At September 30, 2003 and December 31, 2002, certificates of deposit of \$100,000 or more included in time deposits totaled approximately \$94,886 and \$84,729 respectively. Interest expense on these deposits was approximately \$472 and \$1,493 for the quarter ended and the nine-month period ended September 30, 2003, respectively, and \$2,448 for the year ended December 31, 2002.

#### NOTE 7 - SECURITIES SOLD UNDER REPURCHASE AGREEMENTS

At September 30, 2003 and December 31, 2002, securities sold under repurchase agreements totaled \$32,060 and \$26,219. U.S. Government securities with a book value of \$33,130 (\$34,519 market value) and \$28,235 (\$30,123 market value), respectively, are used as collateral for the agreements. The weighted-average interest rate of these agreements was .99 percent and 1.41 percent at September 30, 2003 and December 31, 2002.

#### NOTE 8 - LINES OF CREDIT

At September 30, 2003, the Bank had unused short-term lines of credit to purchase Federal Funds from unrelated banks totaling \$27,000. These lines of credit are available on a one to seven day basis for general corporate purposes of the Bank. All of the lenders have reserved the right to withdraw these lines at their option.

The Bank has a demand note through the U.S. Treasury, Tax and Loan system with the Federal Reserve Bank of Richmond. The Bank may borrow up to \$7,000 under the arrangement at a variable interest rate. The note is secured by U.S. Treasury and Agency Notes with a market value of \$6,313 at September 30, 2003. The amount outstanding under the note totaled \$1,107 and \$6,509 at September 30, 2003 and December 31, 2002, respectively.

The Bank also has a line of credit from the Federal Home Loan Bank of Atlanta for \$92,347 secured by a lien on the Bank's 1-4 family mortgages. Allowable terms range from overnight to twenty years at varying rates set daily by the FHLB. The amount outstanding under the agreement totalled \$0 and \$0 at September 30, 2003 and December 31, 2002, respectively.

#### NOTE 9 - INCOME TAXES

Income tax expense for the quarter ended September 30, 2003 and September 30, 2002 on pretax income of \$3,120 and \$3,005 totalled \$1,002 and \$976 respectively. Income tax expense for the nine-month period ended September 30, 2003 and September 30, 2002 on pretax income of \$8,794 and \$8,589 totalled \$2,770 and \$2,703 respectively. The provision for federal income taxes is calculated by applying the 34% statutory federal income tax rate and increasing or reducing this amount due to any tax-exempt interest, state bank tax (net of federal benefit), business credits, surtax exemption, tax preferences, alternative minimum tax calculations, or other factor. A summary of income tax components and a reconciliation of income taxes to the federal statutory rate are included in fiscal year-end reports.

#### NOTE 9 - INCOME TAXES (Continued)

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standards ("SFAS") No. 109, "Accounting for Income Taxes".

#### NOTE 10 - COMMITMENTS AND CONTINGENT LIABILITIES

From time to time the bank subsidiary is a party to various litigation, both as plaintiff and as defendant, arising from its normal operations. No material losses are anticipated in connection with any of these matters at September 30, 2003.

Also, in the normal course of business, the bank subsidiary has outstanding commitments to extend credit and other contingent liabilities, which are not reflected in the accompanying financial statements. At September 30, 2003, commitments to extend credit totalled \$35,733; financial standby letters of credit totalled \$737; and performance standby letters of credit totalled \$60. In the opinion of management, no material losses or liabilities are expected as a result of these transactions.

Additionally, the bank subsidiary has an outstanding commitment for the construction of a new main banking office in Conway, S.C. in the amount of \$5,093.

#### NOTE 11 - EMPLOYEE BENEFIT PLAN

The Bank has a defined contribution pension plan covering all employees who have attained age twenty-one and have a minimum of one year of service. Upon ongoing approval of the Board of Directors, the Bank matches one hundred percent of employee contributions up to three percent of employee salary deferred and fifty percent of employee contributions in excess of three percent and up to five percent of salary deferred. The Board of Directors may also make discretionary contributions to the Plan. For the three-month and nine-month periods ended September 30, 2003 and years ended December 31, 2002, 2001, and 2000, \$137, \$411, \$510, \$426, and \$404, respectively, was charged to operations under the plan.

#### NOTE 12 - REGULATORY MATTERS

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the financial statements. The regulations require the Bank to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital classification is also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the table below) of Tier I capital to adjusted total assets (Leverage Capital ratio) and minimum ratios of Tier I and total capital to risk-weighted assets. To be considered adequately capitalized under the regulatory framework for prompt corrective action, the Bank must maintain minimum Tier I leverage, Tier I risk-based and total risk-based ratios as set forth in the table. The Bank's actual capital ratios are presented in the table below as of September 30, 2003:

	<u>Actual</u>		<u>For</u>		<u>To be</u>	
			<u>Capital adequacy</u>		<u>well capitalized</u>	
			<u>Purposes</u>		<u>under prompt</u>

## DISCUSSION OF FORWARD-LOOKING STATEMENTS

Information in the enclosed report, other than historical information, may contain forward-looking statements that involve risks and uncertainties, including, but not limited to, timing of certain business initiatives of the Company, the Company's interest rate risk condition, and future regulatory actions of the Comptroller of the Currency and Federal Reserve System. It is important to note that the Company's actual results may differ materially and adversely from those discussed in forward-looking statements.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis is provided to afford a clearer understanding of the major elements of the corporation's results of operations, financial condition, liquidity, and capital resources. The following discussion should be read in conjunction with the corporation's financial statements and notes thereto and other detailed information appearing elsewhere in this report. In addition, the results of operations for the interim periods shown in this report are not necessarily indicative of results to be expected for the fiscal year. The accompanying consolidated financial statements include all accounts of the Company and the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation. The accompanying unaudited consolidated financial statements at September 30, 2003 and for the three-month and nine-month periods ending September 30, 2003 and 2002 have been prepared in accordance with generally accepted accounting principles ("GAAP") for interim financial information and with the instructions to Form 10-Q for the Securities and Exchange Commission. Accordingly, they do not include all information and footnotes required by GAAP for complete financial statements. However, in the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included.

## DISTRIBUTION OF ASSETS AND LIABILITIES

The Company maintains a conservative approach in determining the distribution of assets and liabilities. Loans have increased 9.3% from \$314,031 at September 30, 2002 to \$343,210 at September 30, 2003 and have increased as a percentage of total assets from 55.5% to 55.6% over the same period as loan demand has strengthened in our market. Securities and federal funds sold have shown little change as a percentage of total assets from 37.5% at September 30, 2002 to 37.7% at September 30, 2003. This level of investments and federal funds sold provides for a more than adequate supply of secondary liquidity. Management has sought to build the deposit base with stable, relatively non-interest-sensitive deposits by offering the small to medium deposit account holders a wide array of deposit instruments at competitive rates. Non-interest-bearing demand deposits increased as a percentage of total assets from 17.2% at September 30, 2002 to 17.5% at September 30, 2003. As more customers, both business and personal, are attracted to interest-bearing deposit accounts, we expect the percentage of demand deposits to decline over the long-term. Interest-bearing deposits have increased slightly from 65.4% of total assets at September 30, 2002 to 65.8% at September 30, 2003 while securities sold under agreement to repurchase have increased from 4.2% to 5.2% over the same period.

The following table sets forth the percentage relationship to total assets of significant components of the corporation's balance sheet as of September 30, 2003 and 2002:

	Sept. 30, 2003	2002

## RESULTS OF OPERATION

CNB Corporation experienced earnings for the three-month period ended September 30, 2003 and 2002 of \$2,118 and \$2,029, respectively, resulting in a return on average assets of 1.38% and 1.44% and a return on average stockholders' equity of 12.89% and 13.34%.

CNB Corporation experienced earnings for the nine-month period ended September 30, 2003 and 2002 of \$6,024 and \$5,886, respectively, resulting in a return on average assets of 1.37% and 1.45% and a return on average stockholders' equity of 12.54% and 13.63%.

The earnings were primarily attributable to net interest margins in each period (see Net Income-Net Interest Income). Other factors include management's ongoing effort to maintain other income at adequate levels (see Net Income - Other Income) and to control other expenses (see Net Income - Other Expenses). This level of earnings, coupled with a conservative dividend policy, have supplied the necessary capital funds to support the growth in total assets. Total assets have increased \$51,027 or 9.0% from \$565,789 at September 30, 2002 to \$616,816 at September 30, 2003. The following table sets forth the financial highlights for the three-month and nine-month periods ending September 30, 2003 and September 30, 2002:

## NET INCOME

Net Interest Income - Earnings are dependent to a large degree on net interest income, defined as the difference between gross interest and fees earned on earning assets, primarily loans and securities, and interest paid on deposits and borrowed funds. Net interest income is effected by the interest rates earned or paid and by volume changes in loans, securities, deposits, and borrowed funds.

Interest rates paid on deposits and borrowed funds and earned on loans and investments have generally followed the fluctuations in market interest rates in 2003 and 2002. However, fluctuations in market interest rates do not necessarily have a significant impact on net interest income, depending on the bank's rate sensitivity position. A rate sensitive asset (RSA) is any loan or investment that can be repriced either up or down in interest rate within a certain time interval. A rate sensitive liability (RSL) is an interest paying deposit or other liability that can be repriced either up or down in interest rate within a certain time interval. When a proper balance between RSA and RSL exists, market interest rate fluctuations should not have a significant impact on earnings. The larger the imbalance, the greater the interest rate risk assumed by the bank and the greater the positive or negative impact of interest rate fluctuations on earnings. The bank seeks to manage its assets and liabilities in a manner that will limit interest rate risk and thus stabilize long-run earning power. Management believes that a rise or fall in interest rates will not materially effect earnings.

The Bank has maintained net interest margins for the three-month and nine-month periods ended September 30, 2003, of 4.18% and 4.31%, respectively, and 4.46% and 4.49%, respectively, for the same periods in 2002, as compared to management's long-term target of 4.50%. Net interest margins fell in 2001 due to an unusually rapid decline in market interest rates lowering returns available on loans and investments while interest costs on liabilities did not decline as quickly due to competitive pressure. Margins widened in 2002 as liabilities were re-priced, but falling rates in the first half of 2003 have negatively impacted margins.

Fully-tax-equivalent net interest income showed a 1.5% increase from \$5,879 for the three-month period ended September 30, 2002 to \$5,966 for the three-month period ended September 30, 2003. During the same period, total fully-tax-equivalent interest income decreased by 5.7% from \$8,182 to \$7,716 and total interest expense decreased by 24.0% from \$2,303 to \$1,750. Fully-tax-equivalent net interest income as a percentage of total earning assets has shown a decrease of .28% from 4.46% for the three-month period ended September 30, 2002 to 4.18% for the three-month period ended September 30, 2003.

Fully-tax-equivalent net interest income showed a 3.7% increase from \$17,032 for the nine-month period ended September 30, 2002 to \$17,660 for the nine-month period ended September 30, 2003. During the same period, total fully-tax-equivalent interest income decreased by 3.1% from \$23,996 to \$23,247 and total interest expense decreased by 19.8% from \$6,964 to \$5,587. Fully-tax-equivalent net interest income as a percentage of total earning assets has shown a decrease of .18% from 4.49% for the nine-month period ended September 30, 2002 to 4.31% for the nine-month period ended September 30, 2003.

The tables on the following four pages present selected financial data and an analysis of net interest income.

## NET INCOME (continued)

Provision for Possible Loan Losses - It is the policy of the bank to maintain the reserve for possible loan losses at the greater of 1.20% of net loans or the percentage based on the actual loan loss experience over the previous five years. In addition, management may increase the reserve to a level above these guidelines to cover potential losses identified in the portfolio.

The provision for possible loan losses was \$250 for the three-month period ended September 30, 2003 and \$270 for the three-month period ended September 30, 2002. Net loan charge-offs/(recoveries) totaled \$316 for the three-month period ended September 30, 2003 and \$145 for the same period in 2002.

The provision for possible loan losses was \$750 for the nine-month period ended September 30, 2003 and \$760 for the nine-month period ended September 30, 2002. Net loan charge-offs/(recoveries) totaled \$407 for the nine-month period ended September 30, 2003 and \$414 for the same period in 2002.

The reserve for possible loan losses as a percentage of net loans was 1.33% at September 30, 2003 and 1.33% at September 30, 2002.

Securities Transactions - Security gains of \$154 were taken during the first quarter of 2003 and \$183 during the first quarter of 2002 to take advantage of a steeply-sloping yield curve. At September 30, 2003, December 31, 2002, and September 30, 2002 market value appreciation/(depreciation) in the securities portfolio totaled \$5,604, \$7,170, and \$6,840. As indicated, market values have remained strong due to lower market interest rates.

Other Income - Other income, net of any gains/losses on security transactions, increased by 14.1% from \$1,456 for the three-month period ended September 30, 2002 to \$1,662 for the three-month period ended September 30, 2003.

Other income, net of any gains/losses on security transactions, increased by 13.9% from \$3,925 for the nine-month period ended September 30, 2002 to \$4,471 for the nine-month period ended September 30, 2003.

This increase in the three-month and nine-month period ended September 30, 2003 other income was due to an increase in deposit account volumes, higher merchant discount income, and an increase in volume in the mortgage loan department.

Other Expenses - Other expenses increased by 4.8% from \$3,914 for the three-month period ended September 30, 2002 to \$4,102 for the three-month period ended September 30, 2003. The major components of other expenses are salaries and employee benefits which increased 4.9% from \$2,394 to \$2,512; occupancy expense which increased 6.1% from \$510 to \$541; and other operating expenses which increased by 3.9% from \$1,010 to \$1,049.

Other expenses increased by 8.5% from \$11,351 for the nine-month period ended September 30, 2002 to \$12,314 for the nine-month period ended September 30, 2003. The major components of other expenses are salaries and employee benefits which increased 8.5% from \$7,114 to \$7,718; occupancy expense which increased 7.8% from \$1,479 to \$1,594; and other operating expense which increased by 8.8% from \$2,758 to \$3,002.

## NET INCOME (continued)

The increase in the three-month and nine-month period ended September 30, 2003 salaries and employee benefits was due to normal pay increments and the increased costs of providing employee benefits, particularly health insurance coverage, and the addition of the North Myrtle Beach Office. Looking ahead, occupancy expense will grow in late 2003 due to the construction of a new Main Office Banking Center.

Income Taxes - Provisions for income taxes increased 2.7% from \$976 for the three-month period ended September 30, 2002 to \$1,002 for the three-month period ended September 30, 2003. Income before income taxes less interest on tax-exempt investment securities increased by 5.2% from \$2,722 for the three-month period ended September 30, 2002 to \$2,864 for the same period in 2003. State tax liability increased as income before income taxes increased 3.8% from \$3,005 to \$3,120 during the same period.

Provisions for income taxes increased 2.5% from \$2,703 for the nine-month period ended September 30, 2002 to \$2,770 for the nine-month period ended September 30, 2003. Income before income taxes less interest on tax-exempt investment securities increased by 3.6% from \$7,735 for the nine-month period ended September 30, 2002 to \$8,012 for the same period in 2003 and state tax liability increased as income before income taxes increased 2.9% from \$8,589 to \$8,794 during the same period.

## LIQUIDITY

The bank's liquidity position is primarily dependent on short-term demands for funds caused by customer credit needs and deposit withdrawals and upon the liquidity of bank assets to meet these needs. The bank's liquidity sources include cash and due from banks, federal funds sold and short-term investments. In addition, the bank has established federal funds lines of credit from correspondent banks and has the ability to borrow funds from the Federal Reserve System and the Federal Home Loan Bank of Atlanta. Management feels that short-term and long-term liquidity sources are more than adequate to meet funding needs.

## CAPITAL RESOURCES

Total stockholders' equity was \$66,228, \$61,125, \$53,996 and \$48,606 at September 30, 2003, December 31, 2002, December 31, 2001, and December 31, 2000, representing 10.74%, 10.73%, 10.68%, and 10.32% of total assets, respectively. At September 30, 2003, the Bank exceeds quantitative measures established by regulation to ensure capital adequacy (see NOTE 12 - REGULATORY MATTERS). Capital is considered sufficient by management to meet current and prospective capital requirements and to support anticipated growth in bank operations.

## EFFECTS OF REGULATORY ACTION

Effective March 11, 2000, the Gramm-Leach-Bliley Act of 1999 allows bank holding companies to elect to be treated as financial holding companies which may engage in a broad range of securities, insurance, and other financial activities. At this time, neither the Company nor the Bank plan to enter these new lines of business. The management of the Company and the Bank is not aware of any current recommendations by the regulatory authorities which, if they were to be implemented, would have a material effect on liquidity, capital resources, or operations.

## ACCOUNTING ISSUES

Accounting standards that have been issued or proposed by the Financial Accounting Standards Board and do not require adoption until a future date are not expected to have a material impact on the consolidated financial statements upon adoption.

## RISKS AND UNCERTAINTIES

In the normal course of its business the Company encounters two significant types of risks: economic and regulatory. There are three main components of economic risk: interest rate risk, credit risk and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities mature or reprice at different speeds, or on different basis, than its interest-earning assets. Credit risk is the risk of default on the Company's loan portfolio that results from borrower's inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of collateral underlying loans receivable and the valuation of real estate held by the Company.

The Company is subject to the regulations of various governmental agencies. These regulations can and do change significantly from period to period. The Company also undergoes periodic examinations by the regulatory agencies, which may subject it to further changes with respect to asset valuations, amounts of required loss allowances and operating restrictions from the regulators' judgments based on information available to them at the time of their examination.

## QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises principally from interest rate risk inherent in its lending, deposit and borrowing activities. Management actively monitors and manages its interest rate risk exposure. In addition to other risks which the Company manages in the normal course of business, such as credit quality and liquidity risk, management considers interest rate risk to be a significant market risk that could potentially have a material effect on the Company's financial condition and results of operations (See Net Income - Net Interest Income). Other types of market risks, such as foreign currency risk and commodity price risk, do not arise in the normal course of the Company's business activities.

## CONTROLS AND PROCEDURES

(a) Based on their evaluation of the Company's disclosure controls and procedures as of October 14, 2003, the Company's chief executive officer and chief financial officer concluded that the effectiveness of such controls and procedures was adequate.

(b) There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
