NOTICE OF AND IMPORTANT INFORMATION ABOUT AN UPCOMING INVESTMENT PORTFOLIO, OR FUND, REORGANIZATION

The following information only affects you if you currently invest in or plan to invest in the subaccount that corresponds to the Voya Multi-Manager Large Cap Core Portfolio.

On March 15, 2018, the Board of Trustees of Voya Investors Trust approved a proposal to reorganize the Voya Multi-Manager Large Cap Core Portfolio (the “Reorganization”). Subject to shareholder approval, effective after the close of business on or about August 24, 2018 (the “Reorganization Date”), Class S shares of the Voya Multi-Manager Large Cap Core Portfolio (the “Merging Fund”) will reorganize with and into Class S shares of the Voya Index Plus LargeCap Portfolio (the “Surviving Fund”).

If shareholders of the Merging Fund approve the Reorganization, from the close of business on August 10, 2018, through the close of business on August 24, 2018, the Merging Fund will be in a “transition period” during which time a transition manager will sell all or most of its assets and the transition manager may hold a large portion of the Merging Fund’s assets in temporary investments. During this time, the Merging Fund may not be pursuing its investment objective and strategies and limitations on permissible investments and investment restrictions will not apply. The sales and purchases of securities during the transition period are expected to result in buy and sell transactions and such transactions may be made at a disadvantageous time.

Voluntary Transfers Before the Reorganization Date. Prior to the Reorganization Date and for 30 days thereafter, you may transfer amounts allocated to the subaccount that invests in the Merging Fund to any other available subaccount or to any available fixed account. There will be no charge for any such transfer, and any such transfer will not count as a transfer when imposing any applicable restriction or limit on transfers. **See the “Transfers Among Your Investments” section beginning on page 31 of your Contract prospectus for information about making subaccount transfers, including applicable restrictions and limits on transfers.**

On the Reorganization Date. On the Reorganization Date, your investment in the subaccount that invests in the Merging Fund will automatically become an investment in the subaccount that invests in the Surviving Fund with an equal total net asset value. You will not incur any tax liability because of this automatic reallocation, and your contract value immediately before the reallocation will equal your contract value immediately after the reallocation.

Automatic Fund Reallocation After the Reorganization Date. After the Reorganization Date, the Merging Fund will no longer be available through your Contract. Unless you provide us with alternative allocation instructions, after the Reorganization Date all allocations directed to the subaccount that invests in the Merging Fund will be automatically allocated to the subaccount that invests in the Surviving Fund. **See the “Transfers Among Your Investments” section beginning on page 31 of your Contract prospectus for information about making fund allocation changes.**

Allocation Instructions. You may give us alternative allocation instructions at any time by contacting Customer Service at P.O. Box 9271, Des Moines, Iowa 50306-9271, (800) 366-0066.

* This fund employs a managed volatility strategy. A managed volatility strategy is a strategy that is intended to reduce a fund's overall volatility and downside risk and, thereby, help us manage the risks associated with providing certain guarantees under the Contract. During rising markets, the hedging strategies employed to manage volatility could result in your contract value rising less than would have been the case if you had been invested in a fund with substantially similar investment objectives, policies and strategies that does not utilize a volatility management strategy. In addition, the cost of these hedging strategies may have a negative impact on investment performance. On the other hand, investing in funds with a managed volatility strategy may be helpful in a declining market with higher market volatility because the hedging strategy will reduce your equity exposure in such circumstances. In such cases, your contract value may decline less than would have been the case if you had not invested in funds with a managed volatility strategy. There is no guarantee that a managed volatility strategy can achieve or maintain the fund's optimal risk targets, and the fund may not perform as expected.
