

ACCELERATED RETURN NOTES[®] (ARNs[®])

	Accelerated Return Notes [®] Linked to the STOXX [®] Europe 600 Banks Index
Issuer	HSBC USA Inc. ("HSBC")
Principal Amount	\$10.00 per unit
Term	Approximately 14 months
Market Measure	STOXX [®] Europe 600 Banks Index (Bloomberg symbol: "SX7P")
Payout Profile at Maturity	<ul style="list-style-type: none"> • 3-to-1 upside exposure to increases in the Market Measure, subject to the Capped Value • 1-to-1 downside exposure to decreases in the Market Measure, with 100% of your investment at risk
Capped Value	[\$11.30 - \$11.70] per unit, a [13% - 17%] return over the principal amount, to be determined on the pricing date
Investment Considerations	This investment is designed for investors who anticipate that the Market Measure will increase moderately over the term of the notes, and are willing to accept a capped return, take full downside risk and forgo interim interest payments.
Preliminary Offering Documents	http://www.sec.gov/Archives/edgar/data/83246/000114420415034862/v412226_fwp.pdf
Exchange Listing	No

This graph reflects the hypothetical return on the notes, based on the mid-point of the range(s) set forth in the table to the left. This graph has been prepared for purposes of illustration only.

You should read the relevant Preliminary Offering Documents before you invest.

Risk Factors

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

- Depending on the performance of the Market Measure as measured shortly before the maturity date, your investment may result in a loss; there is no guaranteed return of principal.
- Payments on the notes, including repayment of principal, are subject to the credit risk of HSBC. If HSBC becomes insolvent or is unable to pay its obligations, you may lose your entire investment.
- Your investment return is limited to the return represented by the Capped Value and may be less than a comparable investment directly in the stocks included in the Market Measure.
- The estimated initial value of the notes on the pricing date will be less than their public offering price.
- If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the estimated initial value of the notes on the pricing date.
- You will have no rights of a holder of the securities represented by the Market Measure, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- Your return on the notes and the value of the notes may be affected by exchange rate movements and factors affecting the international securities markets, specifically changes within the Eurozone.
- The common stock of HSBC Holdings plc (the parent company of HSBC) is the largest component of the Market Measure and a limited number of stocks included in the Market Measure may affect its level.
- The stocks included in the Market Measure are concentrated in one sector, and adverse conditions in the financial sector may reduce your return on the notes.
- Economic conditions have adversely impacted the stock prices of many companies in the financial services sector, and may do so during the term of the notes.

Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.
