PART I -- FINANCIAL INFORMATION

Item 1. Financial Statements

REPORT ON REVIEW BY INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Board of Directors,
KleenAir Systems, Inc.
Aliso Viejo, CA

We have reviewed the accompanying consolidated balance sheet of KleenAir Systems, Inc. (a development stage enterprise) (the "Company") as of March 31, 2005, and the related consolidated statements of operations, stockholders' equity, and cash flows for three months ended March 31, 2005 and 2004. We have also reviewed the cumulative statements of operations, stockholders' equity and cash flows for the period from January 1, 1995 through March 31, 2005. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of Company personnel responsible for financial and accounting matters. It is substantially less in scope than an audit in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements for them to be in conformity with accounting principles generally accepted in the United States.

We have previously audited, in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Company as of December 31, 2004, and the related statements of operations, stockholders' equity and cash flows for the year and cumulative period then ended (not presented herein); and, in our report dated March 31, 2005, we expressed an opinion on those financial statements which was qualified based on the Company's ability to continue as a going concern. In our opinion, the information set forth in the accompanying interim consolidated balance sheet as of December 31, 2004, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

KLEENAIR SYSTEMS, INC.
(A Development Stage Enterprise)
SELECTED INFORMATION FOR CONSOLIDATED FINANCIAL STATEMENTS
March 31, 2005
(Unaudited)

NOTE 1: BASIS OF PRESENTATION

The accompanying unaudited financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions of Regulation S-B. They do not include all information and footnotes required by generally accepted accounting principles for complete financial statements. However, except as disclosed herein, there has been no material change in the information included in the Company's Annual Report on Form 10-KSB for the year ended December 31, 2004. In the opinion of Management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The report of Robert Early & Company, P.C. commenting on their review accompanies the financial statements included in Item 1 of Part 1. Operating results for the three-month period ended March 31, 2005, are not necessarily indicative of the results that may be expected for the year ending December 31, 2005.

NOTE 2: SUPPLEMENTAL CASH FLOW DISCLOSURES

The following table sets forth supplemental cash flow disclosures.

	<u>2005</u>	<u>2004</u>	<u>Cumulative During Devel- opment Stage</u>
Cash payments for:			
Interest	\$ 960	\$ 1,615	\$ 14,855
Income taxes	-	-	-
Non-cash investing and financing transactions:			
Stock issued for:			
Compensation and directors fees	\$ -	\$ -	\$ 1,417,850
Services and prepaid services	150	98,085	3,156,550
Equipment	-	-	8,300
Patent licensing	-	-	14,900
Repurchase of U.S. diesel license	-	-	62,500
Acquisition of National Diversified Telecom, Inc.	-	-	140,550
Sale of marketing licenses for notes receivable	-	-	1,736,558
Acquisition of Carbon Cloth Technologies, Inc.	-	-	981,514
Uncompleted business acquisition	-	-	87,500
Investment in marketable security	-	907,155	1,408,234

NOTE 3: STOCK TRANSACTIONS

During the first quarter of 2005, the Company issued 1,500 unrestricted S-8 shares valued at \$150 for clerical services.

NOTE 4: PROPERTY AND EQUIPMENT

The Company has purchased testing equipment, test vehicles, and office equipment and furniture as presented in the following table. Depreciation expense for the first three quarters of 2004 and 2003 was \$11,041 and \$12,157, respectively.

Office furniture and equipment	\$ 62,277
Test vehicles	28,928
Analysis equipment	174,840
Leasehold improvements	<u>11,682</u>
	277,727
Accumulated depreciation	<u>(176,267)</u>
Net property and equipment	<u>\$ 101,460</u>

NOTE 5: ACCOUNTS RECEIVABLE FROM RELATED PARTIES

This balance consists of amounts due from the Company's affiliate in England. KleenAir Systems International, Plc (trading symbol KSIP.L) is partially owned by the Company. The Company's President also serves as Chairman of the board and President of KSIP.

NOTE 6: MARKETABLE SECURITIES

During 2004, the Company acquired an investment in Langley Park Investments Trust in England in exchange for issuances of a large blocks of its stock. (See the financial statements for the year ended 12/31/04, Note 13.) The Langley Park investment was partially sold during 2004 and partially held at the end of the year.

The following table presents information regarding the Company's investments in marketable securities at March 31, 2005. This security is being held as a trading security.

Aggregate cost basis	\$ 387,079
Unrealized gain/(loss)	<u>(204,269)</u>
Aggregate fair value (carrying value)	<u>\$ 182,810</u>

NOTE 7: SUBSEQUENT EVENTS

During April 2005, the Company has issued 1,000,000 restricted shares to ServoTech Industries, Inc. for services to be performed to update the controller and other aspects of the NOxMaster™ with current technologies. Hamid Servati resigned as a director of the Company in connection with this agreement to avoid conflict of interest issues.

The Company has also moved its principle offices to a new location in Aliso Viejo, CA.

Item 2. Management's Discussion and Plan of Operation

The Company was incorporated under the laws of the State of Nevada on February 4, 1986, under the name of Covington Capital Corporation. In 1986, the Company filed an S-18 and registered certain stock. From 1989 through 1993, the Company underwent a series of name changes in order to explore various business opportunities. However, none of the business opportunities was successfully completed.

In April, 1995, under the name Investment and Consulting International, Inc., the Company acquired a patent for a proprietary device designed to neutralize nitrogen oxide automobile emissions from a separate company which was then known as KleenAir Systems, Inc. Simultaneously with the acquisition of the patent, the Company acquired the right to use the corporate name KleenAir Systems, Inc., and changed to its current name.

Since acquiring the patent in 1995, the Company has been a developmental stage company and has worked towards the completion of the development and testing of the NOxMaster™ technology. The Company owns U.S. Patent #5,224,346, Engine NOx Reduction System, issued in 1993, U.S. Patent #5,609,026, Engine NOx Reduction, issued in 1997. In 1999 the Company was issued a third patent on Ammonia Injection in NOx Control, U.S. Patent #5,992,141. The Company has applied for and maintained patent protection under the Patent Cooperation Treaty (PCT) to protect its intellectual property in a variety of countries that are significant producers of automotive products.

The Company has applied for additional patents related to its NOxMaster™ technology, two of which have been granted. The U.S. Patent #6,446,940 has been issued for a new emission control device, the Sonic Flow Carburetor, which atomizes fuel on gasoline powered engines, enhancing operating efficiency and reducing emissions. An additional U.S. Patent #6,499,463 has been issued for a device which atomizes diesel fuel to enhance the performance of and reduce emissions in diesel engines. Patent awards have now been confirmed for several European countries including the U.K., Germany, France, Italy, Spain and Sweden. Confirmation is anticipated soon for Japan, Brazil, and China.

An additional patent was issued in February 2005, U.S. Patent # 6,852,292. This patent covers the use of aqueous ammonia (ammonia dissolved in water which is typically used as household or industrial cleaner). When injected into the exhaust, this liquid solution reduces NOx in a manner similar to that of anhydrous ammonia (a gas). With these two forms of Selective Catalytic Reductant (SCR), the Company believes it is well-positioned to compete with Urea systems. Urea systems are the main alternative means of delivering ammonia into the exhaust stream.

The Company's offices are located in a 2,000 square foot facility at 27121 Aliso Creek Road, Suite 120, Aliso Viejo, CA 92656. The Company has loaned its R & D testing equipment to its strategic partner, Dinex Exhausts, Inc., which is occupying a several thousand square foot facility in the City of Industry, CA. This arrangement calls for Dinex use this equipment to conduct test and evaluations of systems to be presented to the California Air Resource Board (CARB) and the Environment Protection Agency (EPA). The Company and Dinex will jointly apply for Retrofit Verification to these agencies for certain applications of its combined technologies. KleenAir will from time to time continue to use the equipment, of which it has retained ownership, for its own exclusive testing and development programs.

As a result of an extensive test and evaluation program over the last 4 years funded by the Energy Savings Trust (EST) in England in which our product was implemented on a variety of vehicles, the Company has now been included as an approved vendor on the EST Cleanup Register in a number of categories.

The Company is the only entry in the SCR category for retrofit. In addition, the Company's Selected Catalytic Reduction and Filter (SCRf) systems, which combine high levels of emission reduction for both NOx and PM (Particulate Matter) together with CO and HC, has become the sole entry for light and medium duty vehicles in a new, especially created category called SCRf, which has the highest level of funding grants. The Eminox is the only other SCRf product for heavy duty vehicles and has recently been added to the Clean Up Register. The Company's systems have now been qualified for a variety of vehicles ranging from light-duty taxi applications, to light commercial vans, shuttle buses and heavy duty transport bus applications.

These qualifications open the door to product launches in a variety of market segments in the U.K. and, subsequently, in other European countries such as Germany and Denmark where our SCRf systems have been installed on eight buses in Copenhagen.

Through the Company's U.K. affiliate, distribution and supply agreements have been established for the KleenAir product line with Dinex A/S of Denmark and Dinex Exhaust Systems Ltd of the U.K. Dinex specializes in after-market sales of particulate filters, silencers and exhaust system components for medium and heavy-duty diesel-powered vehicles. The supply agreement will enable the Company to source product at most favored nation pricing and distribute to its own list of customers in Europe and elsewhere. The Company is in negotiation with a number of fleet operators who are considering retrofitting and upgrading vehicles to Euro 3 requirements.

During 2003 over \$750,000 of system components were shipped to Dinex. However, in October 2003 the EST suspended funding due to budget problems. Funding was not reinstated until April 2004. Orders for systems for over 100 buses, worth \$500,000 in Company sales, were put on hold. The Company is awaiting clarification as to whether these orders will now be funded or whether new applications have to be filed to fund these systems. As of the current date, only limited funding has been released for special programs and it is not clear whether this will include taxis. It is hoped that some of the bus applications applied for will be processed.

The Public Carriage Office (PCO) has announced a mandate for the upgrade of some 17,500 London Taxis to Euro 3 emission standards. The PCO has recently announced that the start date for this program will be delayed from January 2005 until July 2006. It is expected that there will be 3,500 upgrades for 2006, for which Company deliveries from the U.S. to Europe would need to commence during the second quarter of 2006. The estimated number for 2007 is 9,000 with a further 5,000 in 2008. The Company expects that its strategic partner Dinex will be the principal supplier of systems for this application with a net revenue potential to the Company of over \$500 per vehicle.

In his post-election policy statement in July 2004, the Mayor of London, Ken Livingstone, outlined plans for a Low Emission Zone for all areas of London within the M25 Ring Road. It is estimated that this will impact 100,000 to 200,000 vehicles by the end of 2007 and a further 500,000 to 600,000 by the end of 2010. The Company's products already qualify to meet the required emission standards for such mandated upgrades and have been approved by the Energy savings Trust for such applications.

The Company has formed a consortium together with Dinex, ATS Euromaster (a subsidiary of Michelin), Air Products Plc and Terra Nitrogen (U.K.) Ltd for the purpose of creating and supporting the infrastructure for ammonia supply, installation and maintenance. It is anticipated that a similar consortium with the same members will be formed to handle the U.S. infrastructure once EPA and CARB Retrofit Verification has been received.

As the U.K. market is on the threshold of major commercial advances in the use of SCR for retrofit programs, such as London taxis and buses, the Company, in consultation with the Department For Transport (DFT) and Energy Savings Trust (EST), has moved to pull together all the resources necessary for a reliable, efficient and cost-effective infrastructure to support the implementation of its Selected Catalytic Reduction and Filter (SCRf) systems on a variety of vehicles for a number of different applications across the U.K..

U.S. testing continues of the NOxMaster™ Diesel Catalytic Converter together with its NOxMaster™ Ammonia Injection System to present an integrated system for the elimination of emissions from diesel powered mobile sources. The Company has received an EO certification from the California Air Resources Board (CARB) for off-road and stationary engine applications, which will enable it to commence sales of its products in California.

The Company has now received approval from CARB for its applications for Retrofit Verification for medium heavy-duty vehicles using its NOxMaster™ NOx reduction system. Approval has also been received from the EPA to proceed with an application for certification of the combination package of our Oxidizing Particulate Trap (OPT) with the NOxMaster™ for both high particulate reduction as well as high NOx reduction. However, the Company has negotiated an arrangement with the EPA and CARB for a single testing protocol that would satisfy both their requirements rather than having to bear the considerable cost of running two separate test programs for the same product. Applications have been on file with both institutions for a long time. The actual Retrofit Verification Program should now commence during the first quarter of 2006.

The Company's wholly owned subsidiary, Carbon Cloth Technologies, Inc. (Carbon Cloth), of Malibu, California, is a manufacturer of automotive thermal management systems. Carbon Cloth has several years of experience developing thermal solutions for such motorsports industry leaders as Ferrari, Mercedes-Benz and Penske, that has enabled development of the CarbonGuard™, a significant addition to the battle on pollution. It has applied for patents in automotive thermal management systems.

At present the CarbonGuard™ is used to enhance the effectiveness of particulate filters. These filters need to maintain 300 degrees centigrade for 30% of a vehicle's operating time otherwise the filters clog and create back pressure. Wherever particulate filters are currently installed, estimated to be at least 30,000 units at present, the CarbonGuard™ can improve performance and save maintenance expense. Filter technology has come to prominence recently as both the Environmental Protection Agency (EPA) and the California Air Resource Board (CARB) have determined that particulates from vehicle emissions are a serious public health problem.

The CarbonGuard™ is already installed on over 1,000 New York City Transit Authority buses as enhancements for the operating efficiency of its installed base of particulate traps. It has been selected as a sole source product for this application.

The Company is continuing its sales activities on behalf of the SOBRIS™ system under an agency agreement signed in July 2002 with ServoTech Industries, Inc. ServoTech is a licensee of Ford Motor Company on SCR injection technology. Its SOBRIS™ product is under test and evaluation by a number of automotive manufacturers in the U.S. and Europe. Dr. Hamid Servati, President of ServoTech a significant shareholder in the Company.

Once significant production and sales begin, the Company anticipates employing initially 15 to 20 employees, primarily in management, technical and administrative capacities. The Company is actively seeking sources of funding for its operating capital requirements both to complete its test and evaluation programs and to support initial sales and production.

The Company is negotiating potential licensing and other commercial arrangements with certain international companies in the automotive industry, subject to completion of satisfactory test and evaluation programs.

The Company's U.K. affiliate, KleenAir Systems International Plc, successfully raised approximately \$1,500,000 in private equity funding during 2004. This funding diluted the Company's ownership interest from 30% to approximately 23%. The funding strategy is designed to provide the working capital necessary to fully exploit the commercialization opportunities in Europe for the Company's products.

Disclosure Regarding Forward-Looking Statements

Where this Form 10-QSB includes "forward-looking" statements within the meaning of Section 27A and Section 21E of the Securities Act, the Company desires to take advantage of the "safe harbor" provisions thereof. Therefore, the Company is including this statement for the express purpose of availing itself of the protections of such safe harbor provisions with respect to all of such forward-looking statements. The forward-looking statements in this Form 10-QSB reflect the Company's current views with respect to future events and financial performance. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ from those anticipated. These risks include, but are not limited to, economic conditions, changes in environmental regulations, the market for venture capital, etc. In this Form 10-QSB, the words "anticipates," "believes," "expects," "intends," "future" and similar expressions identify forward-looking statements. The Company undertakes no obligation to publicly revise these forward-looking statements to reflect events or circumstances that may arise after the date hereof. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by this section.

Item 3: Controls and Procedures

- (a) Within the 90-day period prior to the date of this report, the Corporation carried out an evaluation, under the supervision and with the participation of the Company's management, including the Corporation's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-14 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures are effective in timely alerting him to material information relating to the Corporation (including its consolidated subsidiaries) required to be included in the Corporation's Exchange Act filings.

- (b) There have been no significant changes in the Corporation's internal controls or in other factors which could significantly affect its internal controls subsequent to the date the Corporation carried out its evaluation.

PART II - OTHER INFORMATION

Item 6. Exhibits and Reports on Form 8-K.

- Exhibit 23 -- Accountants' consent to incorporation by reference
- Exhibit 31 -- Certification of President and Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- Exhibit 32 -- Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- Reports on Form 8-K -- None

SIGNATURES

In accordance with the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

KLEENAIR SYSTEMS, INC.

Date: May 20, 2005

CERTIFICATION

I, Lionel Simons, President and Chief Financial Officer, certify that:

1. I have reviewed this quarterly report on Form 10-QSB of KleenAir Systems, Inc.;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. I am responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and I have:
 - (a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - (b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - (c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing equivalent function):
 - (a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Date: May 20, 2005

EXHIBIT 32 -- Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

CERTIFICATION OF CEO AND CFO PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report on Form 10-QSB of KleenAir Systems, Inc. (the "Company") for the quarterly period ended March 31, 2005 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Lionel Simons, President and Chief Financial Officer of the Company, hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, to the best of his knowledge, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly represents, in all material respects, the financial condition and result of operations of the Company.

/s/ LIONEL SIMONS

Lionel Simons
President and
Chief Financial Officer

May 20, 2005

This certification accompanies this Report pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and shall not, except to the extent required by the Sarbanes-Oxley Act of 2002, be deemed filed by the Company for purposes of Section 18 of the Securities Exchange Act of 1934, as amended.
