PFIZER INC AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 1: Basis of Presentation

General

We prepared the condensed consolidated financial statements following the requirements of the Securities and Exchange Commission (SEC) for interim reporting. As permitted under those rules, certain footnotes or other financial information that are normally required by accounting principles generally accepted in the United States of America (GAAP) can be condensed or omitted. Balance sheet amounts and operating results for subsidiaries operating outside the U.S. are as of and for the three-month and nine-month periods ended August 28, 2005 and August 22, 2004. The fiscal first quarter and nine months of 2005 had three additional business days compared to the fiscal first quarter and nine months of 2004.

We made certain reclassifications to the 2004 condensed consolidated financial statements to conform to the 2005 presentation.

Revenues, expenses, assets and liabilities can vary during each quarter of the year. Therefore, the results and trends in these interim financial statements may not be representative of those for the full year.

We are responsible for the unaudited financial statements included in this document. The financial statements include all normal and recurring adjustments that are considered necessary for the fair presentation of our financial position and operating results.

The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the consolidated financial statements and accompanying notes included in Pfizer's Annual Report on Form 10-K for the year ended December 31, 2004.

Share-Based Payments

In accordance with Statement of Financial Accounting Standards (SFAS) No. 123, *Accounting for Stock-Based Compensation*, we elect to account for our stock-based compensation under Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*. The exercise price of stock options granted equals the market price on the date of grant; as such, there is no recorded compensation expense related to grants of stock options.

The weighted-average fair value per stock option granted was \$5.00 and \$6.33 for the three months ended October 2, 2005 and September 26, 2004, and \$5.15 and \$6.88 for the nine months ended October 2, 2005 and September 26, 2004. We estimated the fair values, as required under GAAP, using the Black-Scholes option-pricing model, modified for dividends and using the assumptions below. Pro forma compensation expense related to stock options subject to accelerated vesting upon retirement is recognized over the period of employment up to the vesting date of the grant. In the first quarter of 2005, we changed our method of estimating expected dividend yield from historical patterns of dividend payments to a method that reflects a constant dividend yield during the expected term of the option.

	<u>Three Months Ended</u>		<u>Nine Months Ended</u>	
	Oct. 2, 2005	Sept. 26, 2004	Oct. 2, 2005	Sept. 26, 2004
Expected dividend yield	2.76%	2.98%	2.90%	2.90%
Risk-free interest rate	3.81%	3.36%	3.96%	3.32%
Expected stock price volatility	20.00%	22.88%	21.93%	22.15%
Expected term until exercise (years)	5.59	5.64	5.75	5.75

PFIZER INC AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The following table shows the effect on results for the three-month and nine-month periods ended October 2, 2005 and September 26, 2004 if we had applied the fair-value-based recognition provisions of SFAS 123 to measure stock-based compensation expense for the option grants:

	Three Months Ended		Nine Months Ended	
	Oct. 2, 2005	Sept. 26, 2004	Oct. 2, 2005	Sept. 26, 2004
(millions of dollars, except per common share data)				
Net income available to common shareholders used in the calculation of basic earnings per common share:				
As reported under GAAP*	\$ 1,588	\$ 3,340	\$ 5,348	\$ 8,532
Compensation expense - net of tax	(104)	(148)	(356)	(421)
Pro forma	<u>\$ 1,484</u>	<u>\$ 3,192</u>	<u>\$ 4,992</u>	<u>\$ 8,111</u>
Basic earnings per common share:				
As reported under GAAP*	\$ 0.22	\$ 0.45	\$ 0.73	\$ 1.13
Compensation expense - net of tax	(0.02)	(0.02)	(0.05)	(0.06)
Pro forma	<u>\$ 0.20</u>	<u>\$ 0.43</u>	<u>\$ 0.68</u>	<u>\$ 1.07</u>
Net income available to common shareholders used in the calculation of diluted earnings per common share:				
As reported under GAAP*	\$ 1,588	\$ 3,340	\$ 5,349	\$ 8,531
Compensation expense - net of tax	(104)	(148)	(356)	(421)
Pro forma	<u>\$ 1,484</u>	<u>\$ 3,192</u>	<u>\$ 4,993</u>	<u>\$ 8,110</u>
Diluted earnings per common share:				
As reported under GAAP*	\$ 0.22	\$ 0.44	\$ 0.72	\$ 1.12
Compensation expense - net of tax	(0.02)	(0.02)	(0.05)	(0.06)
Pro forma	<u>\$ 0.20</u>	<u>\$ 0.42</u>	<u>\$ 0.67</u>	<u>\$ 1.06</u>

* Includes stock-based compensation expense, net of related tax benefits, of \$81 million for the nine months ended October 2, 2005 (\$28 million for the three months ended October 2, 2005) and \$40 million for the nine months ended September 26, 2004 (none for the three months ended September 26, 2004).

Net income available to common shareholders used in the calculation of basic earnings per common share represents net income reduced by preferred stock dividends - net of tax. Net income available to common shareholders used in the calculation of diluted earnings per common share represents net income reduced by the incremental allocation of shares to the Employee Stock Ownership Plans (ESOPs) acquired as part of the Pharmacia acquisition.

Note 2: Asset Impairment Charge and Other Costs Associated with the Suspension of Bextra Sales

In the first nine months of 2005, we recorded charges totaling \$1.2 billion (\$762 million, net of tax) in connection with the decision to suspend sales and marketing of Bextra. This decision resulted from an April 7, 2005 request from the U.S. Food and Drug Administration (FDA), as part of its safety review of all COX-2 medicines.

The pre-tax charges included \$1.1 billion related to the impairment of developed technology rights associated with Bextra and \$7 million related to the write-off of machinery and equipment, both of which are included in *Other (income)/deductions - net*. In addition, in connection with the suspension, we also recorded \$56 million in write-offs of inventory and exit costs, included in *Cost of sales*; \$8 million related to the costs of administering the suspension of sales, included in *Selling, informational and administrative expenses*; and \$212 million for an estimate of customer returns, primarily included against *Revenues*. Substantially all of these charges were recorded in the first quarter of 2005.

PFIZER INC AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 3: Income Taxes

Income Tax Charge Associated with Repatriation Decision

In the first nine months of 2005, we recorded an income tax charge of \$1.7 billion, included in *Provision for taxes on income*, in connection with our decision to repatriate about \$36.7 billion of foreign earnings in accordance with the *American Jobs Creation Act of 2004* (the Jobs Act). In the first quarter of 2005, we recorded an initial estimated income tax charge of \$2.2 billion based on the decision to repatriate \$28.3 billion of foreign earnings; in the second quarter of 2005, we reduced our original estimate of the tax charge by \$863 million and revised the repatriation of foreign earnings to \$28.1 billion, principally as a result of guidance issued by the U.S. Treasury in May 2005. In the second quarter of 2005, we also recorded an additional tax charge of \$373 million, primarily due to our decision to repatriate an additional \$8.6 billion of foreign earnings.

As of October 2, 2005, we intend to continue to permanently reinvest the earnings of our international subsidiaries and, therefore, we have not recorded a U.S. tax provision on the remaining amount of unremitted earnings.

Tax Contingencies

In the second quarter of 2005, we recorded a tax benefit of \$586 million primarily related to the resolution of certain tax positions. We believe that the IRS audits of the Pfizer Inc. tax returns for the years 1999-2001 and the Warner-Lambert Company tax returns for the years 1999 through the date of the merger with Pfizer (June 19, 2000) are substantially complete. In connection with those audits, we are currently in the process of appealing one matter related to the tax deductibility of a breakup fee paid by Warner-Lambert Company in 2000.

The IRS has commenced the audit of the Pfizer Inc. tax returns for the years 2002, 2003 and 2004. The 2005 tax year is also currently under audit.

As previously disclosed, with respect to Pharmacia Corporation (formerly known as Monsanto Company), the IRS has completed and closed its income tax return examinations and appeals through 1999 and has commenced the audit of the tax returns for the years 2000 through the date of merger with Pfizer (April 16, 2003).

We periodically reassess the likelihood of assessments resulting from audits of federal, state and foreign income tax filings. We believe that our accruals for tax liabilities are adequate for all open years.

Note 4: Adapting to Scale Initiative

We incurred the following costs in connection with our Adapting to Scale (AtS) initiative, which was announced in the second quarter of 2005:

	Three Months Ended Oct. 2, 2005	Nine Months Ended Oct. 2, 2005
(millions of dollars)		
Implementation costs ^(a)	\$ 104	\$ 136
Restructuring charges ^(b)	153	174
Total AtS costs	<u>\$ 257</u>	<u>\$ 310</u>

^(a) Included in *Cost of sales* (\$36 million), *Selling, informational and administrative expenses* (\$60 million), and *Research and development expenses* (\$8 million) for the three months ended October 2, 2005, and included in *Cost of sales* (\$37 million), *Selling, informational and administrative expenses* (\$81 million), and *Research and development expenses* (\$18 million) for the nine months ended October 2, 2005.

^(b) Included in *Restructuring charges and merger-related costs*.

In connection with the AtS initiative, Pfizer management has performed a comprehensive review of our processes, organizations, systems and decision-making procedures, in a company-wide effort to improve performance and efficiency. We expect the costs associated with this multi-year effort to continue through 2008 and to total approximately \$4 billion to \$5 billion, on a pre-tax basis. The actions associated with the AtS initiative will include restructuring charges, such as asset

PFIZER INC AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

impairments, exit costs and severance costs (including any related impacts to our benefit plans, including settlements and curtailments) and associated implementation costs, such as accelerated depreciation charges, primarily associated with plant network optimization efforts, and expenses associated with system and process standardization and the expansion of shared services.

Through October 2, 2005, the restructuring charges primarily relate to employee termination costs at our manufacturing facilities in North America and the implementation costs primarily relate to system and process standardization and to expansion of shared services.

The components of restructuring costs associated with AtS follow:

(millions of dollars)	Nine Months Ended Oct. 2, 2005	Utilization Through Oct. 2, 2005	Accrual at Oct. 2, 2005 ^(a)
Employee termination costs	\$ 106	\$ 49	\$ 57
Asset impairments	62	62	--
Other	6	--	6
	<u>\$ 174</u>	<u>\$ 111</u>	<u>\$ 63</u>

^(a) Included in *Other current liabilities*.

During the three months ended October 2, 2005, we expensed \$85 million for *Employee termination costs*, \$62 million for *Asset impairments* and \$6 million in *Other*. Through October 2, 2005, *Employee termination costs* represent the approved reduction of the workforce by 922 employees, mainly in manufacturing, sales and research. We notified affected individuals and 903 employees were terminated as of October 2, 2005. *Employee termination costs* are recorded as incurred and include accrued severance benefits, pension and postretirement benefits. *Asset impairments* primarily include charges to write down intangible assets, and property, plant and equipment. *Other* primarily includes costs to exit certain activities.

Note 5: Merger-Related Costs

We incurred the following merger-related costs primarily in connection with our acquisition of Pharmacia Corporation (Pharmacia), which was completed on April 16, 2003:

(millions of dollars)	Three Months Ended		Nine Months Ended	
	Oct. 2, 2005	Sept. 26, 2004	Oct. 2, 2005	Sept. 26, 2004
Integration costs ^(a)	\$ 93	\$ 113	\$ 390	\$ 367
Restructuring costs ^(a)	61	77	232	359
Total merger-related costs	<u>\$ 154</u>	<u>\$ 190</u>	<u>\$ 622</u>	<u>\$ 726</u>

^(a) Included in *Restructuring charges and merger-related costs*.

In connection with the acquisition of Pharmacia, Pfizer management approved plans to restructure and integrate the operations of both legacy Pfizer and legacy Pharmacia to combine operations, eliminate duplicative facilities and reduce costs. Total merger-related expenditures expected to be incurred during 2003 through 2005 to achieve anticipated synergies are about \$5.1 billion, on a pre-tax basis, with \$5.0 billion incurred through October 2, 2005. The restructuring of our operations as a result of our acquisition of Pharmacia includes consulting, systems integrations, severance, costs of vacating duplicative facilities, contract termination and other exit costs.

Through April 15, 2004, we recorded restructuring costs associated with employee terminations and exiting certain activities of legacy Pharmacia as liabilities assumed in the purchase business combination and recorded an increase to goodwill. Changes to previous estimates of restructuring costs included as part of the purchase allocation of Pharmacia are recorded as a reduction to goodwill or an expense to operations, as appropriate. Restructuring costs incurred for legacy Pfizer and restructuring costs incurred after April 15, 2004 for legacy Pharmacia are charged to the results of operations.

PFIZER INC AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The components of merger-related restructuring costs associated with legacy Pfizer and legacy Pharmacia follow:

(millions of dollars)	Total	Utilization Through Oct. 2, 2005 ^(a)	Accrual at Oct. 2, 2005 ^(b)
Costs capitalized through April 15, 2004:			
Employee termination costs	\$ 1,535	\$ 1,502	\$ 33
Other	624	517	107
	<u>\$ 2,159</u>	<u>\$ 2,019</u>	<u>\$ 140</u>
Costs expensed:			
Employee termination costs	\$ 590	\$ 508	\$ 82
Asset impairments	421	421	--
Other	96	74	22
	<u>\$ 1,107</u>	<u>\$ 1,003</u>	<u>\$ 104</u>

(a) Includes insignificant adjustments to original amounts established.

(b) Included in *Other current liabilities*.

During the three months ended October 2, 2005 and September 26, 2004, we expensed \$1 million and \$53 million for *Employee termination costs*, \$53 million and \$8 million for *Asset impairments*, and \$7 million and \$16 million in *Other*. During the first nine months of 2005 and 2004, we expensed \$73 million and \$201 million for *Employee termination costs*, \$131 million and \$122 million for *Asset impairments*, and \$22 million and \$31 million in *Other*. Through October 2, 2005, *Employee termination costs* represent the approved reduction of the legacy Pfizer and legacy Pharmacia work force by 17,086 employees, mainly in corporate, manufacturing, distribution, sales and research. We notified affected individuals and 16,385 employees were terminated as of October 2, 2005. *Employee termination costs* are recorded as incurred and include accrued severance benefits and costs associated with change-in-control provisions of certain Pharmacia employment contracts. *Asset impairments* primarily include charges to write down property, plant and equipment. *Other* primarily includes costs to exit certain activities of legacy Pfizer and legacy Pharmacia.

Note 6: Acquisitions

On September 14, 2005, we completed the acquisition of all of the outstanding shares of Vicuron Pharmaceuticals, Inc. (Vicuron), a biopharmaceutical company focused on the development of novel anti-infectives, for approximately \$1.9 billion in cash (including transaction costs). Vicuron has two products currently under New Drug Application (NDA) review by the FDA: anidulafungin for fungal infections and dalbavancin for Gram-positive infections. The allocation of the purchase price includes in-process research and development of approximately \$1.4 billion, which was expensed and included in *Merger-related in-process research and development charges*, and goodwill of \$243 million, which has been allocated to our Human Health segment. Neither of these items is deductible for tax purposes.

On April 12, 2005, we completed the acquisition of Idun Pharmaceuticals, Inc. (Idun), a biopharmaceutical company focused on the discovery and development of therapies to control apoptosis, and on August 15, 2005, we completed the acquisition of all outstanding shares of Bioren Inc. (Bioren), which focuses on technology for optimizing antibodies. The aggregate cost of these and other smaller acquisitions was approximately \$340 million for the nine months ended October 2, 2005.

On February 10, 2004, we completed the acquisition of all the outstanding shares of Esperion Therapeutics, Inc., (Esperion), a biopharmaceutical company, for \$1.3 billion in cash (including transaction costs). The allocation of the purchase price included in-process research and development of \$920 million, which was expensed, and goodwill of \$235 million, which was allocated to our Human Health segment. Neither of these items was deductible for tax purposes. The aggregate cost of other smaller acquisitions was approximately \$170 million for the nine months ended September 26, 2004.

Note 7: Dispositions

We evaluate our businesses and product lines periodically for strategic fit within our operations. In the first quarter of 2004, we decided to sell a number of businesses and product lines and we recorded the results of these operations in *Discontinued operations* for 2005 and 2004. As of October 2, 2005, all of these discontinued operations have been sold. The impact of these divested businesses and product lines was not material to the consolidated operating results of Pfizer Inc in the periods presented.

PFIZER INC AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Assets held for sale and *Liabilities held for sale* on the balance sheet at October 2, 2005, relate primarily to assets in Europe that we intend to sell but that are not related to *Discontinued operations*.

Note 8: Comprehensive Income/(Expense)

The components of comprehensive income/(expense) follow:

	Three Months Ended		Nine Months Ended	
	Oct. 2, 2005	Sept. 26, 2004	Oct. 2, 2005	Sept. 26, 2004
(millions of dollars)				
Net income	\$ 1,589	\$ 3,341	\$ 5,352	\$ 8,536
Other comprehensive income/(expense):				
Net unrealized gain/(loss) on available-for-sale securities arising during the period - net of tax	7	(30)	(98)	153
Currency translation adjustment and other	(183)	689	(1,195)	451
Total other comprehensive income/(expense)	(176)	659	(1,293)	604
Total comprehensive income/(expense)	\$ 1,413	\$ 4,000	\$ 4,059	\$ 9,140

Note 9: Financial Instruments

Derivative Financial Instruments and Hedging Activities

During the first nine months of 2005, we entered into the following incremental or new derivative and hedging activities:

Financial Instrument	Hedge Type	Hedged or Offset Item	Notional Amount (millions of dollars)	Maturity Date
Swaps	Net investment	Euro net investments	\$1,255	Sept.-Oct. 2006
Forward-exchange contracts	--	Short-term foreign currency assets and liabilities ^(a)	674	Through 2006
Forward-exchange contracts	Cash flow	Euro available-for-sale investments	493	Through 2006
Forward-exchange contracts	Cash flow	Danish krone available-for-sale investments	172	Through 2006

^(a) Forward-exchange contracts used to offset short-term foreign currency assets and liabilities were primarily for intercompany transactions in euros, Australian dollars, U.K. pounds, Swedish krona and Canadian dollars for the nine months ended October 2, 2005.

These foreign exchange derivatives serve to protect net income and net investments against the impact of the translation into U.S. dollars of certain foreign exchange denominated transactions. There was no material ineffectiveness in any hedging relationship reported in earnings in the first nine months of 2005.

Long-Term Debt

In July 2005, we decided to exercise Pfizer's option to call, at par-value plus accrued interest, \$1 billion of senior unsecured floating-rate notes, which were included in *Long-term debt* at December 31, 2004. Notice to call was given to the Trustees and the notes were redeemed in September 2005.

Note 10: Inventories

The components of inventories follow:

	Oct. 2, 2005	Dec. 31, 2004
(millions of dollars)		
Finished goods	\$ 2,600	\$ 2,643
Work-in-process	2,714	2,703
Raw materials and supplies	1,242	1,314
Total inventories	\$ 6,556	\$ 6,660

A reclassification was made in 2004 from *Finished goods* to *Work-in-process* to better reflect the stage of completion.

PFIZER INC AND SUBSIDIARY COMPANIES

(UNAUDITED)

Note 11: Goodwill and Other Intangible Assets

A. Goodwill

The changes in the carrying amount of goodwill by segment for the nine months ended October 2, 2005 follow:

(millions of dollars)	Human Health	Consumer Healthcare	Animal Health	Other	Total
Balance, December 31, 2004	\$ 20,966	\$ 2,701	\$ 79	\$ 10	\$ 23,756
Other ^(a)	13	62	(25)	--	50
Balance, October 2, 2005	<u>\$ 20,979</u>	<u>\$ 2,763</u>	<u>\$ 54</u>	<u>\$ 10</u>	<u>\$ 23,806</u>

(a) Primarily the acquisition of Vicuron, the impact of foreign exchange and reductions to goodwill as a result of adjusting certain purchase accounting liabilities.

B. Other Intangible Assets

The components of identifiable intangible assets, primarily included in our Human Health segment, follow:

(millions of dollars)	Oct. 2, 2005		Dec. 31, 2004	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Finite-lived intangible assets:				
Developed technology rights	\$ 31,102	\$ (8,070)	\$ 33,137	\$ (5,967)
Brands	1,057	(48)	1,037	(14)
License agreements	165	(28)	158	(17)
Trademarks	157	(92)	134	(90)
Other ^(a)	436	(205)	390	(186)
Total amortized finite-lived intangible assets	<u>32,917</u>	<u>(8,443)</u>	<u>34,856</u>	<u>(6,274)</u>
Indefinite-lived intangible assets:				
Brands	3,898	--	4,012	--
License agreements	316	--	356	--
Trademarks	227	--	235	--
Other ^(b)	61	--	66	--
Total indefinite-lived intangible assets	<u>4,502</u>	<u>--</u>	<u>4,669</u>	<u>--</u>
Total identifiable intangible assets	<u>\$ 37,419</u>	<u>\$ (8,443)</u>	<u>\$ 39,525</u>	<u>\$ (6,274)</u>

Total identifiable intangible assets, less
accumulated amortization

\$ 28,976

\$ 33,251

(a) Includes patents, non-compete agreements, customer contracts and other intangible assets.

(b) Includes pension-related intangible assets.

In the first nine months of 2005, we recorded an impairment charge of \$1.1 billion related to the developed technology rights for Bextra, a selective COX-2 inhibitor (see Note 2, *Asset Impairment Charge and Other Costs Associated with the Suspension of Bextra Sales*) which was included in *Other (income)/deductions - net*.

Amortization expense related to acquired intangible assets that contribute to our ability to sell, manufacture, research, market and distribute our products are included in *Amortization of intangible assets* as they benefit multiple business functions. Amortization expense related to acquired intangible assets that are associated with a single function are included in *Cost of sales, Selling, informational and administrative expenses* or *Research and development expenses*, as appropriate. Total amortization expense for finite-lived intangible assets was \$859 million for the three months ended October 2, 2005 and September 26, 2004 and \$2.6 billion and \$2.5 billion for the nine months ended October 2, 2005 and September 26, 2004.

The annual amortization expense expected for the fiscal years 2005 through 2010 is \$3.5 billion in 2005, \$3.4 billion in 2006 and 2007, \$2.7 billion in 2008 and \$2.5 billion in 2009 and 2010.

The components of net periodic benefit cost of the U.S. and international pension plans and the postretirement plans for the nine months ended October 2, 2005 and September 26, 2004 follow:

(millions of dollars)	Pension Plans							
	U.S. Qualified		U.S. Supplemental (Non-Qualified)		International		Postretirement Plans	
	2005	2004	2005	2004	2005	2004	2005	2004
Service cost	\$ 239	\$ 215	\$ 28	\$ 25	\$ 224	\$ 197	\$ 29	\$ 27
Interest cost	310	293	44	44	234	214	84	80
Expected return on plan assets	(445)	(429)	--	--	(238)	(215)	(17)	(15)
Amortization of:								
Prior service costs/(gains)	11	13	1	1	(2)	7	1	1
Net transition obligation	--	--	--	--	2	1	--	--
Actuarial losses	77	74	29	27	71	42	14	12
Curtailments and settlements - net	3	--	--	--	11	(1)	--	--
Special termination benefits	1	--	--	--	11	--	1	--
Net periodic benefit costs	<u>\$ 196</u>	<u>\$ 166</u>	<u>\$ 102</u>	<u>\$ 97</u>	<u>\$ 313</u>	<u>\$ 245</u>	<u>\$ 112</u>	<u>\$ 105</u>

For the first nine months of 2005, we contributed from the Company's general assets \$52 million to our U.S. qualified pension plans, \$301 million to our international pension plans, \$124 million to our U.S. supplemental (non-qualified) pension plans and \$123 million to our postretirement plans. As of October 2, 2005, we expect to contribute, from the Company's general assets during 2005, a total (inclusive of amounts contributed during the first nine months of 2005) of \$53 million to our U.S. qualified pension plans, \$396 million to our international pension plans, \$137 million to our U.S. supplemental (non-qualified) pension plans and \$166 million to our postretirement plans. The contributions from the Company's general assets include direct employer benefit payments.

PFIZER INC AND SUBSIDIARY COMPANIES

Note 13: Earnings Per Common Share

Basic and diluted earnings per common share (EPS) were computed using the following common share data:

(millions)	Three Months Ended		Nine Months Ended	
	Oct. 2, 2005	Sept. 26, 2004	Oct. 2, 2005	Sept. 26, 2004
EPS Numerator - Basic:				
Income from continuing operations	\$ 1,602	\$ 3,298	\$ 5,345	\$ 8,461
Less: Preferred stock dividends - net of tax	<u>1</u>	<u>1</u>	<u>4</u>	<u>4</u>
Income available to common shareholders from continuing operations	1,601	3,297	5,341	8,457
Discontinued operations - net of tax	<u>(13)</u>	<u>43</u>	<u>7</u>	<u>75</u>
Net income available to common shareholders	<u>\$ 1,588</u>	<u>\$ 3,340</u>	<u>\$ 5,348</u>	<u>\$ 8,532</u>
EPS Denominator - Basic:				
Weighted-average number of common shares outstanding	<u>7,333</u>	<u>7,501</u>	<u>7,372</u>	<u>7,554</u>
EPS Numerator - Diluted:				
Income from continuing operations	\$ 1,602	\$ 3,298	\$ 5,345	\$ 8,461
Less: ESOP contribution - net of tax	<u>1</u>	<u>1</u>	<u>3</u>	<u>5</u>
Income available to common shareholders from continuing operations	1,601	3,297	5,342	8,456
Discontinued operations - net of tax	<u>(13)</u>	<u>43</u>	<u>7</u>	<u>75</u>
Net income available to common shareholders	<u>\$ 1,588</u>	<u>\$ 3,340</u>	<u>\$ 5,349</u>	<u>\$ 8,531</u>
EPS Denominator - Diluted:				
Weighted-average number of common shares outstanding	7,333	7,501	7,372	7,554
Common share equivalents: stock options, restricted stock units, stock issuable under employee compensation plans and convertible preferred stock	<u>49</u>	<u>68</u>	<u>52</u>	<u>88</u>
Weighted-average number of common shares outstanding and common share equivalents	<u>7,382</u>	<u>7,569</u>	<u>7,424</u>	<u>7,642</u>

Outstanding stock options, representing about 563 million and 513 million shares of common stock during the three-month and nine-month periods ended October 2, 2005, and about 391 million and 319 million shares of common stock during the three-month and nine-month periods ended September 26, 2004, had exercise prices greater than the average market price of our common stock. These options were excluded from the computation of diluted EPS for these periods because their inclusion would have had an antidilutive effect.

Also, in the diluted computation, income from continuing operations and net income are reduced by the incremental contribution to the ESOPs, which were acquired as part of our Pharmacia acquisition. This contribution is the after-tax difference between the income that the ESOPs would have received in preferred stock dividends and the dividend on the common shares assumed to have been outstanding.

Note 14: Segment Information

We operate in the following business segments:

Human Health

- The Human Health segment, which represents our pharmaceutical business, includes treatments for cardiovascular and metabolic diseases, central nervous system disorders, arthritis and pain, infectious and respiratory diseases, urogenital conditions, cancer, eye disease, endocrine disorders and allergies.

Consumer Healthcare

- The Consumer Healthcare segment includes self-medications for oral care, upper respiratory health, tobacco dependence, gastrointestinal health, skin care, eye care and hair growth.

Animal Health

- The Animal Health segment includes treatments for diseases in livestock and companion animals.

Segment profit/(loss) is measured based on income from continuing operations before provision for taxes on income, minority interests and certain costs, such as significant impacts of purchase accounting for acquisitions and restructuring charges and merger-related costs. This methodology is utilized by management to evaluate each business. Certain income/(expense) items that are excluded from the operating segments' profit/(loss) are considered corporate items and therefore are included in *Corporate/Other*.

PFIZER INC AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Revenues and profit/(loss) by segment for the three months and nine months ended October 2, 2005, and September 26, 2004, follow:

	Three Months Ended		Nine Months Ended	
	Oct. 2, 2005	Sept. 26, 2004	Oct. 2, 2005	Sept. 26, 2004
(millions of dollars)				
Revenues:				
Human Health	\$ 10,552	\$ 11,288	\$ 32,629	\$ 33,033

REVIEW REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Pfizer Inc:

We have reviewed the condensed consolidated balance sheet of Pfizer Inc and Subsidiary Companies as of October 2, 2005, the related condensed consolidated statements of income for the three-month and nine-month periods ended October 2, 2005 and September 26, 2004, and the related condensed consolidated statements of cash flows for the nine-month periods ended October 2, 2005 and September 26, 2004. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Pfizer Inc and Subsidiary Companies as of December 31, 2004, and the related consolidated statements of income, shareholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated February 24, 2005, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2004, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

KPMG LLP

New York, New York
November 9, 2005

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW OF OUR CONSOLIDATED OPERATING RESULTS

Our Business

We are a research-based, global pharmaceutical company that discovers, develops, manufactures and markets leading prescription medicines for humans and animals, as well as many of the world's best known consumer healthcare products. Our longstanding value proposition has been to prove that our medicines cure or treat disease, including symptoms and suffering, and this remains our core mission. We have expanded our value proposition to also show that our medicines not only can cure or treat disease, but also can markedly improve health systems by reducing overall healthcare costs, improving societies' economic well-being and increasing effective prevention and treatment of disease. We generate revenue through the sale of our products, as well as through alliance agreements by copromoting products discovered by other companies.

Acquisitions

On September 14, 2005, we completed the acquisition of all of the outstanding shares of Vicuron Pharmaceuticals, Inc. (Vicuron), a biopharmaceutical company focused on the development of novel anti-infectives, for approximately \$1.9 billion in cash (including transaction costs). Vicuron has two products currently under New Drug Application (NDA) review by the U.S. Food and Drug Administration (FDA): anidulafungin for fungal infections and dalbavancin for Gram-positive infections. The allocation of the purchase price includes in-process research and development of approximately \$1.4 billion, which was expensed and included in *Merger-related in-process research and development charges*, and goodwill of \$243 million, which has been allocated to our Human Health segment. Neither of these items is deductible for tax purposes.

On April 12, 2005, we completed the acquisition of Idun Pharmaceuticals, Inc. (Idun), a biopharmaceutical company focused on the discovery and development of therapies to control apoptosis, and on August 15, 2005, we completed the acquisition of all outstanding shares of Bioren Inc. (Bioren), which focuses on technology for optimizing antibodies. The aggregate cost of these and other smaller acquisitions was approximately \$340 million for the nine months ended October 2, 2005.

On February 10, 2004, we completed the acquisition of all the outstanding shares of Esperion Therapeutics, Inc., (Esperion), a biopharmaceutical company, for \$1.3 billion in cash (including transaction costs). The allocation of the purchase price included in-process research and development of \$920 million, which was expensed, and goodwill of \$235 million, which was allocated to our Human Health segment. Neither of these items was deductible for tax purposes. The aggregate cost of other smaller acquisitions was approximately \$170 million for the nine months ended September 26, 2004.

Our Operating Environment

We continue to face a dynamically challenging and changing environment in our pharmaceutical business, including the loss of exclusivity of major products, continuing pressures on selective COX-2 inhibitor products, the increasing regulatory scrutiny of drug safety, the adoption of new direct-to-consumer advertising guidelines and lower prescription growth rates and increased competition in certain therapeutic areas.

Our performance in 2005 has been, and will continue to be, impacted by loss of U.S. exclusivity of four major products -- Diflucan, Neurontin, and Accupril/Accuretic during 2004 and Zithromax in November 2005. In addition, we face the loss of U.S. exclusivity for Zoloft during 2006 and Norvasc and Zyrtec during 2007. These seven products represented 33% of our Human Health revenues and 29% of our total revenues for the year ended December 31, 2004. Revenues in 2005 have also been, and may continue to be, impacted by publicity and regulatory actions regarding selective COX-2 inhibitor products (see further discussion in the section "Selected Product Descriptions"). Our total revenues decreased 5% in the third quarter of 2005 and were flat in the first nine months of 2005 as compared to the same periods in 2004.

Partially offsetting these impacts in the first nine months of 2005 was the solid performance in the aggregate of the balance of our broad portfolio of patent-protected medicines. Our portfolio of medicines includes five of the world's 25 best-selling medicines, with 11 medicines that lead their therapeutic areas. Our results reflect two underlying forces. First, Pfizer markets the broadest array of in-line and recently launched products in the industry; and second, Pfizer is a business going through a process of reinventing itself. We are addressing the loss of exclusivity of a number of products by advancing a number of internally developed, in-licensed and copromoted product candidates.

We believe we have important competitive advantages that will serve us well and distinguish us from others in our industry. Our product portfolio and pipeline demonstrate the benefits of Pfizer's scale and our skill at leveraging the opportunities it provides us. Scale also enhances our status as 'partner of choice' with other companies who have promising product candidates and technologies, as well as giving us influence as a global purchaser of goods and services. We continue to build on and enhance our Research & Development capabilities through acquisitions and collaborations; and through targeted acquisitions, licensing opportunities and internal development, we are augmenting our commercial portfolio. We have also made progress with our Adapting to Scale initiative, which is a focused, company-wide effort to leverage our scale and

strength more robustly and increase our productivity. (See further discussion in the section "*Adapting to Scale Productivity Initiative and Merger-Related Synergies.*")

We believe that our strategic and operating flexibility allows us to marshal and focus resources when and where they are needed, to change with a changing environment and to recognize and seize emerging opportunities.

Adapting to Scale Productivity Initiative and Merger-Related Synergies

During the second and third quarters of 2005, we made progress with our multi-year productivity initiative, called Adapting to Scale (AtS), to increase efficiency and streamline decision making across the Company. This initiative, first announced in April 2005, follows the integration of Warner-Lambert and Pharmacia Corporation (Pharmacia), which resulted in the tripling of Pfizer's revenues over the past five years. The integration of those two companies will result in a combined expense reduction of approximately \$6 billion, inclusive of \$4.2 billion in Pharmacia-related synergies that will be achieved this year. The new AtS productivity initiative is expected to yield \$4 billion in cost savings on an annual basis by 2008, based on a top-to-bottom business review completed during the first half of 2005.

During 2005, we anticipate that cost savings from our AtS initiative will exceed \$600 million, greater than previously forecasted, mainly attributable to the Human Health business. We expect that annual cost savings will accelerate over the following three years, with about \$2 billion in savings targeted for 2006, about \$3.5 billion in 2007 and about \$4 billion upon completion in 2008. These savings are expected to be realized in procurement, operating expenses and facilities, among other sources. We plan to use the cost savings we generate, in part, to fund key investments, including new product launches and the development of the many promising new medicines in our pipeline. The Company expects that the aggregate cost of implementing this initiative through 2008 will be approximately \$4 billion to \$5 billion on a pre-tax basis.

While some projects are already underway, during the fourth quarter of 2005, we will continue to accelerate the implementation of changes, including:

- Reorganizing Pfizer Global Research & Development (PGRD) to increase efficiency and effectiveness in bringing new therapies to patients-in-need while reducing the cost of research and development. PGRD is being reorganized into eleven therapeutic categories -- cardiovascular, metabolic, and endocrine; central nervous system; inflammation; allergy and respiratory; infectious diseases; pain; gastrointestinal and hepatitis; oncology; urology and sexual health; ophthalmology; and dermatology. Each therapeutic area will have three team leaders -- a research leader for compounds not yet in human testing, a development leader for compounds in human testing not yet marketed, and a commercial leader for marketed compounds. Discovery Research will retain its existing structure of six drug-candidate-producing sites. Development will move toward single sites for most therapeutic areas.
- Continuing our optimization of Pfizer Global Manufacturing's plant network, which began with the acquisition of Pharmacia, to ensure that the Company's manufacturing facilities are aligned with current and future product needs. Since December 2004, Pfizer has announced the divestiture of facilities in Holland, MI; Angers and Val-de-Reuil, France; Morpeth, U.K.; and Stockholm, Sweden, as well as other, smaller facilities. In the last few months, Pfizer announced the cessation of operations in Corby, U.K. and Orangeville, Canada; a significant downsizing in Lincoln, NE; and that plants in Lititz, PA, Groton, CT, and Inchera and Little Island, Ireland would be restructured. We also determined that the Augusta, GA plant will be closed. The restructuring of the Puerto Rico and Sandwich, U.K. operations will continue, with employment reduction at Barceloneta and Arecibo, Puerto Rico, to occur in the fourth quarter of 2005 in anticipation of cessation of operations at the Arecibo plant in the next few years. The sale of the Cruce Davila, Puerto Rico, plant is also being pursued. Since 2003, Pfizer has announced plans to reduce the number of plants in its global networks by more than 25%.
- Realigning our European marketing teams and implementing initiatives designed to improve the effectiveness of our field force in Japan. During the third quarter of 2005, we completed a major reorganization of the U.S. field force, reshaping the management structure to be more responsive to commercial trends as the Medicare Modernization Act takes effect and driving greater sales-force accountability in preparation for the upcoming launch of new medicines.
- Pursuing savings in information technology resulting from significant reductions in application software (already reduced from about 8,000 at the time of the Pharmacia acquisition in 2003 to about 4,000 today, with considerable further reductions planned) and data centers (to be reduced from 17 to 4), as well as rationalization of service providers, while enhancing our ability to invest in innovative technology opportunities to further propel our growth.

- Reducing costs in purchased goods and services. Purchasing initiatives will focus on rationalizing suppliers, leveraging the approximately \$16 billion of goods and services that Pfizer purchases annually, improving demand management to optimize levels of outside services needed and strategic sourcing from lower-cost sources. For example, savings from demand management will be derived in part from reductions in travel, entertainment, consulting and other external service expenses. Facilities savings are being found in site rationalization, energy conservation, and renegotiated service contracts.

REVENUES

Total revenues decreased 5% in the third quarter and were flat in the first nine months of 2005, as compared to the same periods in 2004. The revenue decrease reflects the loss of exclusivity of key products and regulatory actions on the selective COX-2 inhibitors and other nonspecific non-steroidal anti-inflammatory drug (NSAID) products, which has resulted in a significant decline in prescription volume in the arthritis market. The decrease also reflects lower prescription growth and increased competition in key markets in the U.S., such as the lipid-lowering market, where the rate of growth in the third quarter declined significantly versus the first half of the year; and the erectile-dysfunction market, which has been in decline compared to 2004. In addition, although we anticipate a positive long-term impact of our initiative designed to increase the efficiency of our U.S. Human Health field force through stronger alignment with our customers (completed in September 2005), the short-term impact was a tempering of revenue performance in the third quarter. Partially offsetting these impacts in the first nine months of 2005 was the solid performance in the aggregate of the balance of our broad portfolio of patent-protected medicines.

Changes in foreign exchange rates increased revenues in the third quarter of 2005 by \$175 million, or 1.4%, and increased revenues in the first nine months of 2005 by \$909 million, or 2.4%, compared to the same periods in 2004. The foreign exchange impact on the third quarter and first nine months of 2005 revenue comparisons to the same periods in 2004 was due to the weakening of the U.S. dollar relative to many foreign currencies, especially the euro. We expect 2005 revenues for the full year, at current foreign exchange rates, to evidence a modest decline relative to 2004, although a somewhat larger decline than previously anticipated, reflecting lower U.S. Human Health revenues.

The impact of price changes on revenues was 3.2% in the third quarter of 2005 and 2.8% in the first nine months of 2005.

The loss of patent protection with respect to any of our major products could have a material adverse effect on revenue and net income. We expect a substantial impact from the loss of exclusivity of certain major products over the next few years.

Deductions from Revenues

As is typical in the pharmaceutical industry, our gross product sales are subject to a variety of deductions, primarily representing rebates and discounts to government agencies, wholesalers and managed care organizations. These deductions represent estimates of the related liabilities and, as such, judgment is required when estimating the impact of these sales deductions on gross sales for a reporting period. Historically, our adjustments to actual have not been material; on a quarterly basis, they generally have been less than 0.5% of Human Health net sales and can result in either a net increase or a net decrease to income.

Rebates under Medicaid and related state programs reduced revenues by \$257 million and \$956 million for the three months and nine months ended October 2, 2005 and \$338 million and \$1.0 billion for the three months and nine months ended September 26, 2004. Performance-based contracts also provide for rebates to several customers. Contract rebates reduced revenues by \$513 million and \$1.7 billion for the three months and nine months ended October 2, 2005 and \$501 million and \$1.5 billion for the three months and nine months ended September 26, 2004. These contracts are with managed care customers, including health maintenance organizations and pharmacy benefit managers, who receive rebates based on the achievement of contracted performance terms for products. Rebates are product-specific and, therefore, for any given year are impacted by the mix of products sold. Chargebacks (primarily discounts to federal government agencies) reduced revenues by \$324 million and \$916 million for the three months and nine months ended October 2, 2005 and \$290 million and \$864 million for the three months and nine months ended September 26, 2004.

Our accruals for Medicaid rebates, contract rebates and chargebacks totaled \$1.7 billion at October 2, 2005 and December 31, 2004.

Revenues by Country

Revenues by country for the third quarter and first nine months of 2005 and the changes from the same periods in 2004 follow:

(millions of dollars)	Third Quarter				
	2005	% of Revenues	2004	% of Revenues	% Change
United States	\$ 6,395	52.5%	\$ 7,377	57.5%	(13)%
Japan	848	7.0	760	5.9	12

Human Health

Pfizer's Human Health business continued to show solid performance in many of our products, although challenges to revenue more than offset that performance.

Pfizer's Human Health worldwide revenues declined 7% in the third quarter of 2005 compared to the third quarter of 2004 and 1% year-to-date. In the U.S., Human Health revenues declined 15% in the third quarter of 2005 compared to the third quarter of 2004 and 9% year-to-date. The loss of exclusivity on key products (primarily Neurontin) has resulted in a decline in third-quarter worldwide revenues of approximately \$800 million and year-to-date worldwide revenues of approximately \$2.4 billion in comparison to the same periods in the prior year. The regulatory actions relating to Celebrex and the suspension of sales of Bextra have contributed to an additional decline in third-quarter 2005 selective COX-2 inhibitor worldwide revenues of \$754 million (down 67%) and year-to-date selective COX-2 inhibitor worldwide revenues of \$2.0 billion (down 62%) in comparison to the same periods in the prior year.

The third quarter of 2005 was also impacted by the overall market decline for branded prescriptions in the U.S. Branded prescriptions in the U.S. declined 3% in the third quarter of 2005 relative to the third quarter of 2004. The third quarter of 2005 also exhibited a significant change in growth trends relative to the first half of the year in a number of U.S. therapeutic markets. Examples include the branded statins market, where total prescriptions grew 7% in the third quarter versus 10% in the first half of 2005, and the erectile-dysfunction market, with total prescriptions declining 7% in the third quarter versus zero growth in the first half of 2005.

Revenue information for several of our major Human Health products, which includes three additional business days in our fiscal calendar in the first quarter and nine months of 2005 compared to the same periods in 2004, follows:

(millions of dollars) Product Primary Indications		Third Quarter		First Nine Months	
		2005	% Change from 2004	2005	% Change from 2004
Cardiovascular and metabolic diseases:					
Lipitor	Reduction of LDL cholesterol	\$2,897	6 %	\$8,829	16 %
Norvasc	Hypertension	1,131	9	3,462	8
Cardura	Hypertension/Benign prostatic hyperplasia	132	(12)	441	(4)
Accupril/Accuretic	Hypertension/Congestive heart failure	77	(51)	250	(50)

** Represents direct sales under license agreement with Eisai Co., Ltd.

M+ Change greater than one-thousand percent.

Certain amounts and percentages may reflect rounding adjustments.

Selected Product Descriptions:

- **Lipitor**, for the treatment of elevated cholesterol levels in the blood, is the most widely used treatment for lowering cholesterol and the best-selling pharmaceutical product of any kind in the world. In our international markets, Lipitor showed revenue growth of 14% in the third quarter of 2005, compared to the third quarter of 2004. In the U.S., Lipitor revenues grew 1% in the third quarter of 2005, compared to the third quarter of 2004. This performance reflects in part an unexpectedly rapid slowdown in the U.S. lipid-lowering market as a whole and marginal Lipitor prescription share erosion during the quarter of one percentage point. Evidence of the substantial lipid-market deceleration can be seen in category new-prescription growth rates for the third quarter of 8% versus first-half growth of 17%, representing more than a 50% drop from robust trends exhibited during the first six months of this year. Despite this market slowdown, Lipitor still accounts for more than 40% of all lipid-lowering prescriptions, a 26.4% advantage versus its next nearest competitor.

In September 2005, the FDA approved Lipitor use to reduce the risk of stroke and myocardial infarction in patients with type 2 diabetes. The FDA's decision was based on the findings of the Collaborative Atorvastatin Diabetes Study (CARDS), a landmark trial of more than 2,800 patients with type 2 diabetes, near-normal cholesterol, and at least one other risk factor, such as high blood pressure or smoking. CARDS showed that patients using Lipitor experienced 48% fewer strokes than those on placebo. The CARDS study's steering committee stopped the trial nearly two years earlier than planned because of the clinical benefits among patients who took Lipitor.

In addition, the FDA expanded the Lipitor label to include data on the reduction in the incidence of stroke in patients with multiple risk factors, as shown in the Anglo-Scandinavian Cardiac Outcomes Trial (ASCOT) clinical trial. The ASCOT trial found that Lipitor reduced the relative risk of stroke by 26% compared to placebo. The study involved people with normal or borderline cholesterol and no prior history of heart disease with controlled high blood pressure and at least three other risk factors for heart disease, such as family history, age over 55, smoking, diabetes, and obesity. Patients with multiple risk factors, including diabetes, face a greater threat of heart attack and stroke. Reducing their risk of such cardiovascular events is extremely important.

- **Norvasc** is the world's most-prescribed branded medicine for treating hypertension. It achieved an increased rate of growth in sales in the first nine months of 2005 compared to same period in 2004 (8% in 2005 as compared to 4% in 2004), despite patent expirations in many European Union (E.U.) countries. Norvasc maintains exclusivity in many major markets globally, including the U.S., Japan, Canada and Australia.
- **Zoloft** is the most-prescribed antidepressant in the U.S. It is indicated for the treatment of major depressive disorder, panic disorder, obsessive-compulsive disorder (OCD) in adults and children, post-traumatic stress disorder (PTSD), premenstrual dysphoric disorder (PMDD) and social anxiety disorder (SAD). Zoloft is approved for acute and long-term use in all of these indications, with the exception of PMDD, and is the only approved agent for the long-term treatment of PTSD and SAD, an important differentiating feature as these disorders tend to be chronic.

In the U.S., in February 2005, Pfizer implemented FDA instructions that require the makers of all currently marketed antidepressants, including tricyclic agents, monoamine oxidase (MAO) inhibitors, selective serotonin reuptake inhibitors such as Zoloft, selective norepinephrine reuptake inhibitors and atypical antidepressants, to include a black-box warning that antidepressants increased the risk of suicidal thinking and behavior in children and adolescents in pooled, short-term studies. In the nine completed clinical trials of Zoloft involving children and adolescents, which included studies of Zoloft in children diagnosed with depression, OCD, or both, no suicides occurred. The trials found no statistically significant differences between Zoloft-treated children and adolescents and placebo controls in their rates of suicide attempts or ideation.

- **Neurontin**, for use in adjunctive therapy for epilepsy, is also approved in more than 60 markets for the treatment of a range of neuropathic pain conditions. Neurontin has also been approved for the management of post-herpetic neuralgia (PHN), a painful condition that affects many people in the aftermath of the viral infection commonly known as shingles. Neurontin was the first oral medication approved in the U.S. for the treatment of PHN.

In the latter half of 2004, Ivax Corporation (Ivax), Alparma Inc. (Alparma) and Teva Pharmaceuticals Industries Ltd. (Teva) launched generic versions of Neurontin (gabapentin) at-risk, despite ongoing patent litigation. We are aggressively pursuing our claims of patent infringement against Ivax, Alparma, Teva and other generic manufacturers. (See Part II, Item 1, *Legal Proceedings*.) Following those at-risk launches, we launched generic gabapentin through Greenstone, our U.S. generic pharmaceutical subsidiary. However, the introduction of generic versions of gabapentin caused a 78% reduction in Neurontin sales for the first nine months of 2005 as compared to the same period in 2004.

- **Geodon**, a psychotropic agent, is a dopamine and serotonin receptor antagonist indicated for the treatment of schizophrenia and acute manic or mixed episodes associated with bipolar disorder. Available in both an oral capsule and rapid-acting intramuscular formulation, Geodon has been launched in 54 countries, where more than six million prescriptions have been written for more than one million patients worldwide. In the U.S., Geodon hit an all-time U.S. new prescription share high of 6% in the third quarter and is now the second-fastest-growing atypical anti-psychotic medication.

The Clinical Antipsychotic Trials of Intervention Effectiveness schizophrenia study, supported by the National Institute of Mental Health and recently published in the New England Journal of Medicine, confirms that Geodon is an effective anti-psychotic and is less likely to worsen weight, lipids, and glucose metabolism than other agents. In fact, Geodon was associated with some improvement in these parameters. These findings are noteworthy because of the higher prevalence of metabolic issues among patients with schizophrenia and are consistent with previous Pfizer-sponsored clinical trials involving Geodon.

- **Lyrica** was approved by the FDA in June 2005 for adjunctive therapy for adults with partial onset seizures. This latest indication builds on the earlier FDA approval of Lyrica for two of the most common forms of neuropathic pain -- diabetic peripheral neuropathy, a chronic neurologic condition affecting nearly three million Americans, and post-herpetic neuralgia. Lyrica was launched in the U.S., Canada, and Italy in September 2005 and is now approved in more than 50 countries and is currently available in more than 25 markets. Market penetration has been rapid; after one full year of Lyrica sales, Germany and the U.K. posted Lyrica sales shares of 14.2% and 9.5%, respectively, in the anti-epileptic drug market, surpassing those of many established competitors in both countries. Clinical evidence favorable to Lyrica also continues to grow. The September 2005 edition of *Epilepsia* focused on the medication's lack of interactions with other drugs. Additionally, at the August 2005 meeting of the International Epilepsy Congress, data from an independently conducted meta-analysis showed Lyrica to be among the best in class for treatment of drug-resistant epilepsy.
- **Celebrex and Bextra**

On April 7, 2005, the FDA announced a decision to require boxed warnings of potential cardiovascular risk for all COX-2 pain relievers and all prescription NSAIDs, including older non-specific drugs such as ibuprofen and naproxen. On July 29, 2005, Pfizer and the FDA finalized the label changes for Celebrex. The final label contains a boxed warning of potential serious cardiovascular and gastrointestinal risks for Celebrex that are consistent with warnings for all other prescription NSAIDs. The boxed warning provides that Celebrex is contraindicated for patients who recently have undergone coronary artery bypass graft surgery. The label recommends that Celebrex be prescribed at the lowest effective dose for the shortest duration consistent with individual patient treatment goals. Pfizer is continuing to conduct additional clinical studies evaluating the benefits and risks of Celebrex.

The market for pain relievers has shown considerable change since the withdrawal of Vioxx in September 2004. Sales of Celebrex began to decline in the late 2004. However, following regulatory reviews of these medicines in February 2005 in both the U.S. and the E.U., the market for prescription pain relievers indicated lower, but stabilizing levels compared to pre-Vioxx withdrawal levels. Revenues from Celebrex in 2005, prior to the FDA's decision in April 2005, were already expected to be significantly lower than in 2004.

In September 2005, with full implementation of revised labeling, Pfizer began to focus renewed attention on Celebrex, with the goal of making the pain reliever available to increased numbers of patients. Celebrex is supported by a large body of scientific and clinical-trial evidence of efficacy and safety accumulated over 10 years in more than 40,000 patients worldwide. In July, the FDA approved a sixth indication for Celebrex -- ankylosing spondylitis -- a form of spinal arthritis that affects more than one million people in the U.S.

In June 2005, the Committee for Human Medicinal Products (CHMP) concluded its COX-2 referral process and recommended that both Celebrex and Dynastat (parecoxib) remain available to patients. The European Medicines Evaluation Agency (EMA) has required new labeling for all COX-2 drugs that includes a restriction on use for patients with established heart disease or stroke and additional warnings to physicians regarding use in patients with cardiovascular risk factors. This new labeling was implemented for all COX-2 medicines across the E.U. in July of 2005.

Further, the FDA decided that while Bextra's cardiovascular risk could not be differentiated from other NSAIDs, the additional, increased risk of rare but serious skin reactions associated with Bextra, already described in its label, warranted its withdrawal from the market. In 2004, we recorded \$1.3 billion in revenue for Bextra. We respectfully disagree with the FDA's position regarding the relative risk/benefit profile of Bextra. However, in deference to the regulatory agency's view, we suspended sales of the medicine pending further discussions with the FDA. In addition, at the request of European and other regulators, we suspended sales of Bextra in the E.U., Canada and many other markets around the world.

In connection with the decision to suspend sales of Bextra in the U.S., the E.U., and certain other markets, we recorded certain charges totaling \$1.2 billion (\$762 million, net of tax) in the first nine months of 2005. These pre-tax charges included \$1.1 billion related to the impairment of developed technology rights associated with Bextra and \$7 million related to the write-off of machinery and equipment, both of which are included in *Other (income)/deductions-net*; \$56 million in write-offs of inventory and exit costs, included in *Cost of sales*; \$8 million related to the costs of administering the suspension of sales, included in *Selling, informational and administrative expenses*; and \$212 million for an estimate of customer returns, primarily included against *Revenues*. Substantially all of these charges were recorded in the first quarter of 2005.

- **Zithromax**, whose composition of matter patent in the U.S. expires in November 2005, remained the number-one prescribed oral antibiotic during the third quarter of 2005, despite the end of active sales promotion in July, when the U.S. sales force began promoting Zmax. Sales in the U.S. are expected to be adversely affected by the loss of market exclusivity beginning in November 2005.
- **Zmax**, a single-dose, sustained-release form of azithromycin, was introduced in the U.S. in July 2005. Zmax has surpassed all other recent antibiotic introductions (including line extensions) in week 10 prescription volume, even though the Zmax launch occurred in the summer, before the beginning of the respiratory season. Single-dose Zmax delivers higher azithromycin serum concentrations during the first 24 hours than Zithromax and assures complete compliance compared to multi-dose regimes, demonstrating a clear benefit of the new medication. A supplemental Marketing Authorization Application (MAA) for Zmax was approved in Europe in September 2005.
- **Diflucan** is a systemic antifungal. The decrease in sales in the first nine months of 2005 compared to the same period in 2004 is mainly due to loss of exclusivity in the U.S. in July 2004.
- **Viagra** remains the leading treatment for erectile dysfunction and one of the world's most recognized pharmaceutical brands, with more than 63% of U.S. sales in its market of phosphodiesterase-5 (PDE5) inhibitors through August 2005, even as the entire market's sales were down for the period.

In addition, Viagra faces aggressive competition from other global brands. Year-to-date 2005 Viagra sales are ahead 1% worldwide over last year, and third-quarter 2005 sales are down 4% from the same period last year. Pfizer plans to introduce new branded advertising compliant with our direct-to-consumer advertising guidelines to highlight the unique clinical profile for Viagra, as well as new unbranded advertising to address the needs of potential new patients who may be hesitant to try any medication for erectile dysfunction.

On July 8, 2005, the FDA approved an update to the Viagra label to reflect rare post-marketing reports of non-arteritic anterior ischemic optic neuropathy (NAION) in patients taking PDE5 inhibitor medications. The updated label notes that in rare instances, men taking PDE5 inhibitors, including Viagra, reported a sudden decrease or loss of vision in one or both eyes and that it is not possible to determine whether these events are related directly to these medicines, to the patient's underlying vascular risk factors, to a combination of these factors, or other factors. Most of the reported NAION cases occurred in Viagra users with underlying anatomic or vascular risk factors associated with the development of NAION.

- **Camptosar** is a semisynthetic camptothecin derivative that works by inhibiting the topoisomerase 1 enzyme, which is involved in cancer cell replication. Camptosar is indicated as first-line therapy for metastatic colorectal cancer in combination with 5-fluorouracil and leucovorin. It is also indicated as second-line therapy for patients in whom

metastatic colorectal cancer has recurred or progressed despite following initial fluorouracil-based therapy. Camptosar is for intravenous use only. Revenue growth of 85% in the first nine months of 2005 compared to the same period in 2004 was impacted in part by Pfizer's acquisition of marketing rights to Campto/Camptosar in Europe and Asia (except Japan) in late 2004. Among current oncology medications, the National Comprehensive Cancer Network, an alliance of 19 of the world's leading cancer centers, has issued guidelines recommending Camptosar as an option across all lines of treatment for advanced colorectal cancer.

- **Xalatan/Xalacom**, a prostaglandin analogue used to lower the intraocular pressure associated with glaucoma and ocular hypertension, is the most-prescribed branded glaucoma medicine in the world. Clinical data showing its advantages in treating intra-ocular pressure compared with beta blockers should support the continued growth of this important medicine.
- **Zyrtec** provides strong, rapid and long-lasting relief for seasonal and year-round allergies and hives with once-daily dosing. Zyrtec continues to be the most-prescribed antihistamine in the U.S. in a challenging market. The increase in sales in the first nine months of 2005 compared to the same period in 2004 is attributable to stabilization in the prescription antihistamine market subsequent to the Rx to over-the-counter switch of loratadine as the majority of the managed care plans have completed their formulary tier changes in this category.
- **Macugen**, a treatment for neovascular (wet) age-related macular degeneration, is a product whose revenues are included in alliance revenues. It was launched in the U.S. in January 2005 and launched in Canada in September 2005. We anticipate that the European Commission will grant marketing authorization for Macugen during the fourth quarter of 2005.
- **Caduet**, a single pill combining Lipitor and Norvasc, has successfully completed the Mutual Recognition Procedure (MRP) in the E.U. and is the first multi-target combination product to receive a broad approval for prevention of cardiovascular events in the E.U. Caduet is now approved in the following E.U. countries: France, Spain, Portugal, Austria, Iceland, Luxembourg, Cyprus, the Czech Republic, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It is indicated for prevention of cardiovascular events in hypertensive patients with three concomitant cardiovascular risk factors, normal to mildly elevated cholesterol levels, without clinically evident coronary heart disease, where combined use of amlodipine and low dose atorvastatin is considered appropriate, and in accordance with current treatment guidelines. The Caduet Marketing Authorization application has been officially withdrawn from the MRP in Belgium, Denmark, Estonia, Ireland, Italy, Netherlands, Norway, the U.K., Sweden, Germany, Finland and Greece. These countries had reservations as to whether the benefit of Caduet, the first cardiovascular, multi-target, fixed combination product, had been demonstrated, based upon current European regulatory guidelines for fixed combination products. As a result, these countries did not mutually recognize the proposed label and Pfizer decided to withdraw the application from these countries. Pfizer will continue to explore regulatory approval opportunities for Caduet.

Consumer Healthcare

Revenues of our Consumer Healthcare business, which include three additional business days in our fiscal calendar in the first quarter and nine months of 2005 compared to the same periods in 2004, follow:

(millions of dollars)	Third Quarter			First Nine Months		
	2005	2004	% Change	2005	2004	% Change
Consumer Healthcare	\$ <u>921</u>	\$ <u>851</u>	8%	\$ <u>2,835</u>	\$ <u>2,524</u>	12%

The increase in Consumer Healthcare revenues in the third quarter and first nine months of 2005, as compared to the same periods in 2004, was attributable to:

- the 4% increase in the third quarter and 13% increase in the first nine months of 2005 in sales of Listerine mouthwash, which benefited from the U.S. launch of Listerine Whitening in April 2005, as well as continued strong performance in international markets;
- growth from Sudafed and other upper-respiratory products, Zantac, and tobacco dependence products;
- inclusion of Purell sales in 2005 following the acquisition of the Purell brand in November 2004; and
- the favorable impact of the weakening of the U.S. dollar relative to many foreign currencies.

Animal Health

Revenues of our Animal Health business, which include three additional business days in our fiscal calendar in the first quarter and nine months of 2005 compared to the same periods in 2004, follow:

(millions of dollars)	Third Quarter			First Nine Months		
	2005	2004	% Change	2005	2004	% Change
Livestock products	\$ 301	\$ 287	5%	\$ 958	\$ 840	14%
Companion animal products	202	188	8	618	547	13
Total Animal Health	<u>\$ 503</u>	<u>\$ 475</u>	6	<u>\$1,576</u>	<u>\$1,387</u>	14

The increase in Animal Health revenues in the third quarter and first nine months of 2005, as compared to the same periods in 2004, was attributable to:

- in livestock, the continued performance of Draxxin (for treatment of respiratory disease in cattle and swine) in Europe and in the U.S., as well as Spectramast (antibiotic formulated to treat clinical mastitis) which was launched in the U.S. in May 2005, partially offset by a slowdown in the third quarter due to delay in the U.S. cattle season;
- in companion animal, increased promotional activities throughout our markets resulted in Revolution and Clavamox growing at double-digit rates for the first nine months of 2005, and the launch of Simplicef (small animal anti-infective) in the U.S. in the fourth quarter of 2004; and
- the favorable impact of the weakening of the U.S. dollar relative to many foreign currencies.

COSTS AND EXPENSES

Cost of Sales

Cost of sales grew 16% in the third quarter of 2005 and 19% for the first nine months of 2005, and increased as a percentage of revenues, as compared with the prior year periods. The increases reflect unfavorable geographic, segment and product mix, and adverse changes in production volume, among other factors. In the first quarter of 2005, we also recorded charges for write-offs of inventory and exit costs related to the suspension of Bextra sales (see Note 2, *Asset Impairment Charge and Other Costs Associated with the Suspension of Bextra Sales*).

Cost of sales as a percentage of revenues will remain under pressure throughout the remainder of 2005.

Selling, Informational and Administrative Expenses

Selling, informational and administrative expenses decreased 3% in the third quarter and were flat in the first nine months of 2005, as compared to the same periods in 2004, reflecting an increase in merger-related synergies, and the impact of the Company's AtS productivity initiative, partially offset by the unfavorable impact of foreign exchange.

Research and Development Expenses

Research and development (R&D) expenses decreased 6% in the third quarter and increased 1% in the first nine months of 2005, as compared to the same periods in 2004. The decline in the third quarter of 2005 reflects the initial benefits associated with the AtS productivity initiative and changes in year-over-year timing of various expenses.

Product Developments

We continue to invest in R&D to provide future sources of revenue through the development of new products, as well as through additional uses for existing in-line and alliance products. We have a broad and deep pipeline of medicines in development. However, there are no assurances as to when, or if, we will receive regulatory approval for additional indications for existing products or any of our other products in development.

Certain significant regulatory actions by, and filings pending with, the FDA and other regulatory authorities follow:

Recent FDA Approvals:

Product	Indication	Date Approved
Aromasin	Treatment of early breast cancer in post-menopausal women	October 2005
Lipitor	Reduce the risk of stroke and myocardial infarction in patients with type 2 diabetes	September 2005
Norvasc	For treatment of angiographically documented coronary artery disease	September 2005
Celebrex	For the relief of the signs and symptoms associated with ankylosing spondylitis	July 2005
Lyrica	Add-on therapy for adult epilepsy patients with partial onset seizures	June 2005
Revatio	Oral treatment for adult pulmonary arterial hypertension (PAH)	June 2005
Zmax	Single dose version of Zithromax for acute bacterial sinusitis and community-acquired pneumonia.	June 2005
Zyvox	For the treatment of bacterial infections in pediatric patients	May 2005
Depo-SubQ Provera	Subcutaneous formulations to treat pain associated with endometriosis.	March 2005
Ellence	Adjuvant long-term cancer treatment	March 2005

Pending U.S. New Drug Applications (NDAs) and Supplemental Filings:

Product	Indication	Date Submitted
Sutent	Treatment of metastatic renal cell carcinoma and malignant gastrointestinal stromal tumors	August 2005
Anidulafungin	Treatment of candidemia and invasive candidiasis Treatment of esophageal candidiasis	August 2005 May 2005
Aricept	Treatment of severe Alzheimer's disease	August 2005
Genotropin	Treatment of short stature and growth problems resulting from Turner's syndrome	June 2005
Vfend	Pediatric filing	June 2005
Indiplon	Modified-release tablets for treatment of multiple aspects of insomnia Immediate-release capsules for treatment of multiple aspects of insomnia	May 2005 April 2005
Exubera	Inhaled form of insulin for use in adults with type 1 and type 2 diabetes	December 2004
Oporia	Vaginal atrophy	December 2004
Dalbavancin	Treatment of Gram-positive bacterial infections	December 2004
Norvasc	Reduction of cardiovascular risk, including risk of coronary heart disease, myocardial infarction, cardiovascular procedures and strokes	August 2004
Fragmin	Use in oncology patients to reduce cardiac toxicity associated with chemotherapy	March 2004

In September 2005, we received "not-approvable" letters from the FDA for **Oporia** for the prevention of post-menopausal osteoporosis, and **Dynastat** (parecoxib), an injectable prodrug for valdecoxib for the treatment of acute pain. Pfizer plans to discuss these "not-approvable" letters with the FDA.

In September 2005, an FDA advisory committee recommended that the FDA approve **Exubera**, an inhaled form of insulin for use in adults with type 1 and type 2 diabetes. The FDA is not obligated to follow the recommendation of the advisory committee. In October 2005, the FDA extended the review period for Exubera to study more data on the diabetes treatment.

An NDA for **Sutent**, a novel multi-targeted oral compound for treatment of metastatic renal cell carcinoma (mRCC) and malignant gastrointestinal stromal tumors (GIST), was submitted to the FDA on August 10, 2005. The FDA has accepted this submission and granted Sutent priority-review status for this important cancer therapy. Priority designation allows for an expedited review of the NDA filing and is intended for product candidates that may provide a significant improvement compared to marketed products. An MAA for Sutent was also submitted to European regulatory authorities during the quarter.

On September 14, 2005, Pfizer completed the acquisition of Vicuron. **Anidulafungin**, one of the key products acquired in the Vicuron acquisition, is a novel, broad-spectrum antifungal agent of the echinocandin class that is currently under review by the FDA. The filing for the treatment of candidemia/invasive candidiasis has been granted priority-review status. In a Phase 3 trial, anidulafungin demonstrated clinical efficacy greater than fluconazole, including disease due to *Candida glabrata*, with a comparable safety profile in the treatment of candidemia/invasive candidiasis. Pfizer is currently assessing the potential of anidulafungin in treating additional patient populations.

The FDA has designated as approvable the NDA for **Dalbavancin**, a new injectable antibiotic to treat Gram-positive infections, which was also acquired in the Vicuron acquisition. We anticipate a rapid and successful resolution of outstanding issues to allow final NDA approval in the coming months. The addition of these two medications would broaden Pfizer's existing portfolio of anti-infectives, where the Company has a long history of providing patients and physicians with life-saving medicines.

Other Regulatory Approvals and Filings:

Product	Description of Event	Date Approved	Date Submitted
Revatio	Approval in the E.U. for treating PAH Application submitted in Canada for treating PAH	November 2005 --	-- December 2004
Geodon	Approval in the E.U. for treating manic or mixed episodes of moderate severity in bipolar disorder	October 2005	--
Aromasin	Approval in the E.U. for treating early breast cancer in post-menopausal women	August 2005	--
Sutent	Application submitted in the E.U. for the treatment of metastatic renal cell carcinoma and malignant gastrointestinal stromal tumors	--	August 2005
Aricept	Approval in Canada for fast dissolving tablet	July 2005	--
Caduet	Approval in certain E.U. countries for cardiovascular event prevention	July 2005	--
Lyrica	Approval in Canada for neuropathic pain	June 2005	--
Macugen	Approval in Canada and Brazil for age-related macular degeneration (AMD) Application submitted in Switzerland for AMD Application submitted in the E.U. and Australia for AMD	May 2005 -- --	-- January 2005 September 2004
Fragmin	Approval in the E.U. for treatment of deep vein thrombosis in cancer patients	April 2005	--
Vfend	Approval in Japan for treatment of aspergillosis Approval for treatment of serious, invasive, fluconazole-resistant candida infections and first-line treatment of candidemia in non-neutropenic patients was granted in the E.U.	April 2005 January 2005	-- --
Zmax	Application submitted in the E.U. for sustained release	--	October 2004
Genotropin	Application submitted in Japan for treatment of short stature and growth problems	--	July 2004
Neurontin	Application submitted in Japan for epilepsy	--	April 2004
Exubera	Application submitted in the E.U. as an inhaled form of insulin for use in adults with type 1 and type 2 diabetes	--	February 2004

In September and October of 2005, the CHMP of the European Medicines Evaluation Agency issued positive opinions recommending that marketing authorizations be granted by the European Commission for **Macugen** and **Exubera**, respectively. The European Commission is not obligated to follow the opinions of the CHMP. The European Commission is expected to act upon the CHMP recommendations for Macugen by the end of 2005 and Exubera in early 2006.

Ongoing or planned clinical trials for additional uses and dosage forms for our products include:

Product	Indication
Celebrex	Sporadic adenomatous polyposis - a precancerous condition caused by growths (polyps) in the intestines
Camptosar IV	Adjuvant colorectal cancer Gastric cancer
Geodon	Bipolar relapse prevention
Macugen	Diabetic Macular Edema
Xalatan (new delivery device)	Ocular hypertension
Zyvox	Catheter-related infections Bone and joint infections

Drug candidates in late-stage development include varenicline, a nicotine-receptor partial agonist for smoking cessation, which has concluded Phase 3 trials; maraviroc (UK-427,857), a CCR-5 receptor antagonist for HIV; torcetrapib/atorvastatin, a combination CETP inhibitor/statin for heart disease; asenapine, for schizophrenia and bipolar disorder, under co-development with Akzo Nobel's Organon healthcare unit; and Zithromax/chloroquine for treatment of malaria. The Company anticipates filing an NDA with the FDA for varenicline by the end of 2005. The FDA has granted fast-track designation for maraviroc's clinical development program.

Torcetrapib/atorvastatin, which combines the new chemical entity torcetrapib (a CETP inhibitor discovered by Pfizer that raises HDL-cholesterol) with atorvastatin (Lipitor), is continuing in global Phase 3 clinical trials. This comprehensive 12,000-subject development program includes three comparative atherosclerotic imaging trials (a coronary intravascular ultrasound study and two carotid ultrasound studies), as well as a full range of blood-lipid efficacy studies comparing torcetrapib/atorvastatin to Lipitor, other statins and fibrates. In addition to these Phase 3 studies, the development program includes a definitive mortality and morbidity trial that is enrolling 13,000 patients.

Despite effective treatments, cardiovascular disease remains the number one killer worldwide with a residual relative risk of 60 to 70% after treatment with statins. Therefore, the primary objective of the torcetrapib/atorvastatin development program is to provide clear evidence that substantially raising HDL-cholesterol and further lowering LDL-cholesterol can reduce cardiovascular risk beyond what can be achieved with current treatments. Torcetrapib will be developed with atorvastatin in order to rigorously test this hypothesis and the new CETP inhibition mechanism of action. This development program represents a major commitment by Pfizer to significantly advance the understanding of lipids and atherosclerosis in order to provide an important new tool for patients and prescribers in preventing and treating the global burden of cardiovascular disease.

The clinical development program for the selective cytotoxic agent edotecarin was terminated in the first quarter of 2005; development rights for edotecarin were returned to Banyu Pharmaceuticals, Inc.

Pfizer's participation in the clinical development programs for capravirine, a non-nucleoside reverse transcriptase inhibitor for HIV, and Daxas, a phosphodiesterase-4 inhibitor for chronic obstructive pulmonary disease and asthma, was terminated in the second quarter 2005; development rights were returned to Shiongi & Co. Ltd and Altana Pharma, Inc. respectively.

Additional product-related programs are in various stages of discovery and development.

Merger-Related In-Process Research and Development Charges

The estimated value of merger-related in-process research and development charges (IPR&D) is expensed at the acquisition date. In 2005, we expensed \$1.7 billion of IPR&D, primarily related to our acquisition of Vicuron Pharmaceuticals, Inc. on September 14, 2005 (\$1.4 billion) and our acquisition of Idun Pharmaceuticals, Inc. on April 12, 2005 (\$250 million). In 2004, we expensed \$955 million of IPR&D, primarily related to our acquisition of Esperion Therapeutics, Inc. on February 10, 2004.

Adapting to Scale Initiative

We incurred the following costs in connection with our Adapting to Scale (AtS) initiative, which was announced in the second quarter of 2005:

	Three Months Ended Oct. 2, 2005	Nine Months Ended Oct. 2, 2005
(millions of dollars)		
Implementation costs ^(a)	\$ 104	\$ 136
Restructuring charges ^(b)	153	174
Total AtS costs	<u>\$ 257</u>	<u>\$ 310</u>

(a) Included in *Cost of sales* (\$36 million), *Selling, informational and administrative expenses* (\$60 million), and *Research and development expenses* (\$8 million) for the three months ended October 2, 2005, and included in *Cost of sales* (\$37 million), *Selling, informational and administrative expenses* (\$81 million), and *Research and development expenses* (\$18 million) for the nine months ended October 2, 2005.

(b) Included in *Restructuring charges and merger-related costs*.

In connection with the AtS initiative, Pfizer management has performed a comprehensive review of our processes, organizations, systems and decision-making procedures, in a company-wide effort to improve performance and efficiency. We expect the costs associated with this multi-year effort to continue through 2008 and to total approximately \$4 billion to \$5 billion, on a pre-tax basis. The actions associated with the AtS initiative will include restructuring charges, such as asset impairments, exit costs and severance costs (including any related impacts to our benefit plans, including settlements and curtailments) and associated implementation costs, such as accelerated depreciation charges, primarily associated with plant network optimization efforts, and expenses associated with system and process standardization and the expansion of shared services.

Through October 2, 2005, the restructuring charges primarily relate to employee termination costs at our manufacturing facilities in North America and the implementation costs primarily relate to system and process standardization and to expansion of shared services.

The components of restructuring costs associated with AtS follow:

	Nine Months Ended Oct. 2, 2005	Utilization Through Oct. 2, 2005	Accrual at Oct. 2, 2005 ^(a)
(millions of dollars)			
Employee termination costs	\$ 106	\$ 49	\$ 57
Asset impairments	62	62	--
Other	6	--	6
	<u>\$ 174</u>	<u>\$ 111</u>	<u>\$ 63</u>

(a) Included in *Other current liabilities*.

During the three months ended October 2, 2005, we expensed \$85 million for *Employee termination costs*, \$62 million for *Asset impairments* and \$6 million in *Other*. Through October 2, 2005, *Employee termination costs* represent the approved reduction of the workforce by 922 employees, mainly in manufacturing, sales and research. We notified affected individuals and 903 employees were terminated as of October 2, 2005. *Employee termination costs* are recorded as incurred and include accrued severance benefits, pension and postretirement benefits. *Asset impairments* primarily include charges to write down intangible assets, and property, plant and equipment. *Other* primarily includes costs to exit certain activities.

Merger-Related Costs

We incurred the following merger-related costs primarily in connection with our acquisition of Pharmacia Corporation (Pharmacia), which was completed on April 16, 2003:

(millions of dollars)	Three Months Ended		Nine Months Ended	
	Oct. 2, 2005	Sept. 26, 2004	Oct. 2, 2005	Sept. 26, 2004
Integration costs ^(a)	\$ 93	\$ 113	\$ 390	\$ 367
Restructuring costs ^(a)	61	77	232	359
Total merger-related costs	<u>\$ 154</u>	<u>\$ 190</u>	<u>\$ 622</u>	<u>\$ 726</u>

^(a) Included in *Restructuring charges and merger-related costs*.

In connection with the acquisition of Pharmacia, Pfizer management approved plans to restructure and integrate the operations of both legacy Pfizer and legacy Pharmacia to combine operations, eliminate duplicative facilities and reduce costs. Total merger-related expenditures expected to be incurred during 2003 through 2005 to achieve anticipated synergies are about \$5.1 billion, on a pre-tax basis, with \$5.0 billion incurred through October 2, 2005. The restructuring of our operations as a result of our acquisition of Pharmacia includes consulting, systems integrations, severance, costs of vacating duplicative facilities, contract termination and other exit costs.

Through April 15, 2004, we recorded restructuring costs associated with employee terminations and exiting certain activities of legacy Pharmacia as liabilities assumed in the purchase business combination and recorded an increase to goodwill. Changes to previous estimates of restructuring costs included as part of the purchase allocation of Pharmacia are recorded as a reduction to goodwill or an expense to operations, as appropriate. Restructuring costs incurred for legacy Pfizer and restructuring costs incurred after April 15, 2004 for legacy Pharmacia are charged to the results of operations.

The components of merger-related restructuring costs associated with legacy Pfizer and legacy Pharmacia follow:

(millions of dollars)	Total	Utilization Through Oct. 2, 2005 ^(a)	Accrual at Oct. 2, 2005 ^(b)
Costs capitalized through April 15, 2004:			
Employee termination costs	\$ 1,535	\$ 1,502	\$ 33
Other	624	517	107
	<u>\$ 2,159</u>	<u>\$ 2,019</u>	<u>\$ 140</u>
Costs expensed:			
Employee termination costs	\$ 590	\$ 508	\$ 82
Asset impairments	421	421	--
Other	96	74	22
	<u>\$ 1,107</u>	<u>\$ 1,003</u>	<u>\$ 104</u>

^(a) Includes insignificant adjustments to original amounts established.

^(b) Included in *Other current liabilities*.

During the three months ended October 2, 2005 and September 26, 2004, we expensed \$1 million and \$53 million for *Employee termination costs*, \$53 million and \$8 million for *Asset impairment*, and \$7 million and \$16 million in *Other*. During the first nine months of 2005 and 2004, we expensed \$73 million and \$201 million for *Employee termination costs*, \$131 million and \$122 million for *Asset impairment*, and \$22 million and \$31 million in *Other*. Through October 2, 2005, *Employee termination costs* represent the approved reduction of the legacy Pfizer and legacy Pharmacia work force by 17,086 employees, mainly in corporate, manufacturing, distribution, sales and research. We notified affected individuals and 16,385 employees were terminated as of October 2, 2005. *Employee termination costs* are recorded as incurred and include accrued severance benefits and costs associated with change-in-control provisions of certain Pharmacia employment contracts. *Asset impairments* primarily include charges to write down property, plant and equipment. *Other* primarily includes costs to exit certain activities of legacy Pfizer and legacy Pharmacia.

Other (Income)/Deductions - Net

In the first nine months of 2005, we recorded impairment charges of \$1.1 billion related to the developed technology rights for Bextra, a selective COX-2 inhibitor, and \$7 million related to the write-off of machinery and equipment (see Note 2, *Asset Impairment Charge and Other Costs Associated with the Suspension of Bextra Sales*), both of which are included in *Other (income)/deductions - net*.

In addition, in connection with the suspension of Bextra sales, we recorded \$56 million in write-offs of inventory and exit costs, included in *Cost of sales*; \$8 million related to the costs of administering the suspension of sales, included in *Selling, informational and administrative expenses*; and \$212 million for an estimate of customer returns, primarily included against *Revenues*. Substantially all of these charges were recorded in the first quarter of 2005.

In the third quarter of 2004, Pfizer recorded a litigation-related charge of \$369 million related to the resolution of claims against Quigley Company, Inc., a wholly owned subsidiary of Pfizer, which is included in *Other (income)/deductions - net*.

PROVISION FOR TAXES ON INCOME

In the first nine months of 2005, we recorded an income tax charge of \$1.7 billion, included in *Provision for taxes on income*, in connection with our decision to repatriate about \$36.7 billion of foreign earnings in accordance with the *American Jobs Creation Act of 2004* (the Jobs Act). In the first quarter of 2005, we recorded an initial estimated income tax charge of \$2.2 billion based on the decision to repatriate \$28.3 billion of foreign earnings. In the second quarter of 2005, we reduced our original estimate of the tax charge by \$863 million and revised the repatriation of foreign earnings to \$28.1 billion, principally as a result of guidance issued by the U.S. Treasury in May 2005. In the second quarter of 2005, we also recorded an additional tax charge of \$373 million, primarily due to our decision to repatriate an additional \$8.6 billion of foreign earnings.

In the second quarter of 2005, we recorded a tax benefit of \$586 million, primarily related to the resolution of certain tax positions.

Our effective tax rate for continuing operations was 34.4% for the first nine months of 2005 compared to 19.4% in the same period in 2004. The increase in the effective tax rate for the first nine months of 2005 is due to the previously mentioned tax charge associated with the repatriation of foreign earnings and a \$1.7 billion non-deductible charge for IPR&D, primarily relating to our acquisition of Vicuron Pharmaceuticals, Inc. and Idun Pharmaceuticals, Inc., partially offset by the tax benefit of \$586 million primarily related to the resolution of certain tax positions. Income taxes in the first nine months of 2004 were impacted by a \$955 million non-deductible charge for IPR&D, primarily relating to our acquisition of Esperion.

As of October 2, 2005, we intend to continue to permanently reinvest the earnings of our international subsidiaries and, therefore, we have not recorded a U.S. tax provision on the remaining amount of unremitted earnings.

ADJUSTED INCOME

General Description of Adjusted Income Measure

Adjusted income is an alternative view of performance used by management and we believe that investors' understanding of our performance is enhanced by disclosing this performance measure. The Company reports Adjusted income in order to portray the results of our major operations--the discovery, development, manufacture, marketing and sale of prescription medicines for humans and animals, as well as our over-the-counter products--prior to considering certain income statement elements. We have defined Adjusted income as Net income before discontinued operations, significant impact of purchase accounting for acquisitions, merger-related costs and certain significant items. The Adjusted income measure is not, and should not be viewed as, a substitute for U.S. GAAP Net income.

The Adjusted income measure is an important internal measurement for Pfizer. We measure the performance of the overall Company on this basis. The following are examples of how the Adjusted income measure is utilized.

- Senior management receives a monthly analysis of the operating results of our Company that is prepared on an Adjusted income basis;
- The annual budgets of our Company are prepared on an Adjusted income basis; and
- Annual and long-term compensation, including annual cash bonuses, merit-based salary adjustments and stock options, for various levels of management, is based on financial measures that include Adjusted income. The Adjusted income measure currently represents a significant portion of target objectives that are utilized to

determine the annual compensation for various levels of management, although the actual weighting of the objective may vary by level of management and job responsibility and may be considered in the determination of certain long-term compensation plans. The portion of senior management's bonus, merit-based salary increase and stock option awards based on the Adjusted income measure ranges from 10% to 30%.

Despite the importance of this measure to management in goal setting and performance measurement, we stress that Adjusted income is a non-GAAP financial measure that has no standardized meaning prescribed by U.S. GAAP and, therefore, has limits in its usefulness to investors. Because of its non-standardized definition, Adjusted income (unlike U.S. GAAP Net income) may not be comparable with the calculation of similar measures for other companies. Adjusted income is presented solely to permit investors to more fully understand how management assesses the performance of our Company.

We also recognize that, as an internal measure of performance, the Adjusted income measure has limitations and we do not restrict our performance-management process solely to this metric. A limitation of the Adjusted income measure is that it provides a view of our Company's operations without including all events during a period such as the effects of an acquisition, merger-related costs or amortization of purchased intangibles and does not provide a comparable view of our performance to other companies in the pharmaceutical industry. We also use other specifically tailored tools designed to ensure the highest levels of performance in our Company. For example, our R&D organization has productivity targets, upon which its effectiveness is measured. In addition, for senior levels of management, a portion of their long-term compensation is based on U.S. GAAP Net income.

Purchase Accounting Adjustments

Adjusted income is calculated prior to considering certain significant purchase-accounting impacts, such as those related to our acquisitions of Pharmacia, Vicuron and Esperion as well as net-asset acquisitions. These impacts can include charges for purchased in-process research and development, the incremental charge to cost of sales from the sale of acquired inventory that was written up to fair value and the incremental charges related to the amortization of finite-lived intangible assets for the increase to fair value. Therefore, the Adjusted income measure includes the revenues earned upon the sale of the acquired products without considering the aforementioned significant charges.

Certain of the purchase-accounting adjustments associated with a business combination, such as the amortization of intangibles acquired in connection with our acquisition of Pharmacia, can occur for up to 40 years (these assets have a weighted-average useful life of approximately 10 years), but this presentation provides an alternative view of our performance that is used by management to internally assess business performance. We believe the elimination of amortization attributable to acquired intangible assets provides management and investors an alternative view of our business results by trying to provide a degree of parity to internally developed intangible assets for which research and development costs have been previously expensed.

However, a completely accurate comparison of internally developed intangible assets and acquired intangible assets cannot be achieved through Adjusted income. This component of Adjusted income is derived solely with the impacts of the items listed in the first paragraph of this section. We have not factored in the impacts of any other differences in experience that might have occurred if Pfizer had discovered and developed those intangible assets on its own and this approach does not intend to be representative of the results that would have occurred in those circumstances. For example, our research and development costs in total, and in the periods presented, may have been different; our speed to commercialization and resulting sales, if any, may have been different; or our costs to manufacture may have been different. In addition, our marketing efforts may have been received differently by our customers. As such, in total, there can be no assurance that our Adjusted income amounts would have been the same as presented had Pfizer discovered and developed the acquired intangible assets.

Merger-Related Costs

Adjusted income is calculated prior to considering integration and restructuring costs associated with business combinations because these costs are unique to each transaction and represent costs that were incurred to restructure and integrate two businesses as a result of the acquisition decision. For additional clarity, only restructuring and integration activities that are associated with a purchase business combination or a net-asset acquisition are included in merger-related costs. We have not factored in the impacts on synergies that would have resulted had these costs not been incurred.

We believe that viewing income prior to considering these charges provides investors with a useful additional perspective because the significant costs incurred in a business combination result primarily from the need to eliminate duplicate assets, activities or employees--a natural result of acquiring a fully integrated set of activities. For this reason, we believe that the costs incurred to convert disparate systems, to close duplicative facilities or to eliminate duplicate positions (for example, in the context of a business combination) can be viewed differently from those costs incurred in other, more normal business contexts.

The integration and restructuring costs associated with a business combination may occur over several years with the more significant impacts ending within three years of the transaction. Because of the need for certain external approvals for some actions, the span of time needed to achieve certain restructuring and integration activities can be lengthy. For example, due to the highly regulated nature of the pharmaceutical business, the closure of excess facilities can take several years as all manufacturing changes are subject to extensive validation and testing and must be approved by the FDA. In other situations, we may be required by local laws to obtain approvals prior to terminating certain employees. This approval process can delay the termination action.

Discontinued Operations

Adjusted income is calculated prior to considering gains or losses on the sale of businesses and product lines included in discontinued operations as well as the related results of operations. We believe that this presentation is meaningful to investors because, while we review our businesses and product lines on an ongoing basis for strategic fit with our operations, we do not build or run our businesses with an intent to sell them.

Certain Significant Items

Adjusted income is calculated prior to considering certain significant items. Certain significant items represent substantive, unusual items that are evaluated on an individual basis. Such evaluation considers both the quantitative and the qualitative aspect of their unusual nature. Unusual, in this context, may represent items that are not part of our ongoing business; items that, either as a result of their nature or size, we would not expect to occur as part of our normal business on a regular basis; items that would be non-recurring; or items that relate to products we no longer sell. While not all-inclusive, examples of items that could be included as certain significant items would be a major non-acquisition-related restructuring charge and associated implementation costs for a program which is specific in nature with a defined term, such as those related to our Adapting to Scale initiative; costs associated with a significant recall of one of our products; charges related to sales or disposals of products or facilities that do not qualify as discontinued operations as defined by U.S. GAAP; certain intangible asset impairments; adjustments related to the resolution of certain tax positions; the impact of adopting certain significant, event-driven tax legislation, such as charges attributable to the repatriation of foreign earnings in accordance with the Jobs Act; or possible charges related to legal matters, such as certain of those discussed in *Legal Proceedings* in our Form 10-K and in *Part II: Other Information; Item 1, Legal Proceedings* included in our Form 10-Q filings. Normal, ongoing defense costs of the Company or settlements and accruals on legal matters made in the normal course of our business would not be considered a certain significant item.

Reconciliation

A reconciliation between *Net income*, as reported under U.S. GAAP, and Adjusted income follows:

(millions of dollars)	Third Quarter			First Nine Months		
	2005	2004	% Incr./ (Decr.)	2005	2004	% Incr./ (Decr.)
Reported Net income	\$ 1,589	\$ 3,341	(52)%	\$ 5,352	\$ 8,536	(37)%
Purchase accounting adjustments - net of tax	1,963	521	276	3,401	2,558	33
Merger-related costs - net of tax	67	112	(40)	397	463	(14)
Discontinued operations - net of tax	13	(43)	*	(7)	(75)	(91)
Certain significant items - net of tax	179	229	(22)	2,092	269	678
Adjusted income	<u>\$ 3,811</u>	<u>\$ 4,160</u>	(8)	<u>\$ 11,235</u>	<u>\$ 11,751</u>	(4)

* Calculation not meaningful.

Certain amounts and percentages may reflect rounding adjustments.

Adjusted income as shown above excludes the following items:

(millions of dollars)	Third Quarter		First Nine Months	
	2005	2004	2005	2004

^(a) Included in *Merger-related in-process research and development charges*.

^(b) Included primarily in *Amortization of intangible assets*.

^(c) Included in *Restructuring charges and merger-related costs*.

^(d) Included in *Discontinued operations - net of tax*.

^(e) Included in *Selling, informational and administrative expenses* (\$3 million) for the three months ended October 2, 2005, and included in *Cost of sales* (\$56 million), *Selling informational and administrative expenses* (\$8 million) and *Other (income)/deductions - net* (\$1.2 billion) for the nine months ended October 2, 2005.

^(f) Included in *Other (income)/deductions - net*.

^(g) Included in *Research and development expenses*.

^(h) Included in *Cost of sales* (\$36 million), *Selling, informational and administrative expenses* (\$60 million), and *Research and development expenses* (\$8 million) for the three months ended October 2, 2005, and included in *Cost of sales* (\$37 million), *Selling, informational and administrative expenses* (\$81 million), and *Research and development expenses* (\$18 million) for the nine months ended October 2, 2005.

⁽ⁱ⁾ Included in *Provision for taxes on income*.

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Net Financial Asset Position

Our net financial asset position follows:

(millions of dollars)	Oct. 2, 2005	Dec. 31, 2004
Financial assets:		
Cash and cash equivalents	\$ 959	\$ 1,808
Short-term investments	12,430	18,085
Short-term loans	611	653
Long-term investments and loans	2,784	3,873
Total financial assets	<u>16,784</u>	<u>24,419</u>
Debt:		
Short-term borrowings	6,729	11,266
Long-term debt	5,414	7,279
Total debt	<u>12,143</u>	<u>18,545</u>
Net financial assets	<u>\$ 4,641</u>	<u>\$ 5,874</u>

We rely largely on operating cash flow, short-term commercial paper borrowings and long-term debt to provide for the working capital needs of our operations, including our R&D activities. In addition, the proceeds from the repatriation of foreign earnings are being utilized to finance domestic activities over a multi-year time horizon, thereby reducing our reliance on domestic short-term borrowings. Our international borrowings will increase over the course of 2005 in order to fund the repatriation of foreign earnings. We believe that we have the ability to obtain both short-term and long-term debt to meet our financing needs for the foreseeable future.

Expected Impact of Repatriation of Foreign Earnings

Based on our decision to repatriate foreign earnings totaling about \$36.7 billion in accordance with the Jobs Act, the use of proceeds includes domestic expenditures relating to advertising and marketing activities, research and development activities, capital assets and other asset acquisitions and non-executive compensation in accordance with the provisions of the Jobs Act (as in effect on October 2, 2005). As of October 2, 2005, we have completed the repatriation of approximately \$23 billion. At October 2, 2005, our international subsidiaries held cash and cash equivalents and short-term investments totaling in excess of \$3 billion. Additionally, our international subsidiaries are expected to generate cash flows during 2005, which, together with third-party borrowings as required, will be available to fund the balance of the repatriation.

Investments

Our short-term and long-term investments consist primarily of high-quality, liquid investment-grade available-for-sale debt securities. Wherever possible, cash management is centralized and intercompany financing is used to provide working capital to our operations. Where local restrictions prevent intercompany financing, working capital needs are met through operating cash flows and/or external borrowings.

Debt Capacity

Our short-term borrowings are rated P-1 by Moody's Investors Service (Moody's) and A-1+ by Standard & Poor's (S&P). Our long-term debt is rated Aaa by Moody's and AAA by S&P. Moody's and S&P are major corporate debt-rating organizations. In early April 2005, following the market withdrawal of Bextra and the FDA's decision requiring new labeling for Celebrex, Moody's placed our Aaa rating under review for possible downgrade. The review was completed in June 2005 when Moody's removed Pfizer from review status and reaffirmed our Aaa rating. However, Moody's maintained our rating outlook as negative. S&P has reaffirmed our AAA rating and maintains our outlook as stable.

Our superior credit ratings are primarily based on our diversified product portfolio, our strong operating cash flow, our substantial financial assets, our strong late-stage product pipeline and on our desire to maintain a prudent financial profile. Our access to financing at favorable rates would be affected by a substantial downgrade in our credit ratings.

We have available lines of credit and revolving-credit agreements with a group of banks and other financial intermediaries. We maintain cash balances and short-term investments in excess of our commercial paper and other short-term borrowings. At October 2, 2005, we had access to \$3.0 billion of lines of credit, of which \$1.1 billion expire within one year. Of these

lines of credit, \$2.8 billion are unused, of which our lenders have committed to loan us \$1.7 billion at our request. \$1.5 billion of the unused lines of credit relate to our commercial paper borrowings.

At October 2, 2005, we had the ability to borrow approximately \$2.0 billion by issuing debt securities under our existing debt shelf registration statement filed in November 2002.

Long-Term Debt

In July 2005, we decided to exercise Pfizer's option to call, at par-value plus accrued interest, \$1 billion of senior unsecured floating-rate notes, which were included in *Long-term debt* at December 31, 2004. Notice to call was given to the Trustees and the notes were redeemed in September 2005.

Goodwill and Other Intangible Assets

At October 2, 2005, goodwill totaled \$23.8 billion (21% of our total assets) and other intangible assets, net of accumulated amortization, totaled \$29.0 billion (26% of our total assets). The largest components of goodwill and other intangible assets were acquired in connection with our acquisition of Pharmacia. Other intangible assets included \$23.0 billion of developed technology rights and \$3.9 billion of indefinite-lived brands.

The developed technology rights primarily represent the amortized acquisition-date fair value of the commercialized products that we acquired from Pharmacia. We acquired a well-diversified portfolio of developed technology rights across the therapeutic categories displayed in the table of major Human Health products in the "Revenues" section of MD&A. While the Arthritis and Pain therapeutic category represents about 28% of the total value of developed technology rights at October 2, 2005, the balance of the value is evenly distributed across the following Human Health therapeutic product categories: Ophthalmology; Oncology; Urology; Infectious and Respiratory Diseases; Endocrine Disorders categories; and, as a group, the Cardiovascular and Metabolic Diseases; Central Nervous System Disorders and All Other categories.

SELECTED MEASURES OF LIQUIDITY AND CAPITAL RESOURCES

The following table sets forth certain relevant measures of our liquidity and capital resources:

	Oct. 2, 2005	Dec. 31, 2004
Cash and cash equivalents and short-term investments and loans (millions of dollars)	\$ 14,000	\$ 20,546
Working capital (millions of dollars) ^(a)	\$ 12,373	\$ 13,236
Current ratio ^(b)	1.61:1	1.50:1
Shareholders' equity per common share ^(c)	\$ 9.11	\$ 9.19

(a) Working capital includes assets and liabilities held for sale at October 2, 2005 and December 31, 2004.

(b) Current ratio is the proportion of current assets to current liabilities.

(c) Represents total shareholders' equity divided by the actual number of common shares outstanding (which excludes treasury shares and those held by our employee benefit trust).

The decrease in working capital from December 31, 2004 to October 2, 2005 primarily reflects:

- payment of cash dividends on common and preferred stock, net of dividends payable at December 31, 2004 -- \$2.8 billion;
- purchases of our common stock -- \$3.4 billion;
- net cash paid to acquire Vicuron Pharmaceuticals, Inc. and other smaller businesses -- \$2.1 billion;
- payment of floating-rate notes -- \$1.0 billion;
- purchases of property, plant and equipment -- \$1.5 billion; and
- purchases of other assets -- \$392 million,

partially offset by:

- cash from current-period operations.

Net Cash Provided by Operating Activities

During the first nine months of 2005, net cash provided by continuing operating activities was \$10.0 billion, as compared to \$10.4 billion in the same period of 2004. The decrease in net cash provided by operating activities was primarily driven by lower current period income from operations, net of non-cash items, and the timing of receipts and payments in the ordinary course of business, partially offset by payments in 2004 of \$1.1 billion for litigation settlements related to Rezulin and Neurontin. In the cash flows statement, *Other* includes adjustments for non-cash items such as valuation adjustments.

Net Cash Provided by/(Used in) Investing Activities

During the first nine months of 2005, net cash provided by investing activities was \$2.7 billion, compared to net cash used of \$6.7 billion in the same period in 2004. The change from net cash used in 2004 to net cash provided by investing activities in 2005 was primarily attributable to:

- net redemptions of \$6.3 billion from investments in 2005 primarily used to provide funds for the repatriation of foreign earnings in accordance with the Jobs Act compared to net purchases of \$4.6 billion of investments in 2004,

partially offset by:

- proceeds from sales of businesses and product lines of \$108 million in 2005 as compared to \$1.2 billion in 2004; and
- net cash used for acquisitions in 2005 of \$2.1 billion as compared to \$1.4 billion in 2004.

Net Cash Used in Financing Activities

During the first nine months of 2005, net cash used in financing activities was \$13.5 billion, as compared to \$3.3 billion in the same period in 2004. The increase in net cash used in financing activities in 2005 was primarily attributable to:

- net repayments of \$6.3 billion on total borrowings in 2005 (funds from the repatriation of foreign earnings were used to finance domestic activities, thereby reducing our reliance on short-term borrowings) as compared to total net borrowings of \$4.4 billion in 2004,
- an increase in cash dividends paid of \$356 million as compared to the first nine months of 2004 due to an increase in the dividend rate and
- a decrease of \$568 million in the proceeds from the exercise of stock options,

partially offset by:

- a decrease of \$1.4 billion in purchases of our common stock in 2005 as compared to the same period in 2004.

In October 2004, we announced a \$5 billion share-purchase program. We completed this share-purchase program by purchasing approximately \$2.4 billion of the Company's stock in the second quarter of 2005. In June 2005, Pfizer's Board of Directors authorized a new \$5 billion share-purchase program. During the third quarter of 2005, we purchased approximately 4.3 million shares of common stock at a cost of approximately \$111 million under the new program. The Company has purchased nearly 126 million shares of common stock, at a cost of approximately \$3.4 billion, during 2005. We remain committed to completing this newly authorized \$5 billion share-purchase program.

OFF-BALANCE SHEET ARRANGEMENTS

In the ordinary course of business and in connection with the sale of assets and businesses, we often indemnify our counterparties against certain liabilities that may arise in connection with a transaction or related to activities prior to a transaction. These indemnifications typically pertain to environmental, tax, employee and/or product-related matters, and patent infringement claims. If the indemnified party were to make a successful claim pursuant to the terms of the indemnification, we would be required to reimburse the loss. These indemnifications are generally subject to threshold amounts, specified claim periods and other restrictions and limitations. Historically, we have not generally paid significant amounts under these provisions and at October 2, 2005, recorded amounts for the estimated fair value of these indemnifications are not material.

Certain of our copromotion agreements include additional provisions that give our alliance partners the right to negotiate for, or in some cases to obtain, under certain financial conditions, copromotion rights in specified countries with respect to certain of our products.

RECENTLY ISSUED ACCOUNTING STANDARDS

Share-Based Payment

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 123R, *Share-Based Payment*. SFAS 123R replaces SFAS 123, *Stock-Based Compensation*. SFAS 123R requires that the fair value of the grant of employee stock options be reported as an expense. We plan to adopt SFAS 123R, when required, beginning in the first quarter of 2006. (We had previously disclosed an intention to adopt, when required, in mid-2005, but the SEC delayed the required effective date). Determining the impact of SFAS 123R on our future results of operations requires a number of complex estimates about future events. For example, such an assessment would require a prediction about the number of options to be granted, primarily in February of next year, and a forecast, as of the grant date, of our stock price, the market-based stock price volatility and the risk-free interest rate, all of which can be highly variable and difficult to predict. As such, currently, we cannot reasonably estimate the impact of SFAS 123R on our results of operations in 2006.

Conditional Asset Retirement Obligations

In March 2005, the FASB issued Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations* (FIN 47). FIN 47 clarifies that conditional obligations meet the definition of an asset retirement obligation in SFAS 143, *Accounting for Asset Retirement Obligations*, and therefore should be recognized if their fair value is reasonably estimable. We plan to adopt FIN 47 in the fourth quarter of 2005. We do not expect the provisions of FIN 47 to have a material impact on our consolidated financial statements.

OUTLOOK

Results in 2005 have been, and will continue to be, impacted by the loss of U.S. exclusivity of four major products--Diflucan, Neurontin, and Accupril/Accuretic during 2004 and Zithromax in November 2005. Revenues also have been, and may continue to be, impacted by publicity and regulatory actions regarding selective COX-2 inhibitors, as well as lower prescription growth and increased competition in key markets in the U.S., such as the lipid-lowering market and the erectile-dysfunction market. Full-year revenues are expected to evidence a modest decline relative to 2004, although a somewhat larger decline than previously anticipated, reflecting lower Human Health revenues.

In 2005, we anticipate Pharmacia merger-related synergies of approximately \$4.2 billion, an increase of \$600 million over 2004 synergies. We also expect to achieve approximately \$600 million in cost savings from our AtS productivity initiative during 2005, greater than previously forecasted, mainly attributable to the Human Health business.

Given these and other factors, at current exchange rates we expect 2005 Adjusted income of \$14.2 to \$14.4 billion, Adjusted diluted EPS of \$1.92 to \$1.94, reported Net income of \$7.5 to \$7.7 billion, and reported diluted EPS of \$1.02 to \$1.04, subject to the "Cautionary Factors That May Affect Future Results" section below. The forecasted Adjusted income and diluted EPS ranges, as well as the forecasted reported Net income and diluted EPS ranges, are subject to a number of factors and uncertainties--changes in prescription growth rates and increased competition in key therapeutic markets and geographies; Adapting to Scale restructuring activities; the timing and rate of commercial acceptance of new-product launches; changes in the geographic, product, and segment mix of our revenues and income; changes in foreign exchange; the timing of regulatory actions; and other factors. Some of these factors and uncertainties may persist over the planning horizon. We are currently assessing these factors and other variables as part of our annual planning process and have withdrawn our previously provided financial guidance for 2006 and 2007.

A reconciliation of forecasted 2005 Adjusted income and Adjusted diluted EPS to forecasted 2005 reported Net income and reported diluted EPS follows:

(\$ billions, except per-share amounts)	Net Income	Diluted EPS
Forecasted Adjusted income/diluted EPS	\$14.2 - \$14.4	\$1.92 - \$1.94
Intangible amortization and other	(2.3)	(.32)
In-process R&D charges (primarily Vicuron & Idun)	(1.7)	(.22)
Merger-related costs/productivity-initiative costs	(.9)	(.13)
Equity gains	.1	.02
Asset-impairment charges and other costs associated with the suspension of selling Bextra	(.8)	(.10)
Tax impact on repatriation of foreign earnings	(1.7)	(.23)
Resolution of certain tax positions	.6	.08
Forecasted reported Net income/diluted EPS	<u>\$ 7.5 - \$ 7.7</u>	<u>\$1.02 - \$1.04</u>

Pfizer's estimates of 2005 reported Net income of approximately \$7.5 billion to \$7.7 billion and reported diluted earnings per share of approximately \$1.02 to \$1.04, have been revised from the prior guidance of \$9.1 billion and about \$1.24. The revision is principally attributable to in-process R&D charges of \$1.4 billion (\$0.19 per share) related to the acquisition of Vicuron during the third quarter of 2005 and revised expectations (reflective of a lower revenue outlook, partially offset by greater expected savings associated with the Adapting to Scale productivity initiative and other expense revisions, and a lower effective tax rate), partially offset by anticipated gains on the sale of equity investments.

We expect to spend about \$7.6 billion on research and development in 2005 and approximately \$2.2 billion in capital expenditures for the full year 2005.

CAUTIONARY FACTORS THAT MAY AFFECT FUTURE RESULTS

Our disclosure and analysis in this report, including but not limited to the information discussed in the Outlook section above, contain forward-looking information about our Company's financial results and estimates, business prospects and products in research that involve substantial risks and uncertainties. From time to time, we also may provide oral or written forward-looking statements in other materials we release to the public. Forward-looking statements give our current expectations or forecasts of future events. You can identify these statements by the fact that they do not relate strictly to historic or current facts. They use words such as "will," "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "target," "forecast" and other words and terms of similar meaning in connection with any discussion of future operating or financial performance. In particular, these include statements relating to future actions, prospective products or product approvals, future performance or results of current and anticipated products, sales efforts, expenses, interest rates, foreign exchange rates, the outcome of contingencies, such as legal proceedings, and financial results. Among the factors that could cause actual results to differ materially are the following:

- the success of research and development activities;
- decisions by regulatory authorities regarding whether and when to approve our drug applications as well as their decisions regarding labeling and other matters that could affect the commercial potential of our products;
- the speed with which regulatory authorizations, pricing approvals, and product launches may be achieved;
- competitive developments affecting our current growth products;
- the ability to successfully market both new and existing products domestically and internationally;
- difficulties or delays in manufacturing;
- trade buying patterns;
- the ability to meet generic and branded competition after the loss of patent protection for our products;
- the impact of existing and future regulatory provisions on product exclusivity;
- trends toward managed care and healthcare cost containment;

- possible U.S. legislation or regulatory action affecting, among other things, pharmaceutical pricing and reimbursement, including under Medicaid and Medicare, the importation of prescription drugs that are marketed outside the U.S. and sold at prices that are regulated by governments of various foreign countries, and the involuntary approval of prescription medicines for over-the-counter use;
- the potential impact of the Medicare Prescription Drug, Improvement and Modernization Act of 2003;
- legislation or regulations in markets outside the U.S. affecting product pricing, reimbursement or access;
- contingencies related to actual or alleged environmental contamination;
- claims and concerns that may arise regarding the safety or efficacy of in-line products and product candidates;
- legal defense costs, insurance expenses, settlement costs and the risk of an adverse decision or settlement related to product liability, patent protection, governmental investigations, ongoing efforts to explore various means for resolving asbestos litigation and other legal proceedings;
- the Company's ability to protect its patents and other intellectual property both domestically and internationally;
- interest rate and foreign currency exchange rate fluctuations;
- governmental laws and regulations affecting domestic and foreign operations, including tax obligations;
- changes in U.S. generally accepted accounting principles;
- any changes in business, political and economic conditions due to the threat of future terrorist activity in the U.S. and other parts of the world, and related U.S. military action overseas;
- growth in costs and expenses;
- changes in our product mix; and
- the impact of acquisitions, divestitures, restructurings, product withdrawals and other unusual items, including our ability to integrate and to obtain the anticipated results and synergies from our acquisition of Pharmacia, and our ability to realize the projected benefits of our Adapting to Scale multi-year productivity initiative.

We cannot guarantee that any forward-looking statement will be realized, although we believe we have been prudent in our plans and assumptions. Achievement of future results is subject to risks, uncertainties and inaccurate assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could vary materially from past results and those anticipated, estimated or projected. Investors should bear this in mind as they consider forward-looking statements.

We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our Forms 10-Q, 8-K and 10-K reports to the Securities and Exchange Commission. Our Form 10-K filing for the 2004 fiscal year listed various important factors that could cause actual results to differ materially from expected and historic results. We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. Readers can find them in Item 1 of that filing under the heading "Cautionary Factors That May Affect Future Results." We incorporate that section of that Form 10-K in this filing and investors should refer to it. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

This report includes discussion of certain clinical studies relating to various in-line products and/or product candidates. These studies typically are part of a larger body of clinical data relating to such products or product candidates, and the discussion herein should be considered in the context of the larger body of data.

Legal Proceedings and Contingencies

We and certain of our subsidiaries are involved in various patent, product liability, consumer, commercial, securities, environmental and tax litigations and claims; government investigations; and other legal proceedings that arise from time to time in the ordinary course of our business. We do not believe any of them will have a material adverse effect on our financial position.

We record accruals for such contingencies to the extent that we conclude their occurrence is probable and the related damages are estimable. If a range of liability is probable and estimable and some amount within the range appears to be a better estimate than any other amount within the range, we accrue that amount. If a range of liability is probable and estimable and no amount within the range appears to be a better estimate than any other amount within the range, we accrue the minimum of such probable range. Many claims involve highly complex issues relating to causation, label warnings, scientific evidence, actual damages and other matters. Often these issues are subject to substantial uncertainties and, therefore, the probability of loss and an estimation of damages are difficult to ascertain. Consequently, we cannot reasonably estimate the maximum potential exposure or the range of possible loss in excess of amounts accrued for these contingencies. These assessments can involve a series of complex judgments about future events and can rely heavily on estimates and assumptions. Our assessments are based on estimates and assumptions that have been deemed reasonable by management. Litigation is inherently unpredictable, and excessive verdicts do occur. Although we believe we have substantial defenses in these matters, we could in the future incur judgments or enter into settlements of claims that could have a material adverse effect on our results of operations in any particular period.

Patent claims include challenges to the coverage and/or validity of our patents on various products or processes. Although we believe we have substantial defenses to these challenges with respect to all our material patents, there can be no assurance as to the outcome of these matters, and a loss in any of these cases could result in a loss of patent protection for the drug at issue, which could lead to a significant loss of sales of that drug and could materially affect future results of operations.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)). Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective in alerting them in a timely manner to material information required to be disclosed in our periodic reports filed with the SEC.

During our most recent fiscal quarter, there has not occurred any change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

Certain legal proceedings in which we are involved are discussed in Note 17 to the consolidated financial statements included in our 2004 Financial Report; Part I, Item 3, of our Annual Report on Form 10-K for the year ended December 31, 2004; and Part II, Item 1, of our Quarterly Reports on Form 10-Q for the quarters ended April 3 and July 3, 2005. The following discussion is limited to recent developments concerning our legal proceedings and should be read in conjunction with those earlier Reports. Unless otherwise indicated, all proceedings discussed in those earlier Reports remain outstanding. Reference also is made to the Legal Proceedings and Contingencies section in Part I, Item 2, of this Form 10-Q.

Patent Matters

Lipitor (atorvastatin)

As previously reported, our patent rights to Lipitor are being challenged in various countries. On October 12, 2005, in an action brought by generic manufacturer Ranbaxy Ltd., the United Kingdom's High Court of Justice upheld our basic U.K. patent for Lipitor, which expires in 2011, but ruled that a second patent covering the calcium salt of atorvastatin, which expires in 2010, is invalid. Both sides intend to appeal the decision. If upheld on appeal, the decision will prohibit Ranbaxy from introducing a generic version of atorvastatin in the U.K. before the expiration of our basic patent in 2011.

The trial of our Lipitor patent-infringement action against Ranbaxy in the U.S. District Court for the District of Delaware was held in late 2004. While a decision is possible later this year, the court has not indicated when it intends to issue its judgment.

Neurontin (gabapentin)

As previously reported, in 2000, 2001 and 2003, Warner-Lambert brought patent infringement suits in various federal courts against several generic manufacturers that had filed abbreviated new drug applications with the FDA asserting the invalidity and non-infringement of our gabapentin (Neurontin) low-lactam patent. These suits were consolidated for pre-trial purposes in the U.S. District Court for the District of New Jersey. The defendant generic manufacturers filed various summary judgment motions asserting invalidity and non-infringement on a number of grounds. In August 2005, the court, while denying eight of the ten summary judgment motions, granted two motions for summary judgment of non-infringement. It is expected that both sides will appeal the decision.

Neurontin has faced generic competition in the U.S. since last year. The FDA granted approval to a number of manufacturers for their generic gabapentin products, and the manufacturers began to market those products, in 2004.

Xalatan (latanoprost)

As previously reported, in November 2001, a generic manufacturer notified Pharmacia that it had filed an abbreviated new drug application with the FDA seeking approval to market a product containing latanoprost, which Pharmacia markets as Xalatan. In December 2001, Pharmacia filed suit against the generic manufacturer in the U.S. District Court for the District of New Jersey alleging infringement of various patents relating to latanoprost that are held by or licensed to Pharmacia. The generic manufacturer admitted infringement but claimed that these patents are invalid and unenforceable.

In July 2004, the court held that two of the three patents in suit are valid, infringed and enforceable, and it issued an injunction blocking sale of the generic product until the expiration of the later-expiring patent in March 2011. The generic manufacturer appealed the decision with respect to these two patents. The third patent, which also expires in March 2011, was held unenforceable. We appealed the decision with respect to the third patent. In July 2005, the U.S. Court of Appeals for the Federal Circuit affirmed the District Court's decision as to all three patents, thereby blocking sale of the generic product until March 2011. In October 2005, the Federal Circuit denied the generic manufacturer's request for an en banc review of the three-member panel decision.

Product Liability Matters

Rezulin

As previously reported, in April 2001, Louisiana Health Service Indemnity Company and Eastern States Health and Welfare Fund filed a consolidated complaint against Warner-Lambert in the U.S. District Court for the Southern District of New York purportedly on behalf of a class consisting of all health benefit providers that paid for or reimbursed patients for the purchase of Rezulin between February 1997 and April 2001. In September 2005, the court granted Warner-Lambert's motion for summary judgment and dismissed the complaint. In November 2005, the plaintiffs appealed the decision.

Viagra

A number of lawsuits, including purported class actions, have been filed against us in various federal and state courts alleging that Viagra causes certain types of visual injuries. The plaintiffs in the purported class actions seek to represent nationwide and certain statewide classes of Viagra users. All of the actions seek damages for personal injury, and the purported class actions also seek medical monitoring.

Commercial Matters

Lipitor

Beginning in September 2005, a number of purported class actions have been filed against us in various federal courts alleging claims relating to the promotion of Lipitor. In each of the actions, the plaintiffs seek to represent a nationwide class consisting of women (regardless of age) and men over age 65 who in each case had no history of heart disease or diabetes and who purchased Lipitor within the last four years. In certain of the actions, the plaintiffs also seek to represent health insurers, employee benefit plans and other third-party payors that paid for Lipitor used by individuals in either of the aforementioned two groups. The plaintiffs in these actions allege that the Company engaged in false and misleading advertising in violation of state consumer protection laws by allegedly promoting Lipitor for the prevention of heart disease in the aforementioned two groups. The actions seek monetary and injunctive relief, including treble damages. In addition, a purported class action on behalf of residents of the Province of Quebec has been filed against us in Canada that asserts claims under Canadian law and seeks relief substantially similar to the claims asserted and the relief sought in the U.S. actions.

Celebrex and Bextra

As previously reported, the Company is a defendant in a number of product liability, consumer fraud, securities, fiduciary duty and ERISA (Employee Retirement Income Security Act of 1974) actions, including purported class and derivative actions, relating to Celebrex and Bextra. Certain current and former officers, directors and employees of Pfizer and Pharmacia also are named as defendants in some of those actions. In June 2005, the federal securities, fiduciary duty and ERISA actions were transferred to the U.S. District Court for the Southern District of New York for consolidated pre-trial proceedings. In September 2005, the federal product liability and consumer fraud actions were transferred to the U.S. District Court for the Northern District of California for consolidated pre-trial proceedings.

Other Matters

The Department of Justice

The U.S. Department of Justice has informed us that it is investigating Pharmacia's former contractual relationship with a health care intermediary.

We have received requests for information and documents from the U.S. Department of Justice relating to certain physician payments budgeted to our prescription pharmaceutical products.

Importation Cases

As previously reported, in 2004 a number of purported class actions were filed in the U.S. District Court for the District of Minnesota alleging that Pfizer and several other pharmaceutical manufacturers violated federal and state civil antitrust laws by conspiring to prevent the importation of brand-name prescription drugs from Canada. These suits all were consolidated into a single action, which sought to represent a nationwide class consisting of all persons who purchased or reimbursed patients for the purchase of prescription drugs manufactured and marketed by defendants that also are available in Canada. In August 2005, the court granted the defendants' motion to dismiss this action, and the plaintiffs have appealed the decision. The previously reported California state court action by a number of independent pharmacists in California that asserts similar claims under California antitrust and unfair business practices laws is still pending. The defendants' motion to dismiss the California action was partially granted and partially denied in July 2005.

Environmental Matters

As previously reported, in July 2005, the U.S. Environmental Protection Agency (EPA) proposed a civil penalty in the amount of \$275,000 to settle certain alleged violations of the Federal Clean Air Act at our Kalamazoo, Michigan facility that were identified by the EPA during an inspection in 2004. In September 2005, this matter was resolved pursuant to a settlement that provides for a \$47,250 civil penalty and a commitment to undertake two supplemental environmental projects at the facility. Corrective actions have been implemented.

Tax Matters

In the second quarter of 2005, we recorded a tax benefit of \$586 million primarily related to the resolution of certain tax positions. In addition, we believe that the IRS audits of the Pfizer Inc. tax returns for the years 1999-2001 and the Warner-Lambert Company tax returns for the years 1999 through the date of the merger with Pfizer (June 19, 2000) are substantially complete. In connection with those audits, we are currently in the process of appealing one matter related to the tax deductibility of a breakup fee paid by Warner-Lambert Company in 2000.

The IRS has commenced the audit of the Pfizer Inc. tax returns for the years 2002, 2003 and 2004. The 2005 tax year is also currently under audit as we are voluntary participants in the IRS Compliance Assurance Program, which results in real-time tax audits.

As previously disclosed, with respect to Pharmacia Corporation (formerly known as Monsanto Company), the IRS has completed and closed its income tax return examinations and appeals through 1999 and has commenced the audit of the tax returns for the years 2000 through the date of merger with Pfizer (April 16, 2003).

We periodically reassess the likelihood of assessments resulting from audits of federal, state and foreign income tax filings. We believe that our accruals for tax liabilities are adequate for all open years.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

This table provides certain information with respect to our purchases of shares of Pfizer's common stock during the fiscal third quarter of 2005:

Issuer Purchases of Equity Securities^(a)

Period	Total Number of Shares Purchased ^(b)	Average Price Paid per Share ^(b)	Total Number of Shares Purchased as Part of Publicly Announced Plan ^(a)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plan ^(a)
July 4, 2005 through July 31, 2005	24,708	\$26.64	---	\$5,000,000,000
August 1, 2005 through August 31, 2005	1,642,722	\$25.28	1,584,100	\$4,960,003,230
September 1, 2005 through October 2, 2005	2,814,503	\$25.63	2,755,400	\$4,889,364,758
Total	4,481,933	\$25.51	4,339,500	

^(a) On June 23, 2005, Pfizer announced that the Board of Directors authorized a \$5 billion share-purchase plan (the "2005 Stock Purchase Plan").

^(b) In addition to purchases under the 2005 Stock Purchase Plan, this column reflects the following transactions during the fiscal third quarter of 2005: (i) the deemed surrender to Pfizer of 79,419 shares of common stock to pay the exercise price and to satisfy tax withholding obligations in connection with the exercise of employee stock options, (ii) the open-market purchase by the trustee of 57,434 shares of common stock in connection with the reinvestment of dividends paid on common stock held in trust for employees who were granted performance-contingent share awards and who deferred receipt of such awards and (iii) the surrender to Pfizer of 5,580 shares of common stock to satisfy tax withholding obligations in connection with the vesting of restricted stock issued to employees.

Item 6. Exhibits.

- 1) Exhibit 12 - Computation of Ratio of Earnings to Fixed Charges
- 2) Exhibit 15 - Accountants' Acknowledgment
- 3) Exhibit 31.1 - Certification by the Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 4) Exhibit 31.2 - Certification by the Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 5) Exhibit 32.1 - Certification by the Chief Executive Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
- 6) Exhibit 32.2 - Certification by the Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

Ratio of earnings to fixed charges	<u>17.9</u>	<u>27.8</u>	<u>8.0</u>	<u>34.5</u>	<u>28.4</u>	<u>12.0</u>

All financial information reflects, as applicable, the following businesses and product lines as discontinued operations: our in-vitro allergy and autoimmune diagnostics testing, surgical ophthalmic, certain European generic pharmaceutical, confectionery, shaving and fish-care products businesses, certain non-core consumer healthcare products lines (primarily marketed in Europe) and the Estrostep, Loestrin and femhrt women's health product lines.

Historical ratios of earnings to fixed charges reflect revisions to historical period's rent expense, the impact of which was not significant to any period.

(a) Interest expense includes amortization of debt premium, discount and expenses.

(b) Preferred stock dividends are from our Series A convertible perpetual preferred stock held by an Employee Stock Ownership Plan assumed in connection with our acquisition of Pharmacia.

(c) Rents included in the computation consist of one-third of rental expense which we believe to be a conservative estimate of an interest factor in our leases, which are not material.

ACCOUNTANTS' ACKNOWLEDGMENT

To the Shareholders and Board of Directors of Pfizer Inc:

We hereby acknowledge our awareness of the incorporation by reference of our report dated November 9, 2005, included within the Quarterly Report on Form 10-Q of Pfizer Inc. for the quarter ended October 2, 2005, in the following Registration Statements:

- Form S-8 dated October 27, 1983 (File No. 2-87473),
- Form S-8 dated March 22, 1990 (File No. 33-34139),
- Form S-8 dated January 24, 1991 (File No. 33-38708),
- Form S-8 dated November 18, 1991 (File No. 33-44053),
- Form S-8 dated May 27, 1993 (File No. 33-49631),
- Form S-8 dated May 19, 1994 (File No. 33-53713),
- Form S-8 dated October 5, 1994 (File No. 33-55771),

- Form S-3 dated March 1, 2005 (File No. 333-123058).

Pursuant to Rule 436(c) under the Securities Act of 1933, such report is not considered a part of a registration statement prepared or certified by an accountant or a report prepared or certified by an accountant within the meaning of Sections 7 and 11 of that Act.

KPMG LLP

New York, New York
November 9, 2005

**CERTIFICATION BY THE CHIEF EXECUTIVE OFFICER PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Henry A. McKinnell, certify that:

1. I have reviewed this report on Form 10-Q of Pfizer Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: November 9, 2005

/s/ Henry A. McKinnell
Henry A. McKinnell
Chairman of the Board and Chief Executive Officer

**CERTIFICATION BY THE CHIEF FINANCIAL OFFICER PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Alan G. Levin, certify that:

1. I have reviewed this report on Form 10-Q of Pfizer Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: November 9, 2005

/s/ Alan G. Levin

Alan G. Levin
Senior Vice President and Chief Financial Officer

Certification by the Chief Executive Officer Pursuant to 18 U. S. C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

Pursuant to 18 U. S. C. Section 1350, I, Henry A. McKinnell, hereby certify that, to the best of my knowledge, the Quarterly Report of Pfizer Inc. on Form 10-Q for the quarter ended October 2, 2005 (the "Report") fully complies with the requirements of Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934, and that the information contained in that Report fairly presents, in all material respects, the financial condition and results of operations of Pfizer Inc.
