\$10 principal amount per unit
CUSIP No.

Pricing Date* July , 2013
Settlement Date* July , 2013
Maturity Date* August , 2014

*Subject to change based on the actual date the notes are priced for initial sale to the public (the "pricing date")

Strategic Accelerated Redemption Securities[®] Linked to the S&P 500[®] Index

- Automatically callable if the level of the Index on any Observation Date, occurring approximately six, nine, and twelve months after the pricing date, is at or above the Starting Value
- In the event of an automatic call, the amount payable per unit will be:
 - [\$10.20 to \$10.40] if called on the first Observation Date
 - [\$10.30 to \$10.60] if called on the second Observation Date
 - [\$10.40 to \$10.80] if called on the final Observation Date
- If not called on the first or second observation dates, a maturity of approximately one year
- If not called, 1-to-1 downside exposure to decreases in the Index beyond a 5% decline, with up to 95% of the Original Offering Price at risk
- All payments are subject to the credit risk of HSBC USA Inc.
- No interest payments
- No listing on any securities exchange

Enhanced Return

The notes are being issued by HSBC USA Inc. ("HSBC"). Investing in the notes involves a number of risks. There are important differences between the notes and a conventional debt security, including different investment risks and costs. See "Risk Factors" on page TS-6 of this term sheet and beginning on page S-9 of product supplement STR-2.

The estimated initial value of the notes on the pricing date is expected to be between \$9.700 and \$9.875 per unit, which will be less than the public offering price listed below. The market value of the notes at any time will reflect many factors and cannot be predicted with accuracy. See "Summary" on page TS-2 and "Risk Factors" beginning on page TS-6 of this term sheet for additional information.

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or adequacy of this document, the accompanying product supplement, prospectus or prospectus supplement. Any representation to the contrary is a criminal offense.

	<u>Per Unit</u>	<u>Total</u>
Public offering price ⁽¹⁾⁽²⁾	\$ 10.000	\$
Underwriting discount ⁽¹⁾⁽²⁾	\$ 0.125	\$
Proceeds, before expenses, to HSBC.....	\$ 9.875	\$

- (1) For any purchase of 500,000 units or more in a single transaction by an individual investor, the public offering price and the underwriting discount will be \$9.975 per unit and \$0.10 per unit, respectively.
- (2) For any purchase by certain fee-based trusts and discretionary accounts managed by U.S. Trust operating through Bank of America, N.A., the public offering price and underwriting discount will be \$9.875 per unit and \$0.00 per unit, respectively. See as well "Supplement to the Plan of Distribution."

Merrill Lynch & Co.

July , 2013

Summary

The Strategic Accelerated Redemption Securities® Linked to the S&P 500® Index, due August , 2014 (the “notes”) are our senior unsecured debt securities and are not a direct or indirect obligation of any third party. The notes are not deposit liabilities or other obligations of a bank and are not guaranteed or insured by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction. **The notes will rank equally with all of our other senior unsecured debt. Any payments due on the notes, including any repayment of principal, depends on the credit risk of HSBC and its ability to satisfy its obligations as they come due.** The notes will be automatically called at the applicable Call Amount if the closing level of the S&P 500® Index (the “Index”) on any Observation Date is equal to or greater than the Starting Value. If your notes are not called, you may lose a portion, which could be significant, of the principal amount of your notes. Payments on the notes, including the amount you receive at maturity or upon an automatic call, will be calculated based on the \$10 Original Offering Price per unit and will depend on our credit risk and the performance of the Index. See “Terms of the Notes” below.

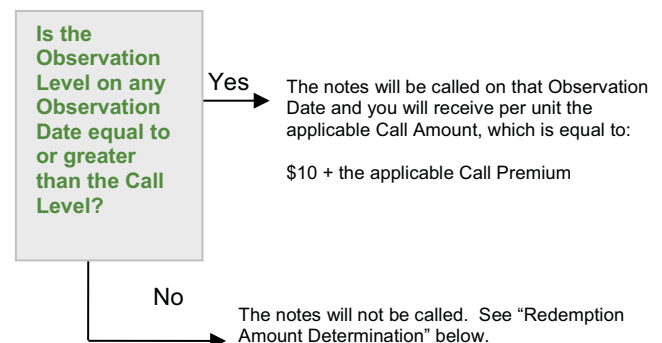

The estimated initial value of the notes will be less than the price you pay to purchase the notes. The estimated initial value is determined by reference to our or our affiliates’ internal pricing models and reflects the implied borrowing rate we pay to issue market-linked notes, which is typically lower than the rate we would use when we issue conventional fixed or floating rate debt securities, and the market prices for hedging arrangements related to the notes (which may include call options, put options or other derivatives). The difference in the borrowing rate, as well as the underwriting discount and the costs associated with hedging the notes, including the hedging related charge described below, will reduce the economic terms of the notes (including the Call Amounts and Call Premiums). The notes are subject to an automatic call, and the initial estimated value is based on an assumed tenor of the notes. The estimated initial value will be calculated on the pricing date and will be set forth in the pricing supplement to which this term sheet relates.

Terms of the Notes

Issuer:	HSBC USA Inc. (“HSBC”)
Original Offering Price:	\$10.00 per unit
Term:	Approximately one year
Market Measure:	The S&P 500® Index (Bloomberg symbol: “SPX”), a price return index.
Starting Value:	The closing level of the Index on the pricing date
Ending Value:	The closing level of the Index on the final Observation Date.
Observation Level:	The closing level of the Index on any Observation Date.
Observation Dates:	January , 2014, April , 2014, and July , 2014 (the final Observation Date), approximately six, nine, and twelve months after the pricing date. The Observation Dates are subject to postponement in the event of Market Disruption Events, as described on page S-20 of product supplement STR-2.
Call Level:	100% of the Starting Value
Call Amounts (per Unit) and Call Premiums:	[\$10.20 to \$10.40], representing a Call Premium of [2.0% to 4.0%] of the Original Offering Price, if called on the first Observation Date; [\$10.30 to \$10.60], representing a Call Premium of [3.0% to 6.0%] of the Original Offering Price, if called on the second Observation Date; and [\$10.40 to \$10.80], representing a Call Premium of [4.0% to 8.0%] of the Original Offering Price, if called on the final Observation Date. The actual Call Amounts and Call Premiums will be determined on the pricing date.
Call Settlement Dates:	The fifth business day following the applicable Observation Date, subject to postponement as described on page S-20 of product supplement STR-2; provided however, that the Call Settlement Date related to the final Observation Date will be the maturity date.
Threshold Value:	95% of the Starting Value, rounded to two decimal places.
Calculation Agent:	Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPF&S”) and HSBC, acting jointly.
Fees Charged:	The public offering price of the notes includes the underwriting discount of \$0.125 per unit as listed on the cover page and an additional charge of \$0.05 per unit more fully described on page TS-13.

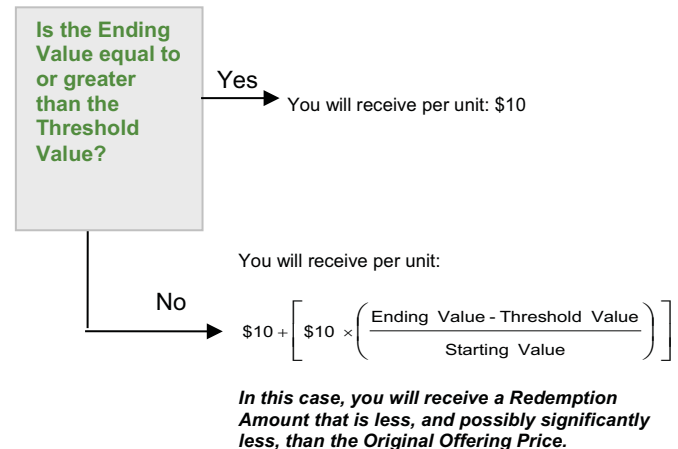

Payments Determination

Automatic Call Provision:

Redemption Amount Determination:

If the notes are not called, you will receive the Redemption Amount per unit on the maturity date, determined as follows:

The terms and risks of the notes are contained in this term sheet and the documents listed below (together, the "Note Prospectus"). The documents have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated below or obtained from MLPF&S by calling 1-866-500-5408:

- Product supplement STR-2 dated March 27, 2012:
http://www.sec.gov/Archives/edgar/data/83246/000114420412017417/v307216_424b2.htm
- Prospectus supplement dated March 22, 2012:
<http://www.sec.gov/Archives/edgar/data/83246/000104746912003151/a2208335z424b2.htm>
- Prospectus dated March 22, 2012:
<http://www.sec.gov/Archives/edgar/data/83246/000104746912003148/a2208395z424b2.htm>

Our Central Index Key, or CIK, on the SEC Website is 83246. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. You should carefully consider, among other things, the matters set forth under "Risk Factors" in the sections indicated on the cover of this term sheet. The notes involve risks not associated with conventional debt securities. Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement STR-2. Unless otherwise indicated or unless the context requires otherwise, all references in this document to "we," "us," "our," or similar references are to HSBC.

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the closing level of the Index on any of the Observation Dates will be equal to or greater than the Starting Value, and, in that case, you accept an early exit from your investment.
- You accept that the return on the notes, if any, will be limited to the return represented by the applicable Call Premium even if the percentage change in the level of the Index is significantly greater than the applicable Call Premium.
- If the notes are not called, you accept that your investment may result in a loss, which could be significant, if the Ending Value is below the Threshold Value.
- You are willing to forgo the interest payments that are paid on traditional interest bearing debt securities.
- You are willing to forgo dividends or other benefits of owning the stocks included in the Index.
- You are willing to accept that a secondary market is not expected to develop for the notes, and understand that the market prices for the notes, if any, may be less than the Original Offering Price and will be affected by various factors, including our actual and perceived creditworthiness, the implied borrowing rate and the fees charged, as described on page TS-2.
- You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Call Amounts and the Redemption Amount.

The notes may not be an appropriate investment for you if:

- You wish to make an investment that cannot be automatically called prior to maturity.
- You believe that the Index will decrease from the Starting Value to the Ending Value.
- You anticipate that the Observation Level will be less than the Call Level on each Observation Date.
- You seek an uncapped return on your investment.
- You seek 100% return of principal at maturity.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the stocks included in the Index.
- You seek an investment for which there will be a liquid secondary market.
- You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Examples of Hypothetical Payments

The following examples are for purposes of illustration only. They are based on **hypothetical** values and show **hypothetical** returns on the notes. **The actual amount you receive and the resulting return will depend on the actual Starting Value, Threshold Value, Call Level, Observation Levels, Call Premiums, and the term of your investment.** The following examples do not take into account any tax consequences from investing in the notes. These examples are based on:

- 1) a Starting Value of 100.00;
- 2) a Threshold Value of 95.00;
- 3) a Call Level of 100.00;
- 4) an expected term of the notes of approximately one year if the notes are not called;
- 5) a Call Premium of 3.00% of the Original Offering Price if the notes are called on the first Observation Date, 4.50% if called on the second Observation Date, and 6.00% if called on the final Observation Date (the midpoint of the applicable Call Premium ranges); and
- 6) Observation Dates occurring approximately six, nine, and twelve months after the pricing date.

The **hypothetical** Starting Value of 100.00 used in these examples has been chosen for illustrative purposes only, and does not represent a likely actual Starting Value for the Index. For recent actual levels of the Index, see "The Index" section below. The Index is a price return index and as such the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Notes Are Called on an Observation Date

The notes will be called at \$10.00 plus the applicable Call Premium on one of the Observation Dates if the Observation Level is equal to or greater than the Call Level.

Example 1 – The Observation Level on the first Observation Date is 110.00. Therefore, the notes will be called at \$10.00 plus the Call Premium of \$0.30 = \$10.30 per unit. After the notes are called, they will no longer remain outstanding and there will not be any further payments on the notes.

Example 2 – The Observation Level on the first Observation Date is below the Call Level, but the Observation Level on the second Observation Date is 105.00. Therefore, the notes will be called at \$10.00 plus the Call Premium of \$0.45 = \$10.45 per unit. After the notes are called, they will no longer remain outstanding and there will not be any further payments on the notes.

Example 3 – The Observation Levels on the first and second Observation Dates are below the Call Level, but the Observation Level on the third and final Observation Date is 105.00. Therefore, the notes will be called at \$10.00 plus the Call Premium of \$0.60 = \$10.60 per unit.

Notes Are Not Called on Any Observation Date

Example 4 – The notes are not called on any Observation Date and the Ending Value is 97.00, which is greater than the Threshold Value. Therefore, the Redemption Amount per unit will be \$10.00.

Example 5 – The notes are not called on any Observation Date and the Ending Value is less than the Threshold Value. The Redemption Amount will be less, and possibly significantly less, than the Original Offering Price. For example, if the Ending Value is 85.00, the Redemption Amount per unit will be:

$$\$10 + \left[\$10 \times \left(\frac{85.00 - 95.00}{100.00} \right) \right] = \$9.00$$

Summary of the Hypothetical Examples

	Notes Are Called on an Observation Date			Notes Are Not Called on Any Observation Date	
	Example 1	Example 2	Example 3	Example 4	Example 5
Starting Value	100.00	100.00	100.00	100.00	100.00
Call Level	100.00	100.00	100.00	100.00	100.00
Threshold Value	95.00	95.00	95.00	95.00	95.00
Observation Level on the First Observation Date	110.00	90.00	90.00	93.00	88.00
Observation Level on the Second Observation Date	N/A	105.00	83.00	85.00	78.00
Observation Level on the Final Observation Date	N/A	N/A	105.00	97.00	85.00
Return of the Index	10.00%	5.00%	5.00%	-3.00%	-15.00%
Return of the Notes	3.00%	4.50%	6.00%	0.00%	-10.00%
Call Amount / Redemption Amount per Unit	\$10.30	\$10.45	\$10.60	\$10.00	\$9.00

Risk Factors

We urge you to read the section “Risk Factors” in the product supplement and in the accompanying prospectus supplement. Investing in the notes is not equivalent to investing directly in the Index. You should understand the risks of investing in the notes and should reach an investment decision only after careful consideration, with your advisers, with respect to the notes in light of your particular financial and other circumstances and the information set forth in this term sheet and the accompanying product supplement, prospectus supplement and prospectus.

In addition to the risks in the product supplement identified below, you should review “Risk Factors” in the accompanying prospectus supplement, including the explanation of risks relating to the notes described in the section “— Risks Relating to All Note Issuances.”

- If the notes are not called, your investment may result in a loss; you may not receive a return of some or substantially all of your principal.
- Your return, if any, is limited to the return represented by the applicable Call Premium.
- Your return on the notes may be less than the yield on a conventional fixed or floating rate debt security of comparable maturity.
- Payments on the notes are subject to our credit risk.
- Your investment return may be less than a comparable investment directly in the Index, or the components included in the Index.
- You must rely on your own evaluation of the merits of an investment linked to the Index.
- We cannot assure you that a trading market for your notes will ever develop or be maintained. MLPF&S is not obligated to make a market for, or to repurchase, the notes. There is no assurance that any party will be willing to purchase your notes at any price in any secondary market.
- The amount that you receive at maturity or upon a call will not reflect changes in the level of the Index other than on the Observation Dates.
- The Index sponsor may adjust the Index in a way that affects its level, and the Index sponsor has no obligation to consider your interests.
- The estimated initial value of the notes will be less than the public offering price and may differ from the market value of the notes in the secondary market, if any. We will determine the estimated initial value by reference to our or our affiliates' internal pricing models. These pricing models consider certain assumptions and variables, which can include volatility and interest rates. These pricing models rely in part on certain forecasts about future events, which may prove to be incorrect. Different pricing models and assumptions could provide valuations for the notes that are different from our estimated initial value. The estimated initial value will reflect the implied borrowing rate we use to issue market-linked notes, as well as the mid-market value of the hedging arrangements related to the notes (which may include call options, put options or other derivatives).
- Our implied borrowing rate for the issuance of these notes is lower than the rate we would use when we issue conventional fixed or floating rate debt securities. This is one of the factors that may result in the market value of the notes being less than their estimated initial value. As a result of the difference between our implied borrowing rate and the rate we would use when we issue conventional fixed or floating rate debt securities, the estimated initial value of the notes may be lower if it were based on the levels at which our fixed or floating rate debt securities trade in the secondary market. In addition, if we were to use the rate we use for our conventional fixed or floating rate debt issuances, we would expect the economic terms of the notes to be more favorable to you.
- The price of your notes in the secondary market, if any, immediately after the pricing date will be less than the public offering price. The public offering price takes into account certain costs, principally the underwriting discount, the hedging costs described on TS-13 and the costs associated with issuing the notes. The costs associated with issuing the notes will be used or retained by us or one of our affiliates. If you were to sell your notes in the secondary market, if any, the price you would receive for your notes may be less than the price you paid for them.
- The estimated initial value does not represent a minimum price at which we, MLPF&S or any of our respective affiliates would be willing to purchase your notes in the secondary market (if any exists) at any time. The price of your notes in the secondary market, if any, at any time after issuance will vary based on many factors, including the value of the Market Measure and changes in market conditions, and cannot be predicted with accuracy. The notes are not designed to be short-term trading instruments, and you should, therefore, be able and willing to hold the notes to maturity. Any sale of the notes prior to maturity could result in a loss to you.
- Purchases and sales by us, MLPF&S and our respective affiliates of the stocks represented by the Index may affect your return.
- Our trading and hedging activities, and those of MLPF&S, may create conflicts of interest with you.
- Our hedging activities, and those of MLPF&S, may affect your return on the notes and their market value.

Strategic Accelerated Redemption Securities®

Linked to the S&P 500® Index, due August , 2014

- There may be potential conflicts of interest involving the calculation agent. We may appoint and remove the calculation agent.
- The notes are not insured by any governmental agency of the United States or any other jurisdiction.
- You will have no rights as a securityholder, you will have no rights to receive any of the securities represented by the Index and you will not be entitled to receive dividends or other distributions by the issuers of these securities.
- Except to the extent that the common stock of Bank of America Corporation (the parent company of MLPF&S) is included in the Index, we and MLPF&S do not control any company included in the Index and are not responsible for any disclosure made by any other company.
- Our business activities and those of MLPF&S relating to the companies represented by the Index may create conflicts of interest with you.
- The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See "Summary Tax Consequences" below and "U.S. Federal Income Tax Summary" beginning on page S-34 of product supplement STR-2.

The Index

We have derived all information relating to the Index including, without limitation, its make-up, performance, method of calculation and changes in its components, from publicly available sources. That information reflects the policies of and is subject to change by S&P Dow Jones Indices LLP (the "Index sponsor"). The Index sponsor is under no obligation to continue to publish, and may discontinue or suspend the publication of the Index at any time.

The Index Sponsor Publishes the Index

The Index is intended to provide an indication of the pattern of common stock price movement. The calculation of the level of the Index, discussed below in further detail, is based on the relative value of the aggregate Market Value (as defined below) of the common stocks of 500 companies as of a particular time compared to the aggregate average Market Value of the common stocks of 500 similar companies during the base period of the years 1941 through 1943. The Index sponsor chooses companies for inclusion in the Index with the aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the common stock population of the Standard & Poor's Stock Guide Database, which the Index sponsor uses as an assumed model for the composition of the total market. The Index sponsor may from time to time in its sole discretion, add companies to or delete companies from, the Index to achieve these objectives.

Relevant criteria employed by the Index sponsor include the viability of the particular company, the extent to which that company represents the industry group to which it is assigned, the extent to which the market price of that company's common stock is generally responsive to changes in the affairs of the respective industry and the market value and trading activity of the common stock of that company. Ten main industry groups comprise the Index: Information Technology, Financials, Consumer Staples, Health Care, Energy, Industrials, Consumer Discretionary, Utilities, Materials and Telecommunication Services. Changes in the Index are reported daily in the financial pages of many major newspapers, on Bloomberg Professional® service under the symbol "SPX" and on the Index sponsor's website. Information contained in the Index sponsor's website is not incorporated by reference in, and should not be considered a part of, this document.

The Index does not reflect the payment of dividends on the stocks included in the Index and therefore the payment on the notes will not produce the same return you would receive if you were able to purchase such underlying stocks and hold them until the maturity date or earlier call.

Computation of the Index

Prior to March 2005, the Market Value of a component stock was calculated as the product of the market price per share and the total number of outstanding shares of the component stock. In March 2004, the Index sponsor announced that it would transition the Index to float adjusted market capitalization weights. The transition began in March 2005 and was completed in September 2005. The Index sponsor's criteria for selecting stocks for the Index was not changed by the shift to float adjustment. However, the adjustment affects each company's weight in the Index (i.e., its Market Value). Currently, the Index sponsor calculates the Index based on the total float-adjusted market capitalization of each component stock, where each stock's weight in the Index is proportional to its float-adjusted Market Value.

Under float adjustment, the share counts used in calculating the Index reflect only those shares that are available to investors, not all of a company's outstanding shares. Float adjustment excludes shares that are closely held by control groups, other publicly traded companies or government agencies.

In September 2012, all shareholdings representing more than 5% of a stock's outstanding shares, other than holdings by "block owners," were removed from the float for purposes of calculating the Index. Generally, these "control holders" will include officers and directors, private equity, venture capital and special equity firms, other publicly traded companies that hold shares for control, strategic partners, holders of restricted shares, ESOPs, employee and family trusts, foundations associated with the company, holders of unlisted share classes of stock, government entities at all levels (other than government retirement/pension funds) and any individual person who controls a 5% or greater stake in a company as reported in regulatory filings. However, holdings by block owners, such as depository banks, pension funds, mutual funds and ETF providers, 401(k) plans of the company, government retirement/pension funds, investment funds of insurance companies, asset managers and investment funds, independent foundations and savings and investment plans, will ordinarily be considered part of the float.

Treasury stock, stock options, restricted shares, equity participation units, warrants, preferred stock, convertible stock, and rights are not part of the float. Shares of a U.S. company traded in Canada as "exchangeable shares," are normally part of the float unless those shares form a control block. If a company has multiple classes of stock outstanding, shares in an unlisted or non-traded class are treated as a control block.

For each stock, an investable weight factor ("IWF") is calculated by dividing the available float shares by the total shares outstanding. As of September 21, 2012, available float shares are defined as the total shares outstanding less shares held by control holders. This calculation is subject to a 5% minimum threshold for control blocks. For example, if a company's officers and directors hold 3% of the company's shares, and no other control group holds 5% of the company's shares, the Index sponsor would assign that company an IWF of 1.00, as no control group meets the 5% threshold. However, if a company's officers and directors hold 3% of the company's shares and another control group holds 20% of the company's shares, the Index sponsor would assign an IWF of 0.77, reflecting the fact that 23% of the company's outstanding shares are considered to be held for control. For companies with multiple classes of stock,

the Index sponsor calculates the weighted average IWF for each stock using the proportion of the total company market capitalization of each share class as weights.

As of the date of this term sheet, the Index is also calculated using a base-weighted aggregate methodology: the level of the Index reflects the total Market Value of all the component stocks relative to the Index base period of 1941-43. The daily calculation of the Index is computed by dividing the Market Value of the Index component stocks by a Divisor, which is adjusted from time to time as discussed below.

The simplest capitalization weighted index can be thought of as a portfolio consisting of all available shares of the stocks in the index. While this might track this portfolio's value in dollar terms, it would probably yield an unwieldy number in the trillions. Therefore, the actual number used in the Index is scaled to a more easily handled number, currently in the thousands, by dividing the portfolio Market Value by the Divisor.

Ongoing maintenance of the Index includes monitoring and completing the adjustments for additions and deletions of the constituent companies, share changes, stock splits, stock dividends and stock price adjustments due to company restructurings or spin-offs. Continuity in the level of the Index is maintained by adjusting the Divisor for all changes in the Index constituents' share capital after the base period of 1941-43 with the level of the Index as of the base period set at 10. Some corporate actions, such as stock splits and stock dividends do not require Divisor adjustments because following a stock split or stock dividend, both the stock price and number of shares outstanding are adjusted by the Index sponsor so that there is no change in the Market Value of the component stock. All stock split and dividend adjustments are made after the close of trading on the day before the ex-date.

To prevent the level of the Index from changing due to corporate actions, all corporate actions which affect the total Market Value of the Index also require a Divisor adjustment. By adjusting the Divisor for the change in total Market Value, the level of the Index remains constant. This helps maintain the level of the Index as an accurate barometer of stock market performance and ensures that the movement of the Index does not reflect the corporate actions of individual companies in the Index. All Divisor adjustments are made after the close of trading and after the calculation of the closing levels of the Index. As noted in the preceding paragraph, some corporate actions, such as stock splits and stock dividends, require simple changes in the common shares outstanding and the stock prices of the companies in the Index and do not require Divisor adjustments. The table below summarizes the types of Index maintenance adjustments and indicates whether or not a Divisor adjustment is required.

Type of Corporate Action	Comments	Divisor Adjustment
Company added/deleted	Net change in market value determines Divisor adjustment.	Yes
Change in shares outstanding	Any combination of secondary issuance, share repurchase or buy back—share counts revised to reflect change.	Yes
Stock split	Share count revised to reflect new count. Divisor adjustment is not required since the share count and price changes are offsetting.	No
Spin-off	If spun-off company is not being added to the index, the divisor adjustment reflects the decline in Index Market Value (i.e., the value of the spun-off unit).	Yes
Spin-off	Spun-off company added to the Index, no company removed from the Index.	No
Spin-off	Spun-off company added to the Index, another company removed to keep number of names fixed. Divisor adjustment reflects deletion.	Yes
Change in IWF	Increasing (decreasing) the IWF increases	Yes

(decreases) the total market value of the index. The Divisor change reflects the change in market value caused by the change to an IWF.

Special dividend	When a company pays a special dividend the share price is assumed to drop by the amount of the dividend; the divisor adjustment reflects this drop in Index Market Value.	Yes
Rights offering	Each shareholder receives the right to buy a proportional number of additional shares at a set (often discounted) price. The calculation assumes that the offering is fully subscribed. Divisor adjustment reflects increase in market cap measured as the shares issued multiplied by the price paid.	Yes

Each of the corporate events exemplified in the table requiring an adjustment to the Divisor has the effect of altering the Market Value of the component stock and consequently of altering the aggregate Market Value of the Index component stocks (the "Post-Event Aggregate Market Value"). In order that the level of the Index (the "Pre-Event Index Value") not be affected by the altered Market Value (whether increase or decrease) of the affected component stock, a new Divisor ("New Divisor") is derived as follows:

$$\frac{\text{Post-Event Aggregate Market Value}}{\text{New Divisor}} = \text{Pre-Event Index Value}$$

$$\text{New Divisor} = \frac{\text{Post-Event Aggregate Market Value}}{\text{Pre-Event Index Value}}$$

Another large part of the Index maintenance process involves tracking the changes in the number of shares outstanding of each of the companies whose stocks are included in the Index. Four times a year, on a Friday close to the end of each calendar quarter, the share totals of companies in the Index are updated as required by any changes in the number of shares outstanding and then the Index Divisor is adjusted accordingly. In addition, changes in a company's shares outstanding of 5% or more due to mergers, acquisitions, public offerings, private placements, tender offers, Dutch auctions or exchange offers are made as soon as reasonably possible. Other changes of 5% or more (due to, for example, company stock repurchases, redemptions, exercise of options, warrants, conversion of preferred stock, notes, debt, equity participations or other recapitalizations) are made weekly, and are announced on Wednesdays for implementation after the close of trading on the following Wednesday. If a 5% or more change causes a company's IWF to change by 5 percentage points or more (for example from 0.80 to 0.85), the IWF will be updated at the same time as the share change, except IWF changes resulting from partial tender offers will be considered on a case-by-case basis. Changes to an IWF of less than 5 percentage points are implemented at the next IWF review, which occurs annually. In the case of certain rights issuances, in which the number of rights issued and/or terms of their exercise are deemed substantial, a price adjustment and share increase may be implemented immediately.

The following graph shows the monthly historical performance of the Index in the period from January 2008 through June 2013. We obtained this historical data from Bloomberg L.P. We have not independently verified the accuracy or completeness of the information obtained from Bloomberg L.P. On July 8, 2013, the closing level of the Index was 1,640.46.

Historical Performance of the Index

This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth above is not an indication that the level of the Index is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the levels of the Index.

These trademarks have been licensed for use by S&P Dow Jones Indices LLC. "Standard & Poor's®", "S&P 500®" and "S&P®" are trademarks of S&P. These trademarks have been sublicensed for certain purposes by us. The Index is a product of S&P Dow Jones Indices LLC and/or its affiliates and has been licensed for use by us.

The notes are not sponsored, endorsed, sold or promoted by S&P Dow Jones Indices LLC, Dow Jones, S&P or any of their respective affiliates (collectively, "S&P Dow Jones Indices"). S&P Dow Jones Indices make no representation or warranty, express or implied, to the holders of the notes or any member of the public regarding the advisability of investing in securities generally or in the notes particularly or the ability of the Index to track general market performance. S&P Dow Jones Indices' only relationship to us with respect to the Index is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices and/or its third party licensors. The Index is determined, composed and calculated by S&P Dow Jones Indices without regard to us or the notes. S&P Dow Jones Indices have no obligation to take our needs or the needs of holders of the notes into consideration in determining, composing or calculating the Index. S&P Dow Jones Indices are not responsible for and have not participated in the determination of the prices, and amount of the notes or the timing of the issuance or sale of the notes or in the determination or calculation of the equation by which the notes are to be converted into cash. S&P Dow Jones Indices have no obligation or liability in connection with the administration, marketing or trading of the notes. There is no assurance that investment products based on the Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC and its subsidiaries are not investment advisors. Inclusion of a security or futures contract within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security or futures contract, nor is it considered to be investment advice. Notwithstanding the foregoing, CME Group Inc. and its affiliates may independently issue and/or sponsor financial products unrelated to the notes currently being issued by us, but which may be similar to and competitive with the notes. In addition, CME Group Inc. and its affiliates may trade financial products which are linked to the performance of the Index. It is possible that this trading activity will affect the value of the notes.

S&P DOW JONES INDICES DO NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF THE INDEX OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND US, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

Supplement to the Plan of Distribution

We may deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement of the notes occurs more than three business days from the pricing date, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units. If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

MLPF&S will not receive an underwriting discount for notes sold to certain fee-based trusts and fee-based discretionary accounts managed by U.S. Trust operating through Bank of America, N.A.

MLPF&S may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices, and these will include MLPF&S's trading commissions and mark-ups. MLPF&S may act as principal or agent in these market-making transactions; however it is not obligated to engage in any such transactions. At MLPF&S's discretion, for a short, undetermined initial period after the issuance of the notes, any purchase price paid by MLPF&S in the secondary market may be, in certain circumstances, closer to the amount that you paid for the notes than to the estimated initial value. However, neither we nor any of our affiliates is obligated to purchase your notes at any price, or at a price that exceeds the estimated initial value.

The value of the notes shown on your account statement provided by MLPF&S will be based on their estimate of the value of the notes if MLPF&S or one of its affiliates were to make a market in the notes, which it is not obligated to do. This estimate will be based upon the price that MLPF&S may pay for the notes in light of then-prevailing market conditions, the issuer's creditworthiness and transaction costs. At certain times, this price may be higher than or lower than the estimated initial value of the notes.

The distribution of the Note Prospectus in connection with these offers or sales will be solely for the purpose of providing investors with the description of the terms of the notes that was made available to investors in connection with their initial offering. Secondary market investors should not, and will not be authorized to, rely on the Note Prospectus for information regarding HSBC or for any purpose other than that described in the immediately preceding sentence.

Role of MLPF&S

MLPF&S will participate as selling agent in the distribution of the notes. Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount.

Payments on the notes, including the amount you receive at maturity or upon an automatic call, will be calculated based on the \$10 Original Offering Price per unit and will depend on the performance of the Index. In order to meet these payment obligations, at the time we issue the notes, we may choose to enter into certain hedging arrangements (which may include call options, put options or other derivatives) with MLPF&S or one of its affiliates. The terms of these hedging arrangements are determined by MLPF&S seeking bids from market participants, which could include one of our affiliates and MLPF&S and its affiliates. These hedging arrangements take into account a number of factors, including the issuer's creditworthiness, interest rate movements, the volatility of the Index, the tenor of the note and the tenor of the hedging arrangements. The economic terms of the notes depend in part on the terms of the hedging arrangements.

MLPF&S has advised us that the hedging arrangements will include a hedging related charge of approximately \$0.05 per unit, reflecting an estimated profit to be credited to MLPF&S from these transactions. Since hedging entails risk and may be influenced by unpredictable market forces, additional profits and losses from these hedging arrangements may be realized by MLPF&S or any third party hedge providers.

For further information, see "Risk Factors—General Risks Relating to the Notes" beginning on page S-9 and "Use of Proceeds" on page S-19 of product supplement STR-2.

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- There is no statutory, judicial, or administrative authority directly addressing the characterization of the notes.
- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as pre-paid derivative contracts with respect to the Index that requires you to pay us at inception an amount equal to the purchase price of the notes and that entitles you to receive at maturity or upon earlier redemption an amount in cash linked to the level of the Index.
- Under this characterization and tax treatment of the notes, a U.S. Holder (as defined on page S-34 of product supplement STR-2) generally will recognize capital gain or loss upon receipt of a cash payment at maturity or upon a sale, exchange, redemption, retirement or other disposition of the notes. This capital gain or loss generally will be long-term capital gain or loss if you held the notes for more than one year, and otherwise will be short-term capital gain or loss. Accordingly, if the notes are called on the first or second Observation Date, your capital gain or loss generally will be short-term capital gain or loss. The deductibility of capital losses is subject to limitations.
- No assurance can be given that the IRS or any court will agree with this characterization and tax treatment.
- Withholding and reporting requirements under the legislation enacted on March 18, 2010 (as discussed beginning on page S-48 of the accompanying prospectus supplement), will generally apply to payments made after December 31, 2013. However, this withholding tax will not be imposed on payments pursuant to obligations outstanding on January 1, 2014. Additionally, withholding due to any payment being treated as a “dividend equivalent” (as discussed beginning on page S-47 of the accompanying prospectus supplement) will begin no earlier than January 1, 2014. Holders are urged to consult with their own tax advisors regarding the possible implications of this recently enacted legislation on their investment in the notes.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. You should review carefully the discussion under the section entitled “U.S. Federal Income Tax Summary” beginning on page S-34 of product supplement STR-2.

Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you these documents if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Market-Linked Investments Classification

MLPF&S classifies certain market-linked investments (the “Market-Linked Investments”) into categories, each with different investment characteristics. The following description is meant solely for informational purposes and is not intended to represent any particular Enhanced Return Market-Linked Investment or guarantee any performance.

Enhanced Return Market-Linked Investments are short- to medium-term investments that offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.

“Strategic Accelerated Redemption Securities®” is a registered service mark of Bank of America Corporation, the parent company of MLPF&S.
