Capped Leveraged Index Return Notes[®] Linked to the Industrial Select Sector Index

- Maturity of approximately two years
- 2-to-1 upside exposure to increases in the Index, subject to a capped return of [20% to 24%]
- 1-to-1 downside exposure to decreases in the Index beyond a 10% decline, with 90% of the Original Offering Price at risk
- All payments at maturity subject to the credit risk of HSBC USA Inc.
- No interest payments
- No listing on any securities exchange

Enhanced Return

The notes are being issued by HSBC USA Inc. ("HSBC"). Investing in the notes involves a number of risks. There are important differences between the notes and a conventional debt security, including different investment risks. See "Risk Factors" on page TS-5 and "Additional Risk Factors" on page TS-6 of this term sheet and "Risk Factors" beginning on page S-9 of product supplement LIRN-2.

Neither the Securities and Exchange Commission ("SEC") nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this document, the accompanying product supplement, prospectus or prospectus supplement. Any representation to the contrary is a criminal offense.

	<u>Per Unit</u>	<u>Total</u>
Public offering price ⁽¹⁾⁽²⁾	\$10.00	\$
Underwriting discount ⁽¹⁾⁽²⁾	\$0.20	\$
Proceeds, before expenses, to HSBC	\$9.80	\$

(1) For any purchase of 500,000 units or more in a single transaction by an individual investor, the public offering price and the underwriting discount will be \$9.95 per unit and \$0.15 per unit, respectively.

(2) For any purchase by certain fee-based trusts and discretionary accounts managed by U.S. Trust operating through Bank of America, N.A., the public offering price and underwriting discount will be \$9.80 per unit and \$0.00 per unit, respectively. See as well "Supplement to the Plan of Distribution."

Capped Leveraged Index Return Notes®

Linked to the Industrial Select Sector Index due May , 2014

Enhanced Return

Summary

The Capped Leveraged Index Return Notes® Linked to the Industrial Select Sector Index due May , 2014 (the “notes”) are our senior unsecured debt securities and are not a direct or indirect obligation of any third party. The notes are not deposit liabilities or other obligations of a bank and are not guaranteed or insured by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction.

The notes will rank equally with all of our other senior unsecured debt. Any payments due on the notes, including any repayment of principal, depends on the credit risk of HSBC and its ability to satisfy its obligations as they come due. The notes provide you a leveraged return, subject to a cap, if the Ending Value (as determined below) of the Industrial Select Sector Index (the “Index”) is greater than the Starting Value. If the Ending Value is less than the Threshold Value, you will lose a portion, which could be significant, of the principal amount of your notes.

The terms and risks of the notes are contained in this term sheet and the documents listed below (together, the “Note Prospectus”). The documents have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated below or obtained from MLPF&S by calling 1-866-500-5408:

- Product supplement LIRN-2 dated March 27, 2012:
http://sec.gov/Archives/edgar/data/83246/000114420412017416/v307215_424b2.htm
- Prospectus supplement dated March 22, 2012:
<http://www.sec.gov/Archives/edgar/data/83246/000104746912003151/a2208335z424b2.htm>
- Prospectus dated March 22, 2012:
<http://www.sec.gov/Archives/edgar/data/83246/000104746912003148/a2208395z424b2.htm>

Our Central Index Key, or CIK, on the SEC Website is 83246.

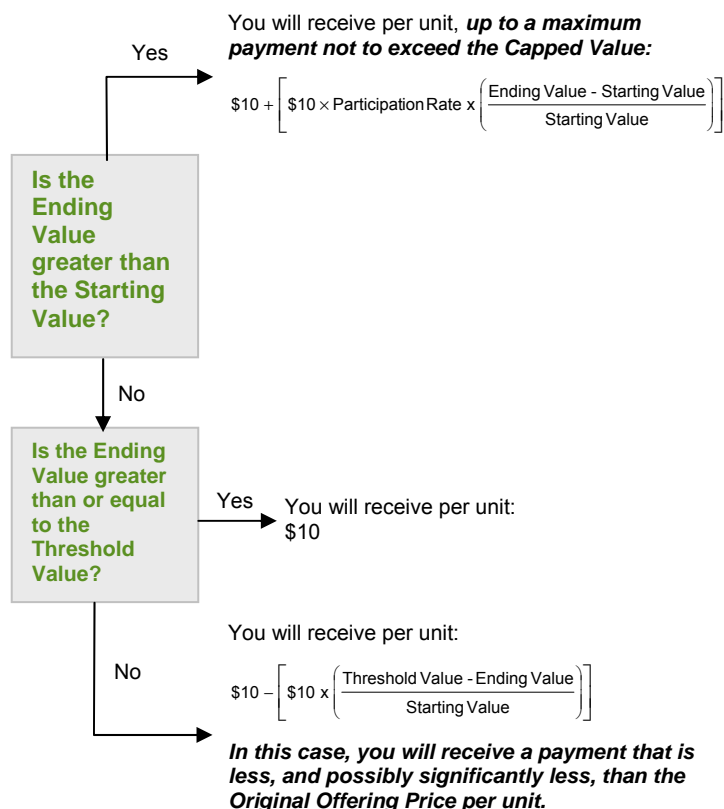

Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. You should carefully consider, among other things, the matters set forth under “Risk Factors” in the section indicated on the cover of this term sheet. The notes involve risks not associated with conventional debt securities. Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement LIRN-2. Unless otherwise indicated or unless the context requires otherwise, all references in this document to “we,” “us,” “our,” or similar references are to HSBC.

Terms of the Notes

Issuer:	HSBC USA Inc. (“HSBC”)
Original Offering Price:	\$10.00 per unit
Term:	Approximately two years
Market Measure:	The Industrial Select Sector Index (Bloomberg symbol: “IXI”), a price return index
Starting Value:	The closing level of the Market Measure on the pricing date
Ending Value:	The average of the closing levels of the Market Measure on each scheduled calculation day occurring during the Maturity Valuation Period. The calculation days are subject to postponement in the event of Market Disruption Events, as described on page S-20 of product supplement LIRN-2.
Threshold Value:	90% of the Starting Value, rounded to two decimal places.
Capped Value:	[\$12.00 to \$12.40] per unit of the notes, which represents a return of [20% to 24%] over the Original Offering Price. The actual Capped Value will be determined on the pricing date.
Maturity Valuation Period:	Five scheduled calculation days shortly before the maturity date
Participation Rate:	200%
Calculation Agent:	Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPF&S”) and HSBC, acting jointly
Fees Charged:	The public offering price of the notes includes the underwriting discount of \$0.20 per unit as listed on the cover page and an additional charge of \$0.075 per unit more fully described on page TS-11.

Redemption Amount Determination

On the maturity date, you will receive a cash payment per unit determined as follows:

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the level of the Index will increase moderately from the Starting Value to the Ending Value.
- You accept that your investment will result in a loss, which could be significant, if the level of the Index decreases from the Starting Value to an Ending Value that is below the Threshold Value.
- You accept that the return on the notes, if any, will be capped.
- You are willing to forgo the interest payments that are paid on traditional interest bearing debt securities.
- You are willing to forego dividends or other benefits of owning the stocks included in the Index.
- You are willing to accept that a secondary market is not expected to develop for the notes, and understand that the market prices for the notes, if any, may be less than the Original Offering Price and will be affected by various factors, including our actual and perceived creditworthiness, and the fees charged, as described on page TS-2.
- You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Redemption Amount.

The notes may not be an appropriate investment for you if:

- You believe that the Index level will decrease from the Starting Value or that it will not increase sufficiently over the term of the notes to provide you with your desired return.
- You seek 100% return of principal at maturity.
- You seek an uncapped return on your investment.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the stocks included in the Index.
- You seek an investment for which there will be a liquid secondary market.
- You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Hypothetical Payout Profile

The below graph is based on **hypothetical** numbers and values.

Capped Leveraged Index Return Notes®

This graph reflects the returns on the notes, based on the Participation Rate of 200%, a Threshold Value of 90% of the Starting Value and a Capped Value of \$12.20, the midpoint of the Capped Value range of [\$12.00 to \$12.40] per unit. The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the stocks included in the Index, excluding dividends.

This graph has been prepared for purposes of illustration only.

Hypothetical Payments at Maturity

The following table and examples are for purposes of illustration only. They are based on **hypothetical** values and show **hypothetical** returns on the notes. **The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Threshold Value, Ending Value, Capped Value, and the term of your investment.**

The following table is based on a Starting Value of 100, a Threshold Value of 90, the Participation Rate of 200% and a Capped Value of \$12.20 per unit. It illustrates the effect of a range of Ending Values on the Redemption Amount per unit of the notes and the total rate of return to holders of notes. The following examples do not take into account any tax consequences from investing in the notes.

Ending Value	Percentage Change from the Starting Value to the Ending Value	Redemption Amount per Unit	Total Rate of Return on the Notes
50.00	-50.00%	\$6.00	-40.00%
60.00	-40.00%	\$7.00	-30.00%
70.00	-30.00%	\$8.00	-20.00%
80.00	-20.00%	\$9.00	-10.00%
90.00 ⁽¹⁾	-10.00%	\$10.00	0.00%
95.00	-5.00%	\$10.00	0.00%
100.00 ⁽²⁾	0.00%	\$10.00	0.00%
105.00	5.00%	\$11.00	10.00%
108.00	8.00%	\$11.60	16.00%
110.00	10.00%	\$12.00	20.00%
120.00	20.00%	\$12.20 ⁽³⁾	22.00%
130.00	30.00%	\$12.20	22.00%
140.00	40.00%	\$12.20	22.00%
150.00	50.00%	\$12.20	22.00%

⁽¹⁾ This is the **hypothetical** Threshold Value.

⁽²⁾ The **hypothetical** Starting Value of 100 used in these examples has been chosen for illustrative purposes only, and does not represent a likely actual Starting Value for the Market Measure

⁽³⁾ The Redemption Amount per unit cannot exceed the **hypothetical** Capped Value.

For recent actual levels of the Market Measure, see "The Index" section below. The Index is a price return index and as such, the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Redemption Amount Calculation Examples

Example 1

The Ending Value is 80, or 80% of the Starting Value:

Starting Value: 100
Ending Value: 80
Threshold Value: 90

$$\$10 - \left[\$10 \times \left(\frac{90-80}{100} \right) \right] = \$9.00 \text{ Redemption Amount per unit}$$

Example 2

The Ending Value is 95, or 95% of the Starting Value:

Starting Value: 100
Ending Value: 95
Threshold Value: 90

Redemption Amount (per unit) = **\$10.00**, the Original Offering Price, since the Ending Value is less than the Starting Value but equal to or greater than the Threshold Value.

Example 3

The Ending Value is 105, or 105% of the Starting Value:

Starting Value: 100
Ending Value: 105

$$\$10 + \left[\$10 \times 200\% \times \left(\frac{105-100}{100} \right) \right] = \$11.00 \text{ Redemption Amount per unit}$$

Example 4

The Ending Value is 140, or 140% of the Starting Value:

Starting Value: 100
Ending Value: 140

$$\$10 + \left[\$10 \times 200\% \times \left(\frac{140-100}{100} \right) \right] = \$18.00, \text{ however, because the Redemption Amount for the notes cannot exceed the Capped Value, the Redemption Amount will be } \$12.20 \text{ per unit}$$

Risk Factors

We urge you to read the section “Risk Factors” in the product supplement and in the accompanying prospectus supplement. Investing in the notes is not equivalent to investing directly in the Index. You should understand the risks of investing in the notes and should reach an investment decision only after careful consideration, with your advisers, with respect to the notes in light of your particular financial and other circumstances and the information set forth in this free writing prospectus and the accompanying product supplement, prospectus supplement and prospectus.

In addition to the risks in the product supplement identified below, you should review “Risk Factors” in the accompanying prospectus supplement, including the explanation of risks relating to the notes described in the section “— Risks Relating to All Note Issuances.”

- Your investment may result in a loss; there is no guaranteed return of principal.
- Your yield may be less than the yield on a conventional debt security of comparable maturity.
- Payments on the notes are subject to our credit risk.
- Your return, if any, is limited to the return represented by the Capped Value.
- Your investment return may be less than a comparable investment directly in the Market Measure, or the components included in the Market Measure.
- You must rely on your own evaluation of the merits of an investment linked to the Market Measure.
- Commissions, fees and hedging costs as described on page TS-11 may affect the price at which you will be able to sell the notes in secondary market transactions.
- We cannot assure you that a trading market for your notes will ever develop or be maintained. MLPF&S is not obligated to make a market for, or to repurchase, the notes.
- The Redemption Amount will not reflect changes in the value of the Market Measure prior to the Maturity Valuation Period.
- The publisher of the Market Measure may adjust the Market Measure in a way that affects its value, and the Market Measure publisher has no obligation to consider your interests.
- If you attempt to sell the notes prior to maturity, their market value, if any, will be affected by various factors that interrelate in complex ways and their market value may be less than their Original Offering Price.
- Purchases and sales by us, MLPF&S and our respective affiliates of the securities represented by the Index may affect your return.
- Our trading and hedging activities, and those of MLPF&S, may create conflicts of interest with you.
- Our hedging activities, and those of MLPF&S, may affect your return on the notes and their market value.
- There may be potential conflicts of interest involving the calculation agent. We may appoint and remove the calculation agent.
- The notes are not insured by any governmental agency of the United States or any other jurisdiction.
- You will have no rights as a security holder, you will have no rights to receive any of the securities represented by the Market Measure and you will not be entitled to dividends or other distributions by the issuers of these securities.
- We and MLPF&S do not control any company included in the Market Measure and are not responsible for any disclosure made by any other company.
- Our business activities and those of MLPF&S relating to the companies represented by the Market Measure may create conflicts of interest with you.
- The U.S. federal income tax consequences of the notes are uncertain and may be adverse to a holder of the notes. See “Summary Tax Consequences” below and “U.S. Federal Income Tax Summary” beginning on page S-33 of product supplement LIRN-2.

Additional Risk Factors

MLPF&S, acting as the Index Compilation Agent, determines the composition of the Select Sector Indices (as described on page TS-7) based on the sector classification methodology of Standard & Poor's Financial Services LLC ("S&P").

The stocks included in each Select Sector Index, including the Index, are selected by MLPF&S (the "Index Compilation Agent"). The Index Compilation Agent assigns a company's stock to a particular Select Sector Index based on S&P's sector classification methodology as set forth in S&P's Global Industry Classification Standard. S&P has sole control over the removal of stocks from the S&P 500® Index and the selection of replacement stocks to be added to the S&P 500® Index. The Index Compilation Agent will compile the Select Sector Indices without regard to the notes. The Index Compilation Agent has no obligation to take the interests of the holders of the notes into consideration in compiling the Select Sector Indices, including when compiling the Index.

S&P may cause an adjustment to the S&P 500® Index in a way that affects its level, and has no obligation to consider your interests.

S&P is responsible for calculating and maintaining the S&P 500® Index, from which the stocks included in the Index are selected. S&P can add, delete, or substitute the stocks included in the S&P 500® Index or make other methodological changes that could change the level of the S&P 500® Index and therefore the composition and level of the Index. Changing the companies included in the Index may affect the level of the Index, as a newly added company may perform significantly better or worse than the company or companies it replaces. Additionally, S&P may alter, discontinue or suspend calculation or dissemination of the S&P 500® Index, any of which could adversely affect the value of the notes. S&P has no obligation to consider your interests in calculating or revising the S&P 500® Index.

The stocks included in the Index are concentrated in one sector.

All of the stocks included in the Index are issued by companies in the industrial sector. As a result, the stocks that will determine the performance of the notes are concentrated in one sector. Although an investment in the notes will not give holders any ownership or other direct interests in the stocks underlying the Index, the return on an investment in the notes will be subject to certain risks associated with a direct equity investment in companies in the industrial sector. Accordingly, by investing in the notes, you will not benefit from the diversification which could result from an investment linked to companies that operate in multiple sectors.

The Index

We have derived all information relating to the S&P 500® Index including, without limitation, its make-up, performance, method of calculation and changes in its components, from publicly available sources. That information reflects the policies of and is subject to change by, S&P and MLPF&S. S&P is under no obligation to continue to publish, and may discontinue or suspend the publication of the Index at any time.

The Index

The Index is a modified market capitalization-based index, intended to provide an indication of the pattern of common stock price movements of companies that are components of the S&P 500® Index and are involved in the development or production of industrial products and services. As of April 25, 2012, the Index included 62 component stocks.

The stocks included in the Index are selected by Index Compilation Agent in consultation with S&P from the universe of companies represented by the S&P 500® Index. The composition and weighting of the stocks included in the Index will likely differ from the composition and weighting of stocks included in any similar S&P 500® sector index that is published and disseminated by S&P. S&P acts as the "Index Calculation Agent" in connection with the calculation and dissemination of the Index.

Construction and Maintenance

Each of the component stocks in the Index (the "component stocks") is a constituent company of the S&P 500® Index.

Each stock in the S&P 500® Index is allocated to one and only one of the Select Sector Indices. The Index Compilation Agent assigns each constituent stock of the S&P 500® Index to a Select Sector Index. The Index Compilation Agent, after consultation with S&P, assigns an energy services company's stock to the Index on the basis of such company's sales and earnings composition and the sensitivity of the company's stock price and business results to the common factors that affect other companies in the Index. S&P has sole control over the removal of stocks from the S&P 500® Index and the selection of replacement stocks to be added to the S&P 500® Index. However, S&P plays only a consulting role in the Index assignment of the S&P 500® Index component stocks, that assignment being the sole responsibility of the Index Compilation Agent.

The Index is calculated by the Index Calculation Agent using a modified "market capitalization" methodology. This design ensures that each of the component stocks within the Index is represented in a proportion consistent with its percentage with respect to the total market capitalization of the Index. Under certain conditions, however, the number of shares of a component stock within the Index may be adjusted to conform to Internal Revenue Code requirements.

The Index is weighted based on the market capitalization of each of the component stocks, subject to the following asset diversification requirements: (i) the market capitalization-based weighted value of any single component stock measured on the last day of a calendar quarter may not exceed 24.99% of the total value of its Index; and (ii) with respect to 50% of the total value of the Index, the market capitalization-based weighted value of the component stocks must be diversified so that no single component stock measured on the last day of a calendar quarter represents more than 4.99% of the total value of its Index.

The Index does not reflect the payment of dividends on the stocks included in the Index and therefore the payment on the notes will not produce the same return you would receive if you were able to purchase such underlying stocks and hold them until the maturity date.

S&P 500®

With the exception of the weighting constraints described above, the Index is calculated using the same methodology utilized by S&P in calculating the S&P 500® Index. In particular: The S&P 500® Index is intended to provide an indication of the pattern of common stock price movement. The calculation of the level of the S&P 500® Index, discussed below in further detail, is based on the relative value of the aggregate Market Value (as defined below) of the common stocks of 500 companies as of a particular time compared to the aggregate average Market Value of the common stocks of 500 similar companies during the base period of the years 1941 through 1943. S&P chooses companies for inclusion in the S&P 500® Index with the aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the common stock population of the Standard & Poor's Stock Guide Database, which S&P uses as an assumed model for the composition of the total market. S&P may from time to time in its sole discretion, add companies to or delete companies from, the S&P 500® Index to achieve these objectives.

Prior to March 2005, the Market Value of a component stock was calculated as the product of the market price per share and the total number of outstanding shares of the component stock. In March 2004, S&P announced that it would transition the S&P 500® Index to float adjusted market capitalization weights. The transition began in March 2005 and was completed in September 2005. S&P's criteria for selecting stocks for the S&P 500® Index was not changed by the shift to float adjustment. However, the adjustment affects each company's weight in the S&P 500® Index (i.e., its Market Value). Currently, S&P calculates the S&P 500® Index based on the total float-adjusted market capitalization of each component stock, where each stock's weight in the S&P 500® Index is proportional to its float-adjusted Market Value.

Under float adjustment, the share counts used in calculating the S&P 500® Index reflect only those shares that are available to investors, not all of a company's outstanding shares. S&P defines three groups of shareholders whose holdings are subject to float adjustment:

- holdings by other publicly traded corporations, venture capital firms, private equity firms, strategic partners, or leveraged buyout groups;

Capped Leveraged Index Return Notes®

Linked to the Industrial Select Sector Index due May , 2014

Enhanced Return

- holdings by government entities, including all levels of government in the U.S. or foreign countries; and
- holdings by current or former officers and directors of the company, founders of the company, or family trusts of officers, directors, or founders, as well as holdings of trusts, foundations, pension funds, employee stock ownership plans or other investment vehicles associated with and controlled by the company.

However, treasury stock, stock options, restricted shares, equity participation units, warrants, preferred stock, convertible stock, and rights are not part of the float. In cases where holdings in a group exceed 10% of the outstanding shares of a company, the holdings of that group are excluded from the float adjusted count of shares to be used in the index calculation. Mutual funds, investment advisory firms, pension funds, or foundations not associated with the company and investment funds in insurance companies, shares of a U.S. company traded in Canada as “exchangeable shares,” shares that trust beneficiaries may buy or sell without difficulty or significant additional expense beyond typical brokerage fees, and, if a company has multiple classes of stock outstanding, shares in an unlisted or non-traded class if such shares are convertible by shareholders without undue delay and cost, are also part of the float.

For each stock, an investable weight factor (“IWF”) is calculated by dividing the available float shares, defined as the total shares outstanding, less shares held in one or more of the three groups listed above where the group holdings exceed 10% of the outstanding shares, by the total shares outstanding. The float-adjusted index is then calculated by dividing the sum of the IWF multiplied by both the price and the total shares outstanding for each stock by an Index divisor (the “Divisor”). For companies with multiple classes of stock, S&P calculates the weighted average IWF for each stock using the proportion of the total company market capitalization of each share class as weights.

As of the date of this term sheet, the S&P 500® Index is also calculated using a base-weighted aggregate methodology: the level of the S&P 500® Index reflects the total Market Value of all the component stocks relative to the S&P 500® Index base period of 1941-43. The daily calculation of the S&P 500® Index is computed by dividing the Market Value of the S&P 500® Index component stocks by a Divisor, which is adjusted from time to time as discussed below.

The simplest capitalization weighted S&P 500® Index can be thought of as a portfolio consisting of all available shares of the stocks in the S&P 500® Index. While this might track this portfolio’s value in dollar terms, it would probably yield an unwieldy number in the trillions. Therefore, the actual number used in the S&P 500® Index is scaled to a more easily handled number, currently in the thousands, by dividing the portfolio Market Value by the Divisor.

Ongoing maintenance of the S&P 500® Index includes monitoring and completing the adjustments for additions and deletions of the constituent companies, share changes, stock splits, stock dividends and stock price adjustments due to company restructurings or spin-offs. Continuity in the level of the S&P 500® Index is maintained by adjusting the Divisor for all changes in the S&P 500® Index constituents’ share capital after the base period of 1941-43 with the level of the S&P 500® Index as of the base period set at 10. Some corporate actions, such as stock splits and stock dividends do not require Divisor adjustments because following a stock split or stock dividend, both the stock price and number of shares outstanding are adjusted by S&P so that there is no change in the Market Value of the component stock. All stock split and dividend adjustments are made after the close of trading on the day before the ex-date.

To prevent the level of the S&P 500® Index from changing due to corporate actions, all corporate actions which affect the total Market Value of the S&P 500® Index also require a Divisor adjustment. By adjusting the Divisor for the change in total Market Value, the level of the S&P 500® Index remains constant. This helps maintain the level of the S&P 500® Index as an accurate barometer of stock market performance and ensures that the movement of the S&P 500® Index does not reflect the corporate actions of individual companies in the S&P 500® Index. All Divisor adjustments are made after the close of trading and after the calculation of the closing levels of the S&P 500® Index. As noted in the preceding paragraph, some corporate actions, such as stock splits and stock dividends, require simple changes in the common shares outstanding and the stock prices of the companies in the S&P 500® Index and do not require Divisor adjustments.

The table below summarizes the types of S&P 500® Index maintenance adjustments and indicates whether or not a Divisor adjustment is required.

Type of Corporate Action	Comments	Divisor Adjustment
Company added/deleted	Net change in market value determines Divisor adjustment.	Yes
Change in shares outstanding	Any combination of secondary issuance, share repurchase or buy back—share counts revised to reflect change.	Yes
Stock split	Share count revised to reflect new count. Divisor adjustment is not required since the share count and price changes are offsetting.	No
Spin-off	If spun-off company is not being added to the S&P 500® Index, the divisor adjustment reflects the decline in Index Market Value (i.e., the value of the	Yes

	spun-off unit).	
Spin-off	Spun-off company added to the S&P 500® Index , no company removed from the S&P 500® Index .	No
Spin-off	Spun-off company added to the S&P 500® Index , another company removed to keep number of names fixed. Divisor adjustment reflects deletion.	Yes
Change in IWF	Increasing (decreasing) the IWF increases (decreases) the total market value of the S&P 500® Index . The Divisor change reflects the change in market value caused by the change to an IWF.	Yes
Special dividend	When a company pays a special dividend the share price is assumed to drop by the amount of the dividend; the divisor adjustment reflects this drop in Index Market Value.	Yes
Rights offering	Each shareholder receives the right to buy a proportional number of additional shares at a set (often discounted) price. The calculation assumes that the offering is fully subscribed. Divisor adjustment reflects increase in market cap measured as the shares issued multiplied by the price paid.	Yes

Each of the corporate events exemplified in the table requiring an adjustment to the Divisor has the effect of altering the Market Value of the component stock and consequently of altering the aggregate Market Value of the Index component stocks (the "Post-Event Aggregate Market Value"). In order that the level of the S&P 500® Index (the "Pre-Event Index Value") not be affected by the altered Market Value (whether increase or decrease) of the affected component stock, a new Divisor ("New Divisor") is derived as follows:

$$\frac{\text{Post-Event Aggregate Market Value}}{\text{New Divisor}} = \text{Pre-Event Index Value}$$

$$\text{New Divisor} = \frac{\text{Post-Event Aggregate Market Value}}{\text{Pre-Event Index Value}}$$

Another large part of the S&P 500® Index maintenance process involves tracking the changes in the number of shares outstanding of each of the companies whose stocks are included in the S&P 500® Index. Four times a year, on a Friday close to the end of each calendar quarter, the share totals of companies in the S&P 500® Index are updated as required by any changes in the number of shares outstanding and then the Index Divisor is adjusted accordingly. In addition, changes in a company's shares outstanding of 5% or more due to mergers, acquisitions, public offerings, private placements, tender offers, Dutch auctions or exchange offers are made as soon as reasonably possible. Other changes of 5% or more (due to, for example, company stock repurchases, redemptions, exercise of options, warrants, conversion of preferred stock, notes, debt, equity participations or other recapitalizations) are made weekly, and are announced on Wednesdays for implementation after the close of trading on the following Wednesday. If a 5% or more change causes a company's IWF to change by 5 percentage points or more (for example from 0.80 to 0.85), the IWF will be updated at the same time as the share change, except IWF changes resulting from partial tender offers will be considered on a case-by-case basis. Changes to an IWF of less than 5 percentage points are implemented at the next IWF review, which occurs annually. In the case of certain rights issuances, in which the number of rights issued and/or terms of their exercise are deemed substantial, a price adjustment and share increase may be implemented immediately.

Capped Leveraged Index Return Notes®

Linked to the Industrial Select Sector Index due May 1, 2014

Enhanced Return

The following graph shows the monthly historical performance of the Index in the period from January 2007 through March 2012. We obtained this historical data from Bloomberg L.P. We have not independently verified the accuracy or completeness of the information obtained from Bloomberg L.P. On April 17, 2012, the closing level of the Index was 370.22.

Historical Performance of the Index

This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth above is not an indication that the level of the Index is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the levels of the Index.

License Agreement and Trademarks

The Index is determined, composed and calculated by MLPF&S without regard to us, the notes or the holders of the notes. MLPF&S has no obligation to take our needs or the needs of holders of the notes into consideration in determining, composing or calculating the Index.

MLPF&S DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE INDEX OR ANY DATA INCLUDED THEREIN AND MLPF&S SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, UNAVAILABILITY, OR INTERRUPTIONS THEREIN. MLPF&S MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE RESULTS TO BE OBTAINED BY US, HOLDERS OF THE NOTES, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF THE INDICES OR ANY DATA INCLUDED THEREIN. MLPF&S MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, WITH RESPECT TO THE INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL MLPF&S, IN ITS CAPACITY AS THE OWNER OF THE INDEX, HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, INCIDENTAL, CONSEQUENTIAL DAMAGES, OR LOST PROFITS, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

S&P makes no representation or warranty, express or implied, to the holders of the notes or any member of the public regarding the advisability of investing in securities generally or in the notes particularly or the ability of the S&P 500® Index to track general stock market performance. S&P's only relationship to MLPF&S and to us (other than transactions entered into in the ordinary course of business) is the use of certain trademarks and trade names of S&P and of the S&P 500® Index which is determined, composed, and calculated by S&P without regard to MLPF&S, us, or the notes. S&P has no obligation to take the needs of MLPF&S, our needs, or the needs of the holders of the notes into consideration in determining, composing, or calculating the S&P 500® Index. S&P is not responsible for and has not participated in the determination of the timing of the sale of the notes, prices at which the notes are to initially be sold, or quantities of the notes to be issued or in the determination or calculation of the equation by which the notes are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the notes.

S&P DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE S&P 500® INDEX OR ANY DATA INCLUDED IN THE S&P 500® INDEX. S&P SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS IN THE S&P 500® INDEX. S&P MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY MLPF&S, US, OWNERS OF THE NOTES, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE S&P 500® INDEX OR ANY DATA INCLUDED IN THE S&P 500® INDEX IN CONNECTION WITH THE NOTES OR ANY OTHER USE. S&P MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND HEREBY EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE S&P 500® INDEX OR ANY DATA INCLUDED IN THE S&P 500® INDEX. WITHOUT LIMITING ANY OF THE ABOVE INFORMATION, IN NO EVENT SHALL S&P HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, INCLUDING LOST PROFITS, EVEN IF NOTIFIED OF THE POSSIBILITY OF THESE DAMAGES.

Supplement to the Plan of Distribution

We may deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement of the notes occurs more than three business days from the pricing date, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units.

MLPF&S will not receive an underwriting discount for notes sold to certain fee-based trusts and fee-based discretionary accounts managed by U.S. Trust operating through Bank of America, N.A.

If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

MLPF&S may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices. MLPF&S may act as principal or agent in these market-making transactions; however it is not obligated to engage in any such transactions. The distribution of the Note Prospectus in connection with these offers or sales will be solely for the purpose of providing investors with the description of the terms of the notes that was made available to investors in connection with their initial offering. Secondary market investors should not, and will not be authorized to, rely on the Note Prospectus for information regarding HSBC or for any purpose other than that described in the immediately preceding sentence.

Role of MLPF&S

MLPF&S will participate as selling agent in the distribution of the notes. Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount. In connection with hedging our obligations under the notes, we will enter into a hedge transaction with an affiliate of MLPF&S, which will include a charge of up to \$0.075 per unit representing an estimated profit credited to MLPF&S through the hedge transaction. The public offering price you pay for the notes includes this charge and the underwriting discount. This charge and fee reduce the economic terms of the notes. In arranging the hedge transaction for the notes, MLPF&S seeks competitive terms from third parties, which could include one of our affiliates. Additional profits and losses may be realized by the hedge providers from these hedging transactions. For further information regarding how these fees and hedging costs may affect the price at which you will be able to sell the notes in secondary market transaction and conflicts of interest, see "Risk Factors—General Risks Relating to LIRNs" beginning on page S-9 and "Use of Proceeds" on page S-18 of product supplement LIRN-2.

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- There is no statutory, judicial, or administrative authority directly addressing the characterization of the notes.
- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as pre-paid forward contracts or executory contracts with respect to the Index.
- Under this characterization and tax treatment of the notes, a U.S. Holder (as defined in product supplement LIRN-2) generally will recognize capital gain or loss upon maturity or upon a sale or exchange of the notes prior to maturity. This capital gain or loss generally will be long-term capital gain or loss if you held the notes for more than one year.
- No assurance can be given that the IRS or any court will agree with this characterization and tax treatment.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. You should review carefully the discussion under the section entitled “U.S. Federal Income Tax Summary” beginning on page S-33 of product supplement LIRN-2.

Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you these documents if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Market-Linked Investments Classification

Enhanced Return

MLPF&S classifies certain market-linked investments (the “Market-Linked Investments”) into categories, each with different investment characteristics. The following description is meant solely for informational purposes and is not intended to represent any particular Enhanced Return Market-Linked Investment or guarantee any performance.

Enhanced Return Market-Linked Investments are short- to medium-term investments that offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.

“Leveraged Index Return Notes®” and “LIRNs®” are registered service marks of Bank of America Corporation, the parent corporation of MLPF&S.
