UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K/A-1

☒ ANNUAL REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE YEAR ENDED DECEMBER 31, 2005

or

☐ TRANSITION REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

POWERCOLD CORPORATION

(Name of small business issuer in its charter)

NEVADA

000-30709

23-2582701

(State or other jurisdiction of incorporation or organization)

Commission File No.

(I.R.S. Employer Identification Number)

PO BOX 1239, 115 Canfield Road, La Vernia, Texas

78121

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number: **830-779-5213**

Securities registered under Section 12(b) of the Exchange Act: **None**

Securities registered under Section 12(g) of the Exchange Act: **Common Stock, \$0.001 Par Value, OTC -BB**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒ [X]

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒ [X]

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed year end. **\$15,289,624. This figure is based on a closing price of \$0.70 on December 31, 2005.**

(APPLICABLE ONLY TO CORPORATE REGISTRANTS)

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date. **25,856,926 shares of Common Stock outstanding as of March 31, 2006.**

Documents Incorporated by Reference: **See index to exhibits, page 56**

SEC 1673 (3-05)

Persons who potentially are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB control number.

PART I

ITEM 1. BUSINESS

General

PowerCold Corporation, (PowerCold)® (OTCBB: PWCL), designs, develops and markets energy efficient heating, ventilating and air conditioning systems (HVAC) and energy related products for commercial use. Air conditioning and refrigeration are two of the more energy intensive operational costs many businesses face. Increasing power costs and new clean air regulations have prompted corporations of all sizes to focus both on energy savings and indoor air quality. PowerCold's proprietary energy efficient products provide a clean comfort air environment and reduce power costs for air conditioning, refrigeration and on-site building power through the use of evaporative cooling condenser technology integrated with other synergistic, energy conserving designs and equipment when compared to standard air cooled condensing refrigeration and air conditioning technology.

During 2005 PowerCold operations included four wholly owned subsidiary companies with respective operating divisions: PowerCold ComfortAir Solutions, Inc., (PCS) supports sales and marketing offering turnkey high efficiency HVAC solutions for commercial buildings, including major hotel chains, national restaurant and retail store chains, extended care facilities and office buildings. Two operating divisions of PCS include Applied Building Technology (ABT) that supports related engineering and design build HVAC applications, and PowerCold Energy Systems (PES) that supports related energy products including generators and engine driven chillers. PowerCold Products, Inc., (PCP) supports product development, engineering and manufacturing. PowerCold International, Ltd., (PCI), a new operating subsidiary company effective July 1, 2003, markets all company products and system applications worldwide through various alliances and marketing agencies. PowerCold Technology, LLC, (PCT) is a limited liability company, formed on February 22, 2004 ("PCT") to hold title to all of our intellectual property as well as licensing such intellectual property. PowerCold Technology, LLC licenses intellectual property rights to PowerCold Products, Inc. and PowerCold ComfortAir Solutions, Inc. PowerCold has also established alliances with various companies in the industry to market and manufacture related HVAC and Energy products. On December 31, 2005 PowerCold Corporation disposed of its interest in PowerCold ComfortAir Solutions, Inc. to Comfort Air Solutions, Inc., a Florida Company. Comfort Air Solutions, Inc. acquired 100% of the PowerCold Corporation's shares of PowerCold ComfortAir Solution, Inc. common stock. Comfort Air Solutions is owned by previous employees of PowerCold ComfortAir Solutions, Inc. Included in the transaction was a Technology and Trademark license agreement for Comfort Air Solutions, Inc. that will provide royalty revenue for PowerCold Corporation. Effective January 1, 2006, three of PowerCold Corporation's wholly owned subsidiaries, PowerCold Products, Inc., PowerCold International, Ltd. and PowerCold Energy Systems, Inc., have been terminated and the assets transferred to PowerCold Corporation. PowerCold Technology, LLC., which holds title to all the intellectual property and licensing rights of the Company, will remain a wholly owned subsidiary of PowerCold Corporation.

PowerCold derive its revenues from two principal product lines: The first is proprietary applications for the HVAC industry which includes a patented four pipe integrated piping system for large commercial buildings and turnkey HVAC systems for light commercial national chain store applications. The second is a line of evaporative condensers, heat exchange systems and fluid coolers for the HVAC and refrigeration industry.

The Company recently received formal Certificate of Registrations from the U.S. Patent and Trademark Office for both PowerCold® and Nauticon®. It recently applied for registered trademarks for BreezeMaster™, DesertMaster™, and PlexCoil™. PowerCold intellectual property includes four patents awarded and four additional patents pending.

Subsidiary Companies

PowerCold Products, Inc. – PowerCold Products (PCP) provides product research and development, engineering and manufacturing of patented evaporative condensers and heat exchange systems for the heating, ventilation, air condition (HVAC) and refrigeration industry. PCP supports the Company's Nauticon® and EV Chill™ product lines with engineering design, manufacturing and product packaging. PCP also supports custom refrigeration systems by designing, engineering and packaging special customer orders.

The Nauticon patented products are utilized as evaporative condensers, fluid coolers, sub-coolers, refrigeration system components, and custom refrigeration products for commercial and industrial use. Nauticon products can reduce energy cost for the air condition and refrigeration industry through the energy savings benefits of water cooled condensing when compared to standard air cooled condensing air conditioning and refrigeration systems. PowerCold has continued to invest and improve the Nauticon product line, greatly expanding its products ranging from a single 10-ton unit up to a 300-ton multiunit configuration. The company has three patents related to the Nauticon product line.

Major PowerCold Products, Inc customers constituting 5% or more of annual revenue.

2003	Shun Sheong Electrical Engineering \$129,066; 21% of revenue; ACCRA-TEMP, Inc. \$35,135; 5.66% of revenue; E-PAK Technology, \$39,510; 6.37% of revenue; Trane – Clarksville, \$44,035; 7.10%.
2004	None
2005	American Standard \$473,753; 71%

PowerCold Products operates out of facilities located in LaVernia, Texas. Effective January 1, 2004, the commercial sales of products manufactured by PowerCold Products, Inc. were sold through PowerCold ComfortAir Solutions, Inc.

During Fiscal 2005/2004/2003, sales by PowerCold Products represented about 100%, 100% and 100%, respectively, of our total revenue; with export sales representing 0%, 0% and 21% respectively.

Effective January 1, 2006 PowerCold Products, Inc was terminated and the assets transferred to PowerCold Corporation.

PowerCold International Ltd. – The Company was incorporated as a new operating subsidiary effective July 1, 2003. PowerCold International markets all company products and system applications worldwide through various alliances and marketing agencies. Agents and alliances are being organized in various countries worldwide to market and support the company's products and application systems

Effective January 1, 2006 PowerCold International, Ltd. was terminated and the assets transferred to PowerCold Corporation.

In January 2003, PowerCold announced collaboration with DuPont to test new plastic materials for air conditioning units. In May 2003, PowerCold executed a Joint Development Agreement and a License Agreement with DuPont for their Caltrel® Fluid Energy Transfer System Applications. The two companies have been testing the use of new plastic heat exchangers in air condition systems in high humidity environments. PowerCold management considers DuPont's Caltrel® polymeric materials as the most advanced technology in the industry for HVAC plastic applications. PowerCold recently applied to the U.S. patent office for a new modular design heat exchange patent that has modular and flexible design

components. During the fourth quarter of 2004 PowerCold began shipping heat exchange units manufactured with Caltrel®.

In December 2003, PowerCold announced that it developed new vertical and horizontal fan coil air handlers for use with HVAC applications in commercial buildings. Most commercial buildings use various types of copper and aluminum fan coils for air distribution. PowerCold's new fan coil will be manufactured using DuPont's Caltrel®.

The company's new PlexCoil™ fan coil design represents a very significant multi-million dollar business opportunity for new and retrofit fan coils. From the review of published industry data from sources such as Industry market surveys, Prodcon, Eurovent/Cecomaf and competitive industry market sources, PowerCold estimates the U.S. fan coil market to be over three hundred million dollars and the global fan coil market to be over one billion dollars. The United States Census Bureau report issued November 2004 for the year 2003 reported the value of shipments of Room Fan-Coil Air Conditioning units at \$128,205,000, Central Station Air Handling Units (motor driven fan type) Blow Through at \$88,980,000 and Heating and Ventilation at \$34,644,000. In addition Coil Sales by original equipment manufacturers intended for resale or assembly into equipment by other manufacturers constructed from copper and aluminum totaled \$222,763,000. European data collection published in May of 2004 for 2003 by Eurovent/Cecomaf estimates the European Fan Coil Units market at \$350,000,000 Euros and Air Diffusion Devices at \$680,000,000 Euros.

Management

The Company's management objective is to become a major force in the multi-billion dollar air conditioning and refrigeration industry providing proprietary niche products. The Company's goal is to achieve profitable growth and increase shareholder value by increasing its line of superior products and services, through evolving product enhancements and strategic alliances with related products and companies. The Company maintains Corporate Offices in La Vernia, Texas

Products

Nauticon Evaporative Condensers - The Company envisions a worldwide market demand for its proprietary evaporative condensing systems use in air conditioning systems. The Nauticon patented products are innovative in design, use new material technology, are simple to manufacture, and have a low operating cost due to the self cleaning coils that shed scale, no water treatment chemicals required, the dump flush water control saving up to 43% of the water recommended for Traditional Bleed Method in the ASHRAE 2004 "Systems and Equipment Handbook" Chapter 36.18 – 36.19 and the resulting lower maintenance needs. They are used for evaporative condensers, fluid coolers, sub-coolers, refrigeration system components and custom refrigeration products for commercial and industrial use. Nauticon products can reduce power cost in the air condition and refrigeration industry by up to 40% when used as a replacement for air cooled condensers which are typically utilized on many refrigeration and air conditioning systems smaller than 200 tons. The efficiency of water cooled condenser technology is well understood in the industry and is the preferred method in large central chiller plants reducing kW per ton of cooling for chilled water air conditioning from a typical 1.08 kW/ton at a suction temperature of 45 F and condensing temperature of 130 F for air cooled condensers to 0.67 kW/ton at a suction temperature of 45 F and condensing temperature of 95 F for evaporative (water) cooled condenser, a 38% reduction in KW demand. Capacity and power consumption is estimated from data published in the ASHRAE 2004 Handbook, HVAC Systems and Equipment Handbook, Chapter 34.6, Fig. 2 Capacity and Power-Input curves for Typical Hermetic Reciprocating Compressor. Nauticon units are free of water treatment chemicals, self-cleaning, low-maintenance evaporative condensers. Nauticon's primary advantage is energy savings, yielding EER ratings as high as 18 even as the industry, through regulation, changes to lower efficiency refrigerants. Nauticon products provide a cost effective alternative to the less energy efficient air cooled condenser typically utilized on commercial roof top refrigeration and AC units. The industry faces serious changes for the first time in years due to energy and environmental concerns worldwide.

Competition - varies from the small to the very large air condition manufactures in the industry, all competing for this multi billion-dollar industry. The Company believes that it has a truly unique product concept that serves a very wide arena of commercial applications for the national market as well as the international market. There is minimal competition from any one manufacturer within the capacity range of evaporative condensers produced by PowerCold. Marketing of the Nauticon systems is focused primarily the mid-range, 40 to 250 ton systems because there is much less competition, a great advantage to Nauticon and its unique patented product. Direct competitive systems are marketed by some of the major competitors in the industry; large systems by Evapco and BAC, smaller systems by Recold. These competitors are well established and have substantially greater financial and other resources. Based upon the internal research of our sales and marketing staff no single manufacturer has combined all the features of the patented Nauticon unit which include condensing coils that continuously shed scale without the use of water treatment chemicals, lower water usage than competitive traditional constant water bleed systems through the use of programmed cycles that dump/flush the water sump and an enclosure constructed on non-metallic, corrosion resistant, high density molded polyethylene. The Nauticon units are low maintenance as the result of the scale shedding feature, treatment chemical free sump water, dump/flush programming and corrosion resistant enclosure. The Company is very confident that its Nauticon™ products have many important advantages over competition.

- Typically less than 2-years payback on equipment from energy savings
- Environmentally friendly; no chemical treatment of the water
- Minimal maintenance expense and a desirably smaller footprint
- No heat transfer coil fins to deteriorate in the harsh sea air environment
- Longer operating life supported by a corrosion resistant casing of high density polyethylene
- 40% less water used than with a typical evaporative condenser utilizing continuous water bleed
- High efficiency resulting in power demand reduction
- Higher efficiency results in greater cooling capacity as compared to air cooled condensers

EV Chiller Systems – PowerCold Products designs and markets custom chiller systems utilizing the Nauticon evaporative condensers (EV Chillers). Four chiller systems are made available that meet a wide variety of industry requirements for HVAC and refrigeration system installations. EV-Chill: water chilling and refrigeration systems utilizing water evaporative condensers for commercial and industrial use. EV-Cool: air conditioning units utilizing evaporative condensers for commercial and industrial use. EV-Dry: dehumidification system utilizing evaporative fluid coolers to cool warm dry air for commercial and industrial use. EV-Frig: refrigeration condensing units utilizing evaporative condensers for commercial and industrial use.

Competition - varies from the small to the very large air condition manufactures in the industry, all competing for this multi billion-dollar industry. Significant industry vendor's, including the large manufacturers such as Carrier, Trans and York, are well established and have substantially greater financial and other resource, but none has the all the specific patented features of the Nauticon unit incorporated into their chiller packages.

HVAC Systems – PowerCold owns the exclusive U.S. technology rights for an integrated piping technology system for heating, ventilating and air conditioning systems (HVAC). The unique feature of the patented HVAC system is the use of the existing pipes, as the delivery system, to provide hot and chilled water to individual fan coil units. The proprietary technology is designed to utilize the fire sprinkler piping to circulate the cooling water around the building and the domestic hot water lines to distribute heating energy to individual fan coil.

The dual use of the piping system provides cost effective, high quality, individual room temperature control to the hospitality industry without the use of through the wall compressors. Guest rooms offer the precise comfort of a typical four-pipe air conditioning/space heating system at a lower installed cost achieved through the dual purpose use of the fire sprinkler system to deliver chilled water and the domestic hot water system to deliver hot water for space heating to the fan coil units eliminating the need to install two additional pipes. Installation and construction costs are not significantly higher than conventional through-the-window Position Terminal Air Conditioners (PTAC) units. The PowerCold System also avoids the discomfort of poor temperature/humidity control and sleepless nights from noisy compressor cycling. PowerCold's HVAC system provides energy saving and operating advantages through the integration of energy recovery and other technologies to increase efficiency and reduce operating costs.

Competition – Based upon the internal research of our sales and marketing staff we believe there is no competition from a one-source vendor for the specialized hospitality market to support a totally integrated HVAC system. No one has a patented, integrated piping system combined with an evaporative chiller system which includes the patented Nauticon evaporative condenser. The major industry vendor's including the large manufacturers such as Carrier, Trane and York are well established and have substantially greater financial and other resources to produce a chiller system, but none produce and install a complete turn key HVAC system designed with a patented integrated piping system, the patented Nauticon evaporative condensers, and the unique design features of the EV Chill product.

PowerCold's Energy Efficient HVAC and Refrigeration Technologies Can Significantly Cut Peak Power Demand and Costs: Deregulated electricity during the hot summer peak-power-demand-days can cost 10-100 times more than normal. Commercial customers' demand-surcharges, which are based on their peak-power usage during the 20-30 days per year when temperatures soar to 95° + F, can represent 30-50% of their total electric bill in some parts of the country. Consequently, reducing peak power demand during these few days could significantly reduce the costs of the demand premium charged by utilities. Commercial air conditioning and refrigeration (accounting for \$7 billion of 2000's \$37 billion in peak-power demand costs) are the Company's initial target markets. America is well entrenched with air condition and refrigeration systems, but there is a great niche market for the Company's unique and innovative evaporative condensers and chiller products. PowerCold and its related entities have the refrigeration engineering expertise and new innovative products that are needed and in demand today to save significant energy costs for an industry that hasn't seen many changes in the last 50 - 60 years.

Industry Competition- Competition in the industry is driven by product quality and performance. Energy efficiency has become more prominent recently as minimum EER requirements have been legislated in some states and is under consideration by others. The increasing cost of utility provided power reinforces the importance of energy efficiency in product selection. As in almost all market segments price, service, product warranty, reliability and availability are factors in the competitive landscape. Product pricing is not a competitive advantage for PowerCold as many of PowerCold's competitors are significantly larger and have greater resources. Several of these larger competitors are Carrier, Trane and York. PowerCold has focused on the Energy Efficiency and low maintenance aspects of its products as an advantage in the market for mid-range refrigeration and chiller systems in the 50 to 200 ton systems and turnkey HVAC systems using the integrated patented PowerCold technologies.

Customer Dependence – over the previous three years the revenue for the Nauticon & EV-Chill and ComfortAir HVAC products have increased due to increasing market acceptance. The revenue for the Nauticon & EV-Chill products is not concentrated in any one customer that would constitute more than 10% of annual revenue. The nature and long life of the products provided by PowerCold do not presuppose a continuous stream of revenue after the initial sale and installation. New accounts and new locations from existing National Accounts are acquired on a regular basis. Sales to some National Accounts are transacted with franchisees and would not be expected to produce repeat business with the franchisee. During the previous three reporting years Eckerd Drug Stores, at that time a wholly owned subsidiary of J.C. Penney, accounted for 13% of 2003 revenue. J.C. Penney has sold its Eckerd Drug Stores to two pharmacy chain stores, CVS and Jean Couteau. PowerCold continues to supply its HVAC technology to Eckerd under its new

ownership however three contracts scheduled for completion in 2004 have been cancelled, at a value of \$162,000, due to store location market overlap. The loss of all business with the new Eckerd entities will slow the rate of revenue growth in HVAC products and staff reductions would be expected to compensate for a reduction in anticipated revenue. Future opportunities will be dependant upon establishing a National Account relationship with CVS and Jean Couteau.

Patents & Trademarks – We own six patents and have nine patents pending, including:

- U.S. Patent No. 5,501,269 Condenser Unit
- U.S. Patent No. 5,582,241 Heat Exchanging Fins with Fluid Circulation Lines
- U.S. Patent No. 5,787,722 Heat Exchange Unit
- U.S. Patent No. 6,651,455 Evaporative Condenser System
- U.S. Patent No. 5,702,508 Ceramic Desiccant Device
- U.S. Patent No. 8,195,398 Heat Exchanging Fins with Circulation Lines

- U.S. Ref. No. YD05,02 Evaporative Condenser System;
- U.S. Ref. No. YD05,04 Environmental Air Treatment System;
- U.S. Ref. No. YD05,06 Stackable Heat Exchanger System;
- U.S. Ref. No. YD05,01 Compact Heat Exchanger with High Volumetric Air Flow;
- U.S. Ref. No. YD05,09 Improvements to Environmental Air Treatment System;
- U.S. Ref. No. YD05,10 Reconfigurable Heat Exchanger System;
- U.S. Ref. No. YD05,12 Plenum Curb with High Efficiency HVAC System;
- U.S. Ref. No. YD05,13 Desuper Heater for Plastic Evaporative Condenser;
- U.S. Ref. No. YD05,05 Environmental Air Treatment System

We also own trademarks and copyrights, such as *Nauticon*® Serial Number 76146005, Registration Number 2703600, Date of Registration 04/08/2003, Section 8 notification due 04/08/2009, Section 8/9 renewal due 04/08/2013; *PowerCold*® Serial Number 76357073, Registration Number 2697451, Date of Registration 03/18/2003, section 8 notification due 03/18/2009, section 8/9 renewal due 03/18/2013; *BreezeMaster*™ Serial Number 76521043, Date of Filing 06/06/2003, Law Office Publication Review Completed 03/01/2005, application will be published for opposition, *PlexCoil*™ Serial Number 76566065, Date of Filing 12/12/2003, Has cleared review and was published for opposition on 12/14/2004.

DuPont™ is a Trademark and Caltrel® is a Registered Trademark of DuPont or its affiliates and are used under license by PowerCold Corporation.

Patents & Trademarks – PowerCold holds four patents, for heat exchange and condenser technology for air conditioning, which expire seventeen years from date of issue, a ten year license on patent #5,183,102 for the integrated piping system technology which expires in December 2010, five patents pending and five trademarks.

United States Patent 5,501,269
March 26, 1996
Condenser unit

A housing is provided for an air conditioning condenser of the type providing a fan creating an upward path of air movement through the housing, a heat exchange coil having an inlet and an outlet for connection to a source of hot refrigerant in a refrigerant loop and means for spraying water on the coil. The housing is made of rotomolded plastic and comprises a base, a plurality of identical walls and a top. The base and top are rotocast as a single piece and then cut horizontally with a saw to provide the two pieces. The base includes a U-shaped foot arranged to receive fork lift tines and oriented so the fork lift does not damage the inlet and outlet to the heat exchange coils.

United States Patent 5,582,241

December 10,, 1996

Heat exchanging fins with fluid circulation lines therewithin

A conduit for use in directing the flows of primary fluid and a secondary fluid in heat exchanging relationships comprising a plurality of elongated members to direct a flow of a primary fluid in a first path. The first path is comprised of separate generally parallel channels. It includes means to direct a flow of air over, under and between the plurality of elongated members in a second path. The first path and the second path are in spaced alternating relationship in generally parallel planes and with the first path in a first direction and the secondary path in a second direction perpendicular to the first direction. Coupling means are associated with the input and output ends of the first and second paths whereby when a first fluid is fed through the first paths at a first temperature and a second fluid is fed through the second paths at a second temperature, a heat transfer occurs therebetween.

United States Patent 5,787,722

August 4, 1998

Heat exchange unit

A heat exchange unit for an air conditioning/refrigeration system includes a plurality of independent spiral coils carrying hot refrigerant. Water is sprayed onto an upper set of the coils and passes through a bank of surface media onto a lower set of coils and then into a sump where it is recirculated. Water is also sprayed onto the lower coils. Air flows upwardly through the unit and cools the downwardly moving water droplets. Although most of the cooling in the unit is from evaporation, an unusual feature is the almost complete lack of scale buildup. The unit is almost completely dark inside so algae doesn't grow. Periodic high water temperatures and periodic purging of the recirculated water minimizes fungi growth. The coils are supported in such a manner that the tubes are allowed to lengthen and expand radially when temperatures are high and shrink when temperatures are low.

US Patent 6,651,455

November 25, 2003

Evaporative Condenser System

An evaporative condenser system has an air handler with an input and an output end with a fan to facilitate the movement of the air. An air cooler has at least one conical spiral coil having a top end and a bottom end, each with linear extents in the output ends and the input ends of the air handler. A pump moves a working fluid through the coil. A cooling water path has a water recycle input and a reservoir for the cooling water adjacent to the bottom of the air cooler coils. The reservoir has a submersible sump pump for moving the cooling water to an elevated location with a sprayer.

Patent 5,183,102 Ten Year License

February 2, 1993

Integrated Piping System Technology

Integrated HVAC, Plumbing, and Fire Sprinkler System

A system for heating and cooling a building, said building having a first piping system that forms a fire sprinkler piping system and a second piping system forming a domestic hot-water piping system, said system for heating and cooling comprising: Water-cooling means for supplying and maintaining water in said first piping system at a first temperature; Domestic water-heating means for supplying water to said second piping system and for exclusively maintaining water in said second piping system at a second temperature; and A plurality of fan-coil assemblies located throughout said building, said fan-coil assemblies able to access said water at said first temperature from said first piping system and also able to access said water at said second temperature from said second piping system, wherein each of said fan-coil assemblies includes air-circulating means and a first coil, said fan-coil assembly circulating air about said first coil, thereby transferring heat from the water in said first coil to the air if said first coil is accessing said water at said

second temperature, and transferring heat from the air to the water in said first coil if said first coil is accessing said water at said first temperature.

PowerCold has five patents pending for improvements and enhancements of existing and new products and continuously evaluates the need to protect its intellectual property with additional patent application submissions. Patents and acquired technology are amortized on a straight-line basis over a 15 year life, commencing with the beginning of product sales.

Research & Development – Estimated expenditure for company sponsored Research & Development totaled \$405,013, \$108,838 and \$92,229 in 2003, 2004 and 2005 respectively.

Employees - At the end of the reporting period, December 31, 2005, PowerCold employed 14 people.

Environmental Regulations - Changes in environmental regulation could materially impact PowerCold Corporation adversely as the majority of PowerCold's revenue is generated from the sales of products used in HVAC and Refrigeration systems. The chemical compounds used as refrigerants are highly regulated and could be restricted from sale in the future. This could make existing equipment design obsolete. The likelihood that PowerCold would have sufficient time to adapt to the changes in regulation is good as industry trends and regulations affecting the industry are monitored closely through several industry group affiliations such as ASHRAE (American Society of Heating, Refrigeration and Air-Conditioning Engineers) and AEE (Association of Energy Engineers). With this understood there is no guarantee that existing technology would be adaptable. At the current time there are no material capital expenditure required or anticipated to maintain environmentally compliant products or equipment.

Available Information – Our internet website is located at www.powercold.com. We make available free of charge through this website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as soon as a reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission. Our internet website also contains our Code of Business Conduct and Ethics (the "Code of Ethics") for officers, employees and directors, including our Chief Executive Officer and senior finance officers including the Chief Financial Officer and Chief Accounting Officer. The Code of Ethics and contact information for the company is available on the company website www.powercold.com under the section "About Us" Investor Relations and Contact Information. See also "Item 10" Directors and Executive Officers of the Registrant. The information made available through our website is not incorporated by reference in this 10-K. The "Code of Ethics" is filed as an exhibit in this 10-K.

ITEM 2. PROPERTY

The Company owns no properties. Some properties are leased on a short-term 3-5 year basis. Others are rented month to month. Management believes that the Company's facilities are adequate for its operations and are maintained in good condition. The Company is aware of the growth potential of its operating facilities and is currently reviewing other offices and plant facilities near respective locations. The La Vernia, Texas office and plant facility is 47,000 sq. ft. and supports administrative, engineering and manufacturing operations. The Company also rents 660 sq. ft of office space in San Antonio, Texas and 1,681 sq. ft. in Centennial, Colorado

ITEM 3. LEGAL PROCEEDINGS

PowerCold Corporation produced a demand letter on February 25, 2005, through its attorney, in the amount of \$128,589.50 due by March 15, 2005, regarding claims against Industrias Polaris, S.A. for costs incurred for defective product, the return of advance payments for product never delivered and \$2,000 for attorney fees in regards to the material breach of the manufacturing agreement between PowerCold and Polaris. Polaris has engaged counsel in Texas and initiated discussions. Pending failure to comply with the demand for payment or an appropriate settlement offer, arbitration as stipulated in the manufacturing agreement, will be pursued. Prior to July 26, 2005 Polaris had agreed to a settlement proposal but has failed to execute the agreement. . On February 17, 2006, an Arbitrator awarded to PowerCold \$126,586.50 for actual damages and amended the award on April 10, 2006 to include \$7,115.02 as reasonable attorney's fees, \$1,500 for AAA administrative fees and expenses and \$2,055.33 for AAA fees in excess of the apportioned costs for a total of \$137,256.85. In addition Polaris must return to PowerCold all drawings, schematics, specifications and ETL Labels for fan coils and Nauticon evaporative condensers and fluid cooler units, manufacturing plans for 1,000 CFM Dessicant unit and drawings for the mandrel used to bend copper coils.

It is the opinion of management that the three matters in which PowerCold is a defendant have been settled with releases from all parties pending payments totaling \$75,000 on April 24, 2006 and \$50,000 on July 3, 2006. The two remaining actions in which PowerCold is the Plaintiff are pending enhanced settlement offers or mediation. Collection efforts have been initiated for the Arbitrator's award \$137,256.85 from Polaris.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Annual Meeting of Shareholders was held on November 17, 2005 at the Company's facility in Largo, Florida.

Proposal No. 1 was to ratify the selection of Williams and Webster P.S. as the independent auditors of the Company for the fiscal year ending December 31, 2005.

Proposal No. 2 was to ratify and adopt the 2005 Employee Stock Incentive Plan approved by the Board of directors on January 30, 2005 and submitted to the stockholders at the annual meeting.

Proposal No. 3 was to authorize to vote on other matters.

Total voted shares represented by proxy was 18,669,935 and the percentage of the outstanding votable shares was 75.19%. The outstanding votable shares were 24,831,696. Election results where certified by the Company's stock transfer agent, Computershare Investor Services.

Proposal No. 1:	<u>For</u>	<u>Against</u>	<u>Abstain</u>	
	18,635,435	14,000	20,500	
Proposal No. 2:	<u>For</u>	<u>Against</u>	<u>Abstain</u>	<u>Not Voted</u>
	9,945,029	616,429	33,350	8,075,127
Proposal No. 3:	<u>For</u>	<u>Against</u>	<u>Abstain</u>	
	18,034,181	532,795	102,959	

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES****(a) Market Information:**

The Registrant's Common Stock, trading symbol PWCL, is traded on the OTC Electronic Bulletin Board.

The following table sets forth the high and low sale prices of the Company's Common Stock as reported by one of the market makers for the periods indicated.

	2005 Bid		2005 Ask	
	High	Low	High	Low
First Quarter	1.85	1.35	1.92	1.35
Second Quarter	1.70	1.16	1.78	1.19
Third Quarter	1.28	0.77	1.33	0.81
Fourth Quarter	1.06	0.57	0.57	0.63
First Quarter	1.97	1.60	2.04	1.63
Second Quarter	2.60	1.65	2.77	1.72
Third Quarter	1.90	1.28	2.00	1.35
Fourth Quarter	1.56	1.38	1.66	1.43

Recent Sales of Unregistered Securities**A. Sales of Unregistered Securities-2005**

On May 12, 2005 Frank Simola/Simco Group, Inc., an officer and director, exercised 695,879 options, 150,000 at \$1.00 per share and 545,879 at \$0.50 per share, for a total of \$422,939.50. The securities in the foregoing offering were originally provided as compensation for services rendered for the Company offered pursuant to an exemption to registration provided under Section 3(b), Regulation D, Rule 506 of the Securities Act of 1933.

On October 12, 2005, the Registrant withdrew Form S-1 Registration Statement, File No. 333-119112, which attempted to register for resale, 4,457,995 shares of PowerCold common stock issuable upon exercise of a convertible term note and 615,000 shares of PowerCold common stock issuable upon the exercise of warrants.

The Company believes that none of the offerings are subject to any "integration doctrine", since: (i) as the common stock was offered and sold in a concurrent transaction (simultaneous private offering and registration statement on file) only to a limited number of purchasers, who are either accredited or "qualified institutional buyers". The purchasers of the Registrant's common stock were "accredited" and therefore capable of fending for themselves and do not need the protections afforded by registration under the Securities Act; (ii) private placement investors represented themselves as "accredited" at the time of purchase; (iii) integrating prior private placements with the Registration Statement would make it essentially impossible for the Registrant to fund its ongoing working capital requirements given that the Company's currently filed Registration Statement is for resale transaction involving no redistribution; (iv) Telephone interpretation D. 12 reads as follows:

See also Rule 155, Question 51 under Section 4(2) and Section 5 telephone interpretations, including Telephone interpretation D. 12. In the event that an exemption for such sales is later determined not to be available to us or that such offerings should be integrated with the Public Offerings, we may be required to take such steps as may be necessary to comply with federal and state securities laws for such sales.

(b) Holders: As of December 31, 2005, there were approximately 1,850 record holders of the Company's Common Stock. As of December 31, 2005 there were 25,502,696 shares of common stock outstanding.

(c) The Company has paid no cash dividends to date, and it does not intend to pay any cash dividends in the foreseeable future. The present policy of the Board of Directors is to retain any future earnings and provide for the Company's growth.

(d) During the year ended December 31, 2005, the Company issued 2,016,879 shares of common stock. The Company issued 200,000 shares of common stock for consulting fees of \$167,500 and 300,000 shares of common stock for services of \$370,000. In addition 695,879 shares of common stock were issued upon the exercise of options for \$422,940 in cash. The Company issued 616,000 common stock shares for a loan conversion of \$400,400 and 5,000 shares of common stock toward a partial interest in a patent acquisition at \$0.75 per share for a value of \$5,000.

(e) During the year ended the company issued 725,000 warrants at an exercise price of \$1.70 for a term of period years from the dates of issuance. The fair value of the warrants was calculated at \$417,466 using the Black Scholes Calculation at date of grant assuming a risk free interest of 4.25%, volatility of 35%, an expected life of five years and no expected dividends.

ITEM 6. SELECTED FINANCIAL DATA

The following table presents selected financial data for PowerCold Corporation and its subsidiaries. The financial data for fiscal years ending December 31, 2001 through December 31, 2005 have been derived from the Company's audited Consolidated Financial Statements included elsewhere in this Report, and should be read in conjunction with those Consolidated Financial Statements and related notes.

SUMMARY STATEMENT OF OPERATIONS (In thousands, except per share data)

Year Ended December 31,	2005	2004	2003	2002	2001
		(Restated)	(Restated)	(Restated)	(Restated)
Revenues	\$ 667	\$ 511	\$ 620	\$ 1,506	\$ 814
Operating (loss)	\$(2,367)	\$(1,141)	\$(1,924)	\$(3,300)	\$(2,191)
Net Income (loss)	\$(6,687)	\$(4,258)	\$(2,657)	\$(4,291)	\$(2,328)
Net Income (loss) per share					
continuing operations	\$ (0.06)	\$ (0.08)	\$ (0.11)	\$ (0.25)	\$ (0.16)
Net Income/(Loss) per share					
discontinued operations	\$ (0.20)	\$ (0.12)	\$ (0.02)		
Weighted average number of shares	25,503	22,156	20,163	17,118	15,005

SUMMARY BALANCE SHEET (In thousands, except per share data)

Year Ended December 31,	2005	2004	2003	2002	2001
		(Restated)	(Restated)	(Restated)	(Restated)
Total assets	\$ 1,560	\$8,576	\$4,593	\$1,685	\$2,824
Total liabilities	\$ 6,094	\$8,545	\$3,030	\$ 903	\$ 485
Long term debt	\$ 1,419	\$2,764	\$ 0	\$ 0	\$ 0
Shareholders' equity	\$(4,535)	\$ 30	\$1,562	\$ 782	\$2,339

The above restated operations are for reporting of discontinued operations.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OR FINANCIAL CONDITION AND RESULTS OF OPERATION

Forward-looking statements made herein are based on current expectations of the Company that involves a number of risks and uncertainties and should not be considered as guarantees of future performance. The factors that could cause actual results to differ materially include; interruptions or cancellation of existing contracts, impact of competitive products and pricing, product demand and market acceptance risks, the presence of competitors with greater financial resources than the Company, product development and commercialization risks and an inability to arrange additional debt or equity financing.

The following Management's Discussion and Analysis ("MD&A") is intended to help the reader understand PowerCold Corporation. MD&A is provided as a supplement to, and should be read in conjunction with, our financial statements and the accompanying notes ("Notes").

Our annual financial statements for the year ended December 31, 2005 were audited by our independent certified public accountants, whose report includes an explanatory paragraph stating that the financial statements have been prepared assuming we will continue as a going concern and that we have incurred operating losses since inception that raise substantial doubt about our ability to continue as a going concern.

The accompanying consolidated financial statements contemplate continuation of the Company as a going concern. At December 31, 2005, we discontinued operations of PowerCold ComfortAir Solutions, Inc. and sold the business. We will concentrate on producing and marketing high gross margin proprietary plastic products and continue to develop innovative plastic technology. We expect substantial product growth and higher gross profit margins by focusing our sales efforts on three markets: direct end user customers, OEM companies, and licensing our technology. At December 31, 2005, the Company had an accumulated deficit of \$27,302,257 and recurring losses from operations for each year presented. Property, equipment, accounts receivables and intangibles comprise a material portion of the Company's assets. Accounts receivable as of December 31, 2005 are \$123,876 with reported revenue for the year ended December 31, 2005 at \$667,375 after discontinued operations. The recovery of these assets is dependent upon collection of outstanding receivables and achieving profitable operations. The ultimate outcome of these uncertainties cannot presently be determined. We actively seek sufficient financing to achieve profitability. Realization of a major portion of the assets in the accompanying balance sheet is dependent upon continued operations of the Company, and the success of its future operations. Our plans for 2006 include concentrating on two specific proprietary applications: Equipment sales of Central HVAC Air Condition Systems and Plastic Heat Exchange Products. During 2005 we experienced a significant growth in revenue from the Central HVAC Air Conditioning Systems and higher gross margins from Plastic Heat Exchange Products. We have expended considerable capital and manpower resources developing these applications over the last three (3) years. Subsequently, business opportunities from projects for Central HVAC Systems and Plastic Heat Exchange Products in the first quarter of 2006 support our plans going forward. We plan to exploit the last three years of engineering development and focus engineering, sales and marketing resources on the Company's proprietary Environmental Air Treatment System, which is our central HVAC air conditioning system for large commercial buildings, focusing on the growth segments of the hospitality industry.

Management also plans to capitalize upon the last three years of development for plastic product applications. During the last two quarters of 2005, the Company shipped its first PlexCoil® plastic coil fluid cooler kits to multiple OEMs. Two fluid cooler OEM companies will show their proprietary products with PowerCold's plastic components at the ASHRAE convention in early February 2006. Recently, we have successfully developed and installed the first plastic fluid cooler that can be used for residential buildings and expanded to larger commercial buildings. Management expects added revenue and improved margins in products that use plastic coils in place of copper coils. We are also focusing on cash management and addressing the past due accounts receivable through a rigorous collections policy. We intend to raise capital through the licensing of our heat exchange technology in markets outside of North America with five and ten year licensing agreements that include annual renewal fees and royalties based on sales. We expect better cash flow and improve margins. Projections regarding revenue, income, margins and cash flow should not be considered a certainty and in fact projections may not be met at all. We believe that actions presently being taken to increase sales, collect receivables and obtain additional financing as needed provide the opportunity to continue as a going concern.

OVERVIEW

We design, develop and markets heating, ventilating and air conditioning systems (HVAC) and energy related products for commercial use. Air conditioning and refrigeration are two of the more energy intensive operational costs many businesses face. Increasing power costs and new clean air regulations have motivated corporations of all sizes to focus both on energy savings and indoor air quality. Over the past few years we have acquired and developed various technologies related to the HVAC industry and employ experienced and qualified industry professionals. Our focus is to provide HVAC products that are designed to reduce energy consumption and provide a clean and comfortable indoor air environment.

During 2005, PowerCold operations included four wholly owned subsidiary companies with respective operating divisions: PowerCold Products, Inc., (PCP) supports product development, engineering and manufacturing. PowerCold ComfortAir Solutions, Inc., (PCS) supports sales and marketing offering turnkey HVAC solutions for commercial buildings, including major hotel chains, national restaurant and retail store chains, extended care facilities and office buildings. There are two operating divisions of PCS, Applied Building Technology (ABT) that supports related engineering and design build HVAC applications, and PowerCold Energy Systems (PES) that supports related energy products including generators and engine driven chillers. PowerCold International, Ltd., (PCI), a new operating subsidiary company effective July 1, 2003, markets all company products and system applications worldwide through various alliances and marketing agencies. PowerCold has also established alliances with various companies in the industry to market and manufacture related HVAC and Energy products. PowerCold Technology, L.L.C. was formed in February 2004 to hold and manage the intellectual property and patents owned by PowerCold Corporation and its subsidiaries and license the technology to the operating divisions and other entities.

On December 31, 2005, PowerCold Corporation disposed of its interest in PowerCold ComfortAir Solutions, Inc. to Comfort Air Solutions, Inc., a Florida Company. Comfort Air Solutions, Inc. acquired 100% of the PowerCold Corporation's shares of PowerCold ComfortAir Solution, Inc. common stock. Comfort Air Solutions is owned by previous employees of PowerCold ComfortAir Solutions, Inc. Included in the transaction was a Technology and Trademark license agreement for Comfort Air Solutions, Inc. that will provide royalty revenue for PowerCold Corporation. Effective January 1, 2006, three of PowerCold Corporation's wholly owned subsidiaries, PowerCold Products, Inc., PowerCold International, Ltd. and PowerCold Energy Systems, Inc., have been terminated and the assets transferred to PowerCold Corporation. PowerCold Technology, LLC., which holds title to all the intellectual property and licensing rights of the Company, will remain a wholly owned subsidiary of PowerCold Corporation.

PowerCold derives its revenues from two principal product lines: The first is proprietary applications for the HVAC industry which includes a patented four pipe integrated piping system for large commercial buildings and turnkey HVAC systems for light commercial national chain store applications. The second is a line of evaporative condensers, heat exchange systems and fluid coolers for the HVAC and refrigeration industry.

During 2003 we entered into a joint Development Agreement and a License Agreement with DuPont Canada, Inc. and E.I. DuPont de Nemours relating to DuPont Caltrel® Fluid Energy Transfer System Applications that incorporates their engineered polymeric materials. We selected fluid coolers as a project application per the Development Agreement for an exclusive three-year period. The product is similar to our Nauticon® Fluid Cooler, but will now use new plastic tubing material replacing the copper coils. We applied to the U.S. Patent Office for a new modular design heat exchanger patent that features modular designed plastic components. Our new proprietary PlexCoil™ fan coil air handlers, primarily used in commercial buildings for room air distribution, will be the first application for the new patent heat exchanger.

Field testing and R&D continues with the PlexCoil™ polymeric heat exchange products. Initial field trials during the last 12 months are promising and new products will easily integrate with the turnkey HVAC design build program. Additionally, the opportunity exists to provide the technology as basic components for assembly by OEMs around the world. The corrosion resistant and light weight characteristics of the plastic along with the heat transfer properties present numerous opportunities to replace copper and aluminum in many fluid/air heat exchange applications. The investment in this technology will continue for the next several years.

PowerCold Corporation entered into a long-term business relationship with E.I. du Pont de Nemours and Company for the exclusive purchase and use of Caltrel® Plastic Tubing in the HVAC field of Fluid Coolers and Fan Coil Heat Exchangers effective October 1, 2005 and DuPont granted an exclusive license for use of the DuPont™ Caltrel® trademark.

The Agreement includes the exclusive purchase and supply of Caltrel® plastic tubing for a period of five years for use in Fluid Coolers and Fan Coil Heat Exchangers for HVAC applications. For a period of at least two years, DuPont will sell and deliver, and PowerCold will purchase and accept from DuPont, Caltrel® plastic tubing. PowerCold has the first option to purchase the DuPont Production Equipment to produce Caltrel® tubing, and agrees to purchase resins required for the production of the tubing solely from DuPont.

For the term of this Agreement, DuPont agrees not to develop or improve Equipment (or processes utilizing said Equipment) in collaboration with any third party specifically for use in the fields of Fluid Coolers and Fan Coils, and DuPont further agrees not to produce Caltrel® tubing for any such third party specifically in the aforementioned fields for this period.

Continued investment in the PlexCoil® products and patented Nauticon® Evaporative Condensers and Fluid Coolers to increase capacity and refine system integration controls is necessary to expand the market potential for these products. Controls have become more important to the management and integration of various pieces of HVAC equipment to achieve proper operation and obtain maximum energy efficiency from the total system.

Future profitability is dependant upon obtaining and maintaining gross profit margins greater than 30%, execution of the company's sales and market plans to generate a minimum of \$500,000 per month in sales, managing travel, administration, warranty, legal, accounting, regulatory and other controllable expenses within the constraints of the budget are necessary for sustained profits, however there is no guarantee that we will be able to achieve the factors affecting future profitability. Sufficient cash may not be generated from operations due to the extended payment terms required for some of our sales in order to meet our operating needs. Cash availability is a significant concern. Revenue growth strains our resources as material must be purchased, salaries paid and operating and administrative overhead supported. Future cash needs from debt or equity are dependant upon the collection of receivables and gross margins. Revenue growth, the timely collection of receivables and improvement in gross margins are the primary focus of management.

Receivable are reviewed for impairment on a quarterly basis. In the past we didn't include retentions in the review of receivable aging as it is understood that retentions are not paid until the all releases are provided at project completion and any warranty related issues are resolved. At year end we included a review of retentions and the likelihood of collection and will continue this review on a quarterly basis.

Management intends to maximize our intangible assets with continued development and marketing of new and existing products based upon our intellectual property. Accounts receivables and intangible assets comprise the material portion of our assets. Continued emphasis on more effective collection effort and accelerated project completion are expected to improve cash flow and reduce future funding needs.

Our continued existence is uncertain as there is presently insufficient cash to support operations for the next twelve months. We have secured a \$5 Million convertible note with a term of three years. Accelerated collection of existing receivables will provide additional cash to fund operations but continued growth at an accelerated pace will create a significant demand for limited funds. At present there is a need to raise more capital beyond the senior debt offering and future fund raising may be necessary at some time in 2006.

GENERAL FINANCIAL ACTIVITY

PowerCold's cash flow has been impaired due to start up marketing costs, by slow collection of receivables, and less than favorable vendor credit facilities PowerCold has successfully raised capital, as needed, from private placements, and is confident that it can continue to raise sufficient capital from private placements or debt financing to support its cash needs for the next twelve months.

The following table sets forth the company's results of continuing operations as a percentage of net sales for the periods indicated below:

	2005	2004	(Restated) 2003
Revenue	100%	100%	100%
Cost of Revenue	98%	(1.10%)	1.07%
Gross Margin	2%	(10%)	(7%)
Operating Expense	357%	214%	303%
Operating Income (Loss)	(235%)	(326%)	(367%)
Net Income (Loss)	(235%)	(326%)	(367%)

Events:

The new development of plastic products will reduce the impact of copper and aluminum price fluctuations for Nauticon fluid coolers and fan coil units. Plastic pricing is expected to be stable over an extended period of time with lower assembly cost, lighter weight construction reducing handling and transportation costs resulting in improved margins for certain manufactured products.

Trends:

Continued cash flow uncertainties related to large new building projects and the collection of receivables will require additional funding from time to time as the size and duration of projects increase. The ability to obtain payment and performance bonds and the required collateral may restrict the revenue growth related to large commercials buildings in the foreseeable future a greater focus has been placed of equipment only sales. Adequate capital to finance the R&D of plastic based products and finance large scale projects are critical to significant growth of revenue and future profits.

Comparable Fiscal 2005, 2004 and 2003 Results

Consolidated Statements of Operations: Fiscal year ended December 31, 2005 compared to fiscal year ended December 31, 2004 and December 31, 2003:

	%Increase (Decrease)	2005	2004	2003
Revenue	31%	\$ 667,377	\$ 511,159	\$ 620,209
Gross Profit	127%	\$ 13,085	\$ (48,772)	\$ (45,909)
Operating Loss	108%	\$(2,367,405)	\$ (1,140,853)	\$ (1,924,076)
Net Loss	57%	\$(6,687,755)	\$ (4,257,631)	\$ (2,656,549)
Net Loss Per Share Continuing Operations	25%	\$ (0.06)	\$ (0.08)	\$ (0.11)
Weighted Average Number of Shares	15%	25,055,363	22,156,331	20,163,045

Total Revenue for the year ended December 31, 2005 increased 31% to \$667,377 from \$511,159 for the prior year ended December 31, 2004. Product pricing has remained stable for the last few years although there was a spike in copper prices in early 2004 and again in 2005 which impacted margins as price increases for Nauticon copper heat exchangers were minimal and Nauticon sales accounted for 20% of 2005 revenue. Inflation rates of 2.16%, 2.68% and 2.27% respectively for 2005, 2004 and 2003 (based upon the CPI Consumer Price Index) has had little or no impact on pricing for our products and services and did not contribute to revenue increase. Commodity price increases for copper and polyethylene did reduce gross product margins for Nauticon products in the 2005 by about 4%. Operating Loss for the year ended December 31, 2005 increased to \$2,367,405, 108% increase from a prior year operating loss of \$1,140,853. The Total Cost of Revenues increased by \$94,359 to 98% of revenue as compared to 1.02% of revenue for the comparable period in 2004. The warranty cost recorded for 2004 was \$222,046 was primarily related to new product introduction in 2004. In 2005 warranty was \$228,614, an increase of 65.1% from the prior year due to product improvements and design refinements. Direct labor and material for equipment increased as a percentage of equipment revenue to 53% as compared to 26% for equipment revenue for 2004.

Net Loss for the year ended December 31, 2005 increased to \$6,687,557, a 57% increase from the prior year ended December 31, 2004 loss of \$4,257,631. Operating Losses from continuing operations included charges of \$405,013 for R&D expense for the year, an increase of \$296,175 from the prior year period for new product development work on plastic heat exchange products and design enhancement of copper based products and desiccant systems. Sales and marketing expenses increased \$89,412, which included increases in travel and shows & meetings expenses in the development of new business in the hospitality industry as well as direct marketing to national retail and restaurant chains. General and Administration expense increased \$840,347 due to excessive operating overheads. Depreciation and amortization increased by 13.1% to \$112,947 as the result of the investment by the company in computer hardware, new financial software and R&D test equipment during 2005. Operating losses were higher than expected due to the disproportionate increase in the number of lower margin bid spec contracts for retail and restaurant chain accounts. Margins in future periods should improve, as the Company reduces dependence on bid spec contracts and increases the number of hospitality contracts using our proprietary technology, however no guarantees can be made regarding the increase in HVAC hospitality business or the improvement of margins.

Net Loss Per Share from continuing operations for the year ended December 31, 2005 decreased to (\$0.06) from (\$0.08) for the prior year ended December 31, 2004. Net loss per share was based on weighted average number of shares of 25,055,363 for the year ended December 31, 2005 and 22,156,331 for the year ended December 31, 2004. Interest and financing expense increased 23.2% to \$736,719 for the year ended December 31, 2005 due to interest expense on the \$5 million convertible debt placed with Laurus on July 29, 2004 and fees for the lack of effectiveness of a stock registration filed with the SEC.

The Company initiated a new sales and marketing program in early 2003 and continued those efforts through 2004 and 2005. Although revenue growth was primarily through the growth in plan and spec work for chain restaurant and retail stores and hospitality projects, gross profits decreased accordingly. Nauticon heat exchange products including new products based upon plastic coil technology increased in revenue and gross profit margins. Product pricing has remained stable for the last few years although there was a spike in copper prices during the past 12 months which minimally impacted margins. Product pricing has remained stable for the last few years even as certain commodity prices increased which negatively impacted margins as price increases for Nauticon copper heat exchangers were minimal. Commodity price increases for copper and polyethylene did reduce product margins for Nauticon products during 2005 however this was not significant due to the limited product sales as a percent of total revenue. Operating losses were due to fixed operating expenses (overhead) and insufficient sales necessary to support the new marketing efforts and ramped up production operations.

In 2003, 2004 and 2005, the Company's revenues were primarily attributable to sales of Company-manufactured equipment

Because of management's decision to further enhance the Nauticon evaporative condenser product line to greater capacity and efficiency during the last three years, sales for Nauticon units have steadily increased during 2005. As of March 31, 2006, booked orders for current delivery for Nauticon Evaporative Condensers and Nauticon Fluid Coolers were over \$400,000. The Company continues to manufacture Nauticon units at the LaVernia plant. Gross profit margins for manufactured products have improved due to increase in sales volume, and should improve with more efficient production and engineering design modifications for material cost reduction. Management believes that the Company is in position to generate new product business in 2006 due to the increase in Nauticon proposals submitted to potential customers.

Operating expenses for continuing operations in 2005 increased 118% over the previous year while revenue increased by more than 30.5% for the same period. This expense increases were primarily attributed to a charge of financing. General and administrative expense increased by \$840,347 and resources were focused on sales and marketing activities and travel expenses, which increased by \$89,412 by deploying personnel on a regional rather than a national basis. The Company's total net loss increased 57% from the prior year, and the net loss per common share for continuing operations was (\$0.06) per share.

Consolidated Balance Sheet: Fiscal year ended December 31, 2005, December 31, 2004:

	% Increase (Decrease)	2005	2004
Total Current Assets	(41.0%)	\$ 967,381	\$ 1,630,234
Total Assets	(82.0%)	\$ 1,559,696	\$ 8,575,550
Total Current Liabilities	1.86%	\$ 4,675,702	\$ 1,634,867
Total Stockholder's Equity (Deficit)	(1.51%)	\$(4,534,654)	\$ 30,191

Total assets decreased to \$1,559,696 due to the decrease in accounts receivables and cash decreased from low operating gross profit margins and discontinued operations of PowerCold ComfortAir Solutions. Consequently, payables due on those contracts decreased. Current liabilities increased by \$3,040,843 primarily from an increase in accounts payable, customer deposits and accrued expenses of \$1,388,255 and an increase of related party loans of \$816,361. And net stockholders equity decreased to a deficit of \$4,534,654 due primarily to outstanding notes payable of \$4,407,245 and accrued expenses of \$958,620.

Liquidity and Capital Resources: At December 31, 2005, the Company's working capital was negative \$3,708,321. Included in current liabilities was an advance of \$988,597 from related parties. The Company raised \$422,940 in equity capital in 2005, and subsequently, the Company has received Senior Convertible Debt Note for \$5,000,000 on July 29, 2004. Total assets decreased by 82.0% and stockholders equity decreased by 151% for the year as the result of an increase in outstanding notes payable and accrued expenses. Management believes that its working capital may not be totally sufficient to support its projected growth plans for the next few years if it does not raise additional financing.

During the year ended December 31, 2005, the Company issued 2,016,879 shares of common stock. The Company issued 500,000 shares of common stock for consulting fees of \$167,500 and the services of \$370,000. Additionally, 695,879 options were exercised for cash of \$422,940 by Francis L. Simola, an officer and director of the company. The Company issued 616,000 common stock shares for a loan conversion of \$400,400; 5,000 shares of common stock toward a partial interest in a patent acquisition at \$0.75 per share for a value of \$3,750 and 200,000 shares of common stock at \$1.50 per share and 150,000 options with an exercise price of \$1.50 per share that will vest over a 3 year period. At May 1, 2005, 50,000 common stock options were vested with a fair market value of \$22,870 and the Company recorded a commitment of \$56,105 for the future vesting of the remaining options. The acquisition was accounted for under the purchase method.

The Company issued a new warrant purchase agreement to Laurus for 665,000 shares for a term of five years at \$1.70 per share. The Company will take a fair market value charge of \$125,302 for the issuance of 215,000 warrants for the rescheduled principal payments over the period from February 1, 2005, through August 1, 2007. In addition the Company will take a fair market value charge of \$262,260 for the issuance of 450,000 warrants as a result of the registration statement filed with the SEC not being effective as of November 27, 2004 and being extended to June 15, 2005. On May 27, 2005 we issued common stock purchase warrants to Laurus to purchase 60,000 shares of common stock, exercisable for five years from the Initial Date of Exercise. The exercise price of the warrants is \$1.70. Fair value of the warrants was calculated at \$29,904 using the Black-Scholes Calculation at date of grant assuming a risk free interest of 4.25%, volatility of 35% and a term of five years.

On May 12, 2005, Frank Simola made a loan to the Company in the amount of \$787,060 payable upon demand with an annual interest rate of prime, as published in the Wall Street Journal, plus 1%, not to exceed 8% and on September 1, 2005, Frank Simola made a loan to the Company in the amount of \$750,000 payable upon demand with an annual interest rate of prime, as published in the Wall Street Journal, plus 1%, not to exceed 8%. During 2005 Frank Simola was repaid \$290,700 and converted \$400,400 in loans to 616,000 shares of common stock at \$0.65 per share. At December 31, 2005 the interest accrued for the loan from Frank Simola was \$34,394. At December 31, 2005 the balance of the Notes payable to Related Party (Simco) was \$988,597.

Status of Operations: Management intends to continue to utilize and develop the intangible assets of the Company. At December 31, 2005, accounts receivable and intangible assets comprised a material portion of the Company's assets. The recovery of the receivables and the intangible assets is dependent upon management effectively executing positive business operations and achieving profitable operations. It is Management's opinion that the Company's cash flow generated from current intangible assets is not impaired, and that recovery of its intangible assets, upon which profitable operations will be based, will continue to occur.

We have restructured to operate under one entity, PowerCold Corporation, to support product growth and greater profit margins. We have terminated three subsidiaries and sold one subsidiary, which should reduce our operating expenses approximately forty per cent. We discontinued the very low gross margin bid spec business and turnkey installation projects.

We will concentrate on producing and marketing high gross margin proprietary plastic products and continue to develop innovative plastic technology. We will also focus on equipment sales for commercial buildings utilizing our patented Environmental Treatment System. We expect substantial product growth and higher gross profit margins by focusing our sales efforts on three markets: direct end user customers, OEM companies, and licensing our technology.

PowerCold will operate with one wholly owned subsidiary, PowerCold Technology, LLC, which will hold title to all of the intellectual property as well as licensing of such intellectual property. PowerCold Products, Inc., PowerCold International, Ltd. and PowerCold Energy Systems, Inc. have been terminated and the assets transferred to PowerCold Corporation.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Company may be exposed to various market risks, including interest rates and changes in foreign currency exchange rates. Market risk is the potential loss arising from adverse changes in prevailing market rates and prices. We do not enter into derivatives or other financial instruments for trading or speculative purposes.

Specific Risks Related to Our Business

We are subject to government regulations that may impose additional technology requirements to our products, which may increase our manufacturing costs, thus reducing our profitability.

Environmental regulations affect our business. There are many federal, state and local rules and regulations governing the environment. The environmental laws affecting us most relate to the use of chemicals in refrigeration and heating systems and equipment and to minimum energy efficiency standards. Some chemicals used in air conditioning and refrigeration equipment products may affect the ozone layer. None of our products use the banned chemicals and all of our equipment meets or exceeds current minimum energy efficiency standards as they apply to our existing product offerings.. Our equipment uses substitutes for environmentally destructive chemicals such as Freon. Failure to meet those regulations would seriously affect our income if the equipment we manufacture for the commercial heating and air conditioning market becomes obsolete. As a result our business is subject to extensive, frequently changing, federal, state and local regulation regarding the following:

- health safety and environmental regulations;
- changing technology requirements.

Some of these laws may restrict or limit our business. Much of this regulation, particularly technology requirements, is complex and open to differing interpretations. If any of our operations are found to violate these laws, we may be subject to severe sanctions or be required to alter or discontinue our operations. If we are required to alter our practices, we may not be able to do so successfully. The occurrence of any of these events could cause our revenue and earnings to decline. Changes in regulations specifically governing the use of certain refrigerants may make some of our equipment designs obsolete, causing us to increase spending on research and development and impair the value of our patents. The magnitude of such risk cannot be quantified and would be speculative. If our intellectual property were entirely impaired assets could be reduced by as much as \$1,352,522.

We have a history of net losses. We expect to continue to incur net losses, and we may not achieve or maintain profitability. Independent auditors have expressed substantial uncertainties for our continuation as a going concern

We have incurred net losses each year since our inception in 1987 including net losses of approximately \$6,700,000 for the year ended December 31, 2005; \$4, 300,000 for the year ended December 31, 2004; and \$2,600,000 for the year ended December 31, 2003. As of December 31, 2005, we had an accumulated deficit of approximately \$27,000,000. The time required to reach profitability is highly uncertain. We may not achieve profitability on a sustained basis, if at all. The “cash burn”, defined as the net loss for the period less depreciation, (the average is calculated by dividing by the interval period). The average quarterly cash burn for 2005 was \$1,216,237. The Company publicly reports its financial information in accordance with account principles generally accepted in the United States (GAAP). The Company also presents financial

information that may be considered “non-GAAP financial measures”. Non-GAAP financial measures, such as “cash burn” as defined above, should be evaluated in conjunction with, and are not a substitute for GAAP financial measures.

Our financial statements for the year ended December 31, 2005, were audited by our independent certified public accountants, whose report includes an explanatory paragraph stating that the financial statements have been prepared assuming we will continue as a going concern and that we have incurred operating losses since inception that raise substantial doubt about our ability to continue as a going concern.

We believe that there is substantial doubt about our ability to continue as a going concern due to our total accumulated deficit of \$27,302,257 as of December 31, 2005. Net losses may continue for at least the next several years. The presence and size of these potential net losses will depend, in part, on the rate of growth, if any, in our revenues and on the level of our expenses. The number of employees has varied over the previous eighteen month and to some extent is dependant upon the backlog of orders from products manufactured by us. There has been a net increase in the sales and marketing staff in an effort to increase revenue. This trend is expected to continue as the customer base expands. Substantial fluctuations in the cost of certain raw materials such as copper tubing and polyethylene resin may temporarily impact, in a negative way, the gross profit margins of equipment sold. The cost of insurance coverage and regulatory compliance continues to escalate with little near term relief expected. Under the new restructure, we will need to generate revenues of at least \$6,000,000 per year based upon current gross margin and operating expenses and without further impairment of accounts receivables to achieve profitability. Even if we do increase our revenues and achieve profitability, we may not be able to sustain profitability.

We will need additional funds in the future, which may not be available to us. If we do not secure additional financing, we may be unable to develop or enhance our services, take advantage of future opportunities or respond to competitive pressures.

We require substantial working capital to fund our business. We need at least \$200,000 in funds per month to operate under our new restructured operations. We have had significant operating losses and negative cash flow from operations. Additional financing may not be available when needed on favorable terms or at all. If adequate funds are not available or are not available on acceptable terms, we may be unable to develop or enhance our product line of evaporative condensers and fluid coolers, take advantage of approved vendor status with major hospitality chains or respond to competitive pressures, which could result in a reduction of revenue growth or significantly reduced revenue. Our capital requirements depend on several factors, including the rate of market acceptance of our products, the ability to expand our customer base, the growth of sales and marketing and other factors. If capital requirements vary materially from those currently planned, we may require additional financing sooner than anticipated or find it necessary to reduce the size of our workforce limiting our ability to respond rapidly to design and engineering requests and bid on new projects.

The loss of Francis L. Simola could impair the growth of our business.

We do carry key-man life insurance on our chief executive officer, Francis L. Simola in the amount of \$1 million. If he dies or becomes disabled, we would have to divert time and money to locate an experienced replacement. To do so would be time consuming and expensive. We would be competing against large companies seeking similar candidates. A loss of Mr. Simola would hurt our operations and financial condition as he has directed us since formation. There is no one else associated with us who can manage our operations like Mr. Simola. The magnitude of the risk to us would be at least \$200,000 per year in salary costs, plus additional compensation.

Our Stock Value has fluctuated in an abrupt and volatile manner in the past and may do so in the future which may impair our ability to raise capital through equity offerings.

Our stock is traded on the Electronic, Over the Counter Bulletin Board. Stocks that trade on the OTC Bulletin Board tend to experience dramatic price volatility. The trading price of our common stock has been subject to significant fluctuations to date and could be subject to wide fluctuations in the future, limiting our ability to raise capital at favorable terms and increasing the cost of capital in the equity markets. The lower our stock trades, the greater the dilutive effect upon stockholder value if equity offerings are used to raise capital.

If we fail to adequately protect our proprietary technologies, third parties may be able to use our technologies, which could prevent us from competing in the market.

Our success is dependent upon our proprietary information and technology. We rely on a combination of patent, contract, trademark and trade secret laws and other measures to protect our proprietary information and technology. The patents issued to us may not be adequate to protect our proprietary rights, to deter misappropriation or to prevent an unauthorized third party from copying our technology, designing around the patents we own or otherwise obtaining and using our products, designs or other information. In addition, patents may not be issued under future patent applications, and the patents issued under such patent applications could be invalidated, circumvented or challenged. It may also be particularly difficult to protect our products and intellectual property under the laws of certain countries in which our products are or may be manufactured or sold. There can be no assurance that the steps we have taken to protect our technology will be successful.

We believe our products and technology do not infringe on any proprietary rights of others. Any claims for infringement, with or without merit, could result in costly litigation or might require us to enter into royalty or licensing agreements. Such royalty or licensing agreements, if required, may not be available on terms acceptable to us or at all. Any successful infringement claim could result in a cessation of operations and limit funds available for operational needs as we do not have insurance coverage that provides for the legal defense of intellectual property. Legal defense costs in intellectual property actions are extremely costly and lengthy in duration.

We operate in an intensely competitive industry with rapidly evolving technologies, and our competitors may develop products and technologies that make ours obsolete.

We are in an extremely competitive market. We compete because of our service, price, quality, reliability and efficiency of our products. Several of our competitors have more money. Several of the Companies we compete with are RECold, BAC, and Evapco, York, and Carrier.

Our stock price is likely to be below \$5.00 per share and is currently a "Penny Stock" which will place restrictions on broker-dealers recommending the stock for purchase.

Our common stock is defined as "penny stock" under the Securities Exchange Act of 1934, and its rules. The SEC has adopted regulations that define "*penny stock*" to include common stock that has a market price of less than \$5.00 per share, subject to certain exceptions.

Additional sales practice requirements are imposed on broker-dealers who sell penny stocks to persons other than established customers and accredited investors. For these types of transactions, the broker-dealer must make a special suitability determination for the purchaser and must have received the purchaser's written consent to the transaction prior to sale. If our common stock becomes subject to these penny stock rules these disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for our common stock, if such trading market should occur. As a result, fewer broker-dealers are willing to make a market in our stock. You would then be unable to resell our shares.

Anti-Takeover Provisions In Our Charter Documents And Nevada Law Could Make A Third-Party Acquisition Of Us Difficult. This Could Limit The Price Investors Might Be Willing To Pay In The Future For Our Common Stock.

Provisions in our amended and restated certificate of incorporation and bylaws could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from attempting to acquire, or control us. These provisions could limit the price that certain investors might be willing to pay in the future for shares of our common stock. Our amended and restated certificate of incorporation allows us to issue preferred stock with rights senior to those of the common stock without any further vote or action by the stockholders and our amended and restated bylaws eliminate the right of stockholders to call a special meeting of stockholders, which could make it more difficult for stockholders to effect certain corporate actions. These provisions could also have the effect of delaying or preventing a change in control. The issuance of preferred stock could decrease the amount of earnings and assets available for distribution to the holders of our common stock or could adversely affect the rights and powers, including voting rights, of such holders. In certain circumstances, such issuance could have the effect of decreasing the market price of our common stock.

Specific Risks Related to Prior Stock Offerings

The Securities and Exchange Commission may apply the “integration doctrine” for private sales of unregistered Common Stock since June 30, 2000.

Since June 30, 2000, we have raised working capital through the sale of common stock. None of the stock sold was registered under the Securities Act of 1933, as amended (the “Act”) or any state securities’ laws. We have determined that of the stock issuances since June 30, 2000, approximately 6,784,591 shares of common stock has already been resold pursuant to Rule 144 or had removed restrictive legends under Rule 144K. Additionally we agreed to register for resale 6,818,426 shares of the common stock (or underlying options and warrants). We have filed registration statements (SEC File No. 333-119112 and File No. 333-115094) for those 6,818,426 shares sold in the private placements. File Number 333-115094 was last amended on October 18, 2005. We have subsequently requested to withdraw Form S-1 Registration Statement, File No. 333-119112. We believe that all of the private placement sales were made only to “accredited investors” a that term is defined under Regulation D of the Act, and therefore did not involve a public offering within the meaning of Sections 4(2), 4(6) of Regulation D of the Act. In the event that an exemption for such sales is later determined not to be available to us or that such offerings should be integrated with Public Offerings, we may be required to take such steps as may be necessary to comply with federal and state securities laws for such sales. The withdrawn registration statement was refiled with the SEC on November 10, 2005 and assigned File Number 333-129658.

PowerCold Corporation

La Vernia, Texas

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have audited the accompanying consolidated balance sheets of PowerCold Corporation as of December 31, 2005 and 2004 and the related statements of operations, stockholders' equity (deficit) and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of PowerCold Corporation as of December 31, 2005 and 2004 and the results of its operations, stockholders equity (deficit) and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 3, the Company has sustained substantial operating losses in recent years and has a large accumulated deficit. Additionally, intangible assets comprise a material portion of the Company's assets. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management's plans regarding those matters also are described in Note 3. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

PowerCold Corporation (“the Company”) was incorporated on October 7, 1987 in the State of Nevada. PowerCold is a solution provider of energy efficient products for the refrigeration, air conditioning, power, hospitality, chain restaurants and chain retail industries. The Company designs, develops, markets and installs proprietary equipment to achieve electric power cost savings for commercial and industrial firms. PowerCold's energy efficient products are designed to reduce power costs for air conditioning, refrigeration and on-site building power.

The Company derives its revenues from four principal product line applications. The first is proprietary applications for the HVAC industry including a patented four pipe integrated piping system for large commercial buildings and turnkey HVAC systems for light commercial national chain store applications. The second is a line of evaporative condensers, heat exchange systems and fluid coolers for the HVAC and refrigeration industry. The third is the design and packaging of custom chiller systems for the HVAC and refrigeration industry. The fourth is energy products including desiccant systems and engine driven chillers. The Company also provides engineering and project management for installation of its equipment in new construction.

In a minor acquisition, effective May 1, 2005 PowerCold Corporation acquired 100% of the assets of Sterling Mechanical, Inc. (“SMI”), an Englewood, Colorado based engineering and design firm that provides engineering and marketing supporting heating, ventilation and air conditioning (HVAC) systems and technologies.

PowerCold Technology, LLC is a Nevada limited liability company formed on February 22, 2004 (“PCT”) to hold title to all of the Company’s intellectual property as well as licensing such intellectual property.

On December 31, 2005 PowerCold Corporation disposed of its interest in its wholly owned subsidiary, PowerCold ComfortAir Solutions, Inc., by selling the entity to its previous employees. Included in the transaction was a technology and trademark license agreement for Comfort Air Solutions, Inc. that will provide royalty revenue for PowerCold Corporation.

Effective January 1, 2006, three of PowerCold Corporation’s wholly owned subsidiaries, PowerCold Products, Inc., PowerCold International, Ltd., have been terminated and the assets transferred to PowerCold Corporation. PowerCold Technology, LLC., which holds title to all the intellectual property and licensing rights of the Company, will remain a wholly owned subsidiary of PowerCold Corporation.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies is presented to assist in understanding the financial statements. The financial statements and notes are representations of the Company’s management, which is responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the financial statements.

Accounting Method

The Company’s financial statements are prepared using the accrual method of accounting.

Accounting Pronouncements - Recent

In March 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 156, “Accounting for Servicing of Financial Assets—an amendment of FASB Statement No. 140.” This statement requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in any of the following situations: a transfer of the servicer’s financial assets that meets the requirements for sale accounting; a transfer of the servicer’s financial assets to a qualifying special-purpose entity in a guaranteed mortgage securitization in which the transferor retains all of the

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

resulting securities and classifies them as either available-for-sale securities or trading securities; or an acquisition or assumption of an obligation to service a financial asset that does not relate to financial assets of the servicer or its consolidated affiliates. The statement also requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable and permits an entity to choose either the amortization or fair value method for subsequent measurement of each class of servicing assets and liabilities. The statement further permits, at its initial adoption, a one-time reclassification of available for sale securities to trading securities by entities with recognized servicing rights, without calling into question the treatment of other available for sale securities under Statement 115, provided that the available for sale securities are identified in some manner as offsetting the entity's exposure to changes in fair value of servicing assets or servicing liabilities that a servicer elects to subsequently measure at fair value and requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities. This statement is effective for fiscal years beginning after September 15, 2006, with early adoption permitted as of the beginning of an entity's fiscal year. Management believes the adoption of this statement will have no impact on the Company's financial condition or results of operations.

In February 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 155, "Accounting for Certain Hybrid Financial Instruments, an Amendment of FASB Standards No. 133 and 140" (hereinafter "SFAS No. 155"). This statement established the accounting for certain derivatives embedded in other instruments. It simplifies accounting for certain hybrid financial instruments by permitting fair value remeasurement for any hybrid instrument that contains an embedded derivative that otherwise would require bifurcation under SFAS No. 133 as well as eliminating a restriction on the passive derivative instruments that a qualifying special-purpose entity ("SPE") may hold under SFAS No. 140. This statement allows a public entity to irrevocably elect to initially and subsequently measure a hybrid instrument that would be required to be separated into a host contract and derivative in its entirety at fair value (with changes in fair value recognized in earnings) so long as that instrument is not designated as a hedging instrument pursuant to the statement. SFAS No. 140 previously prohibited a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. This statement is effective for fiscal years beginning after September 15, 2006, with early adoption permitted as of the beginning of an entity's fiscal year. Management believes the adoption of this statement will have no impact on the Company's financial condition or results of operations.

In May, 2005, The Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 154, "Accounting Changes and Error Corrections – A Replacement of APB Opinion No. 20 and FASB Statement No. 3 ("hereinafter" "SFAS No. 154"). This statement replaces APB Opinion No. 20, "Accounting Changes" and FASB Statement No. 3, "Reporting Accounting Changes in Internal Financial Statements" and revises the requirements regarding accounting for and reporting a change in accounting principle. This statement requires retrospective application of the accounting change to the financial statements of prior periods, unless it is impractical to determine the period-specific effects or the cumulative effect of changing to the new accounting principle. This statement also addresses the reporting issues related to a change in accounting principle if it is impractical to determine the period-specific effects or the cumulative effect of the change. The adoption of this statement had no immediate material effect on the Company's financial condition or results of operations.

In December 2004, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 153. This statement addresses the measurement of exchanges of nonmonetary assets. The guidance in APB Opinion No. 29, "Accounting for Nonmonetary Transactions," is based on the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged. The guidance in that opinion, however, included certain exceptions to that principle. This statement amends Opinion 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

exchange. This statement is effective for financial statements for fiscal years beginning after June 15, 2005. Earlier application is permitted for nonmonetary asset exchanges incurred during fiscal years beginning after the date of this statement is issued. Management believes the adoption of this statement will have no impact on the financial statements of the Company.

In November 2004, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 151, "Inventory Costs— an amendment of ARB No. 43, Chapter 4." This statement amends the guidance in ARB No. 43, Chapter 4, "Inventory Pricing," to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). Paragraph 5 of ARB 43, Chapter 4, previously stated that ". . . under some circumstances, items such as idle facility expense, excessive spoilage, double freight, and rehandling costs may be so abnormal as to require treatment as current period charges. . . ." This statement requires that those items be recognized as current-period charges regardless of whether they meet the criterion of "so abnormal." In addition, this statement requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. This statement is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. Management does not believe the adoption of this statement will have any immediate material impact on the Company.

Advertising Expenses

Advertising expenses consist primarily of costs incurred in the design, development, and printing of Company literature and marketing materials. The Company expenses all advertising expenditures as incurred. The Company's advertising expenses were \$10,199, \$3,015 and \$3,581 for the years ended December 31, 2005, 2004 and 2003, respectively. This expense is included in the loss from discontinued operations.

Bad Debts Expense

The Company estimates bad debts utilizing the allowance method, based upon past experience and current market conditions. The Company recognized \$2,034,335 and \$1,664,928 of bad debts in 2005 and included this expense in loss from discontinued operations. The Company did not accrue any additional bad debt expense in the year ended December 31, 2005 and 2004.

Cash and Cash Equivalents

For purposes of the statements of cash flows, the Company considers all highly liquid investments with original maturities of three months or less and restricted cash to be cash equivalents.

Compensated Absences

Employees of the Company are entitled to paid vacation, sick, and personal days off, depending on job classification, length of service, and other factors. The Company accrues vacation expense throughout the year. Accrued vacation payable for the years ended December 31, 2005 and 2004 was \$15,997 and \$5,625, respectively, and is included in accrued expenses on the Company's balance sheets.

Concentration of Credit Risk

The Company maintains its cash in several commercial accounts at major financial institutions. At December 31, 2005, the Company's cash balance in one account exceeded Federal Deposit Insurance Corporation (FDIC) limits by \$147,749 and at December 31, 2004, the Company's cash balance in one account exceeded (FDIC) limits by \$1,261,930.

Accounts Receivable

Receivables from the sale of heating and air-conditioning systems for commercial properties are based on contracted prices. Allowance for doubtful accounts is based upon a quarterly review of outstanding receivables, historical collection information, and existing economic conditions. Normal receivables are due 30 days after the date of the invoice. Receivables past due more than 120 days are considered delinquent. Delinquent receivables are written off based on individual credit evaluation and specific circumstances of the customer. The Company's policy is not to accrue interest on trade receivables.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

The Company carries its accounts receivable at cost less an allowance for doubtful accounts. On a periodic basis, the Company evaluates its accounts receivable and establishes an allowance for doubtful accounts, based on a history of past write-offs, collections and current credit conditions. As of December 31, 2005, the Company's allowance account was \$0.

Derivative Instruments

In April 2003, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities" (hereinafter "SFAS No. 149"). SFAS No. 149 amends and clarifies the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities." This statement is effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. The adoption of SFAS No. 149 is not expected to have a material impact on the financial position or results of operations of the Company.

In June 1998, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 133 ("SFAS No. 133"), "Accounting for Derivative Instruments and Hedging Activities," as amended by SFAS No. 137, "Accounting for Derivative Instruments and Hedging Activities – Deferral of the Effective Date of FASB No. 133," and SFAS No. 138, "Accounting for Certain Derivative Instruments and Certain Hedging Activities," which is effective for the Company as of January 1, 2001. These standards establish accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. They require that an entity recognize all derivatives as either assets or liabilities in the consolidated balance sheet and measure those instruments at fair value.

If certain conditions are met, a derivative may be specifically designated as a hedge, the objective of which is to match the timing of gain or loss recognition on the hedging derivative with the recognition of (i) the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk or (ii) the earnings effect of the hedged forecasted transaction. For a derivative not designated as a hedging instrument, the gain or loss is recognized in income in the period of change.

Historically, the Company has not entered into derivatives contracts to hedge existing risks or for speculative purposes.

At December 31, 2005 and 2004, the Company has not engaged in any transactions that would be considered derivative instruments or hedging activities.

Discontinued Operations

In accordance with SFAS No. 144 effective August 1, 2001, the Company and reports operating results of entities disposed of during the year as discontinued operations. Assets and liabilities of certain dispositions have been restated as net assets from discontinued operations for the years ended December 31, 2003, 2004 and 2005.

Earnings Per Share

On January 1, 1998, the Company adopted Statement of Financial Accounting Standards No. 128, which provides for calculation of "basic" and "diluted" earnings per share. Basic earnings per share includes no dilution and is computed by dividing net income/loss available to common shareholders by the weighted average common shares outstanding for the period. Diluted earnings per share reflect the potential dilution of securities that could share in the earnings of an entity. Although there are common stock equivalents outstanding, they were not included in the calculation of earnings per share because they would have been considered anti-dilutive for the periods presented. At December 31, 2005 and 2004, the Company had 6,940,556 and 6,180,535 potentially dilutive securities outstanding.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

Segment Information

The Company has adopted Statement of Financial Accounting Standards No. 131, "Disclosures about Segments of an Enterprise and Related Information," (hereafter "SFAS No. 131"). SFAS No. 131 established standards for reporting information about operating segments in annual financial statements and requires selected information about operating segments in interim financial reports issued to stockholders. It also established standards for related disclosures about product and services and geographic areas. Operating segments are defined as components of an enterprise about which separate financial information is available evaluated regularly by the chief operating decision makers, or a decision making group, in deciding how to allocate resources and assessing performance. The separate management of each segment is required because each business unit is subject to different marketing, production and technology strategies. Prior to 2005, the Company segments included the subsidiary which was disposed of during 2005. The continuing operations of the Company have no reportable segments and the financial information as a whole supports our only continuing business enterprise.

Fair Value of Financial Instruments

The Company's financial instruments as defined by SFAS No. 107, "Disclosures about Fair Value of Financial Instruments," include cash, advances from related party, trade accounts receivable, accounts payable, accrued expenses and notes payable. These instruments are accounted for on the historical cost basis, which, due to the short maturity of these financial instruments, approximates fair value at December 31, 2005 and 2004.

Goodwill

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 141, "Business Combinations" (hereinafter "SFAS No. 141") and Statement of Financial Accounting Standard No. 142, "Goodwill and Other Intangible Assets" (hereinafter "SFAS No. 142"). SFAS No. 141 provides for the elimination of the pooling-of-interests method of accounting for business combinations with an acquisition date of July 1, 2001 or later. SFAS No. 142 prohibits the amortization of goodwill and other intangible assets with indefinite lives and requires periodic reassessment of the underlying value of such assets for impairment. SFAS No. 142 is effective for fiscal years beginning after December 15, 2001. The Company adopted SFAS No. 142. Application of the nonamortization provision of SFAS No. 142 resulted in an increase in net income of approximately \$10,000 in fiscal 2003.

Income Taxes

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes," which requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statements and tax bases of assets and liabilities using statutory income tax rates in effect for the year in which the differences are expected to reverse. See Note 14.

Investment in Securities

Investments in debt and marketable equity securities are designated as trading, held to maturity, or available for sale in accordance with Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities." Trading securities are reported at fair value, with changes in fair value included in earnings. Available for sale securities are reported at fair value, with net unrealized gains and losses included as a component of stockholders' equity. Held to maturity securities are reported at amortized cost. Gains and losses on the sale of securities are determined using the specific identification method. For all investment securities, unrealized gains and losses that are other than temporary are recognized as a component of earnings in the period incurred. Market value is determined based on quoted market prices. See Note 9.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

Patents Right and Related Technology

The cost of intellectual property purchased from others that is immediately marketable or that has an alternative future use is capitalized as intangible assets and amortized, if it has a determinable life. Capitalized costs are amortized using the straight-line method over the estimated economic life, typically ten to fifteen years, of the related asset. The Company periodically reviews its capitalized patent costs to assess recoverability based on the projected undiscounted cash flows from operations. Impairments are recognized in operating results when a permanent diminution in value occurs. Research and development are charged to operations as incurred. See Note 8.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, after elimination of intercompany accounts and transactions. Wholly owned subsidiaries of the Company are listed in Note 1.

Product Warranties

The Company sold the majority of its products with one-year unconditional repair or replacement warranties. Warranty expense of \$228,614 and \$222,046 for the years ended December 31, 2005 and 2004, respectively, is included in cost of sales.

Property and Equipment

Property and equipment are stated at cost. Depreciation of property and equipment is calculated using the straight-line method over the estimated useful lives of the assets, which range from three to ten years. See Note 7.

Reclassification & Restatements

Certain prior year amounts in the accompanying financial statements have been reclassified to conform to the fiscal 2005 presentation. The reclassifications principally consists of revised reporting of operating results of the discontinued segment of PowerCold Comfort Air Solutions, Inc. for the years ending December 31, 2004 and 2003. These reclassifications have resulted in no changes to the Company's accumulated deficit or net losses presented.

Restricted Cash

The Company is required pursuant to its loan agreement with Laurus to maintain \$100,000 in its lock box account at all times. As of December 31, 2005, approximately \$83,000 was maintained in the lock box.

Revenue Recognition

The Company recognizes revenue from product sales upon shipment of our product to customers, upon fulfillment of acceptance terms, if any, when no significant contractual obligations remain and collection of the related receivable is reasonably assured. Revenue is reported net of a provision for estimated product warranties.

Stock-Based Compensation

Historically, the Company accounted for stock issued for compensation in accordance with Accounting Principles Board No. 25, "Accounting for Stock Issued to Employees." Under this standard, compensation cost is the difference between the exercise price of the option and fair market of the underlying stock on the grant date. In accordance with Statement of Financial Accounting Standards No. 123, "Accounting for Stock Based Compensation," for December 31, 2003 and 2004 the Company discloses the pro forma effects on net income and earnings per share as if compensation had been measured using the "fair value method" described therein.

In December 2004, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 123R, "Accounting for Stock Based Compensations." This statement supersedes APB Opinion No. 25, "Accounting for Stock Issued to Employees," and its related implementation guidance. This statement establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. This statement focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. This statement does not change the accounting guidance for share based payment transactions with parties other than employees provided in Statement of Financial Accounting Standards No. 123. This statement does not address the accounting for employee share ownership plans, which are subject to AICPA Statement of Position 93-6, "Employers' Accounting for Employee Stock Ownership Plans." The Company adopted this statement in 2005.

Use of Estimates

The process of preparing financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues, and expenses. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Accordingly, upon settlement, actual results may differ from estimated amounts.

NOTE 3 – GOING CONCERN

The accompanying consolidated financial statements, which contemplate continuation of the Company as a going concern, have been prepared in conformity with accounting principles generally accepted in the United States of America. At December 31, 2005, the Company had a large accumulated deficit and recurring losses from operations for each year presented. Property, equipment and intangibles comprise a material portion of the Company's assets. The recovery of these assets is dependent upon achieving profitable operations. The ultimate outcome of these uncertainties cannot presently be determined.

Management plans to exploit its proprietary applications and technology and plastic products, while focusing on growth segments of the hospitality industry, national account chain stores and restaurants. Management expects to improve its cash management by addressing past due accounts receivable through rigorous collections policy. The Company intends to raise capital through the licensing of its heat exchange technology in markets outside of North America with five and ten year licensing agreements that include annual renewal fees and royalties on sales.

NOTE 4 – RELATED PARTY TRANSACTIONS

The Company has received funding on several occasions from the Company's chairman and Simco Group, Inc, ("Simco"), a separate legal entity wholly owned by the Company's chairman. This funding is unsecured, due on demand, and memorialized by conventional debt instruments (notes).

During the year ended December 31, 2005, Simco made two loans to the Company in the total amount of \$1,507,060 payable upon demand with interest. These loans are conventional loans. During 2005, Simco was repaid \$290,700 and converted \$400,400 in loans to 616,000 shares of common stock at \$0.65 per share, the prior ten day average of the closing price on the day of conversion. Simco was issued 100,000 shares of common stock for consulting services valued at \$100,000 during 2005. In addition Simco was issued 200,000 shares of common stock for financial funding services at \$1.35 per share, the prior three day average of the closing price on the day of issuance, for a total of \$270,000, and exercised 150,000 options with an average in cash exercise price of \$0.61 per share for \$422,940.

During the year ended December 31, 2004, the Company repaid \$245,080 of a related party note to Simco. In addition, \$95,500 of consulting fees were paid to Simco in advance by issuing 106,111 shares of common stock.

NOTE 5 – ACQUISITIONS

Sterling Mechanical, Inc.

Effective May 1, 2005, in a minor acquisition, PowerCold Corporation acquired 100% of the assets of Sterling Mechanical, Inc. (“SMI”), an Englewood, Colorado based engineering and design firm that provides engineering and marketing supporting heating, ventilation and air conditioning (HVAC) systems and technologies. SMI assets were transferred into PowerCold’s wholly owned subsidiary, PowerCold ComfortAir Solutions, Inc. The assets of SMI were transferred to PowerCold Corporation upon the discontinuance of Comfort Air Solutions, Inc.

NOTE 6 – INVENTORY

Inventories are stated at the lower of average cost or market. The cost of finished goods includes the cost of raw material, direct and indirect labor, and other indirect manufacturing costs.

Inventories at December 31, 2005 and 2004 consist of raw materials.

NOTE 7 – PROPERTY AND EQUIPMENT

Property and equipment is summarized as follows:

	December 31, 2005	December 31, 2004
Machinery and equipment	\$ 267,556	\$ 267,556
Prototypes and molds	96,850	96,850
Furniture and fixtures	85,235	85,235
Total Property and Equipment	449,641	449,841
Less Accumulated Depreciation	234,874	164,537
Net Property and Equipment	\$ 214,767	\$ 285,104

Depreciation expense for the years ended December 31, 2005 and 2004 was \$55,040 and \$41,970, respectively. See Note 17 for assets included in discontinued operations.

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 143, “Accounting for Asset Retirement Obligations” (hereinafter “SFAS No. 143”). SFAS No. 143 establishes guidelines related to the retirement of tangible long-lived assets of the Company and the associated retirement costs. This statement requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived assets. The Company adopted SFAS No. 143 and the adoption did not have a material impact on the financial statements of the Company.

NOTE 8 — INTANGIBLE ASSETS

The Company’s intangible assets are summarized as follows:

	December 31, 2005	December 31, 2004
Patents and related technology	\$ 1,042,263	\$ 1,042,263
Less: Accumulated amortization	934,716	876,790
Net Intangibles Assets	\$ 107,547	\$ 165,473

Amortization expense for the years ended December 31, 2005, 2004, and 2003, was \$57,926, \$57,926 and \$77,236, respectively.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

The Company holds patents for heat exchange and condenser technology for air conditioning, which expire 17 years from date of issuance. The Company also holds a ten-year license on patented integrated piping technology, has five trademarks, and has several patents pending. See Note 16 for intangibles included in discontinued operations.

NOTE 9 — INVESTMENTS

The Company invested \$1,000,000 in Rotary Power International, Inc. (hereinafter “RPI”) in exchange for 2,000,000 shares of RPI’s common stock.

As of December 31, 2001, the fair market value of these securities was \$970,000. At December 31, 2002, the fair market value of the securities was reduced to \$38,800. At December 31, 2003, the fair market value of the securities was reduced to \$19,317. At December 31, 2004 the fair market value of the securities was reduced to \$0. This change in value has been recognized as other comprehensive loss in accordance with SFAS No. 115.

NOTE 10 – NOTES PAYABLE AND CONVERTIBLE DEBT

Long-Term Note Payable

On July 29, 2004 the Company entered into an agreement with Laurus Master Fund, Ltd., a Cayman Islands company (“Laurus”) to borrow \$5,000,000 under a convertible term note (“note”). Under the terms of the agreement, the Company also issued common stock purchase warrants to Laurus to purchase 615,000 shares of common stock, exercisable for three years from the initial exercise date. The exercise prices of the warrants are \$2.63 for 300,000 shares and \$3.07 for the remaining shares.

The note, which matures on July 29, 2007, bears interest at the prime rate of interest plus 1 percentage point, with a minimum interest rate of 5% and a maximum rate of 8%. The note is convertible into common stock with a conversion price of \$1.87 on July 29, 2004, subject to conversion by Laurus as well as an automatic conversion. The fixed conversion price of \$1.87 per share is applicable when the PowerCold stock average closing price for the five days prior to the repayment is at or above 110% of the fixed conversion price. Conversion at less than the fixed conversion price is set at 90% of the average of the five lowest trading days in the 22 trading days prior to the conversion date. The fixed price cannot be less than \$1.10 per share. The beneficial conversion feature of this note has been recorded as additional paid-in capital of \$569,106 and as a discount to the note, amortizable over three years. At December 31, 2004, \$79,042 has been amortized. The Company also retains the right to prepay the note at 125% of the unpaid balance for 12 months from July 29, 2004; 115% of the unpaid balance for 12-24 months from July 29, 2004; and 110% of the unpaid balance after 24 months from July 29, 2004. As consideration for investment banking services in connection with the securities purchase agreement, the Company paid 4.29% of the gross proceeds to Laurus Capital Management, LLC, (an affiliate of Laurus Master Fund, Ltd), which received consideration for investment banking services in connection with the aforementioned agreement.

Laurus can convert to equity any portion of the principal balance and accrued but unpaid interest subject to certain limitations.

On March 22, 2006, the Company requested the withdrawal of its Form S-1 registration Statements (File No. 333-129658 for 5,797,995 shares of common stock, and File No. 333-115094 for 2,360,431 shares of common stock) in anticipation of a new private placement offering. No securities were sold in connection with the proposed offerings. As a result of the S-1 withdrawal, the Company no longer has the prospective option of repaying convertible debt with newly registered stock and has accounted for the debt as a conventional loan.

Accordingly, without the availability of newly registered stock, the Company’s convertible debt has reverted to conventional loans, which payment must be made in cash. The \$5,000,000 convertible note to Laurus Master Fund LTD issued on April 29, 2004 was recently partially repaid in cash at the request of Laurus as there is no newly registered common stock available for Laurus to exercise the conversion feature of its note. Laurus cannot effectively exercise its option to convert the debt and continues to be repaid in cash.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

Monthly amortizing payments of the aggregate principal amount outstanding under the note began on February 1, 2005 in the amount of \$166,667 plus interest. The Company has recorded a discount on the note for deferred financing costs of \$641,500 which will be amortized over the life of the loan. Amortization expense for 2004 was \$53,460 and \$213,833 for 2005. The Company has recorded a discount on the note for beneficial conversion of \$569,105 which will be amortized over the life of the loan. Amortization expense at December 31, 2005 was \$189,701.

The Company also agreed to file a registration statement within 45 days from July 29, 2004, registering the number of shares underlying the secured convertible term note and the warrants, and to have that registration statement declared effective with the Securities and Exchange Commission within 120 days from July 29, 2004. In the event that the registration statement is not declared effective by the Securities and Exchange Commission by the required deadline, the Company is obligated to pay to Laurus Master Fund 1% of the continuing outstanding principal amount of the convertible note, for each 30-day period, or portion thereof, during which the registration statement is not effective.

The Company has not paid any liquidity damages since May 2005. Although further liquidity damages could be assessed, the Company believes that all prior issues were settled in May 2005.

Future minimum principal payments on the note are as follows:

<u>Year</u>	<u>Annual Maturity Amount</u>
2006	\$2,000,000
2007	\$1,418,648

The securities purchase agreement, secured convertible term note and the registration rights agreement with Laurus, originally dated July 29, 2004, were amended on March 9, 2005 to reschedule the originally required effectiveness date (November 27, 2004) of the registration statement filed with the SEC to June 15, 2005, and to reschedule the initial principal payments due February, March, April and May 1, 2005 to April, May, June and July 1, 2007. For the amended rescheduled payments and new effective date the Company has agreed to issue a new warrant purchase agreement to Laurus for 665,000 shares for a term of five years at \$1.70 per share. The Company recognized a fair market value charge of \$125,302 for the issuance of 215,000 warrants for the rescheduled principal payments over the period from February 1, 2005, through August 1, 2007. In addition the Company will take a fair market value charge of \$262,260 for the issuance of 450,000 warrants as a result of the registration statement filed with the SEC not being effective as of November 27, 2004 and being extended to June 15, 2005. On May 27, 2005 the Company issued common stock purchase warrants to Laurus to purchase 60,000 shares of common stock, exercisable for five years from the Initial Date of Exercise. The exercise price of the warrants is \$1.70. These warrants were issued by the Company in connection with the amendment of the secured convertible term note and the registration rights agreement with Laurus, all originally dated July 29, 2004 and previously amended March 9, 2005, to reschedule the required effectiveness date (June 15, 2005) of the registration statement filed with the SEC to September 30, 2005 and to reschedule the principal payment of \$166,666.67 due June 1, 2005 to August 1, 2007. The additional fair market value of these warrants has been recognized as financing expense.

Current Notes Payable

At December 31, 2005 and 2004, notes payable included a line of credit payable to Royal Bank of Canada for \$34,014 U.S. The Company made interest only payments on this line of credit which is unsecured. During the year ended December 31, 2003, the Company discontinued making the interest payments and is disputing the loan which was in the name of Steven and Susan Clark and remains in dispute as of the date of this filing. See Note 17 for liabilities included in discontinued operations.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

The Company received from Simco Group, Inc., a related party, loans of \$161,108, \$100,000, and \$1,507,461 during 2003, 2004, and 2005, respectively. The advances in 2003 bear interest at 8% and are payable on demand. No payments were made against the principal during 2003 and \$245,000 was repaid in 2004. The debt was convertible to common stock as calculated at 50% of the bid price at the end of the quarter preceding conversion during 2003. The loans made in 2005 are payable upon demand with an annual interest rate of prime, as published in the Wall Street Journal, plus 1%, not to exceed 8%. \$290,700 was repaid in 2005. At December 31, 2005, the interest accrued for the loan from Simco was \$34,394. At December 31, 2005, the balance of the notes payable to related party (Simco) was \$988,597. The beneficial conversion feature of the 2003 loan is recorded as additional paid in capital. The interest expense, related to these loans, recorded in 2005 and 2004 is \$34,394 and \$218,979, respectively.

NOTE 11 – CONVERTIBLE PREFERRED STOCK

The Company is authorized to issue 5,000,000 shares of \$0.001 par value preferred stock, which contains no voting privileges. Shareholders are entitled to cumulative dividends, and each share of preferred stock may be converted into the Company's common stock. No shares of preferred stock have been issued.

NOTE 12 – COMMON STOCK

Upon incorporation, the Company was authorized to issue 200,000,000 shares of its \$0.001 par value common stock.

During the year ended December 31, 2005, the Company issued 2,016,879 shares of common stock. The Company issued 500,000 shares of common stock for consulting fees and services of \$517,500. Additionally, 695,879 options were exercised for cash of \$422,940 by Francis L. Simola, an officer and director of the company. The Company issued 616,000 common stock shares for a loan conversion of \$400,400; 5,000 shares of common stock toward a partial interest in a patent acquisition at \$1.00 per share for a value of \$5,000; 200,000 shares of common stock for the acquisition of Sterling Mechanical at \$1.50 per share and 150,000 options with an exercise price of \$1.50 per share that will vest over a 3 year period. At May 1, 2005, 50,000 common stock options were vested with a fair market value of \$22,870.

The Company issued a new warrant purchase agreement to Laurus for 665,000 shares for a term of five years at \$1.70 per share. The Company recorded a charge of \$125,302 for the fair market value for the issuance of 215,000 warrants for the Laurus granting rescheduled principal payments over the period from February 1, 2005, through August 1, 2007. In addition, the Company recorded a fair market value charge of \$262,260 for the issuance of 450,000 warrants as a result of the registration statement filed with the SEC not being effective as of November 27, 2004 and being extended to June 15, 2005. On May 27, 2005, the Company issued common stock purchase warrants to Laurus to purchase 60,000 shares of common stock, exercisable for five years from the initial date of exercise. The exercise price of the warrants is \$1.70. Fair value of the warrants was calculated at \$29,904 using the Black-Scholes Calculation at date of grant assuming a risk free interest of 4.25%, volatility of 35% a term of five years, and no derivatives paid.

During the year ended December 31, 2004, the Company issued 1,909,067 shares of common stock. The Company issued 248,000 shares of common stock for consulting fees of \$108,000 and the services of \$123,250. In addition 390,625 shares of common stock with 192,032 warrants attached were issued in a private placement for cash of \$320,000. Of the attached warrants, 31,407 are exercisable at \$2.50 per share until June 30, 2007 and 160,625 are exercisable at \$2.00 per share until July 19, 2009. The calculated Black-Scholes fair market valuation was \$108,732. Additionally, 878,480 warrants were exercised for cash of \$779,075 and 210,000 options were exercised for cash of \$210,000. The Company issued 156,962 common stock shares for a loan conversion of \$253,501 and 25,000 shares of common stock toward a partial interest in a patent acquisition at \$1.50 per share for a value of \$37,500.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

NOTE 13 – STOCK-BASED COMPENSATION AND STOCK OPTIONS

During the year ended December 31, 2005, the Company issued 1,675,000 common stock options with an average exercise price of \$1.06 per share and a fair market value of \$315,235. These options expire from July 2008 through December 2010. The Company issued as compensation 1,025,000 options with an average exercise price of \$0.80 per share and a fair market value of \$230,357, with an exercise price from \$0.70 to of \$1.46 per share and a fair market value of \$62,000, with an exercise price from \$0.65 to \$2.50. The Company issued 150,000 common stock options for acquisitions with an exercise price of \$1.50 per share with 50,000 common stock options vested in 2005 with a fair market value of \$22,870.

During the year ended December 31, 2004, the Company issued 3,075,799 common stock options with an average exercise price of \$1.61 per share and a fair market value of \$1,897,463. These options expire from January 2007 through January 2010. Options issued as compensation totaled 2,635,799 with an average exercise price of \$1.51 per share and a fair market value of \$1,768,982. Common stock options issued for services totaled 440,000 with an average exercise price of \$2.17 per share and a fair market value of \$128,481.

The board of directors approved the exercise price of the options issued to employees to be at market value at the time of grant commencing January 2004. In prior periods, the exercise price was discounted because the stock is restricted.

The following is a summary of the Company's open stock option plans:

Equity compensation approved by security holders	Number of securities to be issued upon exercise of outstanding options	Weighted-average exercise price of outstanding options	Number of securities remaining available for future issuance under equity compensation plans
2002 Stock Option Plan	465,000	\$1.50	293,370
Total	465,000		293,370

The Company applied APB Opinion No. 25 in accounting for options and, accordingly, recognized no compensation cost for its stock options in 2004 and 2003. The following reflects the Company's pro forma net loss and net loss per share as if the Company had determined compensation costs based upon fair market values of options at the grant date, as well as the related disclosures required by SFAS 123:

	Year Ended December 31, 2004	Year Ended December 31, 2003
Net loss as reported	\$ (4,267,631)	\$ (2,656,549)
Adjustment required by SFAS 123	(3,794,926)	(492,597)
Pro forma net loss	\$ (8,131,958)	\$ (3,149,145)
Pro forma net loss per share, basic and diluted	\$ (0.40)	\$ (0.16)

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

	Number of Shares Under Option	Weighted Average Exercise Price
Outstanding and exercisable at December 31, 2003	4,052,283	1.16
Granted	3,075,799	1.61
Exercised	(210,000)	1.00
Rescinded or expired	(1,544,579)	1.38
Outstanding and exercisable at December 31, 2004	5,373,503	1.36
Granted	2,850,000	1.28
Exercised	(695,879)	0.61
Rescinded or expired	(1,394,100)	1.43
Outstanding at December 31, 2005	6,133,524	\$ 1.41
Exercisable at December 31, 2005	5,408,524	\$ 1.36
Weighted average fair value of options granted during 2005		\$ 0.20

At December 31, 2005, exercise prices for outstanding options ranged from \$0.50 to \$3.50. The weighted average contractual life remaining of such options was 2.6 years.

In accordance with Statement on Financial Accounting Standard No. 123, the fair value of the options granted was estimated using the Black-Scholes Option Price Calculation. The following assumptions were made to value the stock options:

Risk-free Interest Rate	4.25%
Expected Life	1 to 5 years
Expected Volatility	35%
Dividends Paid	-0-

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options, which have no vesting restrictions and are fully transferable.

In addition, option valuation models require the input of subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options.

Some options issued have been approved by the Company's board of directors but have not been approved by the Company's shareholders. Under the 2002 Stock Option Plan, 758,370 shares were approved by the Company's board of directors and the Company's shareholders and 465,000 have been issued in accordance with the plan

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

NOTE 14 –INCOME TAXES

Provision for Taxes

Income taxes are provided based upon the liability method of accounting pursuant to SFAS No. 109, “Accounting for Income Taxes.” Under this approach, deferred income taxes are recorded to reflect the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year-end. A valuation allowance is recorded against deferred tax assets if management does not believe the Company has met the “more likely than not” standard imposed by SFAS No. 109 to allow recognition of such an asset.

At December 31, 2005, the Company had a net deferred tax asset calculated at an expected rate of 34 % of approximately \$6,000,000, principally arising from net operating loss carryforwards for income tax purposes. As management of the Company cannot determine that it is more likely than not that the Company will realize the benefit of the net deferred tax asset, a valuation allowance equal to the net deferred tax asset is present at December 31, 2005 and in prior years.

At December 31, 2005 the Company has net operating loss carryforwards of approximately \$18,590,000, which expire in the years 2015 through 2025. The Company recognized approximately \$297,000 of losses from issuance of common stock warrants for expense in fiscal 2005, which are not deductible for tax purposes and are not included in the above calculation of deferred tax assets. The change in the allowance account from December 31, 2004 to December 31, 2005 was \$2,220,000.

The significant components of the approximate deferred tax asset at December 31, 2004, 2003 and 2002 were as follows:

	December 31, 2005	December 31, 2004	December 31, 2003
Net operating loss carryforward	\$ 18,590,000	\$ 12,000,000	\$ 8,300,000
Warrants issued for expenses	\$ 297,000	\$ 309,000	\$ 97,000
Unrealized net gain (loss) on investments	\$ -	\$ (19,000)	\$ 19,000
Deferred tax asset	\$ 6,320,000	\$ 4,100,000	\$ 2,800,000
Deferred tax asset valuation allowance	\$ (6,320,000)	\$ (4,100,000)	\$ (2,800,000)

NOTE 15 – LEASES

Operating Leases

The Company leases sales offices in Denver, Colorado for \$2,282 per month under an operating lease agreement, which expires June 30, 2006.

The Company leased sales offices and plant space in LaVernia, Texas for \$3,625 per month under an operating lease agreement, which expired March 30, 2004. The Company currently rents this space on a month-to-month basis at \$3,000 per month.

Total rent expense for the years ended December 31, 2005, 2004 and 2003 was \$69,964, \$43,800 and \$43,800, respectively.

The Company rents office space in San Antonio, Texas. The rent is \$550 per month on a month-to-month basis.

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

Future minimum operating lease commitments are as follows:

<u>Year Ending December 31,</u>	<u>Amount</u>
2006	\$ 13,692
2007	-
Total	<u>\$ 13,692</u>

NOTE 16 – DISPOSITION OF POWERCOLD COMFORTAIR SOLUTIONS, INC.

During the year ended December 31, 2005, the Company elected to fully dispose of PowerCold ComfortAir Solutions, Inc. (“PCAS”) and recorded costs associated from discontinued operations of \$5,000,930. The assets and liabilities disposed of from the discontinued operations of PCAS are as follows:

Account receivable	\$1,938,964
Other assets	8,828
Equipment, net	114,892
Intellectual property	860,000
Total Assets	<u>\$2,922,684</u>
Accounts payable	\$2,733,187
Billing in excess of costs and estimated earnings on contracts in progress	380,873
Notes payable	45,595
Total Liabilities	<u>\$3,159,655</u>

Costs associated with the disposal of PCAS were accounted for in discontinued operations. The Company received a note receivable from the new ownership group of PowerCold Comfort Air Solutions, Inc. for \$355,155 and experienced debt relief from the transfer of liabilities in excess of assets of \$236,971. The Company therefore had a gain from disposal of discontinued operations of \$592,106 which was offset against 2005 operating losses of discontinued operations of \$5,593,036.

In June 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 146, “Accounting for Costs Associated with Exit or Disposal Activities” (hereinafter “SFAS No. 146”). SFAS No. 146 addresses significant issues regarding the recognition, measurement, and reporting of costs associated with exit and disposal activities, including restructuring activities. SFAS No. 146 also addresses recognition of certain costs related to terminating a contract that is not a capital lease, costs to consolidate facilities or relocate employees, and termination benefits provided to employees that are involuntarily terminated under the terms of a one-time benefit arrangement that is not an ongoing benefit arrangement or an individual deferred-compensation contract. SFAS No. 146 was issued in June 2002, effective December 31, 2002 with early adoption encouraged. The effect on the Company’s financial statement of the adoption of SFAS No. 146 is reflected in discontinued operations.

The Company’s financial results of prior periods have been reclassified to reflect the discontinued operations of PCAS in 2005. Condensed results of discontinued segments are as follows:

	<u>December 31, 2004</u>	<u>December 31, 2003</u>
Net Sales	\$ <u>8,579,584</u>	<u>3,450,267</u>
Net Income (Loss)	\$ <u>(2,591,148)</u>	\$ <u>(377,387)</u>

POWERCOLD CORPORATION
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2005

In August 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (hereinafter "SFAS No. 144"). SFAS No. 144 replaces SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of." This standard establishes a single accounting model for long-lived assets to be disposed of by sale, including discontinued operations to include a "component of an entity" (rather than a segment of a business). A component of an entity comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity. A component of an entity that is classified as held for sale, or has been disposed of, is presented as a discontinued operation if the operations and cash flows of the component will be (or have been) eliminated from the ongoing operations of the entity and the entity will not have any significant continuing involvement in the operations of the component.

In accordance with SFAS No. 144 effective August 1, 2001, the operating results of PCAS, which was disposed of during the year ended December 31, 2005, are included in discontinued operations. Assets and liabilities of PCAS have been restated as net assets and liabilities from discontinued operations for the years ended December 31, 2004 and 2003.

NOTE 17 – ECONOMIC DEPENDENCY

The Company sells its products and engineering and contracting services throughout the United States and other countries. During the years ended December 31, 2005, 2004 and 2003, product and contracting services were provided to the following major customers which did constitutes 5% or more of our annual revenue.

2003	Shun Sheong Electrical Engineering \$129,066; 21% of revenue; ACCRA-TEMP, Inc. \$35,135; 6% of revenue; E-PAK Technology, \$39,510; 6% of revenue; Trane – Clarksville, \$44,035; 7%.
2004	None
2005	American Standard \$473,753; 71%

NOTE 18 — COMMITMENTS AND CONTINGENCIES

Litigation

PowerCold Corporation is pursuing claims against Industrias Polaris, S.A. for costs incurred for defective product, the return of advance payments for product never delivered and \$2,000 for attorney fees in regards to the material breach of the manufacturing agreement between PowerCold and Polaris. Polaris has engaged counsel in Texas and initiated discussions. Pending failure to comply with the demand for payment or an appropriate settlement offer, arbitration as stipulated in the manufacturing agreement, will be pursued. Prior to July 26, 2005 Polaris had agreed to a settlement proposal but has failed to execute the agreement. On February 17, 2006, an arbitrator awarded to PowerCold \$126,586 for actual damages and amended the award on April 10, 2006 to include \$7,115 as reasonable attorney's fees, \$1,500 for administrative fees and expenses and \$2,055 for fees in excess of the apportioned costs for a total of \$137,256. In addition, Polaris must return to PowerCold all drawings, schematics, specifications and ETL Labels for fan coils and Nauticon evaporative condensers and fluid cooler units, manufacturing plans for 1,000 CFM Dessicant unit and drawings for the mandrel used to bend copper coils. Collection efforts have been initiated for the Arbitrator's award \$137,256.85 from Polaris.

NOTE 19 — SUBSEQUENT EVENTS

Effective January 9, 2006, the Company engaged Flagstone Securities for a period of one year, to provide advisory and financial services and to secure various funding sources to support the monetary needs and growth of the Company. Flagstone Securities, LLC is a boutique investment bank headquartered in St. Louis, Missouri with additional offices in New York, Los Angeles and Geneva.

PowerCold is also a defendant in three separate matters, which are expected to be settled in 2006. The settlement of these possible litigations will require the Company to make certain payments by July 2006 totaling \$125,000 which will provide the Company with releases for any further actions.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

Attached as exhibits to this Form 10-K are certifications of PowerCold's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934, as amended (the Exchange Act). This "Controls and Procedures" section includes information concerning the controls and controls evaluation referred to in the certifications. The management of PowerCold Corporation (the "Company"), under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) or 15d-15(e)) as of the end of the period covered by this report. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives, Our CEO and CFO have concluded that our disclosure controls and procedures were not effective at that reasonable assurance level for the period stated.

We previously filed on April 17, 2006, a report on Form 10-K for the period ended December 31, 2005. In that Report, Management concluded that at that time and for such period, that with respect to the effectiveness of our disclosure controls and procedures as of the end of the period covered by the report, Management concluded that, subject to stated limitations, our Disclosure Controls were effective to ensure that material information relating to PowerCold Corporation, Inc. and its subsidiaries was made known to management, and that our Internal Controls were effective to provide reasonable assurance that our financial statements were fairly presented in conformity with generally accepted accounting principles. We have modified and clarified such disclosure to reflect that there were significant deficiencies and material weaknesses in our Internal Controls. Our original assessment was based solely upon a review of our controls and procedures and not those of our subsidiaries. During management's internal audit concluded late October 2005 (by its CFO and CAO) of its subsidiary company PowerCold ComfortAir Solutions, Inc., prior to the year-end Independent Audit, management discovered that PowerCold ComfortAir Solutions, Inc. was not following its Corporate Controls and Procedures that were in effect at that time. The management of the Company's subsidiary was providing inappropriate accounting information concerning the recognition of sales and corresponding expenses under a method, which was not in compliance with percentage of completion accounting. Sales were being recognized when made not when the proceeds of the sale were earned. After management discussed the matter with its Independent Auditors and the non compliance of the subsidiary with the Company's internals controls and procedures, management decided that the operations of PowerCold ComfortAir Solutions, Inc. were no longer an appropriate business activity of the Company and that the subsidiary would be sold to its existing management.

PowerCold ComfortAir Solutions was sold to its employees. In late October 2005, based upon the failure of PowerCold Comfort Air Solutions to follow established corporate controls and procedures, PowerCold's management concluded that its disclosure controls and procedures over this subsidiary was not effective as of the end of the prior 2005 reporting periods. PowerCold Corporation has since restructured the company, merging the remaining subsidiary companies into the parent and restructuring the management and accounting controls, thus eliminating further risk of non-compliance with corporate policies. This Report reflects the revised assessment of our CEO and CFO for the period stated. As a result of the discovery of PowerCold Comfort Air Solutions failure to follow established corporate controls and procedures in late October 2005, PowerCold's management concluded that its disclosure controls and procedures for the entire company were not effective as of December 31, 2005

In accord with SEC requirements, the CEO and CFO note that, as of the period ended 12/31/05 covered by this report, there were significant deficiencies and material weaknesses in our Internal Controls. Although the Company's management must deem that the controls over financial reporting were not effective for most of 2005, since this problem has been identified the Company's management team has reviewed internal procedures and has established controls, which are now deemed to be effective. The effectiveness of these controls are under the

[Table of Contents](#)

continuing review of the Company's CEO, CFO and CAO. In addition, management has begun its project to comply with the requirements of Section 404 of the Sarbanes-Oxley Act of 2002. Management anticipates that this effort will also help to more formally document, communicate, and comply with the Company's accounting policies and procedures, as well as to identifying and rectifying any residual disclosure or reporting process control issues that may exist but, at this time, are unknown to management.

Inherent Limitations on Effectiveness of Controls

Management, including the CEO and CFO, does not expect that our Disclosure Controls or our internal control over financial reporting will prevent or detect all errors and all frauds. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

The Company's controls during 2005 experienced break-down which was ultimately exposed by those controls which were in place, but not prior to reporting three quarters of inappropriate sales activity during 2005. Through the efforts of the management of the Company, the disclosure controls and procedures are designed to provide reasonable assurance of achieving the objectives and both the CEO and CFO of the Company conclude that these controls are effective at the reasonable assurance level at the time of this filing.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF REGISTRANT

The directors and executive officers of the Company are as follows at December 31, 2005:

Name	Age	Position	Period Served Since
Francis L. Simola	67	Chairman of the Board President and CEO	January 1993
Dean S. Calton	54	President, PowerCold Products, Inc. Vice President Engineering and Manufacturing	October 1998
Robert Yoho	69	President, PowerCold ComfortAir Solutions, Inc.	July 2002
Joseph C. Cahill	52	Vice President Administration and Finance Director, Corporate Secretary	January 2002
Grayling Hofer	48	Corporate Controller and Chief Accounting Officer Treasurer	March 2002

A summary of the business experience and background of the Company's officers and directors is set forth below.

Francis L. Simola Mr. Simola has been Chairman, CEO and President of PowerCold since the Company's inception in January 1993. Mr. Simola is the founder and President of Simco Group Inc., a private investment company that controls a major interest in PowerCold.

Dean S. Calton Mr. Calton has been General Manager, Vice President Engineering and Manufacturing and President of PowerCold Products, Inc. since June 1998. Mr. Calton has over 24 years experience in the refrigeration and air condition industry.

Joseph C. Cahill Mr. Cahill has been Vice President Administration and Finance since January 2002 and a Director and Corporate Secretary since June 2003. He resigned as Secretary, CFO and Vice President of Administration on January 30, 2006 to take a similar position in the chemical industry. He continues to serve as a Director. His term will expire at the next stockholders annual meeting. Mr. Cahill will be an Advisor to the Board of Directors. Mr. Cahill has over 22 years experience as a senior executive for a co-generation business and a chemical company. Prior to joining PowerCold Corporation Mr. Cahill was the Chief Operating Officer of Utility Metal Research, a privately held company whose primary business was the design, sale and installation of cogeneration equipment. Prior to 2000 Mr. Cahill was most recently CFO and Vice President of Administration & Finance for the Canning-Gumm Company, the US subsidiary of a public UK chemical company and for more than 20 years held various management and senior management position at the Frederick Gumm Chemical Company prior to its acquisition in 1998.

Grayling Hofer Mr. Hofer has been Corporate Controller and Chief Accounting Officer since March 2002 and Corporate Treasurer since June 2003. Mr. Hofer has over 14 years experience in accounting, and 10 years with manufacturing and distribution. Prior to joining PowerCold Mr. Hofer was the president of Manufacturers Assistance Group, a consulting group specializing in troubled and startup manufacturing operations. Prior that that Mr. Hofer was Vice President of Operation for SewTexas a manufacturer of custom apparel and CFO for City Pipe and Supply Company a commercial plumbing supply company.

Robert Yoho Mr. Yoho has served as President of PowerCold ComfortAir Solutions, Inc. since July 2002 and a Director since June 2003. He resigned as President of PowerCold ComfortAir Solutions, Inc. on December 28, 2005 when PCS was sold in a stock sale to a group of employees. He continues to serve as a Director. His term will expire at the next stockholders annual meeting. Mr. Yoho has over 30 years experience in the heating, ventilation and air conditioning equipment industry. Prior to joining PowerCold Mr. Yoho was president of Applied Building Technology an engineering and design firm specializing in controls and HVAC packaged systems. ABT was acquired by PowerCold 2002.

Directors of the Company are elected every three years. Officers of the Company, elected by the Board of Directors, serve annually. There are no family relationships among the Directors and Officers of the Company. All Company Directors and Officers have devoted 100% of their time for PowerCold's daily operating activities during the last fiscal year 2004.

The Company has adopted a Code of Business Conduct and Ethics (the "Code of Ethics") that applies to our officers, employees and directors, including the Company's principal executive officer, principal financial officer, principal accounting officer and controller or persons performing similar functions. This Code of Ethics is posted on our internet website located at www.powercold.com (click on "Investor Relations," then "Code of Ethics"). See "Available Information" under Item 1. The "Code of Ethics" is filed as an exhibit to this report on Form 10K and is hereby incorporated by reference.

ITEM 11. EXECUTIVE COMPENSATION

One executive officer of the Company received compensation greater than \$87,000 for 2005, which included a base salary of \$84,000 and a bonus of \$25,000 for total cash compensation of \$109,000. No officer of the Company was paid by any other source other than PowerCold for time that was actually spent in furtherance of PowerCold's affairs. Francis L. Simola, president and CEO receives no compensation directly from PowerCold. Simco Group received 100,000 shares of common restricted stock for services rendered the Company by Francis L. Simola, and received \$60,000 related to payment due for corporate operating and office administrative expenses.

The information specified concerning the compensation of the named executive officers for each of the Registrant's last three completed fiscal years provided in the following Summary Compensation Table.

Summary Compensation Table

(1) Number of Securities Underlying Unexercised Options at FY-End (#)Exercisable/ Unexercisable do not include options granted in 2006.

(2) Valued at the market closing price of \$0.70 per share on December 30, 2005.

(3) Mr. Simola paid \$422,939.50, the full exercise price, for the 695,879 options exercised during 2005.

The Corporation does not currently have a Long Term Incentive Plan ("LTIP")

The Corporation currently does not hold any Employment Contracts or Change of Control Arrangements with any parties.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth information as of December 31, 2005, regarding the number of shares of the Company's common stock beneficially owned by (i) all beneficial owners of five percent (5%) or more of common stock, and (ii) each director.(iii) executive officers

Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership (1)	Percent of Class (2)
Francis L. Simola and (3)(5)(6) Veronica M. Simola 9408 Meadowbrook Ave. Philadelphia, Pa. 19118	922,432	3.19%
Simco Group, Inc. (4) 1800 E. Sahara, Suite 107 Las Vegas, Nevada 89104	2,296,664	7.95%
Henry N. Sanborn 505 Charles Street Avenue Towson, MD 21204	2,372,081	8.21%
Joseph C. Cahill (5)(6) 45 Overlea Lane Aberdeen, NJ 07747	82,779	0.30%
Robert W. Yoho (5)(6) 13799 Park Blvd. North Seminole, FL 33776	300,000	1.04%
Dean Calton (6) 1346 LaVernia Road LaVernia, TX 78121	51,500	0.18%
Grayling Hofer (6) 2406 Crow Valley San Antonio, TX 78270	7,000	0.02%
Laurus Master Fund, Ltd (7) c/o M&C Corporate Services Limited P.O. Box 1234 G.T. Ugland House, South Church Street Grand Cayman, Cayman Islands	5,072,995	17.56%
Total Common Stock	10,229,451	35.41%
Total Common Stock Owned by Officers & Directors	3,660,375	12.67%

(1) The nature of beneficial ownership for all shares is sole voting and investment power.

(2) The per cent of class is all common stock.

(3) Includes minor children.

(4) Simco Group Inc., a privately held Nevada Corporation, (100%) owned by Francis L. Simola and Veronica M. Simola.

(5) Director.

(6) Executive Officer.

(7) Laurus may own up to 4.99% of PowerCold common stock in accordance with a Convertible Term Note of July 29, 2004.

The Note is convertible into our common stock with a conversion price of \$1.87 on July 29, 2004, subject to conversion by Laurus as well as an automatic conversion. Under the terms of the securities purchase agreement, we also issued common stock purchase warrants to Laurus to purchase 615,000 shares of common stock, exercisable for three years from the Initial Exercise Date. The exercise prices of the warrants are \$2.63 for the 300,000 shares and \$3.07 for the remaining shares. As of December 31, 2004 Laurus did not own any PowerCold common stock but under certain conditions may convert more than 4.99% up to a maximum of 19.99%. As of the date of this report, Laurus has not converted any of its derivative securities into common stock. The Company has filed a registration statement under Form S-1 to register 5,072,995 shares on behalf of Laurus.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The Company has received funding on several occasions from Simco Group, Inc, (“Simco”), a separate legal entity wholly-owned by the Company's chairman and chief executive officer.

During the year ended December 31, 2005 the Company received \$1,507,461 in loans from Simco Group and repaid Simco \$290,700 for short-term loans. Simco Group exercised 695,879 options for \$422,940 and converted \$400,400 in short term loans to 616,000 shares of PowerCold Corporation common stock at an average conversion price of \$0.65 per share based upon the average of closing price 10 days prior to conversion.

During the year ended December 31, 2004 the Company received \$100,000 as a short term loan from Simco Group and repaid Simco \$345,080 for short term loans.

During the year ended December 31, 2003 the Company received \$161,108 as a short term loan from Simco Group.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES.

Audit Fees

The aggregate fees billed for professional services rendered by the Company's principal accountant for the audit of the Company's annual financial statements for the fiscal years ended December 31, 2005 and December 31, 2004 were approximately \$85,000 and \$76,000 respectively.

Audit Related Fees

The Company incurred no fees during the last two fiscal years for assurance and related services by the Company's principal accountant that were reasonably related to the performance of the audit of the Company's financial statements.

Tax Fees

The Company incurred fees totaling \$0 and \$0 during the fiscal years ended December 31, 2005 and 2004, respectively, for professional services rendered by the Company's principal accountant for tax compliance, tax advice and tax planning.

All Other Fees

The Company incurred fees of approximately \$5,100 and \$16,828 during the fiscal year 2005 and 2004 for products and services rendered by the Company's principal accountant in relation to pending stock registration filings with the SEC.

PART IV

CERTIFICATION

I, Francis L. Simola, certify that:

- (1) I have reviewed this Form 10-K of PowerCold Corporation;
- (2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- (3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the small business issuer as of, and for, the periods presented in this report;
- (4) The small business issuer's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the small business issuer and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the small business issuer, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the small business issuer's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the small business issuer's internal control over financial reporting that occurred during the small business issuer's most recent fiscal quarter (the small business issuer's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the small business issuer's internal control over financial reporting; and
- (5) The small business issuer's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the small business issuer's auditors and the audit committee of the small business issuer's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the small business issuer's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the small business issuer's internal control over financial reporting.

CERTIFICATION

I, Grayling Hofer, certify that:

- (1) I have reviewed this Form 10-K of PowerCold Corporation;
- (2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- (3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the small business issuer as of, and for, the periods presented in this report;
- (4) The small business issuer's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the small business issuer and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the small business issuer, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the small business issuer's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the small business issuer's internal control over financial reporting that occurred during the small business issuer's most recent fiscal quarter (the small business issuer's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the small business issuer's internal control over financial reporting; and
- (5) The small business issuer's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the small business issuer's auditors and the audit committee of the small business issuer's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the small business issuer's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the small business issuer's internal control over financial reporting.
