

Structured
Investments

HSBC USA Inc.
 \$3,000,000
 Knock-Out Buffer Notes Linked to the Market Vectors Gold Miners ETF due October 11, 2011 (the
 "Notes")

General

- Terms used in this pricing supplement are described or defined herein, in the accompanying product supplement, prospectus supplement and prospectus. The Notes offered will have the terms described in the product supplement, prospectus supplement or prospectus. **The Notes are not principal protected, and you may lose up to 100.00% of your initial investment.**
- All references to "Enhanced Market Participation Notes" in the product supplement shall refer to these Knock-Out Buffer Notes.
- This pricing supplement relates to a single Note offering. The purchaser of a Note will acquire a security linked to a single Reference Asset described below.
- Although the offering relates to a Reference Asset, you should not construe that fact as a recommendation as to the merits of acquiring an investment linked to the Reference Asset or any component security held by the Reference Asset or as to the suitability of an investment in the related Notes.
- Senior unsecured debt obligations of HSBC USA Inc. maturing October 11, 2011.
- Minimum denominations of \$10,000 and integral multiples of \$1,000 in excess thereof.
- **If the terms of the Notes set forth below are inconsistent with those described in the accompanying product supplement, the terms set forth below will supersede.**

Key Terms

Issuer: HSBC USA Inc.
 Issuer Rating: AA- (S&P), A1 (Moody's), AA (Fitch)*
 Reference Asset: The Market Vectors Gold Miners ETF ("GDX")
 Knock-Out Event: A Knock-Out Event occurs if, on any scheduled trading day during the Observation Period, the Official Closing Price (as defined below) has decreased, as compared to the Initial Price, by a percentage that is more than the Knock-Out Buffer Amount.
 Knock-Out Buffer Amount: 30.00%
 Contingent Minimum Return: 5.00%
 Principal Amount: \$1,000 per Note.
 Trade Date: April 1, 2010
 Pricing Date: April 1, 2010
 Original Issue Date: April 7, 2010
 Final Valuation Date: October 5, 2011, subject to adjustment as described herein and in the accompanying product supplement.
 Observation Period: The period beginning on and excluding the Pricing Date and ending on and including the Final Valuation Date.
 Maturity Date: 3 business days after the Final Valuation Date and is expected to be October 11, 2011. The Maturity Date is subject to further adjustment as described under "Specific Terms of the Notes — Market Disruption Events" in the accompanying product supplement.
 Payment at Maturity: **If a Knock-Out Event has occurred**, you will receive a cash payment on the Maturity Date that will reflect the performance of the Reference Asset subject to the Maximum Cap. Under these circumstances, your Payment at Maturity per \$1,000 Principal Amount of Notes will be calculated as the lesser of:

- (a) \$1,000 + (\$1,000 × Reference Return); and
- (b) \$1,000 + (\$1,000 × Maximum Cap)

If a Knock-Out Event has occurred and the Final price is less than the Initial Price, you will lose some or all of your investment. This means that if the Reference Return is -100.00%, you will lose your entire investment.

If a Knock-Out Event has not occurred, you will receive a cash payment on the Maturity Date that will reflect the performance of the Reference Asset, subject to the Contingent Minimum Return and the Maximum Cap. If a Knock-Out Event has not occurred, your Payment at Maturity per \$1,000 Principal Amount of Notes will equal the lesser of (A) \$1,000 plus the product of (a) \$1,000 multiplied by (b) the greater of (i) the Reference Return and (ii) the Contingent Minimum Return, and (B) \$1,000 plus the product of (a) \$1,000 multiplied by (b) the Maximum Cap. For additional clarification, please see "What is the Total Return on the Notes at Maturity Assuming a Range of Performance for the Reference Asset?" herein.

Reference Return: The quotient, expressed as a percentage, calculated as follows:

$$\frac{\text{Final Price} - \text{Initial Price}}{\text{Initial Price}}$$

Maximum Cap: 34.40%
 Initial Price: \$44.50, as determined in the sole discretion of the calculation agent on the Pricing Date.
 Final Price: The Official Closing Price of the Reference Asset on the Final Valuation Date, adjusted by the calculation agent as described under "Adjustments to an ETF" in the accompanying product supplement.
 Official Closing Price: The Official Closing Price on any scheduled trading day as determined by the calculation agent based upon the value displayed on Bloomberg Professional® service page "GDX UP <EQUITY>" or any successor page on Bloomberg Professional® service or any successor service, as applicable.
 CUSIP/ISIN: 4042K0V77 / US4042K0V773
 Form of Notes: Book-Entry
 Listing: The Notes will not be listed on any U.S. securities exchange or quotation system.

* A credit rating reflects the creditworthiness of HSBC USA Inc. and is not indicative of the market risk associated with the Notes or the Reference Asset nor is it a recommendation to buy, sell or hold Notes, and it may be subject to revision or withdrawal at any time by the assigning rating organization. The Notes themselves have not been independently rated. Each rating should be evaluated independently of any other rating.

Investment in the Notes involves certain risks. You should refer to "Selected Risk Considerations" beginning on page 3 of this document and "Risk Factors" on page PS-4 of the product supplement and page S-3 of the prospectus supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the Notes or determined that this pricing supplement, or the accompanying product supplement, prospectus supplement and prospectus, is truthful or complete. Any representation to the contrary is a criminal offense.

The Notes are not deposit liabilities or other obligations of a bank and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction and involve investment risks including possible loss of the Principal Amount invested due to the credit risk of HSBC. In addition, HSBC Securities (USA) Inc. or another of our affiliates or agents may use this pricing supplement in market-making transactions in any Notes after their initial sale. **Unless we or our agent informs you otherwise in the confirmation of sale, this pricing supplement will be used in a market-making transaction.** HSBC Securities (USA) Inc., an affiliate of ours, will purchase the Notes from us for distribution to the placement agent. See "Supplemental Plan of Distribution (Conflicts of Interest)" on the last page of this pricing supplement.

We have appointed J.P. Morgan Securities Inc. as placement agent for the sale of the Notes. J.P. Morgan Securities Inc. will offer the Notes to investors directly or through other registered broker-dealers.

	Price to Public ⁽¹⁾	Fees and Commissions	Proceeds to Issuer
Per Note	\$1,000	\$10	\$990
Total	\$3,000,000	\$30,000	\$2,970,000

⁽¹⁾ Certain fiduciary accounts will pay a purchase price of \$990 per Note, and the placement agent with respect to sales made to such accounts will forgo any fees.

JPMorgan
 Placement Agent
 April 1, 2010

Additional Terms Specific to the Notes

This pricing supplement relates to a single Note offering linked to the Reference Asset identified on the cover page. The purchaser of a Note will acquire a senior unsecured debt security linked to the Reference Asset. Although the Note offering relates only to the Reference Asset identified on the cover page, you should not construe that fact as a recommendation as to the merits of acquiring an investment linked to the Reference Asset or any securities held by Reference Asset or as to the suitability of an investment in the Notes.

You should read this document together with the prospectus dated April 2, 2009, the prospectus supplement dated April 9, 2009 and the product supplement dated April 9, 2009. If the terms of the Notes offered hereby are inconsistent with those described in the accompanying product supplement, prospectus supplement or prospectus, the terms described in this pricing supplement shall control. You should carefully consider, among other things, the matters set forth in "Selected Risk Considerations" beginning on page 3 of this pricing supplement and "Risk Factors" on page PS-4 of the product supplement and page S-3 of the prospectus supplement, as the Notes involve risks not associated with conventional debt securities. All references to "Enhanced Market Participation Notes" in the product supplement shall refer to these Knock-Out Buffer Notes. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the Notes. As used herein, references to the "Issuer", "HSBC", "we", "us" and "our" are to HSBC USA Inc.

HSBC has filed a registration statement (including a prospectus, a prospectus supplement and a product supplement) with the U.S. Securities and Exchange Commission ("SEC") for the offering to which this pricing supplement relates. Before you invest, you should read the prospectus, prospectus supplement and product supplement in that registration statement and other documents HSBC has filed with the SEC for more complete information about HSBC and this offering. You may get these documents for free by visiting EDGAR on the SEC's web site at www.sec.gov. Alternatively, HSBC Securities (USA) Inc. or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement and product supplement if you request them by calling toll-free 1 866 811 8049.

Supplemental Information Relating to the Terms of the Notes

Notwithstanding anything contained in the accompanying prospectus supplement or product supplement to the contrary, the Notes will be issued under the senior indenture dated March 31, 2009, between HSBC USA Inc., as Issuer, and Wells Fargo Bank, National Association, as trustee. Such indenture has substantially the same terms as the indenture described in the accompanying prospectus supplement and product supplement. HSBC Bank USA, N.A. will act as paying agent with respect to the Notes pursuant to a Paying Agent and Securities Registrar Agreement dated June 1, 2009, between HSBC USA Inc. and HSBC Bank USA, N.A.

Selected Purchase Considerations

- **APPRECIATION POTENTIAL** — The Notes provide the opportunity to participate in the appreciation of the Reference Asset at maturity up to the Maximum Cap on the Notes of 34.40%, or a maximum payment of \$1,344 for every \$1,000 Principal Amount of Notes. ***If a Knock-Out Event has not occurred***, in addition to the Principal Amount, you will receive at maturity at least the Contingent Minimum Return of 5.00% on the Notes, or a minimum Payment at Maturity of \$1,050 for every \$1,000 Principal Amount of Notes. Even if a Knock-Out Event has occurred, if the Final Price is greater than the Initial Price, in addition to the Principal Amount, you will receive at maturity a return on the Notes equal to the Reference Return subject to the Maximum Cap. Because the Notes are our senior unsecured debt obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **LIMITED PROTECTION AGAINST LOSS** — ***If a Knock-Out Event has not occurred***, you will receive at least the Principal Amount and the Contingent Minimum Return at maturity even if the Final Price is below the Initial Price. ***If a Knock-Out Event has occurred and the Final Price is less than the Initial Price***, you will lose 1.00% of your Principal Amount for every 1.00% that the Final Price is less than the Initial Price. If a Knock-Out Event has occurred and the Reference Return is -100.00%, you will lose your entire investment.
- **EXPOSURE TO PERFORMANCE OF THE MARKET VECTORS GOLD MINERS ETF** — The Reference Asset is an exchange-traded fund of Market Vectors™ ETF Trust, which is advised by Van Eck Associates Corporation. The Reference Asset seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the NYSE Arca Gold Miners Index (the "underlying index"). The underlying index is a modified market capitalization-weighted index consisting of common stocks and American depository receipts of publicly traded companies involved primarily in mining for gold. For additional information about the Reference Asset, see the information set forth under "Description of the Reference Asset" herein.
- **TAX TREATMENT** — There is no direct legal authority as to the proper tax treatment of the Notes, and therefore significant aspects of the tax treatment of the Notes are uncertain as to both the timing and character of any inclusion in income in respect of the Notes. Under one approach, a Note should be treated as a pre-paid forward or other executory contract with respect to the Reference Asset. We intend to treat the Notes consistent with this approach. Pursuant to the terms of the Notes, you agree to treat the Notes under this approach for all U.S. federal income tax purposes. Notwithstanding any disclosure in the accompanying product supplement to the contrary, our special U.S. tax counsel in this transaction is Sidley Austin LLP. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Sidley Austin LLP, it is

reasonable to treat a Note as a pre-paid forward or other executory contract with respect to the Reference Asset. Pursuant to this approach, and subject to the discussion below regarding “constructive ownership transactions”, we do not intend to report any income or gain with respect to the Notes prior to their maturity or an earlier sale or exchange and we intend to treat any gain or loss upon maturity or an earlier sale or exchange as long-term capital gain or loss, provided that you have held the Note for more than one year at such time for U.S. federal income tax purposes.

Despite the foregoing, U.S. holders (as defined under “Certain U.S. Federal Income Tax Considerations” in the accompanying prospectus supplement) should be aware that the Internal Revenue Code of 1986, as amended (the “Code”) contains a provision, Section 1260 of the Code, which sets forth rules which are applicable to what it refers to as “constructive ownership transactions.” Due to the manner in which it is drafted, the precise applicability of Section 1260 of the Code to any particular transaction is often uncertain. In general, a “constructive ownership transaction” includes a contract under which an investor will receive payment equal to or credit for the future value of any equity interest in a regulated investment company (such as shares of the Reference Asset (the “Underlying Shares”). Under the “constructive ownership” rules, if an investment in the Notes is treated as a “constructive ownership transaction,” any long-term capital gain recognized by a U.S. holder in respect of a Note will be recharacterized as ordinary income to the extent such gain exceeds the amount of “net underlying long-term capital gain” (as defined in Section 1260 of the Code) of the U.S. holder determined as if the U.S. holder had acquired the Underlying Shares on the Original Issue Date of the Note at fair market value and sold them at fair market value on the Maturity Date (if the Note was held until the Maturity Date) or on the date of sale or exchange of the Note (if the Note was sold or exchanged prior to the Maturity Date) (the “Excess Gain”). In addition, an interest charge will also apply to any deemed underpayment of tax in respect of any Excess Gain to the extent such gain would have resulted in gross income inclusion for the U.S. holder in taxable years prior to the taxable year of the sale, exchange or maturity of the Note (assuming such income accrued at a constant rate equal to the applicable federal rate as of the date of sale, exchange or maturity of the Note).

Although the matter is not clear, there exists a risk that an investment in the Notes will be treated as a “constructive ownership transaction.” If such treatment applies, it is not entirely clear to what extent any long-term capital gain recognized by a U.S. holder in respect of a Note will be recharacterized as ordinary income. It is possible, for example, that the amount of the Excess Gain (if any) that would be recharacterized as ordinary income in respect of each Note will equal the excess of (i) any long-term capital gain recognized by the U.S. holder in respect of such a Note over (ii) the “net underlying long-term capital gain” such U.S. holder would have had if such U.S. holder had acquired a number of the Underlying Shares at fair market value on the Original Issue Date of such Note for an amount equal to the “issue price” of the Note and, upon the date of sale, exchange or maturity of the Note, sold such Underlying Shares at fair market value (which would reflect the percentage increase in the value of the Underlying Shares over the term of the Note). Accordingly, U.S. holders should consult their tax advisors regarding the potential application of the “constructive ownership” rules.

We will not attempt to ascertain whether the issuer of any stock owned by the Reference Asset would be treated as a “passive foreign investment company,” within the meaning of Section 1297 of the Code. In the event that the issuer of any stock owned by the Reference Asset were treated as a passive foreign investment company, certain adverse U.S. federal income tax consequences might apply. You should refer to information filed with the SEC or other authorities by the issuers of stock owned by the Reference Asset and consult your tax advisor regarding the possible consequences to you, if any, in the event that one or more issuers of stock owned by the Reference Asset is or becomes a passive foreign investment company.

For a discussion of certain of the U.S. federal income tax consequences of your investment in a Note, please see the discussion under “Certain U.S. Federal Income Tax Considerations” in the accompanying product supplement and the discussion under “Certain U.S. Federal Income Tax Considerations” in the accompanying prospectus supplement.

Selected Risk Considerations

An investment in the Notes involves significant risks. Investing in the Notes is not equivalent to investing directly in the Reference Asset or any of the component securities held by the Reference Asset. These risks are explained in more detail in the “Risk Factors” sections of the accompanying product supplement and prospectus supplement.

- **SUITABILITY OF NOTES FOR INVESTMENT** — You should only reach a decision to invest in the Notes after carefully considering, with your advisors, the suitability of the Notes in light of your investment objectives and the information set out in this pricing supplement. Neither HSBC nor any dealer participating in the offering makes any recommendation as to the suitability of the Notes for investment.
- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The Notes do not guarantee any return of principal. The return on the Notes at maturity is linked to the performance of the Reference Asset subject to the Maximum Cap and will depend on whether a Knock-Out Event has occurred and whether, and the extent to which, the Reference Return is positive or negative. If the Official Closing Price is ever below the Initial Price by a percentage that is more than the Knock-Out Buffer Amount of 30.00% during the Observation Period, a Knock-Out Event has occurred, and the protection provided by the Knock-Out Buffer Amount will terminate. **IF A KNOCK-OUT EVENT OCCURS, YOU MAY LOSE UP TO 100.00% OF YOUR INVESTMENT.**
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM CAP** — If the Final Price is greater than the Initial Price, for each \$1,000 Principal Amount of Notes you hold, you will receive at maturity \$1,000 plus an additional amount that will not exceed the Maximum Cap of 34.40% of the Principal Amount, regardless of the appreciation in the Reference Asset, which may be significantly greater than the Maximum Cap. **YOU WILL NOT RECEIVE A RETURN ON THE NOTES GREATER THAN THE MAXIMUM CAP.**
- **THE NOTES ARE SUBJECT TO THE CREDIT RISK OF HSBC USA INC.** — The Notes are senior unsecured debt obligations of the Issuer, HSBC, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the Notes, including any principal protection at maturity, depends on the ability of HSBC to satisfy its

obligations as they come due. As a result, the actual and perceived creditworthiness of HSBC may affect the market value of the Notes and, in the event HSBC were to default on its obligations, you may not receive the amounts owed to you under the terms of the Notes.

- **YOUR PROTECTION AND ABILITY TO RECEIVE THE CONTINGENT MINIMUM RETURN MAY TERMINATE AT ANY TIME DURING THE TERM OF THE NOTES** — If the Official Closing Price is ever below the Initial Price by a percentage that is more than the Knock-Out Buffer Amount of 30.00% during the Observation Period, you will be fully exposed to any decline in the Reference Asset and will not be entitled to receive the protection provided by the Contingent Minimum Return on the Notes. Under these circumstances, if the Final Price is less than the Initial Price, you will lose 1.00% of the Principal Amount of your investment for every 1.00% decrease in the Final Price as compared to the Initial Price. You will be subject to this potential loss of principal even if the price of Reference Asset subsequently increases such that the Official Closing Price is less than the Initial Price by not more than the Knock-Out Buffer Amount of 30.00%, or is equal to or greater than the Initial Price. As a result, you may lose some or all of your investment. Your return on the Notes may not reflect the return you would receive on a conventional fixed or floating rate debt instrument with a comparable term to maturity issued by HSBC or any other issuer with a similar credit rating.
- **THERE ARE RISKS ASSOCIATED WITH AN INVESTMENT IN A CONCENTRATED INDUSTRY** — The securities held by the Reference Asset are issued by companies that are in the gold mining industry. Therefore, an investment in the Notes may carry risks similar to a concentrated securities investment in a single industry. Consequently, the value of the Notes may be subject to greater volatility and be more adversely affected by a single economic, environmental, political or regulatory occurrence affecting this industry than an investment linked to a more broadly diversified group of issuers.
- **RISKS ASSOCIATED WITH THE GOLD MINING INDUSTRY** — Because the Reference Asset primarily invests in stocks and American Depositary Receipts of companies that are involved in the gold mining industry, it is subject to certain risks associated with such companies. Competitive pressures may have a significant effect on the financial condition of such companies in the gold mining industry. Also, gold mining companies are highly dependent on the price of gold bullion. These prices may fluctuate substantially over short periods of time so the price of the Reference Asset may be more volatile than other types of investments. Factors affecting gold prices include economic factors, including, among other things, the structure of and confidence in the global monetary system, expectations of the future rate of inflation, the relative strength of, and confidence in, the U.S. dollar (the currency in which the price of gold is generally quoted), interest rates and gold borrowing and lending rates, and global or regional economic, financial, political, regulatory, judicial or other events. Gold prices may also be affected by industry factors such as industrial and jewelry demand, lending, sales and purchases of gold by the official sector, including central banks and other governmental agencies and multilateral institutions which hold gold, levels of gold production and production costs, and short-term changes in supply and demand because of trading activities in the gold market.
- **SMALL-CAPITALIZATION OR MID-CAPITALIZATION COMPANIES RISK** — The Reference Asset may invest in companies that may be considered small-capitalization or mid-capitalization companies. These companies often have greater stock price volatility, lower trading volume and less liquidity than large-capitalization companies and therefore the Reference Asset's share price may be more volatile than that of funds that invest a larger percentage of their assets in stocks issued by large-capitalization companies. Stock prices of small-capitalization or mid-capitalization companies are also more vulnerable than those of large-capitalization companies to adverse business and economic developments, and the stocks of small-capitalization or mid-capitalization companies may be thinly traded, making it difficult for the Reference Asset to buy and sell them. In addition, small-capitalization or mid-capitalization companies are typically less stable financially than large-capitalization companies and may depend on a small number of key personnel, making them more vulnerable to loss of personnel. Small-capitalization or mid-capitalization companies are often subject to less analyst coverage and may be in early, and less predictable, periods of their corporate existences. Such companies tend to have smaller revenues, less diverse product lines, smaller shares of their product or service markets, fewer financial resources and less competitive strengths than large-capitalization companies and are more susceptible to adverse developments related to their products.
- **THE VALUE OF SHARES OF THE REFERENCE ASSET MAY NOT COMPLETELY TRACK THE VALUE OF THE UNDERLYING INDEX** — Although the trading characteristics and valuations of shares of the Reference Asset will usually mirror the characteristics and valuations of the underlying index, the value of the shares of the Reference Asset may not completely track the value of the underlying index. The Reference Asset may reflect transaction costs and fees that are not included in the calculation of the underlying index. Additionally, because the Reference Asset may not actually hold all of the stocks comprising the underlying index but invests in a representative sample of securities which have a similar investment profile as the stocks comprising the underlying index, the Reference Asset may not fully replicate the performance of the underlying index.
- **POTENTIALLY INCONSISTENT RESEARCH, OPINIONS OR RECOMMENDATIONS BY HSBC AND JPMORGAN** — HSBC, JPMorgan, or their affiliates may publish research, express opinions or provide recommendations that are inconsistent with investing in or holding the Notes and which may be revised at any time. Any such research, opinions or recommendations could affect the price of the Reference Asset, the level of the underlying index or the price of the stocks included in the underlying index, and therefore, the market value of the Notes.
- **MANAGEMENT RISK** — The Reference Asset is not managed according to traditional methods of “active” investment management, which involve the buying and selling of securities based on economic, financial and market analysis and investment judgment. Instead, the Reference Asset, utilizing a “passive” or indexing investment approach, attempts to approximate the investment performance of its underlying index by investing in a portfolio of securities that generally replicates the underlying index. Therefore, unless a specific security is removed from the underlying index, the Reference Asset generally would not sell a security because the security's issuer was in financial trouble. In addition, the Reference Asset is subject to the risk that the investment strategy of the fund's investment adviser may not produce the intended results. Your investment is linked to the Reference Asset. Any information relating to the relevant underlying index is only relevant to understanding the index that the Reference Asset seeks to replicate.

- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the Payment at Maturity described in this pricing supplement is based on the full Principal Amount of your Notes, the original issue price of the Notes includes the placement agent's commission and the estimated cost of hedging our obligations under the Notes through one or more of our affiliates. As a result, the price, if any, at which HSBC Securities (USA) Inc. will be willing to purchase Notes from you in secondary market transactions, if at all, will likely be lower than the original issue price, and any sale of Notes by you prior to the Maturity Date could result in a substantial loss to you. The Notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Notes to maturity.
- **THERE IS LIMITED ANTI-DILUTION PROTECTION** — The calculation agent will adjust the Final Price, for certain events affecting the shares of the Reference Asset, such as stock splits and corporate actions which may affect the Payment at Maturity. The calculation agent is not required to make an adjustment for every corporate action which affects the shares of the Reference Asset. If an event occurs that does not require the calculation agent to adjust the amount of the shares of the Reference Asset, the market price of the relevant Notes and the Payment at Maturity may be materially and adversely affected. See the "Adjustments" section on page PS-23 of the accompanying product supplement.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the Notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of shares of the Reference Asset or the underlying index would have.
- **THE NOTES LACK LIQUIDITY** — The Notes will not be listed on any securities exchange. HSBC Securities (USA) Inc. may offer to purchase the Notes in the secondary market but is not required to do so and may cease making such offers at any time if at all. Because other dealers are not likely to make a secondary market for the Notes, the price at which you may be able to trade your Notes is likely to depend on the price, if any, at which HSBC Securities (USA) Inc. is willing to buy the Notes. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Notes easily.
- **POTENTIAL CONFLICTS** — HSBC and its affiliates play a variety of roles in connection with the issuance of the Notes, including acting as calculation agent and hedging its obligations under the Notes. In performing these duties, the economic interests of the calculation agent and other affiliates of HSBC are potentially adverse to your interests as an investor in the Notes. Although the calculation agent has made all determinations and taken all action in relation to establishing the Initial Price in good faith, it should be noted that such discretion could have an impact (positive or negative) on the value of your Notes. HSBC will not have any obligation to consider your interests as a holder of the Notes in taking any corporate action that might affect the price of the Reference Asset and the value of the Notes.
- **THE NOTES ARE NOT INSURED BY ANY GOVERNMENTAL AGENCY OF THE UNITED STATES OR ANY OTHER JURISDICTION** — The Notes are not deposit liabilities or other obligations of a bank and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency or program of the United States or any other jurisdiction. An investment in the Notes is subject to the credit risk of HSBC, and in the event that HSBC is unable to pay its obligations as they become due, you may not receive the full Payment at Maturity of the Notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the Official Closing Price of the Reference Asset on any day, the value of the Notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
 - the expected volatility of the Reference Asset;
 - the time to maturity of the Notes;
 - whether a Knock-Out Event has occurred;
 - the dividend rate on the equity securities held by the Reference Asset or comprising the underlying index;
 - the price of gold;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory or judicial events that affect the equity securities held by the Reference Asset or the stock markets generally; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

What Is the Total Return on the Notes at Maturity Assuming a Range of Performance for the Reference Asset?

The following table and graph illustrates the hypothetical total return at maturity on the Notes. The “total return” as used in this pricing supplement is the number, expressed as a percentage, that results from comparing the Payment at Maturity per \$1,000 Principal Amount of Notes to \$1,000. The hypothetical total returns set forth below reflect the Knock-Out Buffer Amount of 30.00%, the Contingent Minimum Return on the Notes of 5.00%, the Maximum Cap of 34.40% and the Initial Price of \$44.50. The hypothetical total returns set forth below are for illustrative purposes only and may not be the actual total returns applicable to the Notes. The numbers appearing in the following table and examples have been rounded for ease of analysis.

Hypothetical Final Price	Hypothetical Reference Return	Hypothetical Total Return	
		Knock Out Event Has Not Occurred ⁽¹⁾	Knock Out Event Has Occurred ⁽²⁾
\$89.00	100.00%	34.40%	34.40%
\$80.10	80.00%	34.40%	34.40%
\$71.20	60.00%	34.40%	34.40%
\$62.30	40.00%	34.40%	34.40%
\$57.85	30.00%	30.00%	30.00%
\$55.63	25.00%	25.00%	25.00%
\$53.40	20.00%	20.00%	20.00%
\$48.95	10.00%	10.00%	10.00%
\$46.73	5.00%	5.00%	5.00%
\$45.61	2.50%	5.00%	2.50%
\$44.50	0.00%	5.00%	0.00%
\$42.28	-5.00%	5.00%	-5.00%
\$40.05	-10.00%	5.00%	-10.00%
\$37.83	-15.00%	5.00%	-15.00%
\$35.60	-20.00%	5.00%	-20.00%
\$31.15	-30.00%	5.00%	-30.00%
\$26.70	-40.00%	N/A	-40.00%
\$17.80	-60.00%	N/A	-60.00%
\$8.90	-80.00%	N/A	-80.00%
\$0.00	-100.00%	N/A	-100.00%

(1) The Official Closing Price has not declined, as compared to the Initial Price, by a percentage that is more than 30.00% at any time during the Observation Period.

(2) The Official Closing Price has declined, as compared to the Initial Price, by a percentage that is more than 30.00% at any time during the Observation Period.

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table above are calculated.

Example 1: A Knock-Out Event has not occurred and the price of the Reference Asset increases from the Initial Price of \$44.50 to a Final Price of \$45.61. Because a Knock-Out Event has not occurred and the Reference Return of 2.50% is less than the Contingent Minimum Return of 5.00% which is less than the Maximum Cap of 34.40%, the investor benefits from the Contingent Minimum Return and receives a Payment at Maturity of \$1,050 per \$1,000 Principal Amount of Notes.

Example 2: A Knock-Out Event has not occurred and the price of the Reference Asset decreases from the Initial Price of \$44.50 to a Final Price of \$37.83. Because a Knock-Out Event has not occurred and the Reference Return of -15.00% is less than the Contingent Minimum Return of 5.00%, the investor benefits from the Contingent Minimum Return and receives a Payment at Maturity of \$1,050 per \$1,000 Principal Amount of Notes.

Example 3: A Knock-Out Event has occurred and the price of the Reference Asset decreases from the Initial Price of \$44.50 to a Final Price of \$37.83. Because a Knock-Out Event has occurred and the Reference Return is -15.00%, the investor is exposed to the negative performance of the Reference Asset and receives a Payment at Maturity of \$850 per \$1,000 Principal Amount of Notes, calculated as follows:

$$\$1,000 + (\$1,000 \times -15.00\%) = \$850$$

Example 4: The price of the Reference Asset increases from the Initial Price of \$44.50 to a Final Price of \$55.63. Regardless of a Knock-Out Event occurring or not, because the Reference Return of 25.00% is greater than the Contingent Minimum Return of 5.00% but less than the Maximum Cap of 34.40%, the investor receives a Payment at Maturity of \$1,250 per \$1,000 Principal Amount of Notes, calculated as follows:

$$\$1,000 + (\$1,000 \times 25.00\%) = \$1,250$$

Example 5: The price of the Reference Asset increases from the Initial Price of \$44.50 to a Final Price of \$62.30. Regardless of a Knock-Out Event occurring or not, because the Reference Return of 40.00% is greater than the Contingent Minimum Return of 5.00% and also greater than the Maximum Cap of 34.40%, the investor receives a Payment at Maturity of \$1,344 per \$1,000 Principal Amount of Notes, calculated as follows:

$$\$1,000 + (\$1,000 \times 34.40\%) = \$1,344$$

Example 6: A Knock-Out Event has occurred and the price of the Reference Asset decreases from the Initial Price of \$44.50 to a Final Price of \$26.70. Because a Knock-Out Event has occurred and the Reference Return is -40.00%, the investor is exposed to the performance of the Reference Asset and receives a Payment at Maturity of \$600 per \$1,000 Principal Amount of Notes, calculated as follows:

$$\$1,000 + (\$1,000 \times -40.00\%) = \$600$$

Description of the Reference Asset

General

This pricing supplement is not an offer to sell and it is not an offer to buy interests in the Reference Asset or any of the stocks held by the Reference Asset. All disclosures contained in this pricing supplement regarding a Reference Asset, including its make-up, performance, method of calculation and changes in its components, where applicable, are derived from publicly available information. Entities with securities registered under the Securities Exchange Act of 1934, as amended, (the "Exchange Act") are required to file periodically certain financial and other information specified by the U.S. Securities and Exchange Commission (the "SEC"). Information provided to or filed with the SEC electronically can be accessed through a website maintained by the SEC. The address of the SEC's website is <http://www.sec.gov>. Information provided to or filed with the SEC pursuant to the Exchange Act by an entity issuing a Reference Asset can be located by reference to the SEC file number specified in the description of each Reference Asset below. We make no representation that these publicly available documents are accurate or complete. You should make your own investigation into the Reference Asset. For more information, we urge you to read the section "Information Regarding the Reference Asset and the Reference Asset Issuer" in the product supplement.

The Market Vectors Gold Miners ETF ("GDX")

All information in this pricing supplement regarding the Reference Asset, including, without limitation, its make-up, method of calculation and changes in its components, is from publicly available information. Such information reflects the policies of, and is subject to change by, Market Vectors™ ETF Trust (the "Market Vectors Trust"), Van Eck Securities Corporation, and Van Eck Associates Corporation ("Van Eck"). The Reference Asset is an investment portfolio maintained and managed by the Market Vectors Trust. Van Eck is the investment adviser to the Reference Asset. The Reference Asset is an exchange-traded fund that trades on the NYSE Arca Inc. (the "NYSE Arca") under the ticker symbol "GDX." We make no representations or warranty as to the accuracy or completeness of the information derived from these public sources.

The Market Vectors Trust as of September 30, 2009 consisted of 28 investment portfolios including the Reference Asset. Information provided to or filed with the SEC by the Market Vectors Trust pursuant to the Securities Act of 1933, as amended, and the Investment Company Act of 1940, as amended, can be located by reference to SEC file numbers 333-123257 and 811-10325, respectively, through the SEC's website at <http://www.sec.gov>. We make no representation or warranty as to the accuracy or completeness of such information.

Investment Objective and Strategy

The Reference Asset seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of NYSE Arca Gold Miners Index. The Reference Asset normally invests at least 80% of its total assets in common stocks and American depository receipts ("ADRs") of companies involved in the gold mining industry. The NYSE Arca Gold Miners Index, calculated by NYSE Arca, is a modified market capitalization-weighted index consisting of common stocks and ADRs of publicly traded companies involved primarily in mining for gold.

As of March 30, 2010, the Reference Asset holdings by country consisted of the following 6 countries: Australia, Canada, Peru, South Africa, the United Kingdom and the United States. In addition, as of such date, the Reference Asset's three largest holdings by country as of March 30, 2010 Canada, South Africa, and the United States. Its three largest index constituents were Barrick Gold Corp., Goldcorp, Inc. and Newmont Mining Corp.

The Reference Asset uses a "passive" or indexing investment approach to try to track the NYSE Arca Gold Miners Index. Generally, the Reference Asset will hold all of the securities which comprise the NYSE Arca Gold Miners Index in proportion to their weightings in the NYSE Arca Gold Miners Index. The Reference Asset normally invests at least 95% of its total assets in securities that comprise the NYSE Arca Gold Miners Index. A lesser percentage may be so invested to the extent that Van Eck needs additional flexibility to comply with the requirements of the Internal Revenue Code and other regulatory requirements. Under various circumstances, it may not be possible or practicable to purchase all of those securities in these weightings. In these circumstances, the Reference Asset may purchase a sample of securities in the NYSE Arca Gold Miners Index. There also may be instances in which the Van Eck may choose to overweight another security in the NYSE Arca Gold Miners Index, purchase securities not in the NYSE Arca Gold Miners Index which the Van Eck believes are appropriate to substitute for certain securities in the NYSE Arca Gold Miners Index or utilize various combinations of other available investment techniques in seeking to replicate as closely as possible, before fees and expenses, the price and yield performance of the NYSE Arca Gold Miners Index. The Reference Asset may sell securities that are represented in the NYSE Arca Gold Miners Index in anticipation of their removal from the NYSE Arca Gold Miners Index or purchase securities not represented in the NYSE Arca Gold Miners Index in anticipation of their addition to the NYSE Arca Gold Miners Index.

Correlation

The NYSE Arca Gold Miners Index is a theoretical financial calculation, while the Reference Asset is an actual investment portfolio. The performance of the Reference Asset and the NYSE Arca Gold Miners Index will vary somewhat due to transaction costs, market impact, corporate actions (such as mergers and spin-offs) and timing variances. A figure of 100% would indicate perfect correlation. Any correlation of less than 100% is called "tracking error." The Reference Asset, using a "passive" or indexing investment approach, can be expected to have a greater tracking error than a fund using replication strategy.

Holdings Information

The Reference Asset normally invests at least 80% of its total assets in common stocks and American depository receipts (“ADRs”) of companies involved in the gold mining industry. This 80% investment policy is non-fundamental and requires 60 days’ prior written notice to shareholders before it can be changed. The following tables summarize the Reference Asset’s top holdings in individual companies and by market capitalization as of such date.

Top Index Constituents as of March 30, 2010

Company	Percentage of Total Holdings
BARRICK GOLD CORP. (ABX)	16.22%
GOLDCORP, INC. (GG)	11.88%
NEWMONT MINING CORP. (NEM)	10.87%
ANGLOGOLD ASHANTI LTD. (AU)	5.91%
KINROSS GOLD CORP. (KGC)	5.21%
GOLD FIELDS LTD. (GFI)	4.69%
YAMANA GOLD, INC. (AUY)	4.51%
COMPANIA DE MINAS BUENAVENTURA SA (BVN)	4.35%
AGNICO-EAGLE MINES LTD (AEM)	4.34%
LIHR GOLD LTD (LIHR)	4.20%
RANDGOLD RESOURCES LTD. (GOLD)	4.20%
ELDORADO GOLD CORP. (EGO)	4.03%
SILVER WHEATON CORP (SLW)	3.30%
IAMGOLD CORP (IAG)	3.06%
HARMONY GOLD MINING CO LTD (HMY)	2.51%

Top holdings by market capitalization as of December 31, 2009

LARGE (> 5.0B)	87.4%
MEDIUM (1.0 > 5.0B)	9.4%
SMALL (< 1.0B)	3.2%

The information above was compiled from the Market Vectors Trust’s website. We make no representation or warranty as to the accuracy of the information above.

Description of the NYSE Arca Gold Miners Index

All information in this pricing supplement regarding the NYSE Arca Gold Miners Index, including, without limitation, its make-up, method of calculation and changes in its components, is from publicly available information, and we have not participated in the preparation of, or verified, such publicly available information. Such information reflects the policies of, and is subject to change by, the NYSE Arca. The NYSE Arca Gold Miners Index was developed by the NYSE Amex (formerly the American Stock Exchange) and is calculated, maintained and published by the NYSE Arca. The NYSE Arca has no obligation to continue to publish, and may discontinue the publication of, the NYSE Arca Gold Miners Index. The NYSE Arca Gold Miners Index is reported by Bloomberg under the ticker symbol “GDM.”

The NYSE Arca Gold Miners Index is a modified market capitalization weighted index comprised of publicly traded companies involved primarily in the mining of gold or silver.

Eligibility Criteria for Index Components

The NYSE Arca Gold Miners Index includes common stocks and ADRs of selected companies that are involved in mining for gold and silver and that are listed for trading on the NYSE or the NYSE Amex or quoted on The NASDAQ Stock Market. Only companies with market capitalization greater than \$100 million that have a daily average trading volume of at least 50,000 shares over the past six months are eligible for inclusion in the NYSE Arca Gold Miners Index.

Index Calculation

The NYSE Arca Gold Miners Index is calculated using a modified market capitalization weighting methodology. The NYSE Arca Gold Miners Index is weighted based on the market capitalization of each of the component securities, modified to conform to the following asset diversification requirements, which are applied in conjunction with the scheduled quarterly adjustments to the NYSE Arca Gold Miners Index:

- i. the weight of any single component security may not account for more than 20% of the total value of the underlying index;
- ii. the component securities are split into two subgroups-large and small, which are ranked by market capitalization weight in the Reference Asset. Large stocks are defined as having a underlying index weight greater than or equal to 5%. Small securities are defined as having an index weight below 5%; and

iii. the aggregate weight of those component securities which individually represent more than 4.5% of the total value of the underlying index may not account for more than 50% of the total underlying index value.

The NYSE Arca Gold Miners Index is reviewed quarterly so that the NYSE Arca Gold Miners Index components continue to represent the universe of companies involved in the gold mining industry. The NYSE Arca may at any time and from time to time change the number of securities comprising the group by adding or deleting one or more securities, or replacing one or more securities contained in the group with one or more substitute securities of its choice, if in the NYSE Arca's discretion such addition, deletion or substitution is necessary or appropriate to maintain the quality and/or character of the NYSE Arca Gold Miners Index.

Changes to the NYSE Arca Gold Miners Index compositions and/or the component share weights in the NYSE Arca Gold Miners Index typically take effect after the close of trading on the third Friday of each calendar quarter month in connection with the quarterly rebalance.

At the time of the quarterly rebalance, the weights for the components stocks (taking into account expected component changes and share adjustments), are modified in accordance with the following procedures.

Diversification Rule 1: If any component stock exceeds 20% of the total value of the NYSE Arca Gold Miners Index, then all stocks greater than 20% of the NYSE Arca Gold Miners Index are reduced to represent 20% of the value of the NYSE Arca Gold Miners Index. The aggregate amount by which all component stocks are reduced is redistributed proportionately across the remaining stocks that represent less than 20% of the index value. After this redistribution, if any other stock then exceeds 20%, the stock is set to 20% of the index value and the redistribution is repeated.

Diversification Rule 2: The components are sorted into two groups, large are components with a starting index weight of 5% or greater and small are those that are under 5% (after any adjustments for Diversification Rule 1). Each group in aggregate will be represent 50% of the index weight. The weight of each of the large stocks will be scaled down proportionately with a floor of 5% so that the aggregate weight of the large components will be reduced to represent 50% of the NYSE Arca Gold Miners Index. If any component stock falls below a weight equal to the product of 5% and the proportion by which the stocks were scaled down following this distribution, then the weight of the stock is set equal to the product of 5% and the proportion by which the stocks were scaled down, the components with weights greater than 5% will reduced proportionately. The weight of each of the small components will be scaled up proportionately from the redistribution of the large components. If any component stock exceeds a weight equal to the product of 4.5% and the proportion by which the stocks were scaled down following this distribution, then the weight of the stock is set equal to the product of 4.5% and the proportion by which the stocks were scaled down. The redistribution of weight to the remaining stocks is repeated until the entire amount has been redistributed.

Index Maintenance

The NYSE Arca Gold Miners Index is reviewed quarterly to ensure that at least 90% of the index weight is accounted for by index components that continue to meet the initial eligibility requirements. Components will be removed from the NYSE Arca Gold Miners Index during the quarterly review if the market capitalization falls below \$50 million or the traded average daily shares for the previous six months is lower than 25,000 shares. In conjunction with the quarterly review, the share weights used in the calculation of the NYSE Arca Gold Miners Index are determined based upon current shares outstanding modified, if necessary, to provide greater index diversification, as described above. The index components and their share weights are determined and announced prior to taking effect. The share weight of each component stock in the index portfolio remains fixed between quarterly reviews except in the event of certain types of corporate actions such as stock splits, reverse stock splits, stock dividends, or similar events. The share weights used in the index calculation are not typically adjusted for shares issued or repurchased between quarterly reviews. However, in the event of a merger between two components, the share weight of the surviving entity may be adjusted to account for any stock issued in the acquisition. The NYSE Arca may substitute stocks or change the number of stocks included in the NYSE Arca Gold Miners Index, based on changing conditions in the industry or in the event of certain types of corporate actions, including mergers, acquisitions, spin-offs, and reorganizations. In the event of component or share weight changes to the index portfolio, the payment of dividends other than ordinary cash dividends, spin-offs, rights offerings, re-capitalization, or other corporate actions affecting a component stock of the NYSE Arca Gold Miners Index; the index divisor may be adjusted to ensure that there are no changes to the index price as a result of non-market forces.

Historical Performance of the Reference Asset

The following graph sets forth the historical performance of the Reference Asset based on the historical Official Closing Prices from May 23, 2006 through March 30, 2010. The Official Closing Price for the Reference Asset on March 30, 2010 was \$43.86. The actual Initial Price is \$44.50, as determined in the sole discretion of the calculation agent on the Pricing Date. We obtained the Official Closing Prices below from Bloomberg Professional® service. We make no representation or warranty as to the accuracy or completeness of the information obtained from Bloomberg Professional® service.

The historical Official Closing Prices of the Reference Asset should not be taken as an indication of future performance, and no assurance can be given as to the Official Closing Price on the Final Valuation Date. We cannot give you assurance that the performance of the Reference Asset will result in the return of any of your initial investment.
