Quarterly Review – September 30, 2006

## FMI Provident Trust Strategy Fund

### Investment Objective

Seeks a combination of long-term growth of capital and income to achieve a high total return.

**Manager** - On September 9, 2002, the shareholders of the FMI Provident Trust Strategy Fund (the "Fund") approved a new sub-advisory agreement with Provident Trust Company in Pewaukee, Wisconsin. Provident was founded in 1999 and is controlled by the principals of the firm.

**Investment Professionals** - J. Scott Harkness, CFA, President, is responsible for day-to-day management of the Fund.

**Strategy** - Provident Trust Company is a concentrated core growth equity manager seeking to exceed the S&P 500<sup>1</sup> domestic stock market index return over full investment cycles. (A typical investment cycle lasts 5-7 years and includes both a 30% advance and a 20% decline.) FMI Provident Trust Strategy Fund can flexibly allocate assets between stocks, bonds and money market to moderate volatility and selects common stocks of all market capitalizations based on relative forward return potential. Stock selection criteria include improving revenue and earnings growth, increasing margins, significant management stock ownership, and upward valuation potential. The Fund is a non-diversified investment company; please see the prospectus for further details.

### Fund Information

Inception Date ..... 12/30/1986  
Net Assets ..... \$35.5 million  
Net Asset Value ..... \$7.46  
Expense Ratio ..... 1.00%  
Ticker ..... FMIRX

### Top Ten Sectors

Performance	Q3 2006	One Year	Three Years	Five Years	Ten Years	Since Inception
Fund .....	1.08%	7.77%	15.20%	7.37%	8.95%	10.89%
S&P 500 <sup>1</sup> .....	5.67%	10.79%	12.30%	6.97%	8.58%	11.59%

Note: Returns for periods longer than one year are annualized. Inception of the Fund was 12/30/86. Returns may not match those reported by other sources such as Morningstar due to slight valuation differences at the end of the reporting period.

**Manager Commentary** - Like all major trends, the compression of the stock market's relative valuation to bonds is lasting longer and going further than we anticipated. We are confident the current 16x relative valuation of stocks vs. 22x for bonds is near the extreme. The good news is the inevitable shift to equilibrium (long-term, the valuations of the stock and bond markets are about the same) will result in a terrific stock market. Our calendar 2007 S&P 500 target is 1400-1600, based on earnings of \$85 multiplied by a 16-18x valuation.

*The returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance since the above time period may be higher or lower than the performance quoted. Performance data current to the most recent month end may be obtained by visiting [www.fmifunds.com](http://www.fmifunds.com).*

Please read the prospectus carefully to consider the investment objectives, risks, charges and expenses before investing or sending money. The prospectus contains this and more information. Please read the prospectus carefully before investing.

<sup>1</sup> The Standard & Poor's 500 Index consists of 500 selected common stocks, most of which are listed on the New York Stock Exchange. The Standard & Poor's Ratings Group designates the stocks to be included in the Index on a statistical basis. A particular stock's weighting in the Index is based on its relative total market value (i.e., its market price per share times the number of shares outstanding). Stocks may be added or deleted from the Index from time to time.
