## Investment Description

- Linked to the Russell 2000® Index
- Unlike ordinary debt securities, the securities do not pay interest or repay a fixed amount of principal at maturity. Instead, the securities provide for a Payment at Maturity that may be greater than, equal to or less than the Principal Amount, depending on the performance of the Reference Asset from its Initial Level to its Final Level.

The Payment at Maturity will be calculated as follows:

### o If the level of the Reference Asset increases from the Initial Level to the Final Level:

You will receive the Principal Amount plus 200% participation in the upside performance of the Reference Asset, subject to a Maximum Cap of 11% to 14% (to be determined on the Pricing Date)

### o If the level of the Reference Asset does not change, or decreases but the decrease is not more than 7.50%, from the Initial Level to the Final Level:

You will be repaid the Principal Amount (zero return)

### o If the level of the Reference Asset decreases by more than 7.50% from the Initial Level to the Final Level:

You will receive less than the Principal Amount and will have 1-to-1 downside exposure to the decrease in the level of the Reference Asset in excess of 7.50%

- Investors may lose up to 92.50% of the Principal Amount
- All payments on the securities are subject to the credit risk of HSBC, and you will have no ability to pursue the issuers of any securities included in the Reference Asset for payment; if HSBC defaults on its obligations, you could lose some or all of your investment
- No periodic interest payments or dividends
- No exchange listing; designed to be held to maturity

\*To the extent that the Issuer makes any change to the expected Pricing Date or expected Original Issue Date, the Final Valuation Date and Maturity Date may also be changed in the Issuer's discretion to ensure that the term of the securities remains the same.

The Estimated Initial Value of the securities on the Pricing Date is expected to be between \$975 and \$995 per security, which will be less than the price to public. The market value of the securities at any time will reflect many factors and cannot be predicted with accuracy. The Estimated Initial Value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your securities in the secondary market, if any, at any time. The Estimated Initial Value will be calculated on the Pricing Date and will be set forth in the final pricing supplement. See "Risk Factors — The Estimated Initial Value of the securities, which will be determined by us on the Pricing Date, will be less than the price to public and may differ from the market value of the securities in the secondary market, if any" in the accompanying free writing prospectus.

**You should carefully consider, among other things, the matters set forth in "Risk Factors" in this term sheet, on page S-1 of the prospectus supplement and page S-2 of the Equity Index Underlying Supplement, as the securities involve risks not associated with conventional debt securities.**

**This introductory term sheet does not provide all of the information that an investor should consider prior to making an investment decision.**

Investors should carefully review the accompanying free writing prospectus, Equity Index Underlying Supplement, prospectus supplement and prospectus before making a decision to invest in the securities. Terms used herein without definition will have the meanings ascribed to them in the accompanying free writing prospectus.

0.00	-100.00%	\$75.00	-92.50%

Assumes a hypothetical Maximum Cap of 12.50% (the midpoint of the specified Maximum Cap range). Each security has a Principal Amount of \$1,000.

<sup>(1)</sup> The hypothetical Initial Level. The actual Initial Level will be determined on the Pricing Date.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive at stated maturity will depend on the actual Initial Level, Final Level and Maximum Cap.

## How the Payment at Maturity Is Calculated

On the Maturity Date, for each security you hold, we will pay you the Payment at Maturity, which is an amount in cash, calculated as follows:

- If the Reference Return is greater than zero, you will receive a cash payment on the Maturity Date, per \$1,000 Principal Amount, equal to the lesser of:
  - (i)  $\$1,000 + (\$1,000 \times \text{Reference Return} \times \text{Upside Participation Rate})$ ; and
  - (ii)  $\$1,000 + (\$1,000 \times \text{Maximum Cap})$
- If the Reference Return is less than or equal to zero but greater than or equal to the Buffer Value, you will receive \$1,000 per \$1,000 Principal Amount (zero return)
- If the Reference Return is less than the Buffer Value, you will receive a cash payment on the Maturity Date, per \$1,000 Principal Amount, calculated as follows:

$$\$1,000 + [\$1,000 \times (\text{Reference Return} + 7.50\%)]$$

**If the Reference Return is less than the Buffer Value, you will lose some or a significant portion (up to 92.50%) of the Principal Amount.**

## Russell 2000® Index Daily Closing Levels\*

\*The graph above sets forth the daily Official Closing Levels of the Reference Asset for the period from January 1, 2008 to December 28, 2016. The Official Closing Level of the Reference Asset on December 28, 2016 was 1,360.825. The historical performance of the Reference Asset is not an indication of its future performance during the term of the securities.

## Risk Factors

The risks set forth below are discussed in detail in the “Risk Factors” section in the accompanying free writing prospectus and the accompanying Equity Index Underlying Supplement and prospectus supplement. Please review those risk disclosures carefully.

- Your investment in the securities may result in a loss.
- The return on the securities will be limited by the Maximum Cap and may be lower than the return on conventional debt securities or a direct investment in the Reference Asset.
- The Reference Return on the securities is not linked to the level of the Reference Asset at any time other than on the Final Valuation Date.
- Credit risk of HSBC USA Inc.
- The securities will not bear interest.
- Changes that affect the Reference Asset may affect the level of the Reference Asset and the market value of the securities and the amount you will receive at maturity.
- The securities are not insured or guaranteed by any governmental agency of the United States or any other jurisdiction.
- The Estimated Initial Value of the securities, which will be determined by us on the Pricing Date, will be less than the price to public and may differ from the market value of the securities in the secondary market, if any.

- The price of your securities in the secondary market, if any, immediately after the Pricing Date may be less than the price to public.
- If an agent were to repurchase your securities immediately after the Original Issue Date, the price you receive may be higher than the Estimated Initial Value of the securities.
- The securities lack liquidity.
- Potential conflicts of interest may exist.
- Historical levels of the Reference Asset should not be taken as an indication of its future performance during the term of the securities.
- The securities are subject to small-capitalization risk.
- The amount you will receive on the securities will depend upon the performance of the Reference Asset. Therefore, the securities are subject to the following risks, as set forth in the accompanying prospectus supplement or the Equity Index Underlying Supplement:
  - You must rely on your own evaluation of the merits of an investment in the notes;
  - The price at which you will be able to sell your notes prior to maturity will depend on a number of factors, and may be substantially less than the amount you had originally invested;
  - The notes are not insured against loss by any third parties; you can depend only on our earnings and assets for payment and interest, if any, on the notes;
  - Trading and other transactions by us or our affiliates could affect the trading level or price and/or level of the Reference Asset, the trading value of the notes or the amount you may receive at maturity;
  - Research reports and other transactions may create conflicts of interest between you and us;
  - Our trading, hedging and other business activities, and those of the agents, may create conflicts of interest with you;
  - Equity market risks may affect the trading value of the Notes and the amount due on the Notes;
  - As a holder of the Notes, you will not have any ownership interest or rights in the stocks or other securities tracked by an Index
  - We or our affiliates are not affiliated with any of the Reference Sponsors; and
  - Our or our affiliates business activities relating to the stocks or securities tracked by an equity index may create conflicts of interest with you.
- Uncertain tax treatment.

#### **Not suitable for all investors**

Investment suitability must be determined individually for each investor. The securities described herein are not a suitable investment for all investors. In particular, no investor should purchase the securities unless they understand and are able to bear the associated market, liquidity and yield risks. Unless market conditions and other relevant factors change significantly in your favor, a sale of the securities prior to maturity is likely to result in sale proceeds that are substantially less than the Principal Amount per security. None of HSBC Securities (USA) Inc., Wells Fargo Securities, or their respective affiliates are obligated to purchase the securities from you at any time prior to maturity.

HSBC has filed a registration statement (including a prospectus, prospectus supplement and Equity Index Underlying Supplement) with the Securities and Exchange Commission (the “SEC”) for the offering to which this free writing prospectus relates.
