

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

**FORM 10-Q**

(Mark one)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934  
For the quarterly period ended June 30, 2010

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 0-18560

**The Savannah Bancorp, Inc.**

(Exact name of registrant as specified in its charter)

Georgia

58-1861820

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

25 Bull Street, Savannah, Georgia 31401

(Address of principal executive offices) (Zip Code)

(912) 629-6486

(Registrant's telephone number, including area code)

[Not Applicable]

(Former name, former address and former fiscal year,  
if changed since last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer  (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:  
7,200,810 common shares, \$1.00 par value, at July 30, 2010.

**THE SAVANNAH BANCORP, INC. AND SUBSIDIARIES**  
**Condensed Notes to Consolidated Financial Statements**  
**For the Six Months Ended June 30, 2010 and 2009**  
(Unaudited)

**Note 1 - Basis of Presentation**

The accompanying unaudited consolidated financial statements of The Savannah Bancorp, Inc. (the "Company") have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Securities and Exchange Commission ("SEC") Form 10-Q and Article S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended June 30, 2010, are not necessarily indicative of the results that may be expected for the year ending December 31, 2010. For further information, refer to the consolidated financial statements and footnotes thereto, included in the Company's annual report on Form 10-K for the year ended December 31, 2009. Certain prior period balances and formats have been reclassified to conform to the current period presentation.

**Note 2 - Acquisitions**

On June 25, 2010, The Savannah Bank, N.A. ("Savannah") entered into an agreement with the FDIC to purchase substantially all deposits and certain liabilities and assets of First National Bank, Savannah ("First National"). First National operated four branches in Savannah, Georgia and the surrounding area. Savannah acquired approximately \$42 million in assets and assumed \$216 million in liabilities, including \$201 million in customer deposits. The assets primarily include cash and due from accounts and investment securities. Savannah acquired the local, non-brokered deposits of approximately \$105 million at a premium of 0.11 percent, or approximately \$116,000. In connection with closing, Savannah received a cash payment from the FDIC totaling \$174 million, based on the differential between liabilities assumed and assets acquired, taking into account the deposit premium.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of the acquisition.

(\$ in thousands)	June 25, 2010
<b>Assets acquired</b>	
Cash and due from banks	\$ 7,330
Interest-bearing deposits in banks	8,851
Securities available for sale	25,937
Loans	131
Premises and equipment	11
Deposit premium intangible	116
Other assets	128
<b>Total assets acquired</b>	<b>42,504</b>
<b>Liabilities assumed</b>	
Deposits	200,843
Federal Home Loan Bank advances	15,000
Due to the FDIC	266
Accrued interest and other liabilities	432
<b>Total liabilities assumed</b>	<b>216,541</b>
<b>Net liabilities assumed</b>	<b>\$ (174,037)</b>

The only loans assumed by Savannah were deposit-secured loans which are not subject to FDIC loss-share. In its assumption of the deposit liabilities, the Company believes that the customer relationships associated with the local deposits have intangible value. The Company determined that the recorded amount of the deposit premium paid to the FDIC approximates fair value primarily due to the fact that the Company can re-price all customer deposits to current market rates.

### Note 3 - Restrictions on Cash and Demand Balances Due from Banks and Interest-Bearing Bank Balances

Savannah and Bryan Bank & Trust (collectively referred to as the "Subsidiary Banks") are required by the Federal Reserve Bank to maintain minimum cash reserves based on reserve requirements calculated on their deposit balances. Cash reserves of \$336,000, \$339,000 and \$224,000 are required as of June 30, 2010, December 31, 2009 and June 30, 2009, respectively. The Company pledges interest-bearing cash balances at the Federal Home Loan Bank of Atlanta ("FHLB") in lieu of investment securities to secure public fund deposits and securities sold under repurchase agreements. Pledged cash balances are \$1,500,000, \$11,500,000 and \$1,500,000 at June 30, 2010, December 31, 2009 and June 30, 2009, respectively.

### Note 4 - Earnings (Loss) Per Share

Basic earnings (loss) per share represent net income (loss) divided by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. Potential common shares that may be issued by the Company relate solely to outstanding stock options, and are determined using the treasury stock method. For the six months ended June 30, 2010 and 2009, the Company excluded approximately 9,000 and 3,000 shares from the calculation of diluted earnings (loss) per share due to their anti-dilutive effect. For the three months ended June 30, 2010, the Company excluded 12,000 shares from the diluted share calculation. Earnings (loss) per common share have been computed based on the following:

(Amounts in thousands)	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2010	2009	2010	2009
Average number of common shares outstanding - basic	6,146	5,932	6,042	5,933
Effect of dilutive options	-	4	-	-
Average number of common shares outstanding - diluted	6,146	5,936	6,042	5,933

### Note 5 - Securities Available for Sale

The aggregate amortized cost and fair value of securities available for sale are as follows:

(\$ in thousands)	June 30, 2010			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Investment securities:				
U.S. government-sponsored enterprises ("GSE")	\$ 8,451	\$ -	\$ -	\$ 8,451
Mortgage-backed securities - GSE	95,216	1,554	(70)	96,700
State and municipal securities	8,571	98	(2)	8,667
Restricted equity securities	3,877	-	-	3,877
Total investment securities	\$ 116,115	\$ 1,652	\$ (72)	\$ 117,695
(\$ in thousands)	December 31, 2009			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Investment securities:				
U.S. government-sponsored enterprises	\$ 1,727	\$ 136	\$ -	\$ 1,863
Mortgage-backed securities - GSE	73,203	1,205	(120)	74,288
State and municipal securities	7,906	108	(6)	8,008
Restricted equity securities	3,760	-	-	3,760
Total investment securities	\$ 86,596	\$ 1,449	\$ (126)	\$ 87,919

### Note 5 - Securities Available for Sale (continued)

At June 30, 2010, management performed its quarterly analysis of all securities with an unrealized loss and concluded no material individual securities were other-than-temporarily impaired.

The distribution of securities by contractual maturity at June 30, 2010 is shown below. Actual maturities may differ from contractual maturities because issuers have the right to call or prepay obligations with or without call or prepayment penalties.

(\$ in thousands)	Amortized	
	Cost	Fair Value
<b>Securities available for sale:</b>		
Due in one year or less	\$ 101	\$ 104
Due after one year through five years	1,081	1,113
Due after five years through ten years	1,265	1,301
Due after ten years	14,575	14,600
Mortgage-backed securities - GSE	95,216	96,700
Restricted equity securities	3,877	3,877
<b>Total investment securities</b>	<b>\$ 116,115</b>	<b>\$ 117,695</b>

The restricted equity securities consist solely of FHLB and Federal Reserve Bank of Atlanta stock. These securities are carried at cost since they do not have readily determinable fair values due to their restricted nature.

### Note 6 - Fair Value of Financial Instruments

#### Determination of Fair Value

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. In accordance with the accounting standards for fair value measurements and disclosure, the fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument.

The recent fair value guidance provides a consistent definition of fair value, which focuses on exit price in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. If there has been a significant decrease in the volume and level of activity for the asset or liability, a change in valuation technique or the use of multiple valuation techniques may be appropriate. In such instances, determining the price at which willing market participants would transact at the measurement date under current market conditions depends on the facts and circumstances and requires the use of significant judgment. The fair value is a reasonable point within the range that is most representative of fair value under current market conditions.

In accordance with this guidance, the Company groups its financial assets and financial liabilities generally measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

## Note 6 - Fair Value of Financial Instruments (continued)

Level 3: Significant unobservable inputs that are supported by little or no market activity for the asset or liability. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which determination of fair value requires significant management judgment or estimation.

### Recurring Fair Value Changes

Following is a description of the valuation methodologies used for instruments measured at fair value on a recurring basis and recognized in the accompanying balance sheet, as well as the general classification of such instruments pursuant to the valuation hierarchy.

*Investment securities:* The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities.

*Derivative instruments:* Our derivative instruments consist of loan level swaps. As such, significant fair value inputs can generally be verified and do not typically involve significant judgments by management.

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	Carrying Value	Fair Value Measurements at June 30, 2010 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(\$ in thousands)				
Investment securities	\$ 117,695	\$ -	\$ 113,818	\$ 3,877

### Nonrecurring Fair Value Changes

Certain assets and liabilities are measured at fair value on a nonrecurring basis. These instruments are not measured at fair value on an ongoing basis, but subject to fair value in certain circumstances, such as when there is evidence of impairment that may require write-downs. The write-downs for the Company's more significant assets or liabilities measured on a nonrecurring basis are based on the lower of amortized cost or estimated fair value.

*Impaired loans and other real estate owned ("OREO"):* Impaired loans and OREO are evaluated and valued at the time the loan or OREO is identified as impaired, at the lower of cost or market value. Market value is measured based on the value of the collateral securing these loans and is classified at a Level 3 in the fair value hierarchy. Collateral for impaired loans may be real estate and/or business assets, including equipment, inventory and/or accounts receivable. Its fair value is generally determined based on real estate appraisals or other independent evaluations by qualified professionals. Impaired loans and OREO are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on the same factors identified above. Impaired loans measured on a nonrecurring basis do not include pools of impaired loans.

**Note 6 - Fair Value of Financial Instruments (continued)**

Assets and liabilities with an impairment charge during the current period and measured at fair value on a nonrecurring basis are summarized below:

Carrying Values at June 30, 2010					
(\$ in thousands)	Total	Level 1	Level 2	Level 3	Total gain (loss)
Impaired loans	\$ 10,358	\$ -	\$ -	\$ 10,358	\$ (4,947)
OREO	1,252	-	-	1,252	(423)

  

Carrying Values at December 31, 2009					
(\$ in thousands)	Total	Level 1	Level 2	Level 3	Total gain (loss)
Impaired loans	\$ 14,021	\$ -	\$ -	\$ 14,021	\$ (5,613)
OREO	3,390	-	-	3,390	(841)

**Fair Value Disclosures**

Accounting standards require the disclosure of the estimated fair value of financial instruments including those financial instruments for which the Company did not elect the fair value option. The fair value represents management's best estimates based on a range of methodologies and assumptions.

Cash and due from banks, federal funds sold, accrued interest receivable, all non-maturity deposits, short-term borrowings, other borrowings, subordinated debt and accrued interest payable have carrying amounts which approximate fair value primarily because of the short repricing opportunities of these instruments.

Following is a description of the methods and assumptions used by the Company to estimate the fair value of its financial instruments:

*Investment securities:* Fair value is based upon quoted market prices, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. Restricted equity securities are carried at cost because no market value is available.

*Loans:* The fair value is estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type, such as commercial, mortgage, and consumer loans. The fair value of the loan portfolio is calculated by discounting contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loan. The estimated fair value of the Subsidiary Banks' off-balance sheet commitments is nominal since the committed rates approximate current rates offered for commitments with similar rate and maturity characteristics and since the estimated credit risk associated with such commitments is not significant.

*Derivative instruments:* The fair value of derivative instruments, consisting of interest rate contracts, is equal to the estimated amount that the Company would receive or pay to terminate the derivative instruments at the reporting date, taking into account current interest rates and the credit-worthiness of the counterparties.

*Deposit liabilities:* The fair value of time deposits is estimated using the discounted value of contractual cash flows based on current rates offered for deposits of similar remaining maturities.

*FHLB advances – long-term:* The fair value is estimated using the discounted value of contractual cash flows based on current rates offered for advances of similar remaining maturities and/or termination values provided by the FHLB.

**Note 6 - Fair Value of Financial Instruments (continued)**

The carrying amounts and estimated fair values of the Company's financial instruments are as follows:

(\$ in thousands)	June 30, 2010		December 31, 2009

### **Forward-Looking Statements**

The Company may, from time to time, make written or oral "forward-looking statements," including statements contained in the Company's filings with the SEC (including this quarterly report on Form 10-Q) and in its reports to shareholders and in other communications by the Company, which are made in good faith by the Company pursuant to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995.

This MD&A and other Company communications and statements may contain "forward-looking statements." These forward-looking statements may include, among others, statements about our beliefs, plans, objectives, goals, expectations, estimates and intentions that are subject to significant risks and uncertainties and which may change based on various factors, many of which are beyond our control. The words "may," "could," "should," "would," "will," "believe," "anticipate," "estimate," "expect," "intend," "indicate," "plan" and similar words are intended to identify expressions of the future. These forward-looking statements involve risks and uncertainties, such as statements of the Company's plans, objectives, expectations, estimates and intentions that are subject to change based on various important factors (some of which are beyond the Company's control). The following factors, among others, could cause the Company's financial performance to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements: the strength of the United States economy in general and the strength of the local economies in which the Company conducts operations; the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System; inflation, interest rates, market and monetary fluctuations; competitors' products and services; technological changes; acquisitions; changes in consumer spending and saving habits; and the success of the Company at managing the risks involved in the foregoing.

The Company cautions that the foregoing list of important factors is not exhaustive. The Company does not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of the Company.

### **Overview**

For a comprehensive presentation of the Company's financial condition at June 30, 2010 and 2009 and results of operations for the three and six month periods ended June 30, 2010 and 2009, the following analysis should be reviewed with other information including the Company's December 31, 2009 Annual Report on Form 10-K and the Company's Condensed Consolidated Financial Statements and the Notes thereto included in this report.

## **Introduction**

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") provides supplemental information, which sets forth the major factors that have affected the Company's financial condition and results of operations and should be read in conjunction with the Consolidated Financial Statements and related notes. The MD&A is divided into subsections entitled:

Introduction  
Critical Accounting Estimates  
Results of Operations  
Financial Condition and Capital Resources  
Liquidity and Interest Rate Sensitivity Management  
Off-Balance Sheet Arrangements

These discussions should facilitate a better understanding of the major factors and trends that affect the Company's earnings performance and financial condition and how the Company's performance during the three and six month periods ended June 30, 2010 compared with the same periods in 2009. Throughout this section, The Savannah Bancorp, Inc., and its subsidiaries, collectively, are referred to as "SAVB" or the "Company." The Savannah Bank, N.A. is referred to as "Savannah" and Bryan Bank & Trust is referred to as "Bryan." Minis & Co., Inc., a registered investment advisor and wholly-owned subsidiary, is referred to as "Minis." The Company formed a new subsidiary, SAVB Holdings, LLC ("SAVB Holdings"), in the third quarter 2008 for the purpose of holding problem loans and other real estate. Collectively, Savannah and Bryan are referred to as the "Subsidiary Banks."

The averages used in this report are based on the sum of the daily balances for each respective period divided by the number of days in the reporting period.

The Company is headquartered in Savannah, Georgia and, as of June 30, 2010, had fourteen banking offices and sixteen ATMs in Savannah, Garden City, Skidaway Island, Whitemarsh Island, Tybee Island, Pooler, and Richmond Hill, Georgia and Hilton Head Island and Bluffton, South Carolina. The Company also has mortgage lending offices in Savannah, Richmond Hill and Hilton Head Island and an investment management office in Savannah. In addition, the Company has a loan production office on St. Simons Island, Georgia.

Savannah and Bryan are in the relatively diverse and growing Savannah Metropolitan Statistical Area ("Savannah MSA"). The diversity of major employers includes manufacturing, port related transportation, construction, military, healthcare, tourism, education, warehousing and the supporting services and products for each of these major employers. The real estate market is experiencing moderate government growth and much slower commercial and residential growth. Coastal Georgia and South Carolina continue to be desired retiree residential destinations as well as travel destinations. The Savannah MSA and Coastal South Carolina markets have both experienced some level of devaluation in real estate prices.

The primary risks to the Company include those disclosed in Item 1A in the Company's Annual Report on Form 10-K for December 31, 2009 and in the Prospectus Supplement filed June 10, 2010.

The primary strategic objectives of the Company are growth in loans, deposits, assets under management, product lines and service quality in existing markets, and quality expansion into new markets, within acceptable risk parameters, which result in enhanced shareholder value.

### **Critical Accounting Estimates**

#### Allowance for Loan Losses

The Company considers its policies regarding the allowance for loan losses to be its most critical accounting estimate due to the significant degree of management judgment involved. The allowance for loan losses is established through charges to earnings in the form of a provision for loan losses based on management's continuous evaluation of the loan portfolio. Loan losses and recoveries are charged or credited directly to the allowance. The amount of the allowance reflects management's opinion of an adequate level to absorb probable losses inherent in the loan portfolio at June 30, 2010. The amount charged to the provision and the level of the allowance is based on management's judgment and is dependent upon growth in the loan portfolio, the total amount of past due loans and nonperforming loans, recent charge-off levels, known loan deteriorations and concentrations of credit. Other factors affecting the allowance include market interest rates, loan sizes, portfolio maturity and composition, collateral values and general economic conditions. Finally, management's assessment of probable losses, based upon internal credit grading of the loans and periodic reviews and assessments of credit risk associated with particular loans, is considered in establishing the amount of the allowance.

No assurance can be given that the Company will not sustain loan losses which would be sizable in relationship to the amount reserved or that subsequent evaluation of the loan portfolio, in light of conditions and factors then prevailing, will not require significant changes in the allowance for loan losses by future charges or credits to earnings. The allowance for loan losses is also subject to review by various regulatory agencies through their periodic examinations of the Subsidiary Banks. Such examinations could result in required changes to the allowance for loan losses. No adjustment in the allowance or significant adjustments to the Subsidiary Banks' internally classified loans were made as a result of their most recent regulatory examinations.

The allowance for loan losses totaled \$18,775,000, or 2.21 percent of total loans, at June 30, 2010. This is compared to an allowance of \$17,678,000, or 2.00 percent of total loans, at December 31, 2009. For the six months ended June 30, 2010, the Company reported net charge-offs of \$7,968,000 compared to net charge-offs of \$4,648,000 for the same period in 2009. The significantly higher level of charge-offs resulted primarily from continued weakness in the Company's local residential real estate markets. In the second quarter 2010, the Company charged off \$1.5 million on two loans to a developer in Effingham County. The loans are secured primarily by completed lots.

During the first six months of 2010 and 2009, a provision for loan losses of \$9,065,000 and \$6,945,000, respectively, was added to the allowance for loan losses. The higher provision for loans losses in 2010 was primarily due to real estate-related charge-offs, continued weakness in the Company's local residential real estate markets, and level or declining real estate values.

The Company's nonperforming assets consist of loans on nonaccrual status, loans which are contractually past due 90 days or more on which interest is still being accrued, and other real estate owned. Nonaccrual loans of \$39,001,000 and loans past due 90 days or more of \$2,184,000 totaled \$41,185,000, or 4.85 percent of gross loans, at June 30, 2010. Nonaccrual loans of \$32,545,000 and loans past due 90 days or more of \$1,570,000 totaled \$34,115,000, or 3.86 percent of gross loans, at December 31, 2009. Generally, loans are placed on nonaccrual status when the collection of the principal or interest in full becomes doubtful. Management typically writes down loans through a charge to the allowance when it determines they are impaired. Nonperforming assets also included \$7,793,000 and \$8,329,000 of other real estate owned at June 30, 2010 and December 31, 2009, respectively. Management is aggressively pricing and marketing the other real estate owned.

At June 30, 2010 nonperforming loans consisted primarily of \$20.8 million of land, lot and construction and development related loans and \$16.7 million of improved real estate-secured loans. Less than one percent of the nonperforming loans were unsecured. The largest nonperforming relationship consists of four loans for \$7.6 million to a residential developer in the Bluffton/Hilton Head Island, South Carolina market. The loans are secured by residential land and lots. Approximately \$1,012,000 of the allowance was allocated to this relationship as a general reserve. The next largest nonperforming relationship consists of five loans for \$3.5 million to a residential developer in the Effingham County, Georgia market. The loans are secured by residential land and lots and completed 1-4 family properties. The Company charged-off \$1,500,000 on this relationship and still has approximately \$707,000 of the allowance allocated as a specific reserve.

During the first quarter 2010, the Company sold its largest piece of other real estate owned, which had a carrying value of \$2.4 million, for a loss of \$92,000.

The Company continues to devote significant internal and external resources to managing the past due and classified loans. The Company has performed extensive internal and external loan review procedures and analyses on the loan portfolio. The Company charges-down loans as appropriate before the foreclosure process is complete and often before they are past due.

If the allowance for loan losses had changed by five percent, the effect on our net loss would have been approximately \$620,000. If the allowance had to be increased by this amount, it would not have changed the holding company or the Subsidiary Banks' status as well-capitalized financial institutions.

#### Impairment of Loans

The Company measures impaired loans based on the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. A loan is considered impaired when it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. A loan is not considered impaired during a period of delay in payment if the ultimate collection of all amounts due is expected. The Company maintains a valuation allowance or charges-down the loan balance to the extent that the measure of value of an impaired loan is less than the recorded investment.

### Other Real Estate Owned

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value less costs to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, management periodically performs valuations of the foreclosed assets based on updated appraisals, general market conditions, length of time the properties have been held, and our ability and intention with regard to continued ownership of the properties. The Company may incur additional write-downs of foreclosed assets to fair value less costs to sell if valuations indicate a further other than temporary deterioration in market conditions.

The following table provides historical information regarding the allowance for loan losses and nonperforming loans and assets for the most recent five quarters ended June 30, 2010.

(\$ in thousands)	2010		2009		
	Second Quarter	First Quarter	Fourth Quarter	Third Quarter	Second Quarter

Nonperforming assets as a % of assets	3.97%	4.21%	4.04%	3.48%	3.31%
(a) Annualized					

Impaired loans, which include loans modified in troubled debt restructurings, totaled \$57,770,000 and \$54,054,000 at June 30, 2010 and December 31, 2009, respectively.

## Results of Operations

### Second Quarter, 2010 Compared to the Second Quarter, 2009

Net loss for the second quarter 2010 was \$62,000, compared to net income of \$106,000 in the second quarter 2009. Net loss per diluted share was 1 cent in the second quarter 2010 compared to net income of 2 cents per diluted share in the second quarter 2009. The decline in second quarter earnings results primarily from a higher provision for loan losses partially offset by a lower loss on sale of foreclosed assets. Return on average equity was (0.31) percent, return on average assets was (0.02) percent and the efficiency ratio was 65.38 percent in the second quarter 2010.

On June 25, 2010, Savannah entered into an agreement with the FDIC to purchase substantially all deposits and certain liabilities and assets of First National Bank, Savannah ("First National"). Savannah acquired approximately \$42 million in assets and assumed \$216 million in liabilities, including \$201 million in customer deposits. In connection with closing, Savannah received a cash payment from the FDIC totaling \$174 million, based on the differential between liabilities assumed and assets acquired. Also in the second quarter 2010, the Company completed a common stock offering to the public for net proceeds of \$11.2 million. The proceeds were used in part to facilitate the purchase of First National and to fund the final earn-out payment for Minis.

Second quarter average interest-earning assets increased 1.8 percent to \$939 million in 2010 from \$922 million in 2009. Second quarter net interest income was \$8,276,000 in 2010 compared to \$8,084,000 in 2009, a 2.4 percent increase. Second quarter average accruing loans were \$813 million in 2010 compared to \$836 million in 2009, a 2.8 percent decrease. Average deposits were \$896 million in 2010 versus \$849 million in 2009, an increase of 5.5 percent. Shareholders' equity was \$89.6 million at June 30, 2010 compared to \$79.0 million at June 30, 2009. The Company's total capital to risk-weighted assets ratio was 13.36 percent at June 30, 2010, which exceeds the 10 percent required by the regulatory agencies to maintain well-capitalized status. Second quarter net interest margin increased to 3.54 percent in 2010 from 3.52 percent in the same period in 2009. As shown in Table 2, the increase in net interest margin was primarily due to a higher interest rate spread partially offset by higher levels of noninterest-earning assets. On a linked quarter basis, the net interest margin decreased 10 basis points compared to the first quarter 2010.

As shown in Table 1, the Company's balance sheet continues to be asset-sensitive since the interest-earning assets re-price faster than interest-bearing liabilities. Rising interest rates favorably impact the net interest margin of an asset-sensitive balance sheet and falling rates adversely impact the net interest margin. However, when the prime rate stops decreasing, the interest rates on time deposits, certain non-maturity deposits and other funding sources will continue to decline due to the re-pricing lag associated with those liabilities. In addition, the Company has instituted interest rate floors on many variable rate loans such that the loans will not re-price in a rising rate environment until the floating rate exceeds the floor.

Second quarter provision for loan losses was \$3,745,000 for 2010, compared to \$3,225,000 for the comparable period in 2009. Second quarter net charge-offs were \$4,581,000 for 2010 compared to \$2,937,000 in the same quarter in 2009. Loans decreased \$20 million in the second quarter 2010 and were down \$3 million in the second quarter 2009. The higher provision for loan losses was primarily related to charge-offs and continued weakness in the Company's local residential real estate markets.

Noninterest income decreased \$180,000, or 9.4 percent, to \$1,726,000 in the second quarter of 2010 versus the same period in 2009. The decrease was due to a \$256,000 lower gain on hedges partially offset by \$107,000 higher trust and asset management fees.

Noninterest expense decreased \$200,000, or 3.0 percent, to \$6,539,000 in the second quarter 2010 compared to the same period in 2009. Second quarter 2010 noninterest expense included \$457,000, or 101 percent, of higher occupancy and equipment expense. In the second quarter 2009, the Company purchased its previously leased branch on Hilton Head Island and reversed approximately \$527,000 in accrued rent expense. FDIC insurance premiums decreased \$406,000, or 50 percent, and loss on sale and write-downs of foreclosed assets decreased \$554,000. The second quarter 2009 included a \$465,000 special assessment applicable to all FDIC-insured depository institutions.

The second quarter income tax benefit was \$220,000 in 2010 compared to \$80,000 in 2009. The income tax benefit in the second quarter 2010 was due in part to the impact of tax credits on lower taxable income. The Company has never recorded a valuation allowance against deferred tax assets. All significant deferred tax assets are considered to be realizable due to expected future taxable income.

### First Six Months, 2010 Compared to the First Six Months, 2009

Net loss in the first six months 2010 was \$550,000, versus \$179,000 in the first six months 2009. Net loss per share was 9 cents in the first six months 2010 compared to 3 cents per share in the same period in 2009. The decline in earnings results primarily from a higher provision for loan losses. Return on average equity was (0.69) percent, return on average assets was (0.05) percent and the efficiency ratio was 62.60 percent in the first six months 2010.

Average interest-earning assets for the first six months increased 1.7 percent to \$940 million in 2010 from \$924 million in 2009. First six months net interest income was \$16,705,000 in 2010 compared to \$15,750,000 in 2009, an increase of \$955,000 or 6.1 percent. Average accruing loans were \$827 million for the first six months of 2010, 1.3 percent lower when compared to \$838 million in 2009. Average deposits were \$887 million in 2010 versus \$841 million in 2009, an increase of 5.5 percent. The net interest margin increased to 3.59 percent in the first half of 2010 from 3.44 percent in the same period in 2009. As shown in Table 3, the increase in net interest margin was primarily due to a higher interest rate spread partially offset by higher levels of noninterest-earning assets. The Company re-priced deposits at a faster rate than assets over the last 12 months and much of the deposit growth was in money market accounts rather than time deposits.

First six months provision for loan losses was \$9,065,000 for 2010, compared to \$6,945,000 for 2009. Net charge-offs for the first six months were \$7,968,000 for 2010 compared to \$4,648,000 for the same period in 2009. Changes in the provision are impacted as discussed under the "Allowance for Loan Losses" section above. Loans decreased \$35 million in the first six months 2010, compared to \$3 million in the first six months 2009. The significantly higher provision for loan losses was primarily related to charge-offs and continued weakness in the Company's local residential real estate markets.

Noninterest income increased \$91,000, or 2.3 percent, to \$4,006,000 in the first six months 2010 compared to the same period in 2009. The increase was due to higher trust and asset management fees and other operating income as well as a higher gain on sale of securities partially offset by a lower gain on hedges. Other operating income included a \$308,000 gain on life insurance proceeds.

Noninterest expense was \$12,966,000 in the first six months of 2010 compared to \$13,214,000 in 2009, a decrease of \$248,000, or 1.9 percent. The decrease was due to lower salaries and benefits, FDIC deposit insurance and loss on sale of foreclosed assets partially offset by higher occupancy and equipment and information technology expense. Salaries and benefits decreased \$256,000, or 4.0 percent. Occupancy and equipment expenses increased \$342,000, or 23 percent.

The first six months income tax benefit was \$770,000 in 2010 compared to \$315,000 in 2009. The income tax benefit in 2010 was due in part to the impact of tax credits on lower taxable income. The Company has never recorded a valuation allowance against deferred tax assets. All deferred tax assets are considered to be realizable due to expected future taxable income.

## Financial Condition and Capital Resources

### Balance Sheet Activity

The changes in the Company's assets and liabilities for the current and prior period are shown in the consolidated statements of cash flows. At June 30, 2010, the Company had approximately \$179 million in cash and due from accounts, \$26 million in investments, \$195 million in deposits and \$10 million in FHLB borrowings from the acquisition of First National from the FDIC. Loans decreased \$35 million the first six months of 2010. The Company experienced normal pay downs on loans in 2010, however loan demand was soft. The decrease in loans and influx of deposits from First National was used primarily to increase our cash and cash equivalents and to pay down short-term borrowings.

Average total assets increased 3.5 percent to \$1.035 billion in the first six months of 2010 from \$1.00 billion in the same period in 2009. Total assets were \$1.23 billion and \$1.02 billion at June 30, 2010 and 2009, respectively, an increase of 20 percent. The increase was primarily related to the Company's acquisition of First National.

The Company has classified all investment securities as available for sale. Lower short-term interest rates resulted in an overall net unrealized gain in the investment portfolio. The Company's portfolio increased \$30 million in 2010 to \$118 million at June 30, primarily due to the First National acquisition. The unrealized gain or loss amounts are included in shareholders' equity as accumulated other comprehensive income (loss), net of tax.

Deposits were up \$185 million in 2010 to \$1.07 billion at June 30. Total deposits include \$195 million from the acquisition of First National. The Company also had significant growth in local money market accounts and noninterest-bearing accounts in 2010 partially offset by a decrease in interest-bearing demand accounts. Brokered time deposits and institutional money market accounts total \$159 million at June 30, 2010 compared to \$172 million at December 31, 2009. At June 30, 2010 and December 31, 2009, brokered time deposits include \$49 million and \$38 million, respectively, of reciprocal deposits from the Company's local customers that are classified as brokered because they are placed in the CDARS network for deposit insurance purposes.

### Loans

The following table shows the composition of the loan portfolio as of June 30, 2010 and December 31, 2009, including a more detailed breakdown of real estate-secured loans by collateral type and purpose.

(\$ in thousands)	6/30/10	% of Total	12/31/09	% of Total	% Dollar Change
<b>Non-residential real estate</b>

## Capital Resources

The Subsidiary Banks' primary regulators have adopted capital requirements that specify the minimum capital level for which no prompt corrective action is required. In addition, the FDIC has adopted FDIC insurance assessment rates based on certain "well-capitalized" risk-based and equity capital ratios. Failure to meet minimum capital requirements can result in the initiation of certain actions by the regulators that, if undertaken, could have a material effect on the Company's and the Subsidiary Banks' financial statements. As of June 30, 2010, the Company and the Subsidiary Banks were categorized as well-capitalized under the regulatory framework for prompt corrective action in the most recent notification from the FDIC.

Total tangible equity capital for the Company was \$87.1 million, or 7.05 percent of total assets at June 30, 2010. In the second quarter 2010, the Company raised \$11.2 million, net of issuance costs, in a common stock offering. The table below includes the regulatory capital ratios for the Company and each Subsidiary Bank along with the minimum capital ratio and the ratio required to maintain a well-capitalized regulatory status.

(\$ in thousands)	Company	Savannah	Bryan	Minimum	Well-Capitalized
<b>Qualifying Capital</b>					
Tier 1 capital	\$ 96,010	\$ 64,947	\$ 22,866	-	-
Total capital	106,038	72,099	25,479	-	-
<b>Leverage Ratios</b>					
Tier 1 capital to average assets	9.27%	8.41%	8.97%	4.00%	5.00%
<b>Risk-based Ratios</b>					
Tier 1 capital to risk-weighted assets	12.10%	11.45%	11.05%	4.00%	6.00%
Total capital to risk-weighted assets	13.36%	12.72%	12.32%	8.00%	10.00%

Tier 1 and total capital at the Company level includes \$10 million of subordinated debt issued to the Company's nonconsolidated subsidiaries. Total capital also includes the allowance for loan losses up to 1.25 percent of risk-weighted assets.

## Liquidity and Interest Rate Sensitivity Management

The objectives of balance sheet management include maintaining adequate liquidity and preserving reasonable balance between the repricing of interest sensitive assets and liabilities at favorable interest rate spreads. The objective of liquidity management is to ensure the availability of adequate funds to meet the loan demands and the deposit withdrawal needs of customers. This is achieved through maintaining a combination of sufficient liquid assets, core deposit growth and unused capacity to purchase and borrow funds in the money markets.

During the first six months of 2010, portfolio loans decreased \$35 million to \$849 million while deposits increased \$185 million to \$1.07 billion. The loan to deposit ratio was 79 percent at June 30, 2010. In the third quarter 2010, the Company made a final payment to the former owners of Minis in the amount of \$1.7 million. This was an earn-out payment for the 2007 acquisition of Minis. In addition to local deposit growth, primary funding and liquidity sources include borrowing capacity with the FHLB, temporary federal funds purchased lines with correspondent banks and non-local institutional and brokered deposits. Contingency funding and liquidity sources include the ability to sell loans, or participations in certain loans, to investors and borrowings from the Federal Reserve Bank ("FRB") discount window.

The Subsidiary Banks have Blanket Floating Lien Agreements with the FHLB. Under these agreements, the Subsidiary Banks have pledged certain 1-4 family first mortgage loans, commercial real estate loans, home equity lines of credit and second mortgage residential loans. The Subsidiary Banks' individual borrowing limits range from 20 to 25 percent of assets. In aggregate, the Subsidiary Banks had secured borrowing capacity of approximately \$122 million with the FHLB of which \$30 million was advanced at June 30, 2010. These credit arrangements serve as a core funding source as well as liquidity backup for the Subsidiary Banks. The Subsidiary Banks also have conditional federal funds borrowing lines available from correspondent banks that management believes can provide up to \$15 million of funding needs for 30-60 days. The Subsidiary Banks have been approved to access the FRB discount window to borrow on a secured basis at 50 basis points over the Federal Funds Target Rate. The amount of credit available is subject to the amounts and types of collateral available when borrowings are requested. The Subsidiary Banks were approved by the FRB under the borrower-in-custody of collateral ("BIC") arrangement. This temporary liquidity arrangement allows collateral to be maintained at the Subsidiary Banks rather than being delivered to the FRB or a third-party custodian. At June 30, 2010, the Company had secured borrowing capacity of \$78 million with the FRB and no amount outstanding.

A continuing objective of interest rate sensitivity management is to maintain appropriate levels of variable rate assets, including variable rate loans and shorter maturity investments, relative to interest rate sensitive liabilities, in order to control potential negative impacts upon earnings due to changes in interest rates. Interest rate sensitivity management requires analyses and actions that take into consideration volumes of assets and liabilities repricing and the timing and magnitude of their price changes to determine the effect upon net interest income. The Company utilizes hedging strategies to reduce interest rate risk as noted below.

The Company's cash flow, maturity and repricing gap at June 30, 2010 was \$103 million at one year, or 9.0 percent of total interest-earning assets. At December 31, 2009 the gap at one year was \$53 million, or 5.5 percent of total interest-earning assets. Interest-earning assets with maturities over five years totaled approximately \$66 million, or 5.8 percent of total interest-earning assets. See Table 1 for cash flow, maturity and repricing gap. The gap position between one and five years is of less concern because management has time to respond to changing financial conditions and interest rates with actions that reduce the impact of the longer-term gap positions on net interest income. However, interest-earning assets with maturities and/or repricing dates over five years may include significant rate risk and market value of equity concerns in the event of significant interest rate increases.

The Company is asset-sensitive within one year. The net interest margin and net interest income increased in the first six months of 2010 compared to the same period in 2009 due primarily to a higher interest rate spread partially offset by higher levels of nonaccrual loans and other noninterest-earning assets. Our investment securities and time deposits continue to re-price lower. On a linked quarter basis, the second quarter 2010 net interest margin decreased 10 basis points to 3.54 percent from 3.64 percent in the first quarter 2010.

The Company has implemented various strategies to reduce its asset-sensitive position, primarily through the increased use of fixed rate loans, interest rate floors on variable rate loans and short maturity funding sources. In the past the Company has also implemented hedging strategies such as interest rate floors, collars and swaps. These actions have reduced the Company's exposure to falling interest rates. The amounts in other comprehensive income related to the terminated derivative transactions will be reclassified into earnings over the remaining lives of the original hedged transactions.

Management monitors interest rate risk quarterly using rate-sensitivity forecasting models and other balance sheet analytical reports. If and when projected interest rate risk exposures are outside of policy tolerances or desired positions, specific strategies to return interest rate risk exposures to desired levels are developed by management, approved by the Asset-Liability Committee and reported to the Board of Directors.

				Net interest income	\$ 8,284	\$ 8,092	\$ 192	\$ 106	\$ 86
\$ 66,369	\$ 84,769			Net earning assets					
\$ 895,615	\$849,488			Average deposits					
		1.40	2.01	Average cost of deposits					
91%	98%			Average loan to deposit ratio					

(a) This table shows the changes in interest income and interest expense for the comparative periods based on either changes in average volume or changes in average rates for interest-earning assets and interest-bearing liabilities. Changes which are not solely due to rate changes or solely due to volume changes are attributed to volume.

(b) The taxable equivalent adjustment results from tax exempt income less non-deductible TEFRA interest expense and was \$8 in the second quarter 2010 and 2009, respectively.

(c) Average nonaccruing loans have been excluded from total average loans and categorized in noninterest-earning assets.

**Table 3 – Average Balance Sheet and Rate/Volume Analysis – First Six Months, 2010 and 2009**

The following table presents average balances of the Company and the Subsidiary Banks on a consolidated basis, the taxable-equivalent interest earned and the interest paid during the first six months of 2010 and 2009.

Average Balance		Average Rate		Taxable-Equivalent Interest (b)			(a) Variance Attributable to

15,828	12,269	2.24	2.19	FHLB advances - long-term	176	133	43	3	40
10,310	10,310	2.91	4.01	Subordinated debt	149	205	(56)	(56)	-
870,450	835,962	1.71	2.31	Total interest-bearing liabilities	7,365	9,580	(2,215)	(2,487)	272
81,485	81,660			Noninterest-bearing deposits					
3,831	6,247			Other liabilities					
79,566	80,236			Shareholders' equity					
<u>\$1,035,332</u>	<u>\$1,004,105</u>			Liabilities and equity					
		3.46	3.22	Interest rate spread					
		3.59	3.44	Net interest margin					
				Net interest income	\$16,721	\$15,766	\$ 955	\$ 838	\$ 117
\$ 69,204	\$ 87,829			Net earning assets					
<u>\$ 886,842</u>	<u>\$841,168</u>			Average deposits					
		1.45	2.10	Average cost of deposits					
93%	100%			Average loan to deposit ratio					

(a) This table shows the changes in interest income and interest expense for the comparative periods based on either changes in average volume or changes in average rates for interest-earning assets and interest-bearing liabilities. Changes which are not solely due to rate changes or solely due to volume changes are attributed to volume.

(b) The taxable equivalent adjustment results from tax exempt income less non-deductible TEFRA interest expense and was \$16 in the first six months 2010 and 2009, respectively.

(c) Average nonaccruing loans have been excluded from total average loans and categorized in noninterest-earning assets.

**Table 4 - Off-Balance Sheet Arrangements**

The Company is a party to financial instruments with off-balance sheet risks in the normal course of business in order to meet the financing needs of its customers. At June 30, 2010, the Company had unfunded commitments to extend credit of \$82 million and outstanding standby letters of credit of \$2 million. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. Management does not anticipate that funding obligations arising from these financial instruments will adversely impact its ability to fund future loan growth or deposit withdrawals.

The following table includes a breakdown of short-term and long-term payment obligations due under long-term contracts:

(\$ in thousands)	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
<b>Contractual obligations</b>					
FHLB advances – long-term	\$ 25,661	\$ 7,000	\$ 8,500	\$ -	\$ 10,161
Subordinated debt	10,310	-	-	-	10,310
Operating leases – buildings	5,787	723	1,496	2,226	1,342
Information technology contracts	2,086	1,240	846	-	-
<b>Total</b>	<b>\$ 43,844</b>	<b>\$ 8,963</b>	<b>\$ 10,842</b>	<b>\$ 2,226</b>	<b>\$ 21,813</b>

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

See “Liquidity and Interest Rate Sensitivity Management” on pages 21-23 in the MD&A section for quantitative and qualitative disclosures about market risk.

**Item 4. Controls and Procedures**

*Evaluation of Disclosure Controls and Procedures* - We have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q as required by Rule 13a-15 of the Securities Exchange Act of 1934, as amended. This evaluation was carried out under the supervision and with the participation of our management, including our chief executive officer and chief financial officer. Based on this evaluation, the chief executive officer and chief financial officer have concluded that our disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in our periodic SEC filings.

*Changes in Internal Control over Financial Reporting* - No change in our internal control over financial reporting occurred during the fiscal quarter covered by this Quarterly Report on Form 10-Q that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Part II – Other Information**

Item 6. Exhibits.

Exhibit 31.1 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

Exhibit 31.2 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

Exhibit 32 Certification Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

**Signatures**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

**Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, John C. Helmken II, certify that:

1. I have reviewed this quarterly report on Form 10-Q of The Savannah Bancorp, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal controls over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
