

A Failure of Alignment and Accountability

April 23, 2019

- **PDC Energy owns high quality assets that are trapped behind a poorly performing team, with a board that is asleep at the wheel.**
- **Over the last three years shareholders have borne the brunt of this mismanagement** with the company delivering a total shareholder return of -44%, underperforming peers, commodity prices and the market.
- **As shareholders have suffered, management has won**, earning \$43.8M over the last 3 years, with pay uncorrelated to performance.
- **The board is responsible for this misalignment.** In 2018, the company missed four of its five internally set targets yet PDC's management team has been compensated as if it delivered peer group-leading performance.
- **The board and C-Suite want shareholders to believe that nothing is wrong.** PDC recently stated that "In 2018, our entire team executed well on our strategic plan and achieved strong financial and operating results."
- **By casting your Gold vote for the Kimmeridge nominees, shareholders can put the company on a path to profitability.**
- **Kimmeridge believes that if elected, its nominees can hold management accountable for performance, realign compensation with performance and tackle the inflated cost base.**
- **These changes should position PDC to deliver a ROACE above the WACC, implement a dividend, return cash to shareholders and to create value for shareholders.**

Pay for Under Performance

Despite a three-year TSR of -44% (2016-2018), PDC's top five executives were compensated \$16.2M in 2018 and a total of \$43.8M over the last three years.

1) Stock price data per Bloomberg; 2) Compensation data based on PDC's public filings; see disclosures for more detail.

Metrics Don't Matter: 2018

In 2018, the company awarded its management team cash bonuses of 115% of target despite missing four out of five internally-set targets.

2018 QUANTITATIVE CORPORATE METRICS

Source: PDC's proxy statement.

Metrics Don't Matter: 2016 – 2018

PDC introduced two new metrics into its 2019 compensation plan: free cash flow margin and debt-adjusted cash flow per share. With little downside risk for missing targets, new metrics won't matter.

<u>Metric:</u>	<u>Did PDC Exceed Target?</u>		
	<u>2016</u>	<u>2017</u>	<u>2018</u>
Production			
Production, Exploration and G&A Expense per Boe			
Adjusted Cash Flow from Operations per Share			
Debt to Adjusted EBITDAX			
Capital Efficiency	NA		
Liquidity		NA	NA
Bonus as a % of Target	165%	120-130%	115%

COO: Pay For Underperformance

The COO Scott Reasoner's pay has risen despite missing targets. Well costs have risen and capital efficiency has underperformed. The COO also received a special equity grant in 2017.

PDC's Board has provided excuses for why management should not be held accountable for missing targets...

"The Committee estimates that without the Wattenberg Field midstream issues, the Company would have been at the high end of production targets for the year." – 2017 Proxy

"DCP and Aka Midstream line pressure challenges, which were out of the Company's control, significantly impacted the quantitative metrics; if line pressures had been as budgeted, the Company would have exceeded its quantitative metric targets on three of its five metrics, and the two metrics currently outside of the target range would have fallen inside the target range." – 2018 Proxy

...and key items are excluded from metrics for no particular reason.

"Production, Exploration and G&A Expense per BOE excludes approximately \$41 million of cost associated with two Culberson County, Texas dry holes." – 2017 Proxy

"[Adjusted 'Debt to Adjusted EBITDAX'] Excludes our \$600 million senior note offering and the provision for uncollectible note receivable." – 2017 Proxy

How can new debt be excluded from a target leverage metric?

2017 10K, Report of Independent Public Accounting Firm (PWC)

“Also in our opinion, **the Company did not maintain, in all material respects, effective internal control** over financial reporting as of December 31, 2017 based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO because material weaknesses in internal control over financial reporting existed as of that date related to not maintaining a sufficient complement of personnel within the Land Department as a result of increased volume of leases, which contributed to the **ineffective design and maintenance of controls** to verify the completeness and accuracy of land administrative records associated with unproved leases.”

Resulted in a 10% impact to cash bonuses for CEO Bart Brookman and COO Scott Reasoner, lowering their bonus from 130% to 120% of target

2018 10K, Report of Independent Public Accounting Firm (PWC)

“Also in our opinion, the **Company did not maintain, in all material respects, effective internal control** over financial reporting as of December 31, 2018 based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO because material weaknesses in internal control over financial reporting existed as of that date related to not maintaining a sufficient complement of personnel within the Land Department as a result of an increased volume of leases, which contributed to the **ineffective design and maintenance of controls** to verify the completeness and accuracy of land administrative records associated with unproved leases.”

Did not impact executive compensation

Average Cash Yield for PDC's CEO vs. Outside Shareholders

Bart Brookman, PDC's CEO, has generated an average yield on his personal PDC equity of 27% over the last three years.¹ This is the amount of cash Bart receives each year (salary, bonus, and stock sold in the open market) as a percentage of the market value of his total PDC stock ownership.

1) See disclosures for detail; 2) Calculation assumes a shareholder bought PDC stock at year-end 2015 and sold at year-end 2018.

Alignment Drives Performance

Private equity in the upstream energy sector has materially outperformed the SPDR S&P Oil & Gas Exploration & Production ETF (XOP) over the last ten years despite owning assets in the same basins as public operators.

- US oil and gas private equity has generated a weighted average IRR of roughly 10% over the last ten years (2009-2018)¹
- In contrast, the XOP has traded sideways over the same time period despite owning similar assets¹
- Kimmeridge believes this bifurcation of performance results from compensation misalignment among public energy companies
- **Aligning pay with performance and increasing stock ownership should lead management to think like owners**

1) Private equity returns based on data from Preqin Ltd; see disclosures for more information.

Kimmeridge believes that more equity and longer hold periods will cause management teams to act like owners. As board members, we would advocate significant change to compensation and governance models.

- **Compensation**

- Total cash compensation lower (under \$1 million for CEO)
- No cash bonuses
- Equity awards heavily weighted to absolute TSR
- Requirement to hold a portion of annual equity grant until retirement

- **Governance**

- Board compensation largely in stock
 - Requirement to hold a portion of equity for duration of board service
 - End staggered terms for directors
- Greater stock ownership will align management and the Board of Directors with shareholders.
 - Kimmeridge would not seek to lower overall compensation provided that it is aligned with shareholders. In this structure, management would be rewarded well as TSR rises.
 - This will likely result in more cash being returned to shareholders and opportunistic buybacks/M&A.

Kimmeridge believes alignment and accountability drive performance and profitability. Putting PDC on a path to profitability will require a strong board that thinks and acts like owners.

- Board backgrounds and compensation metrics mean nothing if management teams are not held accountable to those metrics.
- PDC's management team has consistently been paid well despite material underperformance in operations, financial reporting, returns and costs.
- Kimmeridge believes its board nominees will bring fresh ideas and, more critically, hold the management team accountable for performance.
- The Kimmeridge nominees will also endeavor to better align management compensation with stockholder returns and absolute performance.
- We urge you to join us and **VOTE GOLD** to elect the Kimmeridge nominees who will lead the efforts to return PDC onto a path toward profitability.

1. Top five executive compensation defined as the total compensation for the five highest-paid PDC executives in a given year. (Slide 3)
2. Kimmeridge defines NOPAT as earnings before interest after taxes (net operating profit after taxes). Kimmeridge assumes a cost of capital of 10.5%. (Slide 6)
3. Kimmeridge used PDC's self-defined peer group that determined 2018 PSU payout according to PDC's 2018 Proxy. The following companies were excluded: EGN because it was acquired in 2018; MTDR because it has not yet released its 2018 proxy; GPOR because it has not yet released its 2018 proxy; BCEI because it entered bankruptcy during the three-year performance period. (Slide 7)
4. CEO yield calculated by taking the sum of Bart Brookman's annual salary, cash bonus and PDC stock sold in the open market, divided by market value of the average number of shares Bart Brookman owned in a calendar year. Share count was calculated by averaging "qualified holdings" from PDC's proxy statement at the beginning and end of each year. Qualified holdings include stock owned directly, shares held in the Company's 401(k) and Profit Sharing Plan and unvested time-based RSUs. (Slide 12)
5. Private equity returns based on Preqin Ltd data. 10% IRR based on weighted average returns of all U.S. oil and gas private equity funds with a 2009-2018 vintage. Kimmeridge excluded private equity funds focusing on direct lending, distressed debt, infrastructure and co-investments. XOP performance data according to Yahoo Finance using the 'adjusted close' price. (Slide 13)
