Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary in order to make the interim financials not misleading have been included and all such adjustments are of a normal recurring nature. The operating results for the three months ended March 31, 2007 are not necessarily indicative of the results that can be expected for the year ending December 31, 2007.

## **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion and analysis should be read in conjunction with the consolidated financial statements and accompanying notes filed as part of this report.

Except for historical information contained herein, this "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, as amended. These statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance, or achievements of the Company to be materially different from any future results, performance, or achievements expressed or implied by such forward-looking statements. These forward-looking statements were based on various factors and were derived utilizing numerous important assumptions and other important factors that could cause actual results to differ materially from those in the forward-looking statements. Important assumptions and other factors that could cause actual results to differ materially from those in the forward-looking statements, include but are not limited to: competition in the Company's existing and potential future product lines of business; the Company's ability to obtain financing on acceptable terms if and when needed; uncertainty as to the Company's future profitability, uncertainty as to the future profitability of acquired businesses or product lines, uncertainty as to any future expansion of the Company. Other factors and assumptions not identified above were also involved in the derivation of these forward-looking statements and the failure of such assumptions to be realized as well as other factors may also cause actual results to differ materially from those projected. The Company assumes no obligation to update these forward looking statements to reflect actual results, changes in assumptions or changes in other factors affecting such forward-looking statements.

### **Results of Operations**

Revenue for the three month period ended March 31, 2007 was \$3,811,277 compared to \$3,211,473 for the three month period ended March 31, 2006, an increase of 18.7% as the Company continues to experience an increasing demand for its products.

The Company generated a gross profit of approximately \$1,256,000 for a gross profit margin of 33.0% for the three months ended March 31, 2007 compared to a gross profit of approximately \$1,070,000 for a gross profit margin of 33.3% for the three months ended March 31, 2006.

Selling and shipping expenses for the three months ended March 31, 2007 and 2006 were \$278,310 and \$196,869 respectively, representing a 41.4% increase. This increase can be attributed primarily to a \$35,000 increase in trade show expenses in order to effectuate the Company's sales expansion program, and an increase in sales commissions.

The Company incurred approximately \$773,000 of general and administrative expenses during the quarter ended March 31, 2007, representing an increase of 7.7% or approximately \$55,000 compared to the approximately \$718,000 of general and administrative expenses incurred in the quarter ended March 31, 2006. This increase is a result of increased personnel as well as various increases in employee benefit costs, insurance, and energy costs.

As a result of the foregoing factors, operating income was \$204,000 for the three months ended March 31, 2007 an increase of 31.6% compared to \$155,000 for the same period one year ago.

Interest expense for the three months ended March 31, 2007 decreased by 5.6% to \$53,473 compared to \$56,647 during the three months ended March 31, 2006. Although the Company incurred higher operating costs during the current period, interest expenses were slightly lower as result of reduced borrowing by the Company.

Other income during the quarter ended March 31, 2007 was approximately \$5,000 compared to approximately \$75,000 for the corresponding period one year ago. This resulted from the receipt of \$70,000 during the quarter ended March 31, 2006 which was previously written off in 2004.

For the three months ended March 31, 2007, the Company recorded a current income tax expense of approximately \$118,000 that was reduced by the deferred tax benefit of \$58,000.

The Company reported net income of approximately \$96,000 for the current period compared to net income of approximately \$113,000 for the same period, one year ago. This decrease was primarily due to two factors: the receipt of \$70,000 during the 1<sup>st</sup> quarter 2006, which was previously written off in 2004; and an increase in expenses in the current quarter associated with the initiation of the Company's program, first discussed in the December 31, 2006 Form 10-K, to broaden the First Nano product line and pursue a significantly larger share of the R&D market.

## **Liquidity and Capital Resources**

As of March 31, 2007, the Company had an aggregate working capital of approximately \$4,305,000 compared to \$4,151,000 at December 31, 2006 an increase of \$154,000. This increase was the result of the following: our net income, after adding back depreciation and amortization, increased working capital by approximately \$202,000. The increase in working capital also included approximately \$126,000 in net proceeds from stock option exercises and stock based compensation expense and \$140,000 from equipment loans. These increases were partially offset by an investment in equipment of \$197,000 along with changes in other current assets and liabilities of \$117,000.

Accounts receivable as of March 31, 2007 was \$1,956,018 compared to \$2,377,069 as of December 31, 2006. This decrease is attributable to the timing of shipments and customer payments.

As of March 31, 2007 the Company's backlog was approximately \$2,143,000, a decrease of \$1,422,000 or 40.0% compared to \$3,565,000 at December 31, 2006. Timing for completion of the backlog varies depending on the product mix, however, there is generally a one to six month lag in the completion and shipping of backlogged product. Backlog from quarter to quarter can vary based on the timing of order placements and shipments.

The Company has a revolving line of credit with a bank permitting it to borrow on a revolving basis amounts up to \$1,250,000 until June 1, 2007, at which time it will be subject to renewal. Interest is payable on any unpaid principal balance at the bank's prime rate plus  $\frac{3}{4}$  of 1%. As of March 31, 2007, \$205,000 was outstanding on this facility. Borrowings are collateralized by the Company's assets.

The Company also has an equipment line of credit of \$250,000 with that same bank. The Company is permitted to borrow up to 100% of the purchase price of the equipment. The amount borrowed is immediately converted into a five year term loan at the bank's prime rate plus 1.25%. As of March 31, 2007, there was approximately \$213,000 outstanding on this facility. Borrowings are collateralized by the equipment purchased.

The Company believes that its cash, cash equivalents and available credit facilities will be sufficient to meet its working capital and investment requirements for the next twelve months. However, should we determine and allow our business to grow more aggressively, which may include making acquisitions, we may need to raise additional funding. For this reason, as well as other reasons that arise from time to time, we may consider raising capital through equity or debt financings. Any decision to raise additional capital, as well as the determination of the appropriate vehicle for doing so, will depend on market conditions, order levels, opportunities presented to us and other factors.

### **Item 3. Controls and Procedures.**

#### **Evaluation of Disclosure Controls and Procedures**

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as required by Exchange Act Rule 13a-15, as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective to insure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

#### **Changes in Internal Controls**

There were no significant changes in the Company's internal controls over financial reporting that occurred during the three months ended March 31, 2007 that have materially affected, or are reasonably likely to materially affect, the internal controls over financial reporting.

#### **Limitations on the Effectiveness of Controls**

We believe that a control system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the control systems are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.
