Portland General Electric reports full year and fourth quarter 2007 earnings results

Reaffirms 2008 guidance

Financial and Operating Highlights

- Achieved net income for 2007 of \$145 million, or \$2.33 per diluted share, compared to \$71 million, or \$1.14 per diluted share, in 2006. Net income results were within management guidance of \$2.25 - \$2.35 per diluted share.
- Added approximately 11,000 new customers, resulting in almost 804,000 customers served at year end.
- Effectively operated and managed the utility system with excellent plant operations, high system reliability and strong overall customer service ratings.
- Successfully completed and brought into commercial operation both the Port Westward natural gas-fired plant and Phase I of the Biglow Canyon Wind Farm project. Both projects were completed within budget.

Full Year 2007

Portland, Ore. — Portland General Electric Company (NYSE: POR) today reported net income of \$145 million, or \$2.33 per diluted share, for the twelve months ended December 31, 2007, compared to \$71 million, or \$1.14 per diluted share, for 2006. Results for 2007 were driven primarily by increased energy deliveries, excellent plant operations including increased generation from the return of Boardman to full operation and the addition of Port Westward. Results for 2007 also included the following items:

- \$16 million after tax, or \$0.26 per diluted share, resulting from the deferral for future recovery of excess Boardman power costs (\$20.4 million deferral and \$5.0 million in interest, both pre-tax).
- \$4 million after tax, or \$0.06 per diluted share, resulting from a reduction in the Company's wholesale credit reserve related to the settlement with certain California parties involving wholesale energy transactions in 2000-2001 (\$6 million pre-tax).
- \$11 million after tax, or \$0.18 per diluted share, resulting from Senate Bill 408 (SB 408), the Oregon law which attempts to more closely match utility income tax amounts forecasted to be collected in revenues with the amount of income taxes paid to governmental entities.

"Our 2007 results demonstrate that Portland General Electric is committed to delivering value to its customers and shareholders alike," said Peggy Fowler, CEO and president of Portland General Electric (PGE). "Our list of accomplishments includes bringing our new Port Westward plant online, completing Phase I of the Biglow Canyon Wind Farm on schedule in December and delivering a year of operational excellence with our overall system performing at a high level."

"Our success can be attributed to the hard work of my co-workers. In 2008, we'll continue to deliver on our commitment to provide our customers with safe, reliable power at a reasonable price while delivering long-term value to shareholders."

Full Year 2007 Summary

- Total customers served increased by 1.4 percent to approximately 804,000 as of December 31, 2007, compared to approximately 793,000 as of December 31, 2006.
- Total retail energy deliveries increased 1.0 percent (1.1 percent weather adjusted) to 19,627,000 MWhs in 2007 from 19,432,000 MWhs in 2006.
- Total revenues increased by 15 percent to \$1,743 million from \$1,520 million in 2006. The increase was due primarily to the following key factors:
 - Price increases related to higher power and fuel costs and cost recovery of Port Westward.
 - SB 408 with an increase of \$58 million consisting of \$18 million recorded in 2007 (\$15 million collection for the 2007 tax reporting year and \$3 million related to the 2006 tax reporting year, both pre-tax) compared to a \$40 million refund recorded in 2006.
 - An increase in total retail energy deliveries due primarily from the addition of approximately 11,000 new customers.
 - Price increases resulting from changes under the Residential Exchange Program (fully offset by increased purchased power costs).
 - Wholesale revenues increased by \$66 million due to increases in both sales volume and the average sales price.
- Purchased power and fuel expenses increased by 15 percent to \$879 million in 2007 from \$763 million in 2006. The increase was due primarily to the net effect of the following key factors:
 - Increased expense related to settled natural gas swap agreements entered into in conjunction with PGE's management of net power costs.

- A 12% increase in the average cost of purchased power.
- A 22% decrease in the volume of electricity purchases, which more than offset the increased cost of thermal generation, primarily resulting from the operation of the new Port Westward plant and a full year of operations at Boardman.
- An estimated \$16 million future refund to customers under the Power Cost Adjustment Mechanism (PCAM).
- Reduction in expense due to the deferral of excess Boardman power costs and a reduction in the Company's wholesale credit reserve related to settlement with certain California parties involving wholesale energy transactions in 2000-2001.
- Discontinuance of subscription power benefits under the Residential Exchange Program (fully offset by increased revenues).
- Production, distribution, administrative and other expenses increased by 10 percent to \$334 million in 2007 from \$304 million in 2006. This increase was due primarily to new operating costs at Port Westward, higher employee benefits (including incentive compensation and medical costs), increased labor costs and increased customer support expenses.
- Depreciation and amortization expenses decreased by 17 percent to \$181 million in 2007 from \$219 million in 2006 due primarily to the net effect of the following key factors:
 - Reduction in depreciation rates for utility plant assets and the authorized recovery of Trojan decommissioning costs.
 - Decrease in amortization of regulatory assets.
 - Increase related to the new Port Westward plant and other capital additions during 2007.
- Income taxes increased by 87 percent to \$71 million in 2007 from \$38 million in 2006 due primarily to higher taxable income.

Fourth Quarter 2007

For the fourth quarter ended December 31, 2007, the Company reported net income of \$24 million, or \$0.40 per diluted share, compared to \$40 million, or \$0.64 per diluted share, for 2006. The decrease was primarily attributable to non-recurring gains in 2006, partially offset by the effects of SB 408, with an estimated collection in 2007 compared to an estimated refund in 2006, and to a reduction in other income.

Fourth Quarter 2007 Summary

- Total retail energy deliveries increased by 1.4 percent (1.2 percent weather adjusted), with 5,193,000 MWhs in 2007 compared to 5,120,000 MWhs in 2006.
- Total revenues increased by 13 percent to \$470 million in 2007 from \$416 million in 2006. The increase was due primarily to the following key factors:
 - Price increases related to higher power and fuel costs, and cost recovery of Port Westward.
 - An increase of \$17 million related to SB 408 consisting of \$7 million recorded in 2007 (\$5 million collection for the 2007 tax reporting year and \$2 million adjustment for the 2006 tax reporting year, both pre-tax) compared to a \$10 million refund recorded in 2006.

- Wholesale revenues increased by \$31 million due to increased sales volume and the average sales price.
- Purchased power and fuel expenses increased by 36 percent to \$259 million in 2007 from \$190 million in 2006. The increase was due to the net effect of the following key factors:
 - Higher cost of thermal generation, including operation of the new Port Westward plant and higher cost of settled natural gas transactions.
 - A 19 percent increase in the average cost of purchased power.
 - Displacement of wholesale power purchases with lower-cost power from Port Westward.
 - A reduction in unrealized gains on derivative activities (\$18 million in 2006 vs. \$0 in 2007).
 - A deferral of Boardman replacement power costs (\$6 million in 2006 vs. \$0 in 2007).
- Production, distribution, administrative and other expenses increased by 9 percent to \$89 million from \$82 million in 2006 due primarily to new operating costs at Port Westward, higher employee benefit expense and increased labor costs.
- Depreciation and amortization expenses decreased by 13 percent to \$47 million in 2007 from \$54 million in 2006 due primarily to the net effect of the following key factors:
 - Reduction in depreciation rates for utility plant assets and the authorized recovery of Trojan decommissioning costs.
 - Decrease in amortization of regulatory assets.
 - An increase in depreciation from the addition of Port Westward.
- Income taxes decreased by 33 percent to \$12 million in 2007 from \$18 million in 2006 due primarily to lower taxable income.

Advanced Metering Infrastructure (AMI)

As part of the regulatory approval process for inclusion of AMI in prices, PGE made its final filing on February 6, 2008 and is now waiting for an order from the OPUC. If approved, the tariff will go into effect on June 1, 2008 and continue through December 31, 2010. This proposed two and a half year tariff period coincides with the systems acceptance testing and installation of over 800,000 meters. Once the meters are installed, at an estimated capital cost of \$130 million to \$135 million, we estimate that AMI will reduce annual operating expenses by approximately \$18 million pre tax.

Biglow Canyon Wind Farm

Phase I of the Biglow Canyon Wind Farm, comprised of 76 turbines with an installed capacity of 125 megawatts, was completed and placed in service in mid-December 2007 at a total cost of approximately \$255 million (including AFDC). Phase I, which was included in customer prices beginning in January 2008, fulfills PGE's goals for adding renewable energy as outlined in the Company's last Integrated Resource Plan.

Phases II and III of the project are in the advanced planning stages, with an estimated total cost of \$700 million to \$800 million (including AFDC). Phase II is expected to be completed by the end of 2009 and Phase III is expected to be completed by the end of 2010. All three phases of the project are expected to have a total installed capacity of 400 to 450 megawatts.

Capital Expenditures

Capital expenditures in 2007 totaled \$455 million compared to \$371 million in 2006. Expenditures for 2007 consisted of approximately \$199 million for the Biglow Canyon Wind Farm Phase I, \$17 million for Phases II and III, \$182 million for ongoing production, transmission and distribution facilities, \$40 million for hydro relicensing projects, \$16 million for Port Westward and \$1 million for AMI.

Capital expenditures in 2008 are estimated to be \$428 million. This includes \$121 million for Phases II and III of the Biglow Canyon Wind Farm, \$229 million for ongoing production, transmission and distribution facilities, \$55 million for hydro relicensing projects and \$23 million for AMI.

General Rate Case

The Company plans to file a general rate case with the OPUC on February 27, 2008, based on a 2009 test year, with new prices expected to be effective beginning in January 2009. The proposed 8.9% increase in prices is a result of increased generation costs based on higher natural gas and coal prices; increased purchased power costs; and higher general (non-power) costs, including the rising cost of materials and supplies, compliance with government regulation, hydro relicensing improvements, and labor and healthcare benefits. The requested revenue requirement includes a return on common equity of 10.75%, based on an expected capital structure of 50% equity and 50% debt, and an overall weighted average cost of capital of 8.66%.

2008 Earnings Guidance

PGE is reaffirming full-year 2008 earnings guidance of \$1.75 to \$1.85 per diluted share. Guidance assumes normal hydro conditions and plant operations. PGE is also reaffirming its long-term annual earnings growth expectation of 6 to 8 percent beginning with 2008.

Full Year 2007 Earnings Call and Webcast February 26, 2008

PGE will host a conference call with financial analysts and investors on Tuesday, February 26, 2008, at 5 p.m. EST. The conference call will be webcast live on the PGE Web site at www.PortlandGeneral.com. A replay of the call will be available beginning at 7 p.m. EST on Tuesday, February 26 through Tuesday, March 4.

Peggy Fowler, CEO and president; Jim Piro, executive vice president, CFO and treasurer; and Bill Valach, director of investor relations will participate in the call. Management will respond to questions following formal comments.

The attached consolidated income statements, balance sheets, cash flow statements and supplemental operating statistics are an integral part of this earnings release.

About Portland General Electric Company

Portland General Electric, headquartered in Portland, Ore., is a vertically integrated electric utility that serves approximately 804,000 residential, commercial and industrial customers in Oregon. Visit our Web site at www.PortlandGeneral.com

Safe Harbor Statement

Statements in this news release that relate to future plans, objectives, expectations, performance, events and the like may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include statements regarding earnings guidance, statements regarding future capital expenditures, statements regarding the cost, completion and benefits of capital projects, such as the Biglow Canyon Wind Farm, as well as other statements containing words such as “anticipates,” “believes,” “intends,” “estimates,” “promises,” “expects,” “should,” “conditioned upon” and similar expressions. Investors are cautioned that any such forward-looking statements are subject to risks and uncertainties, including matters and events related to final regulatory review and approval of the deferral of excess power costs related to Boardman’s outage; regulatory approval and rate treatment of the Advanced Metering Infrastructure and Biglow Canyon Wind Farm projects; the costs of compliance with environmental laws and regulations, including those that govern emissions from thermal power plants; changes in weather, hydroelectric, and energy market conditions, which could affect the availability and cost of purchased power and fuel; and the outcome of various legal and regulatory proceedings. As a result, actual results may differ materially from those projected in the forward-looking statements. All forward-looking statements included in this news release are based on information available to the Company on the date hereof and such statements speak only as of the date hereof. The Company assumes no obligation to update any such forward-looking statement. Prospective investors should also review the risks and uncertainties listed in the Company’s most recent Annual Report on Form 10-K and the Company’s reports on Forms 8-K and 10-Q filed with the United States Securities and Exchange Commission, including Management’s Discussion and Analysis of Financial Condition and Results of Operation and the risks described therein from time to time.
