NOTE 1 – NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Dabbah Securities Corp. (the “Company”), a Delaware corporation, is a broker-dealer registered with the Securities and Exchange Commission (“SEC”), a member of the Financial Industry Regulatory Authority (“FINRA”) and an introducing broker registered with the National Futures Association (“NFA”).

Revenue Recognition

The Company’s business consists substantially of commissions based on customer transactions and income from proprietary trading. Commission revenues and proprietary trading gains and losses are recorded on a trade date basis. The Company believes that, with regards to commission income, the performance obligation is satisfied on the trade date because that is when the underlying financial instrument or purchaser is identified, the pricing is agreed upon and the risk and rewards of ownership have been transferred to/from the customer. The Company is a non-clearing broker and, accordingly, utilizes a clearing broker on a fully disclosed basis on applicable transactions.

Use of Estimates and Subsequent Events

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. Actual results could differ from those estimates. The Company has evaluated events and transactions that occurred through February 12, 2020, which is the date the financial statements were available for issuance, for possible disclosure and recognition in the financial statements.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash in banks, and short-term, highly liquid investments purchased with an original maturity of three months or less.

Marketable Securities

Marketable securities are reflected at the closing price on the day of valuation with resultant unrealized gains or losses reflected in net income for the year. The financial statements reflect realized gains and losses on dispositions of investment securities on a trade date basis. The cost of marketable securities sold is determined on the specific identification method.

**NOTE 1 – NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING
POLICIES (continued)**

Good Faith Deposit

At December 31, 2019 the Company maintained Good Faith Deposits totaling \$25,000 with its current clearing/trading firm. The Company's active deposits are invested in U.S Treasury Bills.

Income Taxes

The Company has elected to be treated as a Subchapter S Corporation for federal and state purposes and, as a result, will generally not be subject to corporate income taxes. The Company's shareholder is taxed on the Company's income. However, New York City does not recognize S corporation status and, accordingly, local corporation income taxes will continue to be payable by the Company in addition to certain alternative and minimum taxes to various state agencies where applicable.

Due To/From Broker

The Company maintains proprietary trading positions in broker accounts. The balances in these accounts and the related margin balances are reflected as due to/from brokers in the accompanying financial statements.

NOTE 2 – DUE TO STOCKHOLDER

As of December 31, 2019, the Company's stockholder has made short-term advances amounting to \$22,788. These advances are due on demand without interest.

NOTE 3 – FURNITURE, EQUIPMENT & IMPROVEMENTS

Furniture, equipment and improvements are stated at cost. Depreciation is provided for on the straight-line basis using estimated useful lives.

A summary of furniture, equipment and improvements is as follows:

Furniture, equipment & improvements	\$ 17,533
Less accumulated depreciation	<u>(8,086)</u>
Net	<u>\$ 9,447</u>

Dabbah Securities Corp.

NOTE 4 - MARKETABLE SECURITIES

The Company's investments in marketable securities are held primarily for short-term trading profits and are classified as trading securities and are reflected at fair value. At December 31, 2019 marketable securities consisted of common stocks (\$1,457,252), mutual funds (\$43,094) and exchange traded funds (\$32,724).

Accounting Standards Codification 820, Fair Value Measurements, defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified in accordance with professional standards, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 – Pricing inputs are unadjusted, quoted prices in active markets for identical assets or liabilities the Company has ability to access.

Level 2 – Pricing inputs are quoted prices for similar investments, or inputs that are observable for the asset or liability either directly or indirectly for substantially the full term through corroboration with observable market data.

Level 3 – Pricing inputs are unobservable for the asset or liability and rely on management's own assumptions. The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.

Management considers all investments to be valued using Level 1 inputs.

NOTE 5 – NET CAPITAL REQUIREMENTS

The Company is subject to the Securities and Exchange Commission Uniform Net Capital Rule (rule 15c3-1), which requires the maintenance of minimum net capital of \$100,000 and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1. At December 31, 2019, the Company had net capital of \$1,255,192 which was \$1,155,192 in excess of its required net capital. The Company's aggregate indebtedness to net capital ratio was .0607 to 1.

Dabbah Securities Corp.

NOTE 6 – REGULATION

The Company is registered as a broker-dealer with the SEC. The securities industry in the United States is subject to extensive regulation under both federal and state laws. The SEC is the federal agency responsible for the administration of the federal securities laws. Much of the regulation of broker-dealers has been delegated to self-regulatory organizations, such as the FINRA, which has been designated by the SEC as the Company's primary regulator. These self-regulatory organizations adopt rules, subject to approval by the SEC, that govern the industry and conduct periodic examinations of the Company's operations. The primary purpose of these requirements is to enhance the protection of customer assets. These laws and regulatory requirements subject the Company to standards of solvency with respect to capital requirements, financial reporting requirements, record keeping and business practices.

NOTE 7 – CUSTOMER PROTECTION RULE

The Company had no items reportable as customers' fully paid securities: (1) not in the Company's possession or control as of the audit date (for which instructions to reduce to possession or control had been issued as of the audit date) but for which the required action was not taken by the Company within the time frames specified under Rule 15c3-3 or (2) for which instructions to reduce to possession or control has not been issued as of the audit date, excluding items arising from "temporary lags which result from normal business operations" as permitted under Rule 15c3-3.

The Company is exempt from SEC rule 15c3-3 pursuant to the exemptive provisions under sub-paragraph (k)(2)(ii).

NOTE 8 – CREDIT AND OFF-BALANCE SHEET RISK

The Company receives its commission income from customer transactions on a monthly basis from its clearing brokers and, accordingly, is not exposed to credit risk. At certain times throughout the year the Company may maintain bank account balances in excess of federally insured limits. The Company's clearing broker will require the Company to fulfill the obligation of a customer account that goes into default. The Company monitors customer accounts intraday to mitigate such risk.

NOTE 9 – NEW ACCOUNTING STANDARDS

In February 2016, the Financial Accounting Standards Board ("FASB") issued ASU 2016-02, *Leases* (Topic 842) and issued subsequent amendments to the initial guidance in September 2017 within 2017-13 (now collectively, Topic 842). Topic 842 requires companies to generally recognize on the balance sheet operating and financing lease liabilities and corresponding right-of-use assets. Topic 842 is effective for the Company's fiscal year ending December 31, 2019. As of December 31, 2019, the Company does not have any leases meeting the criteria of the new accounting standards.
