

Petroleum Development Corporation

2009 Analyst Day

March 19, 2009

NASDAQ:PETD

Disclaimer

The following information contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on Management's current expectations and beliefs, as well as a number of assumptions concerning future events.

These statements are based on certain assumptions and analyses made by Management in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances. However, whether actual results and developments will conform with Management's expectations and predictions is subject to a number of risks and uncertainties, general economic, market or business conditions; the opportunities (or lack thereof) that may be presented to and pursued by Petroleum Development Corporation; actions by competitors; changes in laws or regulations; and other factors, many of which are beyond the control of Petroleum Development Corporation.

You are cautioned not to put undue reliance on such forward-looking statements because actual results may vary materially from those expressed or implied, as more fully discussed in our safe harbor statements found in our SEC filings, including, without limitation, the discussion under the heading "Risk Factors" in the company's annual report on Form 10-K. All forward-looking statements are based on information available to Management on this date and Petroleum Development Corporation assumes no obligation to, and expressly disclaims any obligation to, update or revise any forward looking statements, whether as a result of new information, future events or otherwise.

The SEC permits oil and gas companies to disclose in their filings with the SEC only proved reserves, which are reserve estimates that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. The Company uses in this presentation the terms "probable" and "possible" reserves, which SEC guidelines prohibit in filings of U.S. registrants. Probable reserves are unproved reserves that are more likely than not to be recoverable. Possible reserves are unproved reserves that are less likely to be recoverable than probable reserves. Estimates of probable and possible reserves which may potentially be recoverable through additional drilling or recovery techniques are by nature more uncertain than estimates of proved reserves and accordingly are subject to substantially greater risk of not actually being realized by the Company. In addition, the Company's production forecasts and expectations for future periods are dependent upon many assumptions, including estimates of production decline rates from existing wells and the undertaking and outcome of future drilling activity, which may be affected by significant commodity price declines or drilling cost increases.

This material also contains certain non-GAAP financial measures as defined under the Securities and Exchange Commission rules.

2

Welcome

- Peter Schreck ,Vice President – Finance and Treasurer
- Introductions
 - Richard W. McCullough, Chairman and CEO
 - Gysle R. Shellum, Chief Financial Officer
 - Barton R. Brookman, Senior Vice President, Exploration and Production

Chairman & Chief Executive Officer

4

PDC History Snapshot

- NASDAQ:PETD
- Founded in 1969
- Market cap of \$166.7 million at 3/16/09
- Operate in the Rockies, Appalachia and Michigan
- A leading producer in the Rocky Mountain region
- Reported record results in 2008 and exited the year with strong balance sheet metrics and liquidity
- Outstanding financial, technical and operating teams built in the past five years

See Slide 2 regarding Forward Looking Statements

5

2008 Fundamentals

	2008	2007	2006
Production (Bcfe)	38.7	28.0	17.0
Proved Reserves (Bcfe)	753	686	323
Realized Gas Prices (Mcf) ⁽¹⁾	\$8.66	\$6.52	\$6.91
Adj. EBITDA (\$ millions) ⁽²⁾	\$192.5	\$104.2	\$80.3
Adj. Cash Flow from Operations (\$ millions) ⁽²⁾	\$106.0-131.0	\$95.6	\$29.8
Adjusted Cash Flow from Operations, per diluted share ⁽²⁾	\$13.48	\$6.44	\$2.00
Stock Price ⁽³⁾	\$79.09 - \$11.50	\$61.91 - \$35.73	\$47.44 - \$32.12

(1) Equivalent prices including oil sales, natural gas liquids and realized derivative gains and losses. Excludes non-realized derivative gains & losses

(2) See slides 66 and 67 for GAAP reconciliation of Adjusted EBITDA and Adjusted Cash Flow, respectively. Gain on leasehold sales excluded.

(3) Hi-low range, per year.

See Slide 2 regarding Forward Looking Statements

6

2009 Will Be Challenging

- 2008 – superior growth year
 - Production/Revenues
 - EBITDA/CASH FLOW
 - EPS/CFPS
- 2009 will be a challenging year
 - Valuable hedges - \$153.5 MM MTM at 12/31/08
 - CAPEX reduced 50-60%, to \$120 MM
 - Current strong liquidity position; will monitor it closely
 - Bank borrowing base redetermination in April
 - Substantial cost reduction/operational enhancement efforts underway

See Slide 2 regarding Forward Looking Statements

7

Cost Control and Operational Enhancements

- Implementing an internal strategic reassessment process
 - Measuring activities based on their contribution to shareholder value
 - Entire company involved
 - Will drive future decision making
- Review of all major elements of cost
- Basin by basin operational enhancement review
 - Costs; logistics; marketing

15

YE2008 Reserves Total Proved By Basin

See Slide 2 regarding Forward Looking Statements

16

YE2008 Proved Reserves

- Proved reserves improved 10% from 2007 levels
- PDPs improved 6% from 2007 levels
- Downward revisions of approximately 75 Bcfe due to reduced commodity pricing and increased costs
- Upward operational revisions were 41 Bcfe
- Extensions/additions were 139 Bcfe
- Reclassified PDNPs (Recompletions and Refracs) in Wattenberg to PUDs

Summary Reserve Data

Proved Reserves (Bcfe) ⁽¹⁾					
Area	2007 YE	2008 YE	% Growth	% Developed	% Natural Gas
Rockies	559	620	11%	38%	86%
Appalachia	103	113	10%	65%	100%
Michigan	24	20	(17)%	100%	99%

Other Operating Areas

- **North Dakota**
 - 51,094 acres Burke County
 - Exploration drilling in 2009
- **Barnett**
 - 9,550 acres Erath County
 - No planned activity 2009

See Slide 2 regarding Forward Looking Statements 44

2009 Operations Guidance

- 42.5–44 Bcfe total production
- Capex of \$108 - \$120 MM
- 105 - 155 wells
- Significant Capex slowdown
- Focus on drilling costs/LOE reductions
- Capex expected to be in line with anticipated cash flow
- Flexibility to adjust Capex to respond to market conditions

See Slide 2 regarding Forward Looking Statements

45

Marcellus Shale Highlights

- Two vertical wells completed and on line
 - Initial rates from 376 Mcfd to 232 Mcfd
- One vertical well completed and on flow back
- One vertical well waiting on completion
- Typical shale analysis being conducted
 - Two cores currently being evaluated
 - Shale indicators have provided positive feedback
 - Electric logs
 - Gas analysis
 - Early core data

See Slide 2 regarding Forward Looking Statements

46

Future Plans Marcellus Shale

- Drill five additional vertical tests
 - Evaluate greater geographic area
 - Test completion types
 - Continue to establish shale quality
- Determine proper location for horizontal test
- Establish midstream and downstream strategy for full development

See Slide 2 regarding Forward Looking Statements

47

2009 Cost Management

	Capital		Lease Operating Expense	
	Projected Cost Reduction Per Well by July 2009	Projected % Savings by July 2009	Projected Cost Savings Per Month by July 2009	Projected % Savings Per Month by July 2009
Piceance	\$590,000	22	\$176,000	15
Wattenberg	168,000	20	210,000	14
NECO	51,000	21	62,000	13
East	37,050	9	98,000	10

See Slide 2 regarding Forward Looking Statements

48

Takeaways

- PDC's inventory is low risk, predictable reserve projects
 - 2009 Capex is dramatically reduced
 - Lower natural gas prices
 - Capital cost increases 2005 – 2008
 - Capital market environment
- PDC has built an exceptional technical/geoscience team over the past several years
 - Prepared for increased activity on existing assets
 - Apply organizational strength to possible acquisitions
- 2009 Capex will be reduced with intensified focus on:
 - Capital cost improvements
 - Production engineering / production optimization
 - LOE improvements
- Marcellus shale provides production / reserve opportunity
 - Define opportunity in 2009
 - Partial to full implementation in 2010
- PDC is proactively managing operations as the market fluctuates
 - Rockies rig count is dramatically reduced
 - Costs are improving very quickly
 - PDC is maintaining full operational flexibility
 - Every project is evaluated as market fluctuates

See Slide 2 regarding Forward Looking Statements

Gysle Shellum
Chief Financial Officer

50

2008 Summary Financial Results

(\$ in millions, except for per share data)

	Year Ended December 31,	
	2008	2007*
Income from operations	\$202.3	\$60.8
Net income	\$113.3	\$33.2
Diluted earnings (per share)	\$7.63	\$2.24
Production (Bcfe)	38.7	28.0
Realized gas prices (per Mcfe) ⁽¹⁾	\$8.66	\$6.52
Unrealized hedging gains	\$118.4	(\$4.4)

(1) Equivalent prices including oil sales, natural gas liquids and realized derivative gains and losses. Excludes non-realized derivative gains & losses

* 2007 data includes a \$33 million gain on leasehold sales.

See Slide 2 regarding Forward Looking Statements

51

2008 Summary Financial Results

(\$ in millions, except for per share data)

	Year Ended December 31,	
	2008	2007
O&G Revenues	\$321.9	\$175.2
O&G Production & Well Operating Costs	\$78.2	\$49.3
O&G Operating Margin⁽¹⁾	\$243.7	\$125.9
Adjusted Net Income⁽²⁾	\$44.6	\$37.5
Adjusted Cash Flow from Operations⁽²⁾	\$200.1	\$95.6
Adjusted Cash Flow from Operations (per share) ⁽²⁾	\$13.48	\$6.44
DD&A	\$104.6	\$70.8
G&A	\$37.7	\$31.0

(1) O&G operating margin is defined as O&G sales less O&G production and well operations costs.

(2) See slides 66 - 68 for GAAP reconciliation of Adjusted EBITDA, Adjusted Cash Flow and Adjusted Net Income, respectively.

See Slide 2 regarding Forward Looking Statements

52

Energy Market Exposure

**Percentage of Mcfe Sold by Market
(for Twelve Months Ended December 31, 2008)**

See Slide 2 regarding Forward Looking Statements

53

Debt Maturity Schedule

(\$ in millions)

- \$375 million revolver matures November 4, 2010
- Maturity schedule reflects:
 - Mitigation of liquidity risk
 - Diversification of funding sources
- As of December 31, 2008:
 - \$195 MM drawn balance
 - \$51 MM cash balance
 - \$231MM available liquidity
- April 2009 borrowing base redetermination

See Slide 2 regarding Forward Looking Statements

54

CAPEX Spending & Production Growth

	2008	2007	2006
CAPEX Total (\$MM)	\$323	\$239	\$147
CAPEX Developmental (\$MM)	\$258	\$194	\$115
Organic Production Growth ⁽¹⁾	38%	32%	20%
Total Production Growth ⁽¹⁾	38%	65%	24%

(1) Internal estimate.

See Slide 2 regarding Forward Looking Statements

55

2009 Guidance

See Slide 2 regarding Forward Looking Statements

56

2009 Assumptions⁽¹⁾

- Reserves, production and capital expenditures per the internal operational plan
- Production taxes and direct operating costs determined on a field-by-field basis
- SG&A flat with 2008
- DD&A based on field-by-field depreciation analysis

(1) The Company does not intend to update these estimates during the year.

See Slide 2 regarding Forward Looking Statements

57

2009 Assumptions⁽¹⁾, cont'd.

- Revolver interest rate at pricing grid plus LIBOR spread
- \$203 MM Senior Notes interest yield of 12.25%
- 2009 commodity pricing based on high and low NYMEX Gas/Oil cases
- Differentials (NYMEX Gas/Oil) determined on field by field basis, averaged 21% / 12% for gas and oil, respectively
- 50% of exploration expenditures expensed. No production or reserve impacts from exploration activities

See Slide 2 regarding Forward Looking Statements

58

Derivative Positions

(as of March 16, 2009, in MMBtu)

- PDC's implemented hedge positions provide stable, predictable cash flows⁽¹⁾

Index	Begin	End	Floors		Ceilings		Swaps	
			Quantity (000's)	\$ Price	Quantity (000's)	\$ Price	Quantity (000's)	\$ Price
CIG	Jan-09	Mar-11	13,798	6.08	13,798	9.62	13,050	6.14
CIG - Basis	Apr-10	Dec-13					23,168	(1.88)
NYMEX - Gas	Jan-09	Mar-12	4,719	7.88	4,719	13.78	6,781	8.37
PEPL - Gas	Jan-09	Mar-11	3,730	6.56	3,730	11.08	2,110	8.50
NYMEX - Oil ⁽¹⁾	Jan-09	Dec-10					6,390	15.27

1) Conversion factor for oil: 1 barrel = 6.0 MMBtu.

60

Adjusted EBITDA

- EBITDA represents Net Income + Interest Expense + Income Taxes + Depreciation, Depletion and Amortization
- 2008's EBITDA reflects higher prices of 30% and higher production of 38% vs. 2007
- 2009's EBITDA reflects higher production offset by lower prices vs. 2008

*2007 includes a gain on sale of leaseholds of \$33 MM. 2008 includes an unrealized derivative gain of \$118 MM.

Note: See slide 68 for GAAP reconciliation.
