

HSBC USA Inc.

Market Linked Securities

Market Linked Securities—Autocallable Securities with Contingent Coupon and Contingent Downside
Principal at Risk Securities Linked to the Lowest Performing of the S&P 500[®] Index, the Russell 2000[®] Index and the EURO STOXX 50[®] Index

Term Sheet to Pricing Supplement dated October 20, 2017

Summary of Terms

Issuer	HSBC USA Inc. ("HSBC")
Term	Approximately 4 years
Reference Asset	The S&P 500 [®] Index, the Russell 2000 [®] Index and the EURO STOXX 50 [®] Index (each, an "Underlying")
Principal Amount	\$1,000 per security / \$4,144,000 total aggregate principal amount
Pricing Date	October 20, 2017
Original Issue Date	October 25, 2017
Observation Dates	Quarterly, on the 20th of each January, April, July and October, commencing on January 22, 2018 and ending on October 20, 2021 (the "Final Valuation Date")
Call Observation Dates	The Observation Dates commencing on April 20, 2018 and ending on July 21, 2021
Maturity Date	October 25, 2021
Contingent Coupon	See "How to Determine If a Contingent Coupon Is Payable" on page 2
Contingent Coupon Rate	8.20% per annum
Automatic Call	See "How to Determine If the Securities Will Be Automatically Called" on page 2
Payment at Maturity per Security	See "How the Payment at Maturity Is Calculated" on page 2
Lowest Performing Underlying	The Underlying with the lowest Final Return
Final Return	With respect to each Underlying, $\frac{\text{Final Level} - \text{Initial Level}}{\text{Initial Level}}$
Initial Level	With respect to each Underlying, its Official Closing Level on the Pricing Date
Final Level	With respect to each Underlying, its Official Closing Level on the Final Valuation Date
Coupon Trigger/ Barrier Level	For each Underlying, 75% of its Initial Level
Calculation Agent	HSBC USA Inc., or one of its affiliates
Denominations	\$1,000 and any integral multiple of \$1,000
Agent Discount	2.175%, of which dealers, including those using the trade name Wells Fargo Advisors ("WFA"), may receive a selling concession of up to 1.50%, and WFA will receive a distribution expense fee of 0.075%
CUSIP	40435FJDo / US40435FJDo6

Investment Description

- Linked to the Lowest Performing of the S&P 500[®] Index, the Russell 2000[®] Index and the EURO STOXX 50[®] Index
- Unlike ordinary debt securities, the securities do not provide for fixed payments of interest, do not repay a fixed amount of principal at maturity and are subject to potential automatic call prior to maturity upon the terms described below. Whether the securities pay a Contingent Coupon, whether the securities are automatically called prior to maturity and, if they are not automatically called, the amount of the Payment at Maturity will depend in each case on the Official Closing Level of each Underlying or the Lowest Performing Underlying, as applicable, on the relevant Observation Date. The Lowest Performing Underlying is the Underlying with the lowest Final Return.
- Contingent Coupon:** If the Official Closing Level of **each** Underlying is greater than or equal to its Coupon Trigger on the relevant Observation Date, you will receive the Contingent Coupon applicable to that Observation Date. However, If the Official Closing Level of **any** Underlying is less than its Coupon Trigger on the relevant Observation Date, the Contingent Coupon applicable to that Observation Date will not be payable. You may not receive any Contingent Coupons over the term of the securities.
- Automatic Call:** If the Official Closing Level of **each** Underlying on any of the quarterly Call Observation Date is greater than or equal to its Initial Level, the securities will be automatically called for the Principal Amount plus the applicable Contingent Coupon. No further payments will be made on the securities once they have been called.
- Potential Loss of Principal:** If the securities are not automatically called prior to maturity and the Final Level of the Lowest Performing Underlying is greater than or equal to its Barrier Level, you will receive the Principal Amount plus the final Contingent Coupon. However, if the Final Level of the Lowest Performing Underlying is less than its Barrier Level, you will lose more than 25%, and possibly all, of the Principal Amount.
- All payments on the securities are subject to the credit risk of HSBC, and you will have no ability to pursue any securities included in any Underlying for payment; if HSBC defaults on its obligations, you could lose some or all of your investment
- No exchange listing; designed to be held to automatic call or maturity

The Estimated Initial Value of the securities on the Pricing Date is \$959 per security, which will be less than the price to public. The market value of the securities at any time will reflect many factors and cannot be predicted with accuracy. The Estimated Initial Value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your securities in the secondary market, if any, at any time. The Estimated Initial Value will be calculated on the Pricing Date and will be set forth in the final pricing supplement. See "Risk Factors — The Estimated Initial Value of the securities, which will be determined by us on the Pricing Date, will be less than the price to public and may differ from the market value of the securities in the secondary market, if any" in the accompanying free writing prospectus.

You should carefully consider, among other things, the matters set forth in "Risk Factors" in this term sheet, beginning on page PS-8 of the pricing supplement, page S-1 of the prospectus supplement and page S-2 of the Equity Index Underlying Supplement, as the securities involve risks not associated with conventional debt securities.

Investors should carefully review the accompanying pricing supplement, Equity Index Underlying Supplement, prospectus supplement and prospectus before making a decision to invest in the securities. Terms used herein without definition will have the meanings ascribed to them in the accompanying pricing supplement.

NOT A BANK DEPOSIT AND NOT INSURED OR GUARANTEED BY THE FDIC OR ANY OTHER GOVERNMENTAL AGENCY

How to Determine If a Contingent Coupon Is Payable

If the Official Closing Level of **each** Underlying is greater than or equal to its Coupon Trigger on the relevant Observation Date, you will receive the Contingent Coupon applicable to that Observation Date on the applicable Coupon Payment Date.

If the Official Closing Level of **any** Underlying is less than its Coupon Trigger on the relevant Observation Date, the Contingent Coupon applicable to that Observation Date will not be payable.

You may not receive any Contingent Coupons over the term of the securities.

Each quarterly Contingent Coupon payment, if payable, will be calculated per security as follows:

$$\$1,000 \times \text{Contingent Coupon Rate} \times (90 / 360)$$

The Contingent Coupon Rate is 8.20% per annum. Any Contingent Coupon payments will be rounded to the nearest cent, with one-half cent rounded upward.

How to Determine If the Securities Will Be Automatically Called

We will automatically call the securities if the Official Closing Level of **each** Underlying is at or above its Initial Level on any Call Observation Date. If the securities are automatically called, you will receive the Principal Amount plus the applicable Contingent Coupon on the corresponding Call Payment Date. No further payments will be made on the securities once they have been called.

How the Payment at Maturity Is Calculated

Unless the securities are automatically called, for each \$1,000 Principal Amount, you will receive a cash payment on the Maturity Date, calculated as follows:

■ **If the Final Level of the Lowest Performing Underlying is greater than or equal to its Barrier Level:**

$$\$1,000 + \text{final Contingent Coupon.}$$

■ **If the Final Level of the Lowest Performing Underlying is less than its Barrier Level:**

$$\$1,000 + (\$1,000 \times \text{Final Return of the Lowest Performing Underlying}).$$

If the securities are not automatically called prior to maturity and the Final Level of the Lowest Performing Underlying is less than its Barrier Level, you will lose more than 25%, and possibly all, of the Principal Amount. Even with any Contingent Coupons, your return on the securities may be negative.

The return on the securities will be limited to the Contingent Coupons, if any, paid during the term of the securities. You will not participate in any appreciation of any Underlying, but you will have full downside exposure to the Lowest Performing Underlying on the Final Valuation Date if the securities are not automatically called prior to maturity and the Final Level of the Lowest Performing Underlying is less than its Barrier Level.

Hypothetical Payout Profile

The profile to the right illustrates the hypothetical Payment at Maturity on the securities (excluding the final Contingent Coupon payment, if payable) for a range of hypothetical Final Returns of the Lowest Performing Underlying, assuming the securities have not been automatically called prior to the maturity.

This graph has been prepared for purposes of illustration only. Your actual Payment at Maturity will depend on the actual Final Return of the Lowest Performing Underlying, whether the securities are automatically called prior to maturity and whether you hold the securities to maturity. The performance of the better performing Underlyings is not relevant to the Payment at Maturity on the securities.

Hypothetical Returns

If the securities are automatically called: If the securities are automatically called prior to maturity, you will receive the Principal Amount plus the relevant Contingent Coupon on the relevant Call Payment Date. In the event the securities are automatically called, your total return on the securities will equal the return represented by the Contingent Coupons received on or prior to the Call Payment Date.

If the securities are not automatically called: If the securities are not automatically called prior to maturity, the following table illustrates, for a range of hypothetical Final Returns of the Lowest Performing Underlying, the hypothetical Payment at Maturity per security reflecting the Contingent Coupon Rate of 8.20% per annum.

Hypothetical Final Return of the Lowest Performing Underlying	Hypothetical Payment at Maturity (Excluding Any Contingent Coupons Payable on the Securities)
100.00%	\$1,000.00
80.00%	\$1,000.00
60.00%	\$1,000.00
40.00%	\$1,000.00
20.00%	\$1,000.00
0.00%	\$1,000.00
-10.00%	\$1,000.00
-20.00%	\$1,000.00
-25.00%	\$1,000.00
-30.00%	\$700.00
-40.00%	\$600.00
-50.00%	\$500.00
-60.00%	\$400.00
-70.00%	\$300.00
-80.00%	\$200.00
-100.00%	\$0.00

The above figures do not take into account any Contingent Coupons received on the securities. As noted above, any positive return on the securities will be limited to any Contingent Coupons received during the term of the securities.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. If the securities are not automatically called prior to maturity, the actual amount you will receive at maturity will depend on the actual Final Return of the Lowest Performing Underlying on the Final Valuation Date. The performance of the better performing Underlyings is not relevant to the Payment at Maturity on the securities.

S&P 500[®] Index Daily Closing Levels*

Russell 2000[®] Index Daily Closing Levels*

EURO STOXX 50[®] Index Daily Closing Levels*

*The graphs above set forth the daily Official Closing Levels of the Underlyings for the period from January 1, 2008 to October 20, 2017. The historical performance of any Underlying is not an indication of its future performance during the term of the securities.

Risk Factors

The risks set forth below are discussed in detail in the “Risk Factors” section in the accompanying pricing supplement and the accompanying Equity Index Underlying Supplement and prospectus supplement. Please review those risk disclosures carefully.

- The securities do not guarantee any return of principal and you may lose all of your Principal Amount at maturity.
- You may not receive any Contingent Coupons.
- Your return on the securities is limited to the Principal Amount plus the Contingent Coupons, if any, regardless of any appreciation in the level of any Underlying.
- The securities are subject to the credit risk of HSBC USA Inc.
- Changes that affect an Underlying may affect its level and the market value of the securities and the amount you will receive on the securities.
- If the securities are not called, your return will be based on the Final Return of the Lowest Performing Underlying.
- Since the securities are linked to the performance of more than one Underlying, you will be fully exposed to the risk of fluctuations in the level of each Underlying.
- The securities may be automatically called prior to the Maturity Date.
- The securities are not insured or guaranteed by any governmental agency of the United States or any other jurisdiction.
- The Estimated Initial Value of the securities, which was determined by us on the Pricing Date, is less than the price to public and may differ from the market value of the securities in the secondary market, if any.
- The price of your securities in the secondary market, if any, immediately after the Pricing Date may be less than the price to public.
- If an agent were to repurchase your securities immediately after the Original Issue Date, the price you receive may be higher than the Estimated Initial Value of the securities.
- The amount payable on the securities is not linked to the levels of the Underlyings at any time other than the Observation Dates, including the Final Valuation Date.
- The securities lack liquidity.
- Potential conflicts of interest may exist.
- The securities are subject to small-capitalization risk.
- Risks associated with non-U.S. companies.
- The securities will not be adjusted for changes in exchange rates.
- Historical levels of an Underlying should not be taken as an indication of its future performance during the term of the securities.
- The amount you will receive on the securities will depend upon the performance of the Underlyings. Therefore, the securities are subject to the following risks, as set forth in the accompanying prospectus supplement or the Equity Index Underlying Supplement:
 - You must rely on your own evaluation of the merits of an investment in the notes;
 - The price at which you will be able to sell your notes prior to maturity will depend on a number of factors, and may be substantially less than the amount you had originally invested;
 - The notes are not insured against loss by any third parties; you can depend only on our earnings and assets for payment and interest, if any, on the notes;
 - Trading and other transactions by us or our affiliates could affect the trading level or price and/or level of the Reference Asset, the trading value of the notes or the amount you may receive at maturity;
 - Research reports and other transactions may create conflicts of interest between you and us;
 - Our trading, hedging and other business activities, and those of the agents, may create conflicts of interest with you;
 - Equity market risks may affect the trading value of the Notes and the amount due on the Notes;
 - As a holder of the Notes, you will not have any ownership interest or rights in the stocks or other securities tracked by an Index
 - We or our affiliates are not affiliated with any of the Reference Sponsors;
 - Our or our affiliates business activities relating to the stocks or securities tracked by an equity index may create conflicts of interest with you;
 - Securities prices generally are subject to political, economic, financial and social factors that apply to the markets in which they trade and, to a lesser extent, foreign markets; and
 - Time differences between the domestic and foreign markets and New York City may create discrepancies in the trading level or price of the Notes.
- Uncertain tax treatment.

Not suitable for all investors

Investment suitability must be determined individually for each investor. The securities described herein are not a suitable investment for all investors. In particular, no investor should purchase the securities unless they understand and are able to bear the associated market, liquidity and yield risks. Unless market conditions and other relevant factors change significantly in your favor, a sale of the securities prior to maturity is likely to result in sale proceeds that are substantially less than the Principal Amount per security. None of HSBC Securities (USA) Inc., Wells Fargo Securities, or their respective affiliates are obligated to purchase the securities from you at any time prior to maturity.

HSBC has filed a registration statement (No. 333-202524) (including a prospectus, prospectus supplement, Equity Index Underlying Supplement and pricing supplement) with the Securities and Exchange Commission (the “SEC”) for the offering to which this document relates. You should read the prospectus, prospectus supplement and Equity Index Underlying Supplement in that registration statement, the pricing supplement, and other documents HSBC has filed with the SEC for more complete information about HSBC and this offering. You may get these documents for free by visiting EDGAR on the SEC’s web site at www.sec.gov. Alternatively, HSBC Securities (USA) Inc. or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement, Equity Index Underlying Supplement and pricing supplement if you request them by calling toll-free 1-866-811-8049.

You may access these documents on the SEC web site at www.sec.gov as follows:
