through a carefully constructed mix of

equity and fixed income securities.

# Market Review

## Dear Shareholder:

The year under review represented a time of great change in which the equity markets were tested by a number of factors including large-scale corporate governance scandals, a continuous stream of earnings disappointments and rising geopolitical risk.

## From Recovery to Uncertainty

As the fiscal year began, the events of September 11 quickly dashed expectations of a long-awaited economic recovery, throwing the markets into a state of turmoil. In an effort to stabilize the economy, the Federal Reserve Board reduced short-term interest rates aggressively during the fourth quarter of 2001, bringing the federal funds rate to 1.75%—its lowest level since the Kennedy Administration. Historically low levels of interest rates stimulated consumer spending, driving housing and auto sales to record levels. Lower rates also resulted in increases in mortgage refinancings, which had the effect of putting more cash in consumers' pockets. Robust consumer spending combined with declining oil prices and the rapid success of U.S. armed forces in Afghanistan boosted investor confidence in the fourth quarter of 2001, providing a catalyst to stock market improvement that continued through year end. GDP for the fourth quarter grew at a solid pace of 2.7%.

## Equity Market Struggles Begin in Earnest

In a surprising show of strength, GDP for the first quarter of 2002 grew at a rate of 5.0%—driven largely by increases in manufacturing production orders as companies that had previously cut production in the face of falling demand began to rebuild depleted inventories. This positive news was overshadowed, however, by the series of highly publicized accounting scandals in which a number of large, well-respected corporations admitted to fraudulent accounting practices and earnings overstatements in the billions of dollars. Investors reacted with panic, bidding the stock prices of such companies down by as much as 95% in some cases. Even stocks with sound accounting practices were deemed guilty by association as entire sectors declined at once. The markets witnessed a renewed demand for conservative, fundamentally sound companies with steady dividend yields, demonstrated earnings growth and positive cash flows.

Concerns about corporate governance issues escalated throughout the year, as additional evidence kept existing scandals in the limelight. Downside earnings guidance from companies across a range of sectors contributed to the equity market malaise, as did news of a sharp decline in GDP growth for the second quarter, which fell to 1.1%. News of a slowing economy drove stocks in economically sensitive sectors such as technology, telecommunications and consumer discretionary down further. As a result of these factors, the third quarter of 2002 marked the worst equity market performance since the fourth quarter of 1987.

In spite of the gloom permeating the stock market, we believe the economy is soundly positioned for a gradual recovery over the next 12 months. With interest rates at historic lows, inflation in check and consumer spending remaining strong, a solid foundation is in place for future growth. In the months ahead, we expect equity market returns to stabilize and much of today's uncertainty to subside as corporate governance issues are resolved and as companies begin to show improvements in profitability once again.

As always, we appreciate your investment in the Goldman Sachs Funds and look forward to continuing to serve your financial needs in the years to come.

Sincerely,

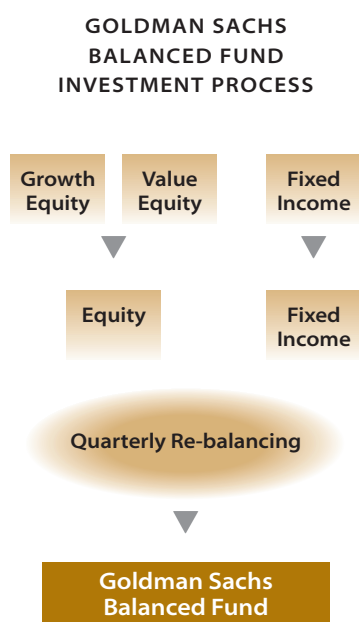

David W. Blood

# What Differentiates Goldman Sachs Balanced Fund Investment Process?

The Balanced Fund is a diversified investment portfolio that utilizes an asset allocation process of strategically selecting different asset classes — such as stocks, bonds and cash — in precise proportions. The Fund then adjusts its holdings over time. Goldman Sachs' exclusive approach to asset allocation combines our global presence, extensive market knowledge and risk management expertise.

## 1 VALUE AND GROWTH EQUITY INVESTMENTS

Utilizing two distinct complementary investment strategies, our approach to selecting stocks for the Fund's equity portion provides diversified equity participation.

Over time, the performance of value and growth stocks has been roughly equal — but that performance has been generated at different times as the styles move in and out of favor. Since it is impossible to predict cycles of outperformance, many investors choose to have exposure to both styles in their portfolio.

## 2 RESEARCH-INTENSIVE APPROACH

In Equity investing, we take an intensive, hands-on approach to research, meeting with company management to gain an in-depth understanding of their long-term business objectives. We also meet with a company's customers, competitors and suppliers so that we have insight into industry-wide trends.

With expertise in global fixed income and currency management, Goldman Sachs is a preeminent fixed income manager that strives to maximize returns within a risk adjusted framework.

## 3 ESTABLISHED TEAM MANAGEMENT

We are distinguished from our competitors by our team approach to investment management. In contrast to a "star" approach centered on one manager, each portfolio manager/research analyst participates fully in the decision-making process. This approach encourages intense debate over new and existing holdings and prevents us from becoming too ingrained in our ideas. Finally, our team structure protects us in the event that one of our portfolio managers/research analysts leaves the firm.

## PERFORMANCE REVIEW

September 1, 2001-August 31, 2002	Fund Total Return (based on NAV) <sup>1</sup>	S&P 500 Index <sup>2</sup>	Lehman Brothers Aggregate Bond Index <sup>2</sup>
Class A	-8.67%	-17.99%	8.11%
Class B	-9.38	-17.99	8.11
Class C	-9.34	-17.99	8.11
Institutional	-8.33	-17.99	8.11
Service	-8.79	-17.99	8.11

<sup>1</sup> The net asset value (NAV) represents the net assets of the class of the Fund (ex-dividend) divided by the total number of shares of the class outstanding. The Fund's performance assumes the reinvestment of dividends and other distributions. The Fund's performance does not reflect the deduction of any applicable sales charges.

<sup>2</sup> The S&P 500 Index (with dividends reinvested) is the Standard & Poor's 500 Composite Stock Price Index of 500 stocks, an unmanaged index of common stock prices. The Lehman Brothers Aggregate Bond Index (with dividends reinvested) is an unmanaged index of bond prices. The Indexes do not reflect any deduction for fees, expenses or taxes.

## STANDARDIZED TOTAL RETURNS<sup>3</sup>

For the period ended 6/30/02	Class A	Class B	Class C	Institutional	Service
One Year	-13.66%	-13.87%	-10.26%	-8.31%	-8.77%
Five Years	0.32	0.30	N/A	N/A	1.29 <sup>4</sup>
Since Inception	7.05 (10/12/94)	4.40 (5/1/96)	-0.30 (8/15/97)	0.84 (8/15/97)	7.72 <sup>4</sup> (10/12/94)

<sup>3</sup> The Standardized Total Returns are average annual total returns as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. These returns reflect a maximum initial sales charge of 5.5% for Class A Shares, the assumed contingent deferred sales charge for Class B Shares (5% maximum declining to 0% after six years) and the assumed contingent deferred sales charge for Class C Shares (1% if redeemed within 12 months of purchase). Because Institutional and Service Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

<sup>4</sup> Performance data for Service Shares prior to August 31, 1997 (commencement of operations) is that of the Class A Shares (excluding the impact of the front-end sales charge applicable to Class A Shares since Service Shares are not subject to any sales charges). Performance of Class A Shares of the Balanced Fund reflects the expenses applicable to the Fund's Class A Shares. The fees applicable to Service Shares are different from those applicable to Class A Shares which impact performance ratings and rankings for a class of shares.

Total return figures in the above table represent past performance and do not indicate future results, which will vary. The investment return and principal value of an investment will fluctuate and, therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Performance reflects expense limitations in effect. In their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

## TOP 10 EQUITY HOLDINGS AS OF 8/31/02<sup>5</sup>

Holding	% of Total Net Assets	Line of Business
Microsoft Corp.	2.0%	Computer Software
Wal-Mart Stores, Inc.	1.5	Department Stores
Pfizer, Inc.	1.4	Drugs
Exxon Mobil Corp.	1.4	Energy Resources
Freddie Mac	1.4	Financial Services
General Electric Co.	1.3	Financial Services
Citigroup, Inc.	1.0	Banks
Philip Morris Companies, Inc.	0.9	Tobacco
Johnson & Johnson	0.9	Drugs
Pepsico, Inc.	0.7	Food and Beverage

<sup>5</sup> The top 10 equity holdings may not be representative of the Fund's future investments.

# Portfolio Results

Dear Shareholder,

This report provides a summary of the performance of the Goldman Sachs Balanced Fund for the one-year period that ended August 31, 2002.

## Performance Review

Over the one-year period that ended August 31, 2002, the Fund's Class A, B, C, Institutional, and Service Shares generated cumulative total returns, without sales charges, of -8.67%, -9.38%, -9.34%, -8.33%, and -8.79%, respectively. These returns compare to the -17.99% and 8.11% cumulative total returns of the Fund's benchmarks, the S&P 500 Index and the Lehman Brothers Aggregate Bond Index, respectively. As these returns indicate, it has been a difficult investment environment and the Fund was unable to avoid the weakness that permeated the financial markets.

## Asset Allocation

- **Equities** — As of August 31, 2002, the Fund was 45.9% invested in growth and value equities. This compared to a 51.2% allocation on August 31, 2001. As bottom-up stock pickers, we focus on the real worth of the business, and to the extent we find several businesses in related industries that have long-term growth potential, we may develop an overweight position in a particular sector. With this in mind, as of August 31, 2002, the Fund maintained overweight positions in the Consumer Noncyclicals, Energy, and Consumer Services sectors. The Fund held underweight positions in the Health Care, Technology, Telecommunications, and Consumer Cyclical sectors.
- **Fixed Income** — As of August 31, 2002, the Fund was 47.5% invested in fixed income securities, compared to 48.8% on August 31, 2001. Over the period, the Fund was overweight in asset-backed securities and investment-grade corporates and underweight in Treasuries and agency securities. The Fund held an overweight position in mortgage-backed securities until June 2002. However, by the end of the reporting period, the Fund was underweight in mortgage-backed securities, due to a combination of short-term volatility and historically high prepayment speeds. In the Emerging Market Debt sector, the Fund maintained tactical allocations to countries such as Mexico, Russia, Venezuela, and Poland.

## Portfolio Highlights

### VALUE EQUITY

Although the overall equity markets fell during the reporting period, a number of holdings within the Fund's portfolio performed relatively well.

- **RenaissanceRe Holdings Ltd.** — RenaissanceRe Holdings Ltd. was a strong contributor to performance during the past year. The company has been well positioned to benefit from the upward pricing trend in the property/casualty reinsurance industry, due to its strong capital base. In addition, the firm's management is well regarded for being disciplined underwriters, and it has sustained very high returns over the six-year public history of the company.

- **Bank of America Corp.** — Bank of America Corp.'s (Bank of America) performance enhanced portfolio returns during the period. Through its banking subsidiaries and various nonbanking subsidiaries, the company provides a diversified range of banking and nonbanking financial services and products. The company has been experiencing earnings-per-share growth, helped by its diverse mix of businesses. Bank of America continues to find ways to expand its asset base and strengthen its relationships with current customers.

#### GROWTH EQUITY

- **Harrah's Entertainment, Inc.** — Harrah's Entertainment, Inc. (Harrah's) is the most diversified gaming company in the United States and the only such firm that has pursued a national brand for its casinos. Harrah's generates approximately more than half of its cash flow from its diversified riverboat operations, one third from Atlantic City operations, and the remainder from its Las Vegas operations. Harrah's disciplined approach to new investment and same-store growth philosophy has allowed it to generate consistently growing cash flows without the need for significant new investment. Because riverboats rely on local populations for their customer base, the casinos require much less reinvestment to attract customers.
- **The Procter & Gamble Co.** — The Procter & Gamble Co. (Procter & Gamble) is a dominant worldwide manufacturer and marketer of household and personal care products. With one of the most enviable brand-name portfolios in the world (including such category leaders as Tide, Pampers, Crest, Clairol, Charmin, and Bounty), Procter & Gamble is the global giant in the consumer products industry. We expect that its greatest opportunities will come from faster-growing overseas markets. Currently, the highest priorities for the firm are China, Eastern and Central Europe, and the southern portion of Latin America.

#### FIXED INCOME

Between August 31, 2001 and August 31, 2002, the Federal Reserve Board cut rates four times, dropping the fed funds rate from 3.50% to 1.75%. The Treasury yield curve steepened dramatically in response, with the short end of the curve rallying 175 basis points. The corporate bond market suffered during the period, due to an onslaught of corporate governance scandals, defaults, ratings volatility, poor equity market performance, and a weak economy. The sector saw two of the worst months in its history following WorldCom, Inc.'s (WorldCom) default in May of 2002. Although the Fund had eliminated WorldCom bonds from its portfolio before its collapse, its overweight position in Telecommunications was the main detractor from performance over the period. The Fund's allocation to mortgage-backed securities was the main contributor to returns over the period. An overweight allocation to this sector in 2001 and the beginning of 2002 benefited returns as mortgages tightened relative to Treasuries.

### Outlook

- **Value Equity** — We expect continued market volatility for the remainder of 2002, due to concerns over earnings, further accounting issues, and fear of terrorism. We believe the best way to navigate through an uncertain market is through solid fundamental research. Comprehensive financial analysis and understanding the numbers are absolutely essential in this environment. We believe we are particularly well suited to identify these opportunities. Our team is structured around "centers of excellence," whereby each team member has industry/sector-specific responsibility. Not only does this provide more in-depth industry expertise, it allows each of us to be more focused in our search for undervalued situations.

■ **Growth Equity** — Recent indications point to a modest recovery in the growth of the U.S. economy. However, this has been starkly contrasted by the continued decline in the value of U.S. equities. A number of variables have been working against companies and, as such, they have not seen their intrinsic values recognized by investors. These variables include the unsettled geopolitical situation, corporate accounting fraud, and threats of random terrorist acts. In general, we believe U.S. economic growth should continue to be gradual with corporate investment still lagging other areas of the economy. With interest rates at historically low levels, we expect business leaders to boost investment accordingly. As always, we will seek to invest in dominant franchise companies that we feel will come out of the recession with improved competitive positions. Additionally, strong operational leverage in these particular companies should lead to positive earnings performance as economic activity increases. Although certain factors will continue to weigh on the market, we anticipate that robust business growth will eventually be reflected in equity valuations.

■ **Fixed Income** — In the second quarter of 2002, growth was more moderate than expected, largely due to the recent revaluation in the equity market and the widening U.S. trade deficit. However, other economic data indicate that the slower growth from the second quarter of 2002 will be reversed in the second half of the year. Solid real income growth and rapid refinancing activity continue to support strong consumer demand. Furthermore, accommodative monetary and fiscal policy should serve as a counterbalance for the weak equity market and trade deficit. We believe that the Federal Reserve Board will maintain the current rate in 2002 and begin to tighten monetary policy during the first half of 2003.

We thank you for your investment and look forward to earning your continued confidence.

Goldman Sachs Fixed Income Investment Management Team*

New York, September 10, 2002

# Performance Summary

August 31, 2002

The following graph shows the value, as of August 31, 2002, of a \$10,000 investment made on October 12, 1994 (commencement of operations) in Class A Shares (maximum sales charge of 5.5%) of the Goldman Sachs Balanced Fund. For comparative purposes, the performance of the Fund's benchmarks, the Standard and Poor's 500 Index (with dividends reinvested) ("S&P 500 Index"), and the Lehman Brothers Aggregate Bond Index (with dividends reinvested) ("LBAB Index"), are shown. This performance data represents past performance and should not be considered indicative of future performance which will fluctuate with changes in market conditions. These performance fluctuations will cause an investor's shares, when redeemed, to be worth more or less than their original cost. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Performance of Class B, Class C, Institutional and Service Shares will vary from Class A Shares due to differences in fees and loads.

## Balanced Fund's Lifetime Performance

Growth of a \$10,000 Investment, Distributions Reinvested October 12, 1994 to August 31, 2002.

## Average Annual Total Returns through August 31, 2002

\* Non-income producing security.

^ Joint repurchase agreement was entered into on August 30, 2002.

# Variable rate security. Coupon rate disclosed is that which is in effect at August 31, 2002.

α TBA (To Be Assigned) securities are purchased on a forward commitment basis with an approximate (generally ±2.5%) principal amount and maturity date. The actual principal amount and maturity date will be determined upon settlement when the specific mortgage pools are assigned.

† Securities are exempt from registration under Rule 144A of the Securities Act of 1933. Such securities may be resold, normally to qualified institutional buyers in transactions exempt from registration. Total market value of Rule 144A securities amounted to \$2,159,834, which represents 1.64% of net assets as of August 31, 2002.

+ These securities are issued with a zero coupon which increases to the stated rate at a set date in the future.

@ Security is issued with a zero coupon. The interest rate disclosed for this security represents effective yield to maturity.

△ Security currently in default.

• A portion of this security is segregated as collateral for initial margin requirement on futures transactions.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of total net assets.

# Notes to Financial Statements

August 31, 2002

## 1. ORGANIZATION

Goldman Sachs Trust (the “Trust”) is a Delaware business trust registered under the Investment Company Act of 1940 (as amended) as an open-end management investment company. The Trust includes the Goldman Sachs Balanced Fund (the “Fund”). The Fund is a diversified portfolio offering five classes of shares — Class A, Class B, Class C, Institutional and Service.

## 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies consistently followed by the Fund. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that may affect the reported amounts. Actual results could differ from those estimates.

**A. Investment Valuation** — Investments in securities traded on a U.S. or foreign securities exchange or the NASDAQ system are valued daily at their last sale price on the principal exchange on which they are traded. If no sale occurs, securities are valued at the last bid price. Debt securities are valued at prices supplied by independent pricing services, broker/dealer-supplied valuations or matrix pricing systems. Unlisted equity and debt securities for which market quotations are available are valued at the last sale price on valuation date, or if no sale occurs, at the last bid price. Short-term debt obligations maturing in sixty days or less are valued at amortized cost, which approximates market value. In addition, the impact of events that occur after the publication of market quotations used by a Fund to price its securities but before the close of regular trading on the New York Stock Exchange will not be reflected in a Fund’s next determined NAV unless the Trust, in its discretion, determines to make an adjustment in light of the nature and significance of the event, consistent with applicable regulatory guidance. Securities for which quotations are not readily available are valued at fair value using methods approved by the Board of Trustees of the Trust.

Investing in foreign securities may involve special risks and considerations not typically associated with investing in the United States. These risks include revaluation of currencies, high rates of inflation, repatriation restrictions on income and capital, and adverse political and economic developments. Moreover, securities issued in these markets may be less liquid, subject to government ownership controls, delayed settlements, and their prices may be more volatile than those of comparable securities in the United States.

**B. Security Transactions and Investment Income** — Security transactions are recorded as of the trade date. Realized gains and losses on sales of portfolio securities are calculated using the identified-cost basis. Dividend income is recorded on the ex-dividend date, net of foreign withholding taxes where applicable. Interest income is recorded on the basis of interest accrued, premium amortized and discount accreted.

Net investment income (other than class-specific expenses) and unrealized and realized gains or losses are allocated daily to each class of shares of the Fund based upon the relative proportion of net assets of each class.

As required, effective September 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premiums and discounts on all debt securities and reclassified all paydown losses to income. Prior to September 1, 2001, the Fund did not amortize premiums and discounts on debt securities. The cumulative effect of these accounting changes had no impact on total net assets or the net asset value per share of the Fund, but resulted in an increase in the cost of the securities and a corresponding increase to net investment income by \$1,119 based on securities held by the Fund on August 31, 2001. The statement of changes and financial highlights have not been restated to reflect these changes in presentation for previous periods. The effect of these changes for the year ended August 31, 2002 was to decrease net investment income by \$196,472, and increase net realized gains and unrealized gains by \$186,469 and \$10,003, respectively.

**C. Federal Taxes** — It is the Fund’s policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable income and

## 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

capital gains to its shareholders. Accordingly, no federal tax provision is required. Income distributions, if any, are declared and paid quarterly. Capital gains distributions, if any, are declared and paid annually.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with income tax rules. Therefore, the source of the Fund's distributions may be shown in the accompanying financial statements as either from net investment income or net realized gain on investment transactions or from paid-in capital, depending on the type of book/tax differences that may exist.

**D. Expenses** — Expenses incurred by the Trust that do not specifically relate to an individual Fund of the Trust are allocated to the Funds on a straight-line or pro rata basis depending upon the nature of the expense.

Class A, Class B and Class C Shares bear all expenses and fees relating to their respective Distribution and Service plans. Service Shares bear all expenses and fees relating to their Service and Shareholder Administration Plans. Each class of shares separately bears its respective class-specific Transfer Agency fees.

**E. Foreign Currency Translations** — The books and records of the Fund are maintained in U.S. dollars. Amounts denominated in foreign currencies are translated into U.S. dollars on the following basis: (i) investment valuations, foreign currency and other assets and liabilities initially expressed in foreign currencies are converted each business day into U.S. dollars based upon current exchange rates; and (ii) purchases and sales of foreign investments, income and expenses are converted into U.S. dollars based upon currency exchange rates prevailing on the respective dates of such transactions.

Net realized and unrealized gain (loss) on foreign currency transactions will represent: (i) foreign exchange gains and losses from the sale and holdings of foreign currencies; (ii) gains and losses from the sale of investments (applicable to fixed income securities); (iii) currency gains and losses between trade date and settlement date on investment securities transactions and forward exchange contracts; and (iv) gains and losses from the difference between amounts of dividends and interest recorded and the amounts actually received.

**F. Segregation Transactions** — The Fund may enter into certain derivative transactions to seek to increase total return. Forward foreign currency exchange contracts, futures contracts, written options, mortgage dollar rolls, when-issued securities and forward commitments represent examples of such transactions. As a result of entering into these transactions, the Fund is required to segregate liquid assets on the accounting records equal to or greater than the market value of the corresponding transactions.

**G. Forward Sales Contracts** — The Fund may enter into forward security sales of mortgage-backed securities in which the Fund sells securities in the current month for delivery of securities defined by pool stipulated characteristics on a specified future date. The value of the contract is recorded as a liability on the Fund's records with the difference between its market value and cash proceeds received being recorded as an unrealized gain or loss. Gains or losses are realized upon delivery of the security sold.

**H. Repurchase Agreements** — Repurchase agreements involve the purchase of securities subject to the seller's agreement to repurchase them at a mutually agreed upon date and price. During the term of a repurchase agreement, the value of the collateral, including accrued interest, is required to equal or exceed the value of the repurchase agreement, including accrued interest. The collateral for all repurchase agreements are held in safekeeping at the Fund's custodian or designated subcustodians.

# Notes to Financial Statements (continued)

August 31, 2002

## 3. AGREEMENTS

Pursuant to the Investment Management Agreement (the “Agreement”), Goldman Sachs Asset Management, (“GSAM”), a business unit of the Investment Management Division of Goldman, Sachs & Co. (“Goldman Sachs”), serves as the investment adviser to the Fund. Under the Agreement, the adviser, subject to the general supervision of the Trust’s Board of Trustees, manages the Fund’s portfolio. As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administering the Fund’s business affairs, including providing facilities, the adviser is entitled to a fee, computed daily and payable monthly, at an annual rate equal to 0.65% of the average daily net assets of the Fund.

The adviser has voluntarily agreed to limit certain “Other Expenses” of the Fund (excluding Management fees, Distribution and Service fees, Transfer Agent fees, taxes, interest, brokerage, litigation, Service Share fees, indemnification costs and other extraordinary expenses) to the extent such expenses exceed, on an annual basis, 0.06% of the average daily net assets of the Fund. For the year ended August 31, 2002, Goldman Sachs has agreed to reimburse approximately \$316,000. In addition, the Fund has entered into certain offset arrangements with the custodian resulting in a reduction in the Fund’s expenses. For the year ended August 31, 2002, custody fees were reduced by approximately \$1,000.

The Trust, on behalf of the Fund, has adopted Distribution and Service Plans. Under the Distribution and Service Plans, Goldman Sachs and/or authorized dealers are entitled to a monthly fee from the Fund for distribution and shareholder maintenance services equal, on an annual basis, to 0.25%, 1.00% and 1.00% of the Fund’s average daily net assets attributable to Class A, Class B and Class C Shares, respectively.

Goldman Sachs serves as the distributor of shares of the Fund pursuant to a Distribution Agreement. Goldman Sachs may retain a portion of the Class A sales load and Class B and Class C contingent deferred sales charges. During the year ended August 31, 2002, Goldman Sachs has advised the Fund that it retained approximately \$61,000 and \$200, respectively, for Class A and Class B Shares.

Goldman Sachs also serves as the transfer agent of the Fund for a fee. The fees charged for such transfer agency services are calculated daily and payable monthly at an annual rate as follows: 0.19% of the average daily net assets for Class A, Class B and Class C Shares and 0.04% of the average daily net assets for Institutional and Service Shares.

The Trust, on behalf of the Fund, has adopted a Service Plan and Shareholder Administration Plan. These plans allow for Service Shares to compensate service organizations for providing varying levels of personal and account administration and shareholder administration services to their customers who are beneficial owners of such shares. The Service Plan and Shareholder Administration Plan provide for compensation to the service organizations in an amount up to 0.25% and 0.25% respectively, (on an annualized basis), of the average daily net asset value of the Service Shares.

As of August 31, 2002, the amounts owed to affiliates were approximately \$72,000, \$46,000 and \$21,000 for Management, Distribution and Service, and Transfer Agent fees, respectively.

## 4. PORTFOLIO SECURITIES TRANSACTIONS

The cost of purchases and proceeds from sales and maturities of securities (excluding short-term investments and futures transactions) for the year ended August 31, 2002 were \$231,768,833 and \$235,585,024, respectively. Included in these amounts are the cost of purchases and proceeds of sales and maturities of U.S. Government and agency obligations in the amounts of \$164,961,884 and \$166,066,867, respectively. For the year ended August 31, 2002, Goldman Sachs earned approximately \$21,000 of brokerage commissions from portfolio transactions, including futures transactions executed on behalf of the Fund.

**Forward Foreign Currency Exchange Contracts** — The Fund may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date as a hedge or cross-hedge against either specific transactions or portfolio positions. The Fund may also purchase and sell such contracts to seek to increase total return. All commitments are “marked-to-market” daily at the applicable translation rates and any resulting unrealized gains or losses are recorded in the Fund’s financial statements. The Fund realizes gains or losses at the time a

**4. PORTFOLIO SECURITIES TRANSACTIONS (continued)**

forward contract is offset by entry into a closing transaction or extinguished by delivery of the currency. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

At August 31, 2002, the Fund had outstanding forward foreign exchange contracts to sell foreign currencies as follows:

Open Forward Foreign Currency Sale Contracts	Value on Settlement Date	Current Value	Unrealized Loss
Euro expiring 9/25/2002	\$183,957	\$184,051	\$94

The contractual amounts of forward foreign currency contracts do not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related and offsetting transactions are considered. At August 31, 2002, the Fund had sufficient cash and securities to cover any commitments under these contracts.

**Option Accounting Principles** — When the Fund writes call or put options, an amount equal to the premium received is recorded as an asset and as an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a written option expires on its stipulated expiration date or the Fund enters into a closing purchase transaction, the Fund realizes a gain or loss without regard to any unrealized gain or loss on the underlying security and the liability related to such option is extinguished. When a written call option is exercised, the Fund realizes a gain or loss from the sale of the underlying security, and the proceeds of the sale are increased by the premium originally received. When a written put option is exercised, the amount of the premium originally received will reduce the cost of the security which the Fund purchases upon exercise. There is a risk of loss from a change in value of such options which may exceed the related premiums received.

Upon the purchase of a call option or a protective put option by the Fund, the premium paid is recorded as an investment and subsequently marked-to-market to reflect the current market value of the option. If an option which the Fund has purchased expires on the stipulated expiration date, the Fund will realize a loss in the amount of the cost of the option. If the Fund enters into a closing sale transaction, the Fund will realize a gain or loss, depending on whether the sale proceeds for the closing sale transaction are greater or less than the cost of the option. If the Fund exercises a purchased put option, the Fund will realize a gain or loss from the sale of the underlying security, and the proceeds from such sale will be decreased by the premium originally paid. If the Fund exercises a purchased call option, the cost of the security which the Fund purchases upon exercise will be increased by the premium originally paid.

At August 31, 2002, the Fund did not have any written call options.

**Futures Contracts** — The Fund may enter into futures transactions to hedge against changes in interest rates, securities prices, currency exchange rates or to seek to increase total return. Futures contracts are valued at the last settlement price at the end of each day on the board of trade or exchange upon which they are traded. Upon entering into a futures contract, the Fund is required to deposit with a broker or the Fund's custodian bank an amount of cash or securities equal to the minimum "initial margin" requirement of the associated futures exchange. Subsequent payments for futures contracts ("variation margin") are paid or received by the Fund daily depending on the daily fluctuations in the value of the contracts, and are recorded for financial reporting purposes as unrealized gains or losses. When contracts are closed, the Fund realizes a gain or loss which is reported in the Statement of Operations.

The use of futures contracts involve, to varying degrees, elements of market risk which may exceed the amounts recognized in the Statement of Assets and Liabilities. Changes in the value of the futures contract may not directly correlate with changes in the value of the underlying securities. This risk may decrease the effectiveness of the Fund's hedging strategies and potentially result in a loss.

			\$12,783,567	\$(1,303,799)

## 5. SECURITIES LENDING

Pursuant to an exemptive relief granted by the Securities and Exchange Commission (“SEC”) and the terms and conditions contained therein, the Fund may lend its securities through its securities lending agent, Boston Global Advisers (BGA) — a wholly owned subsidiary of Goldman Sachs, to certain qualified borrowers including Goldman Sachs. The loans are collateralized at all times with cash and/or securities with a market value at least equal to the securities on loan. As with other extensions of credit, the Fund bears the risk of delay on recovery or loss of rights in the collateral should the borrower of the securities fail financially.

Both the Fund and BGA receive compensation relating to the lending of the Fund’s securities. The amount earned by the Fund for the year ended August 31, 2002 is reported parenthetically on the Statement of Operations. A portion of this amount (\$66) represents compensation earned by the Fund from lending its securities to Goldman Sachs. For the year ended August 31, 2002, BGA earned approximately \$12 in fees earned as securities lending agent. The Fund invests the cash collateral received in connection with securities lending transactions in the Enhanced Portfolio of Boston Global Investment Trust, a Delaware Business Trust. The Enhanced Portfolio is exempt from registration under Section 3(c)(7) of the Investment Company Act of 1940 and is managed by GSAM. The Enhanced Portfolio invests in high quality money market instruments. The Fund bears the risk of incurring a loss from the investment of cash collateral due to either credit or market factors. While there was lending activity during the year ended August 31, 2002, there were no loans outstanding as of August 31, 2002.

## 6. LINE OF CREDIT FACILITY

The Fund participates in a \$350,000,000 committed, unsecured revolving line of credit facility. Under the most restrictive arrangement, the Fund must own securities having a market value in excess of 400% of the total bank borrowings. This facility is to be used solely for temporary or emergency purposes. The interest rate on borrowings is based on the federal funds rate. This facility also requires the Fund to pay a fee based on the amount of the commitment which has not been utilized. During the year ended August 31, 2002, the Fund did not have any borrowings under this facility.

## 7. JOINT REPURCHASE AGREEMENT ACCOUNT

The Fund, together with other registered investment companies having management agreements with GSAM or its affiliates, transfers uninvested cash into joint accounts, the daily aggregate balance of which is invested in one or more repurchase agreements.

At August 31, 2002, the Fund had an undivided interest in the repurchase agreements in Joint Account II which equaled \$10,400,000 in principal amount. At August 31, 2002, the following repurchase agreements held in this Joint Account were fully collateralized by Federal Agency obligations:

Repurchase Agreements	Principal Amount	Interest Rate	Maturity Date	Maturity Value
Bank of America	\$ 1,000,000,000	1.90%	09/03/2002	\$ 1,000,211,111

# Notes to Financial Statements (continued)

August 31, 2002

## 8. ADDITIONAL TAX INFORMATION

The tax character of distributions paid during the fiscal year ended August 31, 2002 was as follows:

Distributions paid from:	
Ordinary Income	\$ 3,793,352
Net long-term capital gains	—
Total taxable distributions	\$ 3,793,352
Tax return of capital	\$ —

As of August 31, 2002, the components of accumulated earnings (losses) on a tax basis were as follows:

Undistributed ordinary income — net	\$ 492,646
Undistributed long-term capital gains	—
Total undistributed earnings	\$ 492,646
Capital loss carryforward	(6,796,931)
Timing differences (post October losses)	(9,637,104)
Unrealized losses — net	(1,176,412)
Total accumulated earnings (losses) — net	\$ (17,117,801)
Capital loss carryforward years of expiration	2009-2010

At August 31, 2002, the Fund's aggregate security unrealized gains and losses based on a cost for U.S. federal income tax purposes were as follows:

Tax Cost	\$134,903,436
Gross unrealized gain	9,194,643
Gross unrealized loss	(10,370,725)
Net unrealized security loss	\$ (1,176,082)

The difference between book-basis and tax-basis unrealized gains (losses) is primarily attributable to wash sales and differing treatment of the accrual of market discount.

## 9. CERTAIN RECLASSIFICATIONS

In order to present the capital accounts on a tax basis, the Fund reclassified \$225,257 from accumulated net realized loss on investments to accumulated undistributed net investment income. This reclassification has no impact on the net asset value of the Fund. Reclassifications result primarily from the difference in the tax treatment of foreign currency, paydown losses, market discounts and market premiums.

(a) Assumes investment at the net asset value at the beginning of the period, reinvestment of all dividends and distributions, a complete redemption of the investment at the net asset value at the end of the period and no sales or redemption charges. Total return would be reduced if a sales or redemption charge were taken into account. Total returns for periods less than one full year are not annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

(b) Annualized.

(c) Calculated based on average shares outstanding methodology.

(d) Includes the effect of mortgage dollar roll transactions.

(e) As required, effective September 1, 2001, the Portfolio has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium and discount on all debt securities and reclassifying all payoff losses to income. The effect of this change for the year ended August 31, 2002 was to decrease net investment income per share by \$0.02, increase net realized gains and losses per share by \$0.02, and decrease the ratio of net investment income to average net assets by 0.14%. Per share ratios and supplemental data for periods prior to September 1, 2001 have not been restated to reflect this change in presentation.

# Report of Independent Accountants

To the Shareholders and Board of Trustees of  
Goldman Sachs Trust — Balanced Fund:

In our opinion, the accompanying statement of assets and liabilities, including the statement of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Goldman Sachs Balanced Fund (hereafter referred to as the “Fund”), one of the portfolios constituting Goldman Sachs Trust, at August 31, 2002, the results of its operations and the changes in its net assets for each of the periods indicated and the financial highlights for each of the three years in the periods then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as “financial statements”) are the responsibility of the Fund’s management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at August 31, 2002 by correspondence with the custodian and brokers, provides a reasonable basis for our opinion. The financial highlights of the Fund for the periods ended prior to August 31, 2000 were audited by other independent accountants whose report dated October 8, 1999 expressed an unqualified opinion thereon.

PricewaterhouseCoopers LLP

Boston, Massachusetts  
October 21, 2002

\* These persons are considered to be “Interested Trustees” because they hold positions with Goldman Sachs and own securities issued by The Goldman Sachs Group, Inc. Each Interested Trustee holds comparable positions with certain other companies of which Goldman Sachs, GSAMI or an affiliate thereof is the investment adviser, administrator and/or distributor.

<sup>1</sup> Each Trustee may be contacted by writing to the Trustee, c/o Goldman Sachs Asset Management, 32 Old Slip, New York, New York, 10005, Attn: Howard B. Surloff.

<sup>2</sup> The Trust is a successor to a Massachusetts business trust that was combined with the Trust on April 30, 1997.

<sup>3</sup> Each Trustee holds office for an indefinite term until the earliest of: (a) the election of his or her successor; (b) the date the Trustee resigns or is removed by the Board of Trustees or shareholders, in accordance with the Trust’s Declaration of Trust; (c) in accordance with the current resolutions of the Board of Trustees (which may be changed by the Trustees without shareholder vote) the date the Trustee attains the age of 72 years; or (d) the Trust terminates.

<sup>4</sup> The Goldman Sachs Mutual Fund Complex consists of the Trust and Goldman Sachs Variable Insurance Trust. As of August 31, 2002, the Trust consisted of 59 portfolios, including the Funds described in the Additional Statement, and Goldman Sachs Variable Insurance Trust consisted of 6 portfolios.

<sup>5</sup> This column includes only directorships of companies required to report to the SEC under the Securities Exchange Act of 1934 (i.e., “public companies”) or other investment companies registered under the Act.

Additional information about the Trustees is available in the Funds’ Statement of Additional Information which can be obtained from Goldman Sachs free of charge by calling this toll-free number (in the United States): 1-800-292-4726.
