

HSBC USA Inc.

Autocallable Contingent Income Barrier Notes

Linked to the Least Performing of the Russell 2000[®] Index, S&P 500[®] Index, and EURO STOXX 50[®] Index

- ▶ Quarterly contingent coupon payments at a rate of at least 1.00% (equivalent to at least 4.00% per annum) (to be determined on the Pricing Date), payable if the closing level of each Underlying on the applicable Coupon Observation Date is greater than or equal to 50.00% of its Initial Level
- ▶ Callable quarterly at the principal amount plus the applicable contingent coupon on any Call Observation Date on or after March 25, 2020 if the closing level of each Underlying is at or above its Initial Level
- ▶ If the Notes are not called and the Least Performing Underlying declines by more than 50.00%, there is full exposure to declines in the Least Performing Underlying, and you will lose all or a portion of your principal amount.
- ▶ Approximate 2.5 year term if not called prior to maturity
- ▶ All payments on the notes are subject to the credit risk of HSBC USA Inc.

The Autocallable Contingent Income Barrier Notes (each a "Note" and collectively the "Notes") offered hereunder will not be listed on any securities exchange or automated quotation system.

Neither the U.S. Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the Notes or passed upon the accuracy or the adequacy of this document, the accompanying prospectus, prospectus supplement or Equity Index Underlying Supplement. Any representation to the contrary is a criminal offense.

We have appointed HSBC Securities (USA) Inc., an affiliate of ours, as the agent for the sale of the Notes. HSBC Securities (USA) Inc. will purchase the Notes from us for distribution to other registered broker-dealers or will offer the Notes directly to investors. In addition, HSBC Securities (USA) Inc. or another of its affiliates or agents may use the pricing supplement to which this free writing prospectus relates in market-making transactions in any Notes after their initial sale. Unless we or our agent inform you otherwise in the confirmation of sale, the pricing supplement to which this free writing prospectus relates is being used in a market-making transaction. See "Supplemental Plan of Distribution (Conflicts of Interest)" on page FWP-17 of this free writing prospectus.

Investment in the Notes involves certain risks. You should refer to "Risk Factors" beginning on page FWP-8 of this document, page S-1 of the accompanying prospectus supplement and page S-1 of the accompanying Equity Index Underlying Supplement.

The Estimated Initial Value of the Notes on the Pricing Date is expected to be between \$945.00 and \$975.00 per Note, which will be less than the price to public. The market value of the Notes at any time will reflect many factors and cannot be predicted with accuracy. See "Estimated Initial Value" on page FWP-5 and "Risk Factors" beginning on page FWP-8 of this document for additional information.

	Price to Public	Underwriting Discount ¹	Proceeds to Issuer
Per security	\$1,000		
Total			

¹HSBC USA Inc. or one of our affiliates may pay varying underwriting discounts of up to 1.15% and a structuring fee of 0.40% per \$1,000 Principal Amount of Notes in connection with the distribution of the Notes to other registered broker-dealers. See "Supplemental Plan of Distribution (Conflicts of Interest)" on page FWP-17 of this free writing prospectus.

The Notes:		
Are Not FDIC Insured	Are Not Bank Guaranteed	May Lose Value

Indicative Terms⁽¹⁾

Principal Amount	\$1,000 per Note
Term	Approximate 2.5 year term if not called prior to maturity.
Reference Asset	The Russell 2000 [®] Index (Ticker: RTY), the S&P 500 [®] Index (Ticker: SPX), and the EURO STOXX 50 [®] Index (Ticker: SX5E) (each an "Underlying" and together the "Underlyings")
Call Feature	The Notes will be automatically called if the Official Closing Level of each Underlying is at or above its Initial Level on any Call Observation Date on or after March 25, 2020. ⁽²⁾ In that case, you will receive a cash payment, per \$1,000 Principal Amount of Notes, equal to the Principal Amount plus the coupon payment payable on the corresponding Call Payment Date ²
Contingent Coupon Rate	At least 1.00% per quarter (equivalent to at least 4.00% per annum) (to be determined on the Pricing Date)
Contingent Coupon	If the Official Closing Level of each Underlying is greater than or equal to its Coupon Trigger on a Coupon Observation Date: we will pay you the Contingent Coupon. If the Official Closing Level of any Underlying is less than its Coupon Trigger on a Coupon Observation Date: the Contingent Coupon applicable to such Coupon Observation Date will not be payable and we will not make any payment to you on the relevant Coupon Payment Date.
Coupon Trigger	With respect to each Underlying, 50.00% of its Initial Level
Barrier Level	With respect to each Underlying, 50.00% of its Initial Level
Payment at Maturity per Note	Unless the Notes are automatically called, for each \$1,000 Principal Amount, you will receive a cash payment on the Maturity Date, calculated as follows: ■ If the Reference Return of each Underlying is greater than or equal to -50.00%: \$1,000 + final Contingent Coupon ■ If the Reference Return of any Underlying is less than -50.00%: \$1,000 + (\$1,000 × Reference Return of the Least Performing Underlying). If the Notes are not automatically called and the Final Level of the Least Performing Underlying is less than its Barrier Level, you will lose up to 100% of the Principal Amount at maturity.
Reference Return	With respect to each Underlying, $\frac{\text{Final Level} - \text{Initial Level}}{\text{Initial Level}}$
Least Performing Underlying	The Underlying with the lowest Reference Return
Trade Date	March 8, 2019
Pricing Date	March 8, 2019
Original Issue Date	March 15, 2019
Final Valuation Date⁽³⁾	September 24, 2021
Maturity Date⁽³⁾	September 29, 2021
CUSIP/ISIN	40435UHX5 / US40435UHX54

⁽¹⁾ As more fully described on page FWP-4.

⁽²⁾ See page FWP-5 for Call Observation Dates, Call Payment Dates, Coupon Observation Dates and Coupon Payment Dates.

⁽³⁾ Subject to postponement as described under "Additional Terms of the Notes" in the accompanying Equity Index Underlying Supplement

The Notes

The Notes may be suitable for investors who believe that the level of the Underlyings will not decrease significantly over the term of the Notes. So long as the Official Closing Level of each Underlying on a Coupon Observation Date is greater than or equal to its Coupon Trigger, you will receive the quarterly Contingent Coupon on the applicable Coupon Payment Date.

If the Official Closing Level of each Underlying is at or above its Initial Level on any Call Observation Date beginning on March 25, 2020, your Notes will be automatically called and you will receive a payment equal to 100% of the Principal Amount, together with the applicable Contingent Coupon on the corresponding Call Payment Date.

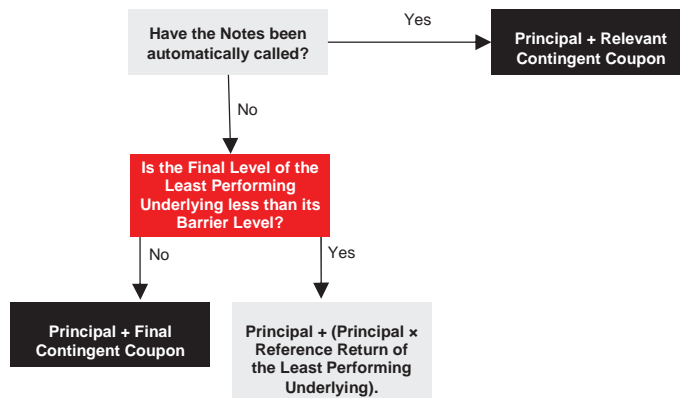

If the Notes are not automatically called and the Final Level of each Underlying is greater than or equal to its Barrier Level, you will receive a Payment at Maturity equal to the Principal Amount of the Notes plus the final Contingent Coupon.

If the Notes are not automatically called and the Final Level of any Underlying is less than its Barrier Level, you will lose 1% of your principal for every 1% decline in level of that Least Performing Underlying. In that case, you will lose up to 100% of the Principal Amount at maturity. Even with any Contingent Coupons, your return on the Notes will be negative.

Illustration of Payment Scenarios

Your payment on the Notes will depend on whether the Notes have been automatically called, whether the Official Closing Level of each Underlying on a Coupon Observation Date is greater than or equal to its Coupon Trigger, and whether the Final Level of the Least Performing Underlying is greater than or equal to its Barrier Level. If your Notes are not automatically called, you will lose some or all of your Principal Amount at maturity if the Final Level of the Least Performing Underlying is less than its Barrier Level. Even with any Contingent Coupons, your return on the Notes will be negative.

Information about the Underlyings

The RTY is designed to track the performance of the small capitalization segment of the United States equity market. All 2,000 stocks are traded on the New York Stock Exchange or Nasdaq, and the RTY consists of the smallest 2,000 companies included in the Russell 3000® Index. The Russell 3000® Index is composed of the 3,000 largest United States companies as determined by market capitalization and represents approximately 98% of the United States equity market.

The SPX is a capitalization-weighted index of 500 U.S. stocks. It is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

The SX5E is composed of 50 stocks from the Eurozone (Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain) portion of the STOXX Europe 600 Supersector indices. The STOXX Europe 600 Supersector indices contain the 600 largest stocks traded on the major exchanges of 18 European countries and are organized into the following 19 Supersectors: automobiles & parts; banks; basic resources; chemicals; construction & materials; financial services; food & beverage; health care; industrial goods & services; insurance; media; oil & gas; personal & household goods; real estate; retail; technology; telecommunications; travel & leisure and utilities.

The graphs above illustrate the performance of the Underlyings from March 4, 2009 through March 4, 2019. Past performance is not necessarily an indication of future results. For further information on the Underlyings please see "Information Relating to the Underlyings" beginning on page FWP-15. We have derived all disclosure regarding the Underlyings from publicly available information. Neither HSBC USA Inc. nor any of its affiliates have undertaken any independent review of, or made any due diligence inquiry with respect to, the publicly available information about the Underlyings.

HSBC USA Inc.

Autocallable Contingent Income Barrier Notes

This free writing prospectus relates to a single offering of Autocallable Contingent Income Barrier Notes. The Notes will have the terms described in this free writing prospectus and the accompanying prospectus supplement, prospectus and Equity Index Underlying Supplement. If the terms of the Notes offered hereby are inconsistent with those described in the accompanying prospectus supplement, prospectus or Equity Index Underlying Supplement, the terms described in this free writing prospectus shall control.

This free writing prospectus relates to an offering of Notes linked to the Reference Asset. The purchaser of a Note will acquire a senior unsecured debt security of HSBC USA Inc. as described below. The following key terms relate to the offering of Notes:

Issuer:	HSBC USA Inc.
Principal Amount:	\$1,000 per Note
Reference Asset:	The Russell 2000 [®] Index (Ticker: RTY), the S&P 500 [®] Index (Ticker: SPX), and the EURO STOXX 50 [®] Index (Ticker: SX5E) (each an “Underlying” and together the “Underlyings”)
Trade Date:	March 8, 2019
Pricing Date:	March 8, 2019
Original Issue Date:	March 15, 2019
Final Valuation Date:	September 24, 2021, subject to adjustment as described under “Additional Terms of the Notes—Valuation Dates” in the accompanying Equity Index Underlying Supplement.
Maturity Date:	3 business days after the Final Valuation Date, expected to be September 29, 2021. The Maturity Date is subject to adjustment as described under “Additional Terms of the Notes—Coupon Payment Dates, Call Payment Dates and Maturity Date” in the accompanying Equity Index Underlying Supplement.
Call Feature:	If the Official Closing Level of each Underlying is at or above its Initial Level on any Call Observation Date the Notes will be automatically called, and you will receive a cash payment, per \$1,000 Principal Amount of Notes, equal to the Principal Amount plus the applicable Contingent Coupon on the corresponding Call Payment Date.
Payment at Maturity:	Unless the Notes are automatically called, on the Maturity Date, for each \$1,000 Principal Amount of Notes, we will pay you the Final Settlement Value.
Final Settlement Value:	<p>Unless the Notes are automatically called, for each \$1,000 Principal Amount, you will receive a cash payment on the Maturity Date, calculated as follows:</p> <p>■ If the Reference Return of each Underlying is greater than or equal to -50.00%: \$1,000 + final Contingent Coupon.</p> <p>■ If the Reference Return of any Underlying is less than -50.00%: \$1,000 + (\$1,000 × Reference Return of the Least Performing Underlying).</p> <p>If the Notes are not called prior to maturity and the Final Level of the Least Performing Underlying is less than its Barrier Level, you may lose up to 100% of the Principal Amount. Even with any Contingent Coupons, your return on the Notes will be negative in this case.</p>
Least Performing Underlying:	The Underlying with the lowest Reference Return.
Reference Return:	<p>With respect to each Underlying, the quotient, expressed as a percentage, calculated as follows:</p> $\frac{\text{Final Level} - \text{Initial Level}}{\text{Initial Level}}$

**Coupon Observation and
Payment Dates:**

Coupon Observation Dates

Coupon Payment Dates

June 26, 2019	July 1, 2019
September 25, 2019	September 30, 2019
December 23, 2019	December 30, 2019
March 25, 2020 *	March 30, 2020 **
June 24, 2020 *	June 29, 2020 **
September 24, 2020 *	September 29, 2020 **
December 23, 2020 *	December 29, 2020 **
March 24, 2021 *	March 29, 2021 **
June 24, 2021 *	June 29, 2021 **
September 24, 2021 *	September 29, 2021 **
(the Final Valuation Date)	(the Maturity Date)

*These Coupon Observation Dates are also Call Observation Dates

**These Coupon Payment Dates are also Call Payment Dates

Each subject to postponement as described under “Additional Terms of the Notes—Valuation Dates” and “Additional Terms of the Notes—Coupon Payment Dates, Call Payment Dates and Maturity Date” in the accompanying Equity Index Underlying Supplement.

Call Observation Dates: The applicable Coupon Observation Dates on or after March 25, 2020, as indicated above.

Call Payment Dates: The applicable Coupon Payment Dates on or after March 30, 2020, as indicated above.

Contingent Coupon: ***If the Official Closing Level of each of the Underlyings is greater than or equal to its Coupon Trigger on a Coupon Observation Date***, you will receive the Contingent Coupon of 1.00% per \$1,000 (to be determined on the Pricing Date) in Principal Amount on the applicable Coupon Payment Date.
If the Official Closing Level of any Underlying is less than its Coupon Trigger on a Coupon Observation Date, the Contingent Coupon applicable to such Coupon Observation Date will not be payable and we will not make any payment to you on the relevant Coupon Payment Date.
You may not receive any Contingent Coupon Payments over the term of the Notes.

Contingent Coupon Rate: At least 1.00% per quarter (equivalent to at least 4.00% per annum) (to be determined on the Pricing Date)

Initial Level: With respect to each Underlying, its Official Closing Level on the Pricing Date.

Final Level: With respect to each Underlying, its Official Closing Level on the Final Valuation Date.

**Coupon Trigger and
Barrier Level:** With respect to each Underlying, 50.00% of its Initial Level.

CUSIP/ISIN: 40435UHX5 / US40435UHX54

Form of Notes: Book-Entry

Listing: The Notes will not be listed on any securities exchange or quotation system.

Estimated Initial Value: The Estimated Initial Value of the Notes will be less than the price you pay to purchase the Notes. The Estimated Initial Value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your Notes in the secondary market, if any, at any time. The Estimated Initial Value will be calculated on the Pricing Date and will be set forth in the pricing supplement to which this free writing prospectus relates. See “Risk Factors — The Estimated Initial Value of the Notes, which will be determined by us on the Pricing Date, will be less than the price to public and may differ from the market value of the Notes in the secondary market, if any.”

The Trade Date, the Pricing Date and the other dates set forth above are subject to change, and will be set forth in the final pricing supplement relating to the Notes.

GENERAL

This free writing prospectus relates to the offering of Notes. The purchaser of a Note will acquire a senior unsecured debt security of HSBC USA Inc. We reserve the right to withdraw, cancel or modify this offering and to reject orders in whole or in part. Although the offering of Notes relates to the Underlyings, you should not construe that fact as a recommendation as to the merits of acquiring an investment in stocks included in any of the Underlyings or as to the suitability of an investment in the Notes.

You should read this document together with the prospectus dated February 26, 2018, the prospectus supplement dated February 26, 2018 and the Equity Index Underlying Supplement dated February 26, 2018. If the terms of the Notes offered hereby are inconsistent with those described in the accompanying prospectus supplement, prospectus or Equity Index Underlying Supplement, the terms described in this free writing prospectus shall control. You should carefully consider, among other things, the matters set forth in “Risk Factors” beginning on page FWP-8 of this free writing prospectus, beginning on page S-1 of the prospectus supplement and beginning on page S-1 of the Equity Index Underlying Supplement, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes. As used herein, references to the “Issuer”, “HSBC”, “we”, “us” and “our” are to HSBC USA Inc.

HSBC has filed a registration statement (including a prospectus, prospectus supplement and Equity Index Underlying Supplement) with the SEC for the offering to which this free writing prospectus relates. Before you invest, you should read the prospectus, prospectus supplement and Equity Index Underlying Supplement in that registration statement and other documents HSBC has filed with the SEC for more complete information about HSBC and this offering. You may get these documents for free by visiting EDGAR on the SEC’s web site at www.sec.gov. Alternatively, HSBC Securities (USA) Inc. or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement and Equity Index Underlying Supplement if you request them by calling toll-free 1-866-811-8049.

You may also obtain:

- ▶ Equity Index Underlying Supplement at: https://www.sec.gov/Archives/edgar/data/83246/000114420418010782/tv486722_424b2.htm
- ▶ The prospectus supplement at: https://www.sec.gov/Archives/edgar/data/83246/000114420418010762/tv486944_424b2.htm
- ▶ The prospectus at: https://www.sec.gov/Archives/edgar/data/83246/000114420418010720/tv487083_424b3.htm

We are using this free writing prospectus to solicit from you an offer to purchase the Notes. You may revoke your offer to purchase the Notes at any time prior to the time at which we accept your offer by notifying HSBC Securities (USA) Inc. We reserve the right to change the terms of, or reject any offer to purchase, the Notes prior to their issuance. In the event of any material changes to the terms of the Notes, we will notify you.

PAYMENT ON THE NOTES

Call Feature

If the Official Closing Level of each Underlying is at or above its Initial Level on any Call Observation Date the Notes will be automatically called, and you will receive a cash payment, per \$1,000 Principal Amount of Notes, equal to the Principal Amount plus the applicable Contingent Coupon on the corresponding Call Payment Date.

Contingent Coupon

We will pay a quarterly Contingent Coupon payment on a Coupon Payment Date if the Official Closing Level of each Underlying on the applicable Coupon Observation Date is greater than or equal to its Coupon Trigger. Otherwise, no coupon will be paid on such Coupon Payment Date. For information regarding the record dates applicable to the Contingent Coupons payable on the Notes, please see the section entitled “Description of Notes—Interest and Principal Payments—Recipients of Interest Payments” beginning on page S-14 in the accompanying prospectus supplement. The Contingent Coupon Rate will be at least 4.00% per annum (or approximately \$10.00 per \$1,000 in Principal Amount per quarter, if payable) (to be determined on the Pricing Date).

Maturity

Unless the Notes are automatically called, on the Maturity Date and for each \$1,000 Principal Amount of Notes, you will receive a cash payment equal to the Final Settlement Value determined as follows:

- **If the Reference Return of each Underlying is greater than or equal to -50.00%:**
\$1,000 + final Contingent Coupon
- **If the Reference Return of any Underlying is less than -50.00%:**
\$1,000 + (\$1,000 × Reference Return of the Least Performing Underlying).

If the Notes are not called prior to maturity and the Final Level of the Least Performing Underlying is less than its Barrier Level, you may lose up to 100% of the Principal Amount. Even with any Contingent Coupons, your return on the Notes will be negative in this case.

Calculation Agent

We or one of our affiliates will act as calculation agent with respect to the Notes.

Reference Sponsors

With respect to the SPX, S&P Dow Jones Indices LLC, a division of S&P Global, is the reference sponsor. With respect to the RTY, FTSE Russell is the reference sponsor. With respect to the SX5E, STOXX Limited is the reference sponsor.

INVESTOR SUITABILITY

The Notes may be suitable for you if:

- ▶ You believe that the Official Closing Level of each Underlying will be at or above its Coupon Trigger on most or all of the Coupon Observation Dates, and the Final Level of the Least Performing Underlying will be at or above its Barrier Level.
- ▶ You seek a quarterly Contingent Coupon, based on the performance of the Underlyings, that will be paid at the Contingent Coupon Rate of at least 4.00% per annum (to be determined on the Pricing Date) if the Official Closing Level of each Underlying is greater than or equal to its Coupon Trigger on the applicable Coupon Observation Date.
- ▶ You are willing to invest in the Notes based on the fact that your maximum potential return is any Contingent Coupons payable on the Notes.
- ▶ You do not seek an investment that provides an opportunity to participate in the appreciation the Underlyings.
- ▶ You are willing to make an investment that is exposed to the potential downside performance of the Underlyings on a 1-to-1 basis if the Reference Return of each Underlying is less than -50.00%.
- ▶ You are willing to lose up to 100% of the Principal Amount.
- ▶ You are willing to hold the Notes that will be automatically called on any Call Observation Date on which the Official Closing Level of each Underlying is at or above its Initial Level, or you are otherwise willing to hold the Notes to maturity.
- ▶ You are willing to guaranteed interest payments on the Notes, and forgo dividends or other distributions paid on the stocks included in any of the Underlyings.
- ▶ You do not seek an investment for which there will be an active secondary market.
- ▶ You are willing to accept the risk and return profile of the Notes versus a conventional debt security with a comparable maturity issued by HSBC or another issuer with a similar credit rating.
- ▶ You are comfortable with the creditworthiness of HSBC, as Issuer of the Notes.

The Notes may not be suitable for you if:

- ▶ You believe that the Official Closing Level of one Underlying will be below its Coupon Trigger on most or all the Coupon Observation Dates, including the Final Valuation Date, and the Final Level of the Least Performing Underlying will be below its Barrier Level.
- ▶ You believe that the Contingent Coupon, if any, will not provide you with your desired return.
- ▶ You are unwilling to invest in the Notes based on the fact that your maximum potential return is any Contingent Coupons payable on the Notes.
- ▶ You seek an investment that provides an opportunity to participate in the appreciation of the Underlyings.
- ▶ You are unwilling to make an investment that is exposed to the potential downside performance of the Underlyings on a 1-to-1 basis if the Reference Return of the Least Performing Underlying is less than -50.00%.
- ▶ You seek an investment that provides full return of principal at maturity.
- ▶ You are unable or unwilling to hold the Notes that will be automatically called on any Call Observation Date on which the Official Closing Level of each Underlying is at or above its Initial Level, or you are otherwise unable or unwilling to hold the Notes to maturity.
- ▶ You prefer to receive guaranteed periodic interest payments on the Notes, or the dividends or other distributions paid on the stocks included in any of the Underlyings.
- ▶ You seek an investment for which there will be an active secondary market.
- ▶ You prefer the lower risk, and therefore accept the potentially lower returns, of conventional debt securities with comparable maturities issued by HSBC or another issuer with a similar credit rating.
- ▶ You are not willing or are unable to assume the credit risk associated with HSBC, as Issuer of the Notes.

RISK FACTORS

We urge you to read the section “Risk Factors” beginning on page S-1 in the accompanying prospectus supplement and beginning on page S-1 of the accompanying Equity Index Underlying Supplement. Investing in the Notes is not equivalent to investing directly in any of the Underlyings. You should understand the risks of investing in the Notes and should reach an investment decision only after careful consideration, with your advisors, of the suitability of the Notes in light of your particular financial circumstances and the information set forth in this free writing prospectus and the accompanying prospectus, prospectus supplement and Equity Index Underlying Supplement.

In addition to the risks discussed below, you should review “Risk Factors” in the accompanying prospectus supplement and Equity Index Underlying Supplement including the explanation of risks relating to the Notes described in the following sections:

- ▶ “—Risks Relating to All Note Issuances” in the prospectus supplement; and
- ▶ “—General Risks Related to the Indices” in the Equity Index Underlying Supplement.

You will be subject to significant risks not associated with conventional fixed-rate or floating-rate debt securities.

The Notes do not guarantee any return of principal and you may lose your entire initial investment.

The Notes do not guarantee any return of principal. The Notes differ from ordinary debt securities in that we will not pay you 100% of the Principal Amount of your Notes if the Notes are not automatically called and the Final Level of the Least Performing Underlying is less than its Barrier Level. In this case, the Payment at Maturity you will be entitled to receive will be less than the Principal Amount of the Notes and you will lose 1% for each 1% that the Reference Return of the Least Performing Underlying is less than -50.00%. You may lose up to 100% of your investment at maturity. Even with any Contingent Coupons, your return on the Notes will be negative in this case.

You may not receive any Contingent Coupons.

We will not necessarily make periodic coupon payments on the Notes. If the Official Closing Level of each Underlying on a Coupon Observation Date is less than its Coupon Trigger, we will not pay you the Contingent Coupon applicable to that Coupon Observation Date. If on each of the Coupon Observation Dates, the Official Closing Level of each Underlying is less than its Coupon Trigger, we will not pay you any Contingent Coupons during the term of, and you will not receive a positive return on, the Notes. Generally, this non-payment of the Contingent Coupon coincides with a period of greater risk of principal loss on the Notes.

Your return on the Notes is limited to the principal amount plus the Contingent Coupons, if any, regardless of any appreciation in the level of the Underlyings.

For each \$1,000 in principal amount of the Notes, you will receive \$1,000 at maturity plus the final Contingent Coupon if the Final Level of the Least Performing Underlying is equal to or greater than its Barrier Level, regardless of any appreciation in the levels of the Underlyings, which may be significant. Accordingly, the return on the Notes may be significantly less than the return on a direct investment in the Underlyings during the term of the Notes.

You are exposed to the market risk of all of the Underlyings, with respect to both the Contingent Coupons, if any, and the payment at maturity, if any.

Your return on the Notes is not linked to a basket consisting of the 3 equity indices. Rather, it will be contingent upon the independent performance of each Underlying. Unlike an instrument with a return linked to a basket of underlying assets, in which risk is potentially mitigated and diversified among all the components of the basket, you will be exposed to the risks related to all of the Underlyings. Poor performance by any Underlying over the term of the Notes may negatively affect your return and will not be offset or mitigated by any positive performance by the other Underlyings. To receive any contingent coupons, each Underlying must close at or above their respective Coupon Triggers on the applicable Coupon Observation Date. In addition, if any Underlying has decreased to below its respective Barrier Price as of the Final Valuation Date, you will be fully exposed to the decrease in the Least Performing Underlying on a 1 to 1 basis, even if the other Underlyings have appreciated. Under this scenario, the payment at maturity will be less than 50.00% of the Principal Amount and could be zero. Accordingly, your investment is subject to the market risk of each of the Underlyings.

Because the Notes are linked to the performance of the Least Performing Underlying, you are exposed to greater risks of receiving no Contingent Coupons and sustaining a significant loss on your investment than if the Notes were linked to just one Underlying.

The risk that you will not receive any Contingent Coupons, or that you will suffer a significant loss on your investment, is greater if you invest in the Notes as opposed to substantially similar securities that are linked to the performance of just one Underlying. With 3 Underlyings, it is more likely that one of the Underlyings will close below its respective Coupon Trigger on any Coupon Observation Date (including the Final Valuation Date) and below its respective Barrier Price on the Final Valuation Date, than if the Notes were linked to only one Underlying. Therefore, it is more likely that you will not receive any Contingent Coupons, and that you will suffer a significant loss on your investment. In addition, because each Underlying must close above its initial price on a monthly Coupon Observation Date

in order for the Notes to be called prior to maturity, the Notes are less likely to be called than if the Notes were linked to just one Underlying.

The Notes are subject to the credit risk of HSBC USA Inc.

The Notes are senior unsecured debt obligations of the Issuer, HSBC, and are not, either directly or indirectly, an obligation of any third party. As further described in the accompanying prospectus supplement and prospectus, the Notes will rank on par with all of the other unsecured and unsubordinated debt obligations of HSBC, except such obligations as may be preferred by operation of law. Any payments to be made on the Notes, including any Contingent Coupon and any return of principal at maturity or upon early redemption, as applicable, depends on the ability of HSBC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of HSBC may affect the market value of the Notes and, in the event HSBC were to default on its obligations, you may not receive the amounts owed to you under the terms of the Notes.

The Notes may be automatically called prior to the Maturity Date.

If the Notes are automatically called early, the holding period over which you may receive coupon payments could be as little as 12 months. There is no guarantee that you would be able to reinvest the proceeds from an investment in the Notes at a comparable return for a similar level of risk in the event the Notes are automatically called prior to the Maturity Date.

The Notes are not insured or guaranteed by any governmental agency of the United States or any other jurisdiction.

The Notes are not deposit liabilities or other obligations of a bank and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency or program of the United States or any other jurisdiction. An investment in the Notes is subject to the credit risk of HSBC, and in the event that HSBC is unable to pay its obligations as they become due, you may not receive the full Payment at Maturity on the Notes.

The Estimated Initial Value of the Notes, which will be determined by us on the Pricing Date, will be less than the price to public and may differ from the market value of the Notes in the secondary market, if any.

The Estimated Initial Value of the Notes will be calculated by us on the Pricing Date and will be less than the price to public. The Estimated Initial Value will reflect our internal funding rate, which is the borrowing rate we pay to issue market-linked securities, as well as the mid-market value of the embedded derivatives in the Notes. This internal funding rate is typically lower than the rate we would pay when we issue conventional fixed or floating rate debt securities. As a result of the difference between our internal funding rate and the rate we would use when we issue conventional fixed or floating rate debt securities, the Estimated Initial Value of the Notes may be lower if it were based on the prices at which our fixed or floating rate debt securities trade in the secondary market. In addition, if we were to use the rate we use for our conventional fixed or floating rate debt issuances, we would expect the economic terms of the Notes to be more favorable to you. We will determine the value of the embedded derivatives in the Notes by reference to our or our affiliates' internal pricing models. These pricing models consider certain assumptions and variables, which can include volatility and interest rates. Different pricing models and assumptions could provide valuations for the Notes that are different from our Estimated Initial Value. These pricing models rely in part on certain forecasts about future events, which may prove to be incorrect. The Estimated Initial Value does not represent a minimum price at which we or any of our affiliates would be willing to purchase your Notes in the secondary market (if any exists) at any time.

The price of your Notes in the secondary market, if any, immediately after the Pricing Date will be less than the price to public.

The price to public takes into account certain costs. These costs, which will be used or retained by us or one of our affiliates, include the underwriting discount, our affiliates' projected hedging profits (which may or may not be realized) for assuming risks inherent in hedging our obligations under the Notes, and the costs associated with structuring and hedging our obligations under the Notes. If you were to sell your Notes in the secondary market, if any, the price you would receive for your Notes may be less than the price you paid for them because secondary market prices will not take into account these costs. The price of your Notes in the secondary market, if any, at any time after issuance will vary based on many factors, including the level of the Underlyings and changes in market conditions, and cannot be predicted with accuracy. The Notes are not designed to be short-term trading instruments, and you should, therefore, be able and willing to hold the Notes to maturity. Any sale of the Notes prior to maturity could result in a loss to you.

If we were to repurchase your Notes immediately after the Original Issue Date, the price you receive may be higher than the Estimated Initial Value of the Notes.

Assuming that all relevant factors remain constant after the Original Issue Date, the price at which HSBC Securities (USA) Inc. may initially buy or sell the Notes in the secondary market, if any, and the value that may initially be used for customer account statements, if any, may exceed the Estimated Initial Value on the Pricing Date for a temporary period expected to be approximately 6 months after the Original Issue Date. This temporary price difference may exist because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the Notes and other costs in connection with the Notes that we

will no longer expect to incur over the term of the Notes. We will make such discretionary election and determine this temporary reimbursement period on the basis of a number of factors, including the tenor of the Notes and any agreement we may have with the distributors of the Notes. The amount of our estimated costs which we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the Original Issue Date of the Notes based on changes in market conditions and other factors that cannot be predicted.

The amount payable on the Notes is not linked to the levels of the Underlyings at any time other than the Coupon Observation Dates, including the Final Valuation Date.

The payments on the Notes will be based on the Official Closing Levels of the Underlyings on the Coupon Observation Dates, including the Final Valuation Date, subject to postponement for non-trading days and certain market disruption events. Even if the level of each Underlying is greater than or equal to its Coupon Trigger during the term of the Notes other than on a Coupon Observation Date but then drops on a Coupon Observation Date to a level that is less than its Coupon Trigger, the Contingent Coupon will not be payable for that Coupon Observation Date. Similarly, if the Notes are not called, even if the level of the Least Performing Underlying is greater than or equal to its Barrier Level during the term of the Notes other than on the Final Valuation Date but then decreases on the Final Valuation Date to a level that is less than the Barrier Level, the Payment at Maturity will be less, possibly significantly less, than it would have been had the Payment at Maturity been linked to the level of the Least Performing Underlying prior to such decrease. Although the actual levels of the Underlyings on the Maturity Date or at other times during the term of the Notes may be higher than their respective levels on the Coupon Observation Dates, whether each Contingent Coupon will be payable and the Payment at Maturity will be based solely on the Official Closing Levels of the Underlyings on the applicable Coupon Observation Dates.

Changes that affect an Underlying may affect the level of that Underlying and the market value of the Notes and the amount you will receive on the Notes.

The policies of the index sponsor of an Underlying concerning additions, deletions and substitutions of the constituents comprising that Underlying, and the manner in which the index sponsor takes account of certain changes affecting those constituents included in the Underlying may affect the level of that Underlying. The policies of the Reference Issuer or the index sponsor with respect to the calculation of an Underlying or its Underlying Index, as applicable, could also affect the level of that Underlying. The Reference Issuer or the index sponsor may discontinue or suspend calculation or dissemination of an Underlying or its Underlying Index, as applicable. Any such actions could affect the level of an Underlying and the value of the Notes.

Owning the Notes is not the same as owning the stocks comprising the Underlyings.

The return on your Notes may not reflect the return you would realize if you actually owned stocks included in either of the Underlyings. As a holder of the Notes, you will not have voting rights or rights to receive dividends or other distributions or other rights as would holders of the stocks included in either Underlying.

The Notes lack liquidity.

The Notes will not be listed on any securities exchange. HSBC Securities (USA) Inc. is not required to offer to purchase the Notes in the secondary market, if any exists. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Notes easily. Because other dealers are not likely to make a secondary market for the Notes, the price at which you may be able to trade your Notes is likely to depend on the price, if any, at which HSBC Securities (USA) Inc. is willing to buy the Notes.

Potential conflicts of interest may exist.

An affiliate of HSBC has a minority equity interest in the owner of an electronic platform, through which we may make available certain structured investments offering materials. HSBC and its affiliates play a variety of roles in connection with the issuance of the Notes, including acting as calculation agent and hedging our obligations under the Notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the Notes. We will not have any obligation to consider your interests as a holder of the Notes in taking any action that might affect the value of your Notes.

Uncertain tax treatment.

For a discussion of the U.S. federal income tax consequences of your investment in a Note, please see the discussion under "U.S. Federal Income Tax Considerations" herein and the discussion under "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement.

Small-capitalization risk.

The RTY tracks companies that are considered small-capitalization. These companies often have greater stock price volatility, lower trading volume and less liquidity than large-capitalization companies and therefore the level of the RTY may be more volatile than an investment in stocks issued by large-capitalization companies. Stock prices of small-capitalization companies are also more vulnerable than those of large-capitalization companies to adverse business and economic developments, and the stocks of small-capitalization companies may be thinly traded, making it difficult for the RTY to track them. In addition, small-capitalization companies are typically less stable financially than large-capitalization companies and may depend on a small number of key personnel, making them more vulnerable to loss of personnel. Small-capitalization companies are often subject to less analyst coverage and may be in early, and less predictable, periods of their corporate existences. Such companies tend to have smaller revenues, less diverse product lines, smaller shares of their product or service markets, fewer financial resources and less competitive strengths than large-capitalization companies and are more susceptible to adverse developments related to their products.

Risks associated with non-U.S. companies.

The level of the SX5E depends upon the stocks of non-U.S. companies, and thus involve risks associated with the home countries of those non-U.S. companies, some of which are and have been experiencing economic stress. The prices of these non-U.S. stocks may be affected by political, economic, financial and social factors in the home country of each applicable company, including changes in that country's government, economic and fiscal policies, currency exchange laws or other laws or restrictions, which could affect the value of the Notes. These foreign securities may have less liquidity and could be more volatile than many of the securities traded in U.S. or other securities markets. Direct or indirect government intervention to stabilize the relevant foreign securities markets, as well as cross shareholdings in foreign companies, may affect trading levels or prices and volumes in those markets. The other special risks associated with foreign securities may include, but are not limited to: less liquidity and smaller market capitalizations; less rigorous regulation of securities markets; different accounting and disclosure standards; governmental interference; currency fluctuations; higher inflation; and social, economic and political uncertainties. These factors may adversely affect the performance of the SX5E and, as a result, the value of the Notes.

The Notes will not be adjusted for changes in exchange rates.

Although the equity securities held by the SX5E are traded in currencies other than U.S. dollars, and your Notes are denominated in U.S. dollars, the amount payable on your Notes at maturity, if any, will not be adjusted for changes in the exchange rates between the U.S. dollar and the currencies in which these non-U.S. equity securities are denominated. Changes in exchange rates, however, may also reflect changes in the applicable non-U.S. economies that in turn may affect the level of the SX5E, and therefore your Notes. The amount we pay in respect of your Notes on the maturity date, if any, will be determined solely in accordance with the procedures described in this free writing prospectus.

ILLUSTRATIVE EXAMPLES

The following table and examples are provided for illustrative purposes only and are hypothetical. They do not purport to be representative of every possible scenario concerning increases or decreases in the level of any Underlying relative to its Initial Level. We cannot predict the Official Closing Level of any of the Underlyings on any Coupon Observation Date or the Final Valuation Date. The assumptions we have made in connection with the illustrations set forth below may not reflect actual events. You should not take this illustration or these examples as an indication or assurance of the expected performance of any of the Underlyings or return on the Notes.

The table and examples below illustrate how the Contingent Coupon and the Payment at Maturity would be calculated with respect to a \$1,000 investment in the Notes, given a range of hypothetical performances of any Underlying. The hypothetical returns on the Notes below are numbers, expressed as percentages, that result from comparing the Payment at Maturity per \$1,000 Principal Amount to \$1,000. You should consider carefully whether the Notes are suitable to your investment goals. The numbers appearing in the following table and examples have been rounded for ease of analysis. The following table and examples assume the following:

▶ Principal Amount:	\$1,000
▶ Hypothetical Initial Level	1,000.00*
▶ Hypothetical Barrier Level:	500.00, 50.00% of the Initial Level
▶ Hypothetical Coupon Trigger:	500.00, 50.00% of the Initial Level
▶ Hypothetical Contingent Coupon Rate:	4.00% per annum (1.00% for each quarter in which it is payable). The actual Contingent Coupon Rate will be at least 4.00% per annum and will be determined on the Pricing Date. If the Official Closing Level of each Underlying on every Coupon Observation Date is greater than or equal to its Coupon Trigger, the Contingent Coupon paid over the term of the Notes would total \$100.00 per \$1,000 Principal Amount of the Notes.

* The hypothetical Initial Level of 1,000.00 used in the examples below has been chosen for illustrative purposes only and does not represent the actual Initial Level of any Underlying. The actual Initial Level of each Underlying will be set forth in the final pricing supplement to which this free writing prospectus relates.

Summary of the Examples

The following examples assume that none of the Underlyings fall below their respective Coupon Triggers on the first **three** Coupon Observation Dates, and as a result an investor received **three** Contingent Coupons with respect to those Coupon Observation Dates, totalling \$30.00 per \$1,000 in Principal Amount of the Notes.

	Notes Are Called on a Call Observation Date	Notes Are Not Called on Any Call Observation Date	
	Example 1	Example 2	Example 3
Initial Level of each Underlying	1,000.00	1,000.00	1,000.00
Barrier Level of each Underlying	500.00	500.00	500.00
Coupon Trigger of each Underlying	500.00	500.00	500.00
Official Closing Level / Percentage Change of the Least Performing Underlying on the:			
Fourth Coupon Observation Date	750.00/-25.00%	650.00/-35.00%	650.00/-35.00%
Fifth Coupon Observation Date	900.00/-10.00%	850.00/-15.00%	850.00/-15.00%
Sixth Coupon Observation Date	1,050.00/5.00%	700.00/-30.00%	700.00/-30.00%
Seventh Coupon Observation Date	N/A	650.00/-35.00%	650.00/-35.00%
Eighth Coupon Observation Date	N/A	400.00/-60.00%	400.00/-60.00%
Ninth Coupon Observation Date	N/A	600.00/-40.00%	450.00/-55.00%
Final Valuation Date	N/A	800.00/-20.00%	400.00/-60.00%
Contingent Coupon Payment Amounts Prior to Maturity or Automatic Call	5 x \$10.00 = \$50.00	8 x \$10.00 = \$80.00	7 x \$10.00 = \$70.00
Payment if Notes are Called	\$1,010.00	N/A	N/A
Payment at Maturity	N/A	\$1,010.00	\$1,000 + (\$1,000 x -60.00%) = \$400.00
Return of the Notes	6.00%	9.00	-53.00%

Example 1—The Official Closing Level of each Underlying on the seventh Coupon Observation Date is greater than or equal to its Initial Level and each Underlying closed at or above its Coupon Trigger (but below its Initial Level) on five of the prior Coupon Observation Dates.

<u>Underlying</u>		<u>Initial Level</u>		<u>Final Level</u>
RTY		1,000.00		1,300.00 (130.00% of Initial Level)
SPX		1,000.00		1,200.00 (120.00% of Initial Level)
SX5E		1,000.00		1,050.00 (105.00% of Initial Level)

Payment Upon a Call:		\$1,010.00
-----------------------------	--	-------------------

Because the Official Closing Level of each Underlying on the seventh Coupon Observation Date is at or above its Initial Level, the Notes will be called and you will receive \$1,010.00 per Note, reflecting the Principal Amount plus the Contingent Coupon. When added to the Contingent Coupon payments of \$50.00 received in respect of the prior Coupon Observation Dates, we will have paid you a total of \$1,060.00 per Note, resulting in a 6.00% return on the Notes. No extra payment will be made on account of each Underlyings closing above their respective Initial Levels.

Example 2— The Notes are not called, the Final Level of the Least Performing Underlying is greater than or equal to its Barrier Level, and each Underlying closed at or above its Coupon Trigger (but below its Initial Level) on eight of the Coupon Observation Dates prior to the Final Valuation Date.

<u>Underlying</u>		<u>Initial Level</u>		<u>Final Level</u>
RTY		1,000.00		1,100.00 (110.00% of Initial Level)
SPX		1,000.00		800.00 (80.00% of Initial Level)
SX5E		1,000.00		900.00 (90.00% of Initial Level)

SPX is the Least Performing Underlying.

Reference Return of the Least Performing Underlying:		-20.00%
Payment at Maturity:		\$1,010.00

Because the Final Level of the Least Performing Underlying is greater than or equal to its Barrier Level, you will receive \$1,000 per \$1,000 in Principal Amount plus the final Contingent Coupon, calculated as follows:

$$\text{Final Settlement Value} = \$1,000 + \$10.00 = \$1,010.00$$

When added to the Contingent Coupon payments of \$80.00 received in respect of the prior Coupon Observation Dates, we will have paid you a total of \$1,090.00 per Note, resulting in a 9.00% return on the Notes.

Example 3—The Notes are not called, the Final Level of the Least Performing Underlying is less than its Barrier Level, and the Underlyings did not all close at or above their respective Coupon Triggers on any Coupon Observation Date prior to maturity.

<u>Underlying</u>		<u>Initial Level</u>		<u>Final Level</u>
RTY		1,000.00		400.00 (40.00% of Initial Level)
SPX		1,000.00		750.00 (75.00% of Initial Level)
SX5E		1,000.00		770.00 (77.00% of Initial Level)

RTY is the Least Performing Underlying.

Reference Return of the Least Performing Underlying:	-60.00%
Payment at Maturity:	\$400.00

Because the Final Level of the Least Performing Underlying is less than its Barrier Level, you will receive \$400.00 per \$1,000 in Principal Amount, calculated as follows:

$$\text{Final Settlement Value} = \$1,000 + (\$1,000 \times -60.00\%) = \$400.00$$

Because you received 7 coupon payments totaling \$70.00 prior to the Final Valuation Date, we will pay you a total of \$470.00, resulting in a -53.00% return on the Notes.

If the Notes are not called and the Final Level of the Least Performing Underlying is less than its Barrier Level, you will be exposed to any decrease in the level of the Least Performing Underlying on a 1:1 basis and could lose up to 100% of your principal at maturity. Even with any Contingent Coupons paid, your return will still be negative.

INFORMATION RELATING TO THE UNDERLYINGS

Description of the RTY

The RTY is designed to track the performance of the small capitalization segment of the United States equity market. All 2,000 stocks are traded on the New York Stock Exchange or Nasdaq, and the RTY consists of the smallest 2,000 companies included in the Russell 3000® Index. The Russell 3000® Index is composed of the 3,000 largest United States companies as determined by market capitalization and represents approximately 98% of the United States equity market.

The top 5 industry groups by market capitalization as of January 31, 2019 were: Financial Services, Health Care, Consumer Discretionary, Technology and Producer Durables.

For more information about the RTY, see “The Russell 2000® Index” on page S-37 of the accompanying Equity Index Underlying Supplement.

Historical Performance of the RTY

The following graph sets forth the historical performance of the RTY based on the daily historical closing levels from March 4, 2009 through March 4, 2019. We obtained the closing levels below from the Bloomberg Professional® service. We have not undertaken any independent review of, or made any due diligence inquiry with respect to, the information obtained from the Bloomberg Professional® service.

The historical levels of the RTY should not be taken as an indication of future performance, and no assurance can be given as to the Official Closing Level of the RTY on any Coupon Observation Date, including the Final Valuation Date.

Description of the SPX

The SPX is a capitalization-weighted index of 500 U.S. stocks. It is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

The top 5 industry groups by market capitalization as of February 28, 2019 were: Information Technology, Health Care, Financials, Communication Services and Consumer Discretionary.

For more information about the SPX, see “S&P 500® Index” on page S-43 of the accompanying Equity Index Underlying Supplement.

Historical Performance of the SPX

The following graph sets forth the historical performance of the SPX based on the daily historical closing levels from March 4, 2009 through March 4, 2019. We obtained the closing levels below from the Bloomberg Professional® service. We have not undertaken any independent review of, or made any due diligence inquiry with respect to, the information obtained from the Bloomberg Professional® service.

The historical levels of the SPX should not be taken as an indication of future performance, and no assurance can be given as to the Official Closing Level of the SPX on any Coupon Observation Date, including the Final Valuation Date.

Description of the SX5E

The SX5E is composed of 50 stocks from the Eurozone (Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain) portion of the STOXX Europe 600 Supersector indices. The STOXX Europe 600 Supersector indices contain the 600 largest stocks traded on the major exchanges of 18 European countries and are organized into the following 19 Supersectors: automobiles & parts; banks; basic resources; chemicals; construction & materials; financial services; food & beverage; health care; industrial goods & services; insurance; media; oil & gas; personal & household goods; real estate; retail; technology; telecommunications; travel & leisure and utilities.

For more information about the SX5E, see “The EURO STOXX 50® Index” beginning on page S-12 of the accompanying Equity Index Underlying Supplement.

Historical Performance of the SX5E

The following graph sets forth the historical performance of the SX5E based on the daily historical closing levels from March 4, 2009 through March 4, 2019. We obtained the closing levels below from the Bloomberg Professional® service. We have not undertaken any independent review of, or made any due diligence inquiry with respect to, the information obtained from the Bloomberg Professional® service.

The historical levels of the SX5E should not be taken as an indication of future performance, and no assurance can be given as to the Official Closing Level of the SX5E on any Coupon Observation Date, including the Final Valuation Date.

EVENTS OF DEFAULT AND ACCELERATION

If the Notes have become immediately due and payable following an Event of Default (as defined in the accompanying prospectus) with respect to the Notes, the calculation agent will determine the accelerated payment due and payable in the same general manner as described in this free writing prospectus except that in such a case, the scheduled trading day immediately preceding the date of acceleration will be used as the final Coupon Observation Date and the Final Valuation Date. If a market disruption event exists with respect to an Underlying on that scheduled trading day, then the accelerated Final Valuation Date will be postponed for up to five scheduled trading days (in the same manner used for postponing the originally scheduled Final Valuation Date). The accelerated Maturity Date will also be postponed by an equal number of business days following the postponed accelerated Final Valuation Date. For the avoidance of doubt, if no market disruption event exists with respect to an Underlying on the scheduled trading day preceding the date of acceleration, the determination of such Underlying's Final Level will be made on such date, irrespective of the existence of a market disruption event with respect to any other Underlying occurring on such a date.

If the Notes have become immediately due and payable following an Event of Default, you will not be entitled to any additional payments with respect to the Notes. For more information, see "Description of Debt Securities — Senior Debt Securities — Events of Default" in the accompanying prospectus.

SUPPLEMENTAL PLAN OF DISTRIBUTION (CONFLICTS OF INTEREST)

We have appointed HSBC Securities (USA) Inc., an affiliate of HSBC, as the agent for the sale of the Notes. Pursuant to the terms of a distribution agreement, HSBC Securities (USA) Inc. will purchase the Notes from HSBC at the price to public less the underwriting discount set forth on the cover page of the pricing supplement to which this free writing prospectus relates, for distribution to other registered broker-dealers or will offer the Notes directly to investors. HSBC Securities (USA) Inc. proposes to offer the Notes at the price to public set forth on the cover page of this free writing prospectus. HSBC USA Inc. or one of our affiliates may pay varying underwriting discounts of up to 1.15% and a structuring fee of 0.40% per \$1,000 Principal Amount in connection with the distribution of the Notes to other registered broker-dealers.

An affiliate of HSBC has paid or may pay in the future an amount to broker-dealers in connection with the costs of the continuing implementation of systems to support the Notes.

In addition, HSBC Securities (USA) Inc. or another of its affiliates or agents may use the pricing supplement to which this free writing prospectus relates in market-making transactions after the initial sale of the Notes, but is under no obligation to make a market in the Notes and may discontinue any market-making activities at any time without notice.

We expect that delivery of the Notes will be made against payment for the Notes on or about the Original Issue Date set forth on the inside cover page of this document, which is more than two business days following the Trade Date. Under Rule 15c6-1 under the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in two business days, unless the parties to that trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Notes more than two business days prior to the Original Issue Date will be required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement, and should consult their own advisors.

See "Supplemental Plan of Distribution (Conflicts of Interest)" on page S-61 in the prospectus supplement.

U.S. FEDERAL INCOME TAX CONSIDERATIONS

You should carefully consider the matters set forth in "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement. The following discussion summarizes the U.S. federal income tax consequences of the purchase, beneficial ownership, and disposition of the securities. This summary supplements the section "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement and supersedes it to the extent inconsistent therewith.

There are no statutory provisions, regulations, published rulings or judicial decisions addressing the characterization for U.S. federal income tax purposes of securities with terms that are substantially the same as those of the Notes. We intend to treat the Notes as contingent payment debt instruments for U.S. federal income tax purposes. However, our special U.S. tax counsel, Mayer Brown LLP, has advised us that it is unable to opine on the validity of this treatment. Because there are no statutory provisions, regulations, published rulings or judicial decisions addressing the characterization for U.S. federal income tax purposes of notes with terms that are substantially the same as those of the notes, other characterizations and treatments are possible and the timing and character of income in respect of the notes might differ from the treatment described herein. You should carefully consider the discussion of all potential tax

consequences as set forth in “U.S. Federal Income Tax Considerations” in the accompanying prospectus supplement. Pursuant to the terms of the Notes, you agree to treat the Notes as contingent payment debt instruments for all U.S. federal income tax purposes.

We will not attempt to ascertain whether any of the entities whose stock is included in the Underlyings would be treated as a passive foreign investment company (“PFIC”) or United States real property holding corporation (“USRPHC”), both as defined for U.S. federal income tax purposes. If one or more of the entities whose stock is included in the Underlyings were so treated, certain adverse U.S. federal income tax consequences might apply. You should refer to information filed with the SEC and other authorities by the entities whose stock is included in the Underlyings and consult your tax advisor regarding the possible consequences to you if one or more of the entities whose stock is included in the Underlyings is or becomes a PFIC or a USRPHC.

U.S. Holders. Based on the factors described in the section, “U.S. Federal Income Tax Considerations — Tax Treatment of U.S. Holders — U.S. Federal Income Tax Treatment of the Notes as Indebtedness for U.S. Federal Income Tax Purposes — Contingent Notes,” in order to illustrate the application of the noncontingent bond method to the Notes, we have estimated that the comparable yield of the Notes, solely for U.S. federal income tax purposes, will be 2.92% per annum (compounded quarterly). In addition, we have computed a “projected payment schedule” that produces the comparable yield and includes the projected amount of the Coupon Payments.

Further, based upon the method described in the section, “U.S. Federal Income Tax Considerations — Tax Treatment of U.S. Holders — U.S. Federal Income Tax Treatment of the Notes as Indebtedness for U.S. Federal Income Tax Purposes — Contingent Notes” and based upon the estimate of the comparable yield, we have estimated that the projected payment schedule for Notes that have a Principal Amount of \$1,000 and an issue price of \$1,000 consists of payment on the first Coupon Payment Date of \$8.59, payment on the second and fifth Coupon Payment Dates of \$7.21, and payment on the other Coupon Payment Dates of \$7.29, except that the final projected payment at maturity is scheduled to be \$1,007.29.

Accordingly, U.S. holders will generally accrue OID in respect of the Notes at a rate equal to the comparable yield, adjusted upward or downward to reflect the difference, if any, between the actual and projected amount of any Contingent Coupons on the Notes, as set forth below. The daily portions of interest for a Note are determined by allocating to each day in an accrual period the ratable portion of interest on the Note that accrues in the accrual period. The amount of interest on the Note that accrues in an accrual period is the product of the comparable yield on the Note (adjusted to reflect the length of the accrual period) and the adjusted issue price of the Note at the beginning of the accrual period. The adjusted issue price of a Note at the beginning of the first accrual period will equal its issue price. The issue price of each Note in an issue of Notes is the first price at which a substantial amount of those Notes has been sold (including any premium paid for those Notes and ignoring sales to bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placement agents, or wholesalers). For any subsequent accrual period, the adjusted issue price will be (1) the sum of the issue price of the Note and any interest previously accrued on the Note by a U.S. holder (without regard to any positive or negative adjustments, described below) minus (2) the amount of any projected payments on the Note for previous accrual periods. A U.S. holder of a Note generally will be required to include in income OID in excess of actual cash payments received for certain taxable years. Information returns indicating the amount of OID accrued on Notes held by persons of record other than corporations and certain other “exempt recipients” will be filed with the Internal Revenue Service and sent to such record holder.

A U.S. holder will be required to recognize interest income equal to the amount of any positive adjustment for a Note for the taxable year in which a contingent payment is paid (including a payment of interest at maturity). A positive adjustment is the excess of actual payments in respect of contingent payments over the projected amount of contingent payments. A U.S. holder also will be required to account for any “negative adjustment” for a taxable year in which a contingent payment is paid. A negative adjustment is the excess of the projected amounts of contingent payments over actual payments in respect of the contingent payments. A net negative adjustment is the amount by which total negative adjustments in a taxable year exceed total positive adjustments in such taxable year. A net negative adjustment (1) will first reduce the amount of interest for the Note that a U.S. holder would otherwise be required to include in income in the taxable year, and (2) to the extent of any excess, will result in an ordinary loss equal to that portion of the excess as does not exceed the excess of (A) the amount of all previous interest inclusions under the Note over (B) the total amount of the U.S. holder’s net negative adjustments treated as ordinary loss on the Note in prior taxable years. A net negative adjustment is not subject to the limitations imposed on miscellaneous deductions. Any net negative adjustment in excess of the amounts described above in (1) and (2) will be carried forward to offset future interest income on the Note or to reduce the amount realized on a sale, exchange, or retirement of the Note and, in the case of a payment at maturity, should result in a capital loss. The deductibility of capital losses by a U.S. holder is subject to limitations.

The Issuer also is obligated by applicable U.S. federal income tax regulations to determine, solely for U.S. federal income tax purposes, a projected payment schedule for the Notes that reflects a projected payment for each interest payment and that produces the comparable yield. In accordance with the noncontingent bond method, based upon the estimate of the comparable yield, a U.S. holder

that pays taxes on a calendar year basis, buys a Note for \$1,000, and holds the Note until maturity should be required to report the following amounts of ordinary income in respect of the Notes in each year:

Year	OID
2019	\$23.10
2020	\$29.17
2021	\$21.80

However, the ordinary income reported in the taxable year the Notes mature will be adjusted to reflect the actual payment received at maturity. U.S. holders should also note that the actual comparable yield and projected payment schedule may be different than as provided in this summary depending upon the actual term of the Notes and market conditions on the date the Notes are issued. U.S. holders may obtain the actual comparable yield and projected payment schedule as determined by us by submitting a written request to: Structured Equity Derivatives – Structuring HSBC Bank USA, National Association, 452 Fifth Avenue, 10th Floor, New York, NY 10018. Under the noncontingent bond method, the projected payment schedule is not revised to account for changes in circumstances that occur while the Notes are outstanding. U.S. holders should also note that the actual comparable yield and projected payment schedule may be different than as provided in this summary depending upon the actual term of the Notes and market conditions on the date the Notes are issued. A U.S. holder is generally bound by the comparable yield and the projected payment schedule established by us for the Notes. However, if a U.S. holder believes that the projected payment schedule is unreasonable, a U.S. holder must determine its own projected payment schedule and explicitly disclose the use of such schedule and the reason the holder believes the projected payment schedule is unreasonable on its timely filed U.S. federal income tax return for the taxable year in which it acquires the Notes.

The comparable yield and projected payment schedule are not provided for any purpose other than the determination of a U.S. holder's interest accruals for U.S. federal income tax purposes and do not constitute a projection or representation by us regarding the actual yield on a Note. We do not make any representation as to what such actual yield will be.

Because there are no statutory provisions, regulations, published rulings or judicial decisions addressing the characterization for U.S. federal income tax purposes of securities with terms that are substantially the same as those of the Notes, other characterizations and treatments are possible. As a result, the timing and character of income in respect of the Notes might differ from the treatment described above. You should carefully consider the discussion of all potential tax consequences as set forth in "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement.

Non-U.S. Holders. Please see the discussion under the heading "U.S. Federal Income Tax Considerations — Tax Treatment of Non-U.S. Holders" in the accompanying prospectus supplement for further discussion of U.S. federal income tax considerations applicable to non-U.S. holders (as defined in the accompanying prospectus supplement). Because the U.S. federal income tax treatment (including the applicability of withholding) of Notes and the Contingent Coupons is uncertain, the entire amount of the Contingent Coupons will be subject to U.S. federal income tax withholding at a 30% rate (or at a lower rate under an applicable income tax treaty). We will not pay any additional amounts in respect of such withholding.

A "dividend equivalent" payment is treated as a dividend from sources within the United States and such payments generally would be subject to a 30% U.S. withholding tax if paid to a non-U.S. holder. Under U.S. Treasury Department regulations, payments (including deemed payments) with respect to equity-linked instruments ("ELIs") that are "specified ELIs" may be treated as dividend equivalents if such specified ELIs reference an interest in an "underlying security," which is generally any interest in an entity taxable as a corporation for U.S. federal income tax purposes if a payment with respect to such interest could give rise to a U.S. source dividend. However, Internal Revenue Service guidance provides that withholding on dividend equivalent payments will not apply to specified ELIs that are not delta-one instruments and that are issued before January 1, 2021. Based on the Issuer's determination that the Notes are not "delta-one" instruments, non-U.S. holders should not be subject to withholding on dividend equivalent payments, if any, under the Notes. However, it is possible that the Notes could be treated as deemed reissued for U.S. federal income tax purposes upon the occurrence of certain events affecting the Underlyings or the Notes, and following such occurrence the Notes could be treated as subject to withholding on dividend equivalent payments. Non-U.S. holders that enter, or have entered, into other transactions in respect of the Underlyings or the Notes should consult their tax advisors as to the application of the dividend equivalent withholding tax in the context of the Notes and their other transactions. If any payments are treated as dividend equivalents subject to withholding, we (or the applicable paying agent) would be entitled to withhold taxes without being required to pay any additional amounts with respect to amounts so withheld.

For a discussion of the U.S. federal income tax consequences of your investment in a Note, please see the discussion under "U.S. Federal Income Tax Considerations" in the accompanying prospectus supplement.

PROSPECTIVE PURCHASERS OF NOTES SHOULD CONSULT THEIR TAX ADVISORS AS TO THE FEDERAL, STATE, LOCAL, AND OTHER TAX CONSEQUENCES TO THEM OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF NOTES.
