ICON Receivables 1997-A L.L.C.

In March 1997 three affiliates of the Partnership, ICON Cash Flow Partners, L.P., Series D ("Series D"), L.P. Six and L.P. Seven, contributed and assigned equipment lease and finance receivables and residuals to ICON Receivables 1997-A L.L.C. ("1997-A"), a special purpose entity created for the purpose of originating leases, managing existing contributed assets and securitizing its portfolio. In September 1997 the Partnership, L.P. Six and L.P. Seven contributed and assigned additional equipment lease and finance receivables and residuals to 1997-A. The Partnership, Series D, L.P. Six and L.P. Seven received a 31.19%, 17.81%, 31.03% and 19.97% interest, respectively, in 1997-A based on the value of their related contributions. In September 1997, 1997-A securitized substantially all of its equipment leases and finance receivables and residuals. 1997-A became the beneficial owner of a trust. The Partnership's original investment was recorded at cost and is adjusted by its share of earnings, losses and distributions thereafter.

5. Disposition Period

The Partnership's reinvestment period ended on July 31, 1998. The disposition period began August 1, 1998, at which time the Partnership began the orderly termination of its operations and affairs. During the disposition period the Partnership has, and will continue to distribute substantially all distributable cash from operations and equipment sales to the partners. The Partnership has not, and will not invest in any additional finance or lease transactions during the disposition period. There was no gain or loss recognized when the underlying equipment residual value was financed under the note agreement.

Item 2. General Partner's Discussion and Analysis of Financial Condition and Results of Operations

The Partnership's portfolio consisted of a net investment in finance leases, financings, operating leases, and investments in unconsolidated joint ventures representing 37%, 19%, 44%, 0% of total investments at June 30, 2001, respectively, and 46%, 22%, 31% and 1% of total investments at June 30, 2000, respectively.

Results of Operations

Three Months Ended June 30, 2001 and 2000

Revenues for the three months ended June 30, 2001 were \$1,168,206 representing a decrease of \$561,377 from 2000. The decrease in revenues resulted primarily from a loss from investments in joint ventures of \$254,645 versus income from investment in joint ventures of \$34,966 in 2000 and decreases in finance income of \$205,604 and gain on sales of equipment of \$56,243. These decreases were partially offset by a \$24,001 increase in rental income. The decrease in income from investment in joint ventures resulted primarily from a provision for bad debts of \$1,700,000 recorded by 1997-A in the 2001 period. The decrease in finance income was primarily due to a decrease in the average size of the finance lease portfolio from 2000 to 2001, and due to a finance lease which was renewed in 2001 and which is now classified as an operating lease during its renewal term. The decrease in gain on sales of equipment resulted from a decrease in the amount of equipment sold where the proceeds received were in excess of the remaining carrying value. The increase in rental income was due to a finance lease which was renewed in 2001 and which is now classified as an operating lease. As a result, rentals received relating to this lease are now reported as rental income. Prior to this reclassification, such rentals were included as collection of finance lease receivables with the finance portion included in the finance income.

Expenses for the three months ended June 30, 2001 were \$1,331,739 representing a decrease of \$186,013 from 2000. The decline was due primarily to a decrease in interest expense of \$152,476, minority interest income of \$45,352 in 2001 versus minority interest expense of \$62,560 in 2000, management fees of \$67,385, general and administrative expenses of \$11,395 and administrative expense reimbursements of \$28,111. These decreases were partially offset by an increase in provision for bad debts of \$150,000 and an increase in depreciation of \$42,001. The decrease in interest expense resulted from a decrease in average debt outstanding from 2000 to 2001. Minority interest income resulted from an overall loss in the Partnership's two consolidated joint ventures in 2001 versus income recognized in the joint ventures in 2000. The decrease in management fees and administrative expense reimbursements resulted from a decrease in the average size of the finance lease portfolio. The increase in provision for bad debts was the result of determinations made of the level of reserves required during the 2001 and 2000 periods, respectively. These determinations were the result of the Partnership's ongoing analysis of delinquency trends, loss experience and an assessment of overall credit risk. The increase in depreciation was due to a higher average level of operating lease investments during the 2001 period.

Net (loss) income for the three months ended June 30, 2001 and 2000 was (\$163,353) and \$211,831, respectively. The net (loss) income per weighted average limited partnership unit was (\$.27) and \$.35 for 2001 and 2000, respectively.

Six Months Ended June 30, 2001 and 2000

Revenues for the six months ended June 30, 2001 were \$2,623,659 representing a decrease of \$934,707 from 2000. The decrease in revenues resulted principally from a decrease in finance income of \$434,221, a loss from investments in joint ventures of \$267,387 versus income from investment in joint ventures of \$65,958 in 2000 and a decrease in gain on sales of equipment of \$159,016. These decreases were partially offset by a \$24,001 increase in rental income. The decrease in finance income was primarily due to a decrease in the average size of the finance lease portfolio from 2000 to 2001 and due to a finance lease which was renewed in 2001 and is now classified as an operating lease during its renewal term. The loss from investment in joint venture resulted primarily from a provision for bad debts of \$1,825,000 recorded by 1997-A in 2001. The decrease in gain on sales of equipment resulted from a decrease in the amount of equipment sold where the proceeds received were in excess of the remaining carrying value. The increase in rental income was due to a finance lease which was renewed in 2001 and which is now classified as an operating lease. As a result, rentals received relating to this lease are now reported as rental income. Prior to the reclassification, such rentals were included as collections of finance lease receivables with the finance portion included in finance income.

Expenses for the six months ended June 30, 2001 were \$2,628,445 representing a decrease of \$354,254 from 2000. The decline was due principally to a decrease in interest expense of \$290,537, a decrease in management fees of \$107,033, minority interest income of \$75,055 in 2001 versus minority interest expense of \$120,401 in 2000, and a decrease in administrative expense reimbursements of \$62,851. These decreases were partially offset by an increase in provision for bad debts of \$275,000 and an increase in depreciation of \$42,001. The decrease in interest expense resulted from a decrease in average debt outstanding from 2000 to 2001. Minority interest income resulted from an overall loss in the Partnership's two consolidated joint ventures in 2001 versus income recognized in the joint ventures in 2000. The decrease in management fees and administrative expense reimbursements resulted from a decrease in the average size of the finance lease portfolio. The increase in provision for bad debts was the result of determinations made of the level of reserves required during the 2001 and 2000 periods, respectively. These determinations were the result of the Partnership's ongoing analysis of delinquency trends, loss experience and an assessment of overall credit risk. The increase in depreciation was due to a higher level of operating lease investments during the 2001 period.

Net (loss) income for the six months ended June 30, 2001 and 2000 was (\$4,786) and \$575,667, respectively. The net (loss) income per weighted average limited partnership unit was (\$.01) and \$.94 for 2001 and 2000, respectively.

Liquidity and Capital Resources

These funds were used to fund cash distributions and debt repayments.

(A Delaware Limited Partnership)

The Partnership's reinvestment period ended on July 31, 1998. The disposition period began August 1, 1998, at which time the Partnership began the orderly termination of its operations and affairs. During the disposition period the Partnership has, and will continue to distribute substantially all distributable cash from operations and equipment sales to the partners. The Partnership has not, and will not invest in any additional finance or lease transactions during the disposition period. As a result of the Partnership's entering into the disposition period, future monthly distributions could, and are expected to fluctuate depending on the amount of asset sale and re-lease proceeds received during that period.

As of June 30, 2001, except as noted above, there were no known trends or demands, commitments, events or uncertainties which are likely to have a material effect on liquidity. As cash is realized from operations and sales of equipment, the Partnership will distribute substantially all available cash, after retaining sufficient cash to meet its reserve requirements and recurring obligations.

Item 3. Qualitative and Quantitative Disclosures About Market Risk

The Partnership is exposed to certain market risks, including changes in interest rates. The Partnership believes its exposure to other market risks, including commodity risk and equity price risk, are insignificant to both its financial position and results of operations.

The Partnership manages its interest rate risk by obtaining fixed rate debt. The fixed rate debt service obligation streams are generally matched by fixed rate lease receivable streams generated by the Partnership's lease investments.
