POWERCOLD CORPORATION
CONDENSED NOTES TO CONSOLIDATED
INTERIM FINANCIAL STATEMENTS
JUNE 30, 2003

NOTE 1 –BASIS OF PRESENTATION

The foregoing unaudited consolidated interim financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q as promulgated by the Securities and Exchange Commission. Accordingly, these financial statements do not include all of the disclosures required by generally accepted accounting principles for complete financial statements. These unaudited consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the period ended December 31, 2002. In the opinion of management, the unaudited consolidated interim financial statements furnished herein include all adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim period presented.

The preparation of financial statements in accordance with generally accepted accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of the Company's financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions that could have a material effect on the reported amounts of the Company's financial position and results of operations.

Operating results for the six-month ended June 30, 2003 are not necessarily indicative of the results that may be expected for the year ending December 31, 2003.

GOING CONCERN UNCERTAINTY

These financial statements have been prepared on a going concern basis, which contemplated the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has incurred recurring losses and at December 31, 2002 had an accumulated deficit of \$13,425,384. For the three months and six months ended June 30, 2003, the Company sustained a net loss of \$184,286 and \$566,633 respectively. These factors, among others, indicate that the Company may be unable to continue as a going concern for a reasonable period of time. These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that may be necessary should the Company be unable to continue as a going concern. The Company's continuation as a going concern is contingent upon its ability to obtain additional financing, and to generate revenue and cash flow to meet its obligations on a timely basis.

POWERCOLD CORPORATION
CONDENSED NOTES TO CONSOLIDATED
INTERIM FINANCIAL STATEMENTS
JUNE 30, 2003

NOTE 2 – THE COMPANY

PowerCold Corporation, formerly International Cryogenic Systems Corporation, (“the Company”), was incorporated on October 7, 1987 in the State of Nevada. PowerCold is a solution provider of energy efficient products for the refrigeration, air conditioning and power industries. The Company operates across many market sectors, from large industrial food processors to small commercial air conditioning systems. The Company develops, manufactures and markets proprietary equipment to achieve significant electric power cost savings for commercial and industrial firms. PowerCold's energy efficient and environmentally safe products are designed to reduce power costs for air conditioning, refrigeration and on-site building power.

The Company derives its revenues from three principal product line applications. The first is a line of evaporative condensers and heat exchange systems for the HVAC and refrigeration industry. The second is the design and production of unique chiller systems for the HVAC and refrigeration industry. The third is proprietary applications for the HVAC industry, including, patented four pipe integrated piping system for large commercial buildings and turnkey HVAC systems for light commercial national chain store applications.

Effective August 1, 2002, PowerCold Corporation acquired 100% of the assets of Applied Building Technology, Inc. (“ABT”), a St. Petersburg, Florida based supplier of complete standardized heating, ventilation and air conditioning packages for standard-sized commercial buildings. ABT’s assets are being transferred into PowerCold’s wholly owned subsidiary, Ultimate Comfort Systems.

On December 1, 2001, Powercold acquired all of the common stock of Power Sources, Inc., (hereinafter “PSI”), a newly formed entity engaged in the development and marketing of cogeneration systems technology. During the year ended December 31, 2002, the Company disposed of PSI.

On December 1, 2000, the Company acquired the assets of Ultimate Comfort Systems, Inc., including its technology rights, patent rights (U.S. Patent No. 5,183,102), and license agreement for integrated piping technology for a heating and air conditioning system. This acquisition gave the Company exclusive, non-transferable United States transfer rights to the aforementioned technology and all related assets. This technology was then placed into a newly formed, wholly owned subsidiary of the Company, Ultimate Comfort Systems.

The Company formed Alturdyne Energy Systems, Inc. in September 1999 to support the natural gas engine driven water chiller business. Subsequent to its formation, the entity has been essentially dormant. It was dissolved in June 2002.

On May 18, 1998, the Company incorporated a wholly owned subsidiary, Channel Freeze Technologies, Inc., (“CFTI”) to acquire intellectual property rights of Channel Ice Technologies. During the year ended December 31, 2002, the Company disposed of CFTI.

POWERCOLD CORPORATION
CONDENSED NOTES TO CONSOLIDATED
INTERIM FINANCIAL STATEMENTS
JUNE 30, 2003

NOTE 2 – THE COMPANY (CONTINUED)

On August 4, 1995, the Company acquired Nauticon, Inc., including its related technology and assets for 900,000 shares and 300,000 options (expired July 31, 2000) of the Company's stock. The assets currently include U.S. Patent No. 5,501,269 issued on March 26, 1996, and entitled Condenser Unit, and U.S. Patent No. 5,787,722 issued August 4, 1998, and entitled Heat Exchange Unit. During the year ended December 31, 2002, Nauticon's assets, liabilities and operations were absorbed into PowerCold Products, Inc., the Company's wholly owned subsidiary.

On December 28, 1992, the Company acquired the patent rights (U.S. Patent No. 5,501,269) and related engineering and technology to a process of quick-freezing food products, and cleaning and treating various nonfood products. This process is accomplished by using a circulating cryogenic liquid in a closed pressurized vessel system. 2,414,083 shares of the Company's common stock was issued for the patent acquisition. Two directors of the Company were also directors of the company selling the patent rights.

The financial statements for prior periods have been restated for the disposition of CFTI and PSI.

NOTE 3—FORGIVENESS OF DEBT

During the quarter ended June 30, 2003 the Company reduced its accounts payable by \$196,324, and commission expense by \$41,205, which are recorded in the accompanying financial statements as forgiveness of debt. This accounts payable debt was originally incurred prior to 1996, by one of the former subsidiaries of the Company. The Company has made every effort to contact the creditors of its former subsidiary, in order to establish payment plans. The amount recorded as forgiveness of debt represents the amount owing to creditors who could not be located, or did not respond to the Company's inquiries. If the Company is contacted by any of the creditors of its former subsidiary, regarding legitimate amounts payable, the Company will reinstate the liability at that time. Since the Company has made every effort to locate the creditors, and has been unsuccessful in this effort, the chances that any of these amounts will ever become payable is remote, and therefore they are not being recorded as contingencies in the accompanying financial statements.

NOTE 4 – ACCOUNTS RECEIVABLE AND ACCOUNTS PAYABLE

During the six months ended June 30, 2003, the Company experienced a major increase in sales. This increase resulted in increases in accounts receivable, due to the granting of credit on sales and accounts payable, due to the increase in cost of goods sold. The accounts receivable recorded in the accompanying financial statements are considered, by management, to be substantially collectible, and no allowance for doubtful accounts has been recorded.

NOTE 5 – COMMON STOCK

During the six months ended June 30, 2003 the company issued 2,150,000 shares of common stock for cash of \$1,975,000 and 185,800 shares of common stock for services valued at \$145,800.

POWERCOLD CORPORATION AND SUSIDIARIES
FORM 10-Q
June 30, 2003

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Forward looking statements made herein are based on current expectations of the Company that involves a number of risks and uncertainties and should not be considered as guarantees of future performance. These statements are made under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. The factors that could cause actual results to differ materially include; interruptions or cancellation of existing contracts, impact of competitive products and pricing, product demand and market acceptance risks, the presence of competitors with greater financial resources than the Company, product development and commercialization risks and an inability to arrange additional debt or equity financing.

GENERAL FINANCIAL ACTIVITY

PowerCold Corporation operations include two wholly owned subsidiary companies with respective operating divisions. PowerCold Products, Inc., supporting all "Cold" related products, and PowerCold Energy Systems, a division that supports all "Power" related products. PowerCold ComfortAir Solutions, Inc. (previous name was Ultimate Comfort Systems, Inc.), supporting unique, proprietary applications for heating, ventilating and air conditioning systems (HVAC), and Applied Building Technology, a division that supports related design and engineering. Technicold Services, Inc, another wholly owned company, provides engineering consulting services to the air condition, refrigeration and power industries.

PowerCold Products, Inc. – designs, manufactures and markets a proprietary product line of patented evaporative condensers and heat exchange systems for the heating, ventilation and air condition (HVAC) and refrigeration industry. PowerCold Products supports the Company's Nautico® and EV Chill™ product lines by engineering design, manufacturing and packaging its products. PowerCold Products also supports custom refrigeration systems by engineering, designing and packaging special customer orders. There are proposed alliances with other refrigeration companies, whereas PowerCold Products will package various components adding value for a total turnkey air condition or refrigeration system.

The Nauticon® patented products are innovative in design, use new material technology, are simple to manufacture, and have a low operating cost. They are used for evaporative condensers, fluid coolers, sub-coolers commercial and industrial refrigeration system components, liquid recalculation packages and custom refrigeration products for commercial and industrial use. Nauticon® products can reduce power cost in the air condition and refrigeration industry by up to 40% making these units contribute to the utilities' needs to reduce power demand. PowerCold® has continued to invest and improve the Nauticon® product line over the last two years. During 2002 the Nauticon® product line was greatly expanded with the addition of new products ranging from a single 40-ton evaporative condenser to a single 100-ton unit. The company filed for another patent (third Nauticon patent) on the new 5Ft unit.

The Chiller line of products includes: EV-Chill™: water chillers, namely, water chilling and refrigeration systems utilizing water evaporative condensers for commercial and industrial use; EV-Cool™: air conditioning units utilizing evaporative condensers for commercial and industrial use; EV-Dry™: dehumidification system utilizing evaporative fluid coolers to cool warm dry air for commercial and industrial use; EV-Frig™: refrigeration condensing units utilizing evaporative condensers for commercial and industrial use.

POWERCOLD CORPORATION AND SUSIDIARIES
FORM 10-Q
June 30, 2003

PowerCold Energy Systems - The Company originally formed Alturdyne Energy Systems to support its natural gas engine driven chillers and its rotary engine business. The name was changed to PowerCold Energy Systems in November 2002. The Company signed a letter of intent in March 2002 to acquire Alturdyne, Inc., a privately owned company that produces natural gas engine driven chillers and custom generator packages. In September 2002, the Company withdrew its acquisition offer and acquired an exclusive license from Alturdyne to manufacture, package, market, develop and use technology and licensed intellectual property natural gas engine driven chillers and the natural gas rotary engine gen-set for a period not to exceed ten years. The Company paid Alturdyne \$400,000 as a prepayment against the first \$8,000,000 in royalty payments as part of an exclusive license.

The industry is demanding self-powered units for combined heat and power (CHP). The technology and intellectual property licenses granted to us by Alturdyne significantly enhance our ability to offer customers complete packaged solutions for their HVAC and power generation needs. Alturdyne's engine driven chillers include standard and custom packaging of natural gas, electric and diesel-fueled engine driven chillers used for HVAC system applications. The licenses for rotary engine generator sets include a family of Wankel and Mazda type rotary internal combustion multi-rotor engines used for pumps, generator, compressors, and auxiliary power units and applications.

PowerCold ComfortAir Solutions, Inc. - On December 1, 2000, the Company acquired the technology rights, patent rights, and license agreement for integrated piping technology for a heating and air conditioning system. This technology was then placed into a newly formed wholly owned subsidiary of the Company, previously called Ultimate Comfort Systems, Inc. This acquisition gave the Company exclusive, non-transferable United States transfer rights to the technology and all related assets. During 2001 and 2002 the Company invested over \$750,000 supporting engineering and marketing programs for major hotel projects. The company expects that PowerCold ComfortAir Solutions will generate major growth in revenue and profits for this unique proprietary application, which save up to 40% in energy costs.

Applied Building Technology - In August 2002, the Company acquired all the assets of Applied Building Technology, a supplier of complete standardized heating, ventilation and air conditioning packages for standardized commercial buildings. This new acquisition gives the Company a major entrée into the vast market for small commercial HVAC systems for national chain accounts. Increasing power costs and new clean air regulations have forced corporations with chain store operations to focus on energy savings and cleaner air.

The company has recently introduced two new applications to support the national chain store business: The BreezeMaster™ system, designed for use by large chain retail and fast food stores, is a closed loop cooler that prevents moisture buildup that can lead to legionella and other respiratory diseases associated with standard evaporative condensers. This is a critical application for the high volume 10 to 30 ton commercial rooftop unit market where small footprint, weight and height are an issue. The other application is a new proprietary DesertMaster™ total energy fresh air system. The system uses cool or warm exhaust air being circulated out of a building to cool or heat incoming outside fresh air. The desiccant section is then used to remove the moisture from all the public spaces, 24 hours per day seven days per week. The DesertMaster is highly energy efficient, eliminating the need for approximately 20% of additional air conditioning equipment.

The Company recently received formal Certificate of Registrations from The U.S. Patent and Trademark Office for both PowerCold® and Nauticon®. The Company recently applied for Registered trademarks for BreezeMaster™ and DesertMaster™.

POWERCOLD CORPORATION AND SUSIDIARIES
FORM 10-Q
June 30, 2003

RESULTS OF OPERATIONS:

The Company's Consolidated Statement of Operations for the second quarter ended June 30, 2003 compared to the second quarter ended June 30, 2002:

Total Revenue for the three-month period ended June 30, 2003 increased 330% to \$2,138,976 from \$495,740 for the same quarter the prior year, and for the six-month period ended June 30, 2003 increased 284% to \$3,251,310 from \$846,490 for the same period the prior year. Second quarter 2003 revenue of \$2,138,976 exceeded first quarter 2003 revenue of \$1,112,334, an increase of 92%.

Operating Loss for the three-month period ended June 30, 2003 decreased 38% to (\$420,881) from (\$677,682) for the same quarter the prior year, and for the six-month period ended June 30, 2003 decreased 47% to (\$803,154) from (\$1,511,185) for the same period the prior year.

Net Operating Losses from continuing operations included one-time charges of \$180,575 and a one-time forgiveness of debt of \$237,529. It is expected that quarter operating losses will continue to decline as revenue increases and operating expenses remain the same. PowerCold ComfortAir Solutions second quarter 2003 net profit increased 197% to \$163,135 or 7.97% compared to \$54,864 or 5.3% for the first quarter 2003.

Net Loss for the three-month period ended June 30, 2003 decreased 73% to (\$184,246) from (\$678,597) for the same quarter the prior year, and for the six-month period ended June 30, 2003 decreased 62% to (\$566,633) from (\$1,508,698) for the same period the prior year.

Net Loss Per Share for the three-month period ended June 30, 2003 decreased to (\$0.01) from (\$0.04) for the same quarter the prior year, and for the six-month period ended June 30, 2003 decreased to (\$0.03) from (\$0.09) for the same period the prior year. Net loss per share was based on weighted average number of shares of 19,202,066 for period ended June 30, 2003.

The Company's sales and revenue continued to grow and meet managements projections.. PowerCold ComfortAir Solutions (PCS) trend of triple digit quarterly revenue growth continued, while PowerCold Products (PCP) revenue growth was in double digits. Quarter operating losses will continue to decline as revenue increases and operating expenses remain the same.

The Company's sales and revenue continued to grow and meet managements projections.. PowerCold ComfortAir Solutions (PCS) trend of triple digit quarterly revenue growth continued, while PowerCold Products (PCP) revenue growth was in double digits. PowerCold ComfortAir Solutions market for commercial HVAC systems for national chain store accounts continue to expand to (9) nine chains for engineering design for new and retrofit stores. PCS has generated over \$5 million in new engineering design proposals for its hotel business and extended care facilities. PowerCold Products sales and backlog continue to grow, as demand for evaporative condensers continue to expand worldwide. PCP has generated new sales orders overseas and has generated over \$1.2 million in proposals for its Nauticon® product line.

Manufacturing process continued to improve during the first quarter producing modules of product build for final assemble. Profit margins will continue to improve, as sale volume increases, and material and direct labor cost decrease. PowerCold ComfortAir Solutions operating profits exceeded the first quarter and are expected to continually increase hereafter.

A new patent (third Nauticon® patent) was filed last quarter 2002 for an enhanced evaporative condenser. Management believes that the added time and development cost spent in 2002 was justified and will greatly improve revenues and profits hereafter for the Company's Nauticon® product line.

POWERCOLD CORPORATION AND SUSIDIARIES
FORM 10-Q
June 30, 2003

Operating expenses remained nearly the same and loss from operations decreased 38% for the second quarter compared to the prior year. PowerCold ComfortAir Solutions second quarter operating expenses increased from the first quarter 2003 because of the addition of new employees and the move to new facilities in Largo, Florida. Loss from continuing operations was reduced to (\$184,246) from (\$678,597) from the prior year because of higher revenues, tighter management controls relating to general and administrative, aggressive cost reduction and debt reduction of old accounts payable. The quarter included a one-time write-off of \$237,529 resulting in a Net Loss of (\$184,246). The loss for the quarter was \$494,351 less than the same period last year. Cost reductions were also led by reductions in R & D expenditures, as the product development has nearly been completed for the new Nauticon® product line. The Company continues the progression from R & D stage to the production and sales stages for several new products, as shown by a shift in costs.

The Company's Consolidated Balance Sheet as of the second quarter ended June 30, 2003 compared to year ending December 31, 2002.

Total current assets increased to \$3,812,967 for the second quarter ended June 30, 2003 compared to \$573,859 for the year ending December 31, 2002. Total assets increased to \$4,862,243 for the second quarter ended June 30, 2003 compared to \$1,695,199 for the year ending December 31, 2002. Total liabilities increased to \$2,417,590 for the second quarter ended June 30, 2003 compared to \$635,061 for the year ending December 31, 2002. Total stockholders' equity increased to \$2,316,321 for the second quarter ended June 30, 2003 compared to \$781,635 for the year ending December 31, 2002.

The increase in assets and liabilities was mainly due to the rise of accounts receivable and accounts payable at the end of the second quarter. Commitments and contingencies reduced to \$128,332 from \$277,903 are from old outstanding accounts payable from previous subsidiary companies.

During the six months ended June 30, 2003, the Company experienced a major increase in sales. This increase resulted in increases in accounts receivable, due to the granting of credit on sales and accounts payable, due to the increase in cost of goods sold. The accounts receivable recorded in the accompanying financial statements are considered, by management, to be substantially collectible, and no allowance for doubtful accounts has been recorded.

During the quarter ended June 30, 2003 the company issued 1,575,800 shares of common stock for a private placement of \$1,550,000 cash and \$25,800 for services rendered.

Liquidity and Capital Resources: At June 30, 2003, the Company's working capital increased to \$1,395,377 from a negative position at December 31, 2002. The financial condition of the corporation continued to improve during the second quarter. Inventory movement increased slightly but controlled, as the demand for product increased. Purchasing agreements with suppliers, coupled with the use of common parts throughout the product lines should allow a continued controlled reduction in inventory levels and product cost reduction.

Status of Operations: Management intends to continue to utilize and develop the intangible assets of the Company. At June 30, 2003, intangible assets comprised less than 20% of the Company's assets. The recovery of these intangible assets is dependent upon achieving profitable operations. It is Management's opinion that the Company's cash flow generated from current intangible assets is not impaired, and that recovery of its intangible assets, upon which profitable operations will be based, will occur. Management believes that its working capital is currently sufficient to support its growth plans for the third quarter of 2003, but may need seek additional funding and/or a line of credit to support the Company's major growth projections.

POWERCOLD CORPORATION AND SUSIDIARIES
FORM 10-Q
June 30, 2003

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The company, at the present time, has no exposure to market risk sensitive instruments entered into for trading purposes and instruments related to interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market risks, such as equity price risk.

ITEM 4. CONTROLS AND PROCEDURES

QUARTERLY EVALUATION OF THE COMPANY'S DISCLOSURE CONTROLS AND INTERNAL CONTROLS.

Within the 90 days prior to the date of this Quarterly Report on Form 10-Q, the Company evaluated the effectiveness of the design and operation of its "disclosure controls and procedures" (Disclosure Controls), and its "internal controls and procedures for financial reporting" (Internal Controls). This evaluation (the Controls Evaluation) was done under the supervision and with the participation of management, including our Chief Executive Officer (CEO). Rules adopted by the SEC require that in this section of the Quarterly Report we present the conclusions of the CEO about the effectiveness of our Disclosure Controls and Internal Controls based on and as of the date of the Controls Evaluation.

CEO CERTIFICATIONS.

Appearing immediately following the Signatures section of this Quarterly Report there are two separate forms of "Certifications" of the CEO. The second form of Certification is required in accord with Section 302 of the Sarbanes-Oxley Act of 2002 (the Section 302 Certification). This section of the Quarterly Report, which you are currently reading is the information concerning the Controls Evaluation referred to in the Section 302 Certifications and this information should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

POWERCOLD CORPORATION AND SUSIDIARIES
FORM 10-Q
June 30, 2003

DISCLOSURE CONTROLS AND INTERNAL CONTROLS.

Disclosure Controls are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934 (Exchange Act), such as this Quarterly Report, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's (SEC) rules and forms. Disclosure Controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the CEO, as appropriate to allow timely decisions regarding required disclosure. Internal Controls are procedures which are designed with the objective of providing reasonable assurance that (1) our transactions are properly authorized; (2) our assets are safeguarded against unauthorized or improper use; and (3) our transactions are properly recorded and reported, all to permit the preparation of our financial statements in conformity with generally accepted accounting principles.

LIMITATIONS ON THE EFFECTIVENESS OF CONTROLS.

The Company's management, including the CEO, does not expect that our Disclosure Controls or our Internal Controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed achieving its stated goals under all potential future conditions; over time, control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

SCOPE OF THE CONTROLS EVALUATION.

The CEO evaluation of our Disclosure Controls and our Internal Controls included a review of the controls' objectives and design, the controls' implementation by the Company and the effect of the controls on the information generated for use in this Quarterly Report. In the course of the Controls Evaluation, we sought to identify data errors, controls problems or acts of fraud and to confirm that appropriate corrective action, including process improvements, were being undertaken. This type of evaluation will be done on a quarterly basis so that the conclusions concerning controls effectiveness can be reported in our Quarterly Reports on Form 10-Q and Annual Report on Form 10-K. Our Internal Controls are also evaluated on an ongoing basis by our independent auditors in connection with their audit and review activities. The overall goals of these various evaluation activities are to monitor our Disclosure Controls and our Internal Controls and to make modifications as necessary; our intent in this regard is that the Disclosure Controls and the Internal Controls will be maintained as dynamic systems that change (including with improvements and corrections) as conditions warrant.

POWERCOLD CORPORATION AND SUSIDIARIES
FORM 10-Q
June 30, 2003

Among other matters, we sought in our evaluation to determine whether there were any "significant deficiencies" or "material weaknesses" in the Company's Internal Controls, or whether the Company had identified any acts of fraud involving personnel who have a significant role in the Company's Internal Controls.

This information was important both for the Controls Evaluation generally and because items 5 and 6 in the Section 302 Certifications of the CEO require that the CEO disclose that information to our Board's Audit Committee and to our independent auditors and to report on related matters in this section of the Quarterly Report. In the professional auditing literature, "significant deficiencies" are referred to as "reportable conditions"; these are control issues that could have a significant adverse effect on the ability to record, process, summarize and report financial data in the financial statements. A "material weakness" is defined in the auditing literature as a particularly serious reportable condition where the internal control does not reduce to a relatively low level the risk that misstatements caused by error or fraud may occur in amounts that would be material in relation to the financial statements and not be detected within a timely period by employees in the normal course of performing their assigned functions. We also sought to deal with other controls matters in the Controls Evaluation, and in each case if a problem was identified, we considered what revision, improvement and/or correction to make in accord with our on-going procedures.

In accord with SEC requirements, the CEO notes that, since the date of the Controls Evaluation to the date of this Quarterly Report, there have been no significant changes in Internal Controls or in other factors that could significantly affect Internal Controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

CONCLUSIONS.

Based upon the Controls Evaluation, our CEO has concluded that, subject to the limitations noted above, our Disclosure Controls are effective to ensure that material information relating to PowerCold Corporation, Inc. and its subsidiaries is made known to management, including the CEO, particularly during the period when our periodic reports are being prepared, and that our Internal Controls are effective to provide reasonable assurance that our financial statements are fairly presented in conformity with generally accepted accounting principles

CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, Francis L. Simola, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PowerCold Corporation, Inc.;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present, in all material respects, the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. I am responsible for establishing and maintaining disclosure controls and procedures (as defined in Securities Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. I have disclosed, based on my most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

**CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of PowerCold Corporation (the "Company") on Form 10-Q for the period ended June 30, 2003, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Frank Simola, President and Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
