**COMMANDER INCREASES OWNERSHIP TO 100% IN THE ROB URANIUM PROPERTY,  
YUKON**

**COMMANDER RESOURCES LTD. (CMD-TSX Venture Exchange)** reports that it has signed a Letter of Intent with Blackstone Ventures Inc. ("Blackstone") to acquire Blackstone's 50% interest in the Rob uranium Property, Yukon Territory. With the acquisition, Commander now owns 100% interest of the Property.

Under the terms of the agreement, Commander may purchase the 50% interest from Blackstone by issuing to Blackstone 305,000 common shares of Commander and providing Blackstone with a 1% Net Smelter Returns Royalty ("NSR") on metal production from the Property. The NSR may be reduced to 0.5% at any time by Commander paying to Blackstone CDN\$1,000,000.

The Rob Property is comprised of 19 claim units that are contiguous with Commander's 100% owned Olympic Property which together covers a northeast trending iron-rich hematite-magnetite breccia complex that extends more than 10 kilometres in length and is up to 5 kilometres wide. Please refer to the Company's website for location and property geology maps ([www.commanderresources.com](http://www.commanderresources.com)).

As previously reported, a review recently completed by Commander of its database on the Rob Property revealed significant uranium values from outcrop samples that were collected in 1977 and 1979 by Union Miniere Exploration and Mining Corporation Limited (UMEX). The data contains uranium values in soils greater than 1.5 ppm uranium over the central part of the grid coincident with a copper-in-soil anomaly. Within the core of the uranium soil anomaly, 21 of the rock samples collected assayed greater than 0.01 percent  $U_3O_8$  and eight samples contained greater than 0.06 percent  $U_3O_8$ .

The highest values recorded in that survey were 1.57 percent  $U_3O_8$ , 1.01 percent  $U_3O_8$ , 0.54 percent  $U_3O_8$ , 0.46 percent  $U_3O_8$  and 0.32 percent  $U_3O_8$ . Chalcopyrite and pitchblende mineralization was reported from the prospecting program.

The geological sequence on the combined Olympic-Rob Property has similar geology, age, geometry and trace element signatures to that which hosts the giant Australian Olympic Dam deposit which contains about 2 billion tonnes grading 1.6% copper, 0.6 grams per tonne gold and 0.06%  $U_3O_8$ . In addition to copper and gold, Olympic Dam is one of the world's largest uranium producers.

The agreement is subject to TSX-venture Exchange approval.

### **Airborne Radiometric Survey Commences on Commander's Newfoundland Uranium Property**

**Vancouver, B.C., May 12, 2006, Commander Resources Ltd. (CMD: TSX-V)** reports that the 5,200 line kilometre airborne survey announced on April 18, 2006 has commenced. The radiometric, magnetic and electromagnetic survey will cover the large Hermitage Uranium Property near the coastal town of Burgeo, south-west Newfoundland. The survey is expected to last for a couple of weeks. Ground follow-up of the results using a prospecting and mapping team is expected to commence on Commander's property once data is available.

In addition, Pathfinder Resources Ltd. will fly 4,000 line kilometers of survey over their Property which lies adjacent to the east and west boundaries of Commander's property and covers extensions of the Hermitage Belt. Commander retains a 2% Royalty on all commodities produced from Pathfinder's claims.

The Hermitage uranium belt is a 100-by-10-kilometre structural arch that is host to the known uranium prospects. Large-scale potential is indicated by uranium occurring primarily as stratiform occurrences within sedimentary and volcanic rocks. In the year since acquiring this uranium project, Commander has completed two work programs, established the presence of eleven uranium prospects scattered over a 50 kilometre extent and staked in excess of 1000 new claim units. Rock sampling from these uranium occurrences returned high uranium values from numerous samples ranging from 0.2%  $U_3O_8$  to 2.0%  $U_3O_8$ . Average mined grade worldwide is 0.15%  $U_3O_8$  per tonne.

Bernard Kahlert (P.Eng), V.P. Exploration is the Qualified Person under N.I. 43-101 supervising all aspects of the program.
