IMPORTANT INFORMATION ABOUT THE COMPANY

On December 20, 2017, Voya, entered into a Master Transaction Agreement (the “Agreement”) with VA Capital Company LLC, a newly formed Delaware limited liability company (“VA Capital”), and Athene Holding Ltd., a Bermuda limited company, pursuant to which VA Capital’s wholly-owned subsidiary Venerable Holdings Inc. will acquire all of the shares of the capital stock of the Company and all of the membership interests of Directed Services LLC, our affiliate and the principal underwriter and distributor of the Policies as well as for our other variable contracts. The transaction will result in Voya’s disposition of substantially all of its variable annuity and fixed and fixed indexed annuity businesses and related assets. The transaction is expected to close in the second or third quarters of 2018. The consummation of the closing under the Agreement is subject to conditions specified in the Agreement, including the receipt of required regulatory approvals. **The transaction will NOT change the terms, features and benefits of your Policy.**

* This fund employs a managed volatility strategy. A managed volatility strategy is a strategy that is intended to reduce a fund's overall volatility and downside risk and, thereby, help us manage the risks associated with providing certain guarantees under the Contract. During rising markets, the hedging strategies employed to manage volatility could result in your contract value rising less than would have been the case if you had been invested in a fund with substantially similar investment objectives, policies and strategies that does not utilize a volatility management strategy. In addition, the cost of these hedging strategies may have a negative impact on investment performance. On the other hand, investing in funds with a managed volatility strategy may be helpful in a declining market with higher market volatility because the hedging strategy will reduce your equity exposure in such circumstances. In such cases, your contract value may decline less than would have been the case if you had not invested in funds with a managed volatility strategy. There is no guarantee that a managed volatility strategy can achieve or maintain the fund's optimal risk targets, and the fund may not perform as expected.
