## **ROYAL GOLD REPORTS 63% INCREASE IN SECOND QUARTER REVENUES**

- **Revenues boosted by higher gold prices and step-up of sliding-scale royalty rate**
- **Earnings increase 85% from the prior year quarter**
- **Free cash flow (a non-GAAP financial measure) totals 73% of revenues**

**DENVER, COLORADO. FEBRUARY 5, 2004: ROYAL GOLD, INC.** (NASDAQ:RGLD; TSE:RGL) today announced second quarter fiscal 2004 net income of \$2,277,465, or \$0.11 per basic share, on royalty revenue of \$5,083,461. These amounts compare to net income for the second quarter of fiscal 2003 of \$1,232,345, or \$0.06 per basic share, on royalty revenue of \$3,117,384.

Net income for the six-month period ended December 31, 2003, was \$3,620,577 or \$0.17 per basic share, on royalty revenue of \$9,264,946. This compares to net income of \$2,657,850, or \$0.14 per basic share for the six-month period ended December 31, 2002, on royalty revenue of \$6,483,556.

Included in the current quarter was a non-cash charge for a deferred tax expense of \$698,425, or \$0.03 per basic share. For the six-month period ended December 31, 2003, the non-cash charge for the deferred tax expense was \$1,164,653 or \$0.06 per basic share.

\* \* \* MORE \* \* \*

Free cash flow for the second quarter was approximately \$3.7 million, or 73% of revenues. For the six-month period ended December 31, 2003, free cash flow was approximately \$6.4 million, or 70% of revenues. Free cash flow, a non-GAAP financial measure, is defined as operating income plus depreciation, depletion and amortization, non-cash charges and any impairment of mining assets (see, Schedule A-Reconciliation).

Financial highlights, as of the end of the quarter, include higher revenues largely due to an increased gold price resulting in a step-up of Royal Gold's sliding-scale royalty rate at the Pipeline Mining Complex from 3.4% to 4.0%; a cash balance of \$38.8 million; and a working capital surplus of approximately \$43.7 million yielding a current ratio of 17 to 1.

Stanley Dempsey, Chairman and CEO, said, "Royal Gold's revenues reflect the tremendous leverage provided by our sliding-scale royalty at the Pipeline Mining Complex. Due to higher gold prices, this royalty rate jumped two steps from the previous quarter. We are pleased with our robust financial position and our improved operating margin. Royal Gold has solid fundamentals and continues to generate strong cash flow."

## **ROYALTY PORTFOLIO REVIEW**

### **Pipeline Mining Complex (Lander County, Nevada)**

The Company owns two sliding-scale gross smelter return royalties (GSR1 and GSR2), a fixed gross royalty (GSR3), and a net value return royalty (NVR1) on the Pipeline Mining Complex, in Lander County, Nevada. The GSR1 royalty covers the current mine footprint, and the GSR2 ("Super") royalty covers any reserves that are developed on the claim block lying outside the current mine footprint. The GSR2 royalty pays out at a rate that is 80% higher than that of GSR1, at all gold prices. The GSR3 royalty is a 0.71% fixed rate for the life of the mine. The 0.39% NVR1 covers production from the GAS Claims, an area of interest of approximately 4,000 acres including the South Pipeline deposit and Crossroads area, but not including the Pipeline pit. The NVR1 is calculated by deducting processing-related costs, but is not burdened by mining costs.

The Pipeline Mining Complex is owned by the Cortez Joint Venture, a joint venture between Placer Cortez Inc. (60%), a subsidiary of Placer Dome Inc. and Kennecott Explorations (Australia) Ltd. (40%), a subsidiary of Rio Tinto.

\* \* \* MORE \* \* \*

For the second quarter of Royal Gold's fiscal 2004, the Pipeline Mining Complex produced 217,866 ounces of gold, providing \$4,327,998 of royalty revenue to Royal Gold. This compares to 240,723 ounces of gold produced, providing \$2,769,653 of royalty revenue for the same quarter in fiscal 2003.

For the second quarter of fiscal 2004, the average gold price was \$391 per ounce and Royal Gold's GSR1 royalty rate was 4.0%, compared to an average gold price of \$322 per ounce and a GSR1 royalty rate of 2.60%, for the same period in fiscal 2003. Current production from the Pipeline Mining Complex is subject to GSR1, GSR3, and NVR1.

#### **Leeville Project (Eureka County, Nevada)**

Royal Gold holds a 1.8% net smelter return ("NSR") royalty covering a majority of the Leeville project ("Leeville"). Leeville is an underground mine, currently under development by Newmont Mining Corporation. Current production on the Leeville royalty land is derived from underground operations on a portion of the Carlin East deposit. During the quarter, the Carlin East deposit produced 29,150 ounces of gold that were subject to Royal Gold's royalty interest, providing \$205,783 in royalty revenue. This royalty was acquired in December 2002.

#### **SJ Claims (Goldstrike Mine, Eureka County, Nevada)**

Royal Gold holds a 0.9% NSR royalty on the SJ Claims covering a portion of the Betze-Post open pit at the Goldstrike mine. The Goldstrike mine is operated by Barrick Gold Corporation. During the quarter, gold production on the SJ Claims totaled 99,390 ounces, providing \$313,553 in royalty revenue. This royalty was acquired in December 2002.

#### **Bald Mountain (White Pine County, Nevada)**

Royal Gold holds a 1.75% to 3.5% NSR sliding-scale royalty that burdens a portion of the Bald Mountain mine, operated by Placer Dome U.S. Inc. During the quarter, the Bald Mountain mine produced 10,854 ounces of gold, which were attributable to Royal Gold's interest, providing \$74,790 of royalty revenue. This compares to 17,800 ounces of gold attributable to Royal Gold's interest, providing \$100,264 of royalty revenue for the same period in fiscal 2003. The 1.75% NSR royalty rate does not increase until the gold price exceeds \$500 per ounce.

### **Martha Mine (Santa Cruz Province, Argentina)**

The Company holds a 2% NSR on the Martha silver mine operated by Coeur d'Alene Mines Corporation. We received \$161,337 reflecting adjustments to royalty payments for production over the past six quarters.

### **Other Business Developments**

Royal Gold has assigned some of its non-producing gold exploration properties in Nevada acquired through the purchase of High Desert Mineral Resources in December 2002. The Company has retained a 0.75% NSR royalty on precious metal production from each of the assigned properties. The Company also terminated its interest in the Milos Gold project, on the island of Milos, Greece, which consisted of a right to a 25% interest in Geological Exploration and Development, S.A. All exploration expenses relating to our interest in the Milos Gold project have previously been expensed and therefore there is no effect on the Company's financial position or results of operations.

## **SCHEDULE A - RECONCILIATION**

### **Non-GAAP Financial Measures**

The Company computes and discloses free cash flow and free cash flow as a percentage of revenues, and is a non-GAAP financial measure. Free cash flow is defined by the Company as operating income plus depreciation, depletion and amortization, non-cash charges, and adding back any impairment of mining assets. Management believes that free cash flow and free cash flow as a percentage of revenues are useful measures of performance of our royalty portfolio. Free cash flow identifies the cash generated in a given period that will be available to fund the Company's future operations, growth opportunities, and shareholder dividends. Free cash flow, as defined, is most directly comparable to operating income in the Statements of Operations. Below is reconciliation to operating income:
