

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index

Principal at Risk Securities

Contingent Income Securities offer the opportunity for investors to earn a contingent quarterly payment at an annual rate of 5.00% of the stated principal amount, with respect to each determination date on which the closing level of the underlying index is greater than or equal to 50% of the initial index level, which we refer to as the downside threshold level. If the final index level is greater than or equal to the downside threshold level, the payment at maturity will be the sum of the stated principal amount and the contingent quarterly payment with respect to the final determination date. However, if the final index level is less than the downside threshold level, you will be exposed to the decline in the underlying index on a 1 to 1 basis and will receive a payment at maturity that is less than 50% of the stated principal amount of the securities and could be zero. As a result, investors must be willing to accept the risk of losing their entire initial investment and also the risk of not receiving any contingent quarterly payments. **Accordingly, the securities do not guarantee any return of principal at maturity.** These long-dated securities are intended for investors who seek an opportunity to earn interest at a potentially above-market rate in exchange for the risks of principal loss and receiving few or no contingent quarterly payments over the entire term of the securities. Investors will not participate in any appreciation of the underlying index. All payments on the securities are subject to the credit risk of HSBC.

SUMMARY TERMS			
Issuer:	HSBC USA Inc. ("HSBC")		
Underlying index:	S&P 500® Index (Bloomberg symbol: "SPX")		
Aggregate principal amount:	\$		
Stated principal amount:	\$10 per security		
Issue price:	\$10 per security		
Pricing date*:	November 15, 2013		
Original issue date*:	November 20, 2013 (3 business days after the pricing date)		
Maturity date*:	November 20, 2023, subject to adjustment as described in the accompanying Equity Index Underlying Supplement		
Determination closing level:	The closing level of the underlying index on any determination date other than the final determination date, as determined by the calculation agent.		
Contingent quarterly payment:	<ul style="list-style-type: none"> If, on any determination date, the determination closing level or the final index level, as applicable, is greater than or equal to the downside threshold level, we will pay a contingent quarterly payment at an annual rate of 5.00% of the stated principal amount per security (corresponding to approximately 1.25% (or \$0.125) per quarter for each security) on the related contingent payment date. If, on any determination date, the determination closing level or the final index level, as applicable, is less than the downside threshold level, no contingent quarterly payment will be made with respect to that determination date. 		
Determination dates*:	Quarterly, on the third scheduled business day preceding each scheduled contingent payment date, beginning on February 17, 2014 and ending on November 15, 2023 (the final determination date), subject to postponement as described under "Additional Terms of the Notes—Valuation Dates" in the accompanying Equity Index Underlying Supplement.		
Contingent payment dates:	Quarterly, on the 20 th day of each February, May, August and November, beginning February 20, 2014, subject to postponement as described under "Additional Terms of the Notes—Coupon Payment Dates, Call Payment Dates and Maturity Date" in the accompanying Equity Index Underlying Supplement.		
Payment at maturity:	<ul style="list-style-type: none"> If the final index level is greater than or equal to the downside threshold level: (i) the stated principal amount <i>plus</i> (ii) the contingent quarterly payment with respect to the final determination date If the final index level is less than the downside threshold level: (i) the stated principal amount <i>multiplied by</i> (ii) the index performance factor. In this case, the payment at maturity will be less than 50% of the stated principal amount of the securities and could be zero. 		
Index performance factor:	Final index level / Initial index level		
Downside threshold level:	\$, which is equal to 50% of the initial index level.		
Initial index level:	The closing level of the underlying index on the pricing date, as determined by the calculation agent.		
Final index level:	The closing level of the underlying index on the final determination date, as determined by the calculation agent.		
Closing level:	The closing level of the underlying index on any scheduled trading day as determined by the calculation agent based upon the value displayed on Bloomberg Professional® service page "SPX <INDEX>" or any successor page on the Bloomberg Professional® service or any successor service, as applicable.		
Estimated Initial Value:	The estimated initial value of the securities will be less than the price you pay to purchase the securities. The estimated initial value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your securities in the secondary market, if any, at any time. The estimated initial value will be calculated on the pricing date and will be set forth in the pricing supplement to which this free writing prospectus relates. See "Risk Factors—The estimated initial value of the securities, which will be determined by us on the pricing date, will be less than the price to public and may differ from the market value of the securities in the secondary market, if any."		
CUSIP:	40434B784		
ISIN:	US40434B7846		
Listing:	The securities will not be listed on any securities exchange.		
Agent:	HSBC Securities (USA) Inc., an affiliate of HSBC. See "Supplemental plan of distribution (conflicts of interest)."		
Commissions and Issue Price:	Price to Public	Agent's Commissions ⁽¹⁾	Proceeds to Issuer
Per security	\$10.000	\$0.35	\$9.65
Total	\$	\$	\$

(1) HSBC Securities (USA) Inc., acting as agent for HSBC, will receive a fee of up to \$0.35 per \$10 stated principal amount and will pay the entire fee to Morgan Stanley Wealth Management as a fixed sales commission of up to \$0.35 for each security they sell. See "Supplemental Plan of Distribution (conflicts of interest)."

* The pricing date, original issue date and the other dates set forth above are subject to change, and will be set forth in the pricing supplement relating to the securities.

The estimated initial value of the securities on the pricing date is expected to be between \$8.50 and \$9.50 per security, which will be less than the price to public. The market value of the securities at any time will reflect many factors and cannot be predicted with accuracy. See "Estimated initial value" above and "Risk Factors" beginning on page 6 of this document for additional information.

Investment in the securities involves certain risks. See "Risk Factors" beginning on page 6 of this free writing prospectus, page S-1 of the Equity Index Underlying Supplement and page S-3 of the prospectus supplement.

Principal at Risk Securities

Investment Summary

Contingent Income Securities

Principal at Risk Securities

The Contingent Income Securities due November 20, 2023 Based on the Performance of the S&P 500® Index, which we refer to as the securities, provide an opportunity for investors to earn a contingent quarterly payment at an annual rate of 5.00% of the stated principal amount with respect to each quarterly determination date on which the determination closing level or the final index level, as applicable, is greater than or equal to 50% of the initial index level, which we refer to as the downside threshold level. The contingent quarterly payment, if any, will be payable quarterly on the contingent payment date (which is the third business day after the related determination date) or the maturity date, as applicable. It is possible that the closing level of the underlying index could remain below the downside threshold level for extended periods of time or even throughout the term of the securities so that you may receive few or no contingent quarterly payments.

If the final index level is greater than or equal to the downside threshold level, the payment at maturity will be the sum of the stated principal amount and the contingent quarterly payment with respect to the final determination date. However, if the final index level is less than the downside threshold level, investors will be exposed to the decline in the underlying index on a 1 to 1 basis and will receive a payment at maturity that is less than 50% of the stated principal amount of the securities and could be zero. Investors in the securities must be willing to accept the risk of losing their entire initial investment and also the risk of not receiving any contingent quarterly payment. In addition, investors will not participate in any appreciation of the underlying index.

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

Key Investment Rationale

The securities offer investors an opportunity to earn a contingent quarterly payment at an annual rate of 5.00% of the stated principal amount with respect to each determination date on which the determination closing level or the final index level, as applicable, is greater than or equal to 50% of the initial index level, which we refer to as the downside threshold level. The payment at maturity will vary depending on the final index level, as follows:

Scenario 1

The final index level is *greater than or equal to* the downside threshold level.

- The payment due at maturity will be (i) the stated principal amount *plus* (ii) the contingent quarterly payment with respect to the final determination date.
- Investors will not participate in any appreciation of the underlying index from the initial index level.

Scenario 2

The final index level is *less than* the downside threshold level.

- The payment due at maturity will be (i) the stated principal amount *multiplied by* (ii) the index performance factor. **Investors do not receive the contingent quarterly payment for the last quarterly period, and the payment at maturity will be less than 50% of the stated principal amount of the securities and could be zero.**
- **Investors will lose a significant portion, and may lose all, of their principal in this scenario.**

How the Securities Work

The following diagrams illustrate the potential outcomes for the securities depending on (1) the determination closing level and (2) the final index level.

Diagram #1: Contingent Quarterly Payments

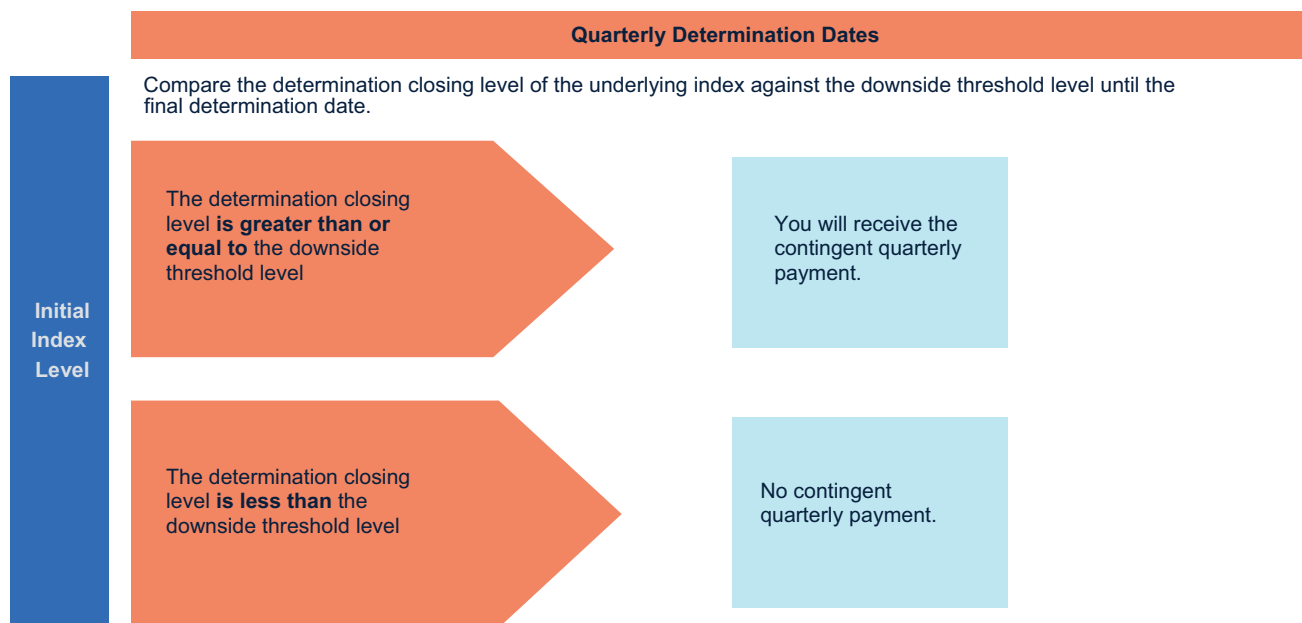

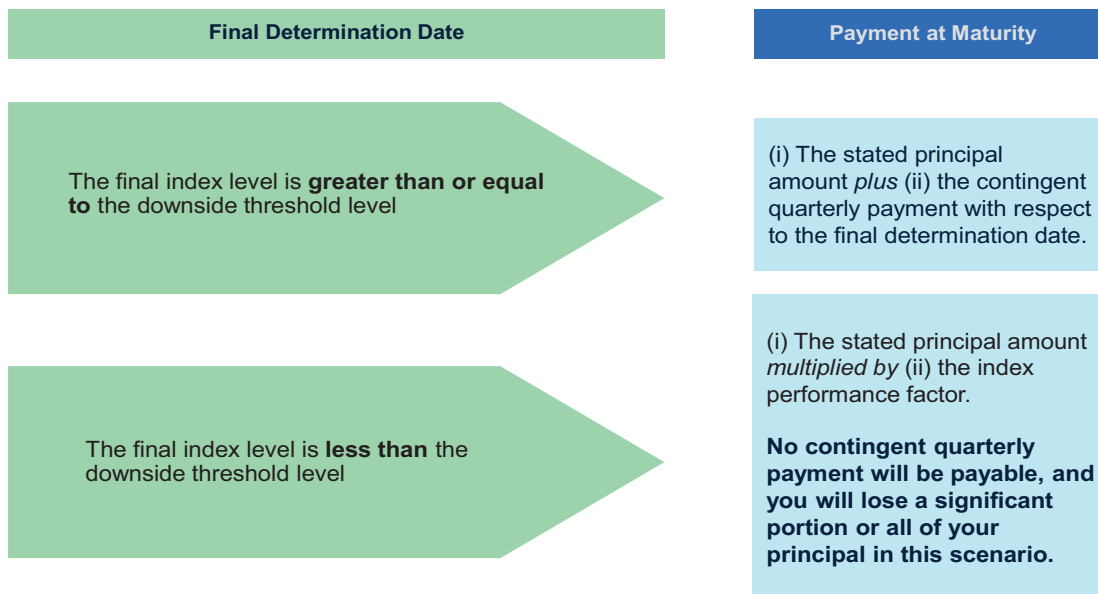

Diagram #2: Payment at Maturity

For more information about the payment at maturity in different hypothetical scenarios, see “Hypothetical Examples” beginning on page 5.

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

Hypothetical Examples

The below examples are based on the following terms:

Hypothetical Initial Index Level:	1,800
Hypothetical Downside Threshold Level:	900, which is 50% of the hypothetical initial index level
Contingent Quarterly Payment:	5.00% per annum (corresponding to approximately \$0.125 (or 1.25%) per quarter for each security) ¹
Stated Principal Amount:	\$10 per security

¹ The actual contingent quarterly payment will be an amount determined by the calculation agent based on the number of days in the applicable payment period, calculated on a 30/360 day count basis. The hypothetical contingent quarterly payment of \$0.125 is used in these examples for ease of analysis.

Example 1—The closing level is at or above the downside threshold level on all 40 quarterly determination dates, including the final determination date, on which the closing level is 2,000. Therefore, you would receive (i) the contingent quarterly payments with respect to the 39 determination dates prior to the final determination date and (ii) the payment at maturity calculated as $\$10 + \$0.125 = \$10.125$. The total payment over the 10-year term of the securities is $\$4.875 + \$10.125 = \$15.00$.

This example illustrates the scenario where you receive a contingent quarterly payment on every contingent payment date throughout the term of the securities and you receive your principal back at maturity.

Example 2—The closing level is at or above the downside threshold level on 14 out of the 39 quarterly determination dates prior to the final determination date. On the final determination date, the underlying index closes at 1,000, which is above the downside threshold level. Therefore, you would receive (i) the contingent quarterly payments with respect to those 14 determination dates prior to the final determination date and (ii) the payment at maturity calculated as $\$10 + \$0.125 = \$10.125$. The total payment over the 10-year term of the securities is $\$1.75 + \$10.125 = \$11.875$.

Example 3—The closing level is below the downside threshold level on all of the quarterly determination dates, including the final determination date on which the closing level is 720. Therefore, you would receive (i) no contingent quarterly payments and (ii) because the final index level is below the downside threshold level, the payment at maturity calculated as $\$10 \times 720 / 1,800 = \4 . The total payment over the 10-year term of the securities is $\$0 + \$4 = \$4$. In this example, you will lose 60% of the principal amount of the securities, and will not receive any contingent quarterly payments over the 10-year term of the securities.

Principal at Risk Securities

Risk Factors

We urge you to read the section “Risk Factors” on page S-3 in the accompanying prospectus supplement and on page S-1 of the Equity Index Underlying Supplement. Investing in the securities is not equivalent to investing directly in any of the component securities of the underlying index. You should understand the risks of investing in the securities and should reach an investment decision only after careful consideration, with your advisors, of the suitability of the securities in light of your particular financial circumstances and the information set forth in this free writing prospectus and the accompanying Equity Index Underlying Supplement, prospectus supplement and prospectus.

In addition to the risks discussed below, you should review “Risk Factors” in the accompanying prospectus supplement and Equity Index Underlying Supplement, including the explanation of risks relating to the securities described in the following sections:

— Risks Relating to All Note Issuances” in the prospectus supplement; and

—General Risks Related to Indices” in the Equity Index Underlying Supplement.

You will be subject to significant risks not associated with conventional fixed-rate or floating-rate debt securities.

- **You may lose your entire initial investment.** The securities do not guarantee any return of principal. The securities differ from ordinary debt securities in that the issuer will not necessarily pay the full principal amount of the securities at maturity. HSBC will only pay you the principal amount of your securities in cash if the final index level is greater than or equal to the downside threshold level. If the final index level is less than the downside threshold level, you will be exposed to the decline in the closing level of the underlying index, as compared to the initial index level, on a 1 to 1 basis and you will receive for each security that you hold at maturity an amount equal to the stated principal amount *times* the index performance factor. **In this case, the payment at maturity will be less than 50% of the stated principal amount and could be zero.**
- **You will not receive any contingent quarterly payment for any quarterly period where the determination index level or the final index level, as applicable, is less than the downside threshold level on the related determination date.** A contingent quarterly payment will be made with respect to a quarterly period only if the determination closing level or the final index level, as applicable, is greater than or equal to the downside threshold level on the related determination date. If the determination closing level or the final index level, as applicable, remains below the downside threshold level on each determination date over the term of the securities, you will not receive any contingent quarterly payments.
- **Your return on the securities is limited to the principal amount plus any contingent quarterly payments, regardless of any appreciation in the level of the underlying index.** The maximum amount that you will receive at maturity is the stated principal amount plus the contingent quarterly payment with respect to the final determination date, regardless of any appreciation in the level of the underlying index, which may be significant. The return on the securities will be limited to the contingent quarterly payment that is paid with respect to each determination date on which the determination closing level or the final index level, as applicable, is greater than or equal to the downside threshold level. It is possible that the closing level of the underlying index could be below the downside threshold level on most or all of the determination dates, so that you will receive few or no contingent quarterly payments. Accordingly, the return on the securities may be significantly less than the return on a direct investment in the stocks comprising the underlying index during the term of the securities. If you do not earn sufficient contingent quarterly payments over the term of the securities, the overall return on the securities may be less than the amount that would be paid on a conventional debt security of the issuer of comparable maturity.
- **The amounts payable on the securities are not linked to the level of the underlying index at any time other than on the determination dates, including the final determination date.** The payments on the securities will be based on the closing level of the underlying index on each determination date, subject to postponement for non-trading days and certain market disruption events. Even if the level of the underlying index appreciates prior to an applicable determination date but then drops by that day to a level that is below the downside threshold level, the contingent quarterly payment on the securities will not be paid. Similarly, the payment at maturity will be less, and may be significantly less, than it would have been had the securities been linked to the level of the underlying index on a date prior to the final determination date. Although the actual level of the underlying index on the maturity date or at other times during the term of the securities may be higher than the level on one or more determination dates, the payments on the securities will be based solely on the level of the underlying index on the determination dates.

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

- **The market price will be influenced by many unpredictable factors.** Several factors will influence the value of the securities in the secondary market and the price at which HSBC Securities (USA) Inc. may be willing to purchase or sell the securities in the secondary market, including: the value, volatility and dividend yield, as applicable, of the underlying index and the securities comprising the underlying index, interest and yield rates, the time remaining to maturity, geopolitical conditions and economic, financial, political and regulatory or judicial events and any actual or anticipated changes in our credit ratings or credit spreads. Generally, the longer the time remaining to maturity, the more the market price of the securities will be affected by the other factors described above. The level of the underlying index may be, and has recently been, volatile, and we can give you no assurance that the volatility will lessen. See “Information about the S&P 500® Index” below. You may receive less, and possibly significantly less, than the stated principal amount per security if you sell your securities prior to maturity.
- **Credit risk of HSBC USA Inc.** The securities are senior unsecured debt obligations of the Issuer, HSBC, and are not, either directly or indirectly, an obligation of any third party. As further described in the accompanying prospectus supplement and prospectus, the securities will rank on par with all of the other unsecured and unsubordinated debt obligations of HSBC, except such obligations as may be preferred by operation of law. Any payments to be made on the securities depends on the ability of HSBC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of HSBC may affect the market value of the securities and, in the event HSBC were to default on its obligations, you may not receive the amounts owed to you under the terms of the securities.
- **Investing in the securities is not equivalent to investing in the underlying index.** Investing in the securities is not equivalent to investing in the underlying index or its component securities. Investors in the securities will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to the securities comprising the underlying index.
- **Adjustments to the underlying index could adversely affect the value of the securities.** S&P Dow Jones Indices LLC, the sponsor of the underlying index, may add, delete or substitute the stocks comprising the underlying index. In addition, the sponsor of the underlying index may make other methodological changes that could change the level of the underlying index. Further, the sponsor of the underlying index may discontinue or suspend calculation or publication of the underlying index at any time. Any such actions could affect the value of and the return on the securities.
- **The securities will not be listed on any securities exchange and secondary trading may be limited.** The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. HSBC Securities (USA) Inc. may, but is not obligated to, make a market in the securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the securities easily. Because we do not expect that other broker-dealers will participate significantly in the secondary market for the securities, the price at which you may be able to trade your securities is likely to depend on the price, if any, at which HSBC Securities (USA) Inc. is willing to transact. If, at any time, HSBC Securities (USA) Inc. were to cease making a market in the securities, it is likely that there would be no secondary market for the securities. Accordingly, you should be willing to hold your securities to maturity.
- **The estimated initial value of the securities, which will be determined by us on the pricing date, will be less than the price to public and may differ from the market value of the securities in the secondary market, if any.** The estimated initial value of the securities will be calculated by us on the pricing date and will be less than the price to public. The estimated initial value will reflect the implied borrowing rate we use to issue market-linked securities, as well as the mid-market value of the embedded derivatives in the securities. The implied borrowing rate is typically lower than the rate we would use when we issue conventional fixed or floating rate debt securities. As a result of the difference between our implied borrowing rate and the rate we would use when we issue conventional fixed or floating rate debt securities, the estimated initial value of the securities may be lower if it were based on the levels at which our fixed or floating rate debt securities trade in the secondary market. In addition, if we were to use the rate we use for our conventional fixed or floating rate debt issuances, we would expect the economic terms of the securities to be more favorable to you. We will determine the value of the embedded derivatives in the securities by reference to our or our affiliates’ internal pricing models. These pricing models consider certain assumptions and variables, which can include volatility and interest rates. Different pricing models and assumptions could provide valuations for the securities that are different from our estimated initial value. These pricing models rely in part on certain forecasts about future events, which may prove to be incorrect. The estimated initial value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your securities in the secondary market (if any exists) at any time.

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

- **If HSBC Securities (USA) Inc. were to repurchase your securities immediately after the original issue date, the price you receive may be higher than the estimated initial value of the securities.** Assuming that all relevant factors remain constant after the original issue date, the price at which HSBC Securities (USA) Inc. may initially buy or sell the securities in the secondary market, if any, and the value that we may initially use for customer account statements, if we provide any customer account statements at all, may exceed the estimated initial value on the pricing date for a temporary period expected to be approximately 24 months after the original issue date. This temporary price difference may exist because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the securities and other costs in connection with the securities that we will no longer expect to incur over the term of the securities. We will make such discretionary election and determine this temporary reimbursement period on the basis of a number of factors, including the tenor of the securities and any agreement we may have with the distributors of the securities. The amount of our estimated costs which we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the original issue date of the securities based on changes in market conditions and other factors that cannot be predicted.
- **The price of your securities in the secondary market, if any, immediately after the pricing date will be less than the price to public.** The price to public takes into account certain costs. These costs include the underwriting discount, our affiliates' projected hedging profits (which may or may not be realized) for assuming risks inherent in hedging our obligations under the securities and the costs associated with structuring and hedging our obligations under the securities. These costs, except for the underwriting discount, will be used or retained by us or one of our affiliates. If you were to sell your securities in the secondary market, if any, the price you would receive for your securities may be less than the price you paid for them because secondary market prices will not take into account these costs. The price of your securities in the secondary market, if any, at any time after issuance will vary based on many factors, including the level of the underlying index and changes in market conditions, and cannot be predicted with accuracy. The securities are not designed to be short-term trading instruments, and you should, therefore, be able and willing to hold the securities to maturity. Any sale of the securities prior to maturity could result in a loss to you.
- **Hedging and trading activity by our affiliates could adversely affect the value of the securities.** One or more of our affiliates expect to carry out hedging activities related to the securities (and possibly to other instruments linked to the underlying index or its component securities), including trading in the component securities as well as other instruments related to the underlying index. Some of our affiliates also trade the component securities and other financial instruments related to the underlying index on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the pricing date could potentially increase the initial index level and, as a result, the downside threshold level, which is the level at or above which the underlying index must close on each determination date in order for you to earn a contingent quarterly payment or in order for you to avoid being exposed to the negative performance of the underlying index at maturity. Additionally, such hedging or trading activities during the term of the securities could adversely affect the level of the underlying index on the determination dates and, accordingly the payout to you at maturity.
- **The calculation agent, which is HSBC or one of its affiliates, will make determinations with respect to the securities.** As calculation agent, HSBC or one of its affiliates will determine the initial index level, the downside threshold level, the final index level, whether the contingent quarterly payment will be paid on each contingent payment date, whether a market disruption event has occurred, whether to make any adjustments to any determination closing level or the final index level and the payment that you will receive at maturity, if any. Determinations made by HSBC or one of its affiliates in its capacity as calculation agent, including with respect to the occurrence or non-occurrence of market disruption events, may adversely affect the payout to you at maturity.
- **The securities are not guaranteed or insured by any governmental agency of the United States or any other jurisdiction.** The securities are not deposit liabilities or other obligations of a bank and are not guaranteed or insured by the Federal Deposit Insurance Corporation or any other governmental agency or program of the United States or any other jurisdiction. An investment in the securities is subject to the credit risk of HSBC, and in the event that HSBC is unable to pay its obligations as they become due, you may not receive the full amount due on the securities.
- **The U.S. federal income tax consequences of an investment in the securities are uncertain.** There is no direct legal authority as to the proper treatment of the securities for U.S. federal income tax purposes.

Please read the discussion under "Additional Information About the Securities – Additional Provisions – Tax considerations" in this document concerning the U.S. federal income tax consequences of an investment in the

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

securities. Pursuant to the terms of the securities, you agree to treat a security for U.S. federal income tax purposes as a single financial contract that provides for a contingent quarterly payment that will be treated as gross income to you at the time received or accrued in accordance with your regular method of tax accounting. If the IRS were successful in asserting an alternative treatment for the securities, the timing and character of income or loss on the securities might differ significantly from the tax treatment described herein. **Non-U.S. Holders should note that the entire amount of the contingent quarterly payments will be subject to U.S. federal income tax withholding at a 30% rate (or at a lower rate under an applicable income tax treaty), and we will not be required to pay any additional amounts with respect to amounts withheld.** We do not plan to request a ruling from the IRS regarding the tax treatment of the securities, and the IRS or a court may not agree with the tax treatment described herein.

In 2007, the Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. While it is not clear whether the securities would be viewed as similar to the prepaid forward contracts described in the notice, it is possible that any Treasury regulations or other guidance issued after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect. The notice focuses on a number of issues, the most relevant of which for holders of the securities are the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. investors should be subject to withholding tax. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments, the issues presented by this notice and any tax consequences arising under the laws of any state, local or foreign taxing jurisdictions.

Information About the S&P 500® Index

The underlying index is a capitalization-weighted index of 500 U.S. stocks. It is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. The top 5 industry groups by market capitalization as of November 5, 2013 were: Information Technology, Financials, Health Care, Consumer Discretionary, and Industrials.

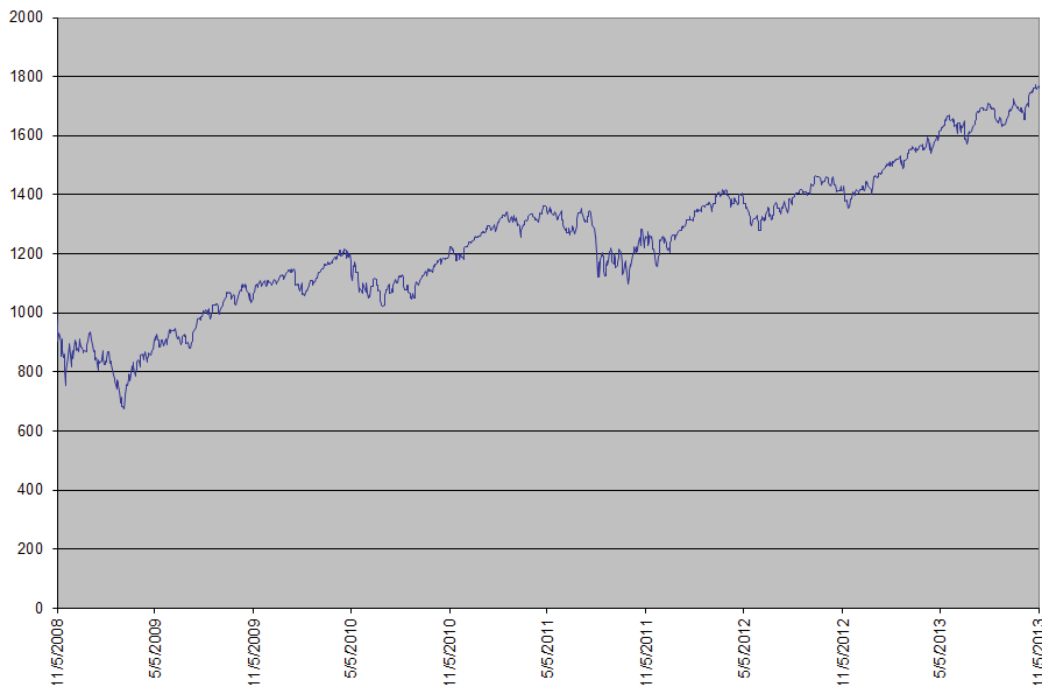

In September 2012, the index sponsor, S&P Dow Jones Indices LLC, a part of McGraw-Hill Financial, updated its index methodology so that, subject to several exceptions, shareholdings by specified types of insiders that represent more than 5% of the outstanding shares of a security are removed from the float for purposes of calculating the underlying index.

For more information about the S&P 500® Index, see “The S&P 500® Index” beginning on page S-6 of the accompanying Equity Index Underlying Supplement.

Historical Information

The following graph sets forth the historical performance of the underlying index based on the daily historical official closing level from November 5, 2008 through November 5, 2013. The official closing level for the underlying index on November 5, 2013 was 1,762.97. We obtained the official closing levels below from the Bloomberg Professional® service. We have not independently verified the accuracy or completeness of the information obtained from the Bloomberg Professional® service. The historical levels of the underlying index should not be taken as an indication of future performance, and no assurance can be given as to the level of the underlying index on any determination date.

Additional Information About the Securities

Please read this information in conjunction with the summary terms on the front cover of this document.

Additional Provisions

Listing:	The securities will not be listed on any securities exchange.
CUSIP:	40434B784
ISIN:	US40434B7846
Minimum ticketing size:	100 securities
Events of default and acceleration:	<p>If the securities have become immediately due and payable following an event of default (as defined in the accompanying prospectus) with respect to the securities, the calculation agent will determine the accelerated payment due and payable at maturity in the same general manner as described in "payment at maturity" in this free writing prospectus except that the accelerated contingent quarterly payment (if payable) will be calculated on the basis of a 360-day year consisting of twelve 30-day months. In that case, the scheduled trading day preceding the date of acceleration will be used as the final determination date for purposes of determining the final index level. If a market disruption event exists with respect to the underlying index on that scheduled trading day, then the accelerated final determination date for the underlying index will be postponed for up to five scheduled trading days (in the same manner used for postponing the originally scheduled final determination date). The accelerated maturity date will then be the third business day following the postponed accelerated final determination date.</p> <p>If the securities have become immediately due and payable following an event of default, you will not be entitled to any additional payments with respect to the securities. For more information, see "Description of Debt Securities—Events of Default" and "Securities—Events of Default; Defaults" in the prospectus.</p>
Business day:	A "business day" means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions are authorized or required by law or regulation to close in the City of New York.
Payment when offices or settlement systems are closed:	If any payment is due on the securities on a day that would otherwise be a "business day" but is a day on which the office of a paying agent or a settlement system is closed, we will make the payment on the next business day when that paying agent or system is open. Any such payment will be deemed to have been made on the original due date, and no additional payment will be made on account of the delay.
Tax considerations:	<p>Prospective investors should note that the discussion under the section called "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement does not apply to the securities issued under this document and is superseded by the following discussion.</p> <p>The following summary is a general discussion of the material U.S. federal tax consequences of ownership and disposition of the securities. This discussion applies only to initial investors in the securities who:</p> <ul style="list-style-type: none"> • purchase the securities at their "issue price"; and • will hold the securities as capital assets, within the meaning of Section 1221 of the Internal Revenue Code of 1986, as amended (the "Code"). <p>This discussion does not describe all of the tax consequences that may be relevant to a holder in light of the holder's particular circumstances or to holders subject to special rules, such as:</p> <ul style="list-style-type: none"> • certain financial institutions; • insurance companies; • certain dealers and traders in securities, commodities or foreign currencies; • investors holding the securities as part of a "straddle," conversion transaction, integrated transaction or constructive sale transaction; • U.S. Holders, as defined below, whose functional currency is not the U.S. dollar; • partnerships or other entities classified as partnerships for U.S. federal income tax purposes;

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

- regulated investment companies;
- real estate investment trusts;
- tax-exempt entities, including an “individual retirement account” or “Roth IRA”, as defined in Section 408 or 408A of the Code, respectively; or
- persons subject to the alternative minimum tax.

As the law applicable to the U.S. federal income taxation of instruments such as the securities is technical and complex, the discussion below necessarily represents only a general summary. Moreover, the effect of any applicable state, local or foreign tax laws is not discussed.

This discussion is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations, all as of the date hereof, changes to any of which subsequent to the date of this document may affect the tax consequences described herein. Persons considering the purchase of the securities should consult their tax advisers with regard to the application of the U.S. federal income tax laws to their particular situations as well as any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction.

General

There is no direct legal authority as to the proper tax treatment of the securities, and therefore significant aspects of the tax treatment of the securities are uncertain as to both the timing and character of any inclusion in income in respect of the securities. Under one approach, a security could be treated as a single financial contract that provides for a contingent quarterly payment. Pursuant to the terms of the securities, you agree to treat a security for U.S. federal income tax purposes as a single financial contract that provides for a contingent quarterly payment that will be treated as gross income to you at the time received or accrued in accordance with your regular method of tax accounting. Subject to the limitations described herein, and based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Morrison & Foerster LLP, it is reasonable to treat a security as a single financial contract that provides for a contingent quarterly payment.

Due to the absence of statutory, judicial or administrative authorities that directly address the treatment of the securities or instruments that are similar to the securities for U.S. federal income tax purposes, no assurance can be given that the Internal Revenue Service (the “IRS”) or the courts will agree with the tax treatment described herein. Accordingly, you should consult your tax adviser regarding all aspects of the U.S. federal tax consequences of an investment in the securities (including possible alternative treatments of the securities) and with respect to any tax consequences arising under the laws of any state, local or foreign taxing jurisdiction. Unless otherwise stated, the following discussion is based on the treatment of each security as described in the previous paragraph.

We will not attempt to ascertain whether any of the entities whose stock is included in the underlying index would be treated as a passive foreign investment company (“PFIC”) or United States real property holding corporation (“USRPHC”), both as defined for U.S. federal income tax purposes. If one or more of the entities whose stock is included in the underlying index were so treated, certain adverse U.S. federal income tax consequences might apply. You should refer to information filed with the SEC and other authorities by the entities whose stock is included in the underlying index, and consult your tax adviser regarding the possible consequences to you if one or more of the entities whose stock is included in the underlying index is or becomes a PFIC or a USRPHC.

Tax Consequences to U.S. Holders

This section applies to you only if you are a U.S. Holder. As used herein, the term “U.S. Holder” means a beneficial owner of a security that is, for U.S. federal income tax purposes:

- an individual who is a citizen or resident of the United States, for U.S. federal income tax purposes;
- a corporation, or other entity taxable as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any political subdivision thereof; or
- an estate or trust, the income of which is subject to U.S. federal income taxation regardless of its source.

The term “U.S. Holder” also includes certain former citizens and residents of the United States.

Tax Treatment of the Securities

Assuming the treatment of the securities as set forth above is respected, the following U.S. federal

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

income tax consequences should result.

Tax Basis. A U.S. Holder's tax basis in the securities should equal the amount paid by the U.S. Holder to acquire the securities.

Tax Treatment of Contingent Quarterly Payment. Any contingent quarterly payment on the securities should be taxable as ordinary income to a U.S. Holder at the time received or accrued in accordance with the U.S. Holder's regular method of accounting for U.S. federal income tax purposes.

Sale, Exchange or Settlement of the Securities. Upon a sale, exchange or settlement of the securities at maturity, a U.S. Holder should recognize capital gain or loss equal to the difference between the amount realized (other than with respect to cash attributable to the contingent quarterly payment, which should be treated as discussed above) on the sale, exchange or settlement and the U.S. Holder's tax basis in the securities sold, exchanged or settled. Any such gain or loss recognized should be long-term capital gain or loss if the U.S. Holder has held the securities for more than one year at the time of the sale, exchange or settlement, and should be short-term capital gain or loss otherwise. The deductibility of capital losses is subject to limitations.

Possible Alternative Tax Treatments of an Investment in the Securities

Due to the absence of authorities that directly address the proper tax treatment of the securities, no assurance can be given that the IRS will accept, or that a court will uphold, the tax treatment described above. In particular, the IRS could seek to treat a security as a single debt instrument. Such a debt instrument would be subject to the special tax rules governing contingent payment debt instruments. If the securities are so treated, a U.S. Holder would generally be required to accrue interest income over the term of the securities based upon the yield at which we would issue a non-contingent fixed-rate debt instrument with other terms and conditions similar to the securities. In addition, any gain a U.S. Holder might recognize upon the sale, exchange or settlement of the securities would be ordinary income and any loss recognized by a U.S. Holder at such time would be ordinary loss to the extent of interest that same holder included in income in the current or previous taxable years in respect of the securities, and thereafter, would be capital loss.

Because of the absence of authority regarding the appropriate tax characterization of the securities, it is also possible that the IRS could seek to characterize the securities in a manner that results in other tax consequences that are different from those described above. For example, the IRS could assert that any gain or loss that a U.S. Holder may recognize upon the sale, exchange or maturity of the securities should be treated as ordinary gain or loss.

Other alternative federal income tax treatments of the securities are also possible, which if applied could also affect the timing and character of the income or loss with respect to the securities. On December 7, 2007, the Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. The notice focuses on whether to require holders of "prepaid forward contracts" and similar instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; whether these instruments are or should be subject to the "constructive ownership" regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge; and appropriate transition rules and effective dates. While it is not clear whether instruments such as the securities would be viewed as similar to the prepaid forward contracts described in the notice, any U.S. Treasury Department regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect. U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments and the issues presented by this notice.

Backup Withholding and Information Reporting

Backup withholding may apply in respect of the amounts paid to a U.S. Holder, unless such U.S. Holder provides proof of an applicable exemption or a correct taxpayer identification number, or otherwise complies with applicable requirements of the backup withholding rules. The amounts withheld under the backup withholding rules are not an additional tax and may be refunded, or credited against the U.S. Holder's U.S. federal income tax liability, provided that the required information is furnished to the IRS. In addition, information returns may be filed with the IRS in connection with payments on the securities and the proceeds from a sale, exchange, early redemption or other disposition of the securities, unless the U.S. Holder provides proof of an applicable exemption from the information reporting rules.

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

Tax Consequences to Non-U.S. Holders

This section applies to you only if you are a Non-U.S. Holder. As used herein, the term "Non-U.S. Holder" means a beneficial owner of a security that is for U.S. federal income tax purposes:

- an individual who is classified as a nonresident alien;
- a foreign corporation; or
- a foreign trust or estate.

The term "Non-U.S. Holder" does not include any of the following holders:

- a holder who is an individual present in the United States for 183 days or more in the taxable year of disposition and who is not otherwise a resident of the United States for U.S. federal income tax purposes;
- certain former citizens or residents of the United States; or
- a holder for whom income or gain in respect of the securities is effectively connected with the conduct of a trade or business in the United States.

Such holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the securities.

Because the U.S. federal income tax treatment (including the applicability of withholding) of contingent quarterly payments on the securities is uncertain, the entire amount of the contingent quarterly payments will be subject to U.S. federal income tax withholding at a 30% rate (or at a lower rate under an applicable income tax treaty). We will not pay any additional amounts in respect of such withholding. In order to claim an exemption from or a reduction in the 30% withholding tax, a Non-U.S. Holder of the securities must comply with certification requirements to establish that it is not a U.S. person and is eligible for a reduction of, or an exemption from withholding under, an applicable tax treaty. If you are a Non-U.S. Holder, you should consult your tax advisers regarding the tax treatment of the securities, including the possibility of obtaining a refund of any withholding tax and the certification requirement described above.

A "dividend equivalent" payment is treated as a dividend from sources within the U.S. and such payments generally would be subject to a 30% U.S. withholding tax if paid to a Non-U.S. Holder. Under proposed U.S. Treasury Department regulations, certain payments or deemed payments that are contingent upon or determined by reference to U.S. source dividends, including payments reflecting adjustments for extraordinary dividends, with respect to equity-linked instruments, including the securities, may be treated as dividend equivalents. If enacted in their current form, the regulations will impose a withholding tax on payments or deemed payments made on the securities on or after January 1, 2014 that are treated as dividend equivalents. In that case, we (or the applicable paying agent) would be entitled to withhold taxes without being required to pay any additional amounts with respect to amounts so withheld. Further, Non-U.S. Holders may be required to provide certifications prior to, or upon the sale, exchange or maturity of the securities in order to minimize or avoid U.S. withholding taxes.

U.S. Federal Estate Tax

Individual Non-U.S. Holders and entities the property of which is potentially includible in such an individual's gross estate for U.S. federal estate tax purposes (for example, a trust funded by such an individual and with respect to which the individual has retained certain interests or powers), should note that, absent an applicable treaty benefit, the securities may be treated as U.S. situs property subject to U.S. federal estate tax. Prospective investors that are non-U.S. individuals, or are entities of the type described above, should consult their tax advisers regarding the U.S. federal estate tax consequences of an investment in the securities.

Backup Withholding and Information Reporting

Information returns may be filed with the IRS in connection with payments on the securities and the proceeds from a sale, exchange or other disposition. A Non-U.S. Holder may be subject to backup withholding in respect of amounts paid to the Non-U.S. Holder, unless such Non-U.S. Holder complies with certification procedures to establish that it is not a U.S. person for U.S. federal income tax purposes or otherwise establishes an exemption. The amount of any backup withholding from a payment to a Non-U.S. Holder will be allowed as a credit against the Non-U.S. Holder's U.S. federal income tax liability and may entitle the Non-U.S. Holder to a refund, provided that the required information is furnished to the IRS.

Foreign Account Tax Compliance Act

The Foreign Account Tax Compliance Act was enacted on March 18, 2010 and will impose a 30% U.S. withholding tax on certain U.S. source payments, including interest (and original issue discount),

Contingent Income Securities due November 20, 2023

Based on the Performance of the S&P 500® Index
Principal at Risk Securities

dividends, other fixed or determinable annual or periodical gain, profits, and income, and on the gross proceeds from a disposition of property of a type which can produce U.S. source interest or dividends ("Withholdable Payments"), if paid to a foreign financial institution (including amounts paid to a foreign financial institution on behalf of a holder), unless such institution enters into an agreement with the U.S. Treasury Department to collect and provide to the U.S. Treasury Department substantial information regarding U.S. account holders, including certain account holders that are foreign entities with U.S. owners or otherwise establishes an exemption. The legislation also generally imposes a withholding tax of 30% on Withholdable Payments made to a non-financial foreign entity unless such entity provides the withholding agent with a certification that it does not have any substantial U.S. owners or a certification identifying the direct and indirect substantial U.S. owners of the entity or otherwise establishes an exemption.

These withholding and reporting requirements will generally apply to payments made after June 30, 2014. However, the withholding tax will not be imposed on payments pursuant to obligations outstanding as of July 1, 2014. Holders are urged to consult with their own tax advisers regarding the possible implications of this legislation on their investment in the securities.

Paying agent: HSBC Bank USA, N.A.

Calculation agent: HSBC USA Inc., or one of its affiliates.

Supplemental plan of distribution (conflicts of interest): Pursuant to the terms of a distribution agreement, HSBC Securities (USA) Inc., an affiliate of HSBC, will purchase the securities from HSBC for distribution to Morgan Stanley Smith Barney LLC ("Morgan Stanley Wealth Management"). HSBC Securities (USA) Inc. will act as agent for the securities and will receive a fee of up to \$0.35 per \$10 stated principal amount and will pay the entire fee to Morgan Stanley Wealth Management as a fixed sales commission of up to \$0.35 for each security they sell. In addition, HSBC Securities (USA) Inc. or another of its affiliates or agents may use the pricing supplement to which this free writing prospectus relates in market-making transactions after the initial sale of the securities, but is under no obligation to do so and may discontinue any market-making activities at any time without notice.

See "Supplemental Plan of Distribution" on page S-52 in the prospectus supplement.

Where you can find more information:

This free writing prospectus relates to an offering of securities linked to the underlying index identified on the cover page. The purchaser of a security will acquire a senior unsecured debt security of HSBC USA Inc. We reserve the right to withdraw, cancel or modify any offering and to reject orders in whole or in part. Although the offering of the securities relates to the underlying index identified on the cover page, you should not construe that fact as a recommendation as to the merits of acquiring an investment linked to the underlying index or any security comprising the underlying index or as to the suitability of an investment in the securities.

HSBC has filed a registration statement (including a prospectus, a prospectus supplement and Equity Index Underlying Supplement) with the SEC for the offering to which this free writing prospectus relates. Before you invest, you should read the prospectus, prospectus supplement and Equity Index Underlying Supplement in that registration statement and other documents HSBC has filed with the SEC for more complete information about HSBC and this offering. You may get these documents for free by visiting EDGAR on the SEC's web site at www.sec.gov. Alternatively, HSBC Securities (USA) Inc. or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement and Equity Index Underlying Supplement if you request them by calling toll-free 1-866-811-8049.

You should read this document together with the prospectus dated March 22, 2012, the prospectus supplement dated March 22, 2012 and Equity Index Underlying Supplement dated March 22, 2012. If the terms of the securities offered hereby are inconsistent with those described in the accompanying prospectus supplement, prospectus, or Equity Index Underlying Supplement, the terms described in this free writing prospectus shall control. You should carefully consider, among other things, the matters set forth in "Risk Factors" herein, on page S-1 of the accompanying Equity Index Underlying Supplement and page S-3 of the accompanying prospectus supplement, as the securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the securities. As used herein, references to the "Issuer", "HSBC", "we", "us" and "our" are to HSBC USA Inc.

You may access these documents on the SEC web site at www.sec.gov as follows:
