## FORWARD-LOOKING STATEMENTS

Except for historical information contained herein, the matters discussed in this Form 10-Q contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements represent estimates, projections and statements of beliefs of Vineyard National Bancorp concerning future events, business plans, objectives, expected operating results and the assumptions upon which those statements are based. Forward-looking statements include without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and are typically identified with words such as “believe,” “anticipate,” “expect,” “estimate,” “project,” “intend,” “will,” “may,” or words or phrases of similar meaning. The Company cautions that the forward-looking statements are based largely on the expectations of the Company and are subject to a number of known and unknown risks and uncertainties that are subject to change based on factors which are, in many instances, beyond the Company’s control. Actual results, performance or achievements could differ materially from those contemplated, expressed, or implied by the forward-looking statements contained herein. For a discussion of some of the risks and uncertainties that might cause such a difference, see Part I - Financial Information, Item 3. Quantitative and Qualitative Disclosures about Market Risk. Investors should not place undue reliance on forward-looking statements as a prediction of actual results. The Company will not update the forward-looking statements to reflect actual results or changes in the factors affecting the forwarding-looking statements.

## **Note #1 - Nature of Business and Summary of Significant Accounting Policies**

The accounting and reporting policies of Vineyard National Bancorp (the "Company") and its wholly-owned subsidiary, Vineyard Bank (the "Bank"), conform to accounting principles generally accepted in the United States of America and to general practices within the banking industry. In the opinion of management, the unaudited Consolidated Financial Statements contain all normal recurring adjustments necessary to present fairly the Company's consolidated financial position at September 30, 2005 and December 31, 2004, results of operations for each of the three and nine months ended September 30, 2005 and 2004, and the results of cash flows for each of the nine months ended September 30, 2005 and 2004.

Certain information and footnote disclosures normally presented in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. These interim Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and notes thereto included in the Company's 2004 Annual Report on Form 10-K filed with the Securities Exchange Commission ("SEC") on March 10, 2005. The results for each of the three and nine months ended September 30, 2005 and 2004 may not necessarily be indicative of the operating results for the full year.

A summary of the Company's significant accounting and reporting policies consistently applied in the preparation of the accompanying financial statements follows:

### Principles of Consolidation

The Consolidated Financial Statements include the Company and the Bank. Inter-company balances and transactions have been eliminated.

### Nature of Operations

The Company is a bank holding company. The Company's principal asset is the capital stock of the Bank, a California-chartered commercial bank, headquartered in the Inland Empire region of Southern California. The Bank operates eleven full-service banking centers within San Bernardino, Riverside, San Diego, Orange and Los Angeles counties of California, as well as three loan production offices in Anaheim, Carlsbad and San Rafael, California. The Company is dedicated to relationship banking and the success of its customers. The Company caters to the needs of small-to-mid-size commercial businesses, retail community businesses, single family residence developers/builders, individuals and local public and private organizations by offering specialty product solutions. The Company attracts deposits from the communities where it has established banking centers by offering competitive interest rate products and providing value-added consumer services.

### Cash and Cash Equivalents

Cash and cash equivalents on the Company's statements of financial condition include federal funds sold.

### Investment in Nonconsolidated Subsidiaries

The Company accounts for its investments in its wholly-owned special purpose entities, Vineyard Statutory Trust I, Vineyard Statutory Trust II, Vineyard Statutory Trust III, Vineyard Statutory Trust IV, Vineyard Statutory Trust V, Vineyard Statutory Trust VI, Vineyard Statutory Trust VII, Vineyard Statutory Trust VIII and Vineyard Statutory Trust IX (collectively, the "Trusts"), using the equity method under which the Trusts' net earnings are recognized in the Company's statements of income.

### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Estimates that are particularly susceptible to significant changes relate to the determination of the allowance for losses on loans and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans.

While management uses available information to recognize losses on loans and foreclosed real estate, future additions to the allowances may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowances for losses on loans and foreclosed real estate. Such agencies may require the Bank to recognize additions to the allowances based on their judgments about information available to them at the time of their examination. Because of these factors, it is reasonably possible that the allowances for losses on loans and foreclosed real estate may change.

#### Investment Securities

The Company accounts for investment securities in accordance with Statement of Financial Accounting Standards ("SFAS") Statement No. 115, *"Accounting for Certain Investments in Debt and Equity Securities,"* which addresses the accounting for investments in equity securities that have readily determinable fair values and for investments in all debt securities. Securities are classified in three categories and accounted for as follows: debt securities that the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity and are measured at amortized cost; debt and equity securities bought and held principally for the purpose of selling in the near term are classified as trading securities and are measured at fair value, with unrealized gains and losses included in earnings; the remaining debt and equity securities are classified as available-for-sale securities and are measured at fair value, with unrealized gains and losses reported in a separate component of stockholders' equity. Gains or losses on sales of investment securities are determined on the specific identification method. Premiums and discounts on investment securities are amortized or accreted using the interest method over the expected lives of the related securities.

#### Allowance for Possible Loan Losses

The Company estimates loan losses based on guidance established by the Financial Accounting Standards Board ("FASB") Statement No. 5, *"Accounting for Contingencies,"* FASB Statement No. 114, *"Accounting by Creditors for Impairment of a Loan"* ("SFAS No. 114"), and FASB Statement No. 118, *"Accounting by Creditors for Impairment of a Loan-Income Recognition and Disclosure"* ("SFAS No. 118"), as well as standards established by regulatory Interagency Policy Statements on the Allowance for Loan and Lease Losses ("ALLL"). The ALLL is maintained at a level which, in management's judgment, is adequate to absorb credit losses inherent in the loan and lease portfolio. The amount of the allowance is based on management's evaluation of the collectibility of the loan portfolio, including the nature of the portfolio, credit concentrations, trends in historical loss experience, specific impaired loans and economic conditions. The allowance is increased by a provision for loan and lease losses, which is charged to expense and reduced by charge-offs, net of recoveries.

#### Comprehensive Income

The Company follows FASB Statement No. 130, *"Reporting Comprehensive Income,"* which requires the disclosure of comprehensive income and its components. Changes in unrealized gains or losses on available-for-sale securities, net of income taxes, is the only component of accumulated other comprehensive income for the Company.

#### Reclassifications

Certain reclassifications have been made to the 2004 financial statements to conform to 2005 classifications.

#### Current Accounting Pronouncements

In December 2004, FASB issued FASB Statement No. 123R *"Share-Based Payment"* ("SFAS No. 123R"), which is a revision to FASB Statement No. 123, *"Accounting for Stock-Based Compensation"* ("SFAS No. 123"), and which addresses the accounting for transactions in which an enterprise receives employee services in exchange for (a) equity instruments of the enterprise or (b) liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. This statement eliminates the ability to account for share-based compensation transactions using Accounting Principles Board Opinion ("APB") No. 25, and generally would require instead that such transactions be accounted for using a fair-value-based method. The statement does not change the accounting in SFAS No. 123, for transactions in which an enterprise exchanges its equity instruments for services of parties other than employees or the accounting for employee stock ownership plans, which are subject to American Institute of Certified Public Accountants ("AICPA") Statement of Position 93-6, *"Employers' Accounting for Employee Stock Ownership Plans"*.

The phase-in period for this statement, as amended April 14, 2005 by the SEC, begins in the first quarter of 2006, at which time the Company will account for stock-based compensation based on this new pronouncement. The Company does not expect the impact of the adoption of SFAS No. 123R to have a material impact on the Company's financial statements based on the existing stock option plan. We anticipate that the impact of SFAS No. 123R will approximate the pro forma results under SFAS No. 123 presented in Note #8 to the financial statements. Future impact of the adoption of SFAS No. 123R will depend on levels of share-based payments granted in the future, as well as the assumptions, the fair value model used to value them, and the market value of our common stock. SFAS No. 123R also requires the benefits of tax deductions in excess of recognized compensation cost to be reported as a financing cash flow, rather than as an operating cash flow as required under current standards. Based on historical experience, we do not expect the impact of adopting SFAS No. 123R to be material to our reported cash flows.

In March 2005, the SEC staff issued Staff Accounting Bulletin No. 107 ("SAB No. 107") to provide guidance on SFAS No. 123R. SAB No. 107 provides the SEC staff's view regarding the valuation of share-based payment arrangements for public companies. In particular, SAB No. 107 provides guidance related to share-based payment transactions with non-employees, the transition from non public to public entity status, valuation methods (including assumptions such as expected volatility and expected term), the accounting for certain redeemable financial instruments issued under share-based payment arrangements, the classification of compensation expense, non-GAAP financial measures, first time adoption of SFAS No. 123R, the modification of employee share options prior to the adoption of SFAS No. 123R and disclosure in Management's Discussion and Analysis subsequent to adoption of SFAS No. 123R. The Company does not expect the guidance of SAB No. 107 to have a material impact on the financial condition or operating results of the Company.

In September 2005, the FASB issued FASB Staff Position ("FSP") No. FAS 123R-b and FSP No. FAS 123R-c. FSP No. FAS 123R-b provides guidance on the application of the grant date as defined in SFAS No. 123R. According to this guidance, the grant date is considered to be the date the award is approved in accordance with the entity's corporate governance provisions. In addition, a mutual understanding of the key terms and conditions of an award to individual employees should exist as of the date the award is approved. FSP No. FAS 123R-c provides a practical transition election related to the accounting for the tax effects of share-based payment awards to employees as discussed in SFAS No. 123R. According to this FSP, a Company can elect to calculate net excess tax benefits according to SFAS No. 123R or according to the method set forth in this guidance.

In May 2005, FASB issued FASB Statement No. 154, *"Accounting Changes and Error Corrections"* ("SFAS No. 154"). SFAS No. 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes, unless impracticable, retrospective application as the required method for reporting a change in accounting principle in the absence of explicit transition requirements specific to the newly adopted accounting principle. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. The Company does not expect the adoption of SFAS No. 154 to have a material impact on the financial condition or operating results of the Company.

## **Note #2 - Commitments and Contingencies**

In the normal course of business, the Company is a party to financial instruments with off-balance sheet risk. These financial instruments include commitments to extend credit and letters of credit. To varying degrees, these instruments involve elements of credit and interest rate risk in excess of the amount recognized in the Company's Consolidated Financial Statements. The Company's exposure to credit loss in the event of non-performance by the other party to the financial instruments for undisbursed loan funds and letters of credit is represented by the contractual amount of those instruments. At September 30, 2005 and December 31, 2004, the amounts of the Company's undisbursed loan funds were \$576.3 million and \$439.4 million, respectively, and obligations under standby and commercial letters of credit were \$3.3 million and \$1.7 million for the same periods, respectively.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, income-producing commercial properties, residential properties and properties under construction.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Commercial letters of credit are conditional commitments issued by the Company to facilitate trade or commerce. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

In the normal course of business, the Company is subject to legal actions and complaints. At September 30, 2005, management is not aware of any material pending legal action or complaint asserted against the Company.

### **Note #3 - Junior Subordinated Debentures**

On April 15, 2005, the Company issued \$10.3 million in junior subordinated debentures to a newly formed trust, Vineyard Statutory Trust VIII. Vineyard Statutory Trust VIII simultaneously issued \$10.0 million of trust preferred securities as part of a pooled securitization transaction with several other financial institutions and the Company purchased a 3% minority interest totaling \$0.3 million in Vineyard Statutory Trust VIII. Therefore, the Company received \$10.0 million in net proceeds from the transaction. The trust preferred securities bear a floating interest rate of three-month LIBOR plus 2.25%, and will mature on May 23, 2035.

On August 19, 2005, the Company issued \$15.5 million in junior subordinated debentures to a newly formed trust, Vineyard Statutory Trust IX. Vineyard Statutory Trust IX simultaneously issued \$15.0 million of trust preferred securities as part of a pooled securitization transaction with several other financial institutions and the Company purchased a 3% minority interest totaling \$0.5 million in Vineyard Statutory Trust IX. Therefore, the Company received \$15.0 million in net proceeds from the transaction. The trust preferred securities bear a floating interest rate of three-month LIBOR plus 1.70%, and will mature on November 23, 2035. The interest rate resets quarterly and the initial rate is set at a pretax interest cost of 5.51%.

The investment in Vineyard Statutory Trust VIII and Vineyard Statutory Trust IX is included in Other Assets on the Company's Consolidated Balance Sheet. The total balance of junior subordinated debentures outstanding at September 30, 2005 is \$96.9 million

### **Note #4 - Issuance of Capital Stock**

On April 15, 2005, the Company issued 10,000 shares of Floating Rate Series C Noncumulative Redeemable Perpetual Preferred Stock ("Series C Preferred Stock") through a private placement transaction with an institutional investor as part of a pooled transaction.

The Series C Preferred Stock was issued at \$1,000 per share for aggregate proceeds of \$9.7 million, net of fees and expenses. The Series C Preferred Stock ranks senior to the Company's common stock. Each share of Series C Preferred Stock is entitled to a noncumulative, annual dividend at the rate of three-month LIBOR plus 3.80%, payable quarterly. Cash dividends are payable January 1, April 1, July 1, and October 1 of each year, and must be declared by the Company's Board of Directors prior to the dividend payment date. The interest rate resets quarterly and the initial rate was set at 6.95%.

On June 15, 2005, the Company declared a cash dividend on the Series C Preferred Stock, based on the initial interest rate of 6.95%, and paid the dividend on July 1, 2005. On September 22, 2005, the Company declared a cash dividend on the Series C Preferred Stock, based on the interest rate of 7.30%, and paid the dividend on October 3, 2005.

The Series C Preferred Stock is not convertible into common stock and is callable after five years at a premium and at a decreasing premium scale over the following ten years until year fifteen when the instrument is callable at a zero premium.

### **Note #5 - Shelf Registration Statement**

On August 31, 2005, the Company filed a universal shelf registration statement on Form S-3 with the SEC. The shelf registration statement was declared effective on September 27, 2005. The shelf registration statement permits the Company to offer and sell up to \$125.0 million of various debt or equity securities from time to time in one or more public offerings.

The terms of any such future offerings will be established at the time of each offering. The Company intends to use the proceeds from any such offering for general corporate purposes and to support the future anticipated growth of the Bank.

### **Note #6 - Dividends**

On August 1, 2005, the Company declared an increase in its cash dividend on common shares to \$0.07 per share. The dividend was paid on September 2, 2005, to shareholders of record as of August 19, 2005. On May 27, 2005, the Company paid a \$0.06 per share dividend to shareholders of record as of May 13, 2005. On February 25, 2005, the Company paid a cash dividend of \$0.05 per share to shareholders of record as of February 11, 2005.

**Note #7 - Employee Stock Ownership Plan**

During April 2004, the Company's Board of Directors approved the formation of a company-sponsored Employee Stock Ownership Plan (the "ESOP") under the Vineyard National Bancorp Employee Stock Ownership Plan Trust (the "ESOP Trust") for the benefit of the Company's eligible full-time employees. This leveraged ESOP is funded by a loan, which is secured by the ESOP shares. The number of shares released is based on the principal pay down of the loan balance. The amount of shares allocated to each participant under the ESOP is based on the employee's annual compensation. ESOP shares become fully vested to employees upon the completion of five years of service with the Company. ESOP participants are entitled to receive distributions from the ESOP account generally upon termination of service, which includes retirement and death.

To fund the purchase in the open market of shares of common stock of the Company, the ESOP Trust secured a loan in the amount of \$7.0 million with a third party bank which was guaranteed by the Company. The ESOP loan bore a floating interest rate of 0.5% over the national prime rate and was scheduled to mature ten years after the date of initial advance. During the fourth quarter of 2004, the ESOP Trust refinanced the ESOP loan with a new note with the same terms through the Company and paid off the note with the third party bank, therefore eliminating the loan payable balance on the Company's financial statements. The outstanding balance of the ESOP loan is collateralized by the assets of the ESOP and is guaranteed by the Company. Dividends paid on the unallocated shares owned by the ESOP may be used to pay debt service or to pay trustee fees at the Company's election. Shares held by the ESOP are held by an independent trustee for allocation among participants as the loan is repaid.

The ESOP used the full amount of the loan to purchase 149,000 shares of the Company's common stock in the open market. As a result of the stock split in August 2004, the ESOP held 298,000 shares of the Company's common stock. The cost of shares held by the ESOP and not yet released or allocated to employees is reported as a reduction of stockholders' equity. Upon release of the shares, released shares of the ESOP are charged to compensation expense based on the fair value of the shares transferred, with a corresponding credit to the Company's equity. The Company recognized \$0.2 million and \$0.5 million, respectively, of compensation expense for the release of ESOP shares for the three and nine months ended September 30, 2005.

For purposes of earnings per share ("EPS") computations and in accordance with Statement of Position 93-6 "*Employers' Accounting for Employee Stock Ownership Plans*", ESOP shares are treated as outstanding if they have been allocated to participants, released, or committed to be released. In December 2004, 6,006 shares were allocated to participants, and during the nine months ended September 30, 2005, 589 of the allocated shares were forfeited due to participants' termination of employment. Forfeited shares are considered to be released but unallocated shares. The forfeitures left a balance of 5,417 allocated shares. In January 2005, April 2005 and July 2005, 5,967, 5,944 and 5,845 shares, respectively, were released in conjunction with paydowns of the ESOP loan and will be allocated to participants in December 2005.

As of September 30, 2005, 5,417 shares held by the ESOP have been allocated to participants, and an additional 18,345 shares have been released but unallocated to participants. The 292,583 unallocated shares represent 3.0% of the total number of common shares outstanding at September 30, 2005. The fair value of unallocated ESOP shares as of September 30, 2005 was \$8.6 million.

**Note #8 - Earnings per Share and Book Value**

Basic EPS excludes dilution and is computed by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity.

The following is a reconciliation of net income and shares outstanding to the income and number of shares used to compute EPS:

(Dollars in Thousands)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2005		2004		2005		2004	
	Income	Shares	Income	Shares	Income	Shares	Income	Shares
Net income as reported	\$ 5,279		\$ 3,670		\$ 14,454		\$ 9,924	
Less: preferred stock dividends declared	(191)		-		(340)		(702)	
Less: excess cost to redeem preferred stock	-		(3)		-		(71)	
Shares outstanding at end of period		9,683,371		8,874,466		9,683,371		8,874,466
Unreleased and unallocated ESOP shares		(274,238)		(298,000)		(274,238)		(298,000)
Impact of weighting shares issued during the period		(2,339)		(21,274)		(79,465)		(1,266,451)
Used in basic EPS	\$ 5,088	9,406,794	\$ 3,667	8,555,192	\$ 14,114	9,329,668	\$ 9,151	7,310,015
Plus: anti-dilutive effect of Series B dividends and redemption	-		3		-		654	
Dilutive effect of outstanding stock options and warrants		415,907		672,953		447,875		1,526,615
Used in diluted EPS	\$ 5,088	9,822,701	\$ 3,670	9,228,145	\$ 14,114	9,777,543	\$ 9,805	8,836,630

The following table illustrates the effect on net income and EPS if the Company had applied the fair value recognition of SFAS No. 123 to stock based employee compensation:

(Dollars in Thousands, except per share data)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2005	2004	2005	2004
Net income:				
As reported	\$ 5,279	\$ 3,670	\$ 14,454	\$ 9,924
Less: preferred stock dividends declared	(191)	-	(340)	(702)
Less: excess cost to redeem preferred stock	-	(3)	-	(71)
Stock-based compensation that would have been reported using the fair value method of SFAS No.123	(43)	(7)	(110)	(86)
Pro forma net income - used in basic EPS	5,045	3,660	14,004	9,065
Add: anti-dilutive effects of Series B dividends	-	3	-	654
Pro forma net income - used in diluted EPS	\$ 5,045	\$ 3,663	\$ 14,004	\$ 9,719
Weighted average shares outstanding - basic	9,406,794	8,555,192	9,329,668	7,310,015
Weighted average shares outstanding - diluted	9,822,701	9,228,145	9,777,543	8,836,630
Basic EPS				
As reported	\$ 0.54	\$ 0.43	\$ 1.51	\$ 1.25
Pro forma	\$ 0.54	\$ 0.43	\$ 1.50	\$ 1.24
Diluted EPS				
As reported	\$ 0.52	\$ 0.40	\$ 1.44	\$ 1.11
Pro forma	\$ 0.51	\$ 0.40	\$ 1.43	\$ 1.10

The following table sets forth the information that was used in calculating the Company's book value per common share as of September 30, 2005 and December 31, 2004:

	As of	
	September 30, 2005	December 31, 2004
Period-end shares outstanding	9,683,371	9,581,941
Unreleased and unallocated ESOP shares	(274,238)	(291,994)
Used in basic book value per common stock	9,409,133	9,289,947
Warrants <sup>(1)</sup>	177,640	227,990
Additional Investment Rights <sup>(2)</sup>	-	120,775
Used in book value per common stock, assuming exercise of warrants and additional investment rights	9,586,773	9,638,712
Book value per common stock, basic	\$ 10.25	\$ 9.17
Book value per common stock, assuming exercise of warrants and additional investment rights	\$ 10.49	\$ 9.69

(1) In conjunction with the issuance of Series A Preferred Stock in December 2002, warrants to purchase common stock were granted to eight individual investors. The warrants have an exercise price of \$6.80 per share. Additional warrants were granted to institutional investors in June 2004 in conjunction with a private placement of common stock. These warrants have an exercise price of \$25.00 per share.

(2) Additional Investment Rights to purchase common stock were granted to investors in conjunction with the December 2004 private placement of common stock were exercisable for \$31.05 per share. All Additional Investment Rights were exercised prior to their expiration date of June 15, 2005.

#### Note #9 - Subsequent Events

On October 3, 2005, the Company paid a quarterly cash dividend on its Series C Preferred Stock. The dividend was declared by the Company's Board of Directors on September 22, 2005 to Series C Preferred Stock shareholders of record on September 23, 2005.

On October 10, 2005, the Company's Board of Directors announced a \$20.0 million increase to its stock repurchase program. The original stock repurchase program established in July 2002 for \$2 million had been previously increased by an additional \$15 million over the past three years. The repurchase of any or all such shares authorized for repurchase will be dependent on management's assessment of market conditions. The shares repurchased by the Company under the stock repurchase program are to be held as treasury shares and may be used to fund authorized shares pursuant to the 2004 and 2005 Restricted Share Plans.

On November 1, 2005, the Company declared an increase in its cash dividend on common shares to \$0.08 per share. The dividend is payable on December 9, 2005, to shareholders of record as of November 25, 2005.

Board of Directors and Shareholders of  
Vineyard National Bancorp and Subsidiaries

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

We have reviewed the accompanying consolidated statements of financial condition of Vineyard National Bancorp and Subsidiary as of September 30, 2005, and the related consolidated statements of income, cash flows and changes in stockholders' equity for the three and nine month period then ended. This financial information is the responsibility of the Company's management.

We conducted our review in accordance with standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial information for it to be in conformity with accounting principles generally accepted in the United States of America.

## ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis of financial condition and results of operations is intended to provide a better understanding of the significant changes in trends relating to the Company's business, financial condition, results of operations, liquidity and interest rate sensitivity. The following discussion and analysis should be read in conjunction with the Company's quarterly unaudited Consolidated Financial Statements, and notes thereto, contained earlier in this Report.

Management's discussion and analysis of the Company's financial condition and results of operations are based upon the Company's Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates their estimates including those related to allowance for loan losses and the value of carried securities. Management bases their estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

### Business and Organization

#### *Vineyard National Bancorp*

The Company is a California-chartered bank holding company that commenced business in December 1988 when it acquired all of the voting stock of the Bank, a California-chartered commercial bank. The Bank commenced business in September 1981 as a national banking association and converted to a California bank charter and took its present name in August 2001. The Bank operates under the supervision of the California Department of Financial Institutions ("DFI") and the Federal Deposit Insurance Corporation ("FDIC").

At September 30, 2005, the Company had consolidated total assets of \$1.7 billion, total deposits of \$1.1 billion and consolidated stockholders' equity of \$106.1 million. The Company's common stock is publicly traded on the Nasdaq National Market under the symbol "VNBC."

#### *Vineyard Bank*

The Bank, which is the Company's wholly-owned subsidiary, is primarily involved in attracting deposits from individuals and businesses and using those deposits, together with borrowed funds, to originate various types of loans and invest in investment securities. The Bank operates eleven full-service banking centers located in each of the communities of Rancho Cucamonga, Chino, Diamond Bar, La Verne, Crestline, Lake Arrowhead, Irwindale, Manhattan Beach, San Diego, Irvine and Corona, all of which are located within Los Angeles, Riverside, San Diego, Orange and San Bernardino counties in California. The Bank also has three loan production offices in Anaheim, Carlsbad and San Rafael, California. The Bank's SBA division has received preferred lending status throughout California and has traditionally focused its SBA loan generation in the San Diego, Anaheim and Carlsbad offices. With the addition of the San Rafael loan production office, the Bank will extend further into Northern California in all of its loan specialty origination efforts. The loan production office in San Rafael, California will be converted into a full-service banking center in early 2006. The Rancho Cucamonga office serves as the Company's headquarters.

#### *The Bank's Strategic Plan*

Since the hiring of its current president and chief executive officer in October 2000, the Bank has experienced significant growth pursuant to the execution of its strategic business plan, which emphasizes growth through the expansion of its lending products and deposit services. As the Bank implemented its growth strategy, it has added additional executive management personnel with developed business banking and service skills, concentrating on a sales and service approach to its banking business. The Bank focuses its values of creativity, integrity and flexibility on customer relationship management, while expanding the Bank's products and services by creating various specialty groups including community-based core deposit growth through the banking center network, single family coastal construction lending, single family tract construction lending, commercial real estate construction lending, commercial real estate lending, multi-family property lending, small business and commercial lending, SBA lending, religious financial services (lending and depository), specialized depository and cash management services for commercial business, and private banking. The Bank believes that expanding many of its existing relationships will prove to be an effective source of new business opportunities. The Bank is focused on providing customer relationship management to the following markets within California: (i) the Inland Empire region of Southern California, which primarily includes San Bernardino and Riverside counties, (ii) the Los Angeles county coastal communities, (iii) the San Gabriel Valley region of Los Angeles and (iv) the coastal communities of Orange and San Diego counties. The Bank has targeted these markets because of its experience and knowledge of, as well as the anticipated continued growth and potential for development in these markets. Further, the Bank believes that it can roll out its developed products and services in a similar process as in the last few years in non-contiguous geographic markets similar to its current market.

*Expanded Product Offering.* During the last four years, the Bank has emphasized the growth of its loan portfolio and has augmented its traditional commercial and residential loans and services with several specialty lending and depository services.

- In 2001, the Bank began originating high-end market single-family construction loans within the coastal communities of Los Angeles, California (primarily Manhattan Beach, Hermosa Beach and Redondo Beach, as well as the Palos Verdes Peninsula area), where it believed it had a competitive advantage based on established builder and customer relationships and expertise in the construction market. This specialty lending group has expanded its builder and customer base and now finances projects in Los Angeles' upper end "west side" (including Beverly Hills, Brentwood and Malibu) and Orange County coastal regions. The demand for new luxury construction in many of these communities continues to be especially strong. These types of construction loans typically range from \$1.0 million to \$5.0 million. The Bank's single-family residential coastal construction loans outstanding amounted to \$341.7 million and \$299.0 million at September 30, 2005 and December 31, 2004, respectively, net of participations sold of \$135.4 million and \$59.6 million, respectively. At September 30, 2005 and December 31, 2004, unfunded commitments relating to single-family residential coastal construction loans amounted to \$277.0 million and \$213.4 million, respectively.
- In 2002, the Bank began originating single-family residential tract construction loans, primarily secured by newly-constructed, entry to mid-level detached homes. These loans are predominantly originated within the Inland Empire of Southern California, however the Bank has financed projects throughout California. Its builders operate within approximately twenty communities where demand for new affordable housing is consistently exceeding new production supply, with a substantial amount of new housing starts pre-sold to qualified buyers. The Inland Empire's resale and new home markets continue to be supported by a growing labor base and relatively low mortgage rates. These types of construction loans typically range from \$3.0 million to \$10.0 million. The Bank's single-family residential tract construction loans outstanding amounted to \$143.6 million and \$129.9 million at September 30, 2005 and December 31, 2004, respectively, net of participations sold of \$6.3 million and \$1.7 million, respectively. At September 30, 2005 and December 31, 2004, unfunded commitments relating to single-family residential tract construction loans amounted to \$175.0 million and \$153.4 million, respectively.
- In 2002, the Bank also began originating SBA loans and religious loans (which are comprised of loans to churches and private schools) throughout its market area. The Bank emphasizes these types of loans as they are a complement to the Bank's focus on strengthening and supporting the local communities it serves. Religious loans amounted to \$29.4 million and \$23.8 million at September 30, 2005 and December 31, 2004, respectively. During July 2005, the Company opened a new loan production office in Carlsbad, California, which will focus partially on SBA loans. SBA loans amounted to \$14.0 million and \$18.0 million at September 30, 2005 and December 31, 2004, respectively, net of participations sold of \$38.1 million and \$29.0 million, respectively.
- In 2003, the Bank established an income property lending division to service the growing markets for commercial real estate and multifamily/apartments in Southern California. The commercial real estate portfolio includes office buildings, retail outlets and industrial warehouses, the majority of which are located in the Inland Empire region, and Los Angeles and Orange counties. The Southern California office market has witnessed strong demand for space, as evidenced by decreased vacancy rates. Due to the steady rise in population and the strong demand for housing, the competitive advantage remains appealing to companies repositioning themselves to the Inland Empire. The Bank's multifamily loan portfolio is centered in Los Angeles and Orange counties, as well as the Inland Empire region. Given the relatively high home prices in Southern California, the apartment market has experienced solid rental performance. Vacancy rates remain relatively low as renters are finding little product available for lease. Commercial real estate loans generated from this division typically range from \$2.0 million to \$10.0 million, while apartment loans typically range from \$0.5 million to \$5.0 million. At September 30, 2005 and December 31, 2004, the outstanding balance of loans generated from this division amounted to \$226.8 million and \$91.6 million, respectively, for commercial real estate loans and \$250.1 million and \$177.9 million, respectively, for apartment loans.

- In order to expand the Bank's core deposit franchise, the Community Banking Group of the Bank has focused on offering competitive interest rate products, offering promotional rates for new customers, and providing value-added consumer services by introducing additional products and services. Each of the Bank's eleven full-service banking centers has a business plan catering specifically to the needs of consumers in that banking center market. Based on the demographics of the target market, each banking center tailors its offering of financial services and products for its customer base. Business deposits have been pursued by offering an expanded courier network, by introduction of cash management products and by specific targeting of small business customers. The Company's core deposit franchise has been built around the community banking system, which resulted in deposit growth of 16.1% for the nine months ended September 30, 2005 and 54.3% for the same period ended in 2004. Consolidated total deposits amounted to \$1.1 billion at September 30, 2005 and \$965.5 million at December 31, 2004. Non-interest bearing demand deposits amounted to \$160.3 million at September 30, 2005 and \$127.5 million at December 31, 2004.

Each of the foregoing specialty lending groups and depository services brings diversity to the Bank's existing product lines, offering its customers greater flexibility while providing additional opportunities for the Bank to serve new customers within its primary market areas.

*Loan and Deposit Growth.* The Bank's growth in loans, net of unearned income and deferred fees, was 26.7% for the nine months ended September 30, 2005 and 70.9% for the same period in 2004. The volume of new loan commitments during the three and nine months ended September 30, 2005 was \$0.4 billion and \$1.1 billion, respectively, which not only replaced loan payoffs, but increased the gross loan balance to \$1.3 billion at September 30, 2005. As part of the Bank's goal of balanced lending, net increases in its loan portfolio are intended to produce a distribution mix of 5-15% in commercial loans, 0-5% in SBA loans, 15-35% in commercial real estate loans, 15-30% in single-family coastal construction, 15-30% in single-family tract construction, 15-25% in multi-family loans, 5-15% in consumer loans, 0-5% in commercial real estate construction loans and 0-5% in land loans. The Bank has been focusing on originating certain loan products in order to achieve the intended loan portfolio mix.

Beginning in 2004, the Bank has proactively managed the product concentrations within the loan portfolio by selling participations and purchasing loans. During the three and nine months ended September 30, 2005, the Bank had \$86.7 million and \$141.7 million, respectively, in loan participation sales and \$0 and \$12.7 million, respectively, in loan participation purchases. These activities will continue to be an integral part of the Bank's strategic plan to diversify risk, income sources and product/geographic concentrations within the loan portfolio, in addition to managing the liquidity and funding needs of a growing loan portfolio.

The Bank's net growth in deposits was 16.1% for the nine months ended September 30, 2005 and 54.3% for the same period in 2004. The intended distribution of deposits is 10-25% in NOW and non-interest bearing demand deposits, 30-50% in money market deposits and 30-50% in savings and time deposits.

The Company will continue to focus on obtaining core deposits to support the growth of the loan portfolio. The Company will focus on organic, or internal, deposit and lending growth by positioning new teams within new markets and expanding the community banking base within existing markets. The expanded banking base will be achieved through a broadening of commercial and business banking, expanded private banking and entrepreneurial services, and enhanced corporate cash management.

*Relationship Banking Facilities.* The Company continues to emphasize the relationship banking focus that was initiated in 2001. The Company continues to seek and retain experienced banking professionals with developed banking and service skills who share its customer-oriented service philosophy. The Company believes that relationship banking is best delivered in well-appointed and efficient banking centers that provide the appropriate tools and environment for its customers. To that end, the Bank's facilities have been redesigned to incorporate user-friendly technology and personal service to facilitate its focus on relationship banking. The investment in the infrastructure will support the continued expansion of the Company.

*Strategic Expansion.* The Company has experienced significant growth over the last several years in its branch network and its asset size. This growth was a result of the successful completion of Phase I through III of a strategic plan which includes six phases. The Bank's strategic plan and capital adequacy plan call for measured growth. In relation to the Bank's significant growth over the last several years, the Bank continues to assess and develop its policies and procedures to facilitate the successful implementation of its strategic plan and capital adequacy plan, while maintaining the safety and soundness of the Bank.

The objective of Phase I was to increase the number of offices and product lines in the Company's existing geographic markets. The objective of Phase I was achieved in 2003 and 2004 with the addition of new banking centers in Corona, Manhattan Beach and Irwindale, California. Loan production offices were also opened in Irvine and Anaheim, California. These locations were selected to support the Company's significant growth and are aligned with its strategic expansion.

Phase II of the Company's strategic plan called for contiguous expansion into the surrounding communities of the Company's current markets, possible de novo offices and the continued branding and strategic marketing of the Vineyard Bank brand in target geographic and product markets.

Phase III of the Company's strategic plan emphasized non-contiguous expansion through possible strategic acquisitions or de novo offices in new markets.

Consistent with the objectives of Phase II and Phase III of the strategic plan, the Company expanded its loan production offices into full-service banking facilities in Irvine and San Diego, California. The Irvine and San Diego banking sites became fully operational at the beginning of the third quarter of 2005. These high-end growth markets will also be supported by an expanded division of personnel focused on entrepreneurs and the businesses they operate, while bringing the Company's specialty lending and deposit relationship efforts into new areas. The Company also opened a new loan production office in Carlsbad, California in July 2005. In addition, the Company completed the leasehold improvements to the Corona Pointe administration building during the second quarter of 2005, which currently houses the credit administration, central operations, and data center, among other departments.

Phase IV of the Company's strategic plan will emphasize expansion in the coastal communities of California through possible strategic acquisitions or de novo offices within markets with similar demographics as Manhattan Beach. This phase also entails the distribution of existing products to these new markets and placement of local management in different geographic regions of the Bank.

Consistent with the objectives of Phase IV of the strategic plan, the Company expanded its market presence into Northern California with the establishment of the Marin County Banking Center in September 2005. This location will initially function as a loan production office which will focus on income-property, business, and single-family construction loans. The loan production office will be converted into a full-service banking center in January 2006.

The main emphasis of Phase V of the Company's strategic plan will be to strengthen the strategic points of the coastal communities' expansion initiative, recruit local talent within each new market community and continue to build the infrastructure and delivery systems of the Bank.

Phase VI of the Company's plan calls for locally-managed regional communities which offer similar product lines and are all supported by a strong corporate infrastructure and the Vineyard Bank brand.

The aforementioned phases of the Company's strategic plan may not be implemented on a linear timeline, but will be implemented at different times for different geographical regions of the Company. Along with the six phases of the strategic plan, the Company is pursuing a diverse asset base and organizational structure. To this end, the Company will focus on the imaging and branding of the Bank in target geographic regions and product markets.

The Company will achieve its goals through organic deposit and lending growth by the positioning of new teams within new growth markets and existing markets. The Bank has begun implemented the strategy of organic growth within the San Diego, Irvine, and Marin county markets, where seasoned banking professionals have been strategically placed to establish and grow the business.

*Asset Growth.* The Company's total assets as of September 30, 2005 were \$1.7 billion as compared to \$1.3 billion as of December 31, 2004. The Company believes it can grow its assets while maintaining its asset quality. The Company's lending professionals are well experienced and follow policies and procedures that it believes provide for a rigorous underwriting of all loans originated by the Bank. At September 30, 2005, the Bank had \$5.0 million of non-performing loans and no other real estate owned. At December 31, 2004, the Bank had no non-performing loans and no other real estate owned. The increase in non-accrual loans during the nine months ended September 30, 2005 relates to one fully collateralized tract construction loan which was placed on non-accrual status during March 2005 and one SBA-guaranteed loan placed on non-accrual status during August 2005. Substantially all principal and accrued interest is expected to be collected in 2005.

## **Results of Operations**

During the three and nine months ended September 30, 2005, operating results demonstrated a steady growth over the same periods in 2004 as the volume of earning assets increased. Average gross loans for the three and nine months ended September 30, 2005 were \$1.3 billion and \$1.2 billion, respectively, as compared to \$1.0 billion and \$0.9 billion for the same periods in 2004, respectively. Similarly, average investment securities increased from \$0.2 billion for the three and nine months ended September 30, 2004 to \$0.3 billion for the same periods in 2005. Average investment securities balances are based on historical amortized cost. The growth in the Company's earning assets during the three and nine months ended September 30, 2005 was mainly funded by increased deposits, borrowings and equity, including FHLB advances, issuance of trust preferred securities, and the issuance of preferred stock.

Net income for the three months ended September 30, 2005 and 2004 was \$5.3 million and \$3.7 million, respectively, representing an increase of 43.8% for the three months ended September 30, 2005 as compared to the same period in 2004. Net income for the nine months ended September 30, 2005 and 2004 was \$14.5 million and \$9.9 million, respectively, representing an increase of 45.6% for the nine months ended September 30, 2005 as compared to the same period in 2004.

The increase in net income was primarily due to an increase in interest income generated from a higher level of loans which was partially offset by an increase in interest expense incurred from higher interest rates on deposits and borrowings. On a per diluted share basis, net income was \$0.52 and \$0.40 for the three months ended September 30, 2005 and 2004, respectively, and \$1.44 and \$1.11 for the nine months ended September 30, 2005 and 2004, respectively.

The Company's net interest income before provision for possible loan losses increased by \$3.5 million or 24.6% for the three months ended September 30, 2005 as compared with the same period in 2004, and increased by \$10.5 million or 27.5% for the nine months ended September 30, 2005 as compared with the same period in 2004. Non-interest income increased by \$0.2 million or 14.3% for the three months ended September 30, 2005 as compared to the same period in 2004, and increased by \$0.1 million or 3.1% for the nine months ended September 30, 2005, as compared with the same period in 2004. The higher non-interest income for the three and nine months ended September 30, 2005 compared to the same periods in 2004 relates mainly to the increase of \$0.4 million from the sale of construction loans. Based on the substantial increase in net interest income, total net revenue (defined as non-interest income plus net interest income before provision for possible loan losses) for the three months ended September 30, 2005 increased by \$3.7 million or 23.6% as compared to the same period in 2004, and total net revenue increased by 25.1% or \$10.6 million for the nine month period ended September 30, 2005 compared to the same period in 2004.

Total non-interest expense was \$9.8 million and \$8.1 million for the three months ended September 30, 2005 and 2004, respectively, and \$26.7 million and \$20.7 million for the nine months ended September 30, 2005 and 2004, respectively. This represents an increase of \$1.7 million or 20.7% for the three month period and an increase of \$6.1 million or 29.2% for the nine month period. The largest item contributing to non-interest expense was salaries and employee benefits which represented more than 50% of total non-interest expense for each of the periods. The Company continues to hire additional personnel to support its growth. The Company's efficiency ratio, which is a measure of non-interest expense divided by net interest income before provision for possible loan losses plus non-interest income, decreased from 51.8% to 50.6% for the three months ended September 30, 2004 and 2005, and increased from 48.9% to 50.5% for the nine month periods ended September 30, 2004 and 2005, respectively. The increase in the efficiency ratio for the first nine months of 2005 is primarily related to the Company's completion of its expansion of the infrastructure to support the continued growth of the Company which began in late 2004 through 2005.

For the three and nine months ended September 30, 2005, the provision for federal and state income taxes was \$3.8 million and \$10.4 million, respectively, while the provision for federal and state income taxes was \$2.5 million and \$6.9 million for the same periods in 2004. These provisions for income taxes represent effective tax rates of 41.8% for the three and nine months ended September 30, 2005 and 40.9% for the same periods in 2004.

The Bank's loan losses continued to be minimal, producing \$0.1 million in net charge-offs for the nine months ended September 30, 2005, compared to \$0.2 million in net charge-offs for the same period in 2004 and \$0.3 million for the year ended December 31, 2004. The Company recorded a provision to the allowance for possible loan losses of \$0.5 million and \$1.4 million for the three and nine months ended September 30, 2005, respectively, as compared to a provision of \$1.4 million and \$4.8 million for the same periods in 2004, respectively. The allowance for possible loan losses was \$14.3 million or 1.1% of gross loans at September 30, 2005 as compared to \$13.0 million or 1.3% of gross loans at December 31, 2004. Based on management analysis, the allowance for possible loan losses is adequate as of September 30, 2005. However, no assurance can be made that further additions to the allowance will not be necessary. At September 30, 2005, the Company had \$5.0 million of non-performing loans and no other real estate owned, representing 0.4% of non-performing loans to gross loans. At December 31, 2004, the Company had no non-performing loans and no other real estate owned. The increase in non-accrual loans during the nine months ended September 30, 2005 relates to one fully collateralized tract construction loan which was placed on non-accrual status during March 2005 and one SBA-guaranteed loan placed on non-accrual status during August 2005. Substantially all principal and accrued interest is expected to be collected in 2005.

### *Net Interest Income*

The Company's earnings are derived predominately from net interest income, which is the difference between the interest income earned on interest-earning assets, primarily loans and securities, and the interest expense incurred on interest-bearing liabilities, primarily deposits and borrowings. The net interest margin is the net interest income divided by the average interest-earning assets. Net interest income and net interest margin are affected by several factors including (1) the level of, and the relationship between, the dollar amount of interest-earning assets and interest-bearing liabilities; (2) the relationship between repricing or maturity of the Company's variable rate and fixed rate loans and securities, and its deposits and borrowings; and (3) the magnitude of the Company's non-interest earning assets, including non-accrual loans and other real estate owned.

Beginning in early 2001, the Company began to implement an asset/liability management strategy that was built around the risk elements of interest rate, asset duration and funding risks. A component of this strategy was to deploy excess liquidity previously invested in lower yielding earning assets into higher yielding earning assets. During the past four years, the Company has deployed its excess liquidity previously invested in federal funds into mortgage-backed securities with relatively short duration and higher cash flow components. The investment portfolio is classified as available-for-sale and securities can be sold at any time.

The Company's net interest margin has declined in 2005 as a result of a change in the mix of assets and liabilities. During 2005, the Company began to diversify its asset portfolio to minimize risk. Therefore, the Company has focused on increasing its income property loan originations, instead of higher yielding construction loans, in order to maintain the loan portfolio mix set forth by the Company's Board of Directors. The Company has also increased its fixed-rate investment securities, which have a lower yield than the loan portfolio. To fund the strong loan growth, the Company's funding costs have increased as FHLB borrowings have increased relative to low cost core deposits. The Company will continue to focus on obtaining low cost core deposits to support the growth of the loan portfolio and to reduce its borrowings, and will continue to adjust and refine its asset/liability management strategy to minimize interest rate risk and maximize its net interest income.

Total interest income for the three months ended September 30, 2005 and 2004 was \$29.8 million and \$20.3 million, respectively, while total interest expense was \$12.2 million and \$6.2 million for the same periods, respectively. Therefore, the net interest income was \$17.6 million and \$14.1 million, respectively, for the same periods.

Total interest income for the nine months ended September 30, 2005 and 2004 was \$78.6 million and \$53.6 million, respectively, while total interest expense was \$29.8 million and \$15.3 million for the same periods, respectively. Therefore, the net interest income was \$48.7 million and \$38.2 million, respectively, for the same periods.

The prime rate has increased significantly during 2004 and 2005. The prime rate remained stable at 4.0% for the first half of 2004. In mid 2004, the Federal Reserve Board ("FRB") began to increase the overnight borrowing rate. As a result, the prime rate increased from 4.0% in June 2004 to 5.25% in December 2004. During 2005, the FRB continued to increase the overnight borrowing rate, causing the prime rate to increase to 6.75% as of September 30, 2005.

For the three months ended September 30, 2005, loan fee income represented \$2.9 million or 10.9% of the \$26.7 million in interest and fees on loans. For the three months ended September 30, 2004, loan fee income was \$2.5 million or 14.1% of the \$17.9 million in interest and fees on loans.

For the nine months ended September 30, 2005, loan fee income represented \$8.0 million or 11.6% of the \$69.1 million in interest and fees on loans. For the nine months ended September 30, 2004, loan fee income was \$7.2 million or 15.3% of the \$47.2 million in interest and fees on loans.

Loan origination fees, net of loan origination costs, are deferred and amortized over the expected life of the loan. The amortized amount, combined with the interest income earned from the note rate, creates the effective loan yield for that period. Construction loans and commercial real estate loans generate the majority of loan origination fee income. The amortized loan fee income earned has increased while the percentage of such loan fees earned has decreased as a percentage of total interest and fees, due to the origination of longer duration assets, such as commercial real estate loans, whereby fees are amortized over a longer period. These increases in fees are a result of the strategy to diversify the loan portfolio.

For the three and nine months ended September 30, 2005, the Company experienced an increase in its yield on its total interest-earning assets primarily due to the repricing of existing loans at higher interest rates as well as generation of new loans at higher interest rates than the same periods in 2004. Yields on total interest-earning assets increased from 6.6% to 7.4% for the three months ended September 30, 2004 and 2005, respectively, and increased from 6.7% to 7.2% for the nine months ended September 30, 2004 and 2005, respectively. Although the yields increased, the growth of the yields has slowed in the three and nine months ended September 30, 2005 due to the change in the mix of interest-earning assets. Consistent with the Company's strategy to diversify its risk and balance its construction loan portfolio, lower yielding investment securities and income property loans became a higher percentage of interest-earning assets during 2005. Additionally, the majority of investment securities are fixed-rate, and thus the yield from investments does not increase as the market rates increase. The Company's average loan balances were 80.8 % and 79.4% of total average interest-earning assets for the three and nine months ended September 30, 2005, respectively, as compared to 81.2% and 80.5% of total average interest-earning assets for the same periods in 2004, respectively.

The cost of interest-bearing liabilities increased from 2.3% to 3.4% for the three months ended September 30, 2004 and 2005, respectively, and from 2.2% to 3.1% for the nine months ended September 30, 2004 and 2005, respectively, as a result of the rising interest rate environment. FHLB advances were increased significantly during 2005 to help fund the growth of the loan portfolio. The Company is increasing its focus and efforts on providing core deposit growth through its existing community banking network, developing its commercial and business banking initiatives, as well as increasing strategic recruitment of personnel in both of these areas. The Company's efforts continue to be focused on the measured growth of all earning assets which complement a well-balanced loan and investment securities portfolio, funded by core deposit relationships.

Interest expense on deposits totaled \$7.4 million and \$19.1 million for the three and nine months ended September 30, 2005, respectively, as compared to \$4.3 million and \$10.9 million for the same periods in 2004, respectively, representing increases of \$3.1 million and \$8.3 million, respectively. The increase in interest expense is mainly associated with an increase in the Company's average interest-bearing deposits coupled with an increase in interest rates. Average interest bearing deposits increased from \$0.8 billion and \$0.7 billion for the three and nine months ended September 30, 2004, respectively, to \$0.9 billion for the same periods in 2005.

The average interest cost on short-term borrowings increased from 1.7% for the three months ended September 30, 2004, to 3.5% for the same period ended 2005, as interest rates were higher during the third quarter of 2005 compared to the same period in 2004. For the nine months ended September 30, 2004 and 2005, the average interest cost on short-term borrowings increased from 1.5% to 3.1%, respectively. The increase during the period was also related to the increase in interest rates. The cost of subordinated debt increased from 4.9% and 4.6% for the three and nine months ended September 30, 2004, respectively, to 6.7% and 6.3% for the same periods in 2005, respectively. Similarly, the cost of junior subordinated debentures increased from 5.0% and 4.7% for the three and nine months ended September 30, 2004, respectively, to 6.5% and 6.1% for the same periods in 2005, respectively. These increases are also a result of the higher interest rates in 2005, as these debt securities bear variable interest rates indexed to LIBOR and adjust on a quarterly basis.

The net interest margin for the three and nine months ended September 30, 2004 was 4.6% and 4.7%, respectively, as compared to 4.4% for the same periods in 2005. The decrease in the net interest margin was partially attributable to the expansion of the Company's income property lending and its investment securities portfolios, which are originated at lesser yields than the construction lending portfolio. The Company has increased its investment portfolio, which is comprised mainly of fixed-rate securities, in order to augment interest income. In addition, a portion of the loan portfolio is fixed rate and a portion of the adjustable-rate portfolio is below its floors. In the current rising rate environment, the fixed-rate securities and loans contributed to the decrease in asset-yield as a percentage of earning assets and the overall decrease in the net interest margin. The decrease in the net interest margin was also attributable to the increase in borrowings and deposits to fund the increase in interest-earning assets. The change in the mix of funding liabilities also caused the margin to compress. The Company has increased the amount of overnight borrowings and junior subordinated debentures, which have a higher cost due to the rising interest rate environment as compared to the lower cost of core deposits. The decrease in the margin occurred in early 2005 as the composition of the loans and funding liabilities have changed as discussed above. The margin has since stabilized with the current mix of assets and liabilities. Additionally, the maturity and repricing effect of the assets and liabilities are fairly matched so that changes in the market interest rate do not materially affect the net interest margin. The Company's efforts continue to be focused on the measured growth of all earning assets which complement a well-balanced loan and investment securities portfolio.

In April 2005, the Company issued Series C Preferred Stock to an institutional investor in a pooled transaction. This transaction raised \$9.7 million, net of fees and expenses. In April 2005 and August 2005, the Company received net proceeds of \$25.0 million from the issuance of trust preferred securities. The trust preferred securities were issued through two newly formed trusts, Vineyard Statutory Trust VIII and Vineyard Statutory Trust IX. The Company used the proceeds from these two transactions to support the growth of the Bank and for general corporate purposes.

On August 31, 2005, the Company filed a universal shelf registration statement on Form S-3 with the SEC. The shelf registration statement was declared effective on September 27, 2005. The shelf registration statement permits the Company to offer and sell up to \$125.0 million of various debt and/or equity securities from time to time in one or more public offerings. The terms of any such future offerings will be established at the time of each offering. The Company intends to use the proceeds from any such offering for general corporate purposes and to support the future anticipated growth of the Bank.

At September 30, 2005, the Bank had unsecured borrowing lines with correspondent banks totaling \$86.0 million. In addition, at September 30, 2005, the Company had a \$30.0 million line of credit and a \$5.0 million offering line of credit (collectively, the "credit facility"). The \$5.0 million offering line of credit is at the discretion of the correspondent bank at the time of request for funding by the Company. At September 30, 2005, there were no outstanding balances on the Company's credit facility and \$10.0 million outstanding on the Bank's unsecured borrowing lines.

The following tables present the distribution of the Company's average assets, liabilities and stockholders' equity in combination with the total dollar amounts of interest income from average interest earning assets and the resultant yields without giving effect for any tax exemption, and the dollar amounts of interest expense and average interest bearing liabilities, expressed both in dollars and rates for the three and nine months ended September 30, 2005 and 2004. Loans include non-accrual loans where non-accrual interest is excluded.

Net interest income						
and net interest margin <sup>(5)</sup>		\$ 48,746	4.4%		\$ 38,245	4.7%

- (1) Interest on loans includes loan fees, which totaled \$2.9 million and \$2.5 million for the three months ended September 30, 2005 and 2004, respectively, and \$8.0 million and \$7.2 million for the nine months ended September 30, 2005 and 2004, respectively.
- (2) The yield for securities that are classified as available-for-sale is based on historical amortized cost balances.
- (3) Includes savings, NOW, and money market deposit accounts.
- (4) Net interest spread represents the average yield earned on interest-earning assets less the average rate paid on interest-bearing liabilities.
- (5) Net interest margin is computed by dividing net interest income by total average earning assets.

**Provision for Possible Loan Losses**

For the three months ended September 30, 2005 and 2004, the provision for possible loan losses was \$0.5 million and \$1.4 million, respectively, and was \$1.4 million and \$4.8 million for the nine months ended September 30, 2005 and 2004, respectively.

The Company's allowance for possible loan losses was \$14.3 million at September 30, 2005 and \$13.0 million at December 31, 2004. Additions to the allowance are affected through the provision for possible loan losses. Also affecting the allowance are loans charged off and loans recovered. For the nine months ended September 30, 2005 and 2004, the Company had \$0.1 million in net charge-offs and \$0.2 million in net charge offs, respectively. Net charge-offs were less than 0.01% of the loan portfolio for both periods.

Although the Company maintains an allowance for possible loan losses at a level it considers to be adequate to provide for losses, based on presently known conditions, there can be no assurance that such losses will not exceed the estimated amounts, thereby adversely affecting future results of operations. The calculation for the adequacy of the allowance for possible loan losses, and therefore the requisite amount of the provision for possible loan losses, is based on several factors, including market condition, underlying loan collateral, delinquency trends, borrowers' cash flow and historic loan loss experience. All of these factors can change without notice based on market and economic conditions and other factors beyond the control of management.

#### *Non-Interest Income*

Non-interest income for the three months ended September 30, 2005 and 2004 was \$1.7 million and \$1.5 million, respectively. This represents an increase of \$0.2 million or 14.3%. Non-interest income for the nine months ended September 30, 2005 and 2004 was \$4.2 million and \$4.1 million, respectively. This represents an increase of \$0.1 million or 3.1%.

The Company generally sells the guaranteed portions of SBA loans originated, and has also sold the unguaranteed portion of certain SBA loans during the third quarter of 2005. Those SBA loans sold, combined with broker fee income associated with SBA 504 loans, generated gains amounting to \$0.9 million and \$1.1 million for the three months ended September 30, 2005 and 2004, respectively, and gains of \$2.4 million and \$2.3 million for the nine months ended September 30, 2005 and 2004, respectively. Income from fees and service charges was \$0.3 million and \$0.4 million for the three months ended September 30, 2005 and 2004, respectively, and \$1.2 million and \$1.4 million for the nine months ended September 30, 2005 and 2004, respectively. For the three and nine months ended September 30, 2005, gain on sale of securities and loans totaled \$0.4 million and totaled \$0 and \$0.2 million for the same periods in 2004, respectively.

#### *Non-Interest Expenses*

The Company's non-interest expense for the three months ended September 30, 2005 and 2004 was \$9.8 million and \$8.1 million, respectively. This represents an increase of \$1.7 million or 20.7%. Non-interest expense increased \$6.1 million or 29.2% to \$26.7 million for the nine months ended September 30, 2005 from \$20.7 million in the same period in 2004. Non-interest expense consists primarily of (i) salaries and employee benefits, (ii) occupancy expense, (iii) furniture and equipment expenses and (iv) marketing, office supplies, postage and telephone, insurance, data processing, professional fees, administrative, business development, and other non-interest expense.

- (i) Salaries and employee benefits is the largest component of non-interest expense. As the Bank has continued to grow during the three and nine months ended September 30, 2005, personnel have been placed in business development capacities for commercial and community banking. With the expansion of several loan production offices into full-service branches as well as the opening of new loan production offices, the Bank has recruited seasoned banking professionals to contribute to the continued growth as well as provide the infrastructure needed to support longer-term growth. These infrastructure changes have increased the Company's salaries and employee benefits expense by \$0.4 million or 8.7% to \$5.4 million for the three months ended September 30, 2005 as compared to the same period in 2004 and have similarly increased by \$3.2 million or 27.2% to \$14.8 million for the nine months ended September 30, 2005, as compared to the same period in 2004.
- (ii) Occupancy expense amounted to \$1.1 million for the three months ended September 30, 2005, in comparison to \$0.7 million for the same period in 2004. This represents an increase of \$0.4 million or 53.0% over the same prior period. Occupancy expense amounted to \$2.7 million for the nine months ended September 30, 2005, in comparison to \$1.8 million for the same period in 2004. This represents an increase of \$0.9 million or 52.9% over the same prior period. The increase in occupancy expense is primarily due to the Company's expansion. During the nine months ended September 30, 2005, the Company completed significant leasehold improvements to its newly leased Corona Pointe building, which currently serves as the main administrative facility. The existing Anaheim SBA loan production office was also relocated to a larger facility in Anaheim during the first quarter of 2005, and the Irvine loan production office was expanded to accommodate a full service banking center in the second quarter of 2005.
- (iii) As the Company continued to expand its banking network and redesign its existing branches, expenses related to furniture and equipment have increased. Expenses related to furniture and equipment were \$0.9 million and \$0.7 million for the three months ended September 30, 2005 and 2004, respectively, and \$2.4 million and \$1.7 million for the nine month period ended September 30, 2005 and 2004, respectively. This expansion represents increases of \$0.2 million or 36.1% and \$0.7 million or 43.0% over the three and nine month prior periods, respectively.
- (iv) Other non-interest expense was \$2.5 million and \$1.8 million for the three months ended September 30, 2005 and 2004, respectively. This represents an increase of 35.5% over the prior period. Other non-interest expense was \$6.8 million and \$5.6 million for the nine months ended September 30, 2005 and 2004, respectively, representing an increase of 21.8% over the prior period. The increase is due primarily to the Company's implementation of its strategy to grow its business.

The following is a breakdown of other non-interest expense for the three and nine months ended September 30, 2005 and 2004:

(Dollars in Thousands)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2005	2004	2005	2004
Other non-interest expense:				
Data processing	\$ 204	\$ 183	\$ 610	\$ 552
Marketing	326	173	751	701
Professional services	333	311	977	966
Office supplies, postage and telephone	431	327	1,147	1,044
Insurance and assessments	171	179	618	370
Administrative	132	118	391	379
Business development	450	244	1,266	797
Other	420	285	1,046	780
Total other non-interest expense	<u>\$ 2,467</u>	<u>\$ 1,820</u>	<u>\$ 6,806</u>	<u>\$ 5,589</u>

## Financial Condition

### Assets

At September 30, 2005, total assets increased \$367.4 million or 28.0% to \$1.7 billion from \$1.3 billion at December 31, 2004. Assets were comprised primarily of \$1.3 billion in loans, net of unearned income, and \$268.2 million in investment securities available-for-sale at September 30, 2005. This represents an increase of \$274.5 million or 26.7% in loans, net of unearned income, and an increase of \$44.7 million or 20.0% in investment securities available-for-sale from December 31, 2004.

### Investments

All of the Company's securities in its portfolio are classified as available-for-sale. In accordance with SFAS No. 115, investment securities available-for-sale are carried at fair value and adjusted for amortization of premiums and accretion of discounts. Almost all of the Company's securities are insured by U.S. government agencies or U.S. government-backed agencies.

The Company's securities portfolio amounted to \$268.2 million or 16.0% of total assets at September 30, 2005 and \$223.5 million or 17.0% of total assets at December 31, 2004. The Company's securities portfolio increased during the nine months ended September 30, 2005 as a result of purchases, net of principal paydowns of securities.

The amortized cost and fair values of investment securities available-for-sale at September 30, 2005 were as follows:

(Dollars in Thousands)

	Amortized	Gross	Gross	Fair Value
	Cost	Unrealized	Unrealized	
		Gains	Losses	
U.S. agency securities	\$ 11,564	\$ -	\$ (147)	\$ 11,417
Mortgage-backed securities	259,912	-	(5,180)	254,732
Mutual funds	2,100	-	(20)	2,080
Total	<u>\$ 273,576</u>	<u>\$ -</u>	<u>\$ (5,347)</u>	<u>\$ 268,229</u>

The amortized cost and fair values of investment securities, available-for-sale at December 31, 2004 were as follows:

(Dollars in Thousands)

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. agency securities	\$ 11,033	\$ -	\$ (532)	\$ 10,501
Mortgage-backed securities	215,045	116	(4,228)	210,933
Mutual funds	2,042	4	-	2,046
Total	<u>\$ 228,120</u>	<u>\$ 120</u>	<u>\$ (4,760)</u>	<u>\$ 223,480</u>

The table below shows the Company's investment securities' gross unrealized losses and fair value by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30, 2005. The Company has reviewed individual securities classified as available-for-sale to determine whether a decline in fair value below the amortized cost basis is other-than-temporary. If it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the debt security not impaired at acquisition, an other-than-temporary impairment shall be considered to have occurred. If an other-than-temporary impairment occurs, the cost basis of the security would be written down to its fair value as the new cost basis and the write down accounted for as a realized loss.

(Dollars in Thousands)

	Less than 12 months		12 months or Longer		Total	
	Fair Value	Gross Unrealized Holding Losses	Fair Value	Gross Unrealized Holding Losses	Fair Value	Gross Unrealized Holding Losses
U.S. agency securities	\$ -	\$ -	\$ 11,417	\$ (147)	\$ 11,417	\$ (147)
Mortgage backed securities	136,352	(1,059)	118,380	(4,121)	254,732	(5,180)
Mutual funds	2,080	(20)	-	-	2,080	(20)
Total	<u>\$ 138,432</u>	<u>\$ (1,079)</u>	<u>\$ 129,797</u>	<u>\$ (4,268)</u>	<u>\$ 268,229</u>	<u>\$ (5,347)</u>

Despite the unrealized loss position of these securities, the Company has concluded, as of September 30, 2005, that these investments are not other-than-temporarily impaired. This assessment was based on the following factors: i) the financial condition and near-term prospects of the issuer; ii) the intent and ability of the Company to retain its investment in a security for a period of time sufficient to allow for any anticipated recovery in market value; iii) general market conditions which reflect prospects for the economy as a whole, including interest rates and sector credit spreads; and iv) the length of time and the extent to which the market value has been less than cost.

The amortized cost and fair values of investment securities, available-for-sale at September 30, 2005, by contractual maturities are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Mutual funds with a fair value of \$2.1 million are not included, as they do not have any stated maturity date.

(Dollars in Thousands)

	Securities Available-for-Sale			
	Maturing 5-10 years		Maturing after 10 years	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Mortgage-backed securities	\$ 15,929	\$ 15,831	\$ 243,983	\$ 238,901
U.S. agency securities	-	-	11,564	11,417
Total	<u>\$ 15,929</u>	<u>\$ 15,831</u>	<u>\$ 255,547</u>	<u>\$ 250,318</u>

There were no sales of investment securities, available-for-sale during the nine months ended September 30, 2005. Included in stockholders' equity at September 30, 2005 was \$3.1 million of net unrealized losses, net of tax benefits, on investment securities, available-for-sale.

Proceeds from sales of investment securities, available-for-sale during the nine months ended September 30, 2004 were \$26.0 million. Gross gains on those sales were \$0.2 million. Included in stockholders' equity at September 30, 2004 was \$2.2 million of net unrealized losses, net of tax benefits, on investment securities, available-for-sale.

Securities with fair value of \$266.1 million and \$221.4 million at September 30, 2005 and December 31, 2004, respectively, were pledged to secure public monies as required by law and FHLB borrowings.

## Loans

The Company's loan portfolio grew by 26.7% during the first nine months of 2005, net of loan participations and payoffs. Loans, net of unearned income, increased by \$274.5 million from \$1.0 billion at December 31, 2004 to \$1.3 billion at September 30, 2005. Almost all of the Bank's loans, commitments, and commercial and standby letters of credit have been granted to customers in the Company's market area, which includes Los Angeles, San Bernardino, Riverside, Orange, San Diego and Marin counties in California. The concentrations of credit by type of loan are set forth below:

(Dollars in Thousands)

	As of	
	September 30, 2005	December 31, 2004
Commercial and industrial	\$ 42,660	\$ 36,095
Real estate construction:		
Single-family coastal	341,693	298,984
Single-family tract	143,569	129,900
Commercial	54,117	36,215
Real estate mortgage:		
Commercial	299,204	216,609
Multi-family residential	260,451	189,912
Land	86,662	61,979
All other residential	66,038	56,983
Consumer loans	11,500	2,905
All other loans (including overdrafts)	96	137
	1,305,990	1,029,719
Unearned premium on loans	386	541
Deferred loan fees	(4,820)	(3,223)
Loans, net of unearned income	\$ 1,301,556	\$ 1,027,037

The Bank originates SBA loans and generally sells portions of SBA loans to institutional investors. At September 30, 2005 and December 31, 2004, SBA loans totaled \$14.0 million and \$18.0 million, respectively, net of SBA participations sold in the amount of \$38.1 million and \$29.0 million, respectively. The Bank had \$125.4 million of real estate construction loan participation sales and \$16.3 million of SBA loan participation sales during the nine months ended September 30, 2005.

The Company retains servicing rights to the SBA loans sold and records servicing rights and interest-only strip receivables (collectively, "servicing rights") related to the loans sold. The balance of capitalized servicing rights included in Other Assets on the Company's Consolidated Balance Sheet at September 30, 2005 and December 31, 2004 was \$1.4 million and \$1.7 million, respectively. The fair values of these servicing rights approximate their book values respectively.

The following summarizes servicing rights capitalized and amortized for the periods indicated:

(Dollars in Thousands)

	Nine months ended	Year ended
	September 30, 2005	December 31, 2004
Servicing rights capitalized	\$ 239	\$ 1,143
Servicing rights amortized	\$ 537	\$ 269
Valuation allowances	\$ -	\$ -

The Bank had approximately \$454.1 million and \$307.7 million in loans pledged to secure FHLB borrowings at September 30, 2005 and December 31, 2004, respectively.

### Allowance for Possible Loan Losses

The allowance for possible loan losses is maintained at a level which, in management's judgment, is adequate to absorb credit losses inherent in the Company's loan portfolio. The amount of the allowance is based on management's evaluation of the collectibility of the loan portfolio, including the nature of the portfolio, credit concentrations, trends in historical loss experience, specific impaired loans and economic conditions. The allowance is increased by a provision for possible loan losses, which is charged to expense and reduced by charge-offs, net of recoveries.

Transactions in the allowance for possible loan losses are summarized as follows for the periods indicated:

(Dollars in Thousands)	Nine months ended	Year ended
	September 30, 2005	December 31, 2004
Balance, beginning of year	\$ 13,001	\$ 7,537
Recoveries on loans previously charged off	44	122
Loans charged off	(145)	(392)
Provision charged to operating expense	1,350	5,734
Balance, end of period	<u>\$ 14,250</u>	<u>\$ 13,001</u>

The provisions of SFAS No. 114 and SFAS No. 118 permit the valuation allowance for possible loan losses to be determined on a loan-by-loan basis or by aggregating loans with similar risk characteristics. The Bank considers a loan to be impaired when it is probable that the Bank will be unable to collect all amounts due (principal and interest) according to the contractual terms of the loan agreement. Measurement of impairment is based on the expected future cash flows of an impaired loan which are to be discounted at the loan's effective interest rate, or measured by reference to an observable market value, if one exists, or the fair value of the collateral for a collateral-dependent loan. The Bank selects the measurement method on a loan-by-loan basis except that collateral-dependent loans for which foreclosure is probable are measured at the fair value of the collateral.

#### Nonperforming Assets

The following table sets forth the amounts and categories of the Company's non-performing assets at the dates indicated.

(Dollars in Thousands)	As of	
	September 30, 2005	December 31, 2004
<b>Accruing Loans More than 90 Days Past Due</b>		
Aggregate loan amounts		
Commercial, financial and agricultural	\$ -	\$ -
Real estate	-	-
Installment loans to individuals	-	-
Total loans past due more than 90 days	<u>\$ -</u>	<u>\$ -</u>
<b>Renegotiated loans</b>	-	-
<b>Non-accrual loans</b>		
Aggregate loan amounts		
Commercial, financial and agricultural	\$ 350	\$ -
Real estate	4,636	-
Installment loans to individuals	-	-
Total non-accrual loans	<u>\$ 4,986</u>	<u>\$ -</u>
Total non-performing loans	<u>\$ 4,986</u>	<u>\$ -</u>

The following is a summary of information pertaining to impaired loans for the dates and periods specified.

(Dollars in Thousands)	As of	
	September 30, 2005	December 31, 2004
Impaired loans with a specific valuation allowance	\$ -	\$ -
Impaired loans without a specific valuation allowance	4,986	-
Total impaired loans	<u>\$ 4,986</u>	<u>\$ -</u>
Valuation allowance related to impaired loans	<u>\$ -</u>	<u>\$ -</u>

(Dollars in Thousands)

	Nine months ended September 30, 2005	Year ended December 31, 2004
Average recorded investment in impaired loans	\$ 3,336	\$ 238
Cash receipts applied to reduce principal balance	\$ 211	\$ 671
Interest income recognized for cash payments	\$ 3	\$ 21

If interest on non-accrual loans had been recognized at the original interest rates, interest income would have increased \$0.1 million and \$0.3 million for the three and nine months ended September 30, 2005, respectively and \$38,000 for the year ended December 31, 2004.

### Deposits

Deposits represent the Bank's primary source of funds for funding the Bank's loan activities. The Bank increased its deposits by \$155.0 million or 16.1% from \$965.5 million at December 31, 2004 to \$1.1 billion at September 30, 2005. The increase was primarily due to an increase of \$120.5 million in time deposits ("TCD's"), an increase of \$32.8 million in demand deposits, and an increase of \$5.3 million in money market accounts over the period. This increase was partially offset by a \$3.6 million decrease in saving and NOW accounts during the nine months ended September 30, 2005.

As of September 30, 2005, the Company's deposits were comprised of 14.3% in non-interest bearing deposits, 40.4% in money market, NOW and savings deposits, and 45.3% in TCD's, while the composition of deposits was 13.2%, 46.7% and 40.1%, respectively, at December 31, 2004.

At September 30, 2005, the scheduled maturities of time certificates of deposit in denominations of \$100,000 or more are as follows:

(Dollars in Thousands)

Three months or less	\$ 69,110
Over three through twelve months	212,893
Over one through five years	7,784
	<u>\$ 289,787</u>

### Borrowings

The Company utilizes borrowings such as FHLB advances, federal funds purchased, subordinated debt, junior subordinated debentures and lines of credit as a source of funds. During the first nine months of 2005, the Company significantly increased the balance of borrowings to support the increase in earning-assets.

At September 30, 2005, the Company had a \$30.0 million line of credit and a \$5.0 million offering line of credit (collectively, the "credit facility") with a correspondent bank. The \$5.0 million offering line of credit is at the discretion of the correspondent bank at the time of request for funding by the Company. There was no outstanding balance under the credit facility as of September 30, 2005 and December 31, 2004. In addition, the Bank has \$86.0 million of unsecured borrowing lines with seven correspondent banks. Under these borrowing lines, the Bank had a \$10.0 million outstanding balance at September 30, 2005 and no outstanding balance at December 31, 2004.

The Bank has an advance line with FHLB that allows the Bank to borrow up to 40% of the Bank's total assets as of September 30, 2005. Pursuant to the collateral agreement with FHLB, advances are secured by capital stock investment in FHLB, certain investment securities and certain eligible loans. FHLB advances were \$332.0 million and \$177.0 million at September 30, 2005 and December 31, 2004, respectively. The 93.2% increase in FHLB advances and other borrowings was used to fund the significant growth of earning assets. FHLB advances consisted of the following as of September 30, 2005:

(Dollars in Thousands)

Maturity	Weighted Average Rate	Amount
2005	4.1%	\$ 317,000
2006	2.6%	15,000
	4.0%	<u>\$ 332,000</u>

As of September 30, 2005 and December 31, 2004, the Company had \$96.9 million and \$71.1 million, respectively, in junior subordinated debentures outstanding from nine and seven issuances, respectively, of trust preferred securities. Junior subordinated debentures as of September 30, 2005 consisted of the following:

(Dollars in Thousands)

	Interest Rate	Due Date	Minority Interest	As of September 30, 2005	
				Effective Interest Rate	Balance
Vineyard Statutory Trust I	3-month LIBOR + 3.60%	December 18, 2031	\$ 372	7.49%	\$ 12,372
Vineyard Statutory Trust II	3-month LIBOR + 3.35%	December 26, 2032	155	6.95%	5,155
Vineyard Statutory Trust III	3-month LIBOR + 3.05%	October 8, 2033	310	6.65%	10,310
Vineyard Statutory Trust IV	3-month LIBOR + 2.85%	January 23, 2034	310	6.54%	10,310
Vineyard Statutory Trust V	3-month LIBOR + 2.85%	April 23, 2034	310	6.45%	10,310

Under FASB Interpretation No. 46R ("FIN 46R"), the Company is not allowed to consolidate the Trusts into the Company's consolidated financial statements. Prior to the issuance of FIN 46R, bank holding companies typically consolidated these entities. The Company has excluded the Trusts from its consolidated financial statements.

On March 1, 2005, the FRB adopted a final rule that allows the continued inclusion of trust preferred securities in the Tier 1 capital of bank holding companies, subject to stricter quantitative limits and qualitative standards. Under the final ruling, qualifying mandatory preferred securities may be included in Tier 1 capital, subject to a limit of 25 percent of all core capital. Amounts of restricted core capital elements in excess of this limit generally may be included in Tier 2 capital. The quantitative limits become effective on March 31, 2009, after a four-year transition period. As of September 30, 2005, the Company has included the junior subordinated debt in its Tier 1 Capital for regulatory capital purposes.

The Company also has \$5.0 million in subordinated debt which bears a floating rate of interest of 3.05% over the three month LIBOR and has a fifteen-year maturity with quarterly interest payments. The effective rate as of September 30, 2005 was 7.01%. The outstanding balance of this subordinated debt was \$5.0 million at September 30, 2005 and December 31, 2004.

#### Stockholders' Equity

Stockholders' equity was \$106.1 million and \$85.2 million at September 30, 2005 and December 31, 2004, respectively. The increase in stockholders' equity during the nine months ended September 30, 2005 relates mainly to net income of \$14.5 million, \$9.7 million from the issuance of preferred stock, net of fees and expenses, and \$3.5 million from the exercise of additional investment rights, net of fees and expenses. These increases to stockholders' equity were partially offset by the repurchase of \$6.0 million in treasury stock during the period.

#### Liquidity

The Company relies on asset-liability management to assure adequate liquidity and to maintain an appropriate balance between interest sensitive earning assets and interest-bearing liabilities. Liquidity management involves the ability to meet the cash flow requirements of customers. Typical demands on liquidity are withdrawals from demand deposits, savings, money market, and NOW accounts, as well as maturing time deposits, which are not renewed, and funding under credit commitments to customers. Interest rate sensitivity management seeks to avoid fluctuating interest margins to enhance consistent growth of net interest income through periods of changing interest rates.

The Bank's Asset-Liability Management Committee manages the Company's liquidity position, the parameters of which are approved by the Board of Directors. The liquidity position of the Bank is monitored daily. The Bank's loan to deposits and borrowings ratio was 87.2% and 87.9% at September 30, 2005 and December 31, 2004, respectively.

Management believes the level of liquid assets at the Bank is sufficient to meet current and anticipated funding needs. The liquidity contingency process outlines authorities and a reasonable course of action in case of unexpected liquidity needs. As of September 30, 2005, the Company has no outstanding balance on its \$35.0 million credit facility with a correspondent bank and a \$10.0 million outstanding balance on its \$86.0 million of unsecured borrowing lines with its seven correspondent banks. In addition, the Bank has an advance line with FHLB which allows the Bank to borrow up to 40% of the Bank's total assets. As of September 30, 2005, the Bank has a total borrowing capacity from FHLB of approximately \$668.1 million and an outstanding advance balance of \$332.0 million. The FHLB advance line is collateralized by the Company's capital stock investment in FHLB, investment securities and eligible loans.

## Capital Resources

During June 2004, the Company issued and sold 800,000 shares of its common stock to institutional investors through a private placement, which raised \$15.2 million in additional capital, net of fees and expenses. In conjunction with this transaction, the Company also granted the investors warrants (the "Warrants") to purchase up to 160,000 additional shares of common stock. The Warrants, which expire on June 21, 2011, have an exercise price of \$25.00. As of June 30, 2005, none of these Warrants have been exercised. The Company downstreamed \$10.0 million of the proceeds from this private placement to the Bank to support the continued growth of the Bank, and the remaining proceeds were used by the Company for general corporate purposes. The Company filed a registration statement with the SEC to register all of the shares of common stock issued in the June 2004 private placement and the shares of common stock issuable upon exercise of the Warrants. The registration statement was declared effective on August 3, 2004.

In December 2004, the Company issued and sold 483,100 shares of its common stock to institutional investors through a private placement, which raised \$14.0 million in additional capital, net of fees and expenses. The Company used the proceeds from this private placement to payoff the ESOP loan held by a third party bank, repay other debt, and for other general corporate purposes. The Company also granted the investors the additional investment rights (the "Rights") to purchase an additional 120,775 shares of common stock for \$31.05 per share. The Company filed a registration statement with the SEC to register all of the shares of common stock issued in the December 2004 private placement and the shares of common stock issuable upon exercise of the Rights. The registration statement was declared effective on February 4, 2005. The Rights had an expiration date of June 15, 2005, 90 trading days after the effective date of the registration statement. Prior to the expiration date of the Rights, all Rights were exercised, yielding proceeds of \$3.5 million, net of fees and expenses.

The common stock, Warrants and Rights were offered and sold pursuant to an exemption to the registration requirements under Section 4(2) of the Securities Act of 1933, as amended ("Securities Act").

In April 2005, the Company issued and sold 10,000 shares of Series C Preferred Stock to an institutional investor through a private placement transaction. The Company raised \$9.7 million, net of fees and expenses, as a result of this transaction, and used the proceeds to downstream funds to the Bank and for general corporate purposes.

On August 31, 2005, the Company filed a universal shelf registration statement on Form S-3 with the SEC. The shelf registration statement was declared effective on September 27, 2005. The shelf registration statement permits the Company to offer and sell up to \$125.0 million of various debt and/or equity securities from time to time in one or more public offerings. The terms of any such future offerings will be established at the time of each offering. The Company intends to use the proceeds from any such offering for general corporate purposes and to support the future anticipated growth of the Bank.

As part of the Company's capital strategy, the shelf registration along with any trust preferred issuances will serve to support the organic growth strategy. These potential sources of capital will aid the Company in an efficient and effective execution of the strategic plan, while limiting the dilutive effect to shareholders and maintaining consistent capital ratios at both the Bank and the Company.

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the financial condition or operating results of the Company and the Bank. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, as applicable, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of September 30, 2005, that the Company and the Bank meet all applicable capital adequacy requirements.

As of the most recent formal notification from the FDIC, the Bank was categorized as well capitalized under the regulatory framework for prompt corrective action. Pursuant to regulatory guidelines under prompt corrective action rules, a bank must have total risk-based capital of 10% or greater, Tier 1 capital of 6% or greater and a leverage ratio of 5% or greater to be considered “well capitalized” (see table below). At September 30, 2005, the Bank’s total risk-based capital, Tier 1 capital and leverage ratios were 13.3%, 12.4% and 11.6%, respectively. On a consolidated basis, the minimum ratios that the Company must meet are total risk-based capital of 8%, Tier 1 capital of 4% and a leverage ratio of 4%. At September 30, 2005, the Company’s total risk-based capital, Tier 1 capital and leverage ratios were 14.4%, 9.4%, and 8.7%, respectively.

The following table sets forth the Bank’s and the Company’s actual regulatory capital amounts and ratios as of the dates indicated:

(Dollars in Thousands)

	Actual Regulatory		Capital Needed			
			For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Capital Amount	Ratio	Capital Amount	Ratio	Capital Amount	Ratio
<b>As of September 30, 2005</b>						
Total capital to risk-weighted assets:						
Bank	\$ 205,076	13.3%	\$ 123,200	8.0%	\$ 154,000	10.0%
Consolidated	\$ 222,076	14.4%	\$ 123,600	8.0%	N/A	N/A
Tier 1 capital to risk-weighted assets:						
Bank	\$ 190,826	12.4%	\$ 61,600	4.0%	\$ 92,400	6.0%
Consolidated	\$ 145,101	9.4%	\$ 61,800	4.0%	N/A	N/A
Tier 1 capital to average assets:						
Bank	\$ 190,826	11.6%	\$ 66,100	4.0%	\$ 82,600	5.0%
Consolidated	\$ 145,101	8.7%	\$ 66,400	4.0%	N/A	N/A
<b>As of December 31, 2004</b>						
Total capital to risk-weighted assets:						
Bank	\$ 160,509	13.5%	\$ 95,200	8.0%	\$ 118,900	10.0%
Consolidated	\$ 174,212	14.6%	\$ 95,500	8.0%	N/A	N/A
Tier 1 capital to risk-weighted assets:						
Bank	\$ 147,508	12.4%	\$ 47,600	4.0%	\$ 71,400	6.0%
Consolidated	\$ 116,280	9.7%	\$ 47,700	4.0%	N/A	N/A
Tier 1 capital to average assets:						
Bank	\$ 147,508	11.3%	\$ 52,100	4.0%	\$ 65,100	5.0%
Consolidated	\$ 116,280	8.9%	\$ 52,300	4.0%	N/A	N/A

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

**The Company’s business is subject to general economic risks that could adversely impact its operating results and financial condition.**

*Changes in economic conditions, particularly an economic slowdown in California, could hurt the Company’s business.* The Company’s business is directly affected by political and market conditions, broad trends in industry and finance, legislative and regulatory changes, changes in governmental monetary and fiscal policies and inflation, all of which are beyond the Company’s control. Deterioration in economic conditions, in particular an economic slowdown within California, could result in the following consequences, any of which could hurt the Company’s business materially:

- loan delinquencies may increase;
- problem assets and foreclosures may increase;
- demand for the Company’s products and services may decline; and

- collateral for loans made by the Company, especially real estate, may decline in value, in turn reducing a client's borrowing power, and reducing the value of assets and collateral associated with its loans held for investment.

*A downturn in the California real estate market could hurt the Company's business.* The Company's business activities and credit exposure are concentrated in California. A downturn in the California real estate market could hurt the Company's business because the majority of its loans are secured by real estate located within California. As of September 30, 2005, approximately 92.9% of the Company's loan portfolio consisted of loans secured by real estate located in California. If there is a significant decline in real estate values, especially in California, the collateral for the Company's loans will provide less security. As a result, the Company's ability to recover on defaulted loans by selling the underlying real estate would be diminished, and it would be more likely to suffer losses on defaulted loans. Real estate values in California could also be affected by, among other things, earthquakes and other natural disasters particular to California.

*The Company may suffer losses in its loan portfolio despite its underwriting practices.* The Company seeks to mitigate the risks inherent in its loan portfolio by adhering to specific underwriting practices. These practices include analysis of a borrower's prior credit history, financial statements, tax returns and cash flow projections, valuation of collateral based on reports of independent appraisers and verification of liquid assets. Although the Company believes that its underwriting criteria are appropriate for the various kinds of loans it makes, the Company may incur losses on loans that meet its underwriting criteria, and these losses may exceed the amounts set aside as reserves in its allowance for loan losses.

**The Company's business is subject to interest rate risk and variations in interest rates may negatively affect its financial performance.**

Like other financial institutions, the Company's operating results are largely dependent on its net interest income. Net interest income is the difference between interest income earned on interest-earning assets and interest expense incurred on interest-bearing liabilities. The Company's net interest income is impacted by changes in market rates of interest, the interest rate sensitivity of its assets and liabilities, prepayments on its loans and investment securities and limits on increases in the rates of interest charged on its loans. The Company expects that it will continue to realize income from the differential or "spread" between the interest income earned on loans, investment securities and other interest-earning assets, and interest expense incurred on deposits, borrowings and other interest-bearing liabilities. Net interest spreads are affected by the difference between the maturities and repricing characteristics of interest-earning assets and interest-bearing liabilities.

The Company cannot control or accurately predict changes in market rates of interest. The following are some factors that may affect market interest rates, all of which are beyond the Company's control:

- inflation;
- slow or stagnant economic growth or recession;
- unemployment;
- money supply and the monetary policies of the FRB;
- international disorders; and
- instability in domestic and foreign financial markets.

The Company may be vulnerable to a sharp increase in interest rates in the short-run because its interest-earning assets generally have longer repricing terms than its interest-bearing liabilities. Under such circumstances, material and prolonged increases in interest rates may negatively affect the Company's market value of equity. In addition, loan volume and yields are affected by market interest rates on loans, and rising interest rates generally are associated with a lower volume of loan originations. In addition, an increase in the general level of interest rates may adversely affect the ability of certain borrowers to pay the interest on and principal of their obligations. Accordingly, changes in levels of market interest rates could materially and adversely affect the Company's net interest spread, asset quality, loan origination volume, securities portfolio and overall profitability. Although the Company attempts to manage its interest rate risk, the Company cannot assure you that it can minimize its interest rate risk.

**Interest Rates and Differentials**

The Company's earnings depend primarily upon the difference between the income it receives from its loan portfolio and investment securities and its cost of funds, principally interest expense incurred on savings, time deposits and borrowings. Interest rates charged on the Company's loans are affected principally by the demand for loans, the supply of money available for lending purposes, and competitive factors. In turn, these factors are influenced by general economic conditions and other constraints beyond the Company's control, such as governmental economic and tax policies, general supply of money in the economy, governmental budgetary actions and the actions of the FRB.

## Asset/Liability Management

The Bank earns income principally from the differential or spread between the interest income earned on loans, investments and other interest-earning assets, and the interest expense incurred on deposits, borrowings and other interest-bearing liabilities. The Bank, like other financial institutions, is subject to interest rate risk to the degree that its interest-earning assets reprice differently than its interest-bearing liabilities. The Bank's primary objective in managing its interest rate risk is to minimize the adverse impact of changes in interest rates on the Bank's net interest income and capital, while maintaining an asset-liability balance sheet mix that produces the most effective and efficient returns.

Interest rate sensitivity varies with different types of interest-earning assets and interest-bearing liabilities. The Company intends to maintain interest-earning assets, comprised primarily of loans and investments, and interest-bearing liabilities, comprised primarily of deposits and borrowings, maturing or repricing in similar time horizons in order to minimize or eliminate any impact from interest rate changes.

A sudden and substantial increase or decrease in interest rates may adversely impact the Company's operating results to the extent that the interest rates associated with the assets and liabilities do not change at the same speed, to the same extent, or on the same basis. The Company has adopted formal policies and practices to monitor its interest rate risk exposure. As a part of its risk management practices, the Company uses the Economic Value of Equity ("EVE") or Earnings at Risk ("EAR") to monitor its interest rate risk.

The Company's overall strategy is to minimize the adverse impact of immediate incremental changes in market interest rates (rate shock) on EVE and EAR. The EVE is defined as the present value of assets, minus the present value of liabilities. The EAR is defined as the net interest income, which is interest income less interest expense. The attainment of this goal requires a balance between profitability, liquidity and interest rate risk exposure. To minimize the adverse impact of changes in market interest rates, the Company simulates the effect of instantaneous interest rate changes on EVE at period end and EAR over a one year horizon.

The table below shows the estimated impact of changes in interest rates on EVE and EAR at September 30, 2005, assuming shifts of 100 to 200 basis points in both directions:

(Dollars in Thousands)

Simulated Rate Changes	Economic Value of Equity		Earnings at Risk	
	Cumulative Dollar Change	Cumulative Percentage Change	Cumulative Dollar Change	Cumulative Percentage Change
200	\$ (20,879)	-12.1%	\$ 1,215	1.8%
100	\$ (10,327)	-6.0%	\$ 541	0.8%
-100	\$ 8,250	4.8%	\$ 4,282	6.2%
-200	\$ 12,534	7.3%	\$ 10,960	15.9%

The amount and percentage changes represent the cumulative dollar and percentage change in each rate change scenario from the base case. These estimates are based upon a number of assumptions, including: the nature and timing of interest rate levels including yield curve, prepayments on loans and securities, pricing strategies on loans and deposits, replacement of asset and liability cash flows and other assumptions. While the assumptions used are based on current economic and local market conditions, there is no assurance as to the predictive nature of these conditions including how customer preferences or competitor influences might change.

The Company has established operating limits for changes in EVE and EAR in each rate change scenario from the base case. At September 30, 2005, the Company's estimated changes in EVE and EAR were within the operating limits established by the Board of Directors for well-capitalized purposes. The Company will continue to monitor its interest rate risk through monitoring the relationship between capital and risk-weighted assets and the impact of changes in interest rates on EVE and EAR.

#### **ITEM 4. CONTROLS AND PROCEDURES**

As required by SEC Rule 13a-15(b), the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer along with the Company's Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer along with the Company's Executive Vice President and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiary) required to be included in the Company's periodic SEC filings. There have been no significant changes in the Company's internal control over financial reporting during the Company's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Disclosure controls and procedures are the Company's controls and other procedures that are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its Chief Executive Officer and Executive Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

### **PART II – OTHER INFORMATION**

#### **ITEM 1. LEGAL PROCEEDINGS**

In the normal course of business, the Company is subject to legal actions and complaints. As of September 30, 2005, management is not aware of any material pending legal action or complaint asserted against the Company.

#### **ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

##### **Unregistered Sale of Equity Securities**

On April 15, 2005, the Company's Board of Directors issued the private placement of 10,000 shares of Series C Preferred Stock with an institutional investor as part of a pooled transaction. The Series C Preferred Stock was issued at \$1,000 per share for aggregate proceeds of \$9.7 million, net of fees and expenses. The Series C Preferred Stock ranks senior to the Company's common stock. Sandler O'Neill & Partners, L.P. served as placement agent for the private offering.

Each share of Series C Preferred Stock is entitled to a noncumulative, annual dividend at the rate of three-month LIBOR plus 3.80%, payable quarterly. Cash dividends are payable January 1, April 1, July 1, and October 1 of each year, and must be declared by the Company's Board of Directors prior to the dividend payment date. The interest rate resets quarterly and the initial rate is set at 6.95%. On June 15, 2005, the Company declared a cash dividend on the Series C Preferred Stock, based on the initial interest rate of 6.95%, and paid the dividend on July 1, 2005. On September 22, 2005, the Company declared a cash dividend on the Series C Preferred Stock, payable on October 3, 2005 to shareholders of record as of September 23, 2005. The Series C Preferred Stock is not convertible into common stock and is callable after five years at a premium and at a decreasing premium scale over the following ten years until year fifteen when the instrument is callable at a zero premium. The Series C Preferred Stock was offered and sold pursuant to an exemption to the registration requirements under Section 4(2) of the Securities Act.

## Purchases of Equity Securities

The table below summarizes the Company's monthly repurchases and redemptions of its common equity securities during the three months ended September 30, 2005.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 - 31, 2005	-	\$ -	-	\$ 3,908,735
August 1 - 31, 2005	7,333	32.78	7,333	\$ 3,668,345
September 1 - 30, 2005	12,000	29.97	12,000	\$ 3,308,737
Total	19,333	\$ 31.03	19,333	

(1) In July 2002, the Company adopted a stock repurchase program in the initial amount of \$2.0 million. In December 2003, February 2005 and May 2005, the Company approved increases in its stock repurchase program of \$5.0 million for a total amount of \$17.0 million. In October 2005, the Company announced an additional increase of \$20.0 million in its stock repurchase program. Under its stock repurchase program, the Company has been acquiring its common stock shares in the open market and holds the repurchased shares as authorized but unissued shares. The Company's stock repurchase program does not have an expiration date.

**CERTIFICATION**

I, Norman Morales, President and Chief Executive Officer (Principal Executive Officer), certify that:

1. I have reviewed this quarterly report on Form 10-Q of Vineyard National Bancorp;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
