2020	\$2.44
2019	\$2.38
2018	\$2.33

TO OUR SHAREHOLDERS

I'm extremely proud to announce another year of strong financial performance at Werner made possible by the resilient and hardworking men and women of 'Team Blue.' Our diversified portfolio, combined with our deeply rooted customer relationships and strong operational execution, paved the road to success.

Revenues increased 20 percent to \$3.3 billion, while our diluted earnings per share decreased only slightly. Our Truckload Transportation Services segment grew revenues by 19 percent and operating income by 5 percent. Our Logistics segment increased revenues by 27 percent and operating income by 30 percent.

As the macroeconomic environment gradually became less favorable as the year progressed, Werner continued to advance by remaining true to our Werner DRIVESM strategy. The framework of DRIVESM provides a sound blueprint to not only weather the storm, but to thrive during times like these. We are built for this.

“

Werner was founded in 1956 with the simple belief that if we do the right thing for our drivers, associates and customers, the results will follow.

”

We took strategic actions to strengthen Werner in the fourth quarter. In October, we acquired Baylor Trucking and in November we acquired ReedTMS Logistics. Both elite companies excel in areas that complement and enhance our trucking and logistics business. Baylor's stellar safety and service combined with ReedTMS' brokerage expertise in the attractive and stable food and beverage industries serve as ideal additions to our portfolio. We welcome the skilled leadership and experienced associates of Baylor and ReedTMS to the Werner family.

Expansion also continues through the growth of our Roadmaster Drivers School network, with 23 nationwide locations that align with our freight base. Credible and accessible CDL education is a cornerstone for preparing the next generation of drivers. Our vertically integrated pipeline is critical to our success for developing high quality drivers for our network and the industry.

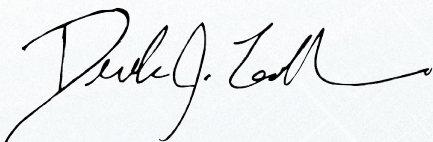

The growth of Werner is exciting, not only for our portfolio, but also for our ESG (Environmental, Social and Governance) commitment and progress. Our Corporate Social Responsibility (CSR) Update report released in September highlights our achievements and holds us accountable for future progress. Because of Werner's prominent role in the supply chain, we have established aggressive ESG goals and are uniquely positioned to help our customers meet and exceed their own sustainability goals. We're proudly recognized as a company who 'walks the walk,' in ESG, superior customer service, military and diversity employment, technology innovation and more.

To evolve and thrive as a transportation and logistics leader, we must provide best-in-class resources and technology, with superior safety and service at the forefront of everything we do. That is why we continually advance our technology to enhance the safety of our professional drivers and the motoring public. We collaborated with Samsara to integrate front-facing cameras in our fleet to better understand what happens on the road and how to prevent incidents in the future. We moved our tech stack and operations to the Cloud and this year we began the deployment of MasterMind TMS, a state-of-the art transportation management system.

As we continue our journey toward our growth goal of becoming a \$5 billion company in 2026, our non-driver associates, mechanics and professional drivers all play a key role in upholding our best-in-class standards. I am deeply proud and grateful for the hard work, dedication, resilience and innovation of the Werner team.

Thank you to all our stakeholders including our customers, shareholders, suppliers and associates for your continued confidence and trust. We look forward to the challenges and opportunities ahead, and together, we will continue to raise the bar at Werner.

March 14, 2023

Derek J. Leathers

This Annual Report on Form 10-K for the year ended December 31, 2022 (this “Form 10-K”) and the documents incorporated herein by reference contain forward-looking statements based on expectations, estimates and projections as of the date of this filing. Actual results may differ materially from those expressed in such forward-looking statements. For further guidance, see Item 1A of Part I and Item 7 of Part II of this Form 10-K.

Unless otherwise indicated, references to “we,” “us,” “our,” “Company,” or “Werner” mean Werner Enterprises, Inc. and its subsidiaries.

PART I

ITEM 1. BUSINESS

General

We are a transportation and logistics company engaged primarily in transporting truckload shipments of general commodities in both interstate and intrastate commerce. We also provide logistics services through our Werner Logistics segment. We believe we are one of the largest truckload carriers in the United States (based on total operating revenues), and our headquarters are located in Omaha, Nebraska, near the geographic center of our truckload service area. We were founded in 1956 by Clarence L. Werner, who started the business with one truck at the age of 19. He served as our Chairman until his term ended at the 2021 Annual Meeting of Stockholders, and was then named Chairman Emeritus by the Board of Directors in recognition of his longstanding leadership. We were incorporated in the State of Nebraska in September 1982 and completed our initial public offering in June 1986 with a fleet of 632 trucks as of February 1986. At the end of 2022, our Truckload Transportation Services (“TTS”) segment had a fleet of 8,600 trucks, of which 8,305 were company-operated and 295 were owned and operated by independent contractors. Our Werner Logistics division operated an additional 39 drayage company trucks and 101 company delivery trucks at the end of 2022. We have historically grown through organic growth, and more recently through a combination of organic growth and four business acquisitions (discussed below). Our business acquisitions expanded our fleet size, customer base, geographic market presence, and network of operational facilities. We remain open to considering acquisitions in North America truckload and logistics companies that are both additive to our business and accretive to our earnings.

We have two reportable segments – TTS and Werner Logistics. Our TTS segment is comprised of Dedicated and One-Way Truckload. Dedicated had 5,450 trucks as of December 31, 2022 and provides truckload services dedicated to a specific customer, generally for a retail distribution center or manufacturing facility, utilizing either dry van or specialized trailers. One-Way Truckload had 3,150 trucks as of December 31, 2022 and includes the following operating fleets: (i) the medium-to-long-haul van (“Van”) fleet transports a variety of consumer nondurable products and other commodities in truckload quantities over irregular routes using dry van trailers, including Mexico cross-border routes; (ii) the expedited (“Expedited”) fleet provides time-sensitive truckload services utilizing driver teams; (iii) the regional short-haul (“Regional”) fleet provides comparable truckload van service within geographic regions across the United States; and (iv) the Temperature Controlled fleet provides truckload services for temperature sensitive products over irregular routes utilizing temperature-controlled trailers. Our TTS fleets operate throughout the 48 contiguous U.S. states pursuant to operating authority, both common and contract, granted by the U.S. Department of Transportation (“DOT”) and pursuant to intrastate authority granted by various U.S. states. We also have authority to operate in several provinces of Canada and to provide through-trailer service into and out of Mexico. The principal types of freight we transport include retail store merchandise, consumer products, food and beverage products and manufactured products. We focus on transporting consumer nondurable products that generally ship more consistently throughout the year and whose volumes are generally more stable during a slowdown in the economy.

Our Werner Logistics segment is a non-asset-based transportation and logistics provider. Werner Logistics provides services throughout North America and generates the majority of our non-trucking revenues through three operating units. These three Werner Logistics operating units are as follows: (i) Truckload Logistics, which uses contracted carriers to complete shipments for brokerage customers and freight management customers for which we offer a full range of single-source logistics management services and solutions; (ii) the intermodal (“Intermodal”) unit offers rail transportation through alliances with rail and drayage providers as an alternative to truck transportation; and (iii) Werner Final Mile (“Final Mile”) offers residential and commercial deliveries of large or heavy items using third-party agents, independent contractors, and Company employees with two-person delivery teams operating a liftgate straight truck. In first quarter 2021, we completed the sale of the Werner Global Logistics (“WGL”) freight forwarding services for international ocean and air shipments to Scan Global Logistics Group. WGL generated revenues of \$53 million in 2020. Prior to the sale of WGL, Werner Logistics provided international services throughout North America and Asia, with additional coverage throughout Australia, Europe, South America, and Africa. Werner Logistics had over 70,000 qualified carrier logistics relationships as of December 31, 2022.

Business Acquisitions

2022 Acquisitions

On November 5, 2022, we acquired 100% of the equity interests in Reed Transport Services, Inc. and RTS-TMS, Inc., doing business as ReedTMS Logistics ("ReedTMS"). ReedTMS, based in Tampa, Florida, is an asset-light logistics provider and dedicated truckload carrier that offers a comprehensive suite of freight brokerage and truckload solutions to a diverse customer base. Prior to the acquisition, ReedTMS achieved revenues of \$372.0 million for the 12-month period ended September 30, 2022, 90% freight brokerage and 10% trucking. Freight brokerage and truckload revenues generated by ReedTMS are reported in our Werner Logistics segment and in Dedicated within our TTS segment, respectively.

On October 1, 2022, we acquired 100% of the equity interests in FAB9, Inc., doing business as Baylor Trucking, Inc. ("Baylor"). Baylor, based in Milan, Indiana, operates 200 trucks and 980 trailers in the east central and south central United States. Prior to the acquisition, Baylor achieved revenues of \$81.5 million for the 12-month period ended August 31, 2022. Revenues generated by Baylor are reported in One-Way Truckload within our TTS segment.

2021 Acquisitions

On November 22, 2021, we acquired 100% of the equity interests in NEHDS Logistics, LLC ("NEHDS"). NEHDS is a final mile residential delivery provider serving customers primarily in the Northeast and Midwest United States markets. NEHDS delivers primarily big and bulky products (primarily furniture and appliances) using 2-person delivery teams performing residential and commercial deliveries. Prior to the acquisition, NEHDS achieved revenues of \$71 million for the 12-month period ended September 30, 2021. Revenues generated by NEHDS are reported in Final Mile within our Werner Logistics segment.

On July 1, 2021, we acquired an 80% equity ownership interest in ECM Associated, LLC ("ECM"). ECM provides regional truckload carrier services in the Mid-Atlantic, Ohio and Northeast regions of the United States. Prior to the acquisition, ECM achieved revenues of \$108 million in 2020. Revenues generated by ECM are reported in One-Way Truckload within our TTS segment.

Additional information regarding these acquisitions is included in Note 2 in the Notes to Consolidated Financial Statements under Item 8 of Part II of this Form 10-K.

Marketing and Operations

Our business philosophy is to provide superior on-time customer service at a significant value for our customers. To accomplish this, we operate premium modern tractors and trailers. This equipment has fewer mechanical and maintenance issues and helps attract and retain experienced drivers. We continually develop our business processes and technology to improve customer service and driver retention. We focus on customers who value the broad geographic coverage, diversified truck and logistics services, equipment capacity, technology, customized services and flexibility available from a large, financially-stable transportation and logistics provider.

We operate in the truckload and logistics sectors of the transportation industry. Our TTS segment provides specialized services to customers based on (i) each customer's trailer needs (such as van and temperature-controlled trailers), (ii) geographic area (regional and medium-to-long-haul van, including transport throughout Mexico and Canada), (iii) time-sensitive shipments (expedited) or (iv) conversion of their private fleet to us (dedicated). In 2022, TTS segment revenues accounted for 74% of total operating revenues, Werner Logistics revenues accounted for 24% of total operating revenues, and the remaining 2% was recorded in non-reportable segments. Our Werner Logistics segment manages the transportation and logistics requirements for customers, providing customers with additional sources of truck capacity, alternative modes of transportation, and systems analysis to optimize transportation needs. Werner Logistics services include (i) truck brokerage, (ii) freight management, (iii) intermodal transport, and (iv) final mile. Werner Logistics is highly dependent on qualified associates, information systems and the services of qualified third-party capacity providers. You can find the revenues generated by services that accounted for more than 10% of our consolidated revenues, consisting of TTS and Werner Logistics, for the last three years in Note 3 and Note 13 in the Notes to Consolidated Financial Statements under Item 8 of Part II of this Form 10-K.

We have a diversified freight base but are dependent on a relatively small number of customers for a significant portion of our revenues. During 2022, our largest 5, 10, 25 and 50 customers comprised 35%, 46%, 63% and 77% of our revenues, respectively. Our largest customer, Dollar General, accounted for 14% of our total revenues in 2022. Revenues generated by Dollar General are reported in both of our reportable operating segments. The industry groups of our top 50 customers are 60% retail and consumer products, 17% manufacturing/industrial, 15% food and beverage and 8% logistics and other. Many of our One-Way Truckload customer contracts may be terminated upon 30 days' notice, which is common in the truckload industry. We have longer-term Dedicated customer contracts, most of which are two to five years in length (including some contracts with annual evergreen clauses) and generally may be terminated by either party typically upon a notice period following the

expiration of the contract's first year. We typically renegotiate rates with our customers for these Dedicated contracts on an annual basis.

Our company and independent contractor tractors are equipped with communication devices. These devices enable us and our drivers to conduct two-way communication using standardized and freeform messages. This technology also allows us to plan and monitor shipment progress. We automatically monitor truck movement and obtain specific data on the location of trucks at fixed intervals. Using the real-time global positioning data obtained from the devices, we have advanced application systems to improve customer and driver service. Examples of such application systems include: (i) an electronic logging system which records and monitors drivers' hours of service and integrates with our information systems to pre-plan driver shipment assignments based on real-time available driving hours; (ii) software that pre-plans shipments drivers can trade enroute to meet driver home-time needs without compromising on-time delivery schedules; and (iii) automated "possible late load" tracking that informs the operations department of trucks possibly operating behind schedule, allowing us to take preventive measures to avoid late deliveries. In 1998, we began a successful pilot program and subsequently became the first trucking company in the United States to receive an exemption from DOT to use a global positioning-based paperless log system as an alternative to the paper logbooks traditionally used by truck drivers to track their daily work activities. We have used electronic logging devices ("ELDs") to monitor and enforce drivers' hours of service since 1996. Since January 2021, we have used an untethered, tablet-based telematics solution that provides an enhanced and more efficient driver experience.

Seasonality

In the trucking industry, revenues generally follow a seasonal pattern. Peak freight demand has historically occurred in the months of September, October and November. After the December holiday season and during the remaining winter months, our freight volumes are typically lower because some customers reduce shipment levels. Our operating expenses have historically been higher in the winter months due primarily to decreased fuel efficiency, increased cold weather-related maintenance costs of revenue equipment and increased insurance and claims costs attributed to adverse winter weather conditions. We attempt to minimize the impact of seasonality through our marketing program by seeking additional freight from certain customers during traditionally slower shipping periods and focusing on transporting consumer nondurable products. Revenue can also be affected by adverse weather conditions, holidays and the number of business days that occur during a given period because revenue is directly related to the available working days of shippers.

Human Capital Resources

Employee Count: As of December 31, 2022, we employed 10,249 drivers; 693 mechanics and maintenance associates for the trucking operation; 1,610 office associates for the trucking operation; and 1,748 associates for Werner Logistics, international, driving schools and other non-trucking operations. Most of our associates are based in the U.S., with about 1% based in Mexico and Canada. None of our U.S. or Canadian associates are represented by a collective bargaining unit, and we consider relations with our associates to be good.

Health & Safety: Werner maintains a safety culture that is based on the premise of eliminating workplace incidents, risks and hazards. In 2022, our trucking business achieved its lowest work injury rate in 17 years and we achieved the lowest DOT preventable accident rate per million miles in 10 years. The Werner Safety Department is responsible for all compliance and training issues as it relates to drivers under DOT regulation and Werner policy. Responsibilities of the department include developing and delivering all driver training on items such as safety issues, driver certification, driver testing, and hazmat.

Our strong safety culture is demonstrated by ongoing investments in advanced equipment technologies, which lead to improved safety for our professional drivers. Nearly all of our company-owned trucks have collision-mitigation safety systems, automated manual transmissions, and forward-facing cameras.

During the COVID-19 pandemic, the transportation industry was designated by the U.S. government as an essential industry for keeping the U.S. supply chain moving. Our drivers and mechanics were on the front lines to ensure the delivery of essential products, and we take this responsibility seriously. Our primary focus will always be protecting the health and personal safety of our associates, their families and communities, and our customers. Throughout our offices and terminal network, we follow the safety guidelines set forth by the Centers for Disease Control and Prevention (CDC) and World Health Organization (WHO).

Diversity & Inclusion: At Werner, we support and encourage the diverse voices and perspectives of our associates, our customers and our suppliers. Diversity contributes to innovation and connects us to the many communities we serve. We embrace these values as we move toward an increasingly inclusive culture where every associate feels empowered to bring their whole self to Werner. Through our Inclusion, Diversity, Equity, Accountability & Learning (IDEAL) Council, we are proud to support ten Associate Resource Groups ("ARGs"). These groups support our commitment to promoting and maintaining an inclusive culture for all associates by bringing together individuals from a wide range of backgrounds, experiences and perspectives. The ARGs seek to foster a sense of shared community and empowerment for associates and allies who share and

support a common social identity, such as gender, ethnicity and sexual orientation. During 2022, we created an advancement and retention plan, under which new programs are being implemented to increase and elevate women and diverse talent in the management pipeline.

In 2022, Werner, as well as our recently acquired business, ReedTMS, were both recognized among the Top Companies for Women to Work for in Transportation by the Women in Trucking Association. This was Werner's fifth consecutive year of being recognized. Werner was recognized for our support of gender diversity, flexible hours and work requirements, competitive compensation and benefits, and professional development and career advancement opportunities. We were also recognized by 50/50 Women on Boards™ as a "3+" company for having three or more women on our corporate board of directors. At Werner, our female driver workforce is double the industry average, and over half of our driver associates are ethnically diverse. Additionally, over half of our non-driver associates and our corporate board of directors are female or ethnically diverse. In 2022, Werner was honored to be recognized as No. 1 on the Top 10 Company Military Friendly® Spouse Employer list and No. 4 on the Top 10 Military Friendly® Employer list by VIQTORY. These serve as Werner's highest rankings ever received in these categories. Werner was awarded these designations for its commitment, effort and success in creating sustainable and meaningful career paths for the military community. We are widely recognized as a transportation leader in military hiring with veterans and veteran spouses.

Professional Driver Recruitment: We recognize that our professional driver workforce is one of our most valuable assets. Most of our professional drivers are compensated on a per-mile basis. For most company-employed drivers, the rate per mile generally increases with the drivers' length of service. Professional drivers may earn additional compensation through incentive performance pay programs and for performing additional work associated with their job (such as loading and unloading freight and making extra stops and shorter mileage trips).

At times, there are driver shortages in the trucking industry. Availability of experienced drivers can be affected by (i) changes in the demographic composition of the workforce; (ii) alternative employment opportunities other than truck driving that become available in the economy; and (iii) individual drivers' desire to be home more frequently. We believe that a declining number of, and increased competition for, driver training school graduates, aging truck driver demographics and increased truck safety regulations have tightened driver supply.

At Werner, we continue to take actions to strengthen our driver recruiting and retention to make Werner a preferred choice for the best drivers. Our efforts include raising driver pay, maintaining a new truck and trailer fleet, purchasing best-in-class safety features for all new trucks, investing in our driver training school network and collaborating with customers to improve or eliminate unproductive freight. We are focused on providing strong mileage utilization and a large percentage of driving jobs in shorter-haul operations (such as Dedicated and Regional) that allow drivers to return home more often. We continue to improve our terminal network to enhance the driver experience. Our untethered, tablet-based telematics solution implemented in 2020 provides Werner drivers with a more efficient experience through smart workflow, best-in-class navigation, improved safety features and reduced manual data entry. While the trucking industry suffers from high driver turnover rates, we are proud that our efforts in recent years have continued to have positive results on our driver retention.

Talent Development: We utilize recent driver training school graduates as a significant source of new drivers. These drivers have completed a training program at a driver training school (including those owned and operated by Werner) and hold a commercial driver's license ("CDL"). They continue to gain industry experience through our career track program by partnering with a Werner-certified leader prior to that driver becoming a solo driver with their own truck. As mentioned above, the recruiting environment for recent driver training school graduates became even more challenging in 2021 as social distancing requirements, state licensing cut backs and temporary closures limited the number of placement drivers entering our career track program. The availability of these drivers has also been negatively impacted by the decreased availability of student loan financing for driver training schools. At the end of 2022, we operated a total of 23 driver training locations to assist with the training and development of drivers for our company and the industry, and we expect to open one new driver training location during the first half of 2023.

Independent Contractors: We also recognize that independent contractors complement our company-employed drivers. As of December 31, 2022, we had 295 independent contractors. Independent contractors supply their own tractors and drivers and are responsible for their operating expenses. Independent contractors also provide us with another source of drivers to support our fleet. We, along with others in the trucking industry, however, continue to experience independent contractor recruitment and retention difficulties that have persisted over the past several years. Challenging operating conditions, including inflationary cost increases that are the responsibility of independent contractors and a shortage of financing available to independent contractors for equipment purchases, continue to make it difficult to recruit and retain independent contractors.

Revenue Equipment

As of December 31, 2022, we operated 8,305 company tractors and 295 tractors owned by independent contractors in our TTS segment. Our Werner Logistics segment operated an additional 39 drayage company tractors and 101 company delivery trucks at the end of 2022. The TTS segment company tractors were primarily manufactured by International (a Navistar company), Freightliner (a Daimler company), Kenworth and Peterbilt (both divisions of PACCAR). The Werner Final Mile company delivery trucks are primarily manufactured by Hino. We adhere to a comprehensive maintenance program for both company tractors and trailers. We inspect independent contractor tractors prior to acceptance for compliance with Werner and DOT operational and safety requirements. We periodically inspect these tractors, in a manner similar to company tractor inspections, to monitor continued compliance. We also regulate the vehicle speed of company trucks to improve safety and fuel efficiency.

The average age of our TTS segment company truck fleet was 2.3 years at December 31, 2022, compared to 2.2 years at December 31, 2021. The average age of our trailer fleet was 5.0 years at December 31, 2022, compared to 4.5 years at December 31, 2021. Our trucks are equipped with satellite tracking devices, and nearly all of our company-owned trucks have collision mitigation safety systems and automated manual transmissions.

We operated 29,965 trailers at December 31, 2022, comprised of dry vans, flatbeds, temperature-controlled, and other specialized trailers. Most of our company-owned trailers were manufactured by Wabash National Corporation and Great Dane. Nearly all of our dry van trailer fleet consisted of 53-foot composite trailers, and we also provide other trailer lengths to meet the specialized needs of certain customers. Substantially all of our trailers have satellite tracking devices.

Our wholly-owned subsidiary, Werner Fleet Sales, sells our used trucks and trailers. Werner Fleet Sales has been in business since 1992 and operates in seven locations. At times, we may also trade used trucks to original equipment manufacturers when purchasing new trucks.

Fuel

In 2022, we purchased nearly all of our fuel from a predetermined network of fuel truck stops throughout the United States comprised mostly of three large fuel truck stop chains. We negotiate discounted pricing based on historical purchase volumes with these fuel truck stop chains and other factors.

Shortages of fuel, increases in fuel prices and rationing of petroleum products can have a material adverse effect on our operations and profitability. Our customer fuel surcharge reimbursement programs generally enable us to recover from our customers a majority, but not all, of higher fuel prices compared to normalized average fuel prices. These fuel surcharges, which automatically adjust depending on the U.S. Department of Energy ("DOE") weekly retail on-highway diesel fuel prices, enable us to recoup much of the higher cost of fuel when prices increase and provide customers with the benefit of lower fuel costs when fuel prices decline. We do not generally recoup higher fuel costs for empty and out-of-route miles (which are not billable to customers) and truck idle time. We cannot predict whether fuel prices will increase or decrease in the future or the extent to which fuel surcharges will be collected from customers. As of December 31, 2022, we had no derivative financial instruments to reduce our exposure to fuel price fluctuations.

We maintain aboveground and underground fuel storage tanks at some of our terminals. Leakage or damage to these facilities could expose us to environmental clean-up costs. The tanks are routinely inspected to help prevent and detect such problems.

We are committed to supporting global efforts to reduce carbon emissions and to continually evaluate and identify new environmental initiatives to support global sustainability efforts, including testing of alternative fuels and investing in start-stop idle reduction technology for our trucks. We currently maintain a late-model truck fleet to take advantage of latest technologies to reduce fuel consumption and emissions. Our future environmental goals include doubling intermodal usage by 2030, thereby further reducing emissions, and by 2035, reducing carbon emissions by 55% compared to a 2007 baseline, with 30% or more of all Company truck miles being executed by zero emission vehicles.

Regulations

As a for-hire motor carrier, we are regulated by the DOT, and certain areas of our business are subject to applicable federal, state, and international laws and regulations. DOT and an agency within DOT, the Federal Motor Carrier Safety Administration ("FMCSA"), generally govern matters such as safety requirements and compliance, registration to engage in motor carrier operations, drivers' hours of service ("HOS"), and certain mergers, consolidations, and acquisitions. Werner maintains a satisfactory safety rating, which is the highest available rating of the three safety ratings given by FMCSA. A conditional or unsatisfactory safety rating could adversely impact Werner's business, as some of our customer contracts require a satisfactory rating. Werner must also comply with federal, state, and international regulations which govern equipment weight and dimensions.

FMCSA's Compliance, Safety, Accountability ("CSA") safety initiative monitors the safety performance of motor carriers. CSA uses the Safety Measurement System ("SMS") to analyze data from roadside inspections, crash reports, and investigation results. The Fixing America's Surface Transportation ("FAST") Act of 2015 directed FMCSA to remove from public view certain information regarding carrier's compliance and safety performance. The FAST Act also instructed FMCSA to study the accuracy of CSA and SMS data and issue a corrective action plan. Werner continues to monitor FMCSA's actions and CSA related developments.

Interstate motor carriers are subject to the FMCSA HOS regulations, which govern our drivers' operating hours. The HOS of Drivers Final Rule which became effective September 29, 2020, includes provisions for short haul, adverse driving conditions, a revision to the 30-minute rest break requirement, and split-sleeper berth which allows drivers to split their 10-hour off duty period in different ways. In August 2020, FMCSA proposed a pilot program allowing commercial drivers to pause their 14-hour driving window, which Werner continues to monitor.

Werner is the industry leader for ELDs to record driver hours and pioneered the Werner Paperless Logging System in 1996 that was subsequently approved for our use by FMCSA in 1998. FMCSA's ELD Final Rule went into effect in December 2017, requiring all motor carriers to have certified ELDs that meet specific standards for documenting HOS.

The FMCSA Commercial Driver's License Drug and Alcohol Clearinghouse (the "Clearinghouse") Final Rule was published in December 2016 with the effective date of January 6, 2020. The Clearinghouse requires motor carriers, designated service agents, medical review officers, and substance abuse professionals to submit records related to drug and alcohol tests, including test refusals and positive drug test results, to the nationwide database. Motor carriers are also required to query the database prior to hiring an applicant and on an annual basis.

Continuing in 2022, motor carriers are required to perform annual random drug tests for 50% of existing drivers. The rate was increased from 25% on January 1, 2020 in response to the 2018 FMCSA Drug and Alcohol Testing Survey, which reported an increase to 1.0% of the random testing positive rate for controlled substances. The minimum annual percentage rate for random alcohol testing remains at 10%.

FMCSA issued its final rule for Entry-Level Driver Training ("ELDT") in December 2016. However, after delays announced by FMCSA, the new effective date was February 7, 2022. ELDT now requires anyone wanting to obtain a Commercial Driver's License to successfully complete a specific program of theory and behind-the-wheel instruction provided by a school or other entity on FMCSA's new Training Provider Registry. We are in compliance with the ELDT rule.

Following the signing of the Infrastructure Investment and Jobs Act (IIJA) on November 15, 2021, the FMCSA is required to establish a pilot program to allow persons ages 18, 19, and 20 to operate commercial motor vehicles in interstate commerce. The FMCSA's Safe Driver Apprenticeship Pilot Program is currently accepting applications by motor carriers who are willing to participate in the pilot program, and FMCSA plans to limit the participation to 1,000 carriers and 3,000 apprentices.

The U.S. Environmental Protection Agency ("EPA") and DOT announced in August 2016 Phase 2 of the Greenhouse Gas and Fuel Efficiency Standards for Medium and Heavy-Duty Trucks. The final rule requires a reduction of carbon emissions and fuel savings from engines, vehicles, and new trailers to be phased in over the next decade. In January 2020, EPA announced an Advance Notice of Proposed Rulemaking that would establish new standards for highway heavy-duty engines to lower nitrogen oxide emissions. In August 2021, EPA announced plans to reduce greenhouse gas emissions from Heavy-Duty Trucks through a series of rulemakings over the next three years. In December 2022, EPA adopted its first final rule, which sets stronger emissions standards to reduce air pollution, including pollutants that create ozone and particulate matter, from heavy-duty vehicles and engines starting in model year 2027.

California's ongoing emissions reduction goals have significantly impacted the industry. The California Air Resources Board regulations not only apply to California intrastate carriers, but also to carriers outside of California who own or dispatch equipment in the state. Werner continues to structure our fleet plans to operate compliant equipment in California. Approximately 4% of our truck miles in 2022 were in the state of California.

Our operations are subject to applicable federal, state, and local environmental laws and regulations, many of which are implemented by the EPA and similar state regulatory agencies. These laws and regulations govern the management of hazardous wastes, discharge of pollutants into the air and surface and underground waters and disposal of certain substances. We do not believe that compliance with these regulations has a material effect on our capital expenditures, earnings, and competitive position.

Werner is dedicated to participating in the development of meaningful public policy by continuing to evaluate local, state, and federal legislative and regulatory actions that impact our operations.

Competition

The freight transportation industry is highly competitive and includes thousands of trucking and non-asset-based logistics companies. We have a small share of the markets we target. Our TTS segment competes primarily with other truckload carriers. Logistics companies, digital brokers, intermodal companies, railroads, less-than-truckload carriers and private carriers provide competition for both our TTS and Werner Logistics segments. Our Werner Logistics segment also competes for the services of third-party capacity providers.

Competition for the freight we transport or manage is based primarily on service, efficiency, available capacity and, to some degree, on freight rates alone. We believe that few other truckload carriers have greater financial resources, own more equipment or carry a larger volume of freight than us. We believe we are one of the largest carriers in the truckload transportation industry based on total operating revenues.

Internet Website

We maintain an Internet website where you can find additional information regarding our business and operations. The website address is www.werner.com. On the website, we make certain investor information available free of charge, including our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, stock ownership reports filed under Section 16 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and any amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act. This information is included on our website as soon as reasonably practicable after we electronically file or furnish such materials to the U.S. Securities and Exchange Commission (“SEC”). We also provide our corporate governance materials, such as Board committee charters and our Code of Corporate Conduct, on our website free of charge, and we may occasionally update these materials when necessary to comply with SEC and Nasdaq rules or to promote the effective and efficient governance of our company. Information provided on our website is not incorporated by reference into this Form 10-K.

ITEM 1A. RISK FACTORS

The following risks and uncertainties may cause our actual results, business, financial condition and cash flows to materially differ from those anticipated in the forward-looking statements included in this Form 10-K. Caution should be taken not to place undue reliance on forward-looking statements made herein because such statements speak only to the date they were made. Unless otherwise required by applicable securities laws, we undertake no obligation or duty to revise or update any forward-looking statements contained herein to reflect subsequent events or circumstances or the occurrence of unanticipated events. Also refer to the Cautionary Note Regarding Forward-Looking Statements in Item 7 of Part II of this Form 10-K.

Risks Related to our Business and Industry

Our business is subject to overall economic conditions that could have a material adverse effect on our results of operations.

We are sensitive to changes in overall economic conditions that impact customer shipping volumes, industry freight demand, and industry truck capacity. When shipping volumes decline or available truck capacity increases, freight pricing generally becomes more competitive as carriers compete for loads to maintain truck productivity. We may be negatively affected by future economic conditions including employment levels, business conditions, fuel and energy costs, public health crises, interest rates and tax rates. Economic conditions may also impact the financial condition of our customers, resulting in a greater risk of bad debt losses, and that of our suppliers, which may affect negotiated pricing or availability of needed goods and services.

Difficulty in recruiting and retaining experienced drivers, recent driver training school graduates and independent contractors impacts our results of operations.

At times, the trucking industry has experienced driver shortages. Driver availability may be affected by changing workforce demographics, alternative employment opportunities, national unemployment rates, freight market conditions, availability of financial aid for driver training schools and changing industry regulations. If such a shortage were to occur and additional driver pay rate increases were necessary to attract and retain drivers, our results of operations would be negatively impacted to the extent that we could not obtain corresponding freight rate increases. Additionally, a shortage of drivers could result in idled equipment, which would affect our profitability and would limit growth opportunities.

Independent contractor availability may also be affected by both inflationary cost increases that are the responsibility of independent contractors and the availability of equipment financing. On-going federal and state legislative challenges to the independent contractor model could also affect independent contractor availability. In recent years, the topic of the classification of individuals as employees or independent contractors has gained increased attention among federal and state regulators as well as the plaintiffs’ bar. Various legislative or regulatory proposals have been introduced at the federal and state levels that may affect the classification status of individuals as independent contractors or employees for either employment tax

purposes (e.g., withholding, social security, Medicare and unemployment taxes) or other benefits available to employees (e.g., workers' compensation benefits and minimum wage). Recently, certain states (most prominently, California) have seen significant increased activity by tax and other regulators and numerous class action lawsuits filed against transportation companies that engage independent contractors. Potential changes, if any, that could impact the legal classification of the independent contractor relationship between us and our independent contractors could have a material adverse effect on our ability to recruit and retain independent contractors. If a shortage of independent contractors occurs, additional increases in per-mile settlement rates (for independent contractors) and driver pay rates (for company drivers) may become necessary to attract and retain a sufficient number of drivers. These increases would negatively affect our results of operations to the extent that we would be unable to obtain corresponding freight rate increases.

Moreover, class action litigation in this area against other transportation companies has resulted in significant damage awards and/or monetary settlements for workers who have been allegedly misclassified as independent contractors.

Increases in fuel prices and shortages of fuel can have a material adverse effect on the results of operations and profitability.

Increases in fuel prices and shortages of fuel can be caused by, among other things, changes in macroeconomic and geopolitical conditions. To lessen the effect of fluctuating fuel prices on our margins, we have fuel surcharge programs with our customers. These programs generally enable us to recover a majority, but not all, of the fuel price increases. Fuel prices that change rapidly in short time periods also impact our recovery because the surcharge rate in most programs only changes once per week. Fuel shortages, increases in fuel prices and petroleum product rationing could have a material adverse impact on our operations and profitability. To the extent that we cannot recover the higher cost of fuel through customer fuel surcharges, our financial results would be negatively impacted. As of December 31, 2022, we had no derivative financial instruments to reduce our exposure to fuel price fluctuations.

We operate in a highly competitive industry, which may limit growth opportunities and reduce profitability.

The freight transportation industry is highly competitive and includes thousands of trucking and non-asset-based logistics companies. We compete primarily with other truckload carriers in our TTS segment. Logistics companies, digital brokers, intermodal companies, railroads, less-than-truckload carriers and private carriers also provide a lesser degree of competition in our TTS segment, but such providers are more direct competitors in our Werner Logistics segment. Competition for the freight we transport or manage is based primarily on service, efficiency, available capacity and, to some degree, on freight rates alone. This competition could have an adverse effect on either the number of shipments we transport or the freight rates we receive, which could limit our growth opportunities and reduce our profitability.

The seasonal pattern generally experienced in the trucking industry may affect our periodic results during traditionally slower shipping periods and winter months.

In the trucking industry, revenues generally follow a seasonal pattern which may affect our results of operations. After the December holiday season and during the remaining winter months, our freight volumes are typically lower because some customers reduce shipment levels. Our operating expenses have historically been higher in the winter months because of cold temperatures and other adverse winter weather conditions which result in decreased fuel efficiency, increased cold weather-related maintenance costs of revenue equipment and increased insurance and claims costs. Revenue can also be affected by adverse weather conditions, holidays and the number of business days during a given period because revenue is directly related to the available working days of shippers.

We depend on key customers, the loss or financial failure of which may have a material adverse effect on our operations and profitability.

A significant portion of our revenue is generated from key customers. During 2022, our largest 5, 10, 25 and 50 customers accounted for 35%, 46%, 63%, and 77% of revenues, respectively. Our largest customer, Dollar General, accounted for 14% of our total revenues in 2022. We do not have long-term contractual relationships with many of our key One-Way Truckload customers. Most of our Dedicated customer contracts are two to five years in length and generally may be terminated by either party typically upon a notice period following the expiration of the contract's first year. We typically renegotiate rates with our customers for these Dedicated contracts annually. We cannot provide any assurance that key customer relationships will continue at the same levels. If a key customer substantially reduced or terminated our services, it could have a material adverse effect on our business and results of operations. We review our customers' financial conditions for granting credit, monitor changes in customers' financial conditions on an ongoing basis and review individual past-due balances and collection concerns. However, a key customer's financial failure may negatively affect our results of operations.

We depend on the services of third-party capacity providers, the availability of which could affect our profitability and limit growth in our Werner Logistics segment.

Our Werner Logistics segment is highly dependent on the services of third-party capacity providers, such as other truckload carriers, less-than-truckload carriers, final-mile delivery contractors, and railroads. Many of those providers face the same economic challenges as we do and therefore are actively and competitively soliciting business. These economic conditions may have an adverse effect on the availability and cost of third-party capacity. If we are unable to secure the services of these third-party capacity providers at reasonable rates, our results of operations could be adversely affected.

If we cannot effectively manage the challenges associated with doing business internationally, our revenues and profitability may suffer.

Our results are affected by the success of our operations in Mexico and other foreign countries in which we operate (see Note 13 in the Notes to Consolidated Financial Statements under Item 8 of Part II of this Form 10-K). We are subject to risks of doing business internationally, including fluctuations in foreign currencies, changes in the economic strength of the countries in which we do business, difficulties in enforcing contractual obligations and intellectual property rights, burdens of complying with a wide variety of international and United States export and import laws, and social, political, and economic instability. Additional risks associated with our foreign operations, including restrictive trade policies and imposition of duties, taxes, or government royalties by foreign governments, are present but have been largely mitigated by the terms of USMCA for Mexico and Canada. The United States, Canada and Mexico ratified the USMCA as an overhaul and update to NAFTA, and it became effective in July 2020. We believe Werner is one of the largest U.S. based truckload carriers in terms of freight volume shipped to and from the United States and Mexico. There are risks, sometimes unforeseen, associated with international operations. The agreement permitting cross border movements for both United States and Mexican based carriers into the United States and Mexico presents additional risks in the form of potential increased competition and the potential for increased congestion on the cross border lanes between countries. At the present time, immigration at the southern border has not negatively affected our operations; however, if the situation intensifies, operations could be affected.

We rely on the services of key personnel, the loss of which could impact our future success.

We are highly dependent on the services of key personnel, including our executive officers. Although we believe we have an experienced and highly qualified management team, the loss of the services of these key personnel could have a significant adverse impact on us and our future profitability.

Difficulty in obtaining materials, equipment, goods, and services from our vendors and suppliers could adversely affect our business.

We are dependent on our vendors and suppliers. We believe we have good vendor relationships and that we are generally able to obtain favorable pricing and other terms from vendors and suppliers. If we fail to maintain satisfactory relationships with our vendors and suppliers, or if our vendors and suppliers are unable to provide the products and materials we need or experience significant financial problems, we could experience difficulty in obtaining needed goods and services because of production interruptions, limited material availability, or other reasons. Tractor and trailer manufacturers have experienced significant shortages of semiconductor chips and other component parts and supplies, forcing many manufacturers to reduce or suspend their production, which has led to a lower supply of tractors and trailers, higher prices, and lengthened trade cycles. Continued shortages of these component parts and supplies could have a material adverse effect on our business, financial condition, and results of operations, particularly our maintenance expense, mileage productivity, and driver retention.

We use our information systems extensively for day-to-day operations, and service interruptions or a failure of our information technology infrastructure or a breach of our information security systems, networks or processes could have a material adverse effect on our business.

We depend on the stability, availability and security of our information systems to manage our business. Much of our software was developed internally or by adapting purchased software applications to suit our needs. Our information systems are used for planning loads, communicating with and dispatching drivers and other capacity providers, billing customers, paying vendors and providing financial reports. We rely on strategic vendors for GPS and satellite communication services, which are integrated in our information systems. If any of our critical information systems fail or become unavailable, or those of our service providers, we would have to perform certain functions manually, which could temporarily affect our ability to efficiently manage our operations. We have redundant computer hardware systems to reduce this risk. We also maintain information security policies to protect our systems and data from cyber security events and threats. The security risks associated with information technology systems have increased in recent years because of the increased sophistication, activities and evolving techniques of perpetrators of cyber attacks. The techniques used to obtain unauthorized access, disable or degrade service or sabotage systems change frequently, may be difficult to detect for a long time and often are not recognized until launched against a target. As a result, we may be unable to anticipate these techniques or to implement adequate preventative measures. A failure in or breach of our information technology security systems, or those of our third-

party service providers, as a result of cyber attacks or unauthorized network access could disrupt our business, result in the disclosure or misuse of confidential or proprietary information, increase our costs and/or cause losses and reputational damage. In addition, recently, there has also been heightened regulatory and enforcement focus on data protection in the U.S., and failure to comply with applicable U.S. data protection regulations or other data protection standards may expose us to litigation, fines, sanctions or other penalties, which could harm our reputation and adversely impact our business, results of operations and financial condition.

A public health crisis, such as an epidemic, pandemic, or similar outbreak, has had, and may continue to have an adverse impact on our business, as well as the operations of our customers and suppliers.

The COVID-19 pandemic resulted in a slowdown of economic activity and a disruption in supply chains during 2020 and 2021. Our business is sensitive to changes in overall economic conditions that impact customer shipping volumes, industry freight demand and industry truck capacity. Such conditions may also impact the financial condition of our customers, resulting in a greater risk of bad debt losses, and that of our suppliers, which may affect the availability or pricing of needed goods and services. Although we took numerous actions to lessen the adverse impact of the COVID-19 pandemic, our future results could be further impacted by the disruptive effects of a future pandemic or outbreak, including but not limited to adverse effects on freight volumes and pricing and availability of qualified personnel. Such outbreaks could affect our operations and business continuity if a significant number of our essential employees, overall or in a key location, are quarantined from contraction of or exposure to the disease or if future governmental orders prevent our employees or critical suppliers (including individuals that have not received mandated vaccinations) from working. Our compliance with mandates could lead to employee absences, resignations, labor disputes, or work stoppages. The degree of disruption is difficult to predict because of many factors, including the uncertainty surrounding the magnitude and duration of an outbreak, governmental actions that may be imposed, as well as the rate of economic recovery after an outbreak subsides. The unpredictable nature and uncertainty of a public health crisis could also magnify other risk factors disclosed above and makes it impractical to identify all potential risks.

Risks Related to Laws and Regulations

We operate in a highly regulated industry. Changes in existing regulations or violations of existing or future regulations could adversely affect our operations and profitability.

We are regulated by DOT and its agency, FMCSA, in the United States and similar governmental transportation agencies in foreign countries in which we operate. We are also regulated by agencies in certain U.S. states. These regulatory agencies have the authority to govern transportation-related activities, such as safety, authorization to conduct motor carrier operations and other matters. The Regulations subsection in Item 1 of Part I of this Form 10-K describes several proposed and pending regulations that may have a significant effect on our operations including our productivity, driver recruitment and retention and capital expenditures.

Our operations are subject to applicable environmental laws and regulations, the violation of which could result in substantial fines or penalties.

In addition to direct regulation by DOT, FMCSA, EPA and other federal, state, and local agencies, we are subject to applicable environmental laws and regulations dealing with the handling of hazardous materials, aboveground and underground fuel storage tanks, discharge and retention of storm-water, and emissions from our vehicles. We operate in industrial areas, where truck terminals and other industrial activities are located and where groundwater or other forms of environmental contamination have occurred. Our operations involve the risks of fuel spillage or seepage, environmental damage and hazardous waste disposal, among others. We also maintain bulk fuel storage at some of our facilities. If we are involved in a spill or other accident involving hazardous substances, or if we are found to be in violation of applicable laws or regulations, it could have a material adverse effect on our business and operating results. If we fail to comply with applicable environmental regulations, we could be subject to substantial fines or penalties and to civil and criminal liability. Tractors and trailers used in our daily operations have been affected by regulatory changes related to air emissions and fuel efficiency, and may be adversely affected in the future by new regulatory actions.

Increasing scrutiny from investors and other stakeholders regarding environmental, social, and governance (“ESG”) related matters may have a negative impact on our business.

Companies across all industries are facing increasing scrutiny from investors and other stakeholders related to ESG matters, including practices and disclosures related to environmental stewardship, social responsibility, and diversity, equity and inclusion. Organizations that provide information to investors on corporate governance and related matters have developed ratings processes for evaluating companies on their approach to ESG matters. Such ratings are used by some investors to inform their investment and voting decisions. Unfavorable ESG ratings may lead to negative investor sentiment toward us, which could have a negative impact on our stock price and our access to and costs of capital.

We have developed certain initiatives and goals relating to ESG matters. Our ability to successfully execute these initiatives and accurately report our progress presents numerous operational, financial, legal, reputational and other risks, many of which are outside our control, and all of which could have a material negative impact on our business. Additionally, the implementation of these initiatives imposes additional costs on us. If our ESG initiatives and goals do not meet the expectations of our investors or other stakeholders, which continue to evolve, then our reputation, our ability to attract or retain employees, and our attractiveness as an investment and business partner could be negatively impacted. Similarly, our failure, or perceived failure, to pursue or fulfill our goals, targets and objectives or to satisfy various reporting standards in a timely manner, or at all, could also have similar negative impacts and expose us to government enforcement actions and private litigation.

Risks Related to Financial Matters

Our earnings could be reduced by increases in the number of insurance claims, cost per claim, costs of insurance premiums or availability of insurance coverage.

We are self-insured for a significant portion of liability resulting from bodily injury, property damage, cargo and associate workers' compensation and health benefit claims. This is supplemented by premium-based insurance coverage with insurance carriers above our self-insurance level for each type of coverage. To the extent we experience a significant increase in the number of claims, cost per claim (including costs resulting from large verdicts) or insurance premium costs for coverage in excess of our retention and deductible amounts, our operating results would be negatively affected. Although we believe our aggregate insurance limits should be sufficient to cover reasonably expected claims, it is possible that the amount of one or more claims could exceed our aggregate coverage limits. In addition, the transportation industry has recently experienced significant increases in premiums for insurance coverage above self-insurance levels. Healthcare legislation and inflationary cost increases could also have a negative effect on our results.

Decreased demand for our used revenue equipment could result in lower unit sales and resale values.

We are sensitive to changes in used equipment prices and demand, especially with respect to tractors. We have been in the business of selling our company-owned trucks since 1992, when we formed our wholly-owned subsidiary Werner Fleet Sales. Reduced demand for used equipment could result in a lower volume of sales or lower sales prices, either of which could negatively affect our proceeds from sales of assets.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. **PROPERTIES**

Our headquarters are located on approximately 133 acres near U.S. Interstate 80 west of Omaha, Nebraska, 53 acres of which are undeveloped. Our headquarter facilities have suitable space available to accommodate planned needs for at least the next three to five years. We also have several terminals throughout the United States, consisting of office and/or maintenance facilities. In addition, we own parcels of land in several locations in the United States for future terminal development. Our terminal locations are described below:

Location	Owned or Leased	Description	Segment
Omaha, Nebraska	Owned	Corporate headquarters, maintenance, truck sales	TTS, Werner Logistics, Corporate
Omaha, Nebraska	Owned	Disaster recovery, warehouse	Corporate
Phoenix, Arizona	Owned	Office, maintenance	TTS
West Memphis, Arkansas	Owned	Office, maintenance	TTS
Fontana, California	Owned	Office, maintenance, truck sales, driver training school	TTS
Denver, Colorado	Owned	Maintenance	TTS
Lake City, Florida	Owned	Office, maintenance	TTS
Lakeland, Florida	Leased	Maintenance	TTS
Atlanta, Georgia	Owned	Office, maintenance, truck sales	TTS
Joliet, Illinois	Owned	Office, maintenance, truck sales	TTS
Milan, Indiana	Owned	Office, maintenance, warehouse	TTS
Brownstown, Michigan	Owned	Maintenance	TTS
Springfield, Ohio	Owned	Office, maintenance	TTS
Easton, Pennsylvania	Owned	Office, maintenance	TTS
Portland, Tennessee	Leased	Office, maintenance	TTS
Dallas, Texas	Owned	Office, maintenance, truck sales, driver training school	TTS
El Paso, Texas	Owned	Office, maintenance	TTS
Laredo, Texas	Owned	Office, maintenance, transloading, truck sales	TTS, Werner Logistics

At December 31, 2022, we leased (i) operational facilities, office space, and trailer parking yards in various locations throughout the United States and (ii) office space in Mexico and Canada. We own (i) a 96-room motel located near our Omaha headquarters; (ii) an 85-room hotel located near our Atlanta terminal; (iii) a 71-room private driver lodging facility at our Dallas terminal; (iv) six operational facilities located in Ohio, Indiana, Pennsylvania and Florida; and (v) a terminal facility in Queretaro, Mexico, which we lease to a third party. The Werner Fleet Sales network has seven locations, which are primarily located in certain terminals listed above. Our driver training schools operate in 23 locations in the United States, two of which are located in certain terminals listed above, seven are located in company-owned facilities, and 14 are located in leased facilities.

ITEM 3. *LEGAL PROCEEDINGS*

We are a party subject to routine litigation incidental to our business, primarily involving claims for bodily injury, property damage, cargo and workers' compensation incurred in the transportation of freight. For more information about our insurance program and legal proceedings, see Item 1A, Risk Factors – “Our earnings could be reduced by increases in the number of insurance claims, cost per claim, costs of insurance premiums or availability of insurance coverage”, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Estimates, and Item 8, Financial Statements and Supplementary Data – Note 1 and Note 12.

ITEM 4. *MINE SAFETY DISCLOSURES*

Not applicable

PART II**ITEM 5. *MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES*****Common Stock**

Our common stock trades on the NASDAQ Global Select MarketSM tier of the Nasdaq Stock Market under the symbol “WERN”. As of February 9, 2023, our common stock was held by 432 stockholders of record. Because many of our shares of common stock are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Dividend Policy

We have paid cash dividends on our common stock following each fiscal quarter since the first payment in July 1987. Our current quarterly dividend rate is \$0.13 per common share. We currently intend to continue paying a regular quarterly dividend. We do not currently anticipate any restrictions on our future ability to pay such dividends. However, we cannot give any assurance that dividends will be paid in the future or of the amount of any such quarterly or special dividends because they are dependent on our earnings, financial condition, and other factors.

Equity Compensation Plan Information

For information on our equity compensation plans, please refer to Item 12 of Part III of this Form 10-K.

Performance Graph

Comparison of Five-Year Cumulative Total Return

The following graph is not deemed to be “soliciting material” or to be “filed” with the SEC or subject to the liabilities of Section 18 of the Exchange Act, and the report shall not be deemed to be incorporated by reference into any prior or subsequent filing by us under the Securities Act of 1933 or the Exchange Act except to the extent we specifically request that such information be incorporated by reference or treated as soliciting material.

	12/31/2017	12/31/2018	12/31/2019	12/31/2020	12/31/2021	12/31/2022
Werner Enterprises, Inc. (WERN)	\$ 100	\$ 77	\$ 108	\$ 118	\$ 145	\$ 124
Standard & Poor's 500	\$ 100	\$ 96	\$ 126	\$ 149	\$ 192	\$ 157
2022 Peer Group	\$ 100	\$ 80	\$ 107	\$ 142	\$ 231	\$ 189

Assuming the investment of \$100 on December 31, 2017, and reinvestment of all dividends, the graph above compares the cumulative total stockholder return on our common stock for the last five fiscal years with the cumulative total return of Standard & Poor's 500 Market Index and our Peer Group over the same period. Our Peer Group includes companies similar to us in the transportation industry and has the following companies: ArcBest; Covenant Logistics Group; Forward Air; Heartland Express; Hub Group; JB Hunt; Knight-Swift Transportation; Landstar System; Marten Transport; Old Dominion Freight Line; Saia; Schneider National; US Xpress; and Yellow Corporation. Our stock price was \$40.26 as of December 30, 2022 (the last business day of fiscal year 2022). This price was used for purposes of calculating the total return on our common stock for the year ended December 31, 2022.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

On November 9, 2021, our Board of Directors approved and announced a new stock repurchase program under which the Company is authorized to repurchase up to 6,000,000 shares of its common stock. As of December 31, 2022, the Company had purchased 3,688,190 shares pursuant to this authorization and had 2,311,810 shares remaining available for repurchase. The Company may purchase shares from time to time depending on market, economic and other factors. The authorization will continue unless withdrawn by the Board of Directors.

No shares of common stock were repurchased during fourth quarter 2022 by either the Company or any “affiliated purchaser,” as defined by Rule 10b-18 of the Exchange Act.

ITEM 6. *RESERVED*

ITEM 7. *MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS*

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") summarizes the financial statements from management's perspective with respect to our financial condition, results of operations, liquidity and other factors that may affect actual results. The MD&A is organized in the following sections:

- Cautionary Note Regarding Forward-Looking Statements
- Business Acquisitions
- Overview
- Results of Operations
- Liquidity and Capital Resources
- Critical Accounting Estimates

Cautionary Note Regarding Forward-Looking Statements:

This Annual Report on Form 10-K contains historical information and forward-looking statements based on information currently available to our management. The forward-looking statements in this report, including those made in this Item 7 (Management's Discussion and Analysis of Financial Condition and Results of Operations), are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These safe harbor provisions encourage reporting companies to provide prospective information to investors. Forward-looking statements can be identified by the use of certain words, such as "anticipate," "believe," "estimate," "expect," "intend," "plan," "project," and other similar terms and language. We believe the forward-looking statements are reasonable based on currently available information. However, forward-looking statements involve risks, uncertainties and assumptions, whether known or unknown, that could cause our actual results, business, financial condition and cash flows to differ materially from those anticipated in the forward-looking statements. A discussion of important factors relating to forward-looking statements is included in Item 1A (Risk Factors) of Part I of this Form 10-K. Readers should not unduly rely on the forward-looking statements included in this Form 10-K because such statements speak only to the date they were made. Unless otherwise required by applicable securities laws, we undertake no obligation or duty to update or revise any forward-looking statements contained herein to reflect subsequent events or circumstances or the occurrence of unanticipated events.

Business Acquisitions:

We recently acquired the following entities:

- 100% of ReedTMS on November 5, 2022. Freight brokerage and truckload revenues generated by ReedTMS are reported in our Werner Logistics segment and in Dedicated within our TTS segment, respectively.
- 100% of Baylor on October 1, 2022. Revenues generated by Baylor are reported in One-Way Truckload within our TTS segment.
- 100% of NEHDS on November 22, 2021. Revenues generated by NEHDS are reported in Final Mile within our Werner Logistics segment.
- 80% of ECM on July 1, 2021. Revenues generated by ECM are reported in One-Way Truckload within our TTS segment.

Additional information regarding these acquisitions is included in Note 2 in the Notes to Consolidated Financial Statements under Item 8 of Part II of this Form 10-K.

Overview:

We have two reportable segments, TTS and Werner Logistics, and we operate in the truckload and logistics sectors of the transportation industry. In the truckload sector, we focus on transporting consumer nondurable products that generally ship more consistently throughout the year. In the logistics sector, besides managing transportation requirements for individual customers, we provide additional sources of truck capacity, alternative modes of transportation, a North American delivery network and systems analysis to optimize transportation needs. Our success depends on our ability to efficiently and effectively manage our resources in the delivery of truckload transportation and logistics services to our customers. Resource requirements vary with customer demand, which may be subject to seasonal or general economic conditions. Our ability to adapt to changes in customer transportation requirements is essential to efficiently deploy resources and make capital investments in tractors and trailers (with respect to our TTS segment) or obtain qualified third-party capacity at a reasonable price (with respect to our Werner Logistics segment). We may also be affected by our customers' financial failures or loss of customer business.

Revenues for our TTS segment operating units (Dedicated and One-Way Truckload) are typically generated on a per-mile basis and also include revenues such as stop charges, loading and unloading charges, equipment detention charges and equipment

repositioning charges. To mitigate our risk to fuel price increases, we recover additional fuel surcharge revenues from our customers that generally recoup a majority of the increased fuel costs; however, we cannot assure that current recovery levels will continue in future periods. Because fuel surcharge revenues fluctuate in response to changes in fuel costs, we identify them separately and exclude them from the statistical calculations to provide a more meaningful comparison between periods. The key statistics used to evaluate trucking revenues, net of fuel surcharge, are (i) average revenues per tractor per week, (ii) average percentage of empty miles (miles without trailer cargo), (iii) average trip length (in loaded miles) and (iv) average number of tractors in service. General economic conditions, seasonal trucking industry freight patterns and industry capacity are important factors that impact these statistics. Our TTS segment also generates a small amount of revenues categorized as non-trucking revenues, which consist primarily of the intra-Mexico portion of cross-border shipments delivered to or from Mexico where the TTS segment utilizes a third-party capacity provider. We exclude such revenues from the statistical calculations.

Our most significant resource requirements are company drivers, independent contractors, tractors and trailers. Independent contractors supply their own tractors and drivers and are responsible for their operating expenses. Our financial results are affected by company driver and independent contractor availability and the markets for new and used revenue equipment. We are self-insured for a significant portion of bodily injury, property damage and cargo claims; workers' compensation claims; and associate health claims (supplemented by premium-based insurance coverage above certain dollar levels). For that reason, our financial results may also be affected by driver safety, medical costs, weather, legal and regulatory environments and insurance coverage costs to protect against catastrophic losses.

The operating ratio is a common industry measure used to evaluate our profitability and that of our TTS segment operating fleets. The operating ratio consists of operating expenses expressed as a percentage of operating revenues. The most significant variable expenses that impact the TTS segment are driver salaries and benefits, fuel, fuel taxes (included in taxes and licenses expense), payments to independent contractors (included in rent and purchased transportation expense), supplies and maintenance and insurance and claims. As discussed further in the comparison of operating results for 2022 to 2021, several industry-wide issues have caused, and could continue to cause, costs to increase in future periods. These issues include shortages of drivers or independent contractors, changing fuel prices, changing used truck and trailer pricing, compliance with new or proposed regulations and tightening of the commercial truck liability insurance market. Our main fixed costs include depreciation expense for tractors and trailers and equipment licensing fees (included in taxes and licenses expense). The TTS segment requires substantial cash expenditures for tractor and trailer purchases. We fund these purchases with net cash from operations and financing available under our existing credit facilities, as management deems necessary.

We provide non-trucking services primarily through the three operating units within our Werner Logistics segment (Truckload Logistics, Intermodal, and Final Mile). In first quarter 2021, we completed the sale of the Werner Global Logistics ("WGL") freight forwarding services for international ocean and air shipments to Scan Global Logistics Group. WGL had annual revenues of \$53 million in 2020, and we realized a \$1.0 million gain from the sale in first quarter 2021, which assumed achievement of the full earnout. At the end of the twelve month period following the completed sale of WGL, the full earnout was achieved. Unlike our TTS segment, the Werner Logistics segment is less asset-intensive and is instead dependent upon qualified associates, information systems and qualified third-party capacity providers. The largest expense item related to the Werner Logistics segment is the cost of purchased transportation we pay to third-party capacity providers. This expense item is recorded as rent and purchased transportation expense. Other operating expenses consist primarily of salaries, wages and benefits, as well as depreciation and amortization, supplies and maintenance, and other general expenses. We evaluate the Werner Logistics segment's financial performance by reviewing operating expenses and operating income expressed as a percentage of revenues. Purchased transportation expenses as a percentage of revenues can be impacted by the rates charged to customers and the costs of securing third-party capacity. We have a mix of contracted long-term rates and variable rates for the cost of third-party capacity, and we cannot assure that our operating results will not be adversely impacted in the future if our ability to obtain qualified third-party capacity providers changes or the rates of such providers increase.

At the end of 2022, we believe we are well positioned with a strong balance sheet and sufficient liquidity. Our debt is at \$694 million, or a net debt ratio (debt less cash) of 1.0 times earnings before interest, income taxes, depreciation and amortization for the year ended December 31, 2022. We had available liquidity of \$523 million, considering cash on hand and available borrowing capacity of \$416 million. As of December 31, 2022, we were in compliance with our debt covenants and expect to continue to be in compliance in 2023. We currently plan to continue paying our quarterly dividend, which we have paid quarterly since 1987. This cash outlay currently results in slightly more than \$8 million per quarter. Net capital expenditures (primarily revenue equipment) in 2023 currently are expected to be in the range of \$350 million to \$400 million.

Results of Operations:

The following table sets forth the consolidated statements of income in dollars and as a percentage of total operating revenues and the percentage increase or decrease in the dollar amounts of those items compared to the prior year.

(in thousands)	2022		2021		Percentage Change in Dollar Amounts
	\$	%	\$	%	%
Operating revenues	\$ 3,289,978	100.0	\$ 2,734,372	100.0	20.3

2022 Compared to 2021

Operating Revenues

Operating revenues increased 20.3% in 2022 compared to 2021. When comparing 2022 to 2021, TTS segment revenues increased \$383.6 million, or 18.8%. Revenues for the Werner Logistics segment increased \$171.0 million or 27.5%.

Dedicated continues to experience strong demand from the majority of our long-term customers, and our Dedicated pipeline of new opportunities remains strong. In the current freight market, there are fewer project and surge freight opportunities in One-Way Truckload and Logistics compared to record high levels a year ago. We expect that the 2023 freight market will be challenging in the first half of the year, and then gradually begin to show improvement in the second half of the year, as capacity exits the market and retail inventory resets to normalized levels.

Trucking revenues, net of fuel surcharge, increased 10.8% in 2022 compared to 2021 due to a 5.7% increase in the average number of tractors in service and a 4.8% increase in average revenues per tractor per week, net of fuel surcharge. The increase in average revenues per tractor per week, net of fuel surcharge was due primarily to improved pricing in both Dedicated and One-Way Truckload, partially offset by a decline in miles per tractor. The decline in miles per tractor resulted from several factors, including a lower length of haul due to freight mix, growth in Dedicated, the impact of our acquisitions which have a more regional footprint, and more tractor down time early in the year due to equipment parts shortages and COVID issues. We expect total miles per tractor per week for the One-Way Truckload fleet in 2023 to be comparable to 2022, and we expect a gradually improving pricing environment during the second half of 2023. Considering the freight market outlook, we expect average revenues per total mile, net of fuel surcharge, for the One-Way Truckload fleet to decline in a range of 3% to 6% in the first half of 2023 when compared to the first half of 2022, and we expect Dedicated average revenues per tractor per week, net of fuel surcharge, to increase in a range of 0% to 3% in 2023 compared to 2022.

The average number of tractors in service in the TTS segment increased 5.7% to 8,437 in 2022 compared to 7,982 in 2021. We ended 2022 with 8,600 tractors in the TTS segment, a year-over-year increase of 260 tractors. The increase in end of period tractors was due primarily to tractors acquired in the fourth quarter 2022 Baylor and ReedTMS acquisitions, which also contributed to the increase in the average number of tractors in service along with the full year impact in 2022 of the July 1, 2021 ECM acquisition. Our Dedicated unit ended 2022 with 5,450 tractors (or 63% of our total TTS segment fleet) compared to 5,235 tractors at the end of 2021. We currently expect our fleet size at the end of 2023 to be in a range of 1% to 4% higher when compared to the fleet size at the end of 2022, with the majority of the growth planned for our Dedicated unit in the second half of the year. We cannot predict whether future driver shortages, if any, will adversely affect our ability to maintain our fleet size. If such a driver market shortage were to occur, it could result in a fleet size reduction, and our results of operations could be adversely affected.

Trucking fuel surcharge revenues increased 79.0% to \$419.2 million in 2022 from \$234.2 million in 2021 due primarily to higher average diesel fuel prices, driven by impacts of the war in Ukraine early in the year. These revenues represent collections from customers for the increase in fuel and fuel-related expenses, including the fuel component of our independent contractor cost (recorded as rent and purchased transportation expense) and fuel taxes (recorded in taxes and licenses expense), when diesel fuel prices rise. Conversely, when fuel prices decrease, fuel surcharge revenues decrease. To lessen the effect of

fluctuating fuel prices on our margins, we collect fuel surcharge revenues from our customers for the cost of diesel fuel and taxes in excess of specified base fuel price levels according to terms in our customer contracts. Fuel surcharge rates generally adjust weekly based on an independent U.S. Department of Energy fuel price survey which is released every Monday. Our fuel surcharge programs are designed to (i) recoup higher fuel costs from customers when fuel prices rise and (ii) provide customers with the benefit of lower fuel costs when fuel prices decline. These programs generally enable us to recover a majority, but not all, of the fuel price increases. The remaining portion is generally not recoverable because it results from empty and out-of-route miles (which are not billable to customers) and tractor idle time. Fuel prices that change rapidly in short time periods also impact our recovery because the surcharge rate in most programs only changes once per week.

Werner Logistics revenues are generated by its three operating units, following the sale of its WGL freight forwarding services for international ocean and air shipments in first quarter 2021. Werner Logistics revenues exclude revenues for full truckload shipments transferred to the TTS segment, which are recorded as trucking revenues by the TTS segment. Werner Logistics also recorded revenue and brokered freight expense of \$5.2 million in 2022 and \$0.9 million in 2021 for movements performed by the TTS segment (also recorded as trucking revenue by the TTS segment), and these transactions between reporting segments are eliminated in consolidation. Werner Logistics revenues increased 27.5% to \$793.5 million in 2022 from \$622.5 million in 2021 due primarily to volume growth in Truckload Logistics, which includes eight weeks of the acquired ReedTMS business, a \$74.8 million increase in Final Mile revenues primarily due to the impact of NEHDS acquired in November 2021, and higher pricing in Intermodal. Truckload Logistics revenues (67% of total Logistics revenues), including ReedTMS, increased 24% due to a 20% increase in volume and a 4% increase in revenues per shipment. Intermodal revenues (22% of total Logistics revenues) increased 6% due to a 23% increase in revenues per shipment, partially offset by a 17% decline in shipment volume. Werner Logistics operating income increased to \$36.2 million in 2022 compared to \$27.9 million in 2021 and operating margin percentage increased to 4.6% in 2022 from 4.5% in 2021. During 2022 we experienced fewer premium pop-up freight opportunities, Intermodal customer and market challenges, softening demand and start up costs in Final Mile. Werner Logistics revenues were 24% of total operating revenues in 2022. Including our recent acquisition of ReedTMS, we expect Werner Logistics revenues in 2023 will grow to over 30% of total operating revenues.

Operating Expenses

Our operating ratio (operating expenses expressed as a percentage of operating revenues) was 90.2% in 2022 compared to 88.7% in 2021. Expense items that impacted the overall operating ratio are described on the following pages. The tables on pages 18 through 20 show the consolidated statements of income in dollars and as a percentage of total operating revenues and the percentage increase or decrease in the dollar amounts of those items compared to the prior year, as well as the operating ratios, operating margins and certain statistical information for our two reportable segments, TTS and Werner Logistics.

Salaries, wages and benefits increased \$125.6 million or 14.0% in 2022 compared to 2021 and decreased 1.7% as a percentage of operating revenues. The higher dollar amount of salaries, wages and benefits expense in 2022 was due primarily to increased driver pay, including driver pay rate increases and the impact of 18.0 million more company tractor miles in 2022. In August 2021, we implemented driver pay increases of approximately \$11 million annually in our One-Way Truckload fleet. Within Dedicated, we continue to implement driver pay increases as needed. The increase in salaries, wages and benefits was also due to a larger number of non-driver employees, higher salaries, and higher benefits. Non-driver salaries, wages and benefits in our non-trucking Werner Logistics segment increased 58.4% as a result of more employees to support the 27.5% growth of Logistics revenues.

We renewed our workers' compensation insurance coverage on April 1, 2022. Our coverage levels are the same as the prior policy year. We continue to maintain a self-insurance retention of \$2.0 million per claim. Our workers' compensation insurance premiums for the policy year beginning April 2022 are \$0.4 million higher than the premiums for the previous policy year.

While inflationary cost pressures continue to be challenging, particularly for labor, equipment maintenance and insurance, we have begun to see some easing in the competitive driver recruiting and retention markets. A competitive driver market presents labor challenges for customers and carriers alike. Several ongoing market factors persisted including a declining number of, and increased competition for, driver training school graduates, aging truck driver demographics and increased truck safety regulations. We continue to take significant actions to strengthen our driver recruiting and retention as we strive to be the truckload employer of choice, including raising driver pay, providing a modern tractor and trailer fleet with the latest safety equipment and technology, investing and expanding our driver training school network and offering a wide variety of driving positions including daily and weekly home time opportunities. We are unable to predict whether we will experience future driver shortages or maintain our current driver retention rates. If such a driver shortage were to occur and additional driver pay rate increases became necessary to attract and retain drivers, our results of operations would be negatively impacted to the extent that we could not obtain corresponding freight rate increases.

Fuel increased \$191.4 million or 77.9% in 2022 compared to 2021 and increased 4.3% as a percentage of operating revenues due to higher average diesel fuel prices and 18.0 million more company tractor miles in 2022. Average diesel fuel prices, excluding fuel taxes, for the full year 2022 were \$1.55 higher than the full year 2021, a 71% increase.

We continue to employ measures to improve our fuel mpg such as (i) limiting tractor engine idle time, (ii) optimizing the speed, weight and specifications of our equipment and (iii) implementing mpg-enhancing equipment changes to our fleet including new tractors, more aerodynamic tractor features, idle reduction systems, trailer tire inflation systems, trailer skirts and automated manual transmissions to reduce our fuel gallons purchased. However, fuel savings from mpg improvement is partially offset by higher depreciation expense and the additional cost of diesel exhaust fluid. Although our fuel management programs require significant capital investment and research and development, we intend to continue these and other environmentally conscious initiatives, including our active participation as an EPA SmartWay Transport Partner. The SmartWay Transport Partnership is a national voluntary program developed by the EPA and freight industry representatives to reduce greenhouse gases and air pollution and promote cleaner, more efficient ground freight transportation.

Through February 17, the average diesel fuel price per gallon in 2023 was approximately 47 cents higher than the average diesel fuel price per gallon in the same period of 2022 and approximately 7 cents higher than the average for first quarter 2022.

Shortages of fuel, increases in fuel prices and petroleum product rationing can have a material adverse effect on our operations and profitability. We are unable to predict whether fuel price levels will increase or decrease in the future or the extent to which fuel surcharges will be collected from customers. As of December 31, 2022, we had no derivative financial instruments to reduce our exposure to fuel price fluctuations.

Supplies and maintenance increased \$46.4 million or 22.4% in 2022 compared to 2021 and increased 0.1% as a percentage of operating revenues. Supplies and maintenance expense increased due to higher costs for tractor and trailer parts, tires, and over-the-road repairs resulting from inflationary cost increases, as well as higher costs for tolls and travel post-COVID. The average age of our tractors and trailers increased by 0.1 years and 0.5 years at December 31, 2022 compared to December 31, 2021, respectively, primarily due to limited new equipment availability. While it remains difficult to obtain new tractors and trailers, we anticipate that new tractor and trailer production will show modest improvement in 2023. Operating older equipment has a direct impact on our supplies and maintenance costs.

Insurance and claims increased \$48.7 million or 49.4% in 2022 compared to 2021 and increased 0.9% as a percentage of operating revenues, due primarily to a higher amount of unfavorable reserve development, higher expense for new claims, and higher liability insurance premiums. The majority of the higher unfavorable reserve development related to unexpected and unfortunate legal developments for prior year motor vehicle accidents that have been settled, including a settlement of a lawsuit in Texas arising from a May 24, 2020 accident for which we recognized \$9.5 million of insurance and claims expense in 2022. We also incurred insurance and claims expense of \$5.4 million and \$5.1 million in 2022 and 2021, respectively, for accrued interest related to a previously-disclosed adverse jury verdict rendered on May 17, 2018, which we are appealing (see Note 12 in the Notes to Consolidated Financial Statements set forth in Part II of this Form 10-K). Interest is accrued at \$0.5 million per month, until such time as the outcome of our appeal is finalized. The majority of our insurance and claims expense results from our claim experience and claim development under our self-insurance program; the remainder results from insurance premiums for claims in excess of our self-insured limits. In 2022, we achieved our lowest DOT preventable accident rate per million miles in the last 10 years. Over the longer term, we expect our accident per million miles performance will improve our insurance and claims experience. While we cannot ignore the increasing trend of high dollar verdicts and settlements, we expect our 2023 insurance and claims expense to moderate from 2022.

We renewed our liability insurance policies on August 1, 2022 and are responsible for the first \$10.0 million per claim on all claims with an annual \$10.0 million aggregate for claims between \$10.0 million and \$20.0 million. For the policy year that began August 1, 2021, we were responsible for the first \$10.0 million per claim on all claims with an annual \$10.0 million aggregate for claims between \$10.0 million and \$15.0 million. We maintain liability insurance coverage with insurance carriers in excess of the \$10.0 million per claim. Our liability insurance premiums for the policy year that began August 1, 2022 are \$1.9 million higher than premiums for the previous policy year.

Depreciation and amortization expense increased \$12.2 million or 4.6% in 2022 compared to 2021 and decreased 1.3% as a percentage of operating revenues due primarily to higher tractor depreciation on a larger company tractor fleet and depreciation and amortization on tangible and intangible assets recorded in our business acquisitions, partially offset by the impact of a change in accounting estimate effective January 1, 2022, due to the ongoing stronger used trailer market and the increasing cost of new trailers, which decreased trailer depreciation expense by \$12.7 million in 2022.

The average age of our tractor fleet remains low by industry standards and was 2.3 years as of December 31, 2022, and the average age of our trailers was 5.0 years. We continued to invest in new tractors and trailers and our terminals in 2022 to

improve our driver experience, increase operational efficiency and more effectively manage our maintenance, safety and fuel costs. In 2023, we expect to slightly lower the average age of our tractor fleet and maintain the average age of our trailer fleet.

Rent and purchased transportation expense increased \$136.3 million or 21.3% in 2022 compared to 2021 and increased 0.2% as a percentage of operating revenues. Rent and purchased transportation expense consists mostly of payments to third-party capacity providers in the Werner Logistics segment and other non-trucking operations and payments to independent contractors in the TTS segment. The payments to third-party capacity providers generally vary depending on changes in the volume of services generated by the Werner Logistics segment. Werner Logistics purchased transportation expense increased \$117.8 million as a result of higher logistics revenues, which includes 8 weeks of the acquired ReedTMS logistics business, and decreased to 82.3% as a percentage of Werner Logistics revenues in 2022 from 86.0% in 2021 due to improved pricing and the effect of the NEHDS acquisition, as NEHDS utilizes both employees and contracted drive teams.

Rent and purchased transportation expense for the TTS segment increased \$17.5 million in 2022 compared to 2021 due primarily to higher reimbursements to independent contractors because of significantly higher average diesel fuel prices. The higher expense was partially offset by fewer independent contractor miles in 2022. Independent contractor miles decreased 10.0 million miles in 2022 and as a percentage of total miles were 4.5% in 2022 compared to 5.8% in 2021. Because independent contractors supply their own tractors and drivers and are responsible for their operating expenses, the decrease in independent contractor miles as a percentage of total miles shifted costs from the rent and purchased transportation category to other expense categories, including (i) salaries, wages and benefits, (ii) fuel, (iii) depreciation, (iv) supplies and maintenance and (v) taxes and licenses.

Challenging operating conditions continue to make independent contractor recruitment and retention difficult. Such conditions include inflationary cost increases that are the responsibility of independent contractors and a shortage of financing available to independent contractors for equipment purchases. Historically, we have been able to add company tractors and recruit additional company drivers to offset any decrease in the number of independent contractors. If a shortage of independent contractors and company drivers occurs, further increases in per-mile settlement rates (for independent contractors) and driver pay rates (for company drivers) may become necessary to attract and retain these drivers. This could negatively affect our results of operations to the extent that we would not be able to obtain corresponding freight rate increases.

Other operating expenses decreased \$23.2 million in 2022 compared to 2021 and decreased 0.5% as a percentage of operating revenues due primarily to higher gains on sales of property and equipment (primarily used tractors and trailers) and a \$2.5 million reversal of the contingent consideration recorded in the NEHDS acquisition because the financial performance goals in 2022 were not achieved, partially offset by the impact of a \$1.0 million gain from the sale of WGL in first quarter 2021. Gains on sales of property and equipment are reflected as a reduction of other operating expenses and are reported net of sales-related expenses (which include costs to prepare the equipment for sale). Gains on sales of property and equipment were \$88.6 million in 2022, compared to \$61.5 million in 2021. In 2022, we sold fewer tractors and trailers than in 2021. We realized substantially higher average gains per tractor and trailer sold in 2022 due to significantly improved pricing in the market for our used equipment, which we believe is a result of increased demand for previously used equipment because of production delays limiting availability of new equipment in the industry. In 2023, we anticipate the used truck and trailer market will weaken, as we expect a greater number of small carriers to exit the trucking industry due to lower spot rates and much higher operating costs. As a result, we expect our gains on sales of property and equipment in 2023 to decrease to between \$30 million and \$50 million.

Other Income, Net

Other income, net of expense, decreased \$35.2 million in 2022 compared to 2021 due primarily to a \$28.1 million decrease in the amount of unrealized net gains recognized on our investments in equity securities (see Note 7 in the Notes to Consolidated Financial Statements set forth in Part II of this Form 10-K) and a \$7.4 million increase in interest expense. Interest expense increased primarily due to higher average debt outstanding and higher interest rates. In 2023, we expect interest expense will be higher than in 2022, primarily due to higher interest rates, as well as maintaining a higher debt level.

Income Tax Expense

Income tax expense decreased \$5.3 million in 2022 compared to 2021, due to lower pre-tax income. The effective income tax rate (income taxes expressed as a percentage of income before income taxes) was 24.4% in 2022 and 2021. We currently estimate our full year 2023 effective income tax rate to be approximately 24.0% to 25.0%.

2021 Compared to 2020

For a comparison of the Company's results of operations for the fiscal year ended December 31, 2021 to the fiscal year ended December 31, 2020, see Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in

the Company's Annual Report on Form 10-K for the year ended December 31, 2021, which was filed with the U.S. Securities and Exchange Commission on February 28, 2022.

Liquidity and Capital Resources:

We closely manage our liquidity and capital resources. Our liquidity requirements depend on key variables, including the level of investment needed to support business strategies, the performance of the business, capital expenditures, borrowing arrangements, and working capital management. Capital expenditures, business acquisitions, stock repurchases, and dividend payments are components of our cash flow and capital management strategy, which to a large extent, can be adjusted in response to economic and other changes in the business environment. Management's approach to capital allocation focuses on investing in key priorities that support our business and growth strategies and providing shareholder returns, while funding ongoing operations.

Management believes our financial position at December 31, 2022 is strong. As of December 31, 2022, we had \$107.2 million of cash and cash equivalents and over \$1.4 billion of stockholders' equity. Cash is invested primarily in government portfolio money market funds. In addition, we have a \$1.075 billion credit facility, for which our total available borrowing capacity was \$416.2 million as of December 31, 2022. We believe our liquid assets, cash generated from operating activities, and borrowing capacity under our existing credit facility will provide sufficient funds to meet our cash requirements and our planned shareholder returns for the foreseeable future.

Our material cash requirements include the following contractual and other obligations.

- *Debt Obligations and Interest Payments* – As of December 31, 2022, we had outstanding debt with an aggregate principal amount of \$693.8 million, with \$6.3 million payable within 12 months. Future interest payments associated with our debt obligations are estimated to be \$136.0 million through 2027, with \$31.3 million payable within 12 months. See Note 8 in the Notes to Consolidated Financial Statements under Item 8 of Part II of this Form 10-K for further detail of our debt and the timing of expected future principal payments.
- *Operating Leases* – We have entered into operating leases primarily for real estate. As of December 31, 2022, we had fixed lease payment obligations of \$46.6 million, with \$10.6 million payable within 12 months. See Note 5 in the Notes to Consolidated Financial Statements under Item 8 of Part II of this Form 10-K for further detail of our lease obligations and the timing of expected future payments.
- *Purchase Obligations* – As of December 31, 2022, we have committed to property and equipment purchases of approximately \$278.6 million within the next 12 months.

In addition to our cash requirements, the Board of Directors has authorized us to deliver value to shareholders through stock repurchases and quarterly cash dividends. The stock repurchase program does not obligate the Company to acquire any specific number of shares. We plan to continue paying a quarterly dividend, which currently results in a cash outlay of slightly more than \$8 million per quarter.

Cash Flows

We generated cash flow from operations of \$448.7 million during 2022 compared to \$332.8 million during 2021. The increase in net cash provided by operating activities was due primarily to working capital changes resulting from growth in accounts receivable during 2021. We were able to make net capital expenditures, make additional strategic investments, pay dividends, and repurchase Company stock with the net cash provided by operating activities and existing cash balances, supplemented by net borrowings under our credit facilities.

Net cash used in investing activities was \$514.3 million during 2022 compared to \$397.3 million during 2021. Net cash invested in our business acquisitions was \$184.1 million during 2022 compared to \$201.8 million during 2021. Net property and equipment additions (primarily revenue equipment) were \$317.6 million during 2022 compared to \$193.0 million during 2021. We currently estimate net capital expenditures (primarily revenue equipment) in 2023 to be in the range of \$350 million to \$400 million. We intend to fund these net capital expenditures through cash flows from operations and financing available under our existing credit facilities, if necessary.

Net cash provided by financing activities was \$118.0 million during 2022 compared to \$89.7 million during 2021. We had net borrowings of \$266.3 million during 2022, increasing our outstanding debt to \$693.8 million at December 31, 2022. A portion of the proceeds were used to finance our Baylor and ReedTMS acquisitions. We had net borrowings of \$227.5 million during 2021, which were primarily used to finance our ECM and NEHDS acquisitions. We paid dividends of \$32.2 million during 2022 and \$29.1 million during 2021. We increased our quarterly dividend rate by \$0.01 per share, or 8%, beginning with the quarterly dividend paid in July 2022.

Financing activities for 2022 also included common stock repurchases of 2,710,304 shares at a cost of \$110.4 million. We repurchased 2,297,911 shares during 2021 at a cost of \$104.4 million. The Company has repurchased, and may continue to repurchase, shares of the Company's common stock. The timing and amount of such purchases depend upon economic and stock market conditions and other factors. On November 9, 2021, our Board of Directors approved a new stock repurchase program under which the Company is authorized to repurchase up to 6,000,000 shares of its common stock. As of December 31, 2022, the Company had purchased 3,688,190 shares pursuant to this authorization and had 2,311,810 shares remaining available for repurchase.

Critical Accounting Estimates:

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the (i) reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and (ii) reported amounts of revenues and expenses during the reporting period. We evaluate these estimates on an ongoing basis as events and circumstances change, utilizing historical experience, consultation with experts and other methods considered reasonable in the particular circumstances. Actual results could differ from those estimates and may significantly impact our results of operations from period to period. It is also possible that materially different amounts would be reported if we used different estimates or assumptions.

Estimates of accrued liabilities for insurance and claims for bodily injury, property damage and workers' compensation is a critical accounting estimate that requires us to make significant judgments and estimates and affects our financial statements. The accruals for bodily injury, property damage and workers' compensation (current and non-current) are recorded at the estimated ultimate payment amounts and are based upon individual case estimates and actuarial estimates of loss development for reported losses and incurred-but-not-reported losses using loss development factors based upon past experience. In order to determine the loss development factors, we make judgments relating to the comparability of historical claims to current claims. These judgments consider the nature, frequency, severity, and age of claims, and industry, regulatory, and company-specific trends impacting the development of claims. An independent actuary reviews our calculation of the undiscounted self-insurance reserves for bodily injury and property damage claims and workers' compensation claims at year-end. The actual cost to settle our self-insured claim liabilities can differ from our reserve estimates because of a number of uncertainties, including the inherent difficulty in estimating the severity of a claim and the potential amount to defend and settle a claim. We have not made any material changes in the accounting methodology or assumptions used to calculate our accrued liabilities for insurance and claims for bodily injury, property damage, and workers' compensation during the past three years. At December 31, 2022 and 2021, we had an accrual of \$323.6 million and \$309.8 million, respectively, for estimated insurance and claims for (i) cargo loss and damage, (ii) bodily injury and property damage, (iii) group health, and (iv) workers' compensation claims not covered by insurance. A 10% change in actuarial estimates at December 31, 2022, would have changed our insurance and claims accrual by approximately \$30.3 million.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk from changes in commodity prices, foreign currency exchange rates, and interest rates.

Commodity Price Risk

The price and availability of diesel fuel are subject to fluctuations attributed to changes in the level of global oil production, refining capacity, regulatory changes, seasonality, weather and other market factors. Historically, we have recovered a majority, but not all, of fuel price increases from customers in the form of fuel surcharges. We implemented customer fuel surcharge programs with most of our customers to offset much of the higher fuel cost per gallon. However, we do not recover all of the fuel cost increase through these surcharge programs. As of December 31, 2022, we had no derivative financial instruments to reduce our exposure to fuel price fluctuations.

Foreign Currency Exchange Rate Risk

We conduct business in foreign countries, primarily in Mexico. To date, most foreign revenues are denominated in U.S. Dollars, and we receive payment for foreign freight services primarily in U.S. Dollars to reduce direct foreign currency risk. Assets and liabilities maintained by a foreign subsidiary company in the local currency are subject to foreign exchange gains or losses. Foreign currency translation gains and losses primarily relate to changes in the value of revenue equipment owned by a subsidiary in Mexico, whose functional currency is the *Peso*. Foreign currency translation gains were \$2.4 million for the year ended December 31, 2022 and foreign currency translation losses were \$1.4 million for the year ended December 31, 2021, and were recorded in accumulated other comprehensive loss within stockholders' equity in the consolidated balance sheets. The exchange rate between the Mexican *Peso* and the U.S. Dollar was 19.36 *Pesos* to \$1.00 at December 31, 2022 compared to 20.58 *Pesos* to \$1.00 at December 31, 2021.

Interest Rate Risk

We manage interest rate exposure through a mix of variable interest rate debt and interest rate swap agreements. We had \$150.0 million of variable interest rate debt outstanding at December 31, 2022, for which the interest rate is effectively fixed at 2.78% through May 2024 with two interest rate swap agreements to reduce our exposure to interest rate increases. In addition, we had \$450.0 million of variable interest rate debt outstanding at December 31, 2022. The interest rates on our unused credit facility are based on Secured Overnight Financing Rate ("SOFR"). See Note 8 in the Notes to Consolidated Financial Statements under Item 8 of Part II of this Form 10-K for further detail of our debt. Assuming this level of borrowing, a hypothetical one-percentage point increase in the SOFR interest rate would increase our annual interest expense by approximately \$4.5 million.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Werner Enterprises, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Werner Enterprises, Inc. and subsidiaries (the Company) as of December 31, 2022 and 2021, the related consolidated statements of income, comprehensive income, stockholders' equity and temporary equity - redeemable noncontrolling interest, and cash flows for each of the years in the three-year period ended December 31, 2022, and the related notes and financial statement schedule II valuation and qualifying accounts (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2022, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 27, 2023 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Evaluation of insurance and claims accruals

As discussed in Note 1 to the consolidated financial statements, the Company estimates the insurance and claims accruals related to (1) cargo loss and damage, (2) bodily injury and property damage, (3) group health, and (4) workers' compensation claims not covered by insurance. The Company's current and non-current insurance and claims accruals were \$78.6 million and \$244.9 million, respectively. The accruals specifically for bodily injury, property damage, and workers' compensation are based upon individual case estimates and actuarial estimates of loss development for reported losses and incurred-but-not-reported losses using loss development factors based upon past experience. In order to determine the loss development factors, the Company makes judgments relating to the comparability of historical claims to current claims. These judgments consider the nature, frequency, severity and age of claims, and industry, regulatory, and company-specific trends impacting the development of claims. The Company has an independent actuary review their calculation of these undiscounted insurance and claims accruals.

We identified the evaluation of the Company's insurance and claims accruals related to bodily injury, property damage, and workers' compensation claims not covered by insurance as a critical audit matter. Specifically, evaluating the loss development factors used to determine these insurance and claims accruals involved a high degree of complexity and subjectivity. In addition, specialized skills were needed to evaluate the Company's models to calculate these undiscounted insurance and claims accruals.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to these insurance and claims accruals, including controls related to the determination of loss development factors used to determine these insurance and claims accruals. We involved actuarial professionals with specialized skills and knowledge who assisted in:

- assessing the models used by the Company to determine these insurance and claims accruals for consistency with generally accepted actuarial standards
- assessing the determination of loss development factors used in the models for consistency with historical Company data and company-specific trends
- developing an independent expectation of the Company's insurance and claims accruals and comparing to the Company's estimate.

We tested historical claims paid and claims reported, but not paid, that are used as an input to the Company's models to calculate these insurance and claims accruals for consistency with data used in the prior year. We tested actual claims paid and claims reported, but not paid, for the current year that are used as an input to the Company's models to calculate these insurance and claims accruals for consistency with the Company's actual claims paid and claims reported, but not paid. We compared the Company's prior period insurance and claims accruals to actual claims in the current period to assess the Company's ability to accurately estimate costs.

/s/ KPMG LLP

We have served as the Company's auditor since 1999.

WERNER ENTERPRISES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation: The accompanying consolidated financial statements include the accounts of Werner Enterprises, Inc. and its subsidiaries (collectively, the “Company”). All significant intercompany accounts and transactions relating to these entities have been eliminated.

Nature of Business: The Company is a truckload transportation and logistics provider operating under the jurisdiction of the U.S. Department of Transportation, similar governmental transportation agencies in the foreign countries in which we operate and various U.S. state regulatory authorities. Our ten largest customers comprised 46% of our revenues for the year ended December 31, 2022, and 49% for the years ended December 31, 2021 and 2020. Our largest customer, Dollar General, accounted for 14% of our total revenues in 2022 and 2021, and 12% in 2020. Revenues generated by Dollar General are reported in both of our reportable operating segments. Dollar General accounted for 13% and 16% of our accounts receivable, trade balance as of December 31, 2022 and 2021, respectively.

Use of Management Estimates: The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the (i) reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and (ii) reported amounts of revenues and expenses during the reporting period. The most significant estimates that affect our financial statements include the accrued liabilities for insurance and claims and useful lives and salvage values of property and equipment. Actual results could differ from those estimates.

Cash and Cash Equivalents: We consider all highly liquid investments, purchased with a maturity of three months or less, to be cash equivalents. Accounts at banks with an aggregate excess of the amount of checks issued over cash balances are included in current liabilities in the consolidated balance sheets, and changes in such accounts are reported as a financing activity in the consolidated statements of cash flows.

Trade Accounts Receivable: We record trade accounts receivable at the invoiced amounts, net of an allowance for doubtful accounts for potentially uncollectible receivables. We review the financial condition of customers for granting credit and determine the allowance based on analysis of individual customers’ financial condition, historical write-off experience and national economic conditions. We evaluate the adequacy of our allowance for doubtful accounts quarterly. Past due balances over 90 days and exceeding a specified amount are reviewed individually for collectibility. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. We do not have any off-balance-sheet credit exposure related to our customers.

Inventories and Supplies: Inventories and supplies are stated at the lower of average cost and net realizable value and consist primarily of revenue equipment parts, tires, fuel and supplies. Tires placed on new revenue equipment are capitalized as a part of the equipment cost. Replacement tires are expensed when placed in service.

Property, Equipment, and Depreciation: Additions and improvements to property and equipment are capitalized at cost, while maintenance and repair expenditures are charged to operations as incurred. Gains and losses on the sale or exchange of property and equipment are recorded in other operating expenses.

Depreciation is calculated based on the cost of the asset, reduced by the asset’s estimated salvage value, using the straight-line method. Accelerated depreciation methods are used for income tax purposes. The lives and salvage values assigned to certain assets for financial reporting purposes are different than for income tax purposes. For financial reporting purposes, assets are generally depreciated using the following estimated useful lives and salvage values:

	Lives	Salvage Values
Building and improvements	30 years	0%
Tractors	80 months	\$0 - \$10,000
Trailers	12 years	\$6,000
Service and other equipment	3-10 years	0%

Depreciation expense was \$273.8 million, \$265.8 million, and \$263.3 million for the years ended December 31, 2022, 2021, and 2020 respectively, and is reported in depreciation and amortization on the consolidated statements of income.

Due to the ongoing stronger used trailer market and the increasing cost of new trailers, a change in accounting estimate was made during the first quarter of 2022, which decreased depreciation expense by \$12.7 million in 2022. During first quarter 2020, we changed the estimated life of certain trucks expected to be sold in 2020 to more rapidly depreciate the trucks to their estimated residual values due to the weak used truck market. The effect of this change in accounting estimate was a \$9.6 million increase to 2020 depreciation expense. These trucks continued to depreciate at the same higher rate per truck, until all were sold in 2020.

Goodwill: Goodwill represents the excess of cost over the fair value of net identifiable tangible and intangible assets acquired in business combinations and is allocated to reporting units that are expected to benefit from the combinations. Goodwill is not amortized, but rather is tested for impairment annually in the fourth quarter, or more frequently if indicators of a potential impairment exist. Impairment exists when the carrying amount of a reporting unit that includes goodwill exceeds its fair value, resulting in an impairment charge for the excess up to the amount of goodwill allocated to the reporting unit. To test goodwill for impairment, we have the option to first perform a qualitative assessment to determine if it is more likely than not that the carrying amount of a reporting unit exceeds its fair value. If a qualitative test indicates a potential for impairment, a quantitative impairment test must be performed. Alternatively, we may bypass the qualitative assessment and perform a quantitative impairment test. A qualitative assessment considers relevant events and circumstances such as macroeconomic, industry, and market conditions; legal, regulatory, and competitive environments; and overall financial performance. For a quantitative impairment test, we estimate the fair values of the goodwill reporting units and compare it to their carrying values. The estimated fair values of the reporting units are established using a combination of the income and market approaches. No impairment charges have resulted from the annual impairment tests.

Amortization of Intangible Assets: Intangible assets with finite lives are amortized on a straight-line basis over their estimated useful lives, ranging from ten to 12 years.

Long-Lived Assets and Intangible Assets: We review our long-lived assets and finite-lived intangible assets for impairment whenever events or circumstances indicate the carrying amount of such assets may not be recoverable. If based on that review, changes in circumstances indicate that the carrying amount of such assets may not be recoverable, we evaluate recoverability by comparing the undiscounted cash flows associated with the asset to the asset's carrying amount. We also evaluate the remaining useful lives of intangible assets to determine if events or trends warrant a revision to the remaining period of amortization. An impairment loss would be recognized if the carrying amount of the long-lived asset or intangible asset is not recoverable and the carrying amount exceeds its fair value. For long-lived assets classified as held and used, the carrying amount is not recoverable when the carrying value of the long-lived asset exceeds the sum of the future net cash flows. We do not separately identify assets by operating segment because tractors and trailers are routinely transferred from one operating fleet to another. As a result, none of our long-lived assets have identifiable cash flows from use that are largely independent of the cash flows of other assets and liabilities. Thus, the asset group used to assess impairment would include all of our assets. No impairment charges were recorded during the years ended December 31, 2022, 2021, and 2020.

Insurance and Claims Accruals: Insurance and claims accruals (both current and non-current) reflect the estimated cost (including estimated loss development, incurred-but-not-reported losses and loss adjustment expenses) for (i) cargo loss and damage, (ii) bodily injury and property damage, (iii) group health and (iv) workers' compensation claims not covered by insurance. The costs for cargo, bodily injury and property damage insurance and claims are included in insurance and claims expense in the consolidated statements of income; the costs of group health and workers' compensation claims are included in salaries, wages and benefits expense. The insurance and claims accruals are recorded at the estimated ultimate payment amounts. The accruals for bodily injury, property damage and workers' compensation are based upon individual case estimates and actuarial estimates of loss development for reported losses and incurred-but-not-reported losses using loss development factors based upon past experience. In order to determine the loss development factors, we make judgments relating to the comparability of historical claims to current claims. These judgments consider the nature, frequency, severity, and age of claims, and industry, regulatory, and company-specific trends impacting the development of claims. An independent actuary reviews our calculation of the undiscounted self-insurance reserves for bodily injury and property damage claims and workers' compensation claims at year-end.

We renewed our liability insurance policies on August 1, 2022 and are responsible for the first \$10.0 million per claim on all claims with an annual \$10.0 million aggregate for claims between \$10.0 million and \$20.0 million. For the policy year that began August 1, 2021, we were responsible for the first \$10.0 million per claim on all claims with an annual \$10.0 million aggregate for claims between \$10.0 million and \$15.0 million. For the policy year that began on August 1, 2020, we were responsible for the first \$10.0 million per claim with no aggregates. Our self-insured retention ("SIR") and deductible amount was \$3.0 million, with an additional \$5.0 million deductible per claim for each claim between \$5.0 million and \$10.0 million, for policy years from August 1, 2017 through July 31, 2020, and we were also responsible for annual aggregate amounts of liability for claims in excess of the SIR and deductible. We maintain liability insurance coverage with insurance carriers in

excess of the \$10.0 million per claim. We are also responsible for administrative expenses for each occurrence involving bodily injury or property damage.

Our SIR for workers' compensation claims is \$2.0 million per claim, with premium-based coverage (issued by insurance companies) for claims exceeding this amount. Our SIR for workers' compensation claims increased from \$1.0 million to \$2.0 million per claim on April 1, 2020. We also maintain a \$25.0 million bond for the State of Nebraska and a \$14.5 million bond for our workers' compensation insurance carrier.

Under these insurance arrangements, we maintained \$46.8 million in letters of credit as of December 31, 2022.

Revenue Recognition: The consolidated statements of income reflect recognition of operating revenues (including fuel surcharge revenues) and related direct costs over time as control of the promised services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to in exchange for those services. For shipments where a third-party capacity provider (including independent contractors under contract with us) is utilized to provide some or all of the service, we evaluate whether we are the principal (i.e., report revenues on a gross basis) or agent (i.e., report revenues on a net basis).

Foreign Currency Translation: Local currencies are generally considered the functional currencies outside the United States. Assets and liabilities are translated at year-end exchange rates for operations in local currency environments. Foreign revenues and expense items denominated in the functional currency are translated at the average rates of exchange prevailing during the year. Foreign currency translation adjustments reflect the changes in foreign currency exchange rates applicable to the net assets of the foreign operations. Foreign currency translation adjustments are recorded in accumulated other comprehensive loss within stockholders' equity in the consolidated balance sheets and as a separate component of comprehensive income in the consolidated statements of comprehensive income.

Income Taxes: Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred income tax assets and liabilities are measured using the enacted tax rates that are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred income tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

In accounting for uncertain tax positions, we recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. We recognize interest and penalties directly related to income tax matters in income tax expense.

Common Stock and Earnings Per Share: Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income by the weighted average number of common shares outstanding plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method. Dilutive potential common shares include outstanding stock options and restricted stock awards. There are no differences in the numerators of our computations of basic and diluted earnings per share for any periods presented. The computation of basic and diluted earnings per share is shown below (in thousands, except per share amounts).

	Years Ended December 31,		
	2022	2021	2020
Net income attributable to Werner	\$ 241,256	\$ 259,052	\$ 169,078
Weighted average common shares outstanding	64,125	67,434	69,018
Dilutive effect of stock-based awards	454	421	409
Shares used in computing diluted earnings per share	64,579	67,855	69,427
Basic earnings per share	\$ 3.76	\$ 3.84	\$ 2.45
Diluted earnings per share	\$ 3.74	\$ 3.82	\$ 2.44

There were no options to purchase shares of common stock that were outstanding during the periods indicated above that were excluded from the computation of diluted earnings per share because the option purchase price was greater than the average market price of the common shares during the period. Performance awards are excluded from the calculation of dilutive potential common shares until the threshold performance conditions have been satisfied.

Equity Compensation: We have an equity compensation plan that provides for grants of non-qualified stock options, restricted stock and units (“restricted awards”), performance awards and stock appreciation rights to our associates and directors. We apply the fair value method of accounting for equity compensation awards. Issuances of stock upon an exercise of stock options or vesting of restricted stock are made from treasury stock; shares reacquired to satisfy tax withholding obligations upon vesting of restricted stock are recorded as treasury stock. Grants of stock options, restricted stock, and performance awards vest in increments, and we recognize compensation expense over the requisite service period of each award. We accrue compensation expense for performance awards for the estimated number of shares expected to be issued using the most current information available at the date of the financial statements. If the performance objectives are not met, no compensation expense will be recognized, and any previously recognized compensation expense will be reversed. We account for forfeitures in the period in which they occur.

Comprehensive Income: Comprehensive income consists of net income and other comprehensive income (loss). Other comprehensive income (loss) refers to revenues, expenses, gains and losses that are not included in net income, but rather are recorded directly in stockholders’ equity. For the years ended December 31, 2022, 2021, and 2020, comprehensive income consists of net income, foreign currency translation adjustments and change in fair value of interest rate swaps. The components of accumulated other comprehensive loss reported in the consolidated balance sheets as of December 31, 2022 and 2021, consisted of foreign currency translation adjustment losses of \$16.2 million and \$18.6 million, respectively, and gains of \$4.9 million and losses of \$2.0 million related to changes in fair value of interest rate swaps, net of tax, respectively.

New Accounting Pronouncements Adopted: In first quarter 2022, we adopted Accounting Standards Update (“ASU”) No. 2020-04, *Reference Rate Reform (Topic 848)*, which provides optional guidance for a limited period of time to ease the potential burden in accounting for reference rate reform on financial reporting. The provisions of this update apply only to contracts, hedging relationships, and other transactions that reference the London Interbank Offered Rate (“LIBOR”) or another reference rate expected to be discontinued because of reference rate reform. The adoption of the new guidance did not have a material impact on our consolidated financial statements.

(2) BUSINESS ACQUISITIONS

2022 Business Acquisitions

ReedTMS Acquisition

On November 5, 2022, we acquired 100% of the equity interests in Reed Transport Services, Inc. and RTS-TMS, Inc., doing business as ReedTMS Logistics (“ReedTMS”), for a total purchase price of \$109.2 million after including the impacts of working capital adjustments, cash acquired, net present value of future insurance payments, and contingent consideration. The contingent consideration arrangement, also referred to as earnout, requires us to pay the former owners of ReedTMS an additional amount in cash if ReedTMS achieves certain performance financial goals over a one-year period beginning January 1, 2023. The potential undiscounted future contingent earnout payment that we could be required to make is between \$0 and \$7.5 million. On a pro forma basis (unaudited), operating revenues for ReedTMS for the year ended December 31, 2022 was \$368.5 million and operating revenues for ReedTMS for the year ended December 31, 2021 was \$339.8 million. We financed the transaction through existing credit facilities. ReedTMS, based in Tampa, Florida, is an asset-light logistics provider and dedicated truckload carrier that offers a comprehensive suite of freight brokerage and truckload solutions to a diverse customer base. The acquisition further strengthens our freight brokerage capabilities and elevates our logistics portfolio with new customers.

The results of operations for ReedTMS are included in our consolidated financial statements beginning November 5, 2022. Freight brokerage and truckload revenues generated by ReedTMS are reported in our Werner Logistics segment and in Dedicated within our Truckload Transportation Services (“TTS”) segment, respectively. We incurred transaction costs related to the acquisition, such as legal and professional fees, of \$0.7 million for the year ended December 31, 2022, which is included in other operating expenses on the consolidated statements of income.

Baylor Acquisition

On October 1, 2022, we acquired 100% of the equity interests in FAB9, Inc., doing business as Baylor Trucking, Inc. (“Baylor”), for a final total purchase price of \$89.0 million after including the impacts of working capital adjustments, cash acquired, and contingent consideration. The contingent consideration arrangement requires us to pay the former owner of Baylor an additional amount in cash if Baylor achieves certain performance financial goals over a three-year period beginning on November 1, 2022. The potential undiscounted future contingent earnout payment that we could be required to make is between \$0 and \$15.0 million. We financed the transaction through existing credit facilities. Baylor, based in Milan, Indiana, operates 200 trucks and 980 trailers in the east central and south central United States. The acquisition expands our terminal, fleet, and professional driver presence in these geographic truckload markets and adds two terminals to our network.

The results of operations for Baylor are included in our consolidated financial statements beginning October 1, 2022. Revenues generated by Baylor are reported in One-Way Truckload within our TTS segment. We incurred transaction costs related to the acquisition, such as legal and professional fees, of \$0.4 million for the year ended December 31, 2022, which is included in other operating expenses on the consolidated statements of income.

Purchase Price Allocations

We accounted for the ReedTMS and Baylor purchases using the acquisition method of accounting under U.S. generally accepted accounting principles (GAAP). The purchase price of each acquisition has been allocated to the assets acquired and liabilities assumed using market data and valuation techniques. The estimated fair values of the assets acquired and liabilities assumed are considered provisional for ReedTMS and Baylor, pending the completion of acquired tangible assets valuations, independent valuations of certain acquired intangible assets, and calculations of deferred taxes based upon the underlying tax basis of assets acquired and liabilities assumed. The determination of estimated fair values requires management to make significant estimates and assumptions. We believe that the information available provides a reasonable basis for estimating the values of assets acquired and liabilities assumed in the ReedTMS and Baylor acquisitions; however, these provisional estimates may be adjusted upon the availability of new information regarding facts and circumstances which existed at the acquisition dates, and such adjustments may impact future earnings. We expect to finalize the valuation of assets and liabilities for ReedTMS and Baylor as soon as practicable, but not later than one year from the respective acquisition dates. Any adjustments to the initial estimates of the fair value of the acquired assets and liabilities assumed in the ReedTMS and Baylor acquisitions will be recorded as adjustments to the respective assets and liabilities, with the residual amounts allocated to goodwill.

The provisional purchase price allocations for ReedTMS and Baylor as of December 31, 2022 are summarized as follows (in thousands):

	ReedTMS	Baylor
<u>Purchase Price</u>		
Cash consideration paid	\$ 116,989 ⁽¹⁾	\$ 90,150 ⁽²⁾
Cash and cash equivalents acquired	(12,120)	(10,150)
Contingent consideration arrangement	5,000 ⁽³⁾	8,400 ⁽³⁾
Working capital surplus (deficiency)	(689)	643
Total purchase price (fair value of consideration)	<u>109,180</u>	<u>89,043</u>
<u>Purchase Price Allocation</u>		
Current assets	52,531	11,371
Property and equipment	35,000	54,639
Intangible assets	12,000	20,300
Other non-current assets	7,927	556
Total assets acquired	<u>107,458</u>	<u>86,866</u>
Current liabilities	(45,497)	(2,993)
Other long-term liabilities	(5,622)	(302)
Total liabilities assumed	<u>(51,119)</u>	<u>(3,295)</u>
Goodwill	<u>\$ 52,841</u>	<u>\$ 5,472</u>

⁽¹⁾ Includes \$0.9 million related to the net present value of future insurance payments. At closing, \$11.5 million of the cash consideration was placed in escrow to secure certain indemnification obligations of the sellers and to cover post-closing adjustments.

⁽²⁾ At closing, \$8.5 million of the cash consideration was placed in escrow to secure certain indemnification obligations of the sellers and to cover post-closing adjustments.

⁽³⁾ The estimated fair value of the ReedTMS and Baylor contingent consideration arrangements was based upon probability-adjusted inputs for each acquired entity and are recorded in other long-term liabilities on the consolidated balance sheet as of December 31, 2022.

Goodwill and Intangible Assets

Goodwill associated with the ReedTMS and Baylor business acquisitions was primarily attributable to acquiring and retaining each of the companies' existing networks and the anticipated synergies from combining the operations of the Company and the acquired companies. The goodwill associated with the acquisitions above is expected to be deductible for income tax purposes.

We have allocated a total of \$32.3 million of the purchase prices above to finite-lived intangible assets, consisting of customer relationships and trade names. The estimated fair values of the intangible assets were determined, with the assistance of an

independent third-party valuation firm, using the multi-period excess earnings method for customer relationships and the relief-from-royalty method for trade names. All methods are forms of the income approach, which require a forecast of all the expected future cash flows.

The following table summarizes the major classes of intangible assets and the respective weighted-average estimated amortization periods:

	Estimated Fair Value (in thousands)	Weighted-Average Estimated Amortization Period (Years)
Customer relationships	\$ 24,700	10
Trade names	7,600	12
Total intangible assets	<u>\$ 32,300</u>	

2021 Business Acquisitions

NEHDS Acquisition

On November 22, 2021, we acquired 100% of the equity interests in NEHDS Logistics, LLC (“NEHDS”). In first quarter 2022, post-closing net working capital changes of \$0.7 million decreased the purchase price, resulting in a final total purchase price of \$62.3 million after including the impacts of contingent consideration and net working capital changes. We financed the transaction through a combination of cash on hand and existing credit facilities. NEHDS is a final mile residential delivery provider serving customers primarily in the Northeast and Midwest United States markets. NEHDS delivers primarily big and bulky products (primarily furniture and appliances) using 2-person delivery teams performing residential and commercial deliveries.

The results of operations for NEHDS are included in our consolidated financial statements beginning November 22, 2021. Revenues generated by NEHDS are reported in Final Mile within our Werner Logistics (“Logistics”) segment. The contingent earnout liability was \$0 and \$2.5 million as of December 31, 2022 and 2021, respectively. The contingent earnout period related to the NEHDS acquisition ended on December 31, 2022 and did not result in any additional cash payments, as the financial performance goals were not achieved. This favorable change to the contingent earnout liability was recorded in other operating expense on the consolidated statements of income for the year ended December 31, 2022. We incurred transaction costs related to the acquisition, such as legal and professional fees, of \$0.6 million for the year ended December 31, 2021, which is included in other operating expenses on the consolidated statements of income.

ECM Acquisition

On July 1, 2021, we acquired an 80% ownership interest in ECM Associated, LLC (“ECM”) for a final total purchase price of \$141.3 million after net working capital changes and net of cash acquired. We have an exclusive option to purchase the remaining 20% ownership interest in ECM upon the occurrence of certain events or after a period of five years following transaction close, based on a fixed multiple of ECM’s average annual adjusted earnings before interest, taxes, depreciation and amortization. The noncontrolling interest holder also has an option to put the remaining 20% ownership interest to us on the same terms. We record the 20% remaining interest in temporary equity – redeemable noncontrolling interest in the consolidated balance sheets.

ECM provides regional truckload carrier services in the Mid-Atlantic, Ohio, and Northeast regions of the United States. We financed the cash transaction through a combination of cash on hand, existing credit facilities, and the addition of a \$100.0 million unsecured fixed-rate term loan commitment with BMO Harris Bank N.A. on June 30, 2021. For more information regarding our debt, see Note 8 – Debt and Credit Facilities.

The results of operations for ECM are included in our consolidated financial statements beginning July 1, 2021. Revenues generated by ECM are reported in our TTS segment. We incurred transaction costs related to the ECM acquisition, such as legal and professional fees, of \$1.0 million for the year ended December 31, 2021, which is included in other operating expenses on the consolidated statements of income.

(3) REVENUE

Revenue Recognition

Revenues are recognized over time as control of the promised services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to in exchange for those services.

The following table presents our revenues disaggregated by revenue source (in thousands):

	Years Ended December 31,		
	2022	2021	2020
Truckload Transportation Services	\$ 2,428,686	\$ 2,045,073	\$ 1,843,209
Werner Logistics	793,492	622,461	469,791
Inter-segment eliminations	(5,218)	(899)	(107)
Transportation services	3,216,960	2,666,635	2,312,893
Other revenues	73,018	67,737	59,285
Total revenues	<u>\$ 3,289,978</u>	<u>\$ 2,734,372</u>	<u>\$ 2,372,178</u>

The following table presents our revenues disaggregated by geographic areas in which we conduct business (in thousands). Operating revenues for foreign countries include revenues for (i) shipments with an origin or destination in that country and (ii) other services provided in that country. If both the origin and destination are in a foreign country, the revenues are attributed to the country of origin.

	Years Ended December 31,		
	2022	2021	2020
United States	\$ 3,051,788	\$ 2,532,720	\$ 2,144,105
Mexico	191,126	156,405	149,438
Other	47,064	45,247	78,635
Total revenues	<u>\$ 3,289,978</u>	<u>\$ 2,734,372</u>	<u>\$ 2,372,178</u>

Transportation Services

We generate nearly all of our revenues by transporting truckload freight shipments for our customers. Transportation services are carried out by our TTS segment and our Logistics segment. The TTS segment utilizes company-owned and independent contractor trucks to deliver shipments, while the Logistics segment uses third-party capacity providers.

We generate revenues from billings for transportation services under contracts with customers, generally on a rate per mile or per shipment, based on origin and destination of the shipment. Our performance obligation arises when we receive a shipment order to transport a customer's freight and is satisfied upon delivery of the shipment. The transaction price may be defined in a transportation services agreement or negotiated with the customer prior to accepting the shipment order. A customer may submit several shipment orders for transportation services at various times throughout a service agreement term, but each shipment represents a distinct service that is a separately identified performance obligation. We often provide additional or ancillary services as part of the shipment (such as loading/unloading and stops in transit) which are not distinct or are not material in the context of the contract; therefore, the revenues for these services are recognized with the freight transaction price. The average transit time to complete a shipment is approximately 3 days. Invoices for transportation services are typically generated soon after shipment delivery and, while payment terms and conditions vary by customer, are generally due within 30 days after the invoice date.

The consolidated statements of income reflect recognition of transportation revenues (including fuel surcharge revenues) and related direct costs over time as the shipment is being delivered. We use distance shipped (for the TTS segment) and transit time (for the Logistics segment) to measure progress and the amount of revenues recognized over time, as the customer simultaneously receives and consumes the benefit. Determining a measure of progress requires us to make judgments that affect the timing of revenues recognized. We have determined that the methods described provide a faithful depiction of the transfer of services to the customer.

For shipments where a third-party capacity provider (including independent contractors under contract with us) is utilized to provide some or all of the service, we evaluate whether we are the principal (i.e., report revenues on a gross basis) or agent (i.e., report revenues on a net basis). Generally, we report such revenues on a gross basis, that is, we recognize both revenues for the service we bill to the customer and rent and purchased transportation expense for transportation costs we pay to the third-party provider. Where we are the principal, we control the transportation service before it is provided to our customers, which is supported by us being primarily responsible for fulfilling the shipment obligation to the customer and having a level of discretion in establishing pricing with the customer.

Other Revenues

Other revenues include revenues from our driver training schools, transportation-related activities such as third-party equipment maintenance and equipment leasing, and other business activities. These revenues are generally recognized over time and

accounted for 2% of our total revenues in 2022, 2021 and 2020. Revenues from our driver training schools require us to make judgments regarding price concessions in determining the amount of revenues to recognize.

Contract Balances and Accounts Receivable

A receivable is an unconditional right to consideration and is recognized when shipments have been completed and the related performance obligation has been fully satisfied. At December 31, 2022 and 2021, the accounts receivable, trade, net, balance was \$518.8 million and \$460.5 million, respectively. Contract assets represent a conditional right to consideration in exchange for goods or services and are transferred to receivables when the rights become unconditional. At December 31, 2022 and 2021, the balance of contract assets was \$8.9 million and \$9.0 million, respectively. We have recognized contract assets within the other current assets financial statement caption on the consolidated balance sheets. These contract assets are considered current assets as they will be settled in less than 12 months.

Contract liabilities represent advance consideration received from customers and are recognized as revenues over time as the related performance obligation is satisfied. At December 31, 2022 and 2021, the balance of contract liabilities was \$0.9 million and \$1.2 million, respectively. The amount of revenues recognized in 2022 that was included in the December 31, 2021 contract liability balance was \$1.2 million. We have recognized contract liabilities within the accounts payable and other current liabilities financial statement captions on the consolidated balance sheets. These contract liabilities are considered current liabilities as they will be settled in less than 12 months.

Performance Obligations

We have elected to apply the practical expedient in Accounting Standards Codification (“ASC”) Topic 606, *Revenue From Contracts With Customers*, to not disclose the value of remaining performance obligations for contracts with an original expected length of one year or less. Remaining performance obligations represent the transaction price allocated to future reporting periods for freight shipments started but not completed at the reporting date that we expect to recognize as revenue in the period subsequent to the reporting date; transit times generally average approximately 3 days.

During 2022, 2021, and 2020, revenues recognized from performance obligations related to prior periods (for example, due to changes in transaction price) were not material.

(4) GOODWILL AND INTANGIBLE ASSETS

The following table summarizes changes in the carrying amount of goodwill by segment for the years ended December 31, 2022 and 2021 (in thousands):

	TTS	Werner Logistics	Total
Balance as of December 31, 2020	\$ —	\$ —	\$ —
Goodwill recorded in acquisition of NEHDS	—	36,534	36,534
Goodwill recorded in acquisition of ECM	44,710	—	44,710
Purchase accounting adjustments ⁽¹⁾	(6,626)	—	(6,626)
Balance as of December 31, 2021	38,084	36,534	74,618
Goodwill recorded in acquisition of ReedTMS	10,341	42,500	52,841
Goodwill recorded in acquisition of Baylor	5,472	—	5,472
Purchase accounting adjustments ⁽²⁾	—	(214)	(214)
Balance as of December 31, 2022	\$ 53,897	\$ 78,820	\$ 132,717

⁽¹⁾ The purchase accounting adjustments are primarily attributable to post-closing adjustments related to net assets assumed in, and the redeemable noncontrolling interest associated with, the acquisition of ECM.

⁽²⁾ The purchase accounting adjustments consist of post-closing adjustments related to net assets assumed in the acquisition of NEHDS.

Acquired intangible assets consists of the following as of December 31, 2022 and 2021 (in thousands):

	December 31,					
	2022			2021		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	\$ 64,900	\$ (5,714)	\$ 59,186	\$ 40,200	\$ (1,177)	\$ 39,023
Trade names	24,600	(2,284)	22,316	17,000	(708)	16,292
Total intangible assets	<u>\$ 89,500</u>	<u>\$ (7,998)</u>	<u>\$ 81,502</u>	<u>\$ 57,200</u>	<u>\$ (1,885)</u>	<u>\$ 55,315</u>

Amortization expense on intangible assets was \$6.1 million and \$1.9 million for the years ended December 31, 2022 and 2021, respectively, and is reported in depreciation and amortization on the consolidated statements of income. No amortization expense on intangible assets was recorded for the year ended December 31, 2020.

As of December 31, 2022, the estimated future amortization expense for intangible assets by year is as follows (in thousands):

	Estimated Amortization Expense
2023	\$ 8,540
2024	8,540
2025	8,540
2026	8,540
2027	8,540
Thereafter (to 2034)	38,802
Total	<u>\$ 81,502</u>

(5) LEASES

We have entered into operating leases primarily for real estate. The leases have terms which range from 1 year to 18 years, and some include options to renew. Renewal terms are included in the lease term when it is reasonably certain that we will exercise the option to renew.

Operating leases are included in other non-current assets, other current liabilities and other long-term liabilities on the consolidated balance sheets. These assets and liabilities are recognized based on the present value of future minimum lease payments over the lease term at commencement date, using our incremental borrowing rate because the rate implicit in each lease is not readily determinable. We have certain contracts for real estate that may contain lease and non-lease components which we have elected to treat as a single lease component. Lease expense for operating leases is recognized on a straight-line basis over the lease term. Variable lease expense is recognized in the period in which the obligation for those payments is incurred. Lease expense is reported in rent and purchased transportation on the consolidated statements of income.

The following table presents balance sheet and other operating lease information (dollars in thousands):

	December 31,	
	2022	2021
Balance Sheet Classification		
Right-of-use assets (recorded in other non-current assets)	<u>\$ 40,963</u>	<u>\$ 28,458</u>
Current lease liabilities (recorded in other current liabilities)	\$ 9,396	\$ 6,380
Long-term lease liabilities (recorded in other long-term liabilities)	<u>32,897</u>	<u>22,634</u>
Total operating lease liabilities	<u>\$ 42,293</u>	<u>\$ 29,014</u>
Other Information		
Weighted-average remaining lease term for operating leases	6.43 years	7.63 years
Weighted-average discount rate for operating leases	3.3 %	2.7 %

The following table presents the maturities of operating lease liabilities as of December 31, 2022 (in thousands):

Maturity of Lease Liabilities		
2023	\$	10,595
2024		9,502
2025		7,441
2026		5,700
2027		3,887
Thereafter		9,429
Total undiscounted operating lease payments	\$	46,554
Less: Imputed interest		(4,261)
Present value of operating lease liabilities	\$	42,293

Cash Flows

During the years ended December 31, 2022, 2021, and 2020, right-of-use assets of \$14.7 million, \$8.2 million, and \$2.8 million, respectively, were recognized as non-cash asset additions that resulted from new operating lease liabilities, and we acquired right-of-use assets of \$8.3 million and \$15.6 million as a result of our business acquisitions during the years ended December 31, 2022 and 2021, respectively. Cash paid for amounts included in the present value of operating lease liabilities was \$8.5 million, \$4.6 million, and \$3.9 million during the years ended December 31, 2022, 2021, and 2020, respectively, and are included in operating cash flows.

Operating Lease Expense

Operating lease expense was \$22.1 million, \$15.7 million, and \$10.1 million during the years ended December 31, 2022, 2021, and 2020, respectively. This expense included \$9.4 million, \$4.8 million, and \$3.8 million for long-term operating leases for the years ended December 31, 2022, 2021, and 2020, respectively, with the remainder for variable and short-term lease expense.

Lessor Operating Leases

We are the lessor of tractors and trailers under operating leases with initial terms of 2 to 10 years. We recognize revenue for such leases on a straight-line basis over the term of the lease. Revenues for the years ended December 31, 2022, 2021, and 2020 were \$10.7 million, \$11.7 million, and \$12.6 million, respectively. The following table presents information about the maturities of these operating leases as of December 31, 2022 (in thousands):

2023	\$	7,244
2024		575
2025		287
2026		295
2027		74
Thereafter		—
Total	\$	8,475

(6) FAIR VALUE

Fair Value Measurement — Definition and Hierarchy

ASC 820-10, *Fair Value Measurement*, defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date.

ASC 820-10 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability, developed based on market data obtained from sources independent of the Company. Unobservable inputs reflect our own assumptions about the assumptions market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels, as follows:

Level 1 — Quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access.

Level 2 — Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Such inputs include quoted prices in markets that are not active, quoted prices for similar assets and liabilities in active and inactive markets, inputs other than quoted prices that are observable for the asset or liability and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 — Unobservable inputs for the asset or liability, where there is little, if any, observable market activity or data for the asset or liability.

In general, and where applicable, we use quoted prices in active markets for identical assets or liabilities to determine fair value. This pricing methodology applies to our Level 1 assets and liabilities. If quoted prices in active markets for identical assets and liabilities are not available to determine fair value, then we use quoted prices for similar assets and liabilities or inputs other than the quoted prices that are observable, either directly or indirectly. This pricing methodology would apply to Level 2 assets and liabilities.

The following table presents the Company's fair value hierarchy for assets and liabilities measured at fair value on a recurring basis (in thousands):

		Fair Value	
	Level in Fair	December 31,	
	Value Hierarchy	2022	2021
Assets:			
Other non-current assets:			
Equity securities ⁽¹⁾	1	\$ 723	\$ 17,166
Liabilities:			
Other long-term liabilities:			
Contingent consideration associated with acquisitions	3	13,400	2,500

⁽¹⁾ Represents our investments in autonomous technology companies. For additional information regarding the valuation of these equity securities, see Note 7 – Investments.

The following table presents changes in the fair value of contingent consideration for the years ended December 31, 2022 and 2021 (in thousands):

Balance as of December 31, 2020	\$ —
Contingent consideration associated with the acquisition of NEHDS ⁽¹⁾	2,500
Balance as of December 31, 2021	2,500
Contingent consideration associated with the acquisition of Baylor ⁽¹⁾	8,400
Contingent consideration associated with the acquisition of ReedTMS ⁽¹⁾	5,000
Change in fair value ⁽²⁾	(2,500)
Balance as of December 31, 2022	\$ 13,400

⁽¹⁾ The estimated fair value of our contingent consideration arrangements were based upon probability-adjusted inputs for each acquired entity. For additional information regarding our contingent consideration arrangements, see Note 2 – Business Acquisitions.

⁽²⁾ The contingent earnout period related to the NEHDS acquisition ended on December 31, 2022 and did not result in any additional cash payments, as the financial performance goals were not achieved. The change in the contingent earnout liability was recorded in other operating expense on the consolidated statements of income.

Our ownership interests in Mastery Logistics Systems, Inc. (“MLSI”) and Fleet Defender, Inc. do not have readily determinable fair values and are accounted for using the measurement alternative in ASC 321, *Investments - Equity Securities*. For additional information regarding the valuation of these investments, see Note 7 – Investments.

Fair Value of Financial Instruments Not Recorded at Fair Value

Cash and cash equivalents, accounts receivable trade, and accounts payable are short-term in nature and accordingly are carried at amounts that approximate fair value. These financial instruments are recorded at or near their respective transaction prices and historically have been settled or converted to cash at approximately that value (categorized as Level 2 of the fair value hierarchy).

The carrying amount of our fixed-rate debt not measured at fair value on a recurring basis was \$93.8 million and \$97.5 million as of December 31, 2022 and 2021, respectively. The estimated fair value of our fixed-rate debt using the income approach, based on its net present value, discounted at our current borrowing rate, was \$87.2 million as of December 31, 2022 (categorized as Level 2 of the fair value hierarchy) and approximated the carrying value as of December 31, 2021. The carrying amount of our variable-rate long-term debt approximates fair value due to the duration of our credit arrangement and the variable interest rate (categorized as Level 2 of the fair value hierarchy).

(7) INVESTMENTS

Equity Investments without Readily Determinable Fair Values

Our strategic equity investments without readily determinable fair values include MLSI, a transportation management systems company, and Fleet Defender, Inc., a platform cybersecurity company for fleet owners. MLSI is developing a cloud-based transportation management system using MLSI's SaaS technology which we have agreed to license. These investments are being accounted for under ASC 321 using the measurement alternative, and are recorded in other noncurrent assets on the consolidated balance sheets. We record changes in the values of these investments based on events that occur that would indicate the values have changed, in gain or loss on investments in equity securities on the consolidated statements of income. As of December 31, 2022 and 2021, the value of our investment in MLSI was \$86.8 million and \$38.2 million, respectively, and the value of our investment in Fleet Defender, Inc. was \$250 thousand as of December 31, 2022.

The following table summarizes the activity related to our equity investments without readily determinable fair values during the periods presented.

	Years Ended December 31,		
	2022	2021	2020
Investment in equity securities	\$ 20,250	\$ 5,000	\$ 5,000
Upward adjustments ⁽¹⁾	28,638	28,151	—

⁽¹⁾ During 2022 and 2021, investments by third-parties resulted in the remeasurements of our investment in MLSI. Our updated investment values were based upon the prices paid by third parties.

As of December 31, 2022, cumulative upward adjustments on our equity securities without readily determinable fair values totaled \$56.8 million.

Equity Investments with Readily Determinable Fair Values

We own strategic minority equity investments in autonomous technology companies, which are being accounted for under ASC 321 and are recorded in other noncurrent assets on the consolidated balance sheets. We record changes in the value of these investments, based on the share prices reported by Nasdaq, in gain or loss on investments in equity securities on the consolidated statements of income. As of December 31, 2022 and 2021, the value of these investments were \$0.7 million and \$17.2 million, respectively. We recognized a net unrealized loss of \$16.4 million and a net unrealized gain of \$12.1 million on these investments for the years ended December 31, 2022 and 2021, respectively. For additional information regarding the fair value of these equity investments, see Note 6 – Fair Value.

(8) DEBT AND CREDIT FACILITIES

On December 20, 2022, we entered into a \$1.075 billion unsecured credit facility with a group of lenders (the “2022 Credit Agreement”), replacing our previous unsecured credit facility with BMO Harris Bank N.A. (“BMO Harris”), dated May 14, 2019, as amended (the “BMO Line of Credit”), and the credit agreement with Wells Fargo Bank, National Association (“Wells Fargo”), dated March 25, 2022 (the “Wells Credit Agreement”). The BMO Line of Credit and Wells Credit Agreement are described below. The 2022 Credit Agreement is scheduled to mature on December 20, 2027 and has a \$100.0 million maximum limit for the aggregate amount of letters of credit issued. The proceeds of the 2022 Credit Agreement may be used for working capital and other general corporate purposes, including the financing of acquisitions and other investments permitted under the agreement.

Revolving credit loans drawn under the 2022 Credit Agreement bear interest, at our option, at (i) the Base Rate (the highest of (a) the Prime Rate, (b) the Federal Funds Rate plus 0.50%, or (c) the one-month Term SOFR plus 1.10%), plus a margin

ranging between 0.125% and 0.750%, or (ii) Term SOFR plus 0.10% and a margin ranging between 1.125% and 1.750%. Swingline loans drawn under the 2022 Credit Agreement bear interest at the Base Rate, as defined above, plus a margin ranging between 0.125% and 0.750%. The 2022 Credit Agreement also requires us to pay quarterly (i) a letter of credit commission on the daily amount available to be drawn under such standby letters of credit at rates ranging between 1.125% and 1.750% per annum and (ii) a nonrefundable commitment fee on the average daily unused amount of the commitment at rates ranging between 0.125% and 0.250% per annum. The margin, letter of credit commission, and commitment fee rates are based on our ratio of net funded debt to earnings before interest, income taxes, depreciation and amortization ("EBITDA"). There are no scheduled principal payments due on the 2022 Credit Agreement until the maturity date, and interest is payable in arrears at periodic intervals not to exceed three months.

On March 25, 2022, we entered into the Wells Credit Agreement and a second amendment to the BMO Line of Credit. The Wells Credit Agreement replaced our previous credit agreement with Wells Fargo dated May 14, 2019, as amended. The Wells Credit Agreement provided for a \$300.0 million unsecured revolving line of credit ("Wells Line of Credit"), with a \$75.0 million maximum limit for the aggregate amount of letters of credit issued, and was scheduled to expire on May 14, 2024. The Wells Credit Agreement also provided for an unsecured term loan commitment not to exceed a principal amount of \$100.0 million ("Wells Term Loan"). The Wells Term Loan was fully funded on March 25, 2022 and there were no principal payments required prior to its scheduled maturity on May 14, 2024. Amounts drawn under the Wells Line of Credit and the outstanding principal balance of the Wells Term Loan bore interest either, at our option, at a variable or fixed interest rate based on SOFR plus a SOFR rate adjustment and a margin rate based on our ratio of total funded debt to EBITDA, payable monthly. The second amendment to the BMO Line of Credit increased the borrowing capacity from \$200.0 million to \$300.0 million and changed the variable interest rate calculation by replacing the LIBOR with the SOFR. Amounts drawn under the BMO Line of Credit bore interest, for a selected interest period, at a variable rate based on the SOFR plus a SOFR rate adjustment and a margin rate based on our ratio of total funded debt to EBITDA, payable at the end of the applicable interest period. On December 20, 2022, we paid off and terminated the Wells Line of Credit and Wells Term Loan under the Wells Credit Agreement and the BMO Line of Credit using the proceeds from the 2022 Credit Agreement discussed above.

On June 30, 2021, we entered into a \$100.0 million unsecured fixed-rate term loan commitment with BMO Harris, with quarterly principal payments of \$1.25 million, which began on September 30, 2021, and a final payment of principal and interest due and payable on May 14, 2024 ("BMO Term Loan"). The outstanding principal balance of the BMO Term Loan bears interest at a fixed rate of 1.28%, payable quarterly in arrears.

As of December 31, 2022 and 2021, our outstanding debt totaled \$693.8 million and \$427.5 million, respectively. As of December 31, 2022, we had an outstanding revolving credit loan balance of \$600.0 million under the 2022 Credit Agreement, including (i) \$450.0 million at a variable interest rate of 5.67% and (ii) \$150.0 million which is effectively fixed at 2.78% with two interest rate swap agreements through May 14, 2024. In addition, as of December 31, 2022, we had \$93.8 million outstanding under the BMO Term Loan at a fixed interest rate of 1.28%. The \$1.075 billion of borrowing capacity under our 2022 Credit Agreement at December 31, 2022, is further reduced by \$58.8 million in stand-by letters of credit under which we are obligated. Availability of such funds under the current debt agreements is conditional upon various customary terms and covenants. Such covenants include, among other things, two financial covenants requiring us (i) not to exceed a maximum ratio of net funded debt to EBITDA and (ii) to exceed a minimum ratio of EBITDA to interest expense. As of December 31, 2022 we were in compliance with these covenants.

At December 31, 2022, the aggregate future maturities of long-term debt by year are as follows (in thousands):

2023	\$	6,250
2024		87,500
2025		—
2026		—
2027		600,000
Total	\$	<u>693,750</u>

(9) NOTES RECEIVABLE

We provide financing to some individuals who want to become independent contractors by purchasing a tractor from us and leasing their services to us. We maintain a primary security interest in the tractor until the independent contractor pays the note balance in full. Independent contractor notes receivable are included in other current assets and other non-current assets in the consolidated balance sheets. At December 31, notes receivable consisted of the following (in thousands):

	December 31,	
	2022	2021
Independent contractor notes receivable	\$ 8,287	\$ 7,358
Other notes receivable	7,921	10,665
Notes receivable	16,208	18,023
Less current portion	2,691	3,386
Notes receivable – non-current	<u>\$ 13,517</u>	<u>\$ 14,637</u>

We also provide financing to some individuals who attended our driver training schools. The student notes receivable are included in other receivables and other non-current assets in the consolidated balance sheets. At December 31, student notes receivable consisted of the following (in thousands):

	December 31,	
	2022	2021
Student notes receivable	\$ 63,351	\$ 62,791
Allowance for doubtful student notes receivable	(23,491)	(22,911)
Total student notes receivable, net of allowance	39,860	39,880
Less current portion, net of allowance	12,574	13,416
Student notes receivable – non-current	<u>\$ 27,286</u>	<u>\$ 26,464</u>

Subsequent Event - MLSI Subordinated Promissory Note

On January 24, 2023, we purchased a \$25.0 million subordinated promissory note from MLSI with a maturity date of January 24, 2030. The proceeds of the promissory note may be used by MLSI for working capital and general business purposes, including a limited amount for possible repayment of certain advances. There are no scheduled principal payments due on the promissory note until the maturity date, and interest accrues at 7.5% compounded annually, with the first accrued interest payment due on January 24, 2028, and at the end of each calendar year thereafter.

(10) INCOME TAXES

Income tax expense consisted of the following (in thousands):

	Years Ended December 31,		
	2022	2021	2020
Current:			
Federal	\$ 23,741	\$ 42,049	\$ 53,297
State	12,423	12,787	12,106
Foreign	489	213	446
	<u>36,653</u>	<u>55,049</u>	<u>65,849</u>
Deferred:			
Federal	38,521	27,593	(8,988)
State	4,032	1,895	(1,245)
	<u>42,553</u>	<u>29,488</u>	<u>(10,233)</u>
Total income tax expense	<u>\$ 79,206</u>	<u>\$ 84,537</u>	<u>\$ 55,616</u>

The effective income tax rate differs from the federal corporate tax rate of 21% in 2022, 2021, and 2020 as follows (in thousands):

	Years Ended December 31,		
	2022	2021	2020
Tax at statutory rate	\$ 68,205	\$ 72,663	\$ 47,186
State income taxes, net of federal tax benefits	12,999	11,599	8,580
Other, net	(1,998)	275	(150)
Total income tax expense	<u>\$ 79,206</u>	<u>\$ 84,537</u>	<u>\$ 55,616</u>

At December 31, deferred income tax assets and liabilities consisted of the following (in thousands):

	December 31,	
	2022	2021
Deferred income tax assets:		
Insurance and claims accruals	\$ 59,275	\$ 55,233
Compensation-related accruals	10,767	12,203
Allowance for uncollectible accounts	3,218	3,958
Operating lease liabilities	10,324	7,033
Other	981	1,644
Gross deferred income tax assets	<u>84,565</u>	<u>80,071</u>
Deferred income tax liabilities:		
Property and equipment	344,896	305,002
Investments in equity securities	12,818	10,985
Prepaid expenses	7,526	7,269
Operating lease right-of-use assets	10,056	6,955
Investment in partnership	19,745	17,076
Other	2,802	1,283
Gross deferred income tax liabilities	<u>397,843</u>	<u>348,570</u>
Net deferred income tax liability	<u>\$ 313,278</u>	<u>\$ 268,499</u>

Deferred income tax assets are more likely than not to be realized as a result of the reversal of deferred income tax liabilities.

We recognized a \$54 thousand and \$49 thousand increase in the net liability for unrecognized tax benefits for the year ended December 31, 2022, and 2021, respectively. We recognized net interest expense of \$42 thousand, \$10 thousand, and \$3 thousand during 2022, 2021, and 2020, respectively. If recognized, \$2.0 million and \$1.9 million of unrecognized tax benefits as of December 31, 2022 and 2021, respectively, would impact our effective tax rate. Interest of \$0.5 million and \$0.4 million as of December 31, 2022 and 2021, respectively, has been reflected as a component of the total liability. We expect no other significant increases or decreases for uncertain tax positions during the next 12 months. The reconciliations of beginning and ending gross balances of unrecognized tax benefits for 2022 and 2021 are shown below (in thousands).

	December 31,	
	2022	2021
Unrecognized tax benefits, beginning balance	\$ 2,425	\$ 2,363
Gross increases – tax positions in prior period	99	65
Gross increases – current period tax positions	320	320
Settlements	(349)	(323)
Unrecognized tax benefits, ending balance	<u>\$ 2,495</u>	<u>\$ 2,425</u>

We file U.S. federal income tax returns, as well as income tax returns in various states and several foreign jurisdictions. The years 2019 and forward are open for examination by the U.S. Internal Revenue Service (“IRS”), and various years are open for examination by state and foreign tax authorities. State and foreign jurisdictional statutes of limitations generally range from three to four years.

(11) EQUITY COMPENSATION AND EMPLOYEE BENEFIT PLANS

Equity Compensation Plan

The Werner Enterprises, Inc. Amended and Restated Equity Plan (the “Equity Plan”), approved by the Company’s shareholders in 2013, provides for grants to employees and non-employee directors of the Company in the form of nonqualified stock options, restricted stock and units (“restricted awards”), performance awards, and stock appreciation rights. The Board of Directors or the Compensation Committee of our Board of Directors determines the terms of each award, including the type, recipients, number of shares subject to and vesting conditions of each award. No awards of stock appreciation rights have been issued under the Equity Plan to date. The maximum number of shares of common stock that may be awarded under the Equity Plan is 20,000,000 shares. The maximum aggregate number of shares that may be awarded to any one person in any one calendar year under the Equity Plan is 500,000. As of December 31, 2022, there were 6,273,659 shares available for granting additional awards.

Equity compensation expense is included in salaries, wages and benefits within the consolidated statements of income. As of December 31, 2022, the total unrecognized compensation cost related to non-vested equity compensation awards was approximately \$14.9 million and is expected to be recognized over a weighted average period of 2.4 years. The following table summarizes the equity compensation expense and related income tax benefit recognized in the consolidated statements of income (in thousands):

	Years Ended December 31,		
	2022	2021	2020
Restricted awards:			
Pre-tax compensation expense	\$ 7,803	\$ 6,349	\$ 5,409
Tax benefit	1,954	1,587	1,379
Restricted stock expense, net of tax	<u>\$ 5,849</u>	<u>\$ 4,762</u>	<u>\$ 4,030</u>
Performance awards:			
Pre-tax compensation expense	\$ 4,690	\$ 4,452	\$ 3,503
Tax benefit	1,174	1,113	893
Performance award expense, net of tax	<u>\$ 3,516</u>	<u>\$ 3,339</u>	<u>\$ 2,610</u>

We do not have a formal policy for issuing shares upon vesting of restricted and performance awards. Such shares are generally issued from treasury stock. From time to time, we repurchase shares of our common stock, the timing and amount of which depends on market and other factors. Historically, the shares acquired from such repurchases have provided us with sufficient quantities of stock to issue for equity compensation. Based on current treasury stock levels, we do not expect to repurchase additional shares specifically for equity compensation during 2023.

Stock Options

Stock options are granted at prices equal to the market value of the common stock on the date the option award is granted. No stock option awards were outstanding as of December 31, 2022 or 2021, and there were no stock option awards granted or exercised during the years ended December 31, 2022, 2021, or 2020.

Restricted Awards

Restricted stock entitles the holder to shares of common stock when the award vests. Restricted stock units entitle the holder to a combination of cash or stock equal to the value of common stock when the unit vests. The value of these shares may fluctuate according to market conditions and other factors. Restricted awards currently outstanding vest over periods ranging from 12 to 60 months from the grant date of the award. The restricted awards do not confer any voting or dividend rights to recipients until such shares vest and do not have any post-vesting sales restrictions. The following table summarizes restricted award activity for the year ended December 31, 2022:

	Number of Restricted Awards (in thousands)	Weighted- Average Grant Date Fair Value (\$)
Nonvested at beginning of period	356	\$ 39.27
Granted	313	42.27
Vested	(169)	38.46
Forfeited	(8)	41.86
Nonvested at end of period	492	41.42

We estimate the fair value of restricted awards based upon the market price of the underlying common stock on the date of grant, reduced by the present value of estimated future dividends because the awards are not entitled to receive dividends prior to vesting. Our estimate of future dividends is based on the most recent quarterly dividend rate at the time of grant, adjusted for any known future changes in the dividend rate. Cash settled restricted stock units are recorded as a liability within the consolidated balance sheets and are adjusted to fair value each reporting period.

The weighted-average grant date fair value of restricted awards granted during the years ended December 31, 2022, 2021, and 2020 was \$42.27, \$42.69, and \$38.73, respectively. The total fair value of previously granted restricted awards vested during the years ended December 31, 2022, 2021, and 2020 was \$7.3 million, \$6.8 million, and \$5.4 million, respectively. We withheld shares based on the closing stock price on the vesting date to settle the employees' statutory obligation for the applicable income and other employment taxes. The shares withheld to satisfy the tax withholding obligations were recorded as treasury stock.

Performance Awards

Performance awards entitle the recipient to shares of common stock upon attainment of performance objectives as pre-established by the Compensation Committee. If the performance objectives are achieved, performance awards currently outstanding vest, subject to continued employment, 36 months after the grant date of the award. The performance awards do not confer any voting or dividend rights to recipients until such shares vest and do not have any post-vesting sales restrictions. The following table summarizes performance award activity for the year ended December 31, 2022:

	Number of Performance Awards (in thousands)	Weighted- Average Grant Date Fair Value (\$)
Nonvested at beginning of period	229	\$ 34.77
Granted	128	39.28
Vested	(68)	32.88
Forfeited	—	—
Nonvested at end of period	289	37.21

The 2022 performance awards are earned based upon the level of attainment by the Company of specified performance objectives related to cumulative diluted earnings per share for the two-year period from January 1, 2022 to December 31, 2023. Shares earned based on cumulative diluted earnings per share may be capped based on the Company's total shareholder return during the three-year period ended December 31, 2024, relative to the total shareholder return of a peer group of companies for the same period. The 2021 performance awards are earned based upon the level of attainment by the Company of specified performance objectives related to cumulative diluted earnings per share for the two-year period from January 1, 2021 to December 31, 2022. Shares earned based on cumulative diluted earnings per share may be capped based on the Company's total shareholder return during the three-year period ended December 31, 2023, relative to the total shareholder return of a peer group of companies for the same period. The 2022 and 2021 performance awards will vest in one installment on the third anniversary from the respective grant dates. In January 2023, the Compensation Committee determined the 2020 fiscal year

performance objectives were achieved at a level above the target level, and the additional shares earned above the target are included in the granted shares in the activity table above.

We estimate the fair value of performance awards based upon the market price of the underlying common stock on the date of grant, reduced by the present value of estimated future dividends because the awards are not entitled to receive dividends prior to vesting. Our estimate of future dividends is based on the most recent quarterly dividend rate at the time of grant, adjusted for any known future changes in the dividend rate.

The weighted-average grant date fair value of performance awards granted during the years ended December 31, 2022, 2021, and 2020 was \$39.28, \$38.48, and \$32.96, respectively. The vesting date fair value of performance awards that vested during the years ended December 31, 2022, 2021, or 2020 was \$3.0 million, \$4.1 million and \$5.8 million, respectively. We withheld shares based on the closing stock price on the vesting date to settle the employees' statutory obligation for the applicable income and other employment taxes. The shares withheld to satisfy the tax withholding obligations were recorded as treasury stock.

Employee Stock Purchase Plan

Employee associates that meet certain eligibility requirements may participate in our Employee Stock Purchase Plan (the "Purchase Plan"). Eligible participants designate the amount of regular payroll deductions and/or a single annual payment (each subject to a yearly maximum amount) that is used to purchase shares of our common stock on the over-the-counter market. The maximum annual contribution amount is currently \$20,000. These purchases are subject to the terms of the Purchase Plan. We contribute an amount equal to 15% of each participant's contributions under the Purchase Plan. Interest accrues on Purchase Plan contributions at a rate of 5.25% until the purchase is made. We pay the trading commissions and administrative charges related to purchases of common stock under the Purchase Plan. Our contributions for the Purchase Plan were as follows (in thousands):

2022	\$ 309
2021	297
2020	283

401(k) Retirement Savings Plan

We have an Employees' 401(k) Retirement Savings Plan (the "401(k) Plan"). Associates are eligible to participate in the 401(k) Plan if they have been continuously employed with us or one of our subsidiaries for six months or more. We match a portion of each associate's 401(k) Plan elective deferrals. Salaries, wages and benefits expense in the accompanying consolidated statements of income includes our 401(k) Plan contributions and administrative expenses, which were as follows (in thousands):

2022	\$ 5,921
2021	4,904
2020	4,748

Nonqualified Deferred Compensation Plan

The Executive Nonqualified Excess Plan (the "Excess Plan") is our nonqualified deferred compensation plan for the benefit of eligible key managerial associates whose 401(k) Plan contributions are limited because of IRS regulations affecting highly compensated associates. Under the terms of the Excess Plan, participants may elect to defer compensation on a pre-tax basis within annual dollar limits we establish. At December 31, 2022, there were 44 participants in the Excess Plan. Although our current intention is not to do so, we may also make matching credits and/or profit sharing credits to participants' accounts as we so determine each year. Each participant is fully vested in all deferred compensation and earnings; however, these amounts are subject to general creditor claims until distributed to the participant. Under current federal tax law, we are not allowed a current income tax deduction for the compensation deferred by participants, but we are allowed a tax deduction when a distribution payment is made to a participant from the Excess Plan. The accumulated benefit obligation is included in other long-term liabilities in the consolidated balance sheets. We purchased life insurance policies to fund the future liability. The aggregate market value of the life insurance policies is included in other non-current assets in the consolidated balance sheets.

The accumulated benefit obligation and aggregate market value of the life insurance policies were as follows (in thousands):

	December 31,	
	2022	2021
Accumulated benefit obligation	\$ 10,883	\$ 12,755
Aggregate market value	8,509	10,621

(12) COMMITMENTS AND CONTINGENCIES

We have committed to property and equipment purchases of approximately \$278.6 million at December 31, 2022.

We are involved in certain claims and pending litigation, including those described herein, arising in the ordinary course of business. The majority of these claims relate to bodily injury, property damage, cargo and workers' compensation incurred in the transportation of freight, as well as certain class action litigation related to personnel and employment matters. We accrue for the uninsured portion of contingent losses from these and other pending claims when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Based on the knowledge of the facts, management believes the resolution of claims and pending litigation, taking into account existing reserves, will not have a material adverse effect on our consolidated financial statements. Moreover, the results of complex legal proceedings are difficult to predict, and our view of these matters may change in the future as the litigation and related events unfold.

On May 17, 2018, in Harris County District Court in Houston, Texas, a jury rendered an adverse verdict against the Company in a lawsuit arising from a December 30, 2014 accident between a Werner tractor-trailer and a passenger vehicle. On July 30, 2018, the court entered a final judgment against Werner for \$92.0 million, including pre-judgment interest.

The Company has premium-based liability insurance to cover the potential outcome from this jury verdict. Under the Company's insurance policies in effect on the date of this accident, the Company's maximum liability for this accident is \$10.0 million (plus pre-judgment and post-judgment interest) with premium-based coverage that exceeds the jury verdict amount. As a result of this jury verdict, the Company had recorded a liability of \$34.1 million and \$28.8 million as of December 31, 2022 and 2021, respectively. Under the terms of the Company's insurance policies, the Company is the primary obligor of the verdict, and as such, the Company has also recorded a \$79.2 million receivable from its third-party insurance providers in other non-current assets and a corresponding liability of the same amount in the long-term portion of insurance and claims accruals in the consolidated balance sheets as of December 31, 2022 and 2021.

The Company is pursuing an appeal of this verdict. No assurances can be given regarding the outcome of any such appeal.

We have been involved in class action litigation in the U.S. District Court for the District of Nebraska, in which the plaintiffs allege that we owe drivers for unpaid wages under the Fair Labor Standards Act ("FLSA") and the Nebraska Wage Payment and Collection Act and that we failed to pay minimum wage per hour for drivers in our Career Track Program, related to short break time and sleeper berth time. The period covered by this class action suit is August 2008 through March 2014. The case was tried to a jury in May 2017, resulting in a verdict of \$0.8 million in plaintiffs' favor on the short break matter and a verdict in our favor on the sleeper berth matter. As a result of various post-trial motions, the court awarded \$0.5 million to the plaintiffs for attorney fees and costs. Plaintiffs appealed the post-verdict amounts awarded by the trial court for fees, costs and liquidated damages, and the Company filed a cross appeal on the verdict that was in plaintiffs' favor. The United States Court of Appeals for the Eighth Circuit denied Plaintiffs' appeal and granted Werner's appeal, vacating the judgment in favor of the plaintiffs. The appellate court sent the case back to the trial court for proceedings consistent with the appellate court's opinion. On June 22, 2020, the trial court denied Plaintiffs' request for a new trial and entered judgment in favor of the Company, dismissing the case with prejudice. On July 21, 2020, Plaintiffs' counsel filed a notice of appeal of that dismissal. On August 3, 2022, the Eighth Circuit Court of Appeals vacated the district court's judgment and remanded the case, for the trial court to determine whether the plaintiffs should be granted a new trial on the short break claim. On January 10, 2023, the trial court denied Plaintiff's motion for a new trial and entered judgment in Werner's favor on all claims. As of December 31, 2022, we have an accrual for the jury's award, attorney fees and costs in the short break matter and had not accrued for the sleeper berth matter.

We are also involved in certain class action litigation in which the plaintiffs allege claims for failure to provide meal and rest breaks, unpaid wages, unauthorized deductions and other items. Based on the knowledge of the facts, management does not currently believe the outcome of these class actions is likely to have a material adverse effect on our financial position or results of operations. However, the final disposition of these matters and the impact of such final dispositions cannot be determined at this time.

(13) SEGMENT INFORMATION

We have two reportable segments – Truckload Transportation Services and Werner Logistics.

The TTS segment consists of two operating units, Dedicated and One-Way Truckload. These units are aggregated because they have similar economic characteristics and meet the other aggregation criteria described in the accounting guidance for segment reporting. Dedicated provides truckload services dedicated to a specific customer, generally for a retail distribution center or manufacturing facility, utilizing either dry van or specialized trailers. One-Way Truckload is comprised of the following operating fleets: (i) the medium-to-long-haul van (“Van”) fleet transports a variety of consumer nondurable products and other commodities in truckload quantities over irregular routes using dry van trailers, including Mexico cross-border routes; (ii) the expedited (“Expedited”) fleet provides time-sensitive truckload services utilizing driver teams; (iii) the regional short-haul (“Regional”) fleet provides comparable truckload van service within geographic regions across the United States; and (iv) the Temperature Controlled fleet provides truckload services for temperature sensitive products over irregular routes utilizing temperature-controlled trailers. Revenues for the TTS segment include a small amount of non-trucking revenues which consist primarily of the intra-Mexico portion of cross-border shipments delivered to or from Mexico where we utilize a third-party capacity provider.

The Werner Logistics segment is a non-asset based transportation and logistics provider. Werner Logistics provides services throughout North America and generates the majority of our non-trucking revenues through three operating units. These three Werner Logistics operating units are as follows: (i) Truckload Logistics, which uses contracted carriers to complete shipments for brokerage customers and freight management customers for which we offer a full range of single-source logistics management services and solutions; (ii) the intermodal (“Intermodal”) unit offers rail transportation through alliances with rail and drayage providers as an alternative to truck transportation; and (iii) Werner Final Mile (“Final Mile”) offers residential and commercial deliveries of large or heavy items using third-party agents, independent contractors, and Company employees with two-person delivery teams operating a liftgate straight truck. In first quarter 2021, we completed the sale of the Werner Global Logistics (“WGL”) freight forwarding services for international ocean and air shipments to Scan Global Logistics Group, and we realized a \$1.0 million gain when the transaction closed on February 26, 2021. Prior to the sale of WGL, Werner Logistics provided international services throughout Asia, with additional coverage throughout Australia, Europe, South America, and Africa.

We generate other revenues from our driver training schools, transportation-related activities such as third-party equipment maintenance and equipment leasing, and other business activities. None of these operations meets the quantitative reporting thresholds. As a result, these operations are grouped in “Other” in the tables below. “Corporate” includes revenues and expenses that are incidental to our activities and are not attributable to any of our operating segments, including gains and losses on sales of property and equipment not attributable to our operating segments.

We do not prepare separate balance sheets by segment and, as a result, assets are not separately identifiable by segment. Based on our operations, certain revenue-generating assets (primarily tractors and trailers) are interchangeable between segments. Depreciation for these interchangeable assets is allocated to segments based on the actual number of units utilized by the segment during the period. Other depreciation and amortization is allocated to segments based on specific identification or as a percentage of a metric such as average number of tractors. Inter-segment eliminations represent transactions between reporting segments that are eliminated in consolidation.

The following tables summarize our segment information (in thousands):

	Years Ended December 31,		
	2022	2021	2020
<u>Revenues by Segment</u>			
Truckload Transportation Services	\$ 2,428,686	\$ 2,045,073	\$ 1,843,209

Information about the geographic areas in which we conduct business is summarized below (in thousands) as of and for the years ended December 31, 2022, 2021, and 2020. Operating revenues for foreign countries include revenues for (i) shipments with an origin or destination in that country and (ii) other services provided in that country. If both the origin and destination are in a foreign country, the revenues are attributed to the country of origin.

	2022	2021	2020

Total	<u>\$ 1,825,276</u>	<u>\$ 1,613,243</u>	<u>\$ 1,543,258</u>

We generate substantially all of our revenues within the United States or from North American shipments with origins or destinations in the United States. Our largest customer, Dollar General, accounted for 14% of our total revenues in 2022 and 2021, and 12% in 2020. Revenues generated by Dollar General are reported in both of our reportable operating segments.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

No disclosure under this item was required within the two most recent fiscal years ended December 31, 2022, or any subsequent period, involving a change of accountants or disagreements on accounting and financial disclosure.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Exchange Act Rule 15d-15(e). Our disclosure controls and procedures are designed to provide reasonable assurance of achieving the desired control objectives. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective at a reasonable assurance level in enabling us to record, process, summarize and report information required to be included in our periodic filings with the Securities and Exchange Commission within the required time period and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We have confidence in our internal controls and procedures. Nevertheless, our management, including the Chief Executive Officer and Chief Financial Officer, does not expect that the internal controls or disclosure procedures and controls will prevent all errors or intentional fraud. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are met. Further, the design of an internal control system must reflect that resource constraints exist, and the benefits of controls must be evaluated relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all control issues, misstatements and instances of fraud, if any, have been prevented or detected.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over our financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance to our management and Board of Directors regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Internal control over financial reporting includes (i) maintaining records that in reasonable detail accurately and fairly reflect our transactions; (ii) providing reasonable assurance that transactions are recorded as necessary for preparation of our financial statements; (iii) providing reasonable assurance that receipts and expenditures of company assets are made in accordance with management authorization; and (iv) providing reasonable assurance that unauthorized acquisition, use or disposition of company assets that could have a material effect on our financial statements would be prevented or detected on a timely basis.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because (i) changes in conditions may occur or (ii) the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2022. This assessment is based on the criteria for effective internal control described in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, management concluded that our internal control over financial reporting was effective as of December 31, 2022. Securities and Exchange Commission guidance permits companies to exclude acquisitions from their assessment of internal control over financial reporting for the fiscal year in which the acquisition occurred. Management's assessment of internal control over financial reporting as of December 31, 2022 excludes internal control over financial reporting related to Baylor (acquired October 1, 2022), which accounted for approximately \$105.6 million of consolidated total assets and \$21.6 million of consolidated operating revenues as of and for the year ended December 31, 2022 and ReedTMS (acquired November 5, 2022), which accounted for approximately \$160.5 million of consolidated total assets and \$51.8 million of consolidated operating revenues as of and for the year ended December 31, 2022.

Management has engaged KPMG LLP ("KPMG"), the independent registered public accounting firm that audited the consolidated financial statements included in this Form 10-K, to attest to and report on the effectiveness of our internal control over financial reporting. KPMG's report is included herein.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Werner Enterprises, Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited Werner Enterprises, Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2022 and 2021, the related consolidated statements of income, comprehensive income, stockholders' equity and temporary equity - redeemable noncontrolling interest, and cash flows for each of the years in the three-year period ended December 31, 2022, and the related notes and financial statement schedule II valuation and qualifying accounts (collectively, the consolidated financial statements), and our report dated February 27, 2023 expressed an unqualified opinion on those consolidated financial statements.

The Company acquired Baylor Trucking, Inc., Reed Transport Services, Inc. and RTS-TMS, Inc. during 2022, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2022, Baylor Trucking, Inc., Reed Transport Services, Inc. and RTS-TMS, Inc.'s internal control over financial reporting associated with total assets of \$266 million and total revenues of \$73 million included in the consolidated financial statements of the Company as of and for the year ended December 31, 2022. Our audit of internal control over financial reporting of the Company also excluded an evaluation of the internal control over financial reporting of Baylor Trucking, Inc., Reed Transport Services, Inc. and RTS-TMS, Inc.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ KPMG LLP

Omaha, Nebraska
February 27, 2023

Changes in Internal Control over Financial Reporting

Management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, concluded that no changes in our internal control over financial reporting occurred during the quarter ended December 31, 2022 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. *OTHER INFORMATION*

During fourth quarter 2022, no information was required to be disclosed in a report on Form 8-K, but not reported.

ITEM 9C. *DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS*

Not applicable

PART III

Certain information required by Part III is omitted from this Form 10-K because we will file a definitive proxy statement pursuant to Regulation 14A (the “Proxy Statement”) not later than 120 days after the end of the fiscal year covered by this Form 10-K, and certain information included therein is incorporated herein by reference. Only those sections of the Proxy Statement which specifically address the items set forth herein are incorporated by reference.

ITEM 10. *DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE*

The information required by this Item, with the exception of the Code of Corporate Conduct discussed below, is incorporated herein by reference to our Proxy Statement.

Code of Corporate Conduct

We adopted our Code of Corporate Conduct, which is our code of ethics, that applies to our principal executive officer, principal financial officer, principal accounting officer and all other officers, employee associates, and directors. The Code of Corporate Conduct is available on our website, www.werner.com in the “Investors” section. We will post on our website any amendment to, or waiver from, any provision of our Code of Corporate Conduct that applies to our Chief Executive Officer, Chief Financial Officer or Chief Accounting Officer (if any) within four business days of any such event.

ITEM 11. *EXECUTIVE COMPENSATION*

The information required by this Item is incorporated herein by reference to our Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this Item, with the exception of the equity compensation plan information presented below, is incorporated herein by reference to our Proxy Statement.

Equity Compensation Plan Information

The following table summarizes, as of December 31, 2022, information about compensation plans under which our equity securities are authorized for issuance:

Plan Category	Number of Securities to be Issued upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
	(a)	(b)	(c)
Equity compensation plans approved by stockholders	781,978 ⁽¹⁾	\$0.00 ⁽²⁾	6,273,659

⁽¹⁾ Includes 781,563 shares to be issued upon vesting of outstanding restricted stock awards.

⁽²⁾ As of December 31, 2022, we do not have any outstanding stock options.

We do not have any equity compensation plans that were not approved by stockholders.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is incorporated herein by reference to our Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Our independent registered public accounting firm is KPMG LLP, Omaha, NE, Auditor Firm ID:185.

The information required by this Item is incorporated herein by reference to our Proxy Statement.

**CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO RULES 13a-14(a) AND 15d-14(a) OF THE SECURITIES EXCHANGE ACT OF 1934
(SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002)**

I, Derek J. Leathers, certify that:

1. I have reviewed this annual report on Form 10-K of Werner Enterprises, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO 18 U.S.C. SECTION 1350
(SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002)**

In connection with the Annual Report of Werner Enterprises, Inc. (the “Company”) on Form 10-K for the period ending December 31, 2022 (the “Report”), filed with the Securities and Exchange Commission, I, Derek J. Leathers, Chairman, President and Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to the best of my knowledge:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
