of distributions to shareholders by causing the Fund to recognize income prior to the receipt of cash payments. For example, the Fund could be required to accrue a portion of the discount (or deemed discount) at which the securities were issued each year and to distribute such income in order to maintain its qualification as a regulated investment company. In such case, the Fund may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy these distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Fund could subject you to a \$50 penalty imposed by the Internal Revenue Service.

PORTFOLIO TRANSACTIONS

General. The Manager assumes general supervision over the placement of securities purchase and sale orders on behalf of the funds it manages. Funds managed by dual employees of the Manager and an affiliated entity, and funds that have a sub-investment adviser, execute portfolio transactions through the trading desk of the affiliated entity or sub-investment adviser, as applicable (the "Trading Desk"). Those funds use the research facilities, and are subject to the internal policies and procedures, of applicable affiliated entity or sub-investment adviser.

The Trading Desk generally has the authority to select brokers (for equity securities) or dealers (for fixed income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions is made in the best judgment of the Trading Desk and in a manner deemed fair and reasonable. In choosing brokers or dealers, the Trading Desk evaluates the ability of the broker or dealer to execute the transaction at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of a fund are selected on the basis of their professional capability and the value and quality of their services. The Trading Desk attempts to obtain best execution for the funds by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the quality and efficiency of the broker's or dealer's execution; (v) the broker's or dealer's willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counterparty risk (*i.e.*, the broker's or dealer's financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (*e.g.*, foreign or domestic security, large block, illiquid security). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors will be more important than others in

determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

Investment decisions for one fund or account are made independently from those for other funds or accounts managed by the portfolio managers. Under the Trading Desk's procedures, portfolio managers and their corresponding Trading Desks may seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one fund or account. In some cases, this policy may adversely affect the price paid or received by a fund or an account, or the size of the position obtained or liquidated. As noted above, certain brokers or dealers may be selected because of their ability to handle special executions such as those involving large block trades or broad distributions, provided that the primary consideration of best execution is met. Generally, when trades are aggregated, each fund or account within the block will receive the same price and commission. However, random allocations of aggregate transactions may be made to minimize custodial transaction costs. In addition, at the close of the trading day, when reasonable and practicable, the completed securities of partially filled orders will generally be allocated to each participating fund and account in the proportion that each order bears to the total of all orders (subject to rounding to "round lot" amounts and other relevant factors).

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the portfolio managers will not be deterred from changing a Fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of brokerage commissions paid is evaluated by the Trading Desk based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs, and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that a fund invests in foreign securities, certain of such fund's transactions in those securities may not benefit from the negotiated commission rates available to funds for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The portfolio managers may deem it appropriate for one fund or account they manage to sell a security while another fund or account they manage is purchasing the same security. Under such circumstances, the portfolio managers may arrange to have the purchase and sale transactions effected directly between the funds and/or accounts ("cross transactions"). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

Funds and accounts managed by the Manager, an affiliated entity or a sub-investment adviser may own significant positions in portfolio companies which, depending on market conditions, may affect adversely the ability to dispose of some or all of such positions.

For the fiscal years ended April 30, 2006, 2007, and 2008 the Fund paid the total brokerage commissions, set forth below, none of which was paid to the Distributor. The

amounts for brokerage commissions do not include gross spreads and concessions on principal transactions which, as determinable, for the same period, are also set forth below, none of which was paid to the Distributor. The following table sets forth commission data for each of the fiscal years ended April 30, 2006, 2007, and 2008, as applicable:

<u>Brokerage Commissions</u>			<u>Gross Spreads and Concessions</u>		
<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>
\$37,905	\$60,464	\$8,309	N/A	N/A	N/A

The Fund contemplates that, consistent with the policy of seeking best price and execution, brokerage transactions may be conducted through affiliates of the Manager. The Board has adopted procedures in conformity with Rule 17e-1 under the 1940 Act to ensure that all brokerage commissions paid to affiliates of the Manager are reasonable and fair.

Soft Dollars. The term "soft dollars" is commonly understood to refer to arrangements where an investment adviser uses client (or fund) brokerage commissions to pay for research and other services to be used by the investment adviser. Section 28(e) of the Securities Exchange Act of 1934 provides a "safe harbor" that permits investment advisers to enter into soft dollar arrangements if the investment adviser determines in good faith that the amount of the commission is reasonable in relation to the value of the brokerage and research services provided. Eligible products and services under Section 28(e) include those that provide lawful and appropriate assistance to the investment adviser in the performance of its investment decision-making responsibilities.

Subject to the policy of seeking best execution, Dreyfus-managed funds may execute transactions with brokerage firms that provide research services and products, as defined in Section 28(e). Any and all research products and services received in connection with brokerage commissions will be used to assist the applicable affiliated entity or sub-investment adviser in its investment decision-making responsibilities, as contemplated under Section 28(e). Under certain conditions, higher brokerage commissions may be paid in connection with certain transactions in return for research products and services.

The products and services provided under these arrangements permit the Trading Desk to supplement its own research and analysis activities, and provide it with information from individuals and research staffs of many securities firms. Such services and products may include, but are not limited to the following: fundamental research reports (which may discuss, among other things, the value of securities, or the advisability of investing in, purchasing or selling securities, or the availability of securities or the purchasers or sellers of securities, or issuers, industries, economic factors and trends, portfolio strategy and performance); current market data and news; technical and portfolio analyses; economic forecasting and interest rate projections; and historical information on securities and companies. The Trading Desk also may defray the costs of certain services and communication systems that facilitate trade execution (such as on-line quotation systems, direct data feeds from stock exchanges and on-line trading systems with brokerage commissions generated by client transactions) or functions related thereto (such as clearance and settlement). Some of the research products or services received by the Trading

Desk may have both a research function and a non-research administrative function (a "mixed use"). If the Trading Desk determines that any research product or service has a mixed use, the Trading Desk will allocate in good faith the cost of such service or product accordingly. The portion of the product or service that the Trading Desk determines will assist it in the investment decision-making process may be paid for in soft dollars. The non-research portion is paid for by the Trading Desk in hard dollars.

The Trading Desk generally considers the amount and nature of research, execution and other services provided by brokerage firms, as well as the extent to which such services are relied on, and attempts to allocate a portion of the brokerage business of its clients on the basis of that consideration. Neither the services nor the amount of brokerage given to a particular brokerage firm are made pursuant to any agreement or commitment with any of the selected firms that would bind the Trading Desk to compensate the selected brokerage firm for research provided. The Trading Desk endeavors, but is not legally obligated, to direct sufficient commissions to broker/dealers that have provided it with research and other services to ensure continued receipt of research the Trading Desk believes is useful. Actual commissions received by a brokerage firm may be more or less than the suggested allocations.

There may be no correlation between the amount of brokerage commissions generated by a particular fund or client and the indirect benefits received by that fund or client. The affiliated entity or sub-investment adviser may receive a benefit from the research services and products that is not passed on to a fund in the form of a direct monetary benefit. Further, research services and products may be useful to the affiliated entity or sub-investment adviser in providing investment advice to any of the funds or clients it advises. Likewise, information made available to the affiliated entity or sub-investment adviser from brokerage firms effecting securities transactions for a fund may be utilized on behalf of another fund or client. Information so received is in addition to, and not in lieu of, services required to be performed by the affiliated entity or sub-investment adviser and fees are not reduced as a consequence of the receipt of such supplemental information. Although the receipt of such research services does not reduce the normal independent research activities of the affiliated entity or sub-investment adviser, it enables them to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff.

There were no transactions conducted on an agency basis through a broker, for among other things, research services for the fiscal year ended April 30, 2008.

IPO Allocations. Certain funds advised by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may participate in IPOs. In deciding whether to purchase an IPO, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) generally considers the capitalization characteristics of the security, as well as other characteristics of the security, and identifies funds and accounts with investment objectives and strategies consistent with such a purchase. Generally, as more IPOs involve small- and mid-cap companies, the funds and accounts with a small- and mid-cap focus may participate in more IPOs than funds and accounts with a large-cap focus. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate), when consistent with the fund's and/or account's investment guidelines, generally will allocate shares of an IPO on a pro rata basis. In the case of "hot" IPOs, where the Manager (and if

applicable, a sub-adviser or Dreyfus affiliate) only receives a partial allocation of the total amount requested, those shares will be distributed fairly and equitably among participating funds or accounts managed by the Manager (or where applicable, a sub-adviser or Dreyfus affiliate). "Hot" IPOs raise special allocation concerns because opportunities to invest in such issues are limited as they are often oversubscribed. The distribution of the partial allocation among funds and/or accounts will be based on relevant net asset values. Shares will be allocated on a pro rata basis to all appropriate funds and accounts, subject to a minimum allocation based on trading, custody, and other associated costs. International hot IPOs may not be allocated on a pro rata basis due to transaction costs, market liquidity and other factors unique to international markets.

Regular Broker-Dealers. The Fund may acquire securities issued by one or more of its "regular brokers or dealers," as defined in Rule 10b-1 under the 1940 Act. Rule 10b-1 provides that a "regular broker or dealer" is one of the ten brokers or dealers that, during the Fund's most recent fiscal year (i) received the greatest dollar amount of brokerage commissions from participating, either directly or indirectly, in the Fund's portfolio transactions (ii) engaged as principal in the largest dollar amount of the Fund's portfolio transactions or (iii) sold the largest dollar amount of the Fund's securities. Listed below are the names of the Fund's regular brokers or dealers whose securities the Fund acquired during the fiscal year ended April 30, 2008, and the value of the Fund's aggregate holdings of the securities of each such issuer as of April 30, 2008:

<u>Name of Regular Broker or Dealer (Issuer)</u>	<u>Aggregate Value of Securities</u>
Goldman, Sachs & Co.	\$ 2,130,000
J.P. Morgan Securities Inc.	\$19,290,000
Countrywide Securities Corp	\$ 1,238,000
Citigroup Global Markets Inc.	\$ 7,184,000

Disclosure of Portfolio Holdings. It is the policy of Dreyfus to protect the confidentiality of fund portfolio holdings and prevent the selective disclosure of non-public information about such holdings. Each fund, or its duly authorized service providers, may publicly disclose its portfolio holdings in accordance with regulatory requirements, such as periodic portfolio disclosure in filings with the SEC. Each non-money market fund, or its duly authorized service providers, may publicly disclose its complete schedule of portfolio holdings at month-end, with a one-month lag, on the Dreyfus website at www.dreyfus.com. In addition, fifteen days following the end of each calendar quarter, each non-money market fund, or its duly authorized service providers, may publicly disclose on the website its complete schedule of portfolio holdings as of the end of such quarter. Each money market fund will disclose daily, on www.dreyfus.com, the fund's complete schedule of holdings as of the end of the previous business day. The schedule of holdings will remain on the website until the fund files its Form N-Q or Form N-CSR for the period that includes the date of the posted holdings.

If the Fund's portfolio holdings are released pursuant to an ongoing arrangement with any party, the Fund must have a legitimate business purpose for doing so, and neither the Fund, nor Dreyfus or its affiliates, may receive any compensation in connection with an arrangement to make available information about the Fund's portfolio holdings. The Fund may distribute portfolio holdings to mutual fund evaluation services such as Standard & Poor's, Morningstar or

Lipper Analytical Services; due diligence departments of broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds before their public disclosure; and broker-dealers that may be used by the Fund, for the purpose of efficient trading and receipt of relevant research, provided that: (a) the recipient does not distribute the portfolio holdings to persons who are likely to use the information for purposes of purchasing or selling Fund shares or Fund portfolio holdings before the portfolio holdings become public information; and (b) the recipient signs a written confidentiality agreement.

The Fund may also disclose any and all portfolio holdings information to its service providers and others who generally need access to such information in the performance of their contractual duties and responsibilities and are subject to duties of confidentiality, including a duty not to trade on non-public information, imposed by law and/or contract. These service providers include the Fund's custodian, auditors, investment adviser, administrator, and each of their respective affiliates and advisers.

Disclosure of the Fund's portfolio holdings may be authorized only by the Fund's Chief Compliance Officer, and any exceptions to this policy are reported quarterly to the Fund's Board.

SUMMARY OF THE PROXY VOTING POLICY, PROCEDURES AND GUIDELINES OF THE DREYFUS FAMILY OF FUNDS

The Board of each fund in the Dreyfus Family of Funds has delegated to the Manager the authority to vote proxies of companies held in the fund's portfolio. The Manager, through its participation on the BNY Mellon Proxy Policy Committee (the "PPC"), applies BNY Mellon's Proxy Voting Policy, related procedures, and voting guidelines when voting proxies on behalf of the funds.

The Manager recognizes that an investment adviser is a fiduciary that owes its clients, including funds it manages, a duty of utmost good faith and full and fair disclosure of all material facts. An investment adviser's duty of loyalty requires an adviser to vote proxies in a manner consistent with the best interest of its clients and precludes the adviser from subrogating the clients' interests to its own. In addition, an investment adviser voting proxies on behalf of a fund must do so in a manner consistent with the best interests of the fund and its shareholders.

The Manager seeks to avoid material conflicts of interest by participating in the PPC, which applies detailed, pre-determined written proxy voting guidelines (the "Voting Guidelines") in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, the Manager and its affiliates engage a third party as an independent fiduciary to vote all proxies of funds managed by BNY Mellon or its affiliates (including the Dreyfus Family of Funds), and may engage an independent fiduciary to vote proxies of other issuers at its discretion.

All proxies received by the funds are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. The guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in BNY Mellon's or the Manager's policies on specific issues. Items that can be categorized under the Voting Guidelines are voted in

accordance with any applicable guidelines or referred to the PPC, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines are referred to the PPC for discussion and vote. Additionally, the PPC reviews proposals where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, the PPC weighs the cost of voting and potential inability to sell the securities (which may occur during the voting process) against the benefit of voting the proxies to determine whether or not to vote. With respect to securities lending transactions, the PPC seeks to balance the economic benefits of continuing to participate in an open securities lending transaction against the inability to vote proxies.

When evaluating proposals, the PPC recognizes that the management of a publicly-held company may need protection from the market's frequent focus on short-term considerations, so as to be able to concentrate on such long-term goals as productivity and development of competitive products and services. In addition, the PPC generally supports proposals designed to provide management with short-term insulation from outside influences so as to enable them to bargain effectively with potential suitors to the extent such proposals are discrete and not bundled with other proposals. The PPC believes that a shareholder's role in the governance of a publicly-held company is generally limited to monitoring the performance of the company and its management and voting on matters which properly come to a shareholder vote. However, the PPC generally opposes proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. Accordingly, the PPC generally votes in accordance with management on issues that the PPC believes neither unduly limit the rights and privileges of shareholders nor adversely affect the value of the investment.

On questions of social responsibility where economic performance does not appear to be an issue, the PPC attempts to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the particular social issue including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The PPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take actions on issues.

In evaluating proposals regarding incentive plans and restricted stock plans, the PPC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the PPC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The PPC generally votes against proposals that permit the repricing or replacement of stock options without shareholder approval or that are silent on repricing and the company has a history of repricing stock options in a manner that the PPC believes is detrimental to shareholders.

Information regarding how the Manager voted proxies for the Fund is available at www.dreyfus.com and on the SEC's website at <http://www.sec.gov> on the Fund's Form N-PX filed with the SEC.

INFORMATION ABOUT THE FUND

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and non-assessable. Fund shares have equal rights as to dividends and in liquidation. Shares have no preemptive or subscription rights and are freely transferable.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Fund to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Fund to hold a special meeting of shareholders for purposes of removing a Board member from office. Fund shareholders may remove a Board member by the affirmative vote of a majority of the Fund's outstanding voting shares. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing shares of other funds in the Dreyfus Family of Funds. Accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive or abusive trading. In addition, the Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Fund will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Fund will take reasonable steps to prevent excessive short-term trading deemed to be harmful to the Fund, it may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

On May 3, 2007, the Fund changed its name from "Dreyfus GNMA Fund, Inc." to "Dreyfus Premier GNMA Fund, Inc.", renamed its existing shares "Class Z shares," and commenced offering Class A, Class B and Class C shares.

The Fund sends annual and semi-annual financial statements to all its shareholders.

As of August 11, the following shareholders were known by the Fund to own of record 5% or more of the Fund's shares:

Class Z: None

Class A:

National Financial Services 82 Devonshire Street Boston, MA 02109-3605	13.5488%

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Fund, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Fund's Prospectus.

Ernst & Young LLP, 5 Times Square, New York, New York 10036, an independent registered public accounting firm, has been selected to serve as the independent registered public accounting firm of the Fund.

APPENDIX

Rating Categories

Description of certain ratings assigned by S&P, Moody's and Fitch:

S&P

Long-term

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

r

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

N.R.

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA', 'A' and 'BBB' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.ⁱ

Short-term

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus sign (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

Commercial paper**A-1**

This designation indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

A-2

Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issues designated 'A-1'.

Moody's**Long-term****Aaa**

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

A

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable

over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Baa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Fitch

Long-term investment grade

AAA

Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA

Very high credit quality. 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. 'BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2

Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

'NR' indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' long-term rating category, or to short-term ratings other than 'F1.'
