Total Investments (cost \$245,817,300)	102.0%	245,817,300
Liabilities, Less Cash and Receivables	(2.0%)	(4,888,156)
Net Assets	100.0%	240,929,144

- a This security is prerefunded; the date shown represents the prerefunded date. Bonds which are prerefunded are collateralized by U.S. Government securities which are held in escrow and are used to pay principal and interest on the municipal issue and to retire the bonds in full at the earliest refunding date.
- b Variable rate demand note - rate shown is the interest rate in effect at August 31, 2008. Maturity date represents the next demand date, not the ultimate maturity date.
- c Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At August 31, 2008, these securities amounted to \$48,048,000 or 19.9% of net assets.
- d Purchased on a delayed delivery basis.

At August 31, 2008, the cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes.

Securities valuation policies and other investment related disclosures are hereby incorporated by reference to the annual and semi-annual reports previously filed with the Securities and Exchange Commission on Form N-CSR.

Various inputs are used in determining the value of the fund's investments relating to Financial Accounting Standard No. 157 (FAS 157), Fair Value Measurements.

These inputs are summarized in the three broad levels listed below.

Level 1 - quoted prices in active markets for identical securities.

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 - significant unobservable inputs (including fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For example, money market securities are valued using amortized cost, in accordance with rules under the Investment Company Act of 1940. Generally, amortized cost approximates the current fair value of a security, but since the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2.

The following is a summary of the inputs used as of August 31, 2008 in valuing the fund's investments carried at fair value:

Valuation Inputs	Investments in Securities (\$)
Level 1 - Quoted Prices	0
Level 2 - Other Significant Observable Inputs	245,817,300
Level 3 - Significant Unobservable Inputs	0
Total	245,817,300
