Notes to Consolidated Condensed Financial Statements

Three and six months ended June 30, 2007 and 2006
(In U.S. dollars)

1. General:

DataJungle Software Inc. (the "Company") was incorporated in the State of Washington on June 5, 1968 as Quad Metals Corporation ("Quad"). Quad became a Nevada incorporated company on December 11, 2002 when it merged with its wholly-owned subsidiary. The Company was renamed to DataJungle Software Inc. on November 18, 2003. The Company develops and markets a web-based front-end dashboard software product for leading business intelligence platforms. The product allows an end-user to create highly visual and interactive dashboard views on top of their existing databases and data cubes without significant involvement from specialized software programmers.

2. Summary of significant accounting policies:

(a) Basis of presentation:

These consolidated condensed financial statements are prepared in accordance with generally accepted accounting principles in the United States of America and include the accounts of DataJungle Software Inc. and its wholly-owned subsidiary, DataJungle Ltd. All significant intercompany balances and transactions have been eliminated in consolidation. The accounting policies are consistent with the policies outlined in the Company's audited financial statements as at and for the year ended December 31, 2006.

The consolidated condensed financial statements included herein are unaudited but, in the opinion of management, include all adjustments (consisting only of normal recurring entries) necessary for fair presentation of the consolidated condensed financial position and results of operations of the Company for the periods presented. The consolidated results of operations for the six months ended June 30, 2007 are not necessarily representative of the operating results expected for the full fiscal year ending December 31, 2007. Moreover, these consolidated condensed financial statements do not purport to contain complete disclosure in conformity with generally accepted accounting principles used in the United States of America and should be read in conjunction with the Company's audited consolidated financial statements as at and for the year ended December 31, 2006.

The consolidated condensed financial statements have been prepared assuming that the Company will continue as a going concern. The Company has minimal revenues, negative working capital of \$1,036,687 as at June 30, 2007 and has incurred a loss of \$1,399,883 and negative cash flow from operations of \$243,276 for the six months then ended. As of June 30, 2007, the Company has an accumulated deficit of \$8,487,425 which results in a stockholders' deficiency of \$960,681. In addition, the Company is in violation of the terms and conditions of four promissory notes, expects to continue to incur operating losses for the foreseeable future and has no lines of credit or other financing facilities in place. To date, the Company has been able to finance its operations on a month-to-month basis from investors who recognize the advancement of the Company's activities.

2. Summary of significant accounting policies (continued):

(a) Basis of presentation (continued):

All of the factors above raise substantial doubt about the Company's ability to continue as a going concern. Management's plans to address these issues include raising capital through the private placement of equity and renegotiating the repayment terms of accounts payable, accrued liabilities and promissory notes payable. The Company's ability to continue as a going concern is subject to management's ability to successfully implement the above plans. Failure to implement these plans could have a material adverse effect on the Company's financial position and or results of operations and may result in ceasing operations. The consolidated condensed financial statements do not include adjustments that would be required if the going concern assumption was not appropriate and consequently that the assets are not realized and the liabilities settled in the normal course of operations. Even if successful in obtaining financing in the near term, the Company cannot be certain that cash generated from its future operations will be sufficient to satisfy its liquidity requirements in the longer term and it may need to continue to raise capital by selling additional equity or by obtaining credit facilities.

The Company's future capital requirements will depend on many factors, including, but not limited to, the market acceptance of its products, the level of its promotional activities and advertising required to generate product sales. No assurance can be given that any such additional funding will be available or that, if available, it can be obtained on terms favorable to the Company.

(b) Foreign currency translation:

The consolidated condensed financial statements of the Company include the accounts of the Company in U.S. dollars and the accounts of its wholly-owned subsidiary, translated into U.S. dollars using Financial Accounting Standards Board Statement No. 52, "Foreign Currency Translation" for the translation of foreign currency operations. The financial statements of the Company's subsidiary are measured using the Canadian dollar as its functional currency. Assets and liabilities have been translated into U.S. dollars using the exchange rates in effect at the balance sheet date. Revenues and expenses have been translated into U.S. dollars using the average exchange rate for the period. Gains and losses have been reported as a separate component of accumulated other comprehensive loss.

(c) Revenue recognition:

For contracts requiring significant customization or services, the Company recognizes revenue using the completed contract method in accordance with the guidance in Statement of Position 81-1, "Accounting for Performance of Construction-Type and Certain Production-Type Contracts". Under the completed contract method, revenue is recognized in the period when all substantial obligations of the Company under the terms and conditions of a contract have been satisfied. Cash receipts received in advance of the recognition of revenue and rights to advance payments are recorded in the consolidated condensed balance sheet as deferred revenue. Direct costs associated with a contract that has not been recognized as revenue are capitalized in the consolidated condensed balance sheet as contracts in process. A provision for contract losses is recognized as soon as the losses become evident.

Three and six months ended June 30, 2007 and 2006
(In U.S. dollars)

2. Summary of significant accounting policies (continued):

(c) Revenue recognition (continued):

For sales of product licenses, the Company recognizes revenue in accordance with Statement of Position 97-2, "Software Revenue Recognition" ("SOP 97-2"), as amended by Statement of Position 98-9, "Software Revenue Recognition with Respect to Certain Transactions", issued by the American Institute of Certified Public Accountants. Revenue from sale of product licenses is recognized when all of the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collectibility is probable.

Revenue from product support contracts is recognized ratably over the life of the contract. Revenue from services is recognized at the time such services are rendered.

For contracts with multiple elements such as product licenses, product support and services, the Company follows the residual method. Under this method, the total fair value of the undelivered elements of the contract, as indicated by vendor specific objective evidence, is deferred and subsequently recognized in accordance with the provisions of SOP 97-2. The difference between the total contract fee and the amount deferred for the undelivered elements is recognized as revenue related to the delivered elements. Vendor specific objective evidence for support and consulting services is obtained from contracts where these elements have been sold separately. Where the Company cannot determine the fair value of all the obligations, the revenue is deferred until such time as it can be determined or the element is delivered.

(d) Stock-based compensation:

Effective January 1, 2006, the Company adopted the provisions of Financial Accounting Standards Board Statement No. 123R "Share-Based Payment" ("SFAS 123R") to account for its stock options. SFAS 123R requires all share-based payments, including stock options granted to employees by the Company, to be recognized in the Statement of Operations based on the fair value of the share-based payments at the date of grant. For purposes of estimating the grant date fair value of stock options, the Company uses the Black Scholes options pricing model and has elected to treat awards with graded vesting as a single award. The fair value is recognized as compensation expense on a straight-line basis over the requisite service period, which in the Company's circumstances is the stated vesting period of the award, provided that total compensation expense recognized at least equals the pro rata fair value of the award that has vested.

(In U.S. dollars)

2. Summary of significant accounting policies (continued):

(d) Stock-based compensation (continued):

The Company has adopted the modified prospective method of applying the provisions of SFAS 123R. Under the modified prospective method, the Company recognizes compensation expense based on the requirements of SFAS 123R for all share-based payments granted after the effective date of SFAS 123R. In addition, compensation expense is recognized, subsequent to the effective date of SFAS 123R, for the remaining portion of the vesting period for outstanding awards granted prior to the effective date of SFAS 123R.

3. Comprehensive loss:

Comprehensive loss includes the net loss and other comprehensive loss ("OCL"). OCL refers to changes in net assets from transactions and other events and circumstances other than transactions with stockholders. These changes are recorded directly as a separate component of stockholders' deficiency and excluded from net loss. The only comprehensive loss item for the Company relates to foreign currency translation adjustments pertaining to the translation of the financial statements of the Company's subsidiary, from Canadian dollars, the functional currency of the subsidiary, to U.S. dollars, the reporting and functional currency of the Company.

The warrant is exercisable at \$0.30 per share and expires on December 31, 2010.

4. Promissory notes payable (continued):

- (a) Accrued interest of \$5,275 (December 31, 2006 - \$4,085) has been included in accrued liabilities at June 30, 2007.

On April 19, 2006, \$80,000 of the promissory notes together with accrued interest of \$3,567 were assigned to another party. Subsequent to this assignment, the other party converted the promissory notes and accrued interest into 417,836 shares of common stock of the Company and a warrant to purchase 208,918 shares of common stock of the Company in accordance with the original conversion provisions. In addition, the Company agreed to issue an additional warrant to purchase 208,918 shares of common stock of the Company as consideration for the agreement to convert the promissory notes and accrued interest into common stock of the Company. The warrants are exercisable at \$0.30 per share and expire on December 31, 2010. On April 19, 2006, the fair value of the 208,918 additional warrants was \$68,306 using the Black Scholes option pricing model with the following assumptions: expected dividend yield 0%; risk-free interest rate of 4.9%; expected volatility of 124%; and an expected life of 4.71 years. As a consequence, the Company recognized a loss of \$68,306 on the extinguishment of this debt for the three months ended June 30, 2006.

On May 19, 2006, the Company entered into an agreement to extend the maturity date of \$25,000 of the promissory notes to June 30, 2006. As consideration for this extension, the Company agreed to pay \$1,250 in additional interest and to repay the principal and accrued interest from the proceeds of any financing in excess of \$250,000 or at the rate of 10% of the cash proceeds from sales or any financing less than \$250,000. On August 2, 2006, the Company repaid \$4,988 to the lender. On September 12, 2006, the lender assigned the promissory note together with accrued interest to another party. On January 10, 2007, this other party assigned the promissory note together with accrued interest to a third party. The Company has failed to make any additional payments of principal or interest. Consequently, the Company is in default of the terms and conditions of the promissory note. As a result of this default, the promissory note is payable on demand.

- (b) On October 12, 2006, the Company received cash consideration of \$20,000 in exchange for the issuance of a 10% demand promissory note. The promissory note and accrued interest are convertible, at the lenders' option, into shares of common stock of the Company at a price of \$0.10 per share plus a warrant for the purchase of the number of shares equal to 50% of the number of shares received by the lender on conversion. The warrant is exercisable at \$0.30 per share and expires on December 31, 2010. At the date of issuance, the conversion feature of the promissory note was "in-the-money". The intrinsic value of this beneficial conversion feature was \$17,974. In accordance with EITF 98-5, "Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios" and EITF 00-27, "Application of Issue No. 98-5 to Certain Convertible Instruments", this amount was recorded as additional

4. Promissory notes payable (continued):

- (b) paid-in capital. The promissory note was accreted to its face value through a charge to interest expense of \$17,974 for the three months ended December 31, 2006.

On March 16, 2007, the lender assigned the \$20,000 promissory note to other parties and the other parties agreed to convert the promissory note into 200,000 shares of common stock of the Company and warrants to purchase 100,000 shares of common stock of the Company in accordance with the original conversion provisions.

During the period from January 1, 2007 to June 30, 2007, the Company received cash consideration of \$111,000 from the lender in exchange for the issuance of 10% demand promissory notes. The promissory notes and accrued interest are convertible, at the lenders' option, into shares of common stock of the Company at a price of \$0.10 per share plus a warrant for the purchase of the number of shares equal to 50% of the number of shares received by the lender on conversion. The warrant is exercisable at \$0.30 per share and expires on December 31, 2010.

At the date of issuance, the conversion feature of the promissory note was "in-the-money". The intrinsic value of this beneficial conversion feature was \$106,622. In accordance with EITF 98-5, "Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios" and EITF 00-27, "Application of Issue No. 98-5 to Certain Convertible Instruments", this amount was recorded as additional paid-in capital. The promissory notes were accreted to their face value through a charge to interest expense of \$56,000 for the three months ended March 31, 2007 and \$50,622 for the three months ended June 30, 2007.

Accrued interest of \$3,891 (December 31, 2006 - \$438) has been included in accrued liabilities at June 30, 2007.

- (c) On December 22, 2006, the Company received cash consideration of \$86,333 (C\$100,000) in exchange for the issuance of a 12% promissory note. \$84,475 (C\$90,000) of the promissory note is due on the earlier of receipt of investment tax credits receivable by the Company or June 30, 2007. The balance of the promissory note together with accrued interest was due on June 30, 2007.

As consideration for services rendered arranging the promissory note, the Company paid the lender a fee of \$8,633 (C\$10,000) in December 2006. 6. Stock option plan (continued):

Effective January 1, 2006, the Company adopted the provisions of SFAS 123R to account for its stock options. SFAS 123R requires that the fair value of stock options granted be recognized in the Statement of Operations based on the fair value of the stock options at the date of grant. For purposes of estimating the grant date fair value of stock options, the Company uses the Black Scholes options pricing model based on certain assumptions including the expected term of the options, expected volatility of the underlying stock over the expected term of the options and the risk-free interest rate. The expected term of the options has been estimated by calculating an average of the weighted average vesting period and the weighted average contractual term of the options. Historical volatility of the Company's shares and historical volatility of other companies that operate in a similar business to the Company is used as a basis for projecting the expected volatility of the underlying stock. The risk-free rate for the expected term of the options is based on the U.S. Treasury yield curve in effect at the time of grant.

The fair value is recognized as compensation expense on a straight-line basis over the requisite service period, which in the Company's circumstances is the stated vesting period of the award, provided that total compensation expense recognized at least equals the pro rata value of the award that has vested.

During the six months ended June 30, 2007, there were no options granted by the Company. During the six months ended June 30, 2006, 1,100,000 stock options were granted to officers and directors and 495,000 stock options were granted to employees.

The per share weighted-average fair value of the stock options granted during the three months ended June 30, 2007 and 2006 has been calculated using the Black Scholes option-pricing model and related weighted-average assumptions are as follows:

	Three months ended June 30, 2007 (Unaudited)	Three months ended June 30, 2006 (Unaudited)
Options granted	-	225,000
Expected volatility	-	128%

The Company agreed to pay these fees to the consultant on the earliest of December 31, 2007 or within five days of the Company raising \$1.5 million in financing.

- (vi) On January 24, 2006, the Company cancelled a consulting agreement and included the balance of the prepaid expenses and deferred consulting services of \$717,483 in general and administrative expenses. On the same date, the Company cancelled Series A warrants to purchase 1,500,000 shares of common stock and all of the Series B warrants. As compensation for cancellation of the Series A warrants, the Company issued 305,000 shares of common stock. On January 24, 2006, the fair value of the 305,000 shares of common stock was \$67,100 based on a share price of \$0.22 per share on that date. The \$67,100 was accounted for as a capital transaction.
- (vii) At December 31, 2005, \$31,000 remained as a credit to common stock to be issued for services in stockholders' deficiency with respect to an obligation to issue 100,000 shares of common stock at \$0.31 per share for services rendered and recognized in general and administrative expenses in 2005. In March 2006, the provider of the services agreed to waive the right to receive the 100,000 shares of common stock. As a consequence, the \$31,000 credit to common stock to be issued for services was transferred to additional paid-in-capital.

Critical Accounting Policies

The financial statements of the Company are prepared in accordance with generally accepted accounting principles in the United States of America. The following accounting policies are considered to be critical to an understanding of the financial position and results of operations for the Company. The significant accounting policies for the Company have been disclosed in the audited consolidated financial statements as at and for the year ended December 31, 2006.

Results of Operations

For the three months ended June 30, 2007 compared to the three months ended June 30, 2006

Revenue: Revenue for the three months ended June 30, 2007 was \$110,228 compared to \$160,985 for the three months ended June 30, 2006.

Services revenue decreased from \$139,010 in 2006 to \$41,158 in 2007. This decrease of approximately \$98,000 results primarily from a decrease in revenue from a significant customer in 2007 compared to 2006.

Product revenue increased from \$21,975 in 2006 to \$69,070 in 2007. This increase of approximately \$47,000 results from an increase in the number of product contracts from three in 2006 to five in 2007 and an increase in the average size of the contracts in 2007 compared to 2006.

Gross profit: Gross profit for the three months ended June 30, 2007 was \$95,627 (87% of revenue) compared to \$131,074 (81% of revenue) for the three months ended June 30, 2006.

In 2007, the gross profit on services was \$27,534 (67% of services revenue) compared to \$111,129 (80% of services revenue) in 2006. The decrease in gross profit of approximately \$84,000 in 2007 results primarily from a decrease in gross profit from a significant customer in 2007 compared to 2006. On a percentage basis, the decrease in gross profit in 2007 results from costs related to an initial contract with a major software provider that required a significant labor component and product support costs due to an upgrade in our product.

In 2007, the gross profit on products was \$68,093 (99% of product revenue) compared to \$19,945 (91% of product revenue) in 2006. Three of the product sales in 2007 were from existing customers and required no incremental costs to deliver.

General and administrative expenses: General and administrative expenses for the three months ended June 30, 2007 were \$440,672 compared to \$132,231 for the three months ended June 30, 2006. The increase in costs of approximately \$308,400 includes the following significant items:

- Increase of approximately \$6,500 in travel costs in 2007 compared to 2006 incurred as a result of financing activities.
- Net decrease of approximately \$1,400 in other costs in 2007 compared to 2006.

- Decrease of approximately \$2,800 in expenses for administration of our computer systems in 2007 compared to 2006 due to budget constraints in 2007.
- Increase in costs of approximately \$14,500 due to a decrease in the cost of compensation transferred to cost of sales in 2007 compared to 2006. This results from a decrease in the labor component of certain service contracts in 2007.
- Decrease in other miscellaneous costs of approximately \$500 in 2007 compared to 2006.

The above changes in costs were offset by the following item:

- Increase in research and development tax credits of \$1,400 in 2007 compared to 2006 due to labor incurred on a mapping intelligence component to our Matrix product in 2007.

Interest expense: Interest expense decreased from \$169,577 for the three months ended June 30, 2006 to \$85,590 for the three months ended June 30, 2007. This decrease results primarily from the impact of the intrinsic value of beneficial conversion features on promissory notes issued in 2006 compared to 2007.

Loss on extinguishment and modification of debt: Loss on extinguishment and modification of debt was \$110,563 for the three months ended June 30, 2006 compared to \$Nil for the three months ended June 30, 2007. The loss in 2006 resulted from the conversion of promissory notes to equity on terms more favorable than the original terms and modification of other promissory notes to include terms that were more favorable than the original terms of the promissory notes.

Net loss: Net loss was \$698,217 (\$0.02 per share) for the three months ended June 30, 2007 compared to \$554,198 (\$0.02 per share) for the three months ended June 30, 2006. Our revenue and future profitability and future rate of growth are substantially dependent upon our ability to:

- license our software applications to a sufficient number of clients
- modify the successful software applications, over time, to provide enhanced benefits to existing users; and
- successfully develop related software applications.

For the six months ended June 30, 2007 compared to the six months ended June 30, 2006

Product revenue increased from \$40,518 in 2006 to \$99,628 in 2007. This increase of approximately \$59,000 results from a general increase in the number of product contracts from four in 2006 to eight in 2007.

In 2007, the gross profit on services was \$115,522 (75% of services revenue) compared to \$137,479 (71% of services revenue) in 2006. The increase in gross profit as a percentage of revenue results primarily from an increase in gross profit on services provided to a major customer in 2007 compared to 2006.

In 2007, the gross profit on products was \$98,651 (99% of product revenue) compared to \$32,528 (80% of product revenue) in 2006. The product sales in 2007 were primarily from existing customers and required no incremental costs to deliver.

General and administrative expenses: General and administrative expenses for the six months ended June 30, 2007 were \$886,537 compared to \$987,852 for the six months ended June 30, 2006. The decrease in costs of approximately \$101,300 includes the following significant items:

- Increase in compensation costs of approximately \$36,100 in 2007 compared to 2006. - Increase of approximately \$8,800 in travel costs in 2007 compared to 2006 incurred as a result of financing activities.
- Increase of approximately \$6,100 in bank charges in 2007 compared to 2006 resulting primarily from interest and penalties on arrears in certain statutory employee tax payments.

- Increase in costs of approximately \$20,000 due to a decrease in the cost of compensation transferred to cost of sales in 2007 compared to 2006. This results from a decrease in the labor component of certain service contracts in 2007.

The above changes in costs were offset by the following item:

- Increase in research and development tax credits of \$2,700 in 2007 compared to 2006 due to labor incurred on a mapping intelligence component to our Matrix product in 2007.

Interest expense: Interest expense decreased from \$367,852 for the six months ended June 30, 2006 to \$207,036 for the six months ended June 30, 2007. Financial Condition and Liquidity

General: At June 30, 2007, the Company had negative working capital of \$1,036,687 compared to negative working capital of \$550,644 at December 31, 2006. The Company had cash of \$171,830 at June 30, 2007 compared to cash of \$23,157 at December 31, 2006. At June 30, 2007, the Company had not repaid or negotiated a further extension of the maturity date for four promissory notes for approximately \$144,000. Consequently, the Company is in default of the terms and conditions of these promissory notes.

All of the factors above raise substantial doubt about the Company's ability to continue as a going concern. Management is reviewing various options to address its working capital and cash flow needs, including without limitation the issuance of new debt or equity securities in one or more series or classes and the negotiation of repayment terms of accounts payable, accrued liabilities and promissory notes payable. The Company's ability to continue as a going concern is subject to management's ability to successfully implement the above plans. Failure to implement these plans could have a material adverse effect on the Company's position and or results of operations and may result in ceasing operations. Even if successful in obtaining financing in the near term, the Company cannot be certain that cash generated from its future operations will be sufficient to satisfy its liquidity requirements in the longer term and it may need to continue to raise capital by selling additional equity or by obtaining credit facilities.

Net cash used in operating activities: During the six months ended June 30, 2007, the Company used \$243,276 of cash in operations compared to a use of cash in operations of \$314,643 for the six months ended June 30, 2006. The use of cash in operations for the six months ended June 30, 2007 resulted from a net loss of \$1,399,883 offset by non-cash consulting fees of \$471,444, stock compensation of \$70,710, non-cash financing fees of \$63,265, depreciation of \$2,230, non-cash interest expense of \$207,036 and a net change in non-cash working capital of \$341,562. The use of cash for the six months ended June 30, 2006 resulted from a net loss of \$2,304,412 offset by non-cash consulting fees of \$717,483, non-cash compensation expense of \$139,227, non-cash financing fees of \$18,811, non-cash interest expense of \$367,431, non-cash loss on extinguishment and modification of debt of \$550,743, depreciation expense of \$5,335 and net change in non-cash working capital of \$190,739.

ITEM 3 CONTROLS AND PROCEDURES

The term “disclosure controls and procedures” is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, or the Exchange Act. This term refers to the controls and procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission.

In connection with the review of our consolidated condensed financial statements for the three months ended June 30, 2007, our independent registered public accounting firm advised the Board of Directors and management of certain significant internal control deficiencies that they considered to be, in the aggregate, a material weakness. In particular, our independent registered public accounting firm identified the following weaknesses in our internal control system: (1) a lack of segregation of duties and (2) a lack of formal procedures relating to all areas of financial reporting including a lack of review by management. The independent registered public accounting firm indicated that they considered these deficiencies to be reportable conditions as that term is defined under standards established by the American Institute of Certified Public Accountants. A material weakness is a significant deficiency in one or more of the internal control components that alone or in the aggregate precludes our internal controls from reducing to an appropriately low level of risk that material misstatements in our consolidated financial statements will not be prevented or detected on a timely basis. The Company considered these matters in connection with the period-end closing of accounts and preparation of the related consolidated condensed financial statements and determined that no prior period financial statements were materially affected by such matters. Notwithstanding the material weaknesses identified by our independent registered public accountants, we believe that the consolidated condensed financial statements, and other financial information included in this report, fairly present in all material respects, the financial condition, results of operation and cash flows of the Company as of, and for, the periods represented in this report.

The size of the Company has prevented us from being able to employ sufficient resources at this time to enable us to have an adequate level of supervision and segregation of duties within our internal control system. Set forth below is a discussion of the significant internal control deficiencies that had not been remediated as of the beginning of the period covered by this report.

Lack of segregation of duties. Our size has prevented us from being able to employ sufficient resources to enable us to have an adequate level of supervision and segregation of duties within our internal control system. There is one person involved in processing of transactions. Therefore, it is difficult to effectively segregate accounting duties. While we strive to segregate duties as much as practicable, there is insufficient volume of transactions to justify additional full time staff. We are currently seeking, but cannot be assured that we will be able to find, a qualified part time person to perform routine, month end accounting procedures. As a result, this significant internal control deficiency had not been remediated as of the end of the period covered by this report, nor do we know if we will be able to remediate this weakness in the foreseeable future. However, we will continue to monitor and assess the costs and benefits of additional staffing.

Lack of formal procedures relating to all areas of financial reporting including a lack of review by management. Due to the size of our Company, and as a consequence of the lack segregation of duties, we do not have formal month end close procedures. As a result, there is a lack of timely review of the consolidated condensed financial statements and Form 10-QSB. This significant internal control deficiency has not been remediated as of the end of the period covered by this report.

If we are unable to remediate the identified material weaknesses, there is a more than remote likelihood that a material misstatement to our SEC reports will not be prevented or detected, in which case investors could lose confidence in the accuracy and completeness of our financial reports, which could have an adverse effect on our ability to raise additional capital and could also have an adverse effect on our stock price.

As required by the SEC rules, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Report. This evaluation was performed under the supervision and with the participation of our management, including the President and Chief Executive Officer and Chief Financial Officer, Secretary and Treasurer. Based upon that evaluation, our President and Chief Executive Officer and Chief Financial Officer, Secretary and Treasurer have concluded that our controls and procedures were not effective as of the end of the period covered by this Report due to the existence of the significant internal control deficiencies described above.
