Forward-Looking Statements

Statements included in this report which are not historical in nature are intended to be, and are hereby identified as "forward-looking statements" for purposes of the safe harbor provided by Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical facts. Such forward-looking statements may be identified, without limitation, by the use of the words "anticipates," "believes," "estimates," "expects," "intends," "plans," "predicts," "projects," and similar expressions. The Company's expectations, beliefs, estimates and projections are expressed in good faith and are believed by the Company to have a reasonable basis, including without limitation, management's examination of historical operating trends, data contained in the Company's records and other data available from third parties, but there can be no assurance that management's expectations, beliefs, estimates or projections will result or be achieved or accomplished.

The Company cautions readers that forward-looking statements, including without limitation, those relating to the Company's recent and continuing expansion, its future business prospects, revenues, working capital, liquidity, capital needs, interest costs, income, and adequacy of the allowance for loan losses, are subject to risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements, due to several important factors herein identified, among others, and other risks and factors identified from time to time in the Company's reports filed with the Securities and Exchange Commission.

The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

At March 31, 2005, the Bank had unused short-term lines of credit to purchase Federal Funds from unrelated banks totaling \$28,000. These lines of credit are available on a one to seven day basis for general corporate purposes of the Bank. All of the lenders have reserved the right to withdraw these lines at their option.

The Bank has a demand note through the U.S. Treasury, Tax and Loan system with the Federal Reserve Bank of Richmond. The Bank may borrow up to \$7,000 under the arrangement at a variable interest rate. The note is secured by bonds with a market value of \$3,965 at March 31, 2005. The amount outstanding under the note totaled \$1,879 and \$2,895 at March 31, 2005 and December 31, 2004, respectively.

The Bank also has a line of credit from the Federal Home Loan Bank of Atlanta for \$78,370 secured by a lien on the Bank's 1-4 family mortgages. Allowable terms range from overnight to twenty years at varying rates set daily by the FHLB. There were no amounts outstanding under the agreement at March 31, 2005 and December 31, 2004.

NOTE 9 - INCOME TAXES

Income tax expense for the quarters ended March 31, 2005 and March 31, 2004 on pretax income of \$3,345 and \$2,941 totaled \$1,112 and \$932, respectively. The provision for federal income taxes is calculated by applying the 34% statutory federal income tax rate and increasing or reducing this amount due to any tax-exempt interest, state bank tax (net of federal benefit), business credits, surtax exemption, tax preferences, alternative minimum tax calculations, or other factors. A summary of income tax components and a reconciliation of income taxes to the federal statutory rate are included in fiscal year-end reports.

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standards ("SFAS") No. 109, "Accounting for Income Taxes".

NOTE 10 - COMMITMENTS AND CONTINGENT LIABILITIES

From time to time the bank subsidiary is a party to various litigation, both as plaintiff and as defendant, arising from its normal operations. No material losses are anticipated in connection with any of these matters at March 31, 2005.

In the normal course of business, the bank subsidiary is party to financial instruments with off-balance-sheet risk including commitments to extend credit and standby letters of credit. Such instruments have elements of credit risk in excess of the amount recognized in the balance sheet. The exposure to credit loss in the event of nonperformance by the other parties to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. Generally, the same credit policies used for on-balance-sheet instruments, such as loans, are used in extending loan commitments and standby letters of credit.

Following are the off-balance-sheet financial instruments whose contract amounts represent credit risk:

	<u>March 31, 2005</u>
Loan Commitments	\$ 51,414
Standby letters of credits	3,816

Loan commitments involve agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and some involve payment of a fee. Many of the commitments are expected to expire without being fully drawn. Therefore, the total amount of loan commitments does not necessarily represent future cash requirements. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if any, upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include commercial and residential real properties, accounts receivable, inventory and equipment.

Standby letters of credit are conditional commitments to guarantee the performance of a customer to a third party. The credit risk involved in issuing standby letters of credit is the same as that involved in making loan commitments to customers. Many letters of credit will expire without being drawn upon and do not necessarily represent future cash requirements.

Management believes that its various sources of liquidity provide the resources necessary for the bank subsidiary to fund the loan commitments and to perform under standby letters of credit, if the need arises. Neither the Company nor the Bank are involved in other off-balance sheet contractual relationships or transactions that could result in liquidity needs or other commitments or significantly impact earnings.

NOTE 11 - EMPLOYEE BENEFIT PLAN

The Bank has a defined contribution pension plan covering all employees who have attained age twenty-one and have a minimum of one year of service. Upon ongoing approval of the Board of Directors, the Bank matches one-hundred percent of employee contributions up to three percent of employee salary deferred and fifty percent of employee contributions in excess of three percent and up to five percent of salary deferred. The Board of Directors may also make discretionary contributions to the Plan. For the quarter ended March 31, 2005 and year ended December 31, 2004, \$154 and \$595, respectively, was charged to operations under the plan.

NOTE 12 - REGULATORY MATTERS

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory - and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the financial statements. The regulations require the Bank to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital classification is also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

NOTE 12 - REGULATORY MATTERS - Continued

Quantitative measures established by regulation to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the table below) of Tier I capital to adjusted total assets (Leverage Capital ratio) and minimum ratios of Tier I and total capital to risk-weighted assets. To be considered adequately capitalized under the regulatory framework for prompt corrective action, the Bank must maintain minimum Tier I leverage, Tier I risk-based and total risk-based ratios as set forth in the table. The Bank's actual capital ratios are also presented in the table below as of March 31, 2005:

	<u>Actual</u>		<u>For Capital adequacy Purposes Minimum</u>		<u>To be well capitalized under prompt corrective action provisions Minimum</u>	
	<u>Amount</u>	<u>Ratio</u>	<u>Amount</u>	<u>Ratio</u>	<u>Amount</u>	<u>Ratio</u>

Item 2.**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

(All dollar amounts in thousands, except per share data.)

Management's Discussion and Analysis is provided to afford a clearer understanding of the major elements of the corporation's results of operations, financial condition, liquidity, and capital resources. The following discussion should be read in conjunction with the corporation's financial statements and notes thereto and other detailed information appearing elsewhere in this report. In addition, the results of operations for the interim periods shown in this report are not necessarily indicative of results to be expected for the fiscal year. The accompanying consolidated financial statements include all accounts of the Company and the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation. The accompanying unaudited consolidated financial statements at March 31, 2005 and for the three-month periods ending March 31, 2005 and 2004 have been prepared in accordance with generally accepted accounting principles ("GAAP") for interim financial information and with the instructions to Form 10-Q for the Securities and Exchange Commission. Accordingly, they do not include all information and footnotes required by GAAP for complete financial statements. However, in the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included.

DISTRIBUTION OF ASSETS AND LIABILITIES

The Company maintains a conservative approach in determining the distribution of assets and liabilities. Loans have increased 14.4% from \$376,718 at March 31, 2004 to \$430,778 at March 31, 2005 and have increased as a percentage of total assets from 58.4% to 62.0% over the same period as loan demand has strengthened in our market. Securities and federal funds sold have decreased as a percentage of total assets from 34.3% at March 31, 2004 to 30.6% at March 31, 2005. This level of investments and federal funds sold provides for a more than adequate supply of secondary liquidity. Management has sought to build the deposit base with stable, relatively non-interest-sensitive deposits by offering the small to medium deposit account holders a wide array of deposit instruments at competitive rates. Non-interest-bearing demand deposits increased as a percentage of total assets from 17.5% at March 31, 2004 to 18.3% at March 31, 2005. As more customers, both business and personal, are attracted to interest-bearing deposit accounts, we expect the percentage of demand deposits to decline over the long-term. Interest-bearing deposits have decreased slightly from 67.2% of total assets at March 31, 2004 to 66.8% at March 31, 2005 while securities sold under agreement to repurchase have increased from 4.0% to 4.2% over the same period.

The following table sets forth the percentage relationship to total assets of significant component's of the corporation's balance sheets as of March 31, 2005 and 2004:

RESULTS OF OPERATION

CNB Corporation experienced earnings for the three-month periods ended March 31, 2005 and 2004 of \$2,233 and \$2,009, respectively, resulting in a return on average assets of 1.30% and 1.29% and a return on average stockholders' equity of 13.09% and 12.16%.

The earnings were primarily attributable to net interest margins in each period (see Net Income-Net Interest Income). Other factors include management's ongoing effort to maintain other income at adequate levels (see Net Income - Other Income) and to control other expenses (see Net Income - Other Expenses). This level of earnings, coupled with a moderate dividend policy, have supplied the necessary capital funds to support the growth in total assets. Total assets have increased \$50,119 or 7.8% from \$644,481 at March 31, 2004 to \$694,600 at March 31, 2005. The following table sets forth the financial highlights for the three-month periods ending March 31, 2005 and March 31, 2004:

NET INCOME

Net Interest Income - Earnings are dependent to a large degree on net interest income, defined as the difference between gross interest and fees earned on earning assets, primarily loans and securities, and interest paid on deposits and borrowed funds. Net interest income is affected by the interest rates earned or paid and by volume changes in loans, securities, deposits, and borrowed funds.

Interest rates paid on deposits and borrowed funds and earned on loans and investments have generally followed the fluctuations in market interest rates in 2005 and 2004. However, fluctuations in market interest rates do not necessarily have a significant impact on net interest income, depending on the bank's rate sensitivity position. A rate sensitive asset (RSA) is any loan or investment that can be repriced either up or down in interest rate within a certain time interval. A rate sensitive liability (RSL) is an interest paying deposit or other liability that can be repriced either up or down in interest rate within a certain time interval. When a proper balance between RSA and RSL exists, market interest rate fluctuations should not have a significant impact on earnings. The larger the imbalance, the greater the interest rate risk assumed by the bank and the greater the positive or negative impact of interest rate fluctuations on earnings. The bank seeks to manage its assets and liabilities in a manner that will limit interest rate risk and thus stabilize long-run earning power. Management believes that a rise or fall in interest rates will not materially affect earnings.

The Bank has maintained net interest margins for the three-month period ended March 31, 2005, of 4.4% and 4.2% for the same period in 2004, as compared to management's long-term target of 4.5%. Net interest margins have been compressed at the bank and industry-wide as we are experiencing almost 50 year lows in market interest rates. We anticipate short-term interest rates to increase throughout 2005 which will enhance our earnings potential through a wider net interest margin.

Fully-tax-equivalent net interest income showed a 12.3% increase from \$6,143 for the three-month period ended March 31, 2004 to \$6,898 for the three-month period ended March 31, 2005. During the same period, total fully-tax-equivalent interest income increased by 14.7% from \$7,762 to \$8,903 and total interest expense increased by 23.8% from \$1,619 to \$2,005. Fully-tax-equivalent net interest income as a percentage of total earning assets has shown an increase of .11% from 4.24% for the three-month period ended March 31, 2004 to 4.35% for the three-month period ended March 31, 2005.

The tables on the following two pages present selected financial data and an analysis of net interest income.

NET INCOME (continued)

Provision for Loan Losses - It is the policy of the Bank to maintain the allowance for loan losses at the greater of 1.20% of net loans or the percentage based on a level to cover potential losses identified in the portfolio.

The provision for loan losses was \$285 for the three-month period ended March 31, 2005 and \$235 for the three-month period ended March 31, 2004. Net loan charge-offs/(recoveries) totaled \$50 for the three-month period ended March 31, 2005 and \$53 for the same period in 2004.

The allowance for loan losses as a percentage of net loans was 1.25% at March 31, 2005 and 1.27% at March 31, 2004. The increased provision during the three-month period ended March 31, 2005 reflects the continued strong loan portfolio growth.

Securities Transactions - At March 31, 2005, December 31, 2004, and March 31, 2004 market value appreciation/(depreciation) in the investment portfolio totaled \$(1,381), \$1,469, and \$5,591, respectively. As indicated, market values have decreased due to higher market interest rates in 2004 and early 2005. Security gains of \$2 resulted from the sale of \$4,000 in AFS securities during the first quarter of 2005 to supplement liquidity.

Other Income - Other income, net of any gains/losses on security transactions, increased by 6.8% from \$1,354 for the three-month period ended March 31, 2004 to \$1,446 for the three-month period ended March 31, 2005. This increase in the three-month period ended March 31, 2005 other income was due to an increase in merchant discount income, offset somewhat by slightly lower service charges on deposit accounts income.

Other Expenses - Other expenses increased by 9.6% from \$4,195 for the three-month period ended March 31, 2004 to \$4,598 for the three-month period ended March 31, 2005. The major components of other expenses are salaries and employee benefits which increased 11.5% from \$2,681 to \$2,990; occupancy expense which increased 12.4% from \$605 to \$680; and other operating expenses which increased by 2.1% from \$909 to \$928. The increase in the three-month period ended March 31, 2005 salaries and employee benefits was due to normal pay increases and the increased costs of providing employee benefits, particularly health insurance coverage. In addition, in 2005 the Company began accruing year-end bonus awards to bank staff in the amount of \$135 per quarter as these awards have increased in size over the past few years. Occupancy expense continues to grow due to the addition of new banking facilities and staff. Looking ahead, the construction, staffing, and equipping of a new banking office in Pawleys Island, South Carolina, expected to be completed in the fourth quarter of 2005, will add to future occupancy expenses.

Income Taxes - Provisions for income taxes increased 19.3% from \$932 for the three-month period ended March 31, 2004 to \$1,112 for the three-month period ended March 31, 2005. Income before income taxes less interest on tax-exempt investment securities increased by 15.5% from \$2,696 for the three-month period ended March 31, 2004 to \$3,115 for the same period in 2005. State tax liability increased as income before income taxes increased 13.7% from \$2,941 to \$3,345 during the same period.

LIQUIDITY

The bank's liquidity position is primarily dependent on short-term demands for funds caused by customer credit needs and deposit withdrawals and upon the liquidity of bank assets to meet these needs. The bank's liquidity sources include cash and due from banks, federal funds sold, and short-term investments. In addition, the bank has established federal funds lines of credit from correspondent banks and has the ability to borrow funds from the Federal Reserve System and the Federal Home Loan Bank of Atlanta. Management feels that short-term and long-term liquidity sources are more than adequate to meet funding needs, including the funding of off-balance sheet loan commitments and standby letters of credit, if the need arises. Neither the Company nor the Bank are involved in other off-balance sheet contractual relationships or transactions that could result in liquidity needs or other commitments or significantly impact earnings. The Bank has begun construction of a new banking office in Pawleys Island, South Carolina. Land, construction, and equipment costs are estimated at \$1,750.

CAPITAL RESOURCES

Total stockholders' equity was \$68,132 and \$67,585 at March 31, 2005 and December 31, 2004 representing 9.81% and 10.06% of total assets, respectively. At March 31, 2005, the Bank exceeds quantitative measures established by regulation to ensure capital adequacy (see NOTE 12 to the consolidated unaudited financial statements - REGULATORY MATTERS). Capital is considered sufficient by management to meet current and prospective capital requirements and to support anticipated growth in bank operations.

CRITICAL ACCOUNTING POLICIES

We have adopted various accounting policies which govern the application of accounting principles generally accepted in the United States of America in the preparation of our financial statements. Our significant accounting policies are described in the notes to the consolidated financial statements at December 31, 2004 as filed on our annual report on Form 10-K. Certain accounting policies involve significant judgments and assumptions by us which have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgments and assumptions we use are based on the historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgments and assumptions we make, actual results could differ from these judgments and estimates which could have a major impact on our carrying values of assets and liabilities and our results of operations.

We believe the allowance for loan losses is a critical accounting policy that requires the most significant judgments and estimates used in preparation of our consolidated financial statements. Refer to the portions of our 2004 Annual Report on Form 10-K and this Form 10-Q that address our allowance for loan losses for description of our processes and methodology for determining our allowance for loan losses.

RISKS AND UNCERTAINTIES

In the normal course of its business the Company encounters two significant types of risks: economic and regulatory. There are three main components of economic risk: interest rate risk, credit risk and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities mature or reprice at different speeds, or on different basis, than its interest-earning assets. Credit risk is the risk of default on the Company's loan portfolio that results from borrower's inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of collateral underlying loans receivable and the valuation of real estate held by the Company.

The Company is subject to the regulations of various governmental agencies. These regulations can and do change significantly from period to period. The Company also undergoes periodic examinations by the regulatory agencies, which may subject it to further changes with respect to asset valuations, amounts of required loss allowances and operating restrictions from the regulators' judgments based on information available to them at the time of their examination.

Item 3. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises principally from interest rate risk inherent in its lending, deposit and borrowing activities. Management actively monitors and manages its interest rate risk exposure. In addition to other risks which the Company manages in the normal course of business, such as credit quality and liquidity risk, management considers interest rate risk to be a significant market risk that could potentially have a material effect on the Company's financial condition and results of operations (See Net Income - Net Interest Income). Other types of market risks, such as foreign currency risk and commodity price risk, do not arise in the normal course of the Company's business activities.

Item 4. CONTROLS AND PROCEDURES

Based on the evaluation required by 17 C.F.R. Section 240.13a-15(b) or 240.15d-15(b) of the Company's disclosure controls and procedures (as defined in 17 C.F.R. Sections 240.13a-15(e) and 240.15d-15(e)), the Company's chief executive officer and chief financial officer concluded that the effectiveness of such controls and procedures, as of the end of the period covered by this quarterly report, was adequate.

No disclosure is required under 17 C.F.R. Section 229.308.
