

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended September 30, 2010

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number: 000-24523

CNB Corporation

(Exact name of registrant as specified in its charter)

South Carolina
(State or other jurisdiction of incorporation or organization)

57-0792402
(I.R.S. Employer Identification No.)

1400 Third Avenue, Conway, S.C.
(Address of principal executive offices)

29526
(Zip Code)

(Registrant's telephone number, including area code): (843) 248-5721

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐ (Not yet applicable to Registrant)

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐

Accelerated filer ☒

Non-accelerated filer ☐ (Do not check if a smaller reporting company)

Smaller Reporting Company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
☐ Yes ☒ No.

State the number of shares outstanding of each of the issuer's classes of common equity as of the latest practical date: 1,665,106 shares of common stock, par value \$5 per share, November 1, 2010.

CAUTIONARY NOTICE WITH RESPECT TO FORWARD LOOKING STATEMENTS

This report contains "forward-looking statements" within the meaning of the securities laws. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that a variety of factors could cause the Company's actual results and experience to differ materially from the anticipated results or other expectations expressed in the Company's forward-looking statements.

All statements that are not historical facts are statements that could be "forward-looking statements." You can identify these forward-looking statements through the use of words such as "may," "will," "should," "could," "would," "expect," "anticipate," "assume," "indicate," "contemplate," "seek," "plan," "predict," "target," "potential," "believe," "intend," "estimate," "project," "continue," or other similar words. Forward-looking statements include, but are not limited to, statements regarding the Company's future business prospects, revenues, working capital, liquidity, capital needs, interest costs, income, business operations and proposed services.

These forward-looking statements are based on current expectations, estimates and projections about the banking industry and the economy, management's beliefs, and assumptions made by management. Such information includes, without limitation, discussions as to estimates, expectations, beliefs, plans, strategies, and objectives concerning future financial and operating performance. These statements are not guarantees of future performance and are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, actual results may differ materially from those expressed or forecasted in such forward-looking statements. The risks and uncertainties include, but are not limited to:

- future economic and business conditions;
- lack of sustained growth and disruptions in the economies of the Company's market areas;
- government monetary and fiscal policies;
- the effects of changes in interest rates on the levels, composition and costs of deposits, loan demand, and the values of loan collateral, securities, and interest sensitive assets and liabilities;
- the effects of competition from a wide variety of local, regional, national and other providers of financial, investment, and insurance services, as well as competitors that offer banking products and services by mail, telephone, computer and/or the Internet;
- credit risks;
- higher than anticipated levels of defaults on loans;
- perceptions by depositors about the safety of their deposits;
- ability to weather the current economic downturn;
- loss of consumer or investor confidence;
- the failure of assumptions underlying the establishment of the allowance for loan losses and other estimates, including the value of collateral securing loans;
- the risks of opening new offices, including, without limitation, the related costs and time of building customer relationships and integrating operations as part of these endeavors and the failure to achieve expected gains, revenue growth and/or expense savings from such endeavors;
- increases in deposit insurance premiums;
- changes in laws and regulations, including tax, banking and securities laws and regulations;
- changes in the requirements of regulatory agencies;
- changes in accounting policies, rules and practices;
- changes in technology or products may be more difficult or costly, or less effective, than anticipated;
- the effects of war or other conflicts, acts of terrorism or other catastrophic events that may affect general economic conditions and economic confidence; and
- other factors and information described in this report and in any of the other reports that we file with the Securities and Exchange Commission under the Securities Exchange Act of 1934.

All forward-looking statements are expressly qualified in their entirety by this cautionary notice. The Company has no obligation, and does not undertake, to update, revise or correct any of the forward-looking statements after the date of this report. The Company has expressed its expectations, beliefs and projections in good faith and believes they have a reasonable basis. However, there is no assurance that these expectations, beliefs or projections will result or be achieved or accomplished.

CNB CORPORATION AND SUBSIDIARY (The "Company")

CNB CORPORATION (The "Parent")

THE CONWAY NATIONAL BANK (The "Bank")

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(All Dollar Amounts in Thousands)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Net income per share - Net income per share is computed on the basis of the weighted average number of common shares outstanding resulting in 1,673,716 shares for the nine-month period ended September 30, 2010 and 1,668,845 shares for the nine-month period ended September 30, 2009.

Fair values of financial instruments

Financial Accounting Standards Board Accounting Standards Codification 820 (FASB ASC 820), "*Fair Value of Financial Instruments*," requires disclosure of fair value information for financial instruments, whether or not recognized in the balance sheet, when it is practicable to estimate the fair value. FASB ASC 820 defines a financial instrument as cash, evidence of an ownership interest in an entity or contractual obligations which require the exchange of cash or other financial instruments. Certain items are specifically excluded from the disclosure requirements, including the Company's common stock. In addition, other nonfinancial instruments such as premises and equipment and other assets and liabilities are not subject to the disclosure requirements.

The following methods and assumptions were used by the Company in estimating fair values of financial instruments as disclosed herein:

Cash and due from banks - The carrying amounts of cash and due from banks (cash on hand, due from banks and interest bearing deposits with other banks) approximate their fair value.

Federal funds sold - The carrying amounts of federal funds sold approximate their fair value.

Investment securities available for sale and held to maturity - Fair values for investment securities are based on quoted market prices.

Other investments - No ready market exists for Federal Reserve and Federal Home Loan Bank Stock and they have no quoted market value. However, redemption of this stock has historically been at par value. Management has determined it is not practicable to estimate the fair value and has not performed an impairment analysis.

Loans - For variable rate loans that reprice frequently and for loans that mature within one year, fair values are based on carrying values. Fair values for all other loans are estimated using discounted cash flow analyses, with interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values for impaired loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposits - The fair values disclosed for demand deposits are, by definition, equal to their carrying amounts. The carrying amounts of variable rate, fixed-term money market accounts and short-term certificates of deposit approximate their fair values at the reporting date. Fair values for long-term fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities.

Short-term borrowings - The carrying amounts of borrowings under repurchase agreements and U. S. Treasury demand notes approximate their fair values.

Federal Home Loan Bank Advances - Fair value is estimated based on discounted cash flows using current market rates for borrowings with similar terms.

Off balance sheet instruments - Fair values of off balance sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Recently Issued Accounting Pronouncements – The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting, and/or disclosure of financial information by the Company.

In July 2010, the Receivables topic of the ASC was amended to require expanded disclosures related to a company's allowance for credit losses and the credit quality of its financing receivables. The amendments will require the allowance disclosures to be provided on a disaggregated basis. The Company is required to begin to comply with the disclosures in its financial statements for the year ended December 31, 2010.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), which significantly changes the regulation of financial institutions and the financial services industry. The Dodd-Frank Act includes several provisions that will affect how community banks, thrifts, and small bank and thrift holding companies will be regulated in the future. Among other things, these provisions abolish the Office of Thrift Supervision and transfer its functions to the other federal banking agencies, relax rules regarding interstate branching, allow financial institutions to pay interest on business checking accounts, change the scope of federal deposit insurance coverage, and impose new capital requirements on bank and thrift holding companies. The Dodd-Frank Act also establishes the Bureau of Consumer Financial Protection as an independent entity within the Federal Reserve, which will be given the authority to promulgate consumer protection regulations applicable to all entities offering consumer financial services or products, including banks. Additionally, the Dodd-Frank Act includes a series of provisions covering mortgage loan origination standards affecting originator compensation, minimum repayment standards, and pre-payments. Management is actively reviewing the provisions of the Dodd-Frank Act and assessing its probable impact on our business, financial condition, and results of operations.

In August 2010, two updates were issued to amend various SEC rules and schedules pursuant to Release No. 33-9026: Technical Amendments to Rules, Forms, Schedules and Codification of Financial Reporting Policies and based on the issuance of SEC Staff Accounting Bulletin 112. The amendments related primarily to business combinations and removed references to "minority interest" and added references to "controlling" and "noncontrolling interest(s)". The updates were effective upon issuance but had no impact on the Company's financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations and cash flows.

NOTE 2 – RESTRICTIONS ON CASH AND DUE FROM BANKS

The Bank is required to maintain average reserve balances either at the Bank or on deposit with the Federal Reserve Bank. The average amounts of these reserve balances for the nine-month period ended September 30, 2010 and for the year ended December 31, 2009 were approximately \$1,232 and \$1,406 respectively.

NOTE 3 – INVESTMENT SECURITIES

Investment securities with an aggregate par value of \$206,755 (\$211,483 fair value) at September 30, 2010 and \$207,233 (\$210,905 fair value) at December 31, 2009 were pledged to secure public deposits and for other purposes required by law.

The following summaries reflect the book value, unrealized gains and losses, approximate market value, and tax-equivalent yields of investment securities listed by type of issuer and maturity at September 30, 2010 and at December 31, 2009.

State, county, and municipal	726	15	503	13	1,229	28
Total	<u>\$ 2,711</u>	<u>\$ 32</u>	<u>\$ 503</u>	<u>\$ 13</u>	<u>\$ 3,214</u>	<u>\$ 45</u>

Securities classified as available for sale are recorded at fair market value. At September 30, 2010, and December 31, 2009, there were no available for sale securities in a continuous loss position for twelve months or more.

Securities classified as held to maturity are recorded at cost. At September 30, 2010 there were no held to maturity securities in a continuous loss position for twelve months or more. At December 31, 2009, the Company owned \$503, fair value, of held to maturity securities in a continuous loss position for twelve months or more with \$13 of unrealized losses consisting of one municipal security.

For the nine-month period ended September 30, 2010, the Company sold \$18,252 (book value) of available for sale securities for a gain of \$1,004. For the nine-month period ended September 30, 2009, the Company sold \$45,605 (book value) of available for sale securities for a gain of \$1,352.

For the nine-month period ended September 30, 2010, the Company sold \$2,249 (book value) of held to maturity securities, consisting of four securities, for a gain of \$73. Two of these held to maturity securities, \$767 (book value), were sold under exception "a." of ASC 320-10-25-6 as a result of both securities losing their rating due to a downgrade of the insurer. Two of these held to maturity securities, \$1,482 (book value), were sold under exception "d." of ASC 320-10-25-6 because the primary regulator of the Company's subsidiary bank has increased scrutiny of capital and its components and, consequently, due to continued uncertainty in the municipal bond markets, the amount of investment in individual municipal securities issuers. In response to these regulatory concerns related to capital and its components, the Company sold all of its municipal securities of individual issuers in excess of \$600, including all municipal securities in this size category classified held to maturity as well as those classified available for sale. We believe that the sale of these held to maturity securities should not be considered inconsistent with the original classification and the remaining portfolio is not tainted.

Management reviews securities for other-than-temporary impairment on at least a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the fact that Company does not intend to sell these securities, and it is more likely than not that the Company will not be required to sell these securities before recovery of their amortized cost.

NOTE 4 - LOANS AND ALLOWANCE FOR LOAN LOSSES

The following is a summary of loans at September 30, 2010 and December 31, 2009 by major classification:

	September 30, 2010	December 31, 2009
Real estate loans – mortgage	\$ 369,302	\$ 375,741
- construction	68,558	81,311
Agricultural loans	4,239	2,930
Commercial and industrial loans	63,186	74,565
Loans to individuals for household, family and other consumer expenditures	42,273	44,865
All other loans, including overdrafts and deferred loan costs	<u>483</u>	<u>384</u>
Gross loans	\$ 548,041	\$ 579,796
Less allowance for loan losses	<u>(12,431)</u>	<u>(9,142)</u>
Net loans	<u>\$ 535,610</u>	<u>\$ 570,654</u>

Changes in the allowance for loan losses for the quarters and nine-months ended September 30, 2010 and 2009, and the year ended December 31, 2009 are summarized as follows:

	Quarter Ended September 30, 2010	Quarter Ended September 30, 2009	Year Ended December 31, 2009	Nine-Months Ended September 30, 2010	Nine-Months Ended September 30, 2009
Balance, beginning of period	<u>\$ 11,506</u>	<u>\$ 8,400</u>	<u>\$ 7,091</u>	<u>\$ 9,142</u>	<u>\$ 7,091</u>
Charge-offs:					
Commercial, financial, and agricultural	746	479	2,251	2,741	1,608
Real Estate - construction and mortgage	2,551	1,360	4,383	5,702	3,010
Loans to individuals	<u>251</u>	<u>239</u>	<u>1,141</u>	<u>760</u>	<u>745</u>
Total charge-offs	<u>\$ 3,548</u>	<u>\$ 2,078</u>	<u>\$ 7,775</u>	<u>\$ 9,203</u>	<u>\$ 5,363</u>
Recoveries:					
Commercial, financial, and agricultural	\$ 22	\$ 115	\$ 593	\$ 206	\$ 256
Real Estate - construction and mortgage	5	7	16	20	13
Loans to individuals	<u>67</u>	<u>302</u>	<u>469</u>	<u>318</u>	<u>423</u>
Total recoveries	<u>\$ 94</u>	<u>\$ 424</u>	<u>\$ 1,078</u>	<u>\$ 544</u>	<u>\$ 692</u>
Net charge-offs	<u>\$ 3,454</u>	<u>\$ 1,654</u>	<u>\$ 6,697</u>	<u>\$ 8,659</u>	<u>\$ 4,671</u>
Additions charged to operations	<u>\$ 4,379</u>	<u>\$ 2,221</u>	<u>\$ 8,748</u>	<u>\$11,948</u>	<u>\$ 6,547</u>
Balance, end of period	<u>\$12,431</u>	<u>\$ 8,967</u>	<u>\$ 9,142</u>	<u>\$12,431</u>	<u>\$ 8,967</u>
Ratio of net charge-offs during the period to average loans outstanding during the period	<u>.62%</u>	<u>.28%</u>	<u>1.15%</u>	<u>1.53%</u>	<u>.78%</u>

The entire balance of the allowance for loan losses is available to absorb future loan losses.

At September 30, 2010, December 31, 2009, and September 30, 2009 loans on which no interest was being accrued totaled \$25,143, \$12,678, and 11,318, respectively. All loans on which no interest was being accrued as well as other loans identified by management as having weaknesses which result in a determination of an inability on the part of the borrower to make full and timely payment of principal and interest are classified as impaired. Impaired loans at September 30, 2010, December 31, 2009, and September 30, 2009 were \$26,046, \$13,578, and \$12,992, respectively. The portion of the allowance for loan losses specifically allocated to impaired loans at September 30, 2010, December 31, 2009, and September 30, 2009 was \$798, \$176, and \$250, respectively. The Company had \$5,297 of foreclosed real estate at September 30, 2010, \$1,622 of foreclosed real estate at December 31, 2009, and \$1,544 of foreclosed real estate at September 30, 2009. Loans 90 days past due and still accruing interest totaled \$468, \$961, and \$711 at September 30, 2010, December 31, 2009, and September 30, 2009, respectively.

At September 30, 2010, December 31, 2009, and September 30, 2009 classified assets, the majority consisting of classified loans, were \$85,876, \$52,614, and \$47,551, respectively. At September 30, 2010, December 30, 2009, and September 30, 2009 classified assets represented 88.27%, 56.79%, and 49.20% of total capital (the sum of Tier 1 Capital and the Allowance for Loan Losses), respectively.

NOTE 5 - PREMISES AND EQUIPMENT

Property at September 30, 2010 and December 31, 2009 is summarized as follows:

	September 30, 2010	December 31, 2009
Land and buildings	\$ 26,315	\$ 26,315
Furniture, fixtures and equipment	9,862	9,642
Construction in progress	<u>93</u>	<u>-</u>
	\$ 36,270	\$ 35,957
Less accumulated depreciation and amortization	<u>13,827</u>	<u>12,706</u>
	<u>\$ 22,443</u>	<u>\$ 23,251</u>

Depreciation and amortization of bank premises and equipment charged to operating expense was \$1,144 and \$1,170 for the nine-month periods ended September 30, 2010 and 2009, respectively, and \$1,538 for the year ended December 31, 2009. The construction in progress is primarily related to the renovation of the Company's Myrtle Beach branch office located in Myrtle Beach, South Carolina, renovation of the Company's Main Street branch office located in Conway, South Carolina, and the renovation of the Company's Northside branch office located in Myrtle Beach, South Carolina. There are no remaining costs associated with renovation of the Main Street branch office. Remaining construction, equipment, and furniture and fixtures costs associated with the Myrtle Beach branch office and the Northside branch office are \$4 and \$9, respectively.

NOTE 6 - CERTIFICATES OF DEPOSIT IN EXCESS OF \$100

At September 30, 2010 and December 31, 2009, certificates of deposit of \$100 or more included in time deposits totaled approximately \$226,992 and \$230,004, respectively. Interest expense on these deposits was approximately \$3,408 and \$4,124 for the nine-month periods ended September 30, 2010 and 2009, respectively, and \$5,359 for the year ended December 31, 2009.

NOTE 7 - SECURITIES SOLD UNDER REPURCHASE AGREEMENTS

At September 30, 2010 and December 31, 2009, securities sold under repurchase agreements totaled \$103,623 and \$104,654, respectively. Securities with a book value of \$116,833 (\$117,741 fair value) and \$110,865 (\$111,556 fair value), respectively, were used as collateral for the agreements. The weighted-average interest rate of these agreements was .62 percent and 1.11 percent at September 30, 2010 and December 31, 2009, respectively.

NOTE 8 - LINES OF CREDIT

At September 30, 2010, the Bank had unused short-term lines of credit to purchase Federal Funds from unrelated banks totaling \$35,500. These lines of credit are available on a one to seven day basis for general corporate purposes of the Bank. All of the lenders have reserved the right to withdraw these lines at their option.

The Bank has a demand note through the U.S. Treasury, Tax and Loan system with the Federal Reserve Bank of Richmond. The Bank may borrow up to \$7,000 under the arrangement at a variable interest rate. The note is secured by bonds with a market value of \$3,076 at September 30, 2010. The amount outstanding under the note totaled \$741 and \$650 at September 30, 2010 and December 31, 2009, respectively.

The Bank also has a line of credit from the Federal Home Loan Bank of Atlanta for \$52,443 secured by a lien on the Bank's 1-4 family mortgages. Allowable terms range from overnight to twenty years at varying rates set daily by the FHLB. There were \$5,000 in borrowings under the agreement at September 30, 2010 and \$15,000 at December 31, 2009.

NOTE 9 - INCOME TAXES

Income tax expense/(benefit) for the nine months ended September 30, 2010 and September 30, 2009 on pretax income/(loss) of \$(1,045) and \$5,930 totaled \$(614) and \$1,859, respectively. The provision for federal income taxes is calculated by applying the 34% statutory federal income tax rate and increasing or reducing this amount due to any tax-exempt interest, state bank tax (net of federal benefit), business credits, surtax exemption, tax preferences, alternative minimum tax calculations, or other factors. A summary of income tax components and a reconciliation of income taxes to the federal statutory rate are included in fiscal year-end reports.

The Company accounts for income taxes in accordance with FASB ASC 740 "Income Taxes."

NOTE 10 - COMMITMENTS AND CONTINGENT LIABILITIES

From time to time the Bank is a party to various litigation matters, both as plaintiff and as defendant, arising from its normal operations. No material losses are anticipated in connection with any of these matters at September 30, 2010.

In the normal course of business, the Bank is a party to financial instruments with off-balance-sheet risk including commitments to extend credit and standby letters of credit. Such instruments have elements of credit risk in excess of the amount recognized in the balance sheet. The exposure to credit loss in the event of nonperformance by the other parties to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. Generally, the same credit policies used for on-balance-sheet instruments, such as loans, are used in extending loan commitments and standby letters of credit.

Following are the off-balance-sheet financial instruments whose contract amounts represent credit risk:

	<u>September 30, 2010</u>
Loan Commitments	\$ 39,906
Standby letters of credit	1,767

Loan commitments involve agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and some involve payment of a fee. Many of the commitments are expected to expire without being fully drawn. Therefore, the total amount of loan commitments does not necessarily represent future cash requirements. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if any, upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include certificates of deposit or other negotiable collateral, commercial and residential real properties, accounts receivable, inventory and equipment.

Standby letters of credit are conditional commitments to guarantee the performance of a customer to a third party. The credit risk involved in issuing standby letters of credit is the same as that involved in making loan commitments to customers. Many letters of credit will expire without being drawn upon and do not necessarily represent future cash requirements.

Management believes that its various sources of liquidity provide the resources necessary for the Bank to fund the loan commitments and to perform under standby letters of credit, if the need arises. Neither the Company nor the Bank are involved in other off-balance sheet contractual relationships or transactions that could result in liquidity needs or other commitments or significantly impact earnings.

NOTE 11 - EMPLOYEE BENEFIT PLAN

The Bank has a defined contribution pension plan covering all employees who have attained age twenty-one and have a minimum of one year of service. Upon ongoing approval of the Board of Directors, the Bank matches one-hundred percent of employee contributions up to three percent of employee salary deferred and fifty percent of employee contributions in excess of three percent and up to five percent of salary deferred. The Board of Directors may also make discretionary contributions to the Plan. For the three-month and nine-month periods ended September 30, 2010 and the year ended December 31, 2009, \$101, \$294, and \$380, respectively, was charged to operations under the plan.

NOTE 12 - REGULATORY MATTERS

The Bank and the Company are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory - and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the financial statements. The regulations require the Bank and the Company to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital classification is also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the maintenance of minimum amounts and ratios (set forth in the tables below) of Tier 1 capital to adjusted total assets (Leverage Capital ratio) and minimum ratios of Tier 1 and total capital to risk-weighted assets. To be considered adequately capitalized under the regulatory framework for prompt corrective action, the Company and the Bank must maintain minimum Tier 1 leverage, Tier 1 risk-based and total risk-based ratios as set forth in the tables below. The Company's and the Bank's actual capital ratios are presented in the tables below as of September 30, 2010:

Company

	Actual		For Capital adequacy Purposes Minimum	
	Amount	Ratio	Amount	Ratio
Total Capital (to risk weighted assets)	\$92,373	16.10%	\$45,912	8.0%
Tier 1 Capital (to risk weighted assets)	85,135	14.83	22,956	4.0
Tier 1 Capital (to average assets)	85,135	8.92	38,197	4.0

Bank

	Actual		For Capital adequacy Purposes Minimum		To be Well capitalized under prompt corrective action provisions Minimum	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Total Capital (to risk weighted assets)	\$92,097	16.05%	\$45,910	8.0%	\$57,387	10.0%
Tier 1 Capital (to risk weighted assets)	84,859	14.79	22,955	4.0	34,432	6.0
Tier 1 Capital (to average assets)	84,859	8.89	38,196	4.0	47,744	5.0

NOTE 13 - ESTIMATED FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated fair values of the Company's financial instruments were as follows at September 30, 2010 and December 31, 2009 (amounts in thousands):

	<u>September 30, 2010</u>		<u>December 31, 2009</u>	
	<u>Carrying Amount</u>	<u>Fair Value</u>	<u>Carrying Amount</u>	<u>Fair Value</u>
FINANCIAL ASSETS				
Cash and due from banks and Federal Reserve balance in excess of requirement	\$ 51,644	\$ 51,644	\$ 62,644	\$ 62,644
Federal funds sold	14,000	14,000	14,000	14,000

Federal Home Loan Bank advance	5,000	4,961	15,000	15,012
U.S. Treasury demand notes	741	741	650	650
	<u>Notional Amount</u>		<u>Notional Amount</u>	
OFF BALANCE SHEET INSTRUMENTS				
Commitments to extend credit	\$ 39,906		\$ 44,732	
Standby letters of credit	1,767		2,369	

Accounting standards require disclosures about the fair value of assets and liabilities recognized in the balance sheet in periods subsequent to initial recognition, whether the measurements are made on a recurring basis (for example, available for sale investment securities) or on a nonrecurring basis (for example, impaired loans).

The accounting standard defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. It also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1 Quoted market prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as U.S. Treasuries, and money market funds.

- Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, mortgage-backed securities, municipal bonds, corporate debt securities, and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain derivative contracts and impaired loans.

NOTE 13 - ESTIMATED FAIR VALUE OF FINANCIAL INSTRUMENTS, Continued

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. For example, this category generally includes certain private equity investments, retained residual interests in securitizations, residential mortgage servicing rights, and highly-structured or long-term derivative contracts.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value on a recurring or non-recurring basis:

Investment Securities Available for Sale

Measurement is on a recurring basis based upon quoted market prices, if available. If quoted market prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for prepayment assumptions, projected credit losses, and liquidity. Level 1 securities include those traded on an active exchange or by dealers or brokers in active over-the-counter markets. Level 2 securities include securities issued by government sponsored enterprises, municipal securities, and mortgage-backed securities issued by government sponsored enterprises. Generally these fair values are priced from established pricing models.

Loans

Loans that are considered impaired are recorded at fair value on a non-recurring basis. Once a loan is considered impaired, the fair value is measured using one of several methods, including collateral liquidation value, market value of similar debt and discounted cash flows. Those impaired loans not requiring a specific charge against the allowance represent loans for which the fair value of the expected repayments or collateral meet or exceed the recorded investment in the loan. At September 30, 2010, substantially all of the total impaired loans were evaluated based on the fair value of the underlying collateral. When the Company records the fair value based upon a current appraisal, the fair value measurement is considered a non-recurring Level 2 measurement. When a current appraisal is not available or there is estimated further impairment, the measurement is considered a non-recurring Level 3 measurement.

Other Real Estate Owned (OREO)

Other real estate owned is adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, other real estate owned is carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Bank records the other real estate owned as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the other real estate owned as non-recurring Level 3.

NOTE 13 - ESTIMATED FAIR VALUE OF FINANCIAL INSTRUMENTS, Continued

Assets and liabilities measured at fair value on a recurring basis for September 30, 2010 and December 31, 2009 are presented in the following table (dollars in thousands):

<u>September 30, 2010</u>	Quoted market price in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Available for sale securities			
Government Sponsored Enterprises	\$ -	\$ 235,749	\$ -
State, County, and Municipal	-	16,849	-
Mortgage backed securities	-	6,106	-
Other	-	1,107	-
Total	<u>\$ -</u>	<u>\$ 259,811</u>	<u>\$ -</u>
<u>December 31, 2009</u>			
Available for sale securities			
Government Sponsored Enterprises	\$ -	\$ 179,307	\$ -
State, County, and Municipal	-	25,039	-
Mortgage backed securities	-	9,442	-
Other	-	827	-
Total	<u>\$ -</u>	<u>\$ 214,615</u>	<u>\$ -</u>

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents the assets and liabilities carried on the balance sheet by caption and by level within the valuation hierarchy (as described above) as of September 30, 2010 and December 31, 2009 for which a nonrecurring change in fair value was recorded during the nine months and year ended September 30, 2010 and December 31, 2009.

<u>September 30, 2010</u>	Quoted market price in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)

NOTE 15 – SUBSEQUENT EVENTS

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were available to be issued and no subsequent events occurred requiring accrual or disclosure.

Item 2.**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

(All dollar amounts in thousands, except per share data.)

Management's Discussion and Analysis is provided to afford a clearer understanding of the major elements of the Company's results of operations, financial condition, liquidity, and capital resources. The following discussion should be read in conjunction with the Company's financial statements and notes thereto and other detailed information appearing elsewhere in this report. In addition, the results of operations for the interim periods shown in this report are not necessarily indicative of results to be expected for the fiscal year. The accompanying consolidated financial statements include all accounts of the Company and the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation. The accompanying unaudited consolidated financial statements for the three-month and nine-month periods ending September 30, 2010 and 2009 and the year ended December 31, 2009 have been prepared in accordance with generally accepted accounting principles ("GAAP") for interim financial information and with the instructions to Form 10-Q of the Securities and Exchange Commission. Accordingly, they do not include all information and footnotes required by GAAP for complete financial statements. However, in the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included.

DISTRIBUTION OF ASSETS AND LIABILITIES

The Company has historically maintained a conservative approach in determining the distribution of assets and liabilities. Loans decreased 6.6% from \$586,947 at September 30, 2009 to \$548,041 at September 30, 2010, and decreased 5.5%, from \$579,796 at December 31, 2009 to \$548,041 at September 30, 2010. Loans decreased as a percentage of total assets from 64.3% to 58.2% from September 30, 2009 to September 30, 2010 and decreased from 63.0% to 58.2% from December 31, 2009 to September 30, 2010. Loan demand in our market area has continued to soften during the period due to the continuing subdued local real estate market. Securities and federal funds sold increased as a percentage of total assets from 26.9% at September 30, 2009 to 32.7% at September 30, 2010, and increased from 26.4% of total assets at December 31, 2009 to 32.7% at September 30, 2010, a reflection of continued soft loan demand coupled with higher levels of deposits. The level of investments and excess Federal Reserve deposits provide for a more than adequate supply of liquidity.

Management has sought to build the deposit base with stable, relatively non-interest-sensitive deposits by offering the small to medium deposit account holders a wide array of deposit instruments at competitive rates. Non-interest-bearing demand deposits decreased as a percentage of total assets from 11.7% at September 30, 2009 to 11.2% at September 30, 2010, and increased from 10.5% at December 31, 2009 to 11.2% at September 30, 2010. As more customers, both business and personal, are attracted to interest-bearing deposit accounts, we expect the percentage of non-interest bearing demand deposits to decline over the long-term. Interest-bearing deposits increased from 63.5% of total assets at September 30, 2009 to 67.4% at September 30, 2010, and increased from 66.1% at December 31, 2009 to 67.4% at September 30, 2010. Securities sold under agreement to repurchase decreased from 12.1% of total assets at September 30, 2009 to 11.0% at September 30, 2010, and decreased from 11.4% of total assets at December 31, 2009 to 11.0% at September 30, 2010. Other short-term borrowings decreased from 1.7% of total assets at December 31, 2009 to .6% at September 30, 2010. Other short-term borrowings decreased from 2.3% at September 30, 2009 to .6% at September 30, 2010.

The following table sets forth the percentage relationship to total assets of significant components of the Company's balance sheets as of September 30, 2010 and September 30, 2009 and December 31, 2009:

	September 30, 2010	September 30, 2009	December 31, 2009
Assets:			
Earning assets:			
Loans	58.2%	64.3%	63.0%
Securities held to maturity	3.7	1.0	1.6
Securities available for sale	27.5	24.4	23.3
Federal funds sold and securities purchased under agreement to resell	1.5	1.5	1.5
Other earning assets	3.3	4.0	4.3
Total earning assets	94.2	95.2	93.7
Other assets	5.8	4.8	6.3
Total assets	100.0%	100.0%	100.0%
Liabilities and stockholder's equity:			
Interest-bearing liabilities:			
Interest-bearing deposits	67.4%	63.5%	66.1%
Federal funds purchased and securities sold under agreement to repurchase	11.0	12.1	11.4
Other short-term borrowings	.6	2.3	1.7
Total interest-bearing liabilities	79.0	77.9	79.2
Noninterest-bearing deposits	11.2	11.7	10.5
Other liabilities	.6	.7	.8
Stockholders' equity	9.2	9.7	9.5
Total liabilities and stockholders' equity	100.0%	100.0%	100.0%

RESULTS OF OPERATIONS

Earnings/(losses) for the three-month periods ended September 30, 2010 and 2009 were \$(168) and \$1,292 respectively, resulting in a return on average assets of (.07)% and .57% and a return on average stockholders' equity of (.77)% and 5.87%, respectively.

Earnings/(losses) for the nine-month periods ended September 30, 2010 and 2009 were \$(431) and \$4,071 respectively, resulting in a return on average assets of (.06)% and .60% and a return on average stockholders' equity of (.66)% and 6.23%, respectively.

The losses for the three and nine-month periods ended September 30, 2010 were primarily attributable to a decrease in net interest income, an increased provision for loan losses, and decreased noninterest income (see Net Income – Net Interest Income, Net Income – Provision for Loan Losses, and Net Income – Noninterest Income). The earnings for the three and nine-month periods ended September 30, 2009 were primarily attributable to net interest income (see Net Income-Net Interest Income). Management anticipates, but cannot assure, that earnings will remain well below historical levels through 2010, but may improve during the first half of 2011. Total assets increased \$30,007 or 3.3% to \$942,342 at September 30, 2010 from \$912,335 at September 30, 2009. The following table sets forth the financial highlights for the three and nine-month periods ended at September 30, 2010 and September 30, 2009:

CNB Corporation and Subsidiary FINANCIAL HIGHLIGHTS

	Three-Month Period Ended September 30,			Nine-Month Period Ended September 30,		
	<u>2010</u>	<u>2009</u>	<u>Percent Increase (Decrease)</u>	<u>2010</u>	<u>2009</u>	<u>Percent Increase (Decrease)</u>

- (1) For the three-month period ended September 30, 2010, average total assets amounted to \$954,936 with average stockholders' equity totaling \$86,806 for the same period.

For the nine-month period ended September 30, 2010, average total assets amounted to \$942,254 with average stockholders equity totaling \$87,485 for the same period.

NET INCOME/(LOSS)

Net Interest Income - Earnings are dependent to a large degree on net interest income, defined as the difference between gross interest and fees earned on earning assets, primarily loans and securities, and interest paid on deposits and borrowed funds. Net interest income is affected by the interest rates earned or paid and by volume changes in accruing loans, securities, deposits, and borrowed funds.

Interest rates paid on deposits and borrowed funds and earned on loans and investments have generally followed the fluctuations in market interest rates. However, fluctuations in market interest rates do not necessarily have a significant impact on net interest income, depending on the bank's interest rate sensitivity position. A rate sensitive asset (RSA) is any loan or investment on which the interest rate can be repriced either up or down within a certain time interval. A rate sensitive liability (RSL) is an interest paying deposit or other liability on which the interest rate can be repriced either up or down within a certain time interval. When a proper balance between RSA and RSL exists, market interest rate fluctuations should not have a significant impact on earnings. The larger the imbalance, the greater the interest rate risk assumed by the Bank and the greater the positive or negative impact of interest rate fluctuations on earnings. The Bank seeks to manage its assets and liabilities in a manner that will limit interest rate risk and thus stabilize long-term earning power. Management believes that a 200 basis point rise or fall in interest rates will have less than a 10 percent effect on before-tax net interest income over a one-year period, which is within Bank guidelines.

The Bank maintained net interest margins for the three and nine-month periods ended September 30, 2010, of 3.47% and 3.52%, respectively, and 3.77% and 3.81%, respectively, for the same periods in 2009, as compared to management's long-term target of 4.20%. Net interest margins have been compressed for the Bank and industry-wide for several years for a variety of reasons. Dramatic decreases in market interest rates by the Federal Reserve during the first quarter of 2008 and additional decreases in market rates during the remainder of 2008 placed further significant pressure on net interest margins for the industry as a whole, which have continued through October 2010. The resulting more historically typical upward-sloping yield curve would generally enhance the Bank's net interest margin. However, market interest rates have been reduced to historically low levels. An extremely low interest rate environment is not one that enhances net interest margin. Further, the persistence of an extremely low interest rate environment places increasing pressure on net interest margin as more and more earning assets re-price into this market. Additionally, competition in the Bank's specific market remains significant, as new competitors seek market share and other competitors attempt to reduce their dependence on brokered deposits. These factors tend to compress margins by keeping the cost of deposits high in relation to established national benchmark rates without increasing yields on loans due to softened loan demand. Moreover, the Bank is experiencing a historically high level of non-performing assets. The loss of interest income from these assets has negatively impacted net interest margin. The impact of these assets on net interest margin should diminish as the level of these assets declines over time.

Fully-tax-equivalent net interest income for the three-month period ended September 30, 2010 was \$7,764, a decrease of 4.0% from the \$8,087 attained for the three-month period ended September 30, 2009. For the same periods, total fully-tax-equivalent interest income decreased by 8.0% to \$10,109 from \$10,984 and total interest expense decreased by 19.1% to \$2,345 from \$2,897. Fully-tax-equivalent net interest income as a percentage of average total earning assets decreased 8.0% to 3.47% for the three-month period ended September 30, 2010 from 3.77% for the three-month period ended September 30, 2009.

Fully-tax-equivalent net interest income for the nine-month period ended September 30, 2010 was \$23,330, a decrease of 4.2% from the \$24,364 attained for the nine-month period ended September 30, 2009. For the same periods, total fully-tax-equivalent interest income decreased by 8.2% to \$30,930 from \$33,700 and total interest expense decreased by 18.6% to \$7,600 from \$9,336. Fully-tax-equivalent net interest income as a percentage of average total earning assets decreased 7.6% to 3.52% for the nine-month period ended September 30, 2010 from 3.81% for the nine-month period ended September 30, 2009.

The tables on the following four pages present an analysis of average balances, yields and rates for the interest sensitive segments of the Company's balance sheets for the three-month and nine-month periods ended September 30, 2010 and 2009, and a summary of changes in net interest income resulting from changes in volume and changes in rate between the three-month and nine-month periods ended September 30, 2010 and 2009.

Loans on a non-accrual basis for the recognition of interest income totaling \$25,143 and \$11,318 for September 30, 2010 and 2009, respectively, are included in loans for the purpose of this analysis.

(2) Tax-exempt income is presented on a tax-equivalent basis using a 34% tax rate. The amounts shown include tax-equivalent adjustments of \$477 and \$462 for September 30, 2010 and 2009, respectively.

The tables "Rate/Volume Variance Analysis" provide a summary of changes in net interest income resulting from changes in rate and changes in volume. The changes due to rate are calculated as the difference between the current and prior year's rates multiplied by the prior year's volume. The changes due to volume are calculated as the difference between the current and prior year's volume multiplied by the current rates earned or paid (this calculation effectively allocates all rate/volume variances to volume variances).

NET INCOME/(LOSS) (continued)

Provision for Loan Losses – The allowance for loan losses is maintained at an amount based on considerations of classified and internally-identified problem loans, the current trend in delinquencies, the volume of past-due loans, historical loss experience, current economic conditions, the levels of higher-risk loans, declines in collateral value, the effects of changes in risk selection or underwriting practices, the experience, ability and depth of lending management and staff, industry conditions, the effect of changes in concentrations of credit, loan administration risks, and levels of policy, collateral, and documentation exceptions.

The level of the allowance for loan losses is determined through the utilization of both quantitative and qualitative measures. Loans are identified as impaired as a result of management's determination of an inability on the part of the borrower to make full and timely payment of principal and interest, a decline in project performance, loan structuring issues which evolve in the course of deterioration, and past due status. Quantified losses associated with such loans are segregated as a component in the determination of the allowance for loan losses.

The Company employs migration analysis to determine the levels of risks and associated losses with homogenous pools of loans. This analysis determines levels of loss associated with pools of loans based on risk grade and historical loss factors by risk grades. Risk grading procedures incorporate a review of various loan attributes, the deterioration of which would result in a loan being downgraded to a higher risk pool. These loan attributes are: demonstrated financial capacity and position, the borrower's demonstrated willingness to pay, loan structure, lien perfection on collateral, documentation, conformance to loan agreement covenants, and adherence to loan policy, among others. Quantified losses associated with pools of loans from migration analysis are segregated as a component in the determination of the allowance for loan losses.

The Company utilizes various qualitative factors to quantify additional risks and potential inherent losses existing in the Company's loan portfolios. These include the consideration of levels and trends in delinquencies, changes in the loan grading mix, trends in the volume and terms of loans, over-margined real estate loans, national and local economic trends and conditions, changes in risk selection and underwriting practices, the experience, ability and depth of lending management and staff, industry conditions, loan concentrations, geographic concentrations, regulatory considerations, various loan administration risks, and levels of policy, collateral and documentation exceptions. Quantified losses associated with these qualitative factors are segregated as a component in the determination of the allowance for loan losses.

When the amount necessary to maintain the allowance for loan losses at an adequate level has been determined and that amount is greater than the existing allowance for loan losses after accounting for loan charge-offs and recoveries during the period, the allowance is increased to the amount determined to be necessary by a provision for loan losses which is charged to operating income. The provision for loan losses was \$4,379 for the three-month period ended September 30, 2010 and \$2,221 for the three-month period ended September 30, 2009. Net loan charge-offs totaled \$3,454 for the three-month period ended September 30, 2010 and \$1,654 for the same period in 2009. The increased provisions and higher level of net charge-offs during the three-month period ended September 30, 2010 reflects continued difficulties in local real estate markets. The Myrtle Beach-Conway-North Myrtle Beach South Carolina Metropolitan Statistical Area, wherein the majority of the Company's operations are situated, has experienced significant declines in various sectors of its economy, primarily in the real estate sectors. The allowance for loan losses as a percentage of net loans was 2.32% at September 30, 2010 and was 1.55% at September 30, 2009.

The provision for loan losses was \$11,948 for the nine-month period ended September 30, 2010 and \$6,547 for the nine-month period ended September 30, 2009. Net loan charge-offs/(recoveries) totaled \$8,659 for the nine-month period ended September 30, 2010 and \$4,671 for the same period in 2009. The increased provision and higher level of net charge-offs during the nine-month period ended September 30, 2010 again reflects continued difficulties in local real estate markets.

The levels of loans on which no interest was being accrued, impaired loans, foreclosed real estate, and classified assets at March 31, 2010 and 2009 are outlined in the notes to the consolidated unaudited financial statements (See NOTE 4 – LOANS AND ALLOWANCE FOR LOAN LOSSES). All of these measurements increased during 2009, some markedly, and this trend continued through the first nine months of 2010. Although increased, management considers all such levels manageable. One factor which contributes, in part, to higher levels of classified assets is the local market's high number of foreclosure actions in process, which has placed a substantial burden on the judiciary and courts and consequently significantly lengthened the time necessary to accomplish a foreclosure action. Management recognizes the potential for further deterioration of economic conditions in the Company's market areas in the short-term, especially with respect to real estate related activities and real property values. However, management believes, but cannot assure, that substantially all of the Company's credit risks associated with the current real estate market decline have been identified. Nonetheless, management anticipates the Company will continue to need to make above average provisions through 2010.

NET INCOME/(LOSS) (continued)

Securities Transactions – At September 30, 2010, December 31, 2009, and September 30, 2009 total market value appreciation in the investment portfolio totaled \$2,573, \$1,891, and \$2,343, respectively. As indicated, the market values of the Company's investment portfolio decreased from September 30, 2009 to December 31, 2009, and increased from December 31, 2009 to September 30, 2010. During 2008 bond values fluctuated due to variances in the slope of the yield curve because of instability in new issue coupon rates and intermittent movement of funds between the bond market and the stock market. However, the yield curve generally normalized over the period. The yield curve grew unusually steep during 2009 as short term rates continued to decline to historical lows. This trend continued into 2010. However, the yield curve flattened slightly in the late second quarter and third quarter of 2010 due to declining long-term rates.

In the third quarter of 2010, the Company sold securities primarily to restructure its investment in longer-term municipal securities in order to remove from the portfolio municipal securities which had lost their rating, and to reduce the level of exposure to individual municipal securities issuers in response to increased regulatory scrutiny related to capital and its components (See Note 3 to the financial statements – Investment Securities). The increase in the total market value of the investment portfolio during the periods is attributable to the continued decline in interest rates. The changes in market value appreciation/(depreciation) in the investment portfolio do not generally directly affect operating results since the Company does not acquire investment securities for trading. However, the changes in the market value appreciation/(depreciation) in the investment portfolio for the three and nine-month periods ended September 30, 2010 and September 30, 2009 are a component of Comprehensive Income and are set forth in the Condensed Consolidated Statements of Comprehensive Income contained herein.

Noninterest Income - Noninterest income increased by 22.7% to \$2,334 for the three-month period ended September 30, 2010 from \$1,902 for the three-month period ended September 30, 2009. Noninterest income decreased by 11.3% to \$5,568 for the nine-month period ended September 30, 2010 from \$6,278 for the nine-month period ended September 30, 2009. The fluctuations in non-interest income for the three and nine-month periods ended September 30, 2010 were primarily attributable to changes in the level of gains on sales of investment securities.

Noninterest Expenses - Noninterest expenses increased by 4.3% to \$5,943 for the three-month period ended September 30, 2010 from \$5,699 for the three-month period ended September 30, 2009. The major components of noninterest expenses are salaries and employee benefits, which decreased 2.3% to \$3,391 from \$3,472; occupancy expense which increased 4.2% to \$859 from \$824; and other operating expenses which increased by 20.7% to \$1,693 from \$1,403. Salaries and benefits decreased due to reduced staffing and decreased benefits expenses. Occupancy expense generally continues to grow due to the addition and/or renovation of new banking facilities and equipment replacements. Other operating expenses increased due to expenses associated with non-performing loans and foreclosed real estate.

Noninterest expenses decreased by 1.0% to \$17,518 for the nine-month period ended September 30, 2010 from \$17,703 for the nine-month period ended September 30, 2009. The major components of noninterest expenses are salaries and employee benefits which decreased 3.9% to \$10,149 from \$10,565. Occupancy expense increased 2.0% to \$2,475 for the nine-month period ended September 30, 2010 from \$2,426 for the same period in 2009. Other operating expenses increased 3.9% to \$4,894 from \$4,712 for the same periods, respectively.

Income Taxes – Provisions for income taxes decreased 135.3% to a benefit of \$(217) for the three-month period ended September 30, 2010 from a provision of \$614 for the three-month period ended September 30, 2009. Income before income taxes less interest on tax-exempt investment securities decreased 143.8% to \$(697) for the three-month period ended September 30, 2010 from \$1,590 for the same period in 2009.

Provisions for income taxes decreased 133.0% to a benefit of \$(614) for the nine-month period ended September 30, 2010 from a provision of \$1,859 for the nine-month period ended September 30, 2009. Income before income taxes less interest on tax-exempt investment securities decreased by 139.1% to \$(1,970) for the nine-month period ended September 30, 2010 from \$5,033 for the same period in 2009.

LIQUIDITY

The Bank's liquidity position is primarily dependent on short-term demands for funds caused by customer credit needs and deposit withdrawals and upon the liquidation of bank assets to meet these needs. The Bank's liquidity sources include cash and due from banks, federal funds sold, and short-term investments. In addition, the Bank has established federal funds lines of credit from correspondent banks and has the ability to borrow funds from the Federal Reserve System and the Federal Home Loan Bank of Atlanta. Management believes that short-term and long-term liquidity sources are adequate to meet funding needs, including the funding of off-balance sheet loan commitments and standby letters of credit, if the need arises. Although the Bank has not experienced liquidity pressures, there can be no assurance that such pressures will not be felt in the future. Neither the Company nor the Bank is involved in other off-balance sheet contractual relationships or other commitments that could result in liquidity needs or significantly impact earnings.

The table below summarizes future contractual obligations as of September 30, 2010 (in thousands).

	At September 30, 2010					
	Payments Due by Period					
	Within One Year	Over One to Two Years	Over Two to Three Years	Over Three to Five Years	Over Five Years	Total
Certificates of Deposit	\$331,127	\$38,433	\$9,673	\$9,199	\$ -	\$ 388,432
Borrowings	<u>109,364</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>109,364</u>
Total	\$440,491	\$38,433	\$9,673	\$9,199	\$ -	\$497,796

CAPITAL RESOURCES

Total stockholders' equity was \$86,357 and \$87,429 at September 30, 2010 and December 31, 2009, representing 9.16% and 9.50% of total assets, respectively. At September 30, 2010, the Company and the Bank exceeded quantitative measures established by regulation to ensure capital adequacy (see NOTE 12 to the consolidated unaudited financial statements - REGULATORY MATTERS). Capital is considered sufficient by management to meet current and prospective capital requirements and to support anticipated growth in Bank operations.

CRITICAL ACCOUNTING POLICIES

We have adopted various accounting policies which govern the application of accounting principles generally accepted in the United States of America in the preparation of our financial statements. Our significant accounting policies are described in the notes to the consolidated financial statements at December 31, 2009 as filed in our Annual Report on Form 10-K. Certain accounting policies involve significant judgments and assumptions by us which have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgments and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgments and assumptions we make, actual results could differ from these judgments and estimates that could have a major impact on our carrying values of assets and liabilities and our results of operations.

We believe the allowance for loan losses is a critical accounting policy that requires the most significant judgments and estimates used in preparation of our consolidated financial statements. Refer to the portions of our 2009 Annual Report on Form 10-K and this Form 10-Q that address our allowance for loan losses for description of our processes and methodology for determining our allowance for loan losses.

RISKS AND UNCERTAINTIES

In the normal course of its business, the Company encounters two significant types of risks: economic and regulatory. There are three main components of economic risk: interest rate risk, credit risk, and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities mature or re-price at different speeds, or on a different basis, than its interest-earning assets. Credit risk is the risk of default on the Company's loan portfolio that results from borrowers' inability or unwillingness to make contractually required payments. Market risk, as it relates to lending and real estate held for operating locations, results from potential changes in the value of collateral underlying loans receivable and the market value of real estate held by the Company.

The Company is subject to the regulations of various governmental agencies. These regulations can and do change significantly from period to period. The Company also undergoes periodic examinations by the regulatory agencies, which may subject it to further changes with respect to asset valuations, amounts of required loss allowances and capital, and operating restrictions from the regulators' judgments based on information available to them at the time of their examination.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk, in regard to interest rate risk, is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises principally from the interest rate risk inherent in its lending, deposit, and borrowing activities. Management actively monitors and manages its interest rate risk exposure. In addition to other risks which the Company manages in the normal course of business, such as credit quality and liquidity risk, management considers interest rate risk to be a significant market risk that could potentially have a material effect on the Company's financial condition and results of operations (See MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - Net Income – Net Interest Income). Other types of market risks, such as foreign currency risk and commodity price risk, do not arise in the normal course of the Company's business activities.

Item 4. CONTROLS AND PROCEDURES

Based on the evaluation required by 17 C.F.R. Section 240.13a-15(b) or 240.15d-15(b) of the Company's disclosure controls and procedures (as defined in 17 C.F.R. Sections 240.13a-15(e) and 240.15d-15(e)), the Company's chief executive officer and chief financial officer concluded that such controls and procedures, as of the end of the period covered by this quarterly report, were effective.

There has been no change in the Company's internal control over financial reporting during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

ISSUER SALES OF EQUITY SECURITIES

On August 27, 2010 the Company issued 254 shares of its common stock to the Company sponsored profit sharing and savings plan, The Conway National Bank Profit Sharing and Savings Plan, for an aggregate purchase price of \$20,193. Issuance of the securities was exempt from registration pursuant to Section 4(2) of the Securities Act of 1933 because the transaction did not involve a public offering. There were no underwriting commissions or discounts.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Program	(d) Maximum Number of Shares that May Yet Be Purchased Under the Program
July 1 – July 31, 2010	6,002	\$79.50	-	-
August 1 – August 31, 2010	2,459	79.50	-	-
September 1 – September 30, 2010	<u>114</u>	<u>79.50</u>	-	-
Total	8,575	\$79.50	-	-

(1) During the period covered by this report, the Company purchased 8,575 shares of stock from shareholders, at the request of the shareholders, which are held by the Company as authorized and unissued shares. These shares were purchased on a case-by-case basis and not pursuant to any formal program.

Item 6. EXHIBITS

All exhibits, the filing of which are required with this Form, are listed below

- 31.1 Certification of Principal Executive Officer required by Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Principal Financial Officer required by Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
