## **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**DECEMBER 31, 2022**

### **1. ORGANIZATION AND DESCRIPTION OF BUSINESS**

Dabbah Securities Corp (the Company) is a Delaware corporation, is a broker-dealer registered with the Securities and Exchange Commission (the SEC) and a member of the Financial Industry Regulatory Authority (FINRA) and an introducing broker registered with the National Futures Association ("NFA").

The Company had no items reportable as customer's fully paid securities: (1) not in the Company's possession or control as the audit date (for which instructions to reduce to possession or control had been issued as of the audit date) but for which the required action was not taken by the Company within the time frames specified under Rule 15c3-3 or (2) for which instructions to reduce to possession or control has not been issued as of the audit date, excluding items arising from "temporary lags which result from normal business operations" as permitted under Rule 15c3-3.

The Company is exempt from SEC rule 15c3-3 pursuant to the exemptive provisions under sub-paragraph (k)(2)(ii).

### **2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

#### ***Basis of presentation***

The accompanying financial statements of the Company have been prepared on the accrual basis of accounting.

#### ***Revenue recognition***

In accordance with ASU No. 2014-09, "Revenue from Contracts with Customers" (ASC Topic 606) revenues from contracts with customers is recognized when, or as, the Company satisfies its performance obligations by transferring the promised services to the customers. A service is transferred to a customer when, or as, the customer obtains control of that service. A performance obligation may be satisfied at a point in time or over time. Revenue from a performance obligation satisfied at a point in time is recognized at the point in time that the Company determines the customer obtains control over the promised service. Revenue from a performance obligation satisfied over time is recognized by measuring the Company's progress in satisfying the performance obligation in a manner that depicts the transfer of the services to the customer. The amount of revenue recognized reflects the consideration the Company expects to receive in exchange for those promised services (i.e., the "transaction price"). In determining the transaction price, the Company considers multiple factors, including the effects of variable consideration, if any.

The Company's business consists substantially of commissions based on customer transactions and income from proprietary trading. Commission revenues and proprietary trading gains and losses are recorded on a trade date basis.

## **DABBAH SECURITIES CORP.**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**DECEMBER 31, 2022**

---

#### **2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** *(continued)*

##### ***Revenue recognition*** *(continued)*

The Company finds that with regard to commission income, the performance obligation is satisfied on the trade date because that is when the underlying financial instrument or purchaser is identified, the pricing is agreed upon and the risk and rewards of ownership have been transferred to/from the customer. The Company is a non-clearing broker and, accordingly, utilizes clearing brokers on a fully disclosed basis on applicable transactions.

##### ***Use of estimates***

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

##### ***Cash and cash equivalents***

Cash and cash equivalents include cash on hand, cash in banks, and short-term, highly liquid investments purchased with an original maturity of three months or less.

##### ***Marketable securities***

Marketable securities are reflected at the closing price on the day of valuation with resultant unrealized gains or losses reflected in net income for the year. The financial statements reflect realized gains and losses on dispositions of investment securities on a trade date basis. The cost of marketable securities sold is determined by the specific identification method.

##### ***Good faith deposit***

At December 31, 2022 the Company maintained good faith deposits totaling approximately \$35,244 with its current clearing/trading firms. The Company's active deposits are invested in U.S. Treasury Bills and are included in Due from broker on the accompanying financial statements.

##### ***Income taxes***

The Company has elected to be treated as a Subchapter S Corporation for federal and state purposes and, as a result, will generally not be subject to corporate income taxes. The Company's shareholder is taxed on the Company's income. However, New York City does not recognize S corporation status and, accordingly, local corporate income taxes will continue to be payable by the Company in addition to certain alternative and minimum taxes to various state agencies where applicable.

## **DABBAH SECURITIES CORP.**

### **NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**DECEMBER 31, 2022**

---

#### **2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES** *(continued)*

##### ***Due from broker***

The Company maintains proprietary trading positions in broker accounts. The balances in these accounts and the related margin balances are reflected as due from brokers in the accompanying financial statements.

##### ***Credit Losses***

Effective January 1, 2020, the Company adopted ASC Topic 326, "Financial Instruments – Credit Losses" (ASC 326). ASC 326 impacts the impairment model for certain financial assets by requiring a current expected credit loss (CECL) methodology to estimate expected credit losses over the entire life of the financial asset. Under the accounting update, the Company has the ability to determine that there are no expected credit losses in certain circumstances (e.g., based on the credit quality of the customer). As of December 31, 2022, there were no expected credit losses.

##### ***Leases***

The FASB issued (ASU) 2016-02, "Leases" (Topic 842) which includes a lease accounting model that recognizes two types of leases – finance leases and operating leases. The standard requires that a lessee recognize on the statement of financial condition a right of use asset and a corresponding lease liability relating to leases with terms of more than twelve months. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee will depend on its classification as a finance or operating lease.

#### **3. DUE FROM STOCKHOLDER**

As of December 31, 2022, the Company's stockholder has received short-term advances amounting to \$17,154. These advances are due on demand without interest.

#### **4. CREDIT AND OFF-BALANCE SHEET RISK**

The Company's cash deposits held outside of the Company's clearing firms are held by one financial institution and therefore, are subject to credit risk to the extent those balances exceeded the Federal Deposit Insurance Corporation ("FDIC") insurance limit of \$250,000. The Company has not experienced any losses in such accounts and does not believe it is exposed to any significant credit risk on cash.

Pursuant to a clearance agreement, the Company introduces all of its securities transactions to its clearing broker, on a fully disclosed basis. All of the customers' money balances and security positions are carried on the books of the clearing broker. The Company's clearing broker will require the Company to fulfill the obligation of a customer account that goes into default. The Company monitors customer accounts intraday to mitigate such risk.

As of December 31, 2022 marketable securities consisted of common stock of \$1,273,467, bonds of \$514,200 and options of \$126,285.

Accounting Standards Codification 820, Fair Value Measurements, defines fair value, established a framework for measuring fair value, and established a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified in accordance with professional standards, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

*Level 1* - Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.

*Level 2* - Valuations based on quoted prices for similar investments, or inputs that are observable either directly or indirectly for substantially the full term through corroboration with observable market data.

*Level 3* - Valuations based on inputs that are unobservable for the asset or liability and rely on management's own assumptions. The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.
