TGC INDUSTRIES, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
June 30, 2003

NOTE A -- BASIS OF PRESENTATION

The accompanying unaudited financial statements have been prepared in accordance with the instructions to Form 10-QSB and therefore do not include all information and footnotes necessary for a fair presentation of financial position, results of operations and changes in financial position in conformity with accounting principles generally accepted in the United States of America.

NOTE B -- MANAGEMENT PRESENTATION

In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of financial position, results of operations, and changes in financial position have been included. The results of the interim periods are not necessarily indicative of results to be expected for the entire year. For further information, refer to the financial statements and the footnotes thereto included in the Company's Annual Report for the year ended December 31, 2002 filed on Form 10-KSB.

NOTE C -- EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per common share are based upon the weighted average number of shares of common stock outstanding. Diluted earnings (loss) per share are based upon the weighted average number of common shares outstanding and, when dilutive, common shares issuable for stock options, warrants and convertible securities. The effect of preferred stock dividends on the amount of income (loss) available to common stockholders was \$.01 and \$(.01) for the three months ended June 30, 2003 and 2002, respectively, and \$.03 and \$(.03) for the six months ended June 30, 2003 and 2002 respectively.

Outstanding warrants that were not included in the diluted calculation because their effect would be anti-dilutive totaled 2,350,000 for the three and six month periods ended June 30, 2003, and 850,000 for the three and six month periods ended June 30, 2002. Outstanding options that were not included in the diluted calculation because their effect would be anti-dilutive totaled 232,100 for each of the three and six month periods ended June 30, 2003 and 2002.

TGC INDUSTRIES, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
June 30, 2003
(Continued)

NOTE D - DIVIDENDS

Holders of the Company's Series C 8% Convertible Exchangeable Preferred Stock ("Series C Preferred Stock") will receive, when, as and if declared by the Board of Directors of the Company, dividends at a rate of 8% per annum. The dividends are payable semi-annually during January and July of each year. At June 30, 2003, cumulative dividends of \$104,580 were in arrears on the Company's Series C Preferred Stock.

Holders of the Company's 8-1/2% Senior Convertible Preferred Stock (the "Senior Preferred Stock") will receive, when, as and if declared by the Board of Directors of the Company, dividends at a rate of 8-1/2% per annum. The dividends are payable semi-annually during June and December of each year. Dividends paid during 2000, on the Senior Preferred Stock, were paid in additional shares of Senior Preferred Stock, in accordance with the terms of the Statement of Resolution Establishing the Senior Preferred Stock. In addition, the holders elected to receive payment of the 2001, 2002 and June 1, 2003 dividends in additional shares of Senior Preferred Stock. At June 30, 2003, there were no dividends in arrears on the Company's Senior Preferred Stock.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS.

RESULTS OF OPERATIONS

The Company's crew returned to work in late January 2003 after being idle since early November 2002. The Company was able to maintain a sufficient level of backlog to keep one of its two crews employed the entire second quarter of 2003. As a result, TGC reported a profit for both the three and six month periods ended June 30, 2003. TGC reported net income, before dividend requirements on preferred stock, of \$218,515 on revenue of \$2,835,401, for the three month period ended June 30, 2003 compared with a net loss, before dividend requirements on preferred stock, of \$264,151 on revenue of \$1,654,409 for the same period of 2002. Income per common share, on a basic and diluted basis, was \$.03 for the three month period ended June 30, 2003, compared with a loss per common share of \$.06 for the same period of 2002.

For the six month period ended June 30, 2003, TGC reported net income, before dividend requirements on preferred stock, of \$175,036 on revenue of \$4,437,206, compared with a net loss, before dividend requirements on preferred stock, of \$182,439 on revenue of \$4,572,269 for the same period of 2002. Income per common share, on a basic and diluted basis, was \$.00 for the six month period ended June 30, 2003, compared with a loss per common share of \$.06 for the same period of 2002.

The number of common shares used in the income (loss) per share computation for the three and six month periods ended June 30, 2003 and 2002, do not include any common shares issuable for stock options, warrants or convertible securities because the effect of their inclusion would be anti-dilutive.

Oil and gas exploration companies have recently increased the level of activity in their domestic oil and gas exploration programs. Though there can be no assurance, should this increased level of activity in the industry continue, management believes TGC may secure enough contracts to enable the Company to improve its performance during the second half of 2003 compared with the second half of 2002.

Non-cash charges for depreciation and amortization were \$732,271 in the first six months of 2003 compared with \$772,038 for the same period of 2002.

At December 31, 2002, TGC had net operating loss carryforwards of approximately \$9,000,000 available to offset future taxable income, which expire at various dates through 2022.

FINANCIAL CONDITION

Cash of \$241,526 was provided by operations during the first six months of 2003 compared with cash provided by operations of \$24,006 for the same period of 2002. This increase was primarily the result of an increasing level of activity in the first six months of 2003 compared with a declining level of activity in the same period of 2002. During the first six months of 2003, \$74,264 was spent for capital expenditures to replace certain vehicles and equipment. In addition, \$9,349 was received as proceeds from the sale of property and equipment. As a result, net cash of \$64,915 was used in investing activities during the first six months of 2003. Principal payments of notes payable of \$132,201 along with principal payments of capital lease obligations of \$90,669 resulted in net cash of \$222,870 being used in financing activities during the first six months of 2003. TGC anticipates that available funds, together with anticipated cash flows generated from future operations will be sufficient to meet TGC's minimum lease and note payment obligations.

In September 2002, TGC issued 1,500,000 detachable stock warrants to an investor group that included certain directors in exchange for a line of credit, that expired December 31, 2002, in an amount up to \$300,000. The warrants cover 1,500,000 shares of Common Stock, expire on September 10, 2012, and are exercisable at \$.20 per whole share (provided, however that the exercise price at the time of a given exercise of the warrants shall not be less than the then per share par value of the Common Stock). Since the shareholders approved a reduction in the par value of the Common Stock from \$.30 to \$.01 at the Annual Meeting in June 2003, no adjustment to the exercise price of the warrants will be required. During September 2002, TGC borrowed \$150,000 of the available funds. The promissory notes, which bore interest at 6.75% per annum, were paid in full during December 2002 and January 2003.

In March 2003 the same investor group that provided the above described line of credit in 2002, committed to provide a line of credit up to \$300,000 through December 31, 2003, on the same terms as the 2002 line of credit, provided that warrants covering only 750,000 shares of Common Stock will be issued in consideration for the commitment to provide the line of credit and warrants covering the remaining 750,000 shares of Common Stock will only be issued in proportion to the amount of the \$300,000 commitment which the Company determines to draw on (e.g. if the Company borrows a total of \$150,000, warrants covering 375,000 shares will be issued and if the Company borrows the full commitment of \$300,000, warrants covering 750,000 shares will be issued). As of July 31, 2003, the Company had no borrowings against the line of credit.

Working capital increased \$814,238 to \$678,424 at June 30, 2003 from the December 31, 2002, negative working capital of \$135,814. The Company's current ratio was 2.3 at June 30, 2003, compared with .9 at December 31, 2002. Stockholders' equity increased \$175,036 to \$1,535,310 at June 30, 2003 from the December 31, 2002 balance of \$1,360,274. This increase was attributable to the net income, before dividend requirements on preferred stock, of \$175,036.

Management believes, although there can be no assurance, that available funds together with anticipated cash flows generated from future operations and the recently secured line of credit will be sufficient to meet the Company's cash needs during 2003.

Forward-Looking Statements

This report contains forward-looking statements which reflect the view of Company's management with respect to future events. Although management believes that the expectations reflected in such forward-looking statements are reasonable; it can give no assurance that such expectations will prove to have been correct. Important factors that could cause actual results to differ materially from such expectations are disclosed in the Company's Securities and Exchange Commission filings, and include, but are not limited to the dependence upon energy industry spending for seismic services, the unpredictable nature of forecasting weather, the potential for contract delay or cancellation, the potential for fluctuations in oil and gas prices, and the availability of capital resources. The forward-looking statements contained herein reflect the current views of the Company's management and the Company assumes no obligation to update the forward-looking statements or to update the reasons actual results could differ from those contemplated by such forward-looking statements.

ITEM 3. PROCEDURES AND CONTROLS

Within the 90 days prior to the date of this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Principal Financial and Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures

pursuant to Securities Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer and Principal Financial and Accounting Officer concluded that the Company's disclosure controls and procedures are effective. There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation.
