Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets ETF, due May 23, 2016

Principal at Risk Securities

The Trigger Jump Securities, which we refer to as the securities, will offer the opportunity to earn a return based on the performance of the shares of the iShares[®] MSCI Emerging Markets ETF. Unlike ordinary debt securities, the securities do not pay interest and do not guarantee the return of any principal at maturity. Instead, if the final share price on the valuation date is greater than the initial share price, you will receive, in addition to the principal amount, a positive return on the securities equal to at least 20%, which we refer to as the upside payment. The actual upside payment will be determined on the pricing date. If the final share price is less than or equal to the initial share price, but greater than or equal to the trigger price, you will receive the stated principal amount of the securities. However, if the final share price on the valuation date is *less than* the trigger price, you will receive a payment that is less than the stated principal amount by an amount that is proportionate to the percentage decrease in the final share price from the initial share price. This amount will be less than \$9 per \$10 in stated principal amount of the securities, and could be zero. **Accordingly, investors may lose their entire initial investment in the securities. The securities are for investors who seek an equity-based return and who are willing to risk their principal and forgo current income and appreciation above the fixed upside payment in exchange for the upside payment that only applies if the final share price is greater than the initial share price. All payments on the securities are subject to the credit risk of HSBC.**

INDICATIVE TERMS

Issuer:	HSBC USA Inc.
Reference asset:	Shares of the iShares [®] MSCI Emerging Markets ETF (the "index fund")
Aggregate principal amount:	\$
Stated principal amount:	\$10 per security
Issue price:	\$10 per security
Pricing date*:	May 16, 2014
Original issue date*:	May 21, 2014 (3 business days after the pricing date).
Maturity date*:	May 23, 2016, subject to adjustment as described under "Additional Terms of the Notes—Coupon Payment Dates, Call Payment Dates and Maturity Date" in the accompanying ETF Underlying Supplement.
Payment at maturity:	<ul style="list-style-type: none"> If the final share price is <i>greater than</i> the initial share price: \$10 + upside payment <i>In no event will the payment at maturity exceed the sum of \$10 and the upside payment.</i> If the final share price is <i>less than or equal to</i> the initial share price but <i>greater than or equal to</i> the trigger price: \$10 If the final share price is <i>less than</i> the trigger price: \$10 × share performance factor <i>This amount will be less than \$9 per \$10 in stated principal amount of the securities, and could be zero. You may lose all of your investment.</i>
Interest:	None
Upside payment:	At least \$2 per security (at least 20% of the stated principal amount). The actual upside payment will be determined on the pricing date.
Share performance factor:	final share price / initial share price
Trigger price:	90% of the initial share price
Initial share price:	The official closing price of one share of the reference asset on the pricing date
Final share price:	The official closing price of one share of the reference asset on the valuation date
Official closing price:	The official closing price on any scheduled trading day will be the closing price of the index fund on that day, as determined by the calculation agent based upon the value displayed on Bloomberg Professional [®] service page "EEM UP <EQUITY>", or any successor page on the Bloomberg Professional [®] service or any successor service, as applicable, subject to adjustment by the calculation agent as described under "Additional Terms of the Notes—Antidilution and Reorganization Adjustments" in the ETF Underlying Supplement.
Valuation date*:	May 18, 2016, subject to adjustment as described in "Additional Terms of the Notes—Valuation Dates" in the accompanying ETF Underlying Supplement.
Estimated initial value:	The estimated initial value of the securities will be less than the price you pay to purchase the securities. The estimated initial value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your securities in the secondary market, if any, at any time. The estimated initial value will be calculated on the pricing date and will be set forth in the pricing supplement to which this free writing prospectus relates. See "Risk Factors — The estimated initial value of the securities, which will be determined by us on the pricing date, will be less than the price to public and may differ from the market value of the securities in the secondary market, if any."
CUSIP:	40434C568
ISIN:	US40434C5682
Listing:	The securities will not be listed on any securities exchange.
Agent:	HSBC Securities (USA) Inc., an affiliate of HSBC. See "Additional Information about the Trigger Jump Securities—Additional Provisions—Supplemental plan of distribution (conflicts of interest)."

Commissions and issue price:	Price to public	Agent's commissions ⁽¹⁾	Proceeds to issuer
Per security	\$10	\$	\$
Total	\$	\$	\$

⁽¹⁾ HSBC Securities (USA) Inc., acting as agent for HSBC, will receive a fee of up to \$0.225 per \$10 stated principal amount and will pay the entire fee to Morgan Stanley Wealth Management as a fixed sales commission of up to \$0.225 for each security they sell. See "Additional Information about the Trigger Jump Securities—Additional Provisions—Supplemental plan of distribution (conflicts of interest)" on page 12 of this free writing prospectus.

* The pricing date, original issue date and the other dates set forth above are subject to change, and will be set forth in the pricing supplement relating to the securities.

The estimated initial value of the securities on the pricing date is expected to be between \$9.55 and \$9.85 per security, which will be less than the price to public. The market value of the securities at any time will reflect many factors and cannot be predicted with accuracy. See "Estimated initial value" above and "Risk Factors" beginning on page 5 of this document for additional information.

An investment in the securities involves certain risks. See "Risk Factors" beginning on page 5 of this free writing prospectus, page S-2 of the ETF Underlying Supplement and page S-3 of the prospectus supplement.

Neither the U.S. Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved the securities, or determined that this free writing prospectus or the accompanying ETF Underlying Supplement, prospectus supplement or prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this document together with the related ETF Underlying Supplement, prospectus supplement and prospectus, each of which can be accessed via the hyperlinks below. Please also see "Additional Information about the Trigger Jump Securities" beginning on page 11 of this free writing prospectus.

The prospectus at: <http://www.sec.gov/Archives/edgar/data/83246/000104746912003148/a2208395z424b2.htm>

The securities are not deposit liabilities or other obligations of a bank and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency of the United States or any other jurisdiction, and involve investment risks, including possible loss of the principal amount invested due to the credit risk of HSBC.

Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets Index Fund, due May 23, 2016

Principal at Risk Securities

Investment Summary

Trigger Jump Securities

Principal at Risk Securities

The Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets ETF due May 23, 2016 (the “securities”) can be used:

- As an alternative to direct exposure to the reference asset that provides a fixed positive return of at least 20% if the reference asset have appreciated at all as of the valuation date.
- To enhance returns and potentially outperform the reference asset in a moderately bullish scenario.
- To obtain limited protection against the loss of principal if the final share price is less than the initial share price, but only so long as the final share price is greater or equal to the trigger price.

The securities are exposed on a 1 to 1 basis to any percentage decline of the final share price from the initial share price if the final share price is less than the trigger price. **Accordingly, investors may lose their entire initial investment in the securities.**

Maturity:	Approximately two years
Upside payment:	At least \$2 per security (at least 20% of the stated principal amount). The actual upside payment will be determined on the pricing date.
Trigger price:	90% of the initial share price
Interest:	None
Minimum payment at maturity:	None. Investors may lose their entire initial investment in the securities.

Key Investment Rationale

This approximately two-year investment does not pay interest, but offers a fixed positive return of at least 20% (to be determined on the pricing date) if the final share price on the valuation date is greater than the initial share price. The actual upside payment will be determined on the pricing date. If the final share price is less than or equal to the initial share price, but greater than or equal to the trigger price, you will receive the stated principal amount of the securities. However, if the final share price is less than the trigger price, the payment at maturity will be less than \$9 per \$10 in stated principal amount of the securities, and could be zero. **Accordingly, investors may lose their entire initial investment in the securities.**

Upside Scenario *The final share price value is greater than the initial share price.* In this scenario, we will pay at least \$12 per security (at least 120% of the stated principal amount), as determined on the pricing date. Accordingly, even if the final share price is significantly greater than the initial share price, your return at maturity will not exceed the return represented by the upside payment, and your return may be less than if you invested in the reference asset directly.

Par Scenario *The final share price is less than or equal to the initial share price but greater than or equal to the trigger price.* In this scenario, the payment at maturity for each security will be equal to the stated principal amount of \$10 per security.

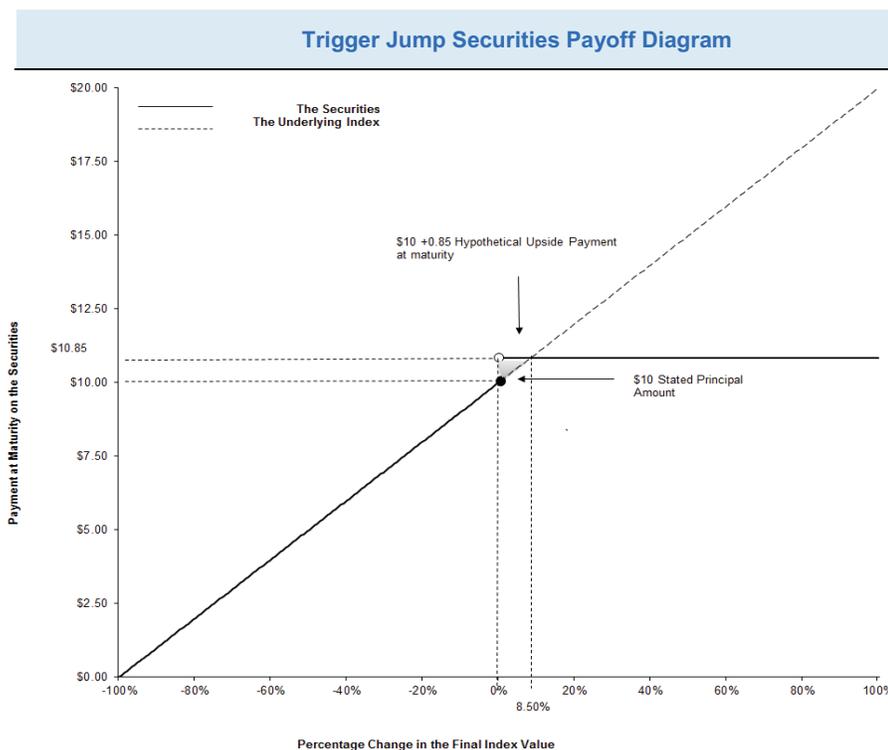

Downside Scenario *The final share price is less than the trigger price.* In this scenario, we will pay less than the stated principal amount of \$10 per security by an amount proportionate to the decrease in the price of the reference asset from the initial share price (e.g., a 40% depreciation in the reference asset will result in the payment at maturity of \$6 per security). There is no minimum payment at maturity.

How the Trigger Jump Securities Work

Payoff Diagram

The payoff diagram below illustrates the payment at maturity on the securities for a range of hypothetical percentage changes in the reference asset. The diagram assumes the following:

Stated principal amount:	\$10 per security
Hypothetical upside payment:	\$2 per security (20% of the stated principal amount). The actual upside payment will be at least \$2 per security (at least 20% of the stated principal amount) and will be determined on the pricing date.
Trigger price:	90% of the initial share price
Minimum payment at maturity:	None

How it works

- Upside Scenario:** If the final share price is **greater than** the initial share price, the payment at maturity on the securities is greater than the stated principal amount of \$10 per security, but in all cases is equal to and will not exceed the stated principal amount of \$10 per security plus the hypothetical upside payment of \$2 per security. Under the hypothetical terms of the securities, an investor would receive the payment at maturity of \$12 per security at any final share price greater than the initial share price. The actual upside payment will be determined on the pricing date.
- Par Scenario:** If the final share price is **less than or equal to** the initial share price but **greater than or equal to** the trigger price, an investor would receive the stated principal amount of \$10 per security at maturity.
- Downside Scenario:** If the final share price is **less than** the trigger price, the payment at maturity will be less than the stated principal amount of \$10 per security by an amount that is proportionate to the percentage decrease in the final share price from the initial share price. For example, if the reference asset have decreased by 25%, the payment at maturity would be \$7.50 per security (75% of the stated principal amount). There is no minimum payment at maturity on the securities.

Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets Index Fund, due May 23, 2016

Principal at Risk Securities

Risk Factors

We urge you to read the section “Risk Factors” on page S-3 in the accompanying prospectus supplement and on page S-2 of the ETF Underlying Supplement. Investing in the securities is not equivalent to investing directly in the reference asset. You should understand the risks of investing in the securities and should reach an investment decision only after careful consideration, with your advisors, of the suitability of the securities in light of your particular financial circumstances and the information set forth in this free writing prospectus and the accompanying ETF Underlying Supplement, prospectus supplement and prospectus.

In addition to the risks discussed below, you should review “Risk Factors” in the accompanying prospectus supplement and ETF Underlying Supplement, including the explanation of risks relating to the securities described in the following sections:

- “— Risks Relating to All Note Issuances” in the prospectus supplement;
- “—General Risks Related to Index Funds” in the ETF Underlying Supplement;
- “—Securities Prices Generally Are Subject To Political, Economic, Financial and Social Factors that Apply to the Markets in Which They Trade and, to a Lesser Extent, Foreign Markets” in the ETF Underlying Supplement; and
- “—Time Differences Between the Domestic and Foreign Markets and New York City May Create Discrepancies in the Trading Level or Price of the Notes” in the ETF Underlying Supplement.

You will be subject to significant risks not associated with conventional fixed-rate or floating-rate debt securities.

- **The securities do not pay interest or guarantee return of principal.** The terms of the securities differ from those of ordinary debt securities in that the securities do not pay interest or guarantee payment of the principal amount at maturity. At maturity, you will receive for each \$10 stated principal amount of securities that you hold, an amount in cash based on the final share price. If the final share price is less than the trigger price, you will receive for each security that you hold a payment at maturity that is less than the stated principal amount of each security by an amount proportionate to the decrease in the closing price of the reference asset, and in this scenario, you will lose money on your investment. **You may lose up to 100% of the stated principal amount of the securities.**
- **The appreciation potential of the securities is fixed and limited.** If the final share price is greater than the initial share price, the appreciation potential of the securities is limited to the fixed upside payment of at least \$2 per security (at least 20% of the stated principal amount), to be determined on the pricing date, even if the final share price is significantly greater than the initial share price. See “How the Trigger Jump Securities Work” above.
- **Credit risk of HSBC USA Inc.** The securities are senior unsecured debt obligations of the Issuer, HSBC, and are not, either directly or indirectly, an obligation of any third party. As further described in the accompanying prospectus supplement and prospectus, the securities will rank on par with all of the other unsecured and unsubordinated debt obligations of HSBC, except such obligations as may be preferred by operation of law. Any payment to be made on the securities depends on the ability of HSBC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of HSBC may affect the market value of the securities and, in the event HSBC were to default on its obligations, you may not receive the amounts owed to you under the terms of the securities and could lose your entire investment.
- **The market price of the securities will be influenced by many unpredictable factors.** Many factors will influence the value of the securities in the secondary market and the price at which HSBC Securities (USA) Inc. may be willing to purchase or sell the securities in the secondary market, including: the value, volatility and dividend yield, as applicable, of the reference asset and the securities held by the index fund, interest and yield rates, time remaining to maturity, geopolitical conditions and economic, financial, political and regulatory or judicial events and any actual or anticipated changes in our credit ratings or credit spreads. The price of the reference asset may be, and has recently been, volatile, and we can give you no assurance that the volatility will lessen. You may receive less, and possibly significantly less, than the stated principal amount per security if you sell your securities prior to maturity.
- **Investing in the securities is not equivalent to investing in the reference asset or the securities held by the reference asset.** Investing in the securities is not equivalent to investing in the reference asset, the MSCI Emerging Markets Index (the “underlying index”) or the securities held by the reference asset. Investors in the securities will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to the reference asset or any securities held by the reference asset.

Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets Index Fund, due May 23, 2016

Principal at Risk Securities

- **Adjustments to the reference asset or the underlying index could adversely affect the value of the securities.** The investment advisor to the index fund, BlackRock Fund Advisor (the “investment advisor”), seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the underlying index. Under its investment strategy or otherwise, the investment advisor may add, delete or substitute the securities held by the index fund. In addition, the publisher of the underlying index may add, delete or substitute the stocks constituting the underlying index or make other methodological changes that could change the level of the underlying index. Further, the publisher of the underlying index may discontinue or suspend calculation or publication of the underlying index at any time. Any such actions could affect the value of and the return on the securities.
- **The amount payable on the securities is not linked to the price of the reference asset at any time other than the valuation date.** The final share price will be based on the closing price of the reference asset on the valuation date, subject to adjustment for non-trading days and certain market disruption events. Even if the price of the reference asset increases prior to the valuation date but then decreases on the valuation date to below the trigger price, the payment at maturity will be less, and may be significantly less, than it would have been had the payment at maturity been linked to the price of the reference asset prior to that decrease. Although the actual price of the reference asset on the stated maturity date or at other times during the term of the securities may be higher than the final share price, the payment at maturity will be based solely on the closing price of the reference asset on the valuation date.
- **The estimated initial value of the securities, which will be determined by us on the pricing date, will be less than the price to public and may differ from the market value of the securities in the secondary market, if any.** The estimated initial value of the securities will be calculated by us on the pricing date and will be less than the price to public. The estimated initial value will reflect our internal funding rate, which is the borrowing rate we use to issue market-linked securities, as well as the mid-market value of the embedded derivatives in the securities. This internal funding rate is typically lower than the rate we would use when we issue conventional fixed or floating rate debt securities. As a result of the difference between our internal funding rate and the rate we would use when we issue conventional fixed or floating rate debt securities, the estimated initial value of the securities may be lower if it were based on the levels at which our fixed or floating rate debt securities trade in the secondary market. In addition, if we were to use the rate we use for our conventional fixed or floating rate debt issuances, we would expect the economic terms of the securities to be more favorable to you. We will determine the value of the embedded derivatives in the securities by reference to our or our affiliates’ internal pricing models. These pricing models consider certain assumptions and variables, which can include volatility and interest rates. Different pricing models and assumptions could provide valuations for the securities that are different from our estimated initial value. These pricing models rely in part on certain forecasts about future events, which may prove to be incorrect. The estimated initial value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your securities in the secondary market (if any exists) at any time.
- **The price of your securities in the secondary market, if any, immediately after the pricing date will be less than the price to public.** The price to public takes into account certain costs. These costs will include the underwriting discount, our affiliates’ projected hedging profits (which may or may not be realized) for assuming risks inherent in hedging our obligations under the securities, and the costs associated with structuring and hedging our obligations under the securities. These costs, except for the underwriting discount, will be used or retained by us or one of our affiliates. If you were to sell your securities in the secondary market, if any, the price you would receive for your securities may be less than the price you paid for them because secondary market prices will not take into account these costs. The price of your securities in the secondary market, if any, at any time after issuance will vary based on many factors, including the price of the reference asset and changes in market conditions, and cannot be predicted with accuracy. The securities are not designed to be short-term trading instruments, and you should, therefore, be able and willing to hold the securities to maturity. Any sale of the securities prior to maturity could result in a loss to you.
- **If HSBC Securities (USA) Inc. were to repurchase your securities immediately after the original issue date, the price you receive may be higher than the estimated initial value of the securities.** Assuming that all relevant factors remain constant after the original issue date, the price at which HSBC Securities (USA) Inc. may initially buy or sell the securities in the secondary market, if any, and the value that we may initially use for customer account statements, if we provide any customer account statements at all, may exceed the estimated initial value on the pricing date for a temporary period expected to be approximately six months after the original issue date. This temporary price difference may exist because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the securities and other costs in connection with the securities that we will no longer expect to incur over the term of the securities. We will make such discretionary election and determine this temporary reimbursement period on the basis of a number of factors, including the tenor of the securities and any agreement we may have with the distributors of the

Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets Index Fund, due May 23, 2016

Principal at Risk Securities

securities. The amount of our estimated costs which we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the original issue date of the securities based on changes in market conditions and other factors that cannot be predicted.

- **Risks associated with non-U.S. companies.** The value of the index fund depends upon the stocks of non-U.S. companies, and thus involves risks associated with the home countries of those non-U.S. companies. The prices of these non-U.S. stocks may be affected by political, economic, financial and social factors in the home country of each applicable company, including changes in that country's government, economic and fiscal policies, currency exchange laws or other laws or restrictions, which could affect the value of the securities. These foreign securities may have less liquidity and could be more volatile than many of the securities traded in U.S. or other securities markets. Direct or indirect government intervention to stabilize the relevant foreign securities markets, as well as cross shareholdings in foreign companies, may affect trading levels or prices and volumes in those markets. The other special risks associated with foreign securities may include, but are not limited to: less liquidity and smaller market capitalizations; less rigorous regulation of securities markets; different accounting and disclosure standards; governmental interference; currency fluctuations; higher inflation; and social, economic and political uncertainties. These factors may adversely affect the performance of the index fund and, as a result, the value of the securities.
- **There are risks associated with emerging markets.** An investment in the securities will involve risks not generally associated with investments which have no emerging market component. In particular, many emerging nations are undergoing rapid change, involving the restructuring of economic, political, financial and legal systems. Regulatory and tax environments may be subject to change without review or appeal. Many emerging markets suffer from underdevelopment of capital markets and tax regulation. The risk of expropriation and nationalization remains a threat. Guarding against these risks may be made more difficult by low levels of corporate disclosure and unreliability of economic and financial data.
- **The securities will not be adjusted for changes in exchange rates.** Although the equity securities composing the underlying index are traded in currencies other than U.S. dollars, and your securities are denominated in U.S. dollars, the amount payable on your securities at maturity, if any, will not be adjusted for changes in the exchange rates between the U.S. dollar and the currencies in which these non-U.S. equity securities are denominated. Changes in exchange rates, however, may also reflect changes in the applicable non-U.S. economies that in turn may affect the price of the reference asset, and therefore your securities. The amount we pay in respect of your securities on the maturity date, if any, will be determined solely in accordance with the procedures described in this free writing prospectus.
- **The securities will not be listed on any securities exchange and secondary trading may be limited.** The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. HSBC Securities (USA) Inc. may, but is not obligated to, make a market in the securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the securities easily. Because we do not expect that other broker dealers will participate significantly in the secondary market for the securities, the price at which you may be able to trade your securities is likely to depend on the price, if any, at which HSBC Securities (USA) Inc. is willing to transact. If, at any time, HSBC Securities (USA) Inc. were to cease making a market in the securities, it is likely that there would be no secondary market for the securities. Accordingly, you should be willing to hold your securities to maturity.
- **Hedging and trading activity by our affiliates could potentially affect the value of the securities.** One or more of our affiliates expect to carry out hedging activities related to the securities (and possibly to other instruments linked to the reference asset or its component securities), including trading in the reference asset or securities held by the index fund as well as in other instruments related to the reference asset. Some of our affiliates also trade the reference asset or securities held by the index fund and other financial instruments related to the reference asset on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the pricing date could potentially increase the initial share price and, therefore, could increase the level at which the reference asset must close so that an investor does not suffer a loss on the investor's initial investment in the securities. Additionally, such hedging or trading activities during the term of the securities, including on the valuation date, could adversely affect the price of the reference asset on the valuation date and, accordingly, the amount of cash, if any, an investor will receive at maturity.
- **The calculation agent, which is HSBC or one of its affiliates, will make determinations with respect to the securities.** As calculation agent, HSBC or one of its affiliates will determine the initial share price, the trigger price and the final share price, and will calculate the amount of cash, if any, you will receive at maturity. Determinations made by HSBC or one of its affiliates in its capacity as calculation agent, including with respect to the occurrence or non-occurrence of market disruption events and the anti-dilution and reorganization adjustments to the reference asset, may adversely affect the payout to you at

Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets Index Fund, due May 23, 2016

Principal at Risk Securities

maturity. Although the calculation agent will make all determinations and take all action in relation to the securities in good faith, it should be noted that such discretion could have an impact (positive or negative) on the value of your securities. The calculation agent is under no obligation to consider your interests as a holder of the securities in taking any actions, including the determination of the initial share price, that might affect the value of your securities.

- **The securities are not insured or guaranteed by any governmental agency of the United States or any other jurisdiction.** The securities are not deposit liabilities or other obligations of a bank and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency or program of the United States or any other jurisdiction. An investment in the securities is subject to the credit risk of HSBC, and in the event that HSBC is unable to pay its obligations as they become due, you may not receive the full payment at maturity of the securities.
- **The U.S. federal income tax consequences of an investment in the securities are uncertain.** For a discussion of certain of the U.S. federal income tax consequences of your investment in a security, please see the discussion under “Tax considerations” herein, and the discussion under “Additional Information About the Trigger Jump Securities—Additional Provisions—Tax Considerations” in the accompanying prospectus supplement.

The iShares® MSCI Emerging Markets ETF

The iShares® MSCI Emerging Markets ETF seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the MSCI Emerging Markets Index. The MSCI Emerging Markets Index is intended to measure the performance of equity markets in the global emerging markets. As of March 31, 2014, the MSCI Emerging Markets Index consisted of the following 21 component country indices: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, South Korea, Malaysia, Mexico, Peru, Philippines, Poland, Russia, South Africa, Taiwan, Thailand and Turkey.

Information as of market close on April 30, 2014:

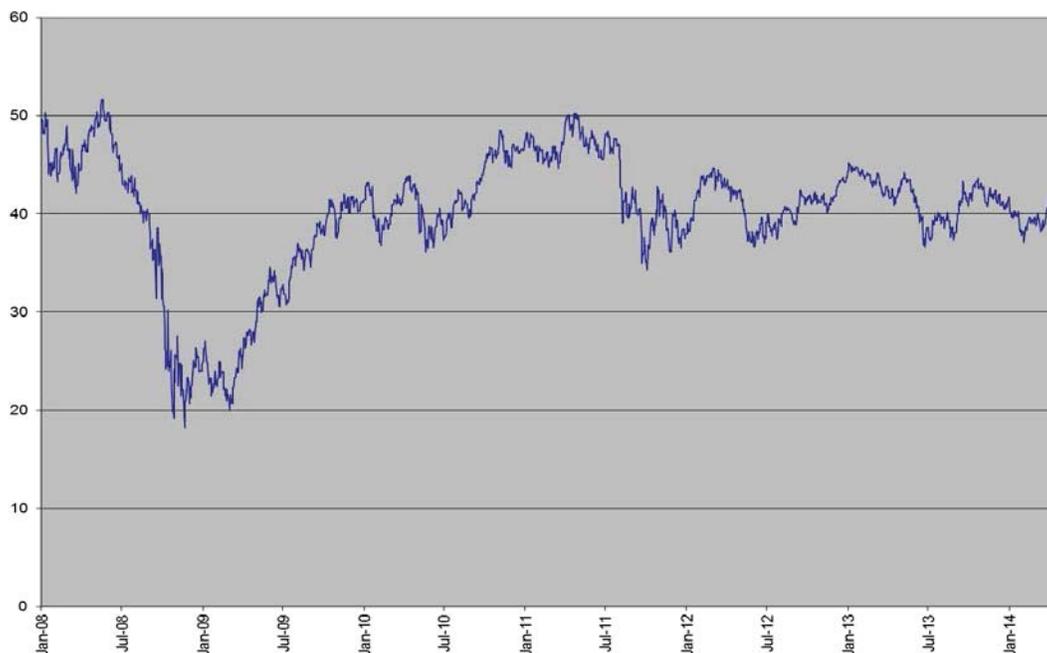

Bloomberg Ticker Symbol:	EEM		
Current Share Closing Price:	\$41.33	52 Week High (on 5/8/2013):	\$44.23
52 Weeks Ago:	\$42.68	52 Week Low (on 6/24/13):	\$36.63

For more information about the EEM, see “The iShares® MSCI Emerging Markets Index Fund” beginning on page S-21 of the accompanying ETF Underlying Supplement.

Historical Information

The following graph sets forth the historical performance of the reference asset based on the daily historical closing prices from January 1, 2008 through April 30 2014. The related table sets forth the published high and low closing values, as well as end-of-quarter closing values, of the reference asset for each quarter in the same period. The closing price for the reference asset on April 30, 2014 was \$41.33. We obtained the closing prices below from the Bloomberg Professional® service. We have not independently verified the accuracy or completeness of the information obtained from the Bloomberg Professional® service. The historical prices of the reference asset should not be taken as an indication of future performance, and no assurance can be given as to the price of the reference asset on the valuation date.

Second Quarter	\$44.26	\$36.16	\$38.57
Third Quarter	\$43.32	\$36.98	\$40.77
Fourth Quarter	\$43.91	\$40.15	\$41.77
2014			
First Quarter	\$41.25	\$37.06	\$40.99
Second Quarter (through April 30, 2014)*	\$42.46	\$40.55	\$41.33

* The information set forth above for the second calendar quarter of 2014 includes data for the period from April 1, 2014 through April 30, 2014. Accordingly, the "Quarterly High," "Quarterly Low" and "Quarterly Close" data indicated are for this shortened period only and do not reflect complete data for the second calendar quarter of 2014.

Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets Index Fund, due May 23, 2016
Principal at Risk Securities

Additional Information About the Trigger Jump Securities

Please read this information in conjunction with the other terms set forth in this document.

Additional Provisions

Listing: The securities will not be listed on any securities exchange.

CUSIP: 40434C568

ISIN: US40434C5682

Minimum ticketing size: \$1,000/100 securities

Tax considerations:

There is no direct legal authority as to the proper tax treatment of the securities, and therefore significant aspects of the tax treatment of the securities are uncertain as to both the timing and character of any inclusion in income in respect of the securities. Under one approach, the securities could be treated as pre-paid executory contracts with respect to the reference asset. We intend to treat the securities consistent with this approach. Pursuant to the terms of the securities, you agree to treat the securities under this approach for all U.S. federal income tax purposes. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Morrison & Foerster LLP, it is reasonable to treat the securities as pre-paid executory contracts with respect to the reference asset. Pursuant to this approach and subject to the discussion below regarding “constructive ownership transactions”, we do not intend to report any income or gain with respect to the securities prior to maturity or an earlier sale or exchange and we intend to treat any gain or loss upon maturity or an earlier sale or exchange as long-term capital gain or loss, provided that you have held the securities for more than one year at such time for U.S. federal income tax purposes.

Despite the foregoing, U.S. holders (as defined under “U.S. Federal Income Tax Considerations” in the accompanying prospectus supplement) should be aware that the Internal Revenue Code of 1986, as amended (the “Code”), contains a provision, Section 1260 of the Code, which sets forth rules which are applicable to what it refers to as “constructive ownership transactions.” Due to the manner in which it is drafted, the precise applicability of Section 1260 of the Code to any particular transaction is often uncertain. In general, a “constructive ownership transaction” includes a contract under which an investor will receive payment equal to or credit for the future value of any equity interest in a regulated investment company (such as shares of the EEM (the “Underlying Shares”). Under the “constructive ownership” rules, if an investment in the security is treated as a “constructive ownership transaction,” any long-term capital gain recognized by a U.S. holder in respect of a security will be recharacterized as ordinary income to the extent such gain exceeds the amount of “net underlying long-term capital gain” (as defined in Section 1260 of the Code) of the U.S. holder determined as if the U.S. holder had acquired a pro rata portion of the Underlying Shares on the original issue date of the security at fair market value and sold them at fair market value on the Maturity Date (if the security was held until the Maturity Date) or on the date of sale or exchange of the security (if the security was sold or exchanged prior to the Maturity Date) (the “Excess Gain”). In addition, an interest charge will also apply to any deemed underpayment of tax in respect of any Excess Gain to the extent such gain would have resulted in gross income inclusion for the U.S. holder in taxable years prior to the taxable year of the sale, exchange or maturity of the security (assuming such income accrued at a constant rate equal to the applicable federal rate as of the date of sale, exchange or maturity of the security).

Although the matter is not clear, there exists a risk that an investment in the securities will be treated as a “constructive ownership transaction.” If such treatment applies, it is not entirely clear to what extent any long-term capital gain recognized by a U.S. holder in respect of a security will be recharacterized as ordinary income. It is possible, for example, that the amount of the Excess Gain (if any) that would be recharacterized as ordinary income in respect of the security will equal the excess of (i) any long-term capital gain recognized by the U.S. holder in respect of the security over (ii) the “net underlying long-term capital gain” such U.S. holder would have had if such U.S. holder had acquired a pro rata number of the Underlying Shares at fair market value on the original issue date of the security for an amount equal to the pro rata portion of the “issue price” of the security and, upon the date of sale, exchange or maturity of the security, sold such Underlying Shares at fair market value (which would reflect the percentage increase in the value of the Underlying Shares over the term of the security). Accordingly, U.S. holders should consult their tax advisors regarding the potential application of the “constructive ownership” rules.

In Notice 2008-2, the Internal Revenue Service and the U.S. Treasury Department requested comments as to whether the purchaser of certain securities (which may include the securities) should be required to accrue income during its term under a mark-to-market, accrual or other methodology, whether income and gain on such a security or contract should be ordinary or capital,

Trigger Jump Securities Based on the Performance of the iShares[®] MSCI Emerging Markets Index Fund, due May 23, 2016

Principal at Risk Securities

and whether foreign holders should be subject to withholding tax on any deemed income accrual. Accordingly, it is possible that regulations or other guidance could provide that a U.S. holder (as defined in the accompanying prospectus supplement) of a security is required to accrue income in respect of the security prior to the receipt of payments under the security or its earlier sale or exchange. Moreover, it is possible that any such regulations or other guidance could treat all income and gain of a U.S. holder in respect of a security as ordinary income (including gain on a sale or exchange). Finally, it is possible that a non-U.S. holder (as defined in the accompanying prospectus supplement) of a security could be subject to U.S. withholding tax in respect of a security. It is unclear whether any regulations or other guidance would apply to the securities (possibly on a retroactive basis). Prospective investors are urged to consult with their tax advisors regarding Notice 2008-2 and the possible effect to them of the issuance of regulations or other guidance that affects the U.S. federal income tax treatment of the securities.

We will not attempt to ascertain whether any of the entities whose stock is included in, or owned by, the reference asset, as the case may be, would be treated as a passive foreign investment company ("PFIC") or United States real property holding corporation ("USRPHC"), both as defined for U.S. federal income tax purposes. If one or more of the entities whose stock is included in, or owned by, the reference asset, as the case may be, were so treated, certain adverse U.S. federal income tax consequences might apply. You should refer to information filed with the SEC and other authorities by the entities whose stock is included in, or owned by, the reference asset, as the case may be, and consult your tax advisor regarding the possible consequences to you if one or more of the entities whose stock is included in, or owned by, the reference asset, as the case may be, is or becomes a PFIC or a USRPHC.

Withholding and reporting requirements under the legislation enacted on March 18, 2010 (as discussed beginning on page S-48 of the prospectus supplement) will generally apply to payments made after June 30, 2014. However, this withholding tax will not be imposed on payments pursuant to obligations outstanding on July 1, 2014. Additionally, withholding due to any payment or deemed payment being treated as a "dividend equivalent" (as discussed beginning on page S-47 of the prospectus supplement) will begin no earlier than January 1, 2016. However, the Treasury Department and the Internal Revenue Service have announced that they intend to limit this withholding to equity-linked instruments issued on or after the date that is 90 days after the date of publication in the U.S. Federal Register of final regulations addressing dividend equivalent withholding. Holders are urged to consult with their own tax advisors regarding the possible implications of this legislation on their investment in the security.

For a further discussion of U.S. federal income tax consequences related to the securities, see the section "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement.

Calculation agent: HSBC USA Inc., or one of its affiliates.

Business day: A "business day" means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions are authorized or required by law or regulation to close in the City of New York.

Payment when offices or settlement systems are closed: If any payment is due on the securities on a day that would otherwise be a "business day" but is a day on which the office of a paying agent or a settlement system is closed, we will make the payment on the next business day when that paying agent or system is open. Any such payment will be deemed to have been made on the original due date, and no additional payment will be made on account of the delay.

Events of default and acceleration: If the securities have become immediately due and payable following an event of default (as defined in the accompanying prospectus) with respect to the securities, the calculation agent will determine the accelerated payment due and payable at maturity in the same general manner as described in this free writing prospectus. In that case, the scheduled trading day preceding the date of acceleration will be used as the valuation date for purposes of determining the final share price. If a market disruption event exists with respect to the reference asset on that scheduled trading day, then the accelerated valuation date will be postponed for up to five scheduled trading days (in the same manner used for postponing the originally scheduled final valuation date). The accelerated maturity date will also be postponed by an equal number of business days.

If the securities have become immediately due and payable following an event of default, you will not be entitled to any additional payments with respect to the securities. For more information, see "Description of Debt Securities—Senior Debt Securities — Events of Default" in the accompanying prospectus.

Supplemental plan of distribution (conflicts of interest): Pursuant to the terms of a distribution agreement, HSBC Securities (USA) Inc., an affiliate of HSBC, will purchase the securities from HSBC for distribution to Morgan Stanley Wealth Management. HSBC Securities (USA) Inc. will act as agent for the securities and will receive a fee of up to \$0.225 per \$10 stated principal amount and will pay the entire fee to Morgan Stanley Wealth Management as a fixed sales commission of up to \$0.225 for each security they sell.

In addition, HSBC Securities (USA) Inc. or another of its affiliates or agents may use the pricing supplement to which this free writing prospectus relates in market-making transactions after the initial sale of the securities, but is under no obligation to do so and may discontinue any market-making activities at any time without notice.

Principal at Risk Securities

See "Supplemental Plan of Distribution" on page S-52 in the prospectus supplement.

Where you can find more information:

This free writing prospectus relates to an offering of securities linked to the reference asset. The purchaser of the securities will acquire a senior unsecured debt security of HSBC USA Inc. We reserve the right to withdraw, cancel or modify this offering and to reject orders in whole or in part. Although the offering of securities relates to the reference asset, you should not construe that fact as a recommendation as to the merits of acquiring an investment linked to the reference asset or any component security held by the reference asset or as to the suitability of an investment in the securities.

You should read this document together with the prospectus dated March 22, 2012, the prospectus supplement dated March 22, 2012, and the ETF Underlying Supplement dated March 22, 2012. If the terms of the securities offered hereby are inconsistent with those described in the accompanying prospectus, prospectus supplement or ETF Underlying Supplement, the terms described in this free writing prospectus shall control. You should carefully consider, among other things, the matters set forth in "Risk Factors" herein, beginning on page S-2 of the accompanying ETF Underlying Supplement and page S-3 of the accompanying prospectus supplement, as the securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the securities. As used herein, references to the "Issuer", "HSBC", "we", "us" and "our" are to HSBC USA Inc.

HSBC has filed a registration statement (including a prospectus, a prospectus supplement and ETF Underlying Supplement) with the SEC for the offering to which this free writing prospectus relates. Before you invest, you should read the prospectus, prospectus supplement and ETF Underlying Supplement in that registration statement and other documents HSBC has filed with the SEC for more complete information about HSBC and this offering. You may get these documents for free by visiting EDGAR on the SEC's web site at www.sec.gov. Alternatively, HSBC Securities (USA) Inc. or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement and ETF Underlying Supplement if you request them by calling toll-free 1-866-811-8049.

You may access these documents on the SEC web site at www.sec.gov as follows:

The ETF underlying supplement at:

http://www.sec.gov/Archives/edgar/data/83246/000114420412016689/v306692_424b2.htm

The prospectus supplement at:

<http://www.sec.gov/Archives/edgar/data/83246/000104746912003151/a2208335z424b2.htm>

The prospectus at:
