

HSBC USA Inc.

\$770,000 Dual Directional Digital Plus Notes

Linked to the Least Performing of the iShares® MSCI EAFE ETF, the iShares® MSCI Emerging Markets ETF, and the iShares® Russell 2000 Value ETF

- ▶ 1.00x exposure to any positive Reference Return of the Least Performing Underlying greater than or equal to the Digital Upside Return of 52.00%.
- ▶ Digital Upside Return if the Reference Return of the Least Performing Underlying is greater than or equal to zero but less than the Digital Upside Return
- ▶ 1.00x positive exposure to the Absolute Reference Return of the Least Performing Underlying if its Reference Return is negative but not less than -30.00%
- ▶ You will receive shares of the Least Performing Underlying if its Reference Return is less than -30.00%, and in such a case, you will lose some or all of your principal amount
- ▶ 5 year maturity
- ▶ All payments on the Notes are subject to the credit risk of HSBC USA Inc.

The Dual Directional Digital Plus Notes (each a "Note" and collectively the "Notes") offered hereunder will not be listed on any securities exchange or automated quotation system. The Notes will not bear interest.

Neither the U.S. Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the Notes or passed upon the accuracy or the adequacy of this document, the accompanying prospectus, prospectus supplement or ETF Underlying Supplement. Any representation to the contrary is a criminal offense. We have appointed HSBC Securities (USA) Inc., an affiliate of ours, as the agent for the sale of the Notes. HSBC Securities (USA) Inc. will purchase the Notes from us for distribution to other registered broker-dealers or will offer the Notes directly to investors. In addition, HSBC Securities (USA) Inc. or another of its affiliates or agents may use this document in market-making transactions in any Notes after their initial sale. Unless we or our agent inform you otherwise in the confirmation of sale, the this document is being used in a market-making transaction. See "Supplemental Plan of Distribution (Conflicts of Interest)" on page PS-16 of this document.

Investment in the Notes involves certain risks. You should refer to "Risk Factors" beginning on page PS-7 of this document, page S-1 of the accompanying prospectus supplement and page S-1 of the accompanying ETF Underlying Supplement, as applicable

The Estimated Initial Value of the Notes on the Pricing Date is \$922.10 per Note, which is less than the price to public. The market value of the Notes at any time will reflect many factors and cannot be predicted with accuracy. See "Estimated Initial Value" on page PS-3 and "Risk Factors" beginning on page PS-7 of this document for additional information.

	Price to Public	Underwriting Discount ⁽¹⁾	Proceeds to Issuer
Per Note	\$1,000.00	\$2.50	\$997.50
Total	\$770,000.00	\$1,925.00	\$768,075.00

⁽¹⁾ HSBC USA Inc. or one of our affiliates may pay varying underwriting discounts of up to 0.25% per \$1,000 Principal Amount in connection with the distribution of the Notes to other registered broker-dealers. See "Supplemental Plan of Distribution (Conflicts of Interest)" on page PS-16 of this document.

HSBC USA Inc.

Dual Directional Digital Plus Notes

Linked to the Least Performing of the iShares® MSCI EAFE ETF, the iShares® MSCI Emerging Markets ETF, and the iShares® Russell 2000 Value ETF

This document relates to a single offering of Dual Directional Digital Plus Notes. The Notes will have the terms described in this document and the accompanying prospectus, prospectus supplement and ETF Underlying Supplement. If the terms of the Notes offered hereby are inconsistent with those described in the accompanying prospectus, prospectus supplement, or ETF Underlying Supplement, the terms described in this document shall control.

This document relates to an offering of Notes linked to the performance of the Reference Asset. The purchaser of a Note will acquire a senior unsecured debt security of HSBC USA Inc. linked to the Reference Asset as described below. The following key terms relate to the offering of the Notes:

Issuer:	HSBC USA Inc.
Principal Amount:	\$1,000 per Note
Reference Asset:	The iShares® MSCI EAFE ETF (Ticker: EFA), the iShares® MSCI Emerging Markets ETF (Ticker: EEM), and the iShares® Russell 2000 Value ETF (Ticker: IWN) (each an “Underlying” and together the “Underlyings”)
Trade Date:	April 9, 2021
Pricing Date:	April 9, 2021
Original Issue Date:	April 14, 2021
Final Valuation Date:	April 9, 2026, subject to adjustment as described under “Additional Terms of the Notes—Valuation Dates” in the accompanying ETF Underlying Supplement.
Maturity Date:	April 14, 2026. The Maturity Date is subject to adjustment as described under “Additional Terms of the Notes—Coupon Payment Dates, Call Payment Dates and Maturity Date” in the accompanying ETF Underlying Supplement.
Upside Participation Rate:	100% (1.00x)
Digital Upside Return:	52.00%
Payment at Maturity:	On the Maturity Date, for each Note, we will pay you the Final Settlement Value.
Least Performing Underlying	The Underlying with the lowest Reference Return
Reference Return:	With respect to each Underlying, the quotient, expressed as a percentage, calculated as follows: $\frac{\text{Final Value} - \text{Initial Value}}{\text{Initial Value}}$
Absolute Reference Return:	With respect to each Underlying, the absolute value of its Reference Return. The Absolute Reference Return will always be a positive value. For example, if the Reference Return is -5.00%, the Absolute Reference Return will be +5.00%.
Final Settlement Value:	<p><i>If the Reference Return of the Least Performing Underlying is greater than or equal to zero</i>, you will receive a cash payment on the Maturity Date, per \$1,000 Principal Amount, equal to the greater of:</p> <p>(a) \$1,000 + (\$1,000 × Reference Return of the Least Performing Underlying × Upside Participation Rate).</p> <p>(b) \$1,000 + (\$1,000 × Digital Upside Return).</p> <p><i>If the Reference Return of the Least Performing Underlying is less than zero but greater than or equal to the Barrier Percentage</i>, you will receive a cash payment on the Maturity Date, per \$1,000 Principal Amount, calculated as follows: \$1,000 + (\$1,000 × Absolute Reference Return of the Least Performing Underlying)</p> <p><i>If the Reference Return of the Least Performing Underlying is less than the Barrier Percentage</i>, you will receive the Physical Delivery Amount in shares of the Least Performing Underlying.</p> <p>Under these circumstances, you will lose 1% of the Principal Amount of your Notes for each percentage point that the Reference Return of the Least Performing Underlying is less than zero. For example, if the Reference Return of the Least Performing Underlying is -60.00%, you will suffer a 60.00% loss and receive shares of the Least Performing Underlying with a value equal to 40.00% of the Principal Amount, subject to the credit risk of HSBC. <i>If the Reference Return of the Least Performing Underlying is less than the Barrier Percentage, you will lose some or all of your investment.</i></p>
Physical Delivery Amount:	A number of shares of the Least Performing Underlying calculated by dividing the Principal Amount by the Initial Value of the Least Performing Underlying. Fractional share amounts will be paid in cash and determined by multiplying the number of fractional shares by the Final Value. The Physical Delivery Amount is subject to adjustment as described under “Additional Terms of the Notes—Antidilution and Reorganization Adjustments” in the accompanying Stock-Linked Underlying Supplement.

Barrier Percentage:	With respect to each Underlying, -30.00%
Initial Value:	\$77.99 with respect to EFA, \$53.55 with respect to EEM, and \$160.65 and with respect to IWN, each of which was its Official Closing Price on the Pricing Date.
Final Value:	With respect to each Underlying, its Official Closing Price on the Final Valuation Date.
Form of Notes:	Book-Entry
Listing:	The Notes will not be listed on any U.S. securities exchange or quotation system.
CUSIP/ISIN:	40428HQC9/US40428HQC96
Estimated Initial Value:	The Estimated Initial Value of the Notes is less than the price you pay to purchase the Notes. The Estimated Initial Value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your Notes in the secondary market, if any, at any time. See “Risk Factors — The Estimated Initial Value of the Notes, which was determined by us on the Trade Date, is less than the price to public and may differ from the market value of the Notes in the secondary market, if any.”

GENERAL

This document relates to an offering of Notes linked to the Reference Asset. The purchaser of a Note will acquire a senior unsecured debt security of HSBC USA Inc. Although the offering of Notes relates to the Reference Asset, you should not construe that fact as a recommendation as to the merits of acquiring an investment linked to the Reference Asset or any security included in any Underlying or as to the suitability of an investment in the Notes.

You should read this document together with the prospectus dated February 23, 2021, the prospectus supplement dated February 23, 2021 and the ETF Underlying Supplement dated February 23, 2021. If the terms of the Notes offered hereby are inconsistent with those described in the accompanying prospectus, prospectus supplement or ETF Underlying Supplement, the terms described in this document shall control. You should carefully consider, among other things, the matters set forth in “Risk Factors” beginning on page PS-8 of this document, page S-1 of the prospectus supplement and page S-1 of the ETF Underlying Supplement, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes. As used herein, references to the “Issuer”, “HSBC”, “we”, “us” and “our” are to HSBC USA Inc.

HSBC has filed a registration statement (including a prospectus, prospectus supplement and ETF Underlying Supplement) with the SEC for the offering to which this document relates. Before you invest, you should read the prospectus, prospectus supplement and ETF Underlying Supplement in that registration statement and other documents HSBC has filed with the SEC for more complete information about HSBC and this offering. You may get these documents for free by visiting EDGAR on the SEC’s web site at www.sec.gov. Alternatively, HSBC Securities (USA) Inc. or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement and ETF Underlying Supplement if you request them by calling toll-free 1-866-811-8049.

You may also obtain:

- ▶ The ETF Underlying Supplement at: https://www.sec.gov/Archives/edgar/data/83246/000110465921026629/tm217170d6_424b2.htm
- ▶ The prospectus supplement at: https://www.sec.gov/Archives/edgar/data/83246/000110465921026609/tm217170d2_424b2.htm
- ▶ The prospectus at: https://www.sec.gov/Archives/edgar/data/83246/000110465921026585/tm217170d7_424b3.htm

PAYMENT AT MATURITY

On the Maturity Date, for each Note you hold, we will pay you the Final Settlement Value, which is an amount in cash, as described below:

If the Reference Return of the Least Performing Underlying is greater than or equal to zero, you will receive a cash payment on the Maturity Date, per \$1,000 Principal Amount, equal to the greater of:

- (a) $\$1,000 + (\$1,000 \times \text{Reference Return of the Least Performing Underlying} \times \text{Upside Participation Rate})$.
- (b) $\$1,000 + (\$1,000 \times \text{Digital Upside Return})$.

If the Reference Return of the Least Performing Underlying is less than or equal to zero but greater than or equal to the Barrier Percentage, you will receive a cash payment on the Maturity Date, per \$1,000 Principal Amount, calculated as follows:

$$\$1,000 + (\$1,000 \times \text{Absolute Reference Return of the Least Performing Underlying})$$

If the Reference Return of the Least Performing Underlying is less than the Barrier Percentage, you will receive the Physical Delivery Amount in shares of the Least Performing Underlying.

Under these circumstances, you will lose 1% of the Principal Amount of your Notes for each percentage point that the Reference Return of the Least Performing Underlying is less than zero. For example, if the Reference Return of the Least Performing Underlying is -60.00%, you will suffer a 60.00% loss and receive shares of the Least Performing Underlying with a value equal to 40.00% of the Principal Amount, subject to the credit risk of HSBC. **If the Reference Return of the Least Performing Underlying is less than the Barrier Percentage, you will lose some or all of your investment.**

Interest

The Notes will not pay interest.

Calculation Agent

We or one of our affiliates will act as calculation agent with respect to the Notes.

Reference Sponsors

The reference sponsor of the INDU is S&P Dow Jones Indices LLC, a division of S&P Global. The reference sponsor of the RTY is FTSE Russell. The reference sponsor of the NDX is Nasdaq Inc.

INVESTOR SUITABILITY

The Notes may be suitable for you if:

- ▶ You seek an investment with a return linked to the potential positive performance of the Least Performing Underlying and you believe the Reference Return of the Least Performing Underlying will be positive or will be moderately negative but will not decline below the Barrier Percentage of -30.00%.
- ▶ You are willing to make an investment that is exposed to the negative Reference Return of the Least Performing Underlying on a 1-to-1 basis from the Initial Value, and receive shares of the Least Performing Underlying, if the Reference Return of the Least Performing Underlying is less than the Barrier Percentage.
- ▶ You understand and accept that your investment may not provide full return of principal.
- ▶ You are willing to accept the risk and return profile of the Notes versus a conventional debt security with a comparable maturity issued by HSBC or another issuer with a similar credit rating.
- ▶ You are willing to forgo dividends or other distributions paid to holders of the stocks included in any Underlying.
- ▶ You do not seek current income from your investment.
- ▶ You do not seek an investment for which there is an active secondary market.
- ▶ You are willing to hold the Notes to maturity.
- ▶ You are comfortable with the creditworthiness of HSBC, as Issuer of the Notes.

The Notes may not be suitable for you if:

- ▶ You believe the Reference Return of the Least Performing Underlying will be less than the Barrier Percentage or that the Reference Return, Digital Upside Return or Absolute Reference Return of the Least Performing Underlying will not be sufficiently positive to provide you with your desired return.
- ▶ You are unwilling to make an investment that is exposed to the negative Reference Return of the Least Performing Underlying on a 1-to-1 basis from the Initial Value, and receive shares of the Least Performing Underlying if the Reference Return of the Least Performing Underlying is less than the Barrier Percentage.
- ▶ You seek an investment that provides full return of principal.
- ▶ You prefer the lower risk, and therefore accept the potentially lower returns, of conventional debt securities with comparable maturities issued by HSBC or another issuer with a similar credit rating.
- ▶ You prefer to receive the dividends or other distributions paid to holders of the stocks included in any Underlying.
- ▶ You seek current income from your investment.
- ▶ You seek an investment for which there will be an active secondary market.
- ▶ You are unable or unwilling to hold the Notes to maturity.
- ▶ You are not willing or are unable to assume the credit risk associated with HSBC, as Issuer of the Notes.

RISK FACTORS

We urge you to read the section “Risk Factors” beginning on page S-1 of the accompanying prospectus supplement and on page S-1 of the accompanying ETF Underlying Supplement. You should understand the risks of investing in the Notes and should reach an investment decision only after careful consideration, with your advisors, of the suitability of the Notes in light of your particular financial circumstances and the information set forth in this document and the accompanying, prospectus, prospectus supplement and ETF Underlying Supplement.

In addition to the risks discussed below, you should review “Risk Factors” in the accompanying prospectus supplement and ETF Underlying Supplement including the explanation of risks relating to the Notes described in the following sections:

- ▶ “— Risks Relating to All Note Issuances” in the prospectus supplement;
- ▶ “— General Risks Related to Indices” in the ETF Underlying Supplement.
- ▶ “—Securities Prices Generally Are Subject to Political, Economic, Financial, and Social Factors that Apply to the Markets in which They Trade and, to a Lesser Extent, Foreign Markets” in the ETF Underlying Supplement; and
- ▶ “— Time Differences Between the Domestic and Foreign Markets and New York City May Create Discrepancies in the Trading Level or Price of the Notes” in the ETF Underlying Supplement;

You will be subject to significant risks not associated with conventional fixed-rate or floating-rate debt securities.

Risks Relating to the Structure or Features of the Notes

Your investment in the Notes may result in a loss.

You will be exposed to the decline in the Final Value from the Initial Value if the Reference Return of the Least Performing Underlying is beyond the Barrier Percentage of -30.00%. In this case, we will pay you in shares of the Least Performing Underlying, and the Physical Delivery Amount you will be entitled to receive will be less than the Principal Amount and you will lose 1% for each 1% that the Reference Return of the Least Performing Underlying is less than 0.00%. Accordingly, if the Reference Return of the Least Performing Underlying is less than the Barrier Percentage of -30.00%, your Payment at Maturity will be less than the Principal Amount of your Notes. You will lose some or all of your investment at maturity if the Reference Return of the Least Performing Underlying is less than the Barrier Percentage.

If the Physical Delivery Amount will be paid on the Notes, you will be subject to the price fluctuation of the Least Performing Underlying after the Final Valuation Date.

If the Reference Return of the Least Performing Underlying is beyond the Barrier Percentage, we will deliver to you at maturity the Physical Delivery Amount in shares of the Least Performing Underlying. The value of those shares may further decrease between the Final Valuation Date and the Maturity Date, and you will incur additional losses to the extent of such decrease. In addition, there is no assurance that an active trading market will continue for shares of the Least Performing Underlying or that there will be liquidity in that trading market.

The amount payable on the Notes is not linked to the value of the Least Performing Underlying at any time other than on the Final Valuation Date.

The Final Value of the least Performing Underlying will be based on its Official Closing Price on the Final Valuation Date, subject to postponement for non-trading days and certain Market Disruption Events. Even if the value of the Least Performing Underlying appreciates during the term of the Notes other than on the Final Valuation Date but then decreases on the Final Valuation Date to a value that reflects a Reference Return that is less than the Barrier Percentage, the Payment at Maturity may be less, and may be significantly less, than it would have been had the Payment at Maturity been linked to the value of the Least Performing Underlying prior to such decrease. Although the actual value of the Least Performing Underlying on the Maturity Date or at other times during the term of the Notes may be higher than the Final Value, the Payment at Maturity will be based solely on the Official Closing Price of the Least Performing Underlying on the Final Valuation Date.

The Notes will not bear interest.

As a holder of the Notes, you will not receive interest payments.

Since the Notes are linked to the performance of more than one Underlying, you will be fully exposed to the risk of fluctuations in the value of each Underlying.

Since the Notes are linked to the performance of more than one Underlying, the Notes will be linked to the individual performance of each Underlying. Because the Notes are not linked to a basket, in which the risk is mitigated and diversified among all of the

components of a basket, you will be exposed to the risk of fluctuations in the value of each Underlying. For example, in the case of notes linked to a basket, the return would depend on the aggregate performance of the basket components reflected as the basket return. Thus, the depreciation of any basket component could be mitigated by the appreciation of another basket component. However, in the case of these Notes, the individual performance of each of the Underlyings would not be combined to calculate your return and the depreciation of either Underlying would not be mitigated by the appreciation of the other Underlying. Instead, your return would depend on the Least Performing Underlying.

Because the Notes are linked to the performance of the Least Performing Underlying, you are exposed to greater risks of sustaining a significant loss on your investment than if the Notes were linked to just one Underlying.

The risk that you will suffer a significant loss on your investment, is greater if you invest in the Notes as opposed to substantially similar securities that are linked to the performance of just one Underlying. With multiple Underlyings, it is more likely that the Reference Return of one of the Underlyings will be below the Barrier Percentage on the Final Valuation Date, than if the Notes were linked to only one Underlying. Therefore, it is more likely that you will suffer a significant loss on your investment.

Risks Relating to the Reference Asset

Changes that affect an Underlying may affect the value of an Underlying and the market value of the Notes and the amount you will receive on the Notes and the amount you will receive at maturity.

The policies of the reference sponsor of an Underlying concerning additions, deletions and substitutions of the stocks included in an Underlying, and the manner in which the reference sponsor takes account of certain changes affecting those stocks, may affect the value of an Underlying. The policies of the reference sponsor with respect to the calculation of an Underlying could also affect the value of an Underlying. The reference sponsor may discontinue or suspend calculation or dissemination of an Underlying. Any such actions could affect the value of an Underlying and the value of and the return on the Notes.

Risks associated with non-U.S. companies.

The value of the EFA and EEM depends upon the stocks of non-U.S. companies, and thus involves risks associated with the home countries of those non-U.S. companies. The prices of these non-U.S. stocks may be affected by political, economic, financial and social factors in the home country of each applicable company, including changes in that country's government, economic and fiscal policies, currency exchange laws or other laws or restrictions, which could affect the value of the Notes. These foreign securities may have less liquidity and could be more volatile than many of the securities traded in U.S. or other securities markets. Direct or indirect government intervention to stabilize the relevant foreign securities markets, as well as cross shareholdings in foreign companies, may affect trading levels or prices and volumes in those markets. The other special risks associated with foreign securities may include, but are not limited to: less liquidity and smaller market capitalizations; less rigorous regulation of securities markets; different accounting and disclosure standards; governmental interference; currency fluctuations; higher inflation; and social, economic and political uncertainties. These factors may adversely affect the performance of the EFA and EEM and, as a result, the value of the Notes.

The Notes will not be adjusted for changes in exchange rates.

Although the equity securities that are held by the EFA and EEM are traded in currencies other than U.S. dollars, and your Notes are denominated in U.S. dollars, the amount payable on your Notes at maturity, if any, will not be adjusted for changes in the exchange rates between the U.S. dollar and the currencies in which these non-U.S. equity securities are denominated. Changes in exchange rates, however, may also reflect changes in the applicable non-U.S. economies that in turn may affect the value of the EFA and EEM and therefore the relevant Notes. The amount we pay in respect of your Notes on the maturity date, if any, will be determined solely in accordance with the procedures described in this document.

Risks associated with emerging markets.

An investment in the Notes will involve risks not generally associated with investments which have no emerging market component. In particular, many emerging nations are undergoing rapid change, involving the restructuring of economic, political, financial and legal systems. Regulatory and tax environments may be subject to change without review or appeal. Many emerging markets suffer from underdevelopment of capital markets and tax regulation. The risk of expropriation and nationalization remains a threat. Guarding against such risks is made more difficult by low levels of corporate disclosure and unreliability of economic and financial data.

General Risk Factors

The Notes are subject to the credit risk of HSBC USA Inc.

The Notes are senior unsecured debt obligations of the Issuer, HSBC, and are not, either directly or indirectly, an obligation of any third party. As further described in the accompanying prospectus supplement and prospectus, the Notes will rank on par with all of the other unsecured and unsubordinated debt obligations of HSBC, except such obligations as may be preferred by operation of law. Any payment to be made on the Notes, including any return of principal at maturity, depends on the ability of HSBC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of HSBC may affect the market value of the Notes and, in the event HSBC were to default on its obligations, you may not receive the amounts owed to you under the terms of the Notes.

The Notes are not insured or guaranteed by any governmental agency of the United States or any other jurisdiction.

The Notes are not deposit liabilities or other obligations of a bank and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency or program of the United States or any other jurisdiction. An investment in the Notes is subject to the credit risk of HSBC, and in the event that HSBC is unable to pay its obligations as they become due, you may not receive the full payments due on the Notes.

The Estimated Initial Value of the Notes, which was determined by us on the Pricing Date, is less than the price to public and may differ from the market value of the Notes in the secondary market, if any.

The Estimated Initial Value of the Notes was calculated by us on the Pricing Date and is less than the price to public. The Estimated Initial Value reflects our internal funding rate, which is the borrowing rate we pay to issue market-linked securities, as well as the mid-market value of the embedded derivatives in the Notes. This internal funding rate is typically lower than the rate we would use when we issue conventional fixed or floating rate debt securities. As a result of the difference between our internal funding rate and the rate we would use when we issue conventional fixed or floating rate debt securities, the Estimated Initial Value of the Notes may be lower if it were based on the prices at which our fixed or floating rate debt securities trade in the secondary market. In addition, if we were to use the rate we use for our conventional fixed or floating rate debt issuances, we would expect the economic terms of the Notes to be more favorable to you. We determined the value of the embedded derivatives in the Notes by reference to our or our affiliates' internal pricing models. These pricing models consider certain assumptions and variables, which can include volatility and interest rates. Different pricing models and assumptions could provide valuations for the Notes that are different from our Estimated Initial Value. These pricing models rely in part on certain forecasts about future events, which may prove to be incorrect. The Estimated Initial Value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your Notes in the secondary market (if any exists) at any time.

The price of your Notes in the secondary market, if any, immediately after the Pricing Date is expected to be less than the price to public.

The price to public takes into account certain costs. These costs, which will be used or retained by us or one of our affiliates, include the underwriting discount, our affiliates' projected hedging profits (which may or may not be realized) for assuming risks inherent in hedging our obligations under the Notes and the costs associated with structuring and hedging our obligations under the Notes. If you were to sell your Notes in the secondary market, if any, the price you would receive for your Notes may be less than the price you paid for them because secondary market prices will not take into account these costs. The price of your Notes in the secondary market, if any, at any time after issuance will vary based on many factors, including the values of the Underlyings and changes in market conditions, and cannot be predicted with accuracy. The Notes are not designed to be short-term trading instruments, and you should, therefore, be able and willing to hold the Notes to maturity. Any sale of the Notes prior to maturity could result in a loss to you.

If we were to repurchase your Notes immediately after the Original Issue Date, the price you receive may be higher than the Estimated Initial Value of the Notes.

Assuming that all relevant factors remain constant after the Original Issue Date, the price at which HSBC Securities (USA) Inc. may initially buy or sell the Notes in the secondary market, if any, and the value that may initially be used for customer account statements, if any, may exceed the Estimated Initial Value on the Pricing Date for a temporary period expected to be approximately 6 months after the Original Issue Date. This temporary price difference may exist because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the Notes and other costs in connection with the Notes that we will no longer expect to incur over the term of the Notes. We will make such discretionary election and determine this temporary reimbursement period on the basis of a number of factors, including the tenor of the Notes and any agreement we may have with the distributors of the Notes. The amount of our estimated costs which we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the Original Issue Date of the Notes based on changes in market conditions and other factors that cannot be predicted.

You will not have any ownership interest in the stocks included in an Underlying.

As a holder of the Notes, you will not have any ownership interest in the stocks included in an Underlying, such as rights to vote, dividend payments or other distributions. Because the return on the Notes will not reflect any dividends on those stocks, the Notes may underperform an investment in the stocks included in an Underlying.

The Notes lack liquidity.

The Notes will not be listed on any securities exchange or automated quotation system. HSBC Securities (USA) Inc. is not required to offer to purchase the Notes in the secondary market, if any exists. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Notes easily. Because other dealers are not likely to make a secondary market for the Notes, the price at which you may be able to trade your Notes is likely to depend on the price, if any, at which HSBC Securities (USA) Inc. is willing to buy the Notes.

Potential conflicts of interest may exist.

An affiliate of HSBC has a minority equity interest in the owner of an electronic platform, through which we may make available certain structured investments offering materials. HSBC and its affiliates play a variety of roles in connection with the issuance of the Notes, including acting as calculation agent and hedging our obligations under the Notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the Notes. We will not have any obligation to consider your interests as a holder of the Notes in taking any action that might affect the value of your Notes.

Uncertain tax treatment.

For a discussion of the U.S. federal income tax consequences of your investment in a Note, please see the discussion under "U.S. Federal Income Tax Considerations" herein and the discussion under "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement.

ILLUSTRATIVE EXAMPLES

The following table and examples are provided for illustrative purposes only and are hypothetical. They do not purport to be representative of every possible scenario concerning increases or decreases in the value of any Underlying relative to its Initial Value. We cannot predict the Final Value of an Underlying. The assumptions we have made in connection with the illustrations set forth below may not reflect actual events, and the hypothetical Initial Value used in the table and examples below is not expected to be the actual Initial Value of any Underlying. You should not take this illustration or these examples as an indication or assurance of the expected performance of the Underlyings or the return on your Notes. The Final Settlement Value may be less than the amount that you would have received from a conventional debt security with the same stated maturity, including such a security issued by HSBC. The numbers appearing in the table below and following examples have been rounded for ease of analysis.

The table below illustrates the Payment at Maturity on a \$1,000 investment in the Notes for a hypothetical range of Reference Returns of the Least Performing Underlying from -100% to +100%. The following results are based solely on the assumptions outlined below. The "Hypothetical Return on the Notes" as used below is the number, expressed as a percentage, that results from comparing the Final Settlement Value per \$1,000 Principal Amount to \$1,000. The potential returns described here assume that your Notes are held to maturity. You should consider carefully whether the Notes are suitable to your investment goals. The following table and examples assume the following:

▶ Principal Amount:	\$1,000
▶ Hypothetical Initial Value for each Underlying:	100.00
▶ Digital Upside Return:	52.00%
▶ Upside Participation Rate:	100%
▶ Barrier Percentage:	-30.00%

The hypothetical Initial Value of \$100.00 used in the examples below has been chosen for illustrative purposes only and does not represent the actual Initial Value of any Underlying. The actual Initial Value of each Underlying will be determined on the Pricing Date.

Hypothetical Final Value of the Least Performing Underlying	Hypothetical Reference Return of the Least Performing Underlying	Hypothetical Payment at Maturity	Hypothetical Return on the Notes
\$200.00	100.00%	\$2,000.00	100.00%
\$180.00	80.00%	\$1,800.00	80.00%
\$160.00	60.00%	\$1,600.00	60.00%
\$152.00	52.00%	\$1,520.00	52.00%
\$130.00	30.00%	\$1,520.00	52.00%
\$120.00	20.00%	\$1,520.00	52.00%
\$115.00	15.00%	\$1,520.00	52.00%
\$110.00	10.00%	\$1,520.00	52.00%
\$105.00	5.00%	\$1,520.00	52.00%
\$102.00	2.00%	\$1,520.00	52.00%
\$101.00	1.00%	\$1,520.00	52.00%
\$100.00	0.00%	\$1,520.00	52.00%
\$99.00	-1.00%	\$1,010.00	1.00%
\$98.00	-2.00%	\$1,020.00	2.00%
\$95.00	-5.00%	\$1,050.00	5.00%
\$80.00	-20.00%	\$1,200.00	20.00%
\$70.00	-30.00%	\$1,300.00	30.00%
\$60.00	-40.00%	\$600.00	-40.00%
\$50.00	-50.00%	\$500.00	-50.00%
\$40.00	-60.00%	\$400.00	-60.00%
\$30.00	-70.00%	\$300.00	-70.00%
\$20.00	-80.00%	\$200.00	-80.00%
\$0.00	-100.00%	\$0.00	-100.00%

The following examples indicate how the Final Settlement Value would be calculated with respect to a hypothetical \$1,000 investment in the Notes.

Example 1: The value of the Least Performing Underlying increases from the Initial Value of \$100.00 to a Final Value of \$160.00.

<u>Underlying</u>	<u>Initial Value</u>	<u>Official Closing Price</u>
EFA	\$100.00	\$190.00 (190.00% of Initial Value)
EEM	\$100.00	\$160.00 (160.00% of Initial Value)
IWN	\$100.00	\$195.00 (195.00% of Initial Value)

EEM is the Least Performing Underlying.

Reference Return of the Least Performing Underlying:	60.00%
Final Settlement Value:	\$1,600.00

Because the Reference Return of the Least Performing Underlying is greater than the Digital Upside Return, the Final Settlement Value would be \$1,600.00 per \$1,000 Principal Amount, calculated as follows:

$$\begin{aligned}
 & \$1,000 + (\$1,000 \times \text{Reference Return of the Least Performing Underlying} \times \text{Upside Participation Rate}) \\
 &= \$1,000 + (\$1,000 \times 60.00\% \times 100\%) \\
 &= \$1,600.00
 \end{aligned}$$

Example 1 shows that you will receive the return of your principal investment plus a return equal to the Reference Return of the Least Performing Underlying multiplied by the Upside Participation Rate of 100% when the Reference Return of the Least Performing Underlying is greater than the Digital Upside Return.

Example 2: The value of the Least Performing Underlying increases from the Initial Value of \$100.00 to a Final Value of \$105.00.

<u>Underlying</u>	<u>Initial Value</u>	<u>Official Closing Price</u>
EFA	\$100.00	\$125.00 (125.00% of Initial Value)
EEM	\$100.00	\$105.00 (105.00% of Initial Value)
IWN	\$100.00	\$129.00 (129.00% of Initial Value)

EEM is the Least Performing Underlying.

Reference Return of the Least Performing Underlying:	5.00%
Final Settlement Value:	\$1,520.00

Because the Reference Return of the Least Performing Underlying is greater than or equal to zero but less than the Digital Upside Return, the Final Settlement Value would be \$1,520.00 per \$1,000 Principal Amount, calculated as follows:

$$\begin{aligned}
 & \$1,000 + (\$1,000 \times \text{Digital Upside Return}) \\
 &= \$1,000 + (\$1,000 \times 52.00\%) \\
 &= \$1,520.00
 \end{aligned}$$

Example 2 shows that you will receive the return of your principal investment plus a return equal to the Digital Upside Return when the Reference Return of the Least Performing Underlying is greater than or equal to zero but less than the Digital Upside Return.

Example 3: The value of the Least Performing Underlying decreases from the Initial Value of \$100.00 to a Final Value of \$95.00.

<u>Underlying</u>	<u>Initial Value</u>	<u>Final Value</u>
EFA	\$100.00	\$115.00 (115.00% of Initial Value)
EEM	\$100.00	\$95.00 (95.00% of Initial Value)
IWN	\$100.00	\$105.00 (105.00% of Initial Value)

EEM is the Least Performing Underlying.

Reference Return of the Least Performing Underlying:	-5.00%
Final Settlement Value:	\$1,050.00

Because the Reference Return of the Least Performing Underlying is less than zero but greater than the Barrier Percentage of -30.00%, the Final Settlement Value would be \$1,050.00 per \$1,000 Principal Amount, calculated as follows:

$$\begin{aligned}
 & \$1,000 + (\$1,000 \times \text{Absolute Reference Return of the Least Performing Underlying}) \\
 & = \$1,000 + (\$1,000 \times 5.00\%) \\
 & = \$1,050.00
 \end{aligned}$$

Example 3 shows that as long as the Reference Return of the Least Performing Underlying is greater than the Barrier Percentage, you will receive a positive return on your Notes.

Example 4: The value of the Least Performing Underlying decreases from the Initial Value of \$100.00 to a Final Value of \$40.00.

<u>Underlying</u>	<u>Initial Value</u>	<u>Final Value</u>
EFA	\$100.00	\$110.00 (110.00% of Initial Value)
EEM	\$100.00	\$40.00 (40.00% of Initial Value)
IWN	\$100.00	\$105.00 (105.00% of Initial Value)

EEM is the Least Performing Underlying.

Reference Return of the Least Performing Underlying:	-60.00%
Final Settlement Value:	\$400.00

Because the Reference Return of the Least Performing Underlying is less than the Barrier Percentage, you will receive the Physical Delivery Amount, calculated as follows:

$$\begin{aligned}
 \text{Physical Delivery Amount} &= \text{Principal Amount} / \text{Initial Value of the Least Performing Underlying} \\
 &= \$1,000 / \$100.00 = 10 \text{ shares of the Least Performing Underlying}
 \end{aligned}$$

As of the Valuation Date, these shares would have a value of \$400.00 (10 shares multiplied by the Final Value of the Least Performing Underlying of \$40.00). The value of the Physical Delivery Amount would result in a -60.00% return on the Notes.

Example 4 shows that you are exposed on a 1-to-1 basis to declines in the value of the Least Performing Underlying if its Reference Return is beyond the Barrier Percentage of -30.00%. **You may lose some or all of your investment.**

DESCRIPTION OF THE REFERENCE ASSET

Description of the EFA

The EFA seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in the European, Australasian, and Far Eastern markets, as measured by the MSCI EAFE® Index. The shares of the EFA are listed and trade on the NYSE Arca under symbol “EFA.”.

For more information about the Reference Asset, see “The iShares® MSCI EAFE ETF” beginning on page S-35 of the accompanying ETF Underlying Supplement.

Historical Performance of the EFA

The following graph sets forth the historical performance of the EFA based on the daily historical closing values from April 9, 2011 through April 9, 2021. We obtained the closing values below from the Bloomberg Professional® service. We have not undertaken any independent review of, or made any due diligence inquiry with respect to, the information obtained from the Bloomberg Professional® service.

The historical values of the EFA should not be taken as an indication of future performance, and no assurance can be given as to the Official Closing Price of the EFA on the Final Valuation Date.

Description of the EEM

The EEM seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the MSCI Emerging Markets Index, which is intended to measure the performance of equity markets in the global emerging markets. The shares of the EEM are listed and trade on the NYSE Arca under the ticker symbol “EEM.”

For more information about the Reference Asset, see “The iShares® MSCI Emerging Markets Index Fund” beginning on page S-40 of the accompanying ETF Underlying Supplement.

Historical Performance of the EEM

The following graph sets forth the historical performance of the EEM based on the daily historical closing values from April 9, 2011 through April 9, 2021. We obtained the closing values below from the Bloomberg Professional® service. We have not undertaken any independent review of, or made any due diligence inquiry with respect to, the information obtained from the Bloomberg Professional® service.

The historical values of the EEM should not be taken as an indication of future performance, and no assurance can be given as to the Official Closing Price of the EEM on the Final Valuation Date.

Description of the IWN

The iShares® Russell 2000 Value ETF (the “IWN”) is an investment portfolio maintained and managed by iShares Trust and advised by BFA. The shares of the IWN are listed and trade on the NYSE Arca, Inc. under the ticker symbol “IWN.” iShares Trust is a registered investment company that consists of numerous separate investment portfolios, including the IWN.

Information provided to or filed with the SEC by iShares Trust pursuant to the Securities Act of 1933 and the Investment Company Act of 1940 can be located by reference to SEC file numbers 333-92935 and 811-09729, respectively, through the SEC’s website at <http://www.sec.gov>.

Investment Objective and Strategy

The IWN seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the small capitalization value sector of the U.S. equity market as measured by the Russell 2000® Value Index (the “RUJ”). The RUJ was developed by FTSE Russell as an equity benchmark measuring the performance of small-cap value segment of the US equity universe. It includes those Russell 2000® companies with lower price-to-book ratios and lower forecasted growth values. The RUT is constructed to provide a comprehensive and unbiased barometer for the small-cap value segment. The returns of the IWN may be affected by certain management fees and other expenses, which are detailed in its prospectus.

Investment Strategy — Representative Sampling

The IWN pursues a “representative sampling” strategy in attempting to track the performance of the RUT, meaning the IWN invests in a representative sample of securities that collectively has an investment profile similar to the RUT. Securities selected are expected to have aggregate investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the RUT. The IWN generally invests at least 90% of its assets in securities of the RUT and in depositary receipts representing securities of the RUT. The IWN may invest the remainder of its assets in certain futures, options and swap contracts, cash and cash equivalents, including money market funds advised by BFA or its affiliates, as well as in securities not included in the RUT, but which BFA believes will help the IWN track the RUT.

Correlation

The RUT is a theoretical financial calculation, while the IWN is an actual investment portfolio. While the IWN seeks to track the performance of the RUT (i.e., achieve a high degree of correlation with the RUT), the IWN’s return may not match the return of the RUT due to operating expenses, transaction costs, cash flows, regulatory requirements and operational inefficiencies.

Description of the Russell 2000® Value Index

The RUT is an index calculated, published, and disseminated by FTSE Russell, and measures the performance of small-cap value segment of the U.S. equity universe. It includes those Russell 2000® companies with lower price-to-book ratios and lower forecasted growth values. The RUT is a sub-index of the Russell 2000® Index. The Russell 2000® Index consists of the smallest 2,000 companies, by market capitalization, included in the Russell 3000® Index. All 2,000 stocks are traded on a major U.S. exchange, and form a part of the Russell 3000® Index. The Russell 3000® Index is composed of the 3,000 largest U.S. companies as determined by market capitalization. The RUT is part of the Russell U.S. index family. For more information about the Russell 2000®, Index, please see “Defining Eligible Securities”, “Annual Reconstitution”, “Capitalization Adjustments” and “Corporate Action-Driven Changes” beginning on page S-44 of the accompanying ETF Underlying Supplement.

Historical Performance of the IWN

The following graph sets forth the historical performance of the IWN based on the daily historical closing values from April 9, 2011 through April 9, 2021. We obtained the closing values below from the Bloomberg Professional® service. We have not undertaken any independent review of, or made any due diligence inquiry with respect to, the information obtained from the Bloomberg Professional® service.

The historical values of the IWN should not be taken as an indication of future performance, and no assurance can be given as to the Official Closing Price of the IWN on the Final Valuation Date.

EVENTS OF DEFAULT AND ACCELERATION

If the Notes have become immediately due and payable following an Event of Default (as defined in the accompanying prospectus) with respect to the Notes, the calculation agent will determine the accelerated payment due and payable in the same general manner as described in this document except that in such a case, the scheduled trading day immediately preceding the date of acceleration will be used as the Final Valuation Date for purposes of determining the Reference Return of the Reference Asset, and the accelerated Maturity Date will be three business days after the accelerated Final Valuation Date. If a Market Disruption Event exists with respect to the Reference Asset on that scheduled trading day, then the accelerated Final Valuation Date for the Reference Asset will be postponed for up to five scheduled trading days (in the same manner used for postponing the originally scheduled Final Valuation Date). The accelerated Maturity Date will also be postponed by an equal number of business days. For the avoidance of doubt, if no Market Disruption Event exists with respect to an Underlying on the scheduled trading day preceding the date of acceleration, the determination of such Underlying's Reference Return will be made on such date, irrespective of the existence of a Market Disruption Event with respect to any other Underlying occurring on such date.

If the Notes have become immediately due and payable following an Event of Default, you will not be entitled to any additional payments with respect to the Notes. For more information, see "Description of Debt Securities — Senior Debt Securities — Events of Default" in the accompanying prospectus.

SUPPLEMENTAL PLAN OF DISTRIBUTION (CONFLICTS OF INTEREST)

We have appointed HSBC Securities (USA) Inc., an affiliate of HSBC, as the agent for the sale of the Notes. Pursuant to the terms of a distribution agreement, HSBC Securities (USA) Inc. will purchase the Notes from HSBC at the price to public less the underwriting discount set forth on the cover page of this document, for distribution to other registered broker-dealers, or will offer the Notes directly to investors. HSBC Securities (USA) Inc. has offered the Notes at the price to public set forth on the cover page of this document. HSBC USA Inc. or one of our affiliates may pay varying underwriting discounts of up to 0.25% per \$1,000 Principal Amount in connection with the distribution of the Notes to other registered broker-dealers.

An affiliate of HSBC has paid or may pay in the future an amount to broker-dealers in connection with the costs of the continuing implementation of systems to support the Notes.

In addition, HSBC Securities (USA) Inc. or another of its affiliates or agents may use this pricing supplement in market-making transactions after the initial sale of the Notes, but is under no obligation to make a market in the Notes and may discontinue any market-making activities at any time without notice.

See "Supplemental Plan of Distribution (Conflicts of Interest)" on page S-83 in the prospectus supplement.

Delivery of the Notes will be made against payment for the Notes on the Original Issue Date set forth on the inside cover page of this document, which is more than two business days following the Trade Date. Under Rule 15c6-1 under the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in two business days, unless the parties to that trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Notes more than two business days prior to the Original Issue Date will be required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement, and should consult their own advisors.

U.S. FEDERAL INCOME TAX CONSIDERATIONS

There is no direct legal authority as to the proper tax treatment of the Notes, and therefore significant aspects of the tax treatment of the Notes are uncertain as to both the timing and character of any inclusion in income in respect of the Notes. Under one approach, a Note should be treated as a pre-paid executory contract with respect to the Underlyings. We intend to treat the Notes consistent with this approach. Pursuant to the terms of the Notes, you agree to treat the Notes under this approach for all U.S. federal income tax purposes. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Mayer Brown LLP, it is reasonable to treat a Note as a pre-paid executory contract with respect to the Underlyings. Pursuant to this approach, and subject to the discussion below regarding "constructive ownership transactions," we do not intend to report any income or gain with respect to the Notes prior to their maturity or an earlier sale or exchange and we intend to treat any gain or loss upon maturity or an earlier sale or exchange as long-term capital gain or loss, provided you have held the Note for more than one year at such time for U.S. federal income tax purposes. If the Notes are held by the same United States holder until maturity, that holder's holding period will generally include the maturity date. If upon maturity of the Notes, you receive shares of the Least Performing Underlying (the "Underlying Shares") and cash in lieu of any fractional Underlying Share, you should generally recognize capital gain or loss equal to the difference between the amount of cash received in lieu of any fractional Underlying Share and the pro rata portion of your tax basis in the Notes that is allocable to such fractional Underlying Share, based on the amount of cash received and the fair

market value of the Underlying Shares received. Although no assurances can be provided in this regard, you may generally expect not to recognize any gain or loss with respect to any Underlying Shares received. You should generally have a basis in the Underlying Shares equal to your tax basis in the Notes, other than any amount allocated to a fractional Underlying Share. The holding period for such Underlying Shares should start on the day after receipt.

Despite the foregoing, U.S. holders (as defined under “U.S. Federal Income Tax Considerations” in the accompanying prospectus supplement) should be aware that the Internal Revenue Code of 1986, as amended (the “Code”), contains a provision, Section 1260 of the Code, which sets forth rules which are applicable to what it refers to as “constructive ownership transactions.” Due to the manner in which it is drafted, the precise applicability of Section 1260 of the Code to any particular transaction is often uncertain. In general, a “constructive ownership transaction” includes a contract under which an investor will receive payment equal to or credit for the future value of any equity interest in a regulated investment company (such as shares of EFA, EEM and IWN (the “Underlying Shares”)). Under the “constructive ownership” rules, if an investment in the Notes is treated as a “constructive ownership transaction,” any long-term capital gain recognized by a U.S. holder in respect of a Note will be recharacterized as ordinary income to the extent such gain exceeds the amount of “net underlying long-term capital gain” (as defined in Section 1260 of the Code) (the “Excess Gain”). In addition, an interest charge will also apply to any deemed underpayment of tax in respect of any Excess Gain to the extent such gain would have resulted in gross income inclusion for the U.S. holder in taxable years prior to the taxable year of the sale, exchange or maturity of the Note (assuming such income accrued at a constant rate equal to the applicable federal rate as of the date of sale, exchange or maturity of the Note). Furthermore, unless otherwise established by clear and convincing evidence, the “net underlying long-term capital gain” is treated as zero.

Although the matter is not clear, there exists a risk that an investment in the Notes will be treated as a “constructive ownership transaction.” If such treatment applies, it is not entirely clear to what extent any long-term capital gain recognized by a U.S. holder in respect of the Notes will be recharacterized as ordinary income. It is possible, for example, that the amount of the Excess Gain (if any) that would be recharacterized as ordinary income in respect of each Note will equal the excess of (i) any long-term capital gain recognized by the U.S. holder in respect of such a Note and attributable to the Underlying Shares over (ii) the “net underlying long-term capital gain” such U.S. holder would have had if such U.S. holder had acquired a number of the Underlying Shares at fair market value on the original issue date of such Note for an amount equal to the “issue price” of the Note allocable to the Underlying Shares and, upon the date of sale, exchange or maturity of the Note, sold such Underlying Shares at fair market value (which would reflect the percentage increase in the value of the Underlying Shares over the term of the Note). Accordingly, it is possible that all or a portion of any gain on the sale or settlement of the Note after one year could be treated as “Excess Gain” from a “constructive ownership transaction,” which gain would be recharacterized as ordinary income, and subject to an interest charge. U.S. holders should consult their tax advisors regarding the potential application of the “constructive ownership” rules.

We will not attempt to ascertain whether an Underlying or any of the entities whose stock is included in an Underlying would be treated as a passive foreign investment company (“PFIC”) or United States real property holding corporation (“USRPHC”), both as defined for U.S. federal income tax purposes. If an Underlying or one or more of the entities whose stock is included in an Underlying were so treated, certain adverse U.S. federal income tax consequences might apply. You should refer to information filed with the SEC and other authorities by the Underlyings and the entities whose stock is included in the Underlyings, and consult your tax advisor regarding the possible consequences to you if an Underlying or one or more of the entities whose stock is included in an Underlying is or becomes a PFIC or a USRPHC.

Under current law, while the matter is not entirely clear, individual non-U.S. holders, and entities whose property is potentially includible in those individuals’ gross estates for U.S. federal estate tax purposes (for example, a trust funded by such an individual and with respect to which the individual has retained certain interests or powers), should note that, absent an applicable treaty benefit, the Notes are likely to be treated as U.S. situs property, subject to U.S. federal estate tax. These individuals and entities should consult their own tax advisors regarding the U.S. federal estate tax consequences of investing in the Notes.

A “dividend equivalent” payment is treated as a dividend from sources within the United States and such payments generally would be subject to a 30% U.S. withholding tax if paid to a non-U.S. holder. Under U.S. Treasury Department regulations, payments (including deemed payments) with respect to equity-linked instruments (“ELIs”) that are “specified ELIs” may be treated as dividend equivalents if such specified ELIs reference an interest in an “underlying security,” which is generally any interest in an entity taxable as a corporation for U.S. federal income tax purposes if a payment with respect to such interest could give rise to a U.S. source dividend. However, Internal Revenue Service guidance provides that withholding on dividend equivalent payments will not apply to specified ELIs that are not delta-one instruments and that are issued before January 1, 2023. Based on the Issuer’s determination that the Notes are not “delta-one” instruments, non-U.S. holders should not be subject to withholding on dividend equivalent payments, if any, under the Notes. However, it is possible that the Notes could be treated as deemed reissued for U.S. federal income tax purposes upon the occurrence of certain events affecting an Underlying or the Notes, and following such occurrence the Notes could be treated as subject to withholding on dividend equivalent payments. Non-U.S. holders that enter, or have entered, into other transactions in respect of an Underlying or the Notes should consult their tax advisors as to the application of the dividend equivalent withholding tax in the context of the Notes and

their other transactions. If any payments are treated as dividend equivalents subject to withholding, we (or the applicable paying agent) would be entitled to withhold taxes without being required to pay any additional amounts with respect to amounts so withheld.

For a discussion of the U.S. federal income tax consequences of your investment in a Note, please see the discussion under "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement.

PROSPECTIVE PURCHASERS OF NOTES SHOULD CONSULT THEIR TAX ADVISORS AS TO THE FEDERAL, STATE, LOCAL, AND OTHER TAX CONSEQUENCES TO THEM OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF NOTES.

VALIDITY OF THE NOTES

In the opinion of Mayer Brown LLP, as counsel to the Issuer, when this pricing supplement has been attached to, and duly notated on, the master note that represents the Notes pursuant to the Senior Indenture referred to in the prospectus supplement dated February 23, 2021, and issued and paid for as contemplated herein, the Notes offered by this pricing supplement will be valid, binding and enforceable obligations of the Issuer, entitled to the benefits of the Senior Indenture, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith). This opinion is given as of the date hereof and is limited to the laws of the State of New York, the Maryland General Corporation Law (including the statutory provisions, all applicable provisions of the Maryland Constitution and the reported judicial decisions interpreting the foregoing) and the federal laws of the United States of America. This opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the Senior Indenture and the genuineness of signatures and to such counsel's reliance on the Issuer and other sources as to certain factual matters, all as stated in the legal opinion dated February 23, 2018 which has been filed as Exhibit 5.3 to the Issuer's registration statement on Form S-3 dated February 23, 2021.
