FIRST INDIANA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
Three and Nine Months Ended September 30, 2002
(Unaudited)

Note 1 - Basis of Presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (comprising only normal recurring accruals) necessary for a fair presentation of the condensed consolidated financial statements have been included. Results for any interim period are not necessarily indicative of results to be expected for the year. The condensed consolidated financial statements include the accounts of First Indiana Corporation and its subsidiaries ("Corporation"). The principal subsidiaries of the Corporation are First Indiana Bank and its subsidiaries ("Bank") and Somerset Financial Services, LLC ("Somerset"). A summary of the Corporation's significant accounting policies is set forth in Note 1 of the Notes to Consolidated Financial Statements in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2001.

All share and per share data have been restated to reflect the five-for-four stock split declared on January 16, 2002.

Certain amounts in the Condensed Consolidated Financial Statements relating to prior periods have been reclassified to conform to current reporting presentation.

Note 2 - Earnings Per Share

Basic earnings per share for 2002 and 2001 were computed by dividing net earnings by the weighted average shares of common stock outstanding (15,576,745 and 15,590,409 for the three months ended September 30, 2002 and 2001 and 15,532,653 and 15,613,524 for the nine months ended September 30, 2002 and 2001). Diluted earnings per share for 2002 and 2001 were computed by dividing net earnings by the weighted average shares of common stock and common stock that would have been outstanding assuming the issuance of all dilutive potential common shares outstanding (15,851,161 and 16,022,986 for the three months ended September 30, 2002 and 2001 and 15,825,930 and 16,061,730 for the nine months ended September 30, 2002 and 2001). Dilution of the per-share calculation relates to stock options.

Note 3 - Allowance for Loan Losses

An allowance has been established for loan losses. The provision for loan losses charged to operations is based on management's judgment of current economic conditions and the credit risk of the loan portfolio. Management believes that the allowance is adequate for the losses inherent in the loan portfolio. While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on changes in economic conditions. In addition, various regulatory agencies, as an integral part of their examination process, periodically review this allowance and may require the Corporation to recognize additions to the allowance based on their judgment about information available to them at the time of their examination.

Note 4 - Segment Reporting

The Corporation's business units are primarily organized to operate in the financial services industry and are determined by the products and services offered. The commercial segment originates business, single-family construction, and commercial real estate loans, encompasses the portfolio of Community Reinvestment Act loans, and provides traditional cash management services to business customers. The consumer segment includes the origination, sale, and portfolio activities of both home equity and installment loans, and the residential segment encompasses the origination and portfolio activities of residential first mortgage loans. Investment portfolio management is included in the treasury segment. The retail segment includes the Bank's 26-branch network and investment product sales division. FirstTrust Indiana includes the services, fees, and costs of the trust segment. The Somerset segment includes all activities of the Corporation's Somerset Financial Services subsidiary. Revenues in the Corporation's segments are generated from loans, deposits, investments, servicing fees, loan sales, and fee income. There are no foreign operations.

The following segment financial information is based on the internal management reporting used by the Corporation to monitor and manage financial performance. The Corporation evaluates segment performance based on average assets and profit or loss before income taxes and indirect expenses. Indirect expenses include the Corporation's overhead and support expenses. The Corporation attempts to match fund each business unit by reviewing the assets and liabilities held by each unit and assigning an appropriate expense or income offset based on the cost of funds. The Corporation accounts for intersegment revenues, expenses, and transfers based on estimates of the actual costs to perform the intersegment services.

- (1) First Indiana implemented a new management reporting system in the first quarter of 2002, including a new transfer pricing methodology for funds used or provided by the various segments. Amounts shown for 2001 have been reclassified to reflect the change in management reporting format.
- (2) The net interest income amounts in the segment results reflect not only the actual interest income and expense from segment activities, but also amounts for transfer income and expense to match fund each segment. Transfer income and expense is assigned to assets and liabilities based on the cost of funds.
- (3) Intersegment revenues are received by one segment for performing a service for another segment. In the case of residential and consumer portfolios, the amount paid to the consumer loan processing office is capitalized and amortized over a four-year period. These entries are not included in the Corporation's actual results.

Note 5 - Recent Accounting Pronouncements

Effective January 1, 2002, the Corporation adopted Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142") resulting in no goodwill impairment. In accordance with the new standard, goodwill and intangible assets with indefinite lives are no longer amortized, but are subject to impairment tests at least annually. The Corporation had no existing intangible assets acquired in prior purchase business combinations and recognized no impairment loss relating to intangible assets upon adoption of SFAS 142.

The following table shows information relating to the adoption of SFAS 142.

Effective January 1, 2002, the Corporation adopted Statement of Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS 144"), which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. Since SFAS 144 maintains many of the fundamental provisions of current accounting pronouncements, the adoption of this standard did not have a material impact on the financial condition or results of operations of the Corporation.

Summary of Corporation's Results

First Indiana Corporation and subsidiaries had net earnings of \$6,842,000 for the three months ended September 30, 2002, compared with net earnings of \$6,848,000 for the same period last year. Diluted earnings per share for the three months ended September 30, 2002 were \$0.43, compared with \$0.43 per share for the same period one year ago. Cash dividends for the third quarter of 2002 and 2001 were \$0.16 and \$0.128 per share of common stock outstanding.

For the first nine months of 2002, net earnings were \$20,121,000, compared with \$20,381,000 one year ago. For the nine months ended September 30, 2002, diluted earnings per share were \$1.27, compared with \$1.27 for the same period one year ago. Cash dividends for the nine months ended September 30, 2002 and 2001 were \$0.48 and \$0.384 per common share outstanding.

Effective January 1, 2002, First Indiana adopted Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets;" ("SFAS 142"). In accordance with the new standard, goodwill and intangible assets with indefinite lives are no longer amortized, but are subject to impairment tests at least annually. If these standards had been adopted in 2001, earnings for the third quarter would have been \$7,077,000 or \$0.44 per diluted share. Earnings for the nine months ended September 30, 2001 would have been \$21,073,000 or \$1.31 per diluted share.

Annualized return on average total assets was 1.29 percent for the three months ended September 30, 2002, compared with 1.28 percent for the same period one year ago. For the nine months ended September 30, 2002, the Corporation's annualized return on average total assets was 1.30 percent, compared with 1.29 percent for the same period in 2001.

Annualized return on average total equity was 12.21 percent for the three months ended September 30, 2002, compared with 13.00 percent for the same period one year ago. For the nine months ended September 30, 2002, the Corporation's annualized return on average total equity was 12.42 percent, compared with 13.19 percent for the same period in 2001.

Net Interest Income

Net interest income was \$19,401,000 and \$55,068,000 for the three and nine months ended September 30, 2002, respectively, compared with \$18,840,000 and \$58,846,000 for the three and nine months ended September 30, 2001, respectively. Earning assets averaged \$1,998,518,000 in the third quarter of 2002, compared with \$2,021,498,000 for the same quarter in 2001. Net interest margin was 3.88 percent and 3.75 percent in the third quarter and first nine months of 2002, respectively, compared to 3.74 percent and 3.77 percent in the third quarter and first nine months of 2001, respectively. Rapidly falling interest rates in 2001, coupled with a net asset-sensitive position within a one year-time period had the effect of lowering net interest margin in 2001. Net interest margin in the third quarter 2002 increased 30 and 12 basis points over the first and second quarter 2002 margins of 3.58 percent and 3.76 percent, respectively. This rebound is the outcome of a 12 percent increase in lower-cost interest-bearing demand and savings deposits in the first nine months of 2002 as well as the downward repricing of liability rates as they caught up with the rate reductions in assets that occurred last year.

The contribution of interest-free funds to net interest margin varies depending on the level of interest-free funds and the level of interest rates. Interest-free funds averaged \$308,724,000 and \$301,869,000 in the third quarter and first nine months of 2002, respectively, compared to \$282,794,000 and \$277,093,000 for the comparable periods of 2001. The increase in interest free funds is attributable to growth in non-interest-bearing demand deposits and retained earnings. Average interest-free funds provided 46 and 50 basis points to the third quarter and year to date 2002 margin, respectively, compared with 65 and 71 basis points for the same periods in 2001. Although interest-free funds were higher in both periods of 2002, their impact declined compared to the third quarter and first nine months of 2001 due to the lower interest rate environment.

The following tables provide information on the Corporation's net interest margin.

Summary of Loan Loss Experience and Non-Performing Assets

The third quarter 2002 provision was \$2,982,000, compared to \$4,159,000 for the second quarter 2002 and \$2,475,000 for the third quarter of 2001. Net charge-offs for the third quarter 2002 were \$1,986,000, or 0.43 percent of average loans on an annualized basis, compared to net charge-offs for the second quarter of 2002 of \$4,999,000, or 1.12 percent of average loans and \$1,337,000, or 0.29% of average loans for the third quarter of 2001. Business loan net charge-offs were \$157,000 for the third quarter 2002, compared to \$3,147,000 for the second quarter of 2002. Consumer loan net charge-offs were \$1,114,000 for the third quarter 2002, compared to \$1,737,000 for the second quarter of 2002. The uncertain economic environment in the second quarter of 2002, together with credit difficulties of several business borrowers led to an increase in the Corporation's provision for loan losses and charge-offs for the second quarter of 2002.

For the nine months ended September 30, 2002, the provision for loan losses was \$9,751,000 compared to \$7,353,000 for the same period of 2001. Net charge-offs for the nine months ended September 30, 2002 were \$8,537,000 compared to \$4,489,000 for the first nine months of 2001. The increase in net charge-offs is primarily due to business loan charge-offs in the second quarter of 2002.

Allowance for Loan Losses to Non-Performing Loans	120.04	99.60	120.04	99.60

The level of non-performing assets declined for the third straight quarter. Non-performing assets at September 30, 2002 were \$41,254,000, or 2.22 percent of loans and other real estate owned ("OREO") compared with \$42,037,000, or 2.31 percent of loans and OREO at June 30, 2002, \$45,720,000, or 2.60 percent of loans and OREO, at March 31, 2002, and \$46,803,000, or 2.65 percent of loans and OREO at December 31, 2001. Active management of the collection process throughout this period of rapidly increasing consumer loan delinquencies ultimately led to reductions in consumer and residential non-performing loans by either reinstating these loans to current status or processing the loans through foreclosure proceedings to OREO. Non-performing assets at September 30, 2001 were \$40,901,000 or 2.23 percent of loans and OREO. The increase in the level of OREO reflects the processing of non-performing assets to their ultimate resolution.

Non-Interest Income

Total non-interest income was \$11,111,000 for the three months ended September 30, 2002, compared with \$11,857,000 for the same period in 2001. For the nine months ended September 30, 2002 and 2001, total non-interest income was \$35,560,000 and \$34,116,000.

Loan and deposit charges increased 22 percent to \$4,230,000 in the third quarter of 2002 compared to \$3,457,000 in the third quarter of 2001. For the nine months ended September 30, 2002 and 2001 loan and deposit charges were \$11,637,000 and \$8,804,000. The growth from both periods of 2001 resulted from a new fee initiative introduced in the second quarter of 2001, increased account analysis fees from business demand accounts, and an expanded core checking and savings account base.

Loan servicing income in the third quarter of 2002 was a loss of \$22,000 compared to income of \$398,000 in the third quarter 2001. Loan servicing income for the first nine months of 2002 was \$412,000 compared to \$849,000 for the same period in 2001. Increasing residential and home equity loan prepayments speeds in 2002 reduced loan servicing fees and increased impairment in capitalized loan servicing rights when compared to the same periods of 2001.

Loan fees totaled \$545,000 for the three months ended September 30, 2002 compared to \$938,000 in the same period one year ago. For the nine months ended September 30, 2002 and 2001, loan fees were \$1,942,000 and \$2,931,000. This decline in fees is primarily due to lower fees collected on business loan origination and servicing activities and decreased single-family construction loan originations and reflects competitive pressures on fee pricing and loan originations.

FirstTrust Indiana's fees increased three percent and 19 percent to \$637,000 and \$1,965,000 in the third quarter and first nine months of 2002 compared to the same periods last year. Because a portion of First Trust's fees are based on investment valuation, fee income growth slowed in the third quarter of 2002 as the market value of managed investments declined. The Bank's investment advisory and trust division had assets under management at September 30, 2002 of \$621,311,000, compared to \$608,146,000 one year earlier.

Somerset Financial Services fees for the third quarter 2002 were \$1,864,000 compared to \$1,600,000 for the third quarter 2001, an increase of 17 percent. Somerset fees for the first nine months of 2002 increased 10 percent to \$8,686,000 from \$7,895,000 for the same period of 2001. Investment product sales commissions, generated by the Bank's subsidiary First Indiana Investor Services, increased 13 percent to \$685,000 in the third quarter of 2002 from \$604,000 in the third quarter of 2001. For the nine months ended September 30, 2002, investment product sales commissions grew 58 percent to \$2,220,000 from \$1,407,000 for the same period of 2001. Somerset Financial Services and First Indiana Investor Services have increased fee-generating activities as a result of the Corporation's strategy of expanding client relationships.

Gain on the sale of loans in the third quarter of 2002 was \$2,605,000 compared to \$2,420,000 for the same quarter last year. Gains on the sale of loans was \$6,538,000 for the first nine months of 2002 compared to \$7,583,000 for the first nine months of last year. Consumer loans sold in the third quarter of 2002 totaled \$78,483,000 compared to \$79,134,000 in the third quarter of 2001. For the nine months ended September 30, 2002 and 2001, consumer loans sold totaled \$215,780,000 and \$207,128,000. In the third quarter of 2002, First Indiana sold \$27,524,000 of home equity lines of credit in an effort to establish a market for this loan product. In the future, management expects a portion of these loans to be designated as available for sale at the date of origination. When compared to the first nine months of 2001, gain on the sale of loans for the nine months ended September 30, 2002 was down primarily due to lower prices following relatively high prices realized in 2001. However in the third quarter of 2002, loan pricing improved over previous quarters of 2002.

In the second quarter of 2002, the Corporation sold \$10,000,000 of securities available for sale for a net gain of \$223,000. In the third quarter of 2001, the Corporation sold \$20,000,000 of securities available for sale for a net gain of \$543,000. In the third quarter of 2001, the Corporation recognized a \$563,000 gain on the disposal of a former branch building compared to a net loss of \$74,000 on the disposal of equipment in the third quarter of 2002.

Non-Interest Expense

Non-interest expense for the three months ended September 30, 2002 was \$16,767,000 compared to \$17,316,000 for the same period in 2001, a decrease of three percent. For the nine months ended September 30, 2002 and 2001, total non-interest expense was \$49,150,000 and \$50,737,000, a decrease of three percent.

Salaries and benefits for the third quarter of 2002 were \$9,526,000 compared to \$9,584,000 for the third quarter of 2001. For the first nine months of 2002, salaries and benefits were \$28,179,000, compared to \$28,500,000 for the same period of 2001. Salary expense was \$7,617,000 in the third quarter of 2002 and \$8,039,000 for the third quarter of 2001. Salary expense for the first nine months of 2002 was \$22,815,000 compared to \$23,855,000 for the first nine months of 2001. The increase in loan charge-offs led to a significant reduction in the management incentive accrual during the second quarter of 2002. In the third quarter, the continued economic slowdown necessitated further reductions in the incentive accrual. Partially offsetting these reductions were normal salary increases and staffing growth in the Corporation's commercial lending and Somerset Financial Services lines of business. Employee benefits expense was \$1,909,000 for the third quarter of 2002 and \$1,545,000 for the third quarter of 2001. Employee benefits expense was \$5,364,000 for the nine months ended September 30, 2002 and \$4,645,000 for the same period of 2001. The increase in 2002 consisted largely of increased pension, group insurance, and payroll tax expenses.

Net occupancy expense in the third quarter of 2002 increased 13 percent to \$1,060,000 from \$937,000 in the third quarter of 2001. Net occupancy expense for the first nine months of 2002 increased 12 percent to \$3,081,000 from \$2,759,000 for the comparable period of 2001. These increases are due to normal increases in rental expense, rental expense for new branch facilities, and related increases in utilities, depreciation, and maintenance expenses.

Professional services expense was \$3,231,000 for the first nine months of 2002 compared to \$2,958,000 for the first nine months of 2001. This increase is primarily due to increased expenses associated with loan delinquencies and foreclosures in 2002.

Equipment, marketing, and telephone, supplies, and postage expenses decreased in the third quarter and first nine months of 2002 compared to the same periods last year as a result of ongoing expense control efforts.

In accordance with the provisions of SFAS 142, the Corporation ceased the amortization of goodwill beginning January 1, 2002. Goodwill amortization for the third quarter and first nine months of 2001 was \$229,000 and \$692,000, respectively.

Other non-interest expense in the third quarter increased 10 percent to \$2,286,000 from \$2,070,000 in the third quarter of 2001. Other non-interest expense for the first nine months of 2002 increased four percent to \$5,930,000 from \$5,720,000 for the comparable period of 2001. When compared to 2001, the Bank has incurred higher operating expenses in 2002 to manage non-performing loans. Included in other non-interest expense in the first quarter of 2002 was a \$128,000 loss on the disposition of Somerset Financial Services' 50 percent stake in Paradym Technologies, Inc. ("Paradym"). As a condition of the approval of the Bank's charter change, federal regulators required the disposition of Paradym. The Corporation's efficiency ratio was 54.95 percent for the third quarter of 2002, compared to 56.41 percent for the third quarter of 2001. The Corporation's efficiency ratio for the nine months ended September 30, 2002 and 2001 was 54.23 percent and 55.78 percent. The decrease in non-interest expense compared to last year for both periods presented helped to lower the efficiency ratio.

Financial Condition

Total assets at September 30, 2002 were \$2,132,631,000, an increase of \$85,974,000 from \$2,046,657,000 at December 31, 2001 and an increase of \$3,479,000 from \$2,129,152,000 at September 30, 2001.

Loans at September 30, 2002 were \$1,847,504,000, compared with \$1,756,486,000 at December 31, 2001 and \$1,827,732,000 at September 30, 2001. The continued effects of the loan portfolio restructuring are evident from growth in the targeted portfolios of business and commercial real estate loans. Business loans at September 30, 2002 were \$515,478,000, compared to \$413,398,000 at September 30, 2001. Commercial real estate loans at September 30, 2002 were \$145,779,000, compared to \$118,517,000 at September 30, 2001. Consumer and residential mortgage loan outstandings declined as a result of prepayments due to the lower interest rate environment. Consumer loans outstanding also declined due to sales of home equity lines of credit totaling \$27,524,000. Though residential mortgages also decreased as a result of

the Corporation's strategy to de-emphasize origination of residential mortgages, prepayments caused outstandings to decline faster than anticipated. To counteract this decrease, the Bank purchased a total of \$84,090,000 in residential mortgage loans in 2002.

Total deposits were \$1,414,788,000 at September 30, 2002, compared with \$1,379,478,000 at December 31, 2001 and \$1,390,549,000 at September 30, 2001. Due to the Corporation's continuing relationship-oriented strategy, the mix of deposits shifted to an increased percentage of demand and savings core deposits, which reduced the Corporation's dependence on higher-interest certificates of deposit and borrowed funds. Demand deposits were \$330,768,000 at September 30, 2002 compared to \$305,198,000 at December 31, 2001 and \$260,030,000 at September 30, 2001, an increase of eight percent and 27 percent, respectively. Average demand deposits for the first nine months of 2002 and 2001 were \$308,493,000 and \$244,302,000, an increase on average of \$64,191,000 or 26 percent. Savings deposits were \$395,811,000 at September 30, 2002 compared to \$447,832,000 at December 31, 2001 and \$418,322,000 at September 30, 2001. Savings deposits for the first nine months of 2002 averaged \$425,987,000, an increase of six percent when compared to the same period of 2001. Certificates of deposit were \$688,209,000 at September 30, 2002, compared to \$626,448,000 at December 31, 2001 and \$712,197,000 at September 30, 2001. Certificates of deposits averaged \$638,106,000 and \$763,809,000 for the first nine months of 2002 and 2001.

Short-term borrowings increased to \$138,185,000 at September 30, 2002 compared with \$121,082,000 at December 31, 2001 and \$124,983,000 at September 30, 2001. Federal Home Loan Bank ("FHLB") advances totaled \$319,532,000 at September 30, 2002, compared with \$296,647,000 at December 31, 2001 and \$356,647,000 at September 30, 2001.

Capital

At September 30, 2002, shareholders' equity was \$223,541,000, or 10.48 percent of total assets, compared with \$209,031,000, or 10.21 percent, at December 31, 2001 and \$212,687,000, or 9.99 percent, at September 30, 2001.

On January 16, 2002, the Board of Directors approved a five-for-four stock split, which was effected on February 27, 2002. All share and per share information has been restated to reflect the stock split.

The Corporation paid a quarterly dividend of \$0.16 per common share on September 16, 2002 to shareholders of record as of September 6, 2002. This reflects a 25 percent increase from the quarterly dividend of \$0.128 per share in 2001. Dividends paid during the first nine months of 2002 and 2001 were \$0.48 and \$0.384 per share.

First Indiana Corporation is subject to capital requirements and guidelines imposed on bank holding companies by the Federal Reserve Board. First Indiana Bank is subject to capital requirements and guidelines imposed on national banks by the Office of the Comptroller of the Currency. The Corporation and the Bank are required by their respective regulators to maintain minimum capital ratios. The Federal Deposit Insurance Corporation Improvement Act of 1999 (“FDICIA”) established ratios and guidelines for banks to be considered “well-capitalized.” These capital requirements establish higher capital standards for banks and bank holding companies that assume greater risks. For this purpose, assets and certain specified off-balance sheet commitments are assigned to four risk categories, each weighted differently based on the level of credit risk ascribed to such assets or commitments.

The following table shows the Corporation’s and the Bank’s capital levels and compliance with all capital requirements at September 30, 2002. Additionally, the Bank exceeds the capital levels set by FDICIA for a bank to be considered well-capitalized.

Liquidity

First Indiana Corporation conducts its business through subsidiaries. The main source of funds for the Corporation is dividends from the Bank. The Corporation has no significant assets other than its investments in the Bank and Somerset.

The Bank’s primary source of funds is deposits, which were \$1,414,788,000 at September 30, 2002, \$1,379,478,000 at December 31, 2001, and \$1,390,549,000 at September 30, 2001. The Bank also relies on FHLB advances, repurchase agreements, loan payments, loan payoffs, and sale of loans as sources of funds. Although the Bank continues to rely on core deposits as its chief source of funds, the use of borrowed funds, including FHLB advances, continues to be an important component of the Bank’s liquidity. Scheduled loan payments are a relatively stable source of funds, but loan payoffs, the sale of loans, and deposit inflows and outflows fluctuate, depending on interest rates and economic conditions. However, management does not expect any of these fluctuations to occur in amounts that would affect the Corporation’s ability to meet consumer demand for liquidity or regulatory liquidity requirements.

Pending Business Combination

On September 4, 2002, First Indiana signed an agreement to acquire the outstanding shares of Carmel, Indiana-based MetroBanCorp. MetroBanCorp is the holding company for MetroBank, with assets of \$174,000,000 and seven offices in suburban Indianapolis, Carmel, Fishers, and Noblesville. In the merger, MetroBanCorp shareholders will receive \$17.00 in cash in exchange for each share of MetroBanCorp stock. The total value of the merger is currently estimated at approximately \$40,000,000. Upon completion of the merger, First Indiana will have approximately \$2,300,000,000 in assets and 33 banking centers in Central Indiana. The acquisition is expected to close in the first quarter of 2003 and is subject to certain regulatory approvals and approval by MetroBanCorp's shareholders.

In the fourth quarter of 2002, the Corporation plans to issue \$12,000,000 in Trust Preferred Securities. Proceeds from the issuance of these securities will be used to partially fund the purchase of MetroBanCorp. Under regulatory capital guidelines, the Corporation may include these securities as Tier 1 Capital, subject to certain limitations. Upon completion of this acquisition, the Corporation anticipates its regulatory capital ratios will remain in compliance with all capital requirements. Existing liquidity within the Corporation, including preexisting funding sources, is expected to provide the remaining funding for this transaction.

Item 3. Disclosures About Market Risk

Asset/Liability Management

First Indiana engages in rigorous, formal asset/liability management, with objectives to manage interest rate risk, ensure adequate liquidity, and coordinate sources and uses of funds. The management of interest rate risk entails the control, within acceptable limits, of the impact on earnings caused by fluctuating interest rates and changing rate relationships. In this process, management uses an internal earnings simulation model to identify and measure interest rate sensitivity. The Asset/Liability Committee (“ALCO”) reviews the earnings impact of various changes in interest rates each month and manages the risk to maintain an acceptable level of change in net interest income. The Board of Directors also reviews this information every quarter.

The Corporation’s success is largely dependent upon its ability to manage interest rate risk, which is defined as the exposure of the Corporation’s net interest income and net earnings to changes in interest rates. ALCO is responsible for managing interest rate risk, and the Corporation has established acceptable limits for interest rate exposure, which are reviewed monthly. The Corporation uses a model that measures interest rate sensitivity to determine the impact on net interest income of immediate and sustained upward and downward movements in interest rates. Incorporated into the model are assumptions regarding the current and anticipated interest rate environment, estimated prepayment rates of certain assets and liabilities, forecasted loan and deposit originations, contractual maturities and renewal rates on certificates of deposits, estimated borrowing needs, expected repricing spreads on variable-rate products, and contractual maturities and repayments on lending and investment products. The model incorporates interest rate sensitive instruments that are held to maturity or available for sale. The Corporation has no trading assets. Based on the information and assumptions in effect at September 30, 2002, the model forecasts that a 100 basis point increase in interest rates over a 12-month period would result in a 3.8 percent increase in net interest income while a 100 basis point decrease in interest rates would result in a 4.9 percent decrease in net interest income. Because of the numerous assumptions used in the computation of interest rate sensitivity, and the fact that the model does not assume any actions ALCO could take in response to the change in interest rates, the model forecasts may not be indicative of actual results.

The Corporation also monitors interest rate sensitivity using traditional gap analysis. Gap analysis is a static management tool used to identify mismatches in the repricing of assets and liabilities within specified periods of time. It is a static indicator and does not attempt to predict the net interest income of a dynamic business in a rapidly changing environment. Significant adjustments may be made when the interest rate outlook changes.

At September 30, 2002, First Indiana’s six-month and one-year cumulative gaps stood at a positive 9.67 percent and a positive 11.65 percent of total interest-earning assets. This compares with a positive 5.43 percent and a positive 3.30 percent at December 31, 2001.

The following table shows First Indiana's interest rate sensitivity at September 30, 2002 and December 31, 2001.

(Dollars in Thousands)

	Rate	Balance	Percent of Total	Within 180 Days	Over 180 Days to One Year	Over One Year to Five Years	Over Five Years
Interest-Earning Assets

Percent of Total Interest-Earning Assets				<u>5.43%</u>	<u>3.30%</u>	<u>17.11%</u>	

- (1) The distribution of fixed-rate loans is based upon contractual maturity and scheduled contractual repayments adjusted for estimated prepayments. The distribution of adjustable-rate loans is based on the earliest repricing date for each loan. Included in consumer loans are \$17.0 million of home equity loans held for sale.
- (2) A portion of these deposits has been included in the Over Five Years category to reflect management's assumption that these accounts are not rate-sensitive. This assumption is based upon the historic trends on these types of deposits experienced through periods of significant increases and decreases in interest rates without changes in rates paid on these deposits. The rates represent a blended rate on all deposit types in the category.
- (3) Net - Other is the excess of non-interest-bearing liabilities and capital over non-interest-earning assets.

Item 4. Controls and Procedures

Based on their most recent evaluation, which was completed within 90 days of the filing of this Form 10-Q, the Company's Chief Executive Officer and Chief Financial Officer believe the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) are effective. There were not any significant changes in internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Part II Other Information

Items 1, 2, 3, and 4 are not applicable.

Item 5. Other Information

- (a) *Information on Forward-Looking Statements* – Statements contained in this presentation that are not historical facts may constitute forward-looking statements (within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended) which involve significant risks and uncertainties. The Corporation intends such forward-looking statements to be covered by the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of invoking these safe-harbor provisions. The Corporation's ability to predict results or the actual effect of future plans or strategies is inherently uncertain, and involves a number of risks and uncertainties. In particular, among the factors that could cause actual results to differ materially are changes in interest rates, loss of deposits and loan demand to other financial institutions, substantial changes in financial markets in general or the loan market in particular, changes in the real estate market, statutory or regulatory changes, or unanticipated results in pending legal proceedings. The fact that there are various risks and uncertainties should be considered in evaluating forward-looking statements, and undue reliance should not be placed on such statements. The Corporation undertakes no obligation to publicly release the results of any revisions to these forward-looking statements which may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

- 2 Agreement and Plan of Merger dated September 4, 2002, by and among MetroBanCorp, Inc. and MetroBank and First Indiana Corporation, FIC Acquisition Corp. and First Indiana Bank, National Association incorporated by reference to Exhibit 2 of the Form 8-K filed September 6, 2002.
- 3(i) Articles of Incorporation of First Indiana Corporation, incorporated by reference to Exhibit 3(a) to the Annual Report on Form 10-K of First Indiana Corporation for the year ended December 31, 2000.
- 3(ii) Amended and Restated Bylaws of First Indiana Corporation, incorporated by reference to Exhibit 3(b) to the Annual Report on Form 10-K of First Indiana Corporation for the year ended December 31, 2000.
- 4 Amendment to Rights Agreement, incorporated by reference to Exhibit 4 of the Form 10-Q of First Indiana Corporation, which was filed on May 13, 2002.
- 99 Certifications pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) Reports on Form 8-K

- (i) On July 17, 2002, a Form 8-K was filed related to the July 16, 2002, second quarter 2002 earnings release.
- (ii) On July 25, 2002, a Form 8-K was filed related to the July 23, 2002, press release announcing the declaration of a quarterly dividend.
- (iii) On August 9, 2002, a Form 8-K was filed related to a slide presentation given to various investor groups on August 8, 2002.
- (iv) On September 4, 2002, a Form 8-K was filed related to the agreement to purchase the outstanding shares of MetroBanCorp.
- (v) On September 6, 2002, a Form 8-K was filed with the Agreement and Plan of Merger dated September 4, 2002, by and among MetroBanCorp, Inc. and MetroBank and First Indiana Corporation, FIC Acquisition Corp. and First Indiana Bank, National Association.

Vice President and Treasurer
(Principal Financial Officer)

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

I, Marni McKinney, certify that:

1. I have reviewed this quarterly report on Form 10-Q of First Indiana Corporation;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
