Introduction

Forward-looking Statements

Certain matters in the presentation today constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements relate to, among others, expectations of the business environment in which the Company operates, projections of future performance, including operating efficiencies, perceived opportunities in the market, potential future credit experience, and statements regarding the Company's mission and vision. These forward-looking statements are based upon current management expectations, and may, therefore, involve risks and uncertainties. Management's ability to predict results or the effect of future plans or strategies is inherently uncertain. The Company's actual results, performance or achievements may differ materially from those suggested, expressed or implied by forward-looking statements due to a wide range of factors including, but not limited to, the general business environment, general economic conditions nationally and in the State of South Carolina, interest rates, the South Carolina real estate market, the demand for mortgage loans, competitive conditions between banks and non-bank financial services providers, regulatory changes and other risks detailed in the Company's reports filed with the Securities and Exchange Commission, including the Annual Report on Form 10-K for the fiscal year ended September 30, 2003. Accordingly, these factors should be considered in evaluating the forward-looking statements, and undue reliance should not be placed on these statements.

First Financial enjoys significant shares in key deposit markets. Average deposits per branch (open longer than 2 years) is \$37.4 million in our traditional locations and \$7.4 million in our Wal-Mart Superstore locations.

Financial Performance

A brief review of our recent financial performance.

We are approximately \$2.4 billion in assets at September 30, 2004. The lack of asset growth in recent periods is the result of a much larger proportion of single-family real estate loans being sold in the secondary market and our focus on acquiring service related businesses.

Our loan composition continues to change.

- We continue to put more emphasis on expanding consumer and business lending.
- As a result, those balances have continued to grow as a part of our total loan portfolio.
- Consumer, construction, and multi-family/commercial/business and real estate loans now represent 42% of total loans.

Credit Quality

At the end of fiscal 2004, non-performing assets were 51 basis points of total assets. Net charge-offs have been very low for the past five years and were 32 basis points in fiscal 2004. Obviously larger portfolios of commercial and consumer loans have resulted in increased levels of charge-offs.

Deposit Composition

September 30, 2004
(amounts in millions)

32

Transaction accounts-checking, money market deposits and statement savings now make up 56% of total deposits. Certificates of deposit are substantially all in-market, retail deposits.

Demand Deposits

(amounts in millions)

33

- The Company continues to grow lower costing demand deposit balances with considerable growth in our seniors banking program.
- Balances of demand deposits were up 22% in fiscal 2003 and are up 10% in fiscal 2004.

Net Interest Income

(amounts in thousands)

Net interest income has declined 2% over last fiscal year. This is due in part to continued loan repricing and a slowing of liability repricing.

Net Interest Spread

During fiscal 2003 the spread was 3.66% and in fiscal 2004 declined to 3.35%

Efficiency Ratio (banking segment)

36

The bank efficiency ratio has been below 58% for several years. If you exclude the FHLB advance prepayment fee incurred in the September quarter, the ratio for fiscal 2004 would be 56.3%.

Net Income

(amounts in thousands)

37

Fiscal year to date net income is down 10% due primarily to lower gains on the sale of loans and a decline in net interest income.

Core Earnings Per Share (diluted)

Core earnings per share were up 41% over the past three fiscal years, but are down in fiscal 2004.

Core Return on Average Equity

Return on equity exceeded 15% for the past five fiscal years and was 16.7% for our latest fiscal year. We are just under 15% for fiscal 2004.
