Henry J. Herrmann, CFA

Dear Shareholder,

Despite moderate economic growth in the U.S., financial markets have been volatile, especially in the latter half of the fiscal year. What's causing the fluctuations?

The simple answer is financial markets dislike uncertainty. In recent months we've been faced with significant uncertainty around numerous issues, including:

- Central bank actions;
- politics in the U.S., specifically surrounding the presidential election;
- credit concerns in the energy sector;
- very slow growth in Europe and Japan;
- credit quality issues in important emerging economies, including China;
- the U.K.'s June vote on exiting the European Union;
- fluctuations in currencies.

Amid the uncertain backdrop, the U.S. economic expansion has remained relatively good. Our investment team believes the U.S. is the bright spot, supported primarily by the U.S. consumer, who is benefitting from lower energy prices and lower inflation in general. The improved labor market allows for better demand for cars, homes, furnishings and various consumer goods.

When interest rates in the U.S. will rise, and by how much, remains an area of focus for the financial markets. Markets reacted negatively when the Federal Reserve raised rates slightly in December and seemed to imply more increases were likely. Since then, the Fed seems to have moderated its tightening plans. It's clear the Fed has become attuned to very sluggish global growth. Future rate increases in the U.S. will be very slow to develop, with job growth and inflation being most important determinants of central bank policy. Overseas, the European Central Bank and Bank of Japan are actively engaged in aggressive easing. As yet, these steps are not leading to strengthening economic activity.

China, in the face of economic softening, has turned toward more aggressive stimulus. We believe moderate economic acceleration is likely in China in 2016, which should be beneficial to broader global growth.

While challenges remain, we do see potential catalysts for growth in several areas and industries and our team continues to seek investment opportunities around the globe.

Economic Snapshot

	03/31/2016	03/31/2015
S&P 500 Index	2,059.74	2,067.89
MSCI EAFE Index	1,652.04	1,849.34
10-Year Treasury Yield	1.78%	1.94%
U.S. unemployment rate	5.0%	5.5%
30-year fixed mortgage rate	3.71%	3.69%
Oil price per barrel	\$ 38.34	\$ 47.60

Sources: Bloomberg, U.S. Department of Labor, MBA, CME

All government statistics shown are subject to periodic revision. The S&P 500 Index is an unmanaged index that tracks the stocks of 500 primarily large-cap U.S. companies. MSCI EAFE Index is an unmanaged index comprised of securities that represent the securities markets in Europe, Australasia and the Far East. It is not possible to invest directly in any of these indexes. Mortgage rates are from BankRate and reflect the overnight national average rate on a conventional 30-year fixed loan. Oil prices reflect the market price of West Texas intermediate grade crude.

Respectfully,

A handwritten signature in dark ink, appearing to read "Henry J. Herrmann".

Henry J. Herrmann, CFA
President

The opinions expressed in this letter are those of the President of the Ivy Funds and are current only through the end of the period of the report, as stated on the cover. The President's views are subject to change at any time, based on market and other conditions, and no forecasts can be guaranteed.

ILLUSTRATION OF FUND EXPENSES

Ivy Funds

(UNAUDITED)

Expense Example

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, exchange fees and account fees; and (2) ongoing costs, including management fees, distribution and service fees, and other Fund expenses. The following table is intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the six-month period ended March 31, 2016.

Actual Expenses

The first section in the following table provides information about actual account values and actual expenses for each share class. You may use the information in this section, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number in the first section under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. There may be additional fees charged to holders of certain accounts that are not included in the expenses shown in the table. Fees apply to Individual Retirement Accounts (IRAs), IRA Rollovers, Roth IRAs, Conversion Roth IRAs, Simplified Employee Pension (SEP), Savings Incentive Match Plan for Employees (SIMPLE) IRAs, Tax-Sheltered Accounts (TSAs), Keogh Plans, Owner Only 401(k) (Exclusive K) Plans and Final Pay Plans. As of the close of the six months covered by the table, a customer is charged an annual fee of \$18 within each plan type. This fee is waived for IRA Rollovers and Conversion Roth IRAs if the customer owns another type of IRA. Coverdell Education Savings Account plans are charged an annual fee of \$10 per customer. With limited exceptions, for Class A and Class C shares, if your Fund account

balance is below \$650 on the Friday prior to the last full week of September of each year, the account will be assessed an account fee of \$20. You should consider the additional fees that were charged to your Fund account over the six-month period when you estimate the total ongoing expenses paid over the period and the impact of these fees on your ending account value as such additional expenses are not reflected in the information provided in the following table. Additional fees have the effect of reducing investment returns.

Hypothetical Example for Comparison Purposes

The second section in the following table provides information about hypothetical account values and hypothetical expenses for each share class based on the Fund's actual expense ratio and an assumed rate of return of five percent per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this five percent hypothetical example with the five percent hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), exchange fees or account fees. Therefore, the second section in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Expenses paid may be impacted by expense reduction arrangements. If those arrangements had not been in place, expenses paid would have been higher. See Note 7 to the Financial Statements for further information.

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 183 days in the six-month period ended March 31, 2016, and divided by 366.

**These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

***Class share is closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column of this section.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads or exchange fees.

Michael L. Avery

Below, Michael L. Avery, Cynthia P. Prince-Fox and Chace Brundige, CFA, portfolio managers of Ivy Asset Strategy Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Avery has managed the Fund for 19 years and has 37 years of industry experience. Mr. Avery will retire from the firm effective June 30, 2016. Ms. Prince-Fox and Mr. Brundige became portfolio managers on the Fund on August 4, 2014. Ms. Prince-Fox has 33 years of industry experience and Mr. Brundige has 22 years of industry experience.

For the 12 Months Ended March 31, 2016

Ivy Asset Strategy Fund (Class A shares at net asset value)	-14.39%
Ivy Asset Strategy Fund (Class A shares including sales charges)	-19.31%
Benchmark(s) and/or Lipper Category	
S&P 500 Index (generally reflects the performance of large- and medium-sized U.S. stocks)	1.78%
Barclays U.S. Aggregate Bond Index (generally reflects the performance of most U.S.-traded investment grade bonds)	1.96%
Barclays U.S. Treasury Bills: 1-3 Month Index (generally reflects the performance of investment-grade Treasury bills, representing cash)	0.09%
Lipper Alternative Global Macro Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-6.22%

Chace Brundige

Multiple indexes are shown because the Fund invests in multiple asset classes.

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

An environment of uncertainty, volatility

Fear seemed to be the operative word in 2015 and early in 2016 in global equity, fixed income, and currency markets, though the beginning and end points masked the volatility throughout the fiscal year. The U.S. Treasury 10-year yield began the year at 1.94%, peaking around 2.50% in June 2015 and hitting a trough around 1.63% in February 2016 before ending the fiscal year at 1.78%. Similarly, the S&P 500 Index began and ended the fiscal year at 2059, but had four +10% swings in between.

The U.S. dollar had been in a strengthening trend since the summer of 2014, but began to weaken during the final quarter of the fiscal year. The dollar strengthened broadly against developed market currencies such as the yen, Canadian dollar and the euro, but the currencies of emerging areas such as Russia, Brazil, Thailand, Argentina and Colombia suffered as well. The yen has rallied to start 2016, despite the Bank of Japan moving to a negative interest rate policy in January with the intent of weakening the yen. Similarly, though not as dramatic as the yen, the euro has moved off its lows of November 2015 and onto a slightly stronger trajectory in 2016, even as the European Central Bank continued to cut rates and expand its quantitative easing (QE) facility.

Commodities prices weakened through most of the year, but showed signs of stabilization in the second half of the fiscal year. West Texas Intermediate crude oil prices (the U.S. benchmark) have perhaps found a floor during the first part of 2016, closing below \$27 in February, but above \$40 at the end of March on reduced supply expectations and a weaker U.S. dollar. Though inflation expectations continue to look well-contained, the consumer price index has trended higher because of energy, and the core measure excluding food and energy is running above the target of 2% because of increases in core goods and housing-related indicators.

Fed funds futures had an interest rate hike priced in from the U.S. Federal Reserve (Fed) during the second half of calendar 2015, though the odds were lower after Greece's "No" vote in its July referendum on austerity and debt relief, and following the market correction after China's yuan devaluation. We had doubts the Fed would be able to begin the normalization process of moving off of the "zero-bound" after seven years, given the macroeconomic risks globally. However, in spite of increasingly volatile markets, the Fed raised its base rate by 0.25% at its December meeting. Several years into the economic cycle, we believe the Fed prefers to build capacity to cut rates in the future, when warranted.

It is impossible to fully know the amount of leverage amassed in the global financial system, though we know there has been massive buildup in debt on emerging market country balance sheets — corporates and sovereigns alike. We think this is not a great recipe and the magnitude of the global impact is one of the most important questions facing investors today. The multiple growth scares during the fiscal year typically gain potency in a highly levered, low-growth world.

As of the end of the fiscal year, the Fed had not acted to raise rates again and softened its rhetoric on what would prompt further hikes. This, combined with a renewed pro-cyclical shift from China, changed the markets' tone in February.

Global growth decelerated to roughly 3% in 2015 and we expect a further slowdown in 2016, with developed market gross domestic product (GDP) growth below 2% and emerging market economies coming in at 3.5-4.0%. The U.S. is likely to continue to lead developed economies, though estimates for the U.S. were revised lower after the final release of fourth-quarter 2015 GDP. Growth in Europe and Japan remains positive, but fails to show signs of real acceleration despite the central bank accommodation in place. The ongoing trends of slower growth and rising debt will continue to magnify the effects of slight changes in the markets' assumptions for global growth.

Cynthia P. Prince-Fox

Cautious approach to the year

The Fund reported a negative return for the fiscal year while its all-equities S&P 500 Index benchmark showed a positive return, although the benchmark's return was significantly less than it reported in the previous three years. The Fund's return also was below the negative return of its Lipper peer group average.

As the fiscal year began, we maintained a somewhat cautious outlook on the markets. This was broadly based on the belief that we remained in a challenging environment of global overcapacity and low demand as well as uncertainty on how markets would react to the potential for higher rates. We continued the process of increasing exposure to the U.S. since we believed it was the best relatively positioned region globally.

Areas of focus during the year included: better-positioned U.S. consumers with cleaner balance sheets, lower energy prices and an improving labor market; an improving housing market helped by increased confidence among Millennials; growing numbers of emerging market consumers and where their money would be spent; and technology that provided companies with improving efficiencies and productivity.

Early in the fiscal year, the Fund benefitted from areas within technology, healthcare and even energy as the equity market began to consolidate into an increasingly smaller number of names. As we moved through the summer of 2015, global growth fears began to crystalize and had a negative impact on the Fund, which had both direct and indirect exposure to emerging markets (albeit lower than one year prior). We began to position the Fund more defensively in response to some of these market gyrations and fears about the timing of the Fed's rate increase by increasing our weighting in cash and U.S. Treasuries.

Relative to the index, the names in the Fund that detracted from performance for the year were primarily in the consumer discretionary, information technology, and industrials sectors. As we repositioned the Fund to be more defensive, we also reduced some of our exposure to names in these sectors in which we had less confidence in their ability to withstand what we considered a shaky environment while tilting our energy weighting toward low-cost producers and service companies and away from the more defensive downstream segment, i.e. refiners. We maintained exposure to companies that we believe have stronger prospects for growth. We also increased our exposure to companies closely tied to the domestic economy, which had been oversold.

Several of the Fund's private investments were detractors from relative performance versus the benchmark index. In addition, debt and equity positions in one investment were sold in fourth-quarter 2015 and another position was sold in first-quarter 2016. The total value of the remaining private securities represented 10.5% of net assets in the Fund at March 31, 2016.

Our cash allocation averaged about 16% during the year, which reduced performance when equity markets rose.

Gold has been a long-term holding in the Fund and one that we view as a currency with a stable "printing press," especially relative to those fiat currencies we seek to hedge. We reduced our exposure by roughly half early in the fiscal year as we grew concerned about the effects of rising bond yields and the end of QE in the U.S. During the final quarter of the fiscal year, we increased our position again. To us, the large fluctuations within the market were evidence of global growth concerns and potential for an eventual increase in money printing.

Derivatives use early in the fiscal year was relatively low and used to opportunistically increase exposure to equities. During the second half of 2015, we opportunistically employed index hedging strategies. That protection was helpful during the large market selloff periods as additional protection in the event of a broader market selloff. During first-quarter 2016, we wound down most of our derivatives exposure. We believe defensive positioning through derivatives is currently expensive on a historical basis. Instead, our current defensive posture is expressed through our holdings in gold, U.S. Treasuries and cash, which we look to opportunistically reinvest in the market as pullbacks occur.

Central bank policy risk

Looking ahead, we think the unintended consequences associated with global central bank policies are a primary risk for the markets and we expect to see increased volatility as central bankers attempt to reconcile a number of uncertainties. Those headwinds include a relatively stronger U.S. economy, but concern regarding the timing of additional rate hikes; the fading effects of easier monetary policy combined with slow growth and mounting global leverage, geopolitical events, and China's growth prospects although that country's economic data have strengthened recently in response to fiscal policy changes to stimulate investment areas within infrastructure.

These headwinds mean growth will be challenged for industries and companies. As such, we remain focused on where in the world we think growth will occur. Many of our holdings from last year remain core holdings in 2016. Our highest conviction names fall into the secular growth category with strong balance sheets that offer optionality of share repurchases, dividends, or acquisitions, along with certain cyclical energy companies.

Emerging market consumers have had a prominent role within the portfolio since the financial crisis — particularly in China — and we continue to believe in their long-term growth as the rise in discretionary income is likely to continue to eclipse that of their developed market counterparts. However, we believe the growth rate for consumption will be slower and, from here, more dependent on structural reforms. In addition, multinationals are seeing increased competition from local companies as quality improves.

Absent a perceived policy mistake (monetary or fiscal) or global shock, the equity markets could experience another year of volatility and bond yields with little movement in one direction or another, particularly at the long end and in spite of the Fed's desire to normalize rates. As a result, equities continue to have the largest weighting within the Fund, albeit at lower levels than a year ago. As a portfolio distinguished by its flexibility to make larger, high-conviction allocations when warranted, we can't help but be wary of the stubbornly persistent headwinds facing the global economy and capital markets.

We recognize our relatively more defensive allocation in the face of rising equity markets may frustrate some shareholders. The increased number of market and economic risks suggest caution as a prudent guide, but a willingness to act at such time when those risks and rewards become more balanced. The Fund changes as the market environment in which we invest changes; it is the hallmark of our flexibility. What remains steadfast is the process we utilize to manage investor money.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

The Fund may allocate from 0 to 100% of its assets between stocks, bonds and short-term instruments of issuers around the globe and in investments with exposure to various foreign countries. The Fund may also invest in precious metals.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. The value of the Fund's investments, as measured in U.S. dollars, may be unfavorably affected by changes in foreign currency exchange rates and exchange control regulations.

Fixed-income securities are subject to interest-rate risk and, as such, the net asset value of the Fund may fall as interest rates rise. Investing in high-income securities may carry a greater risk of nonpayment of interest or principal than higher-rated bonds.

The Fund may focus its investments in certain regions or industries, thereby increasing its potential vulnerability to market volatility.

The Fund may seek to hedge market risk on various securities, manage and/or increase exposure to certain securities, companies, sectors, markets, foreign currencies and/or precious metals and seek to hedge certain event risks on positions held by the Fund via the use of derivative instruments. Such investments involve additional risks, as the fluctuations in the values of the derivatives may not correlate perfectly with the overall securities markets or with the underlying asset from which the derivative's value is derived.

Investing in commodities is generally considered speculative because of the significant potential for investment loss due to cyclical economic conditions, sudden political events, and adverse international monetary policies. Markets for commodities are likely to be volatile and the Fund may pay more to store and accurately value its commodity holdings than it does with the Fund's other holdings.

These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The indexes noted are unmanaged, include reinvested dividends and do not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Asset Strategy Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Asset Strategy Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-19.31%	-18.25%	-15.01%	-19.32%	-14.17%	-14.69%	-14.09%	-14.36%
5-year period ended 3-31-16	0.47%	0.74%	0.93%	0.44%	1.90%	1.29%	—	1.67%
10-year period ended 3-31-16	5.00%	4.94%	4.84%	—	—	—	—	5.62%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	4.23%	5.27%	1.85%	-9.63%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 7-31-08 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Forward Foreign Currency Contracts	\$ —	\$ 732	\$ —

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Common Stocks	Corporate Debt Securities
Beginning Balance 4-1-15	\$1,469,902	\$662,848
Net realized gain (loss)	(25,441)	—
Net change in unrealized appreciation (depreciation)	(733,237)	—*
Purchases	—	66,285
Sales	(359,287)	—
Amortization/Accretion of premium/discount	—	—
Transfers into Level 3 during the period	—	—
Transfers out of Level 3 during the period	—	—
Ending Balance 3-31-16	\$ 351,937	\$729,133
Net change in unrealized appreciation (depreciation) for all Level 3 investments still held as of 3-31-16	\$ (775,367)	\$ —*

During the year ended March 31, 2016, there were no transfers between Levels 1 and 2.

CONSOLIDATED SCHEDULE OF INVESTMENTS

Ivy Asset Strategy Fund *(in thousands)*

MARCH 31, 2016

Information about Level 3 fair value measurements:

	Fair Value at 3-31-16	Valuation Technique(s)	Unobservable Input(s)	Input Value(s)
Assets				
Common Stocks	\$351,937	Discounted cash flows model	Long-term growth rate	2.50%
			Weighted average cost of capital	9.22 to 40%
			Illiquidity discount	10%
Corporate Debt Securities	729,133	Discounted cash flows model	Long-term growth rate	2.50%
			Weighted average cost of capital	9.22%
			Illiquidity discount	10%

Significant increases in long-term growth rate inputs could result in a higher fair value measurement. However, significant increases in weighted average cost of capital or illiquidity discount inputs could result in a lower fair value measurement.

During the year ended March 31, 2016, securities totaling \$324,734 changed valuation techniques from discounted book value to discounted cash flows model. The change in valuation techniques is primarily due to the discounted book value method no longer reflecting current market conditions.

The following acronyms are used throughout this schedule:

ADR = American Depositary Receipts
 CMO = Collateralized Mortgage Obligation
 FNMA = Federal National Mortgage Association
 GTD = Guaranteed
 REMIC = Real Estate Mortgage Investment Conduit

Country Diversification		India	1.3%
(as a % of net assets)		Hong Kong	1.1%
United States	53.1%	Other Countries	3.3%
United Kingdom	8.3%	Other+	30.9%
Ireland	2.0%		

+ Includes gold bullion, cash and other assets (net of liabilities), and cash equivalents

See Accompanying Notes to Financial Statements.

Matthew A. Hekman

Below, Matthew A. Hekman, portfolio manager of the Ivy Balanced Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since 2014 and has 17 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Balanced Fund (Class A shares at net asset value)	-4.92%
Ivy Balanced Fund (Class A shares including sales charges)	-10.38%
Benchmark(s) and/or Lipper Category	
S&P 500 Index (generally reflects the performance of large- and medium-sized U.S. stocks)	1.78%
Barclays U.S. Government/Credit Index (generally reflects the performance of securities in the bond market)	1.75%
Lipper Mixed-Asset Target Allocation Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-3.09

Please note that Fund returns include applicable fees and expenses, whereas the index returns do not include any such fees. Multiple indexes are presented because the Fund invests in multiple assets classes. The performance discussion below is at net asset value.

Key drivers

The fiscal year ended March 31, 2016 exhibited an increasing amount of volatility, as investors grappled with a sluggish global growth environment; the beginning of an interest rate cycle embarked upon by the U.S. Federal Reserve (Fed), which created substantial fluctuations in global currency markets; ongoing geopolitical unrest in Eurasia and the Middle East; and persistent deflationary forces from the basic materials sector that were headlined by oil and base metals. As a result, longer-term interest rates, while volatile, declined over the course of the period and traditionally defensive sectors of the equity market outperformed.

Contributors and detractors

The Fund underperformed peers in the Lipper Mixed-Asset Target Allocation Growth Funds Universe, posting a loss of 4.92% over the 12 months ended March 31, 2016. Poor stock selection in the equity portion of the Fund and a long-standing short duration position in the fixed-income portion of the Fund contributed to the Fund's underperformance. The Fund's equity benchmark, the S&P 500 Index, was up 1.78% for the period. The Fund's fixed-income benchmark, the Barclays U.S. Government/Credit Index, was up 1.75% for the period.

The equity portion of the Fund declined approximately 3% over the past 12 months, trailing the benchmark return due predominately to stock selection. In particular, equity positions in technology, materials, energy and industrials drove poor relative performance. In addition, the Fund was underweight in the utilities and telecommunications sectors, which were the best performing sectors in the S&P 500 Index. The Fund's relative underweight in the energy, financials and health care sectors were positive contributors to relative performance. Strong stock selection in the consumer staples sector also had a positive impact on Fund performance. Given very modest global growth, markets are fragile and susceptible to significant moves (up and down), as witnessed in the fall of 2015 and again in January and February of 2016. As a result, the Fund has employed the use of options to protect against downside risk in the equity market, which had a negative 90 basis points impact on performance in the fiscal year ended March 31, 2016.

The fixed-income portion of the Fund declined approximately 1% over the past 12 months. This performance lagged the Barclays U.S. Government/Credit Index's return due to the Fund's relatively shorter duration and poor performance in fixed-income positions in the energy sector. For quite some time, the Fund has been short duration relative to its benchmark, given the low level of interest rates. The Fund has a substantially overweight position to credit instruments given the good health of corporate balance sheets and abundant liquidity available within the financial system, which helped to mitigate the Fund's underperformance resulting from its duration, but was unable to make up the entire shortfall.

Top contributors to Fund performance came from the technology, consumer staples and consumer discretionary sectors. Specifically, Amazon.com (no longer a fund holding), Broadcom Corp., Constellation Brands, Inc., McDonald's Corp., Home Depot Inc., Carnival Corp. and Time Warner Cable (no longer a Fund holding) were notable contributors. In addition, General Electric and Newfield Exploration posted strong performance during the period. In most cases, we believe that the outlook for these companies continues to be promising. At Broadcom, synergies from the Avago Technologies Limited merger, coupled with strong demand for Broadcom's products in wireless and cloud computing applications, continue to drive visible growth. At Constellation Brands, exceptional demand for its core beer portfolio and compelling gross margin expansion opportunities continue to be a tailwind for growth. At McDonald's, reinvigoration of the brand through all-day breakfast and refranchising appear to be driving near term strength as senior management works to optimize the company's footprint and operational structure. At Home Depot, ongoing improvement in the home repair and remodel market in the U.S., coupled with an emphasis on cost management, has produced strong results that we believe should prove sustainable. At Carnival, industry supply growth discipline has produced an environment conducive for return on invested capital improvement that we believe appears sustainable.

Detractors to Fund performance were Freeport-McMoRan, Energy Transfer Partners, Plains GP Holdings, Kohl's, Shire Pharmaceuticals, Union Pacific and Williams Sonoma. Freeport-McMoRan, Energy Transfer Partners and Plains GP Holdings shares fell as global commodity prices declined due to oversupply and weak demand. Kohl's struggled as traffic in the store has been difficult to maintain due to ongoing online share shift in retail and a lack of brand differentiation. Shire Pharmaceuticals was negatively impacted by growing concerns over drug pricing in the U.S. and investor concerns over capital deployment decisions made during the period. Union Pacific declined as rail volumes fell with a decline in energy production and manufacturing activity. Williams Sonoma underperformed due to poor execution in its logistics business and a growing threat from online peers in the home furnishing space. Freeport-McMoRan, Energy Transfer Partners, Plains GP Holdings and Kohl's are no longer Fund holdings.

Outlook

With multiple economic and political crosswinds buffeting global asset markets, it seems to us that volatility is likely to remain at an elevated level. The Fund's strategy was adjusted over the past fiscal year in reaction to the growing risks to economic growth and potential economic disruption resulting from the dramatic decline in oil and base metal prices. The targeted equity allocation was reduced from 70% to 55% over that time period with the remainder allocated to fixed income and cash.

Over the long-term, asset markets generally tend to follow corporate earnings and cash flows; unfortunately, the trends and outlook with respect to corporate earnings and cash flows have been disappointing. In fact, the S&P 500 Index revenues have been declining on a year-over-year basis for the past four quarters and earnings have declined for the third and fourth quarters of 2015. (First quarter 2016 is expected to continue this downward trend, with consensus expectations persistently declining through the quarter.) This backdrop helps explain the inability of risk markets to advance past their cycle-to-date peaks reached in the summer of 2015. Additionally, this anemic growth environment, coupled with recessionary economic conditions in several emerging market countries, has motivated central bankers around the globe to pursue unprecedented levels of monetary stimulus including various forms of quantitative easing and negative interest rates. To date, these measures have failed to ignite economic growth.

While we continue to monitor macroeconomic forces and trends, we maintain an emphasis on finding high quality, growing companies whose securities are trading at a reasonable valuation with visible catalysts to drive relative outperformance over the next 12 months. This approach has served investors well over time, and our confidence in it has not waned.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The indexes noted are unmanaged, include reinvested dividends and do not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Balanced Fund's performance.

⁺Cash equivalents are defined as highly liquid securities with maturities of less than three months. Cash equivalents may include U.S. Government Treasury bills, bank certificates of deposit, bankers' acceptances, corporate commercial paper and other money market instruments.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Balanced Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E ⁽⁵⁾	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-10.38%	-9.20%	-5.62%	-10.28%	-4.70%	-5.29%	-4.57%	-4.95%
5-year period ended 3-31-16	5.74%	6.04%	6.26%	5.98%	7.29%	—	—	7.01%
10-year period ended 3-31-16	6.08%	5.99%	5.99%	—	—	—	—	6.78%
Since Inception of Class through 3-31-16 ⁽⁶⁾	—	—	—	6.15%	6.94%	7.65%	1.83%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) Class E shares are not currently available for investment.

(6) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

(A)No dividends were paid during the preceding 12 months.

(B)All or a portion of securities with an aggregate value of \$54,941 are held in collateralized accounts to cover potential obligations with respect to outstanding written options.

(C)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2016 the total value of these securities amounted to \$244,422 or 8.7% of net assets.

(D)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.

(E)Rate shown is the yield to maturity at March 31, 2016.

(F)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following written options were outstanding at March 31, 2016 (contracts and exercise prices unrounded):

Underlying Security	Counterparty, if OTC	Type	Number of Contracts	Expiration Month	Exercise Price	Premium Received	Value

Liabilities			
Written Options	\$ 1,065	\$ 846	\$ —

During the year ended March 31, 2016, there were no transfers between any levels.

The following acronyms are used throughout this schedule:

ADR = American Depositary Receipts

GTD = Guaranteed

OTC = Over the Counter

REIT = Real Estate Investment Trust

See Accompanying Notes to Financial Statements.

David P. Ginther

Below, David P. Ginther, CPA, portfolio manager of Ivy Energy Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Ginther has managed the Fund since its inception in 2006 and has 21 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Energy Fund (Class A shares at net asset value)	-23.38%
Ivy Energy Fund (Class A shares including sales charges)	-27.80%

Benchmark(s) and/or Lipper Category

S&P 1500 Energy Sector Index (generally reflects the performance of stocks that represent the energy market)	-16.81%
--	---------

Lipper Natural Resources Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-23.16%
--	---------

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is based on net asset value.

Oil prices fall late in year

U.S. equities closed the fiscal year in mildly positive territory, although the energy sector finished lower, as measured by its benchmark index. The slow, steady growth of the U.S. economy, ongoing strength of the U.S. dollar and the slowing economic growth rate in China helped hold global oil prices in a range of about \$35 to \$60 per barrel, with volatile trading at times during the year.

The U.S. Federal Reserve (Fed) early in the fiscal year removed “patient” in reference to interest rate increases. The Fed also indicated that it believed lower energy prices would be transitory and inflation would meet its 2% target by 2017. However, the Fed lowered its forecast for gross domestic product at that time and again in June 2015. Equity and bond markets rallied on the news and took it to mean higher short-term rates were unlikely until the second half of 2015. The Fed did act to increase short-term rates in December and stated its intent to do more increases in 2016 if economic data allowed. However, the Fed did not raise rates again by the end of the fiscal year.

China is one of the two largest importers of crude oil, exceeding 7 million barrels per day. Concerns about the pace of economic growth in China and overall in emerging markets, along with continued but slowing supply growth, increases in global inventories and the likely addition of more Iranian crude oil coming to market were factors in persistently lower prices. China devalued its currency in August 2015, setting off another round of concerns about both global growth rates and China’s economy. China’s currency later was granted Special Drawing Rights status by the International Monetary Fund. China changed from a U.S. dollar base for its currency to a “basket” of currencies, which many investors think will help its competitiveness against the dollar.

Fund feels effects of price drop

The Fund had a negative return for the fiscal year and underperformed its benchmark index and peer group average, both of which also had negative returns. The ongoing low levels of oil prices throughout the fiscal year continued to pressure the prices of energy stocks, which represent the largest sector in the Fund.

The Fund’s performance relative to the benchmark index primarily was because of stock selections in the energy sector. The Fund during the fiscal year had a heavier allocation to the “upstream” energy companies when compared to the benchmark, which holds what the portfolio manager considers to be an outsized allocation to large integrated oil companies. The Fund underweighted the integrated oil companies this year. Historically, integrated companies often underperform when the energy sector performs well as a whole, but they tend to do relatively better when the sector is in decline, as it was throughout 2015 and into 2016.

The five greatest relative contributors to the Fund’s performance in the year were Parsley Energy Inc., ConocoPhillips, RSP Permian Inc., CME Group Inc. and Williams Companies Inc. The five greatest relative detractors were Exxon Mobil Corp., Chevron Corp., Energy Transfer Equity LP, MPLX LP and C&J Energy Services Inc. As of March 31, 2016, ConocoPhillips, Williams Companies Inc., Energy Transfer Equity LP and C&J Energy Services Inc. no longer were holdings in the Fund.

A focus on supply and demand

We think steady economic growth and low inflation will continue in the U.S. in the coming year, maintaining the country’s position as a bright spot among developed countries. In our view, global economic growth also is likely to remain slow overall.

U.S. shale oil producers have significantly cut marginal costs. While we believe all U.S. shale offers opportunities, much of our focus is on the Permian Basin as the place production growth is most likely to continue. Companies there still are improving efficiency and productivity, and are reducing costs faster than in other, more mature shale areas.

We estimate the world is oversupplied by about 1.5% on total consumption of 95 million barrels per day (bpd). However, we think the year-over-year increase in global supply will start to diminish, as output has slowed from producing countries outside the Organization of Petroleum Exporting Countries, led by U.S. shale producers. In December 2015, oil output in the continental U.S. fell on a year-over-year basis — a first since the onset of the shale renaissance.

We think current supply/demand factors and “headline” risks — the response from investors to news stories and world events — will hold down oil prices in the short term. We estimate oil demand will grow by about 1.0 million bpd on average each year for the next three to five years. Depending on the demand environment, we think the supply/demand imbalance will be corrected in the third-quarter of 2016.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. The value of the Fund’s shares will change and you could lose money on your investment.

Investing in companies involved in one specified sector may be more risky and volatile than an investment with greater sector diversification. Investing in the energy sector can be riskier than other types of investment activities because of a range of factors, including price fluctuation caused by real and perceived inflationary trends and political developments, and the cost assumed by energy companies in complying with environmental safety regulations. These and other risks are more fully described in the Fund’s prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager’s views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of Ivy Energy Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Energy Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E ⁽⁵⁾	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-27.80%	-27.12%	-23.87%	-27.55%	-23.06%	-23.53%	-22.96%	-23.26%
5-year period ended 3-31-16	-7.68%	-7.56%	-7.17%	-7.41%	-6.21%	—	—	-6.45%
10-year period ended 3-31-16	—	—	—	—	—	—	—	—
Since Inception of Class through 3-31-16 ⁽⁶⁾	0.15%	0.07%	0.08%	-0.09%	0.68%	-4.09%	-25.10%	0.89%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) Class E shares are not currently available for investment.

(6) 4-3-06 for Class A shares, 4-3-06 for Class B shares, 4-3-06 for Class C shares, 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares, 7-31-14 for Class R6 shares and 4-3-06 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

David P. Ginther

Below, David P. Ginther, CPA, portfolio manager of Ivy Global Natural Resources Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Ginther has managed the Fund since 2013. He has 21 years of industry experience.

Fiscal Year performance

For the 12 Months Ended March 31, 2016

Ivy Global Natural Resources Fund (Class A shares at net asset value)	-22.32%
Ivy Global Natural Resources Fund (Class A shares including sales charges)	-26.77%

Benchmark(s)/Lipper Category

MSCI AC World IMI 55% Energy + 45% Materials Index (generally reflects the performance of the energy and materials stocks in developed and emerging markets.)	-13.90%
---	---------

Lipper Global Natural Resources Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-19.22%
---	---------

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Oil prices still pressured

U.S. equities closed the fiscal year ended March 31, 2016 in mildly positive territory, although the energy sector finished lower, as measured by the Fund's benchmark index. The slow, steady growth of the U.S. economy, ongoing strength of the U.S. dollar and the slowing economic growth rate in China helped hold global oil prices in a range of about \$35 to \$60 per barrel, with volatile trading at times during the year.

The U.S. Federal Reserve (Fed) early in the fiscal year removed "patient" in reference to interest rate increases. The Fed also indicated that it believed lower energy prices would be transitory and inflation would meet its 2% target by 2017. However, the Fed lowered its forecast for gross domestic product at that time and again in June 2015. Equity and bond markets rallied on the news and took it to mean higher short-term rates were unlikely until the second half of 2015. The Fed did increase short-term rates in December and stated its intent to do more increases in 2016 if economic data allowed. However, the Fed did not raise rates again during the remainder of the fiscal year.

China is one of the two largest importers of crude oil, exceeding 7 million barrels per day. Concerns about the pace of economic growth in China and overall in emerging markets, along with continued but slowing supply growth, increases in global inventories and the likely addition of more Iranian crude oil coming to market were factors in persistently lower prices. China devalued its currency in August 2015, setting off another round of concerns about both global growth rates and China's economy. China's currency later was granted Special Drawing Rights status by the International Monetary Fund. China changed from a U.S. dollar base for its currency to a "basket" of currencies, which many investors think will help its competitiveness against the dollar.

Difficult year in natural resources

The Fund finished another difficult year for natural resources with a negative return and underperformed its benchmark index and peer group average on a relative basis.

The underperformance relative to the benchmark index primarily was because of the Fund's overweight allocation to the energy sector throughout the year compared to the benchmark. For example, while the benchmark index's average weighting in energy for the fiscal year was 54.85%, the Fund's was 63.53%, based on equity assets. The energy sector had broad declines during the fiscal year, based on concerns about global supply and demand; growth in the global production of oil, including from the U.S.; concerns about slowing economic growth in emerging market countries; and geopolitical tensions affecting oil-producing regions worldwide. As a result of the price plunge, the Fund's overweight allocation to the energy sector hurt performance relative to the blended benchmark index.

The Fund typically hedges foreign currency exposure using forward foreign currency contracts. These derivatives positions were slightly positive contributors to performance as the U.S. dollar strengthened.

The oil industry remains a major focus for the Fund, especially through companies involved in equipment & services, exploration & production and transportation industries. The increase in shale oil production from key basins in North America also remains an important focus for energy holdings, particularly production from the Permian Basin, a region that we believe holds a better potential for production cost reductions than other shale regions.

A focus on oil supply/demand

We think steady economic growth and low inflation will continue in the U.S. in the coming year, maintaining the country's position as a bright spot among developed countries. In our view, global economic growth also is likely to remain slow overall.

We think commodities remain in a low-demand environment because of the slow pace of the global economy. Commodities prices persisted at weaker levels during the fiscal year and we think that situation will continue until global economic growth gains momentum. We think major commodities companies will continue to focus on managing costs and capital expenditures as a result. The prospects for growth have improved in several emerging countries, but not to a level that we think is sufficient to greatly increase demand.

U.S. shale oil producers have significantly cut marginal costs. While we believe all U.S. shale offers opportunities, much of our focus is on the Permian Basin as the place in which production growth is most likely to continue. Companies there still are improving efficiency and productivity, and are reducing costs faster than in other, more mature shale areas.

We estimate the world is oversupplied by 1.5-2.0% on total consumption of 95 million barrels per day (bpd). However, we still think the year-over-year increase in global supply will start to diminish. Output has slowed from producing countries outside the Organization of Petroleum Exporting Countries, led by U.S. shale producers. In December 2015, oil output in the continental U.S. fell on a year-over-year basis — a first since the onset of the shale renaissance.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Investing in companies involved in one specified sector may be more risky and volatile than an investment with greater diversification. Investing in natural resources can be riskier than other types of investment activities because of a range of factors, including price fluctuation caused by real and perceived inflationary trends and political developments; and the cost assumed by natural resource companies in complying with environmental and safety regulations. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. Commodity trading, including trading in precious metals, is generally considered speculative because of the significant potential for investment loss. Markets for commodities are likely to be volatile and there may be sharp price fluctuations even during periods when prices overall are rising. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of Ivy Global Natural Resources Fund's performance.

(3) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(4) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(5) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(6) 4-2-07 for Class E shares, 4-2-07 for Class I shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

SCHEDULE OF INVESTMENTS

Ivy Global Natural Resources Fund *(in thousands)*

MARCH 31, 2016

Notes to Schedule of Investments

(A) No dividends were paid during the preceding 12 months.

(B) Restricted security. At March 31, 2016, the Fund owned the following restricted security:

Security	Acquisition Date(s)	Shares	Cost	Market Value
Konarka Technologies, Inc., 8.000%, Convertible	8-31-07	3,500	\$10,850	\$—

The total value of this security represented 0.0% of net assets at March 31, 2016.

(C) Rate shown is the yield to maturity at March 31, 2016.

(D) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following forward foreign currency contracts were outstanding at March 31, 2016:

	Currency to be Delivered		Currency to be Received	Settlement Date	Counterparty	Unrealized Appreciation	Unrealized Depreciation
British Pound	28,819	U.S. Dollar	41,715	4-26-16	UBS AG	\$320	\$—
Canadian Dollar	31,366	U.S. Dollar	24,121	4-26-16	UBS AG	—	31
Euro	5,473	U.S. Dollar	6,198	4-26-16	UBS AG	—	34
						\$320	\$65

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$675,254	\$—	\$—
Investment Funds	18,975	—	—
Preferred Stocks	—	—	—

Total	\$694,229	\$15,721	\$—
Forward Foreign Currency Contracts	\$—	\$320	\$—
Liabilities			
Forward Foreign Currency Contracts	\$—	\$65	\$—

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronym is used throughout this schedule:

ADR = American Depositary Receipts

Market Sector Diversification	Industrials	4.9%
(as a % of net assets)	Financials	3.8%
Energy	Utilities	0.0%
Materials	Other+	2.2%

+ Includes cash and other assets (net of liabilities), and cash equivalents

See Accompanying Notes to Financial Statements.

Keith R. Pauley

The Ivy Global Real Estate Fund was renamed Ivy LaSalle Global Real Estate Fund on Feb. 1, 2016. The Fund is subadvised by LaSalle Investment Management Securities, LLC. Below, portfolio managers Keith R. Pauley, CFA; Stanley J. Kraska, Jr.; George J. Noon, CFA; and Matthew Sgrizzi, CFA, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Pauley and Mr. Kraska have managed the Fund since inception and each has 30 years of industry experience. Mr. Noon has managed the Fund since inception and has 28 years of industry experience. Mr. Sgrizzi became a portfolio manager on the Fund on May 15, 2015. He replaced Ernst-Jan de Leeuw. He has 14 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy LaSalle Global Real Estate Fund (Class A shares at net asset value)	-2.00%
Ivy LaSalle Global Real Estate Fund (Class A shares including sales charges)	-7.64%
Benchmark(s) and/or Lipper Category	
FTSE EPRA/NAREIT Developed Index (generally reflects the performance of real estate stocks in developed countries)	1.27%
Lipper Global Real Estate Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-0.48%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Dominated by macro concerns

The past year was dominated by concerns about decelerating global economic growth — with a particular focus on the slowing Chinese economy — along with the impact of potential increases in interest rates and falling oil prices. These concerns culminated in the second half of 2015 and into the start of 2016 as market volatility increased, global economic growth and inflation expectations significantly compressed and credit spreads widened. In an attempt to combat the weakening global economic growth outlook and lower inflation expectations, several central banks around the world implemented additional stimulus measures, while others maintained a dovish tone. Markets were able to rally in the final month of the fiscal year with improving macro-economic data and supportive central bank policies.

Public real estate securities (as measured by the FTSE EPRA/NAREIT Developed Index) posted modestly positive gains, outperforming the broader equity markets (as measured by the MSCI World Index) which traded lower during the fiscal year period. The performance of both indices was hindered by this period of higher market volatility and decreasing growth expectations. After a rather active capital market environment in the prior fiscal year, equity issuance by the public real estate companies was much more subdued this year while debt issuance remained high.

Results reflect a few key weightings

The Fund finished the fiscal year with a negative return, as did its peer group average. The Fund's benchmark index had a small positive return for the year.

The Fund's underperformance relative to its benchmark index for the fiscal year was driven by negative stock selection. These results can be attributed to an overweight position relative to the benchmark to the development companies in Hong Kong and Japan. Despite office and residential market fundamentals holding their own or even improving, the developers underperformed. A slowing global economic growth outlook and a heightened level of risk aversion weighed on market sentiment. These development companies were disproportionately impacted in this type of environment with their higher relative correlation with the broader equity market.

Country allocations contributed to performance results, but not enough to outweigh the negative stock selection impact. Allocation results were helped by an overweight that transition to an underweight position to the U.K., an underweight position to Singapore and an overweight position to Australia.

The Fund's portfolio includes companies we believe offer attractive stock prices relative to our estimates of their intrinsic and net asset values, and is well diversified by country, currency, and property type. The Fund's risk profile remains broadly similar to the global property company investment universe. However, the Fund's investments are tilted towards companies with what we believe are better quality assets, management teams capable of adding shareholder value and somewhat less leverage.

Growth concerns remain

The global economic outlook has brightened recently with improvements in macro-economic data, the easing of credit markets and accommodative central banks. Nevertheless, growth concerns remain. Recent forecasts put global economic growth at 2.3% in 2016, with an increase in growth expectations for the U.S. We continue to expect slow-to-moderate economic growth over the next several years. Inflation has remained well below target in most economies, but inflation expectations have begun to tick upwards since mid-February. Interest rates have remained low through the first quarter of 2016.

Stanley J. Kraska, Jr

George J. Noon

Matthew Sgrizzi

Real estate fundamentals remain generally positive. Occupancies and rents remain firm or are improving in most markets. We believe most public companies remain well positioned for the current environment from both an operational and capital market access perspective. These companies generally own higher quality assets and are modestly levered, providing them with significant financial flexibility. We think the current positive fundamental outlook is likely to mean global property stocks can produce earnings growth in the mid to high single digits on average in 2016. We believe global real estate companies are trading at their net asset values on average and below the premiums at which they have historically traded.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investment risks associated with investing in real estate securities, in addition to other risks, include rental income fluctuation, depreciation, property tax value changes and differences in real estate market values.

Because the Fund invests more than 25% of its total assets in the real estate industry, it may be more susceptible to a single economic, regulatory, or technical occurrence than a fund that does not concentrate its investments in this industry.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets.

The Fund is non-diversified, meaning that it may invest a significant portion of its total assets in a limited number of issuers, and a decline in value of those investments would cause the Fund's overall value to decline greater than that of a more diversified portfolio. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy LaSalle Global Real Estate Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy LaSalle Global Real Estate Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I	Class R	Class Y
1-year period ended 3-31-16	-7.64%	-6.84%	-3.21%	-2.11%	-2.68%	-2.08%
5-year period ended 3-31-16	—	—	—	—	—	—
10-year period ended 3-31-16	—	—	—	—	—	—
Since Inception of Class through 3-31-16 ⁽⁵⁾	2.43%	2.37%	3.26%	4.33%	3.72%	4.67%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-1-13 for Class A shares, 4-1-13 for Class B shares, 4-1-13 for Class C shares, 4-1-13 for Class I shares, 4-1-13 for Class R shares and 4-1-13 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Keith R. Pauley

The Ivy Global Risk-Managed Real Estate Fund was renamed Ivy LaSalle Global Risk-Managed Real Estate Fund on Feb. 1, 2016. The Fund is subadvised by LaSalle Investment Management Securities, LLC. Below, portfolio managers Keith R. Pauley, CFA; Stanley J. Kraska, Jr.; George J. Noon, CFA; and Matthew Sgrizzi, CFA, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Pauley and Mr. Kraska have managed the Fund since inception and each has 30 years of industry experience. Mr. Noon has managed the Fund since inception and has 28 years of industry experience. Mr. Sgrizzi became a portfolio manager on the Fund on May 15, 2015. He replaced Ernst-Jan de Leeuw. He has 14 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy LaSalle Global Risk-Managed Real Estate Fund (Class A shares at net asset value)	5.27%
Ivy LaSalle Global Risk-Managed Real Estate Fund (Class A shares including sales charges)	-0.74%

Benchmark(s) and/or Lipper Category

FTSE EPRA/NAREIT Developed Index (generally reflects the performance of real estate stocks in developed countries)	1.27%
---	-------

Lipper Global Real Estate Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-0.48%
--	--------

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Dominated by macro concerns

The past year was dominated by concerns about decelerating global economic growth — with a particular focus on the slowing Chinese economy — along with the impact of potential increases in interest rates and falling oil prices. These concerns culminated in the second half of 2015 and into the start of 2016 as market volatility increased, global economic growth and inflation expectations significantly compressed and credit spreads widened. In an attempt to combat the weakening global economic growth outlook and lower inflation expectations, several central banks around the world implemented additional stimulus measures, while others maintained a dovish tone. Markets were able to rally in the final month of the fiscal year with improving macro-economic data and supportive central bank policies.

Public real estate securities (as measured by the FTSE EPRA/NAREIT Developed Index) posted modestly positive gains, outperforming the broader equity markets (as measured by the MSCI World Index) which traded lower during the fiscal year period. The performance of both indices was hindered by this period of higher market volatility and decreasing growth expectations. After a rather active capital market environment in the prior fiscal year, equity issuance by the public real estate companies was much more subdued this year while debt issuance remained high.

Performance

The Fund finished the fiscal year with a positive return, above the positive return of its benchmark index and the negative return of its peer group average.

Stock selection was contributed to performance in all major geographic regions, with particular strength in Japan and the U.S. A large portion of the outperformance relative to the benchmark index can be attributed to the risk-managed strategy of the Fund, which helped avoid Asian development companies and U. S. hotel companies, both of which significantly underperformed during the period. Asian development companies faced a slowing global economic growth outlook coupled with a heightened level of risk aversion, both of which weighed on market sentiment. These development companies were disproportionately impacted in this type of environment with their higher relative correlation with the broader equity market. U.S. hotel companies also underperformed as the sector's fundamentals weakened in 2015 and remained weak at the start of 2016. Hotels also faced headwinds from a strong U.S. dollar, limited international tourism, a growing supply pipeline, and disruptive threats from online sites to select and book accommodations as well as guest experience review sites.

In addition, positive stock selection results in Japan were helped by the strong performance of the country's property investment companies, which have benefitted from the Bank of Japan's negative interest rate policy and a renewed demand for yield. The Fund's outperformance in the U.S. also can be partly attributed to a tilt towards blue-chip securities and an overweight allocation to the outperforming apartment, regional mall and self-storage sectors.

Country allocations also contributed to performance in the period, with positive results from an overweight position that transition to an underweight to the U.K., an underweight position to Singapore and an overweight position to Australia.

The Fund's portfolio includes companies we believe offer favorable stock prices relative to estimates of their intrinsic and net asset values, and is well diversified by country, currency, and property type. The Fund's portfolio is tilted towards companies with what we believe are better quality assets, management teams capable of adding shareholder value and significantly lower leverage. Although they have less risk on average, we believe the companies in the Fund are likely to produce solid earnings growth.

Stanley J. Kraska, Jr.

George J. Noon

Matthew Sgrizzi

Growth concerns remain

The global economic outlook has brightened recently with improvements in macro-economic data, the easing of credit markets and accommodative central banks. Nevertheless, growth concerns remain. Recent forecasts put global economic growth at 2.3% in 2016, with an increase in growth expectations for the U.S. We continue to expect slow-to-moderate economic growth over the next several years. Inflation has remained well below target in most economies, but inflation expectations have begun to tick upwards since mid-February. Interest rates have remained low through the first quarter of 2016.

Real estate fundamentals remain generally positive. Occupancies and rents remain firm or are improving in most markets. We believe most public companies remain well positioned for the current environment from both an operational and capital market access perspective. These companies generally own higher quality assets and are modestly levered, providing them with significant financial flexibility. We think the current positive fundamental outlook is likely to mean global property stocks can produce earnings growth in the mid to high single digits on average in 2016. We believe global real estate companies are trading at their net asset values on average and below the premiums at which they have historically traded.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investment risks associated with investing in real estate securities, in addition to other risks, include rental income fluctuation, depreciation, property tax value changes and differences in real estate market values.

Because the Fund invests more than 25% of its total assets in the real estate industry, it may be more susceptible to a single economic, regulatory, or technical occurrence than a fund that does not concentrate its investments in this industry.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets.

The Fund is non-diversified, meaning that it may invest a significant portion of its total assets in a limited number of issuers, and a decline in value of those investments would cause the Fund's overall value to decline greater than that of a more diversified portfolio. These and other risks are more fully described in the Fund's prospectus.

There is no guarantee that the Ivy LaSalle Global Risk-Managed Real Estate Fund will not decline in value in comparison with funds that do not use a risk-managed approach.

The opinions expressed in this report are those of the Fund's portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy LaSalle Global Risk-Managed Real Estate Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy LaSalle Global Risk-Managed Real Estate Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I	Class R	Class Y
1-year period ended 3-31-16	-0.74%	0.36%	4.34%	5.37%	4.78%	5.25%
5-year period ended 3-31-16	—	—	—	—	—	—
10-year period ended 3-31-16	—	—	—	—	—	—
Since Inception of Class through 3-31-16 ⁽⁵⁾	4.68%	4.91%	5.81%	6.78%	6.16%	6.80%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-1-13 for Class A shares, 4-1-13 for Class B shares, 4-1-13 for Class C shares, 4-1-13 for Class I shares, 4-1-13 for Class R shares and 4-1-13 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

---	-------

Lipper Real Estate Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	2.52%
---	-------

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below reflects net asset value (NAV).

Lowell R. Bolken

Volatility amid uncertain backdrop

While real estate stocks delivered positive returns during the fiscal year and performed in-line with the broader U.S. stock market, the path to those returns was anything but smooth. The sector spent all but the last few weeks of the year in negative territory before rallying sharply in March to finish with a gain. Like the broader equity markets, real estate investment trust (REIT) share prices were tossed between “risk on” and “risk off” investor sentiment. Fears of rising interest rates and their impact on all asset valuations; slow, weak growth in global gross domestic product (GDP); a precipitous drop in oil prices; dramatic geopolitical events including rising terrorism; unfounded fear of a mini-credit crisis; and widespread uncertainty around the policy actions of the U.S. Federal Reserve (Fed) were headwinds for the equity markets and REITs.

U.S. commercial real estate conditions improved steadily throughout the year. Occupancies and rental rates across all major property types improved and reached record levels in apartments and self-storage facilities. There continued to be limited new construction activity and, in instances in which construction appeared to be heating up, demand was robust enough to absorb the new supply. The fundamental backdrop for the sector remained stable, potentially allowing for a longer-than-average recovery cycle. How the property sector performs going forward will be largely determined by macroeconomic and capital market fundamentals.

Performance constrained by office companies

The Fund delivered a positive return for the fiscal year that was above its peer group average but below its benchmark index.

Favorable stock selection within owners of self-storage, health care facilities and regional malls contributed to the Fund’s relative performance. However, the contribution to return from these sectors was overshadowed by negative performance in the office sector. The Fund was overweight relative to its benchmark index in coastal-focused, urban office owners and these stocks lagged the benchmark index. Growing fears of a tech-driven slowdown in San Francisco leasing activity and expectations for weaker New York City leasing caused owners in those markets to have negative total returns. To date, there has been little evidence that either of these conditions has materialized, but the perception that these trends could unfold was a headwind for share prices.

The majority of the Fund’s other holdings were contributors. An overweight to self-storage owners was the largest positive contributor. Self-storage fundamentals were strong, and we believe 2016 may again offer earnings growth in that sector. We avoided low-quality regional mall owners in the Fund, which provided a significant contribution to performance. Operating conditions for non-dominant mall properties remained challenging, and private valuations for those properties are extremely stressed. A decision to underweight owners of health care facilities, whose returns were muted by fears of rising interest rates and a broadly changing health care reimbursement landscape, also contributed to returns. Finally, an overweighting in industrial warehouse owners benefitted returns. Industrial landlords are experiencing a significant increase in demand, driven by economic improvement and growth in e-commerce sales.

We have positioned the Fund to potentially benefit from improvement in GDP growth and employment, a stable interest rate environment and healthy overall U.S. capital markets. We focused the majority of holdings in mid- and large-capitalization companies with a bias toward major urban, coastal and Sunbelt markets.

A common theme among individual holdings within the Fund was companies that we believe own well-located, high-quality properties; feature stable balance sheets; are exhibiting improving property fundamentals; and have above-average cash-flow growth prospects. From a property-type perspective, the Fund was overweight in owners of apartments, warehouses, urban-centric office buildings and self-storage facilities.

Outlook for 2016

We believe that real estate stocks should continue to offer an attractive dividend yield with a stable earnings growth profile relative to broader equities. However, volatility appears to be here to stay, as the markets grapple with weak global growth and unprecedented monetary policy actions meant to stimulate aggregate demand. This sort of backdrop can lead to short-term dislocations in REIT share prices relative to their underlying property value.

Absent the U.S. slipping into an outright recession, or even a stall-speed environment, we believe commercial real estate properties can deliver another year of solid cash flow growth. Occupancies and rental rates across the major property types are at or nearing equilibrium levels, and we think the current environment can sustain itself with the proper macro backdrop. We believe that few, if any, of the typical forces that have caused previous corrections are present today.

At the property level, real estate conditions in the U.S. remain favorable, although the cycle appears to be in the later stages. The primary determination of whether the cycle prolongs itself lies with the pace of economic growth and the health of credit markets. We believe a recent slowdown in commercial mortgage-backed securities lending, if sustained, will exert negative pressure on property prices. In addition, a failure of the economy to accelerate may impede future space demand. Demand still exceeds new supply across the major property types, speculative construction activity is minimal, and both property pricing and lending standards remain rational.

In an environment of positive GDP growth and 1.5-2% employment growth, we think real estate operating conditions are likely to remain favorable. In that environment, 2016 may provide another year of cash flow growth for REITs. We believe cash flow growth may be 6-8% across the sector, with similar levels of dividend growth. Still, we are mindful of peaking internal growth levels and believe the sector is reliant on continued economic improvement to sustain current operating conditions.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investment risks associated with real estate securities, in addition to other risks, include rental income fluctuation, depreciation, property tax value changes and differences in real estate market values. Real estate securities are subject to interest-rate risk and, as such, the Fund's net asset value may fall as interest rates rise.

Because the Fund invests more than 25% of its total assets in the real estate industry, it may be more susceptible to a single economic, regulatory, or technical occurrence than a fund that does not concentrate its investments in this industry. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The indexes noted are unmanaged, include reinvested dividends and do not include fees. One cannot invest directly in an index, nor is an index representative of Ivy Real Estate Securities Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Real Estate Securities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-2.53%	-1.41%	2.67%	-2.58%	3.86%	3.21%	4.02%	3.62%
5-year period ended 3-31-16	9.32%	9.34%	9.80%	9.22%	11.17%	10.48%	—	10.90%
10-year period ended 3-31-16	4.74%	4.38%	4.54%	—	—	5.37%	—	5.73%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	3.16%	4.58%	—	12.90%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

(A) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$698,267	\$ —	\$ —
Short-Term Securities	—	3,193	—
Total	\$698,267	\$3,193	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronym is used throughout this schedule:

REIT = Real Estate Investment Trusts

See Accompanying Notes to Financial Statements.

Zachary H. Shafran

Below, Zachary H. Shafran, portfolio manager of Ivy Science and Technology Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since February 2001 and has 27 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Science and Technology Fund (Class A shares at net asset value)	-15.10%
Ivy Science and Technology Fund (Class A shares including sales load)	-19.98%
Benchmark(s) and/or Lipper Category	
S&P North American Technology Sector Index	8.79%
(generally reflects the performance of U.S. science and technology stocks)	
Lipper Science & Technology Funds Universe Average	-1.09%
(generally reflects the performance of the universe of funds with similar investment objectives)	

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Uncertainty continues with slow global growth

Equity and fixed-income markets were volatile in the fiscal year ended March 31, 2016. The global recovery experienced setbacks throughout the year, though we believe the gradual recovery should continue. Global growth for 2016 is expected to be weaker and more uneven than earlier forecasts, with the U.S. emerging as the main driver for growth. After many false starts, in the fourth quarter of 2015, the U.S. Federal Reserve (Fed) raised rates for the first time since June 2006. Additional rate increases may take place at some point this upcoming year. Inflation generally surprised on the downside with the drop in commodity prices and lackluster wage growth. On the international front, economic growth remained sluggish despite a continued policy of central bank easing. During the fourth quarter, the Eurozone was disappointed with European Central Bank (ECB) President Mario Draghi's tempered announcement during the most recent ECB meeting, as expectations were high for a more aggressive response to the current slow-growth conditions. Potential turmoil remains in the European Union (EU), as Britain set June 23 as the date for a referendum on the country's membership in the EU. In early 2015, the chances of a "Brexit" — Britain departing from the EU — seemed remote. Today, largely due to Europe's migration crisis and regulation concerns, the chances of a Brexit have increased.

The decline in energy prices that started mid-year 2014 gathered steam during the fiscal year as robust North American production, in addition to the recovery of oil supplies in OPEC nations (Libya and Iraq), has overwhelmed tepid global demand for the commodity. The continued downgrading of demand growth through the year, along with OPEC's unwillingness to support price levels by curtailing output, led to the rapid decline in price levels. While the sharp fall in oil prices adversely impacted the energy sector and oil-producing countries, we believe this will aid consumer-based economies/countries if the price stays at a relatively low level for an extended period.

On the year, information technology stocks performed well, with the Fund's benchmark index advancing nearly 9%. The market was notably narrow, with the largest five companies in the benchmark accounting for the vast majority of the benchmark's return. We believe balance sheet strength (large cash balances and relatively low debt levels), increases in dividend payments and strong management were key in providing stability and growth to this sector. On the health care front, we believe there are many investment opportunities in those companies that are able to provide innovative solutions or services to the end user.

A volatile year

The Fund significantly underperformed its benchmark and its peer-group average during the period. Poor stock selection in industrials, consumer discretionary and information technology were the main detractors to relative performance, while overall sector allocation, in particular health care, also contributed to the relative decline. In terms of specific holdings, a position in Micron Technology Inc. was the greatest detractor to performance for the year, followed by the Fund's holding of Vertex Pharmaceuticals Inc. Micron Technology reported disappointing earnings and guidance during the fiscal year. Weakness in the PC industry, along with cost and margin concerns, negatively impacted performance during the period. Additionally, in 2015 virtually all of the technology sector's outperformance came from a few names, including Facebook, Amazon, Netflix, and Google, accounting for a very narrow market for outperformance. While the Fund had sizable positions in Facebook and Google, its relative underweight in these positions compared to the index and its lack of exposure to Amazon and Netflix had a negative impact on Fund performance.

Unfortunately, the Fund's long-standing "applied science and technology" investment approach also diminished performance. The Fund's allocation to health care, a sector not included in the Fund's benchmark index, was a notable detractor to performance; however, we believe this is one of the sectors with the greatest opportunity for innovation and growth going forward.

Fund positioning

While we recognize the challenges of the world economic backdrop, we are excited about the innovation and growth that is taking place within certain companies. We believe many of the stocks in the information technology space remain relatively inexpensive and are well-positioned going

forward. As confidence is restored, we believe there should be an increase in capital expenditure in various markets around the world as companies become more comfortable with the high cost transitions related to changes in internal infrastructure. The Fund had about 70% of its equity exposure in the information technology sector as of March 31, 2016.

The Fund's exposure to health care names over the year remained relatively stable, and as of the fiscal year-end, about 19% of the Fund's equity holdings were in the health care sector. Also, in developing markets, as the standard of living increases, we believe the demand for quality health care should increase as well. In our view, medical technology, biotechnology, medical records and pharmaceuticals are among the greatest innovators and early adopters of new science and technology, so we are paying particularly close attention to companies in those areas as well. We also are looking more closely at companies that may benefit from a continued low interest rate environment.

The "applied science and technology" holdings span several industries and sectors and make up the remainder of the Fund's equity composition, totaling approximately 10%. The Fund's cash position as of March 31, 2016 was about 1%. The current cash allocation is slightly lower than the Fund's historic average allocation. We almost always have some cash on hand in an effort to take advantage of opportunities that may present themselves or to use as a defensive measure to protect the Fund in adverse market conditions.

Seeking opportunities in a muted growth environment

We believe global economic growth is fragile and is being buoyed by an extremely aggressive global monetary policy. For instance, early in 2015 the ECB unveiled details of a trillion-euro bond purchase program. It seems that only the Fed has moved in a direction of tighter policy. All in all, we think eventual improvement in economic growth will lead to tighter monetary and, to a lesser extent, fiscal policy across the globe.

For the upcoming fiscal year, lingering fiscal concerns and other geopolitical risks have resulted in a rather muted growth outlook. That said, in mixed economic environments, we believe there are many potential investment opportunities — especially in biotechnology, data, mobility and health care — around the world. As we look at the securities of such companies, we are focused on what we believe are good growth prospects and sound capital structures. We believe there will be a modest improvement in capital spending trends, and we are looking for a continuation of an active mergers-and-acquisition environment. As always, we will carefully monitor the macroeconomic environment, but our focus remains primarily on security-specific fundamental research. Going forward, we believe this attention to bottom-up research, coupled with the innovation and transformation under way across the globe, will continue to provide investment opportunities for the Fund.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Because the Fund invests more than 25% of its total assets in the science and technology industry and has significant concentrations within certain issuers, the Fund's performance may be more susceptible to a single economic, regulatory or technological occurrence than a fund that does not concentrate its investments in this industry. Securities of companies within specific industries or sectors of the economy may periodically perform differently than the overall market. In addition, the Fund's performance may be more volatile than an investment in a portfolio of broad market securities and may underperform the market as a whole, due to the relatively limited number of issuers of science and technology related securities. Investment risks associated with investing in science and technology securities, in addition to other risks, include: operating in rapidly changing fields, abrupt or erratic market movements, limited product lines, markets or financial resources, management that is dependent on a limited number of people, short product cycles, aggressive pricing of products and services, new market entrants and obsolescence of existing technology. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Science and Technology Fund's performance.

Notes to Schedule of Investments

*Not shown due to rounding.

(A) No dividends were paid during the preceding 12 months.

(B) Deemed to be an affiliate due to the Fund owning at least 5% of the voting securities.

(C) All or a portion of securities with an aggregate value of \$4,076 are held in collateralized accounts to cover potential obligations with respect to outstanding written options.

(D) Listed on an exchange outside the United States.

(E) Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.

(F) Restricted securities. At March 31, 2016, the Fund owned the following restricted securities:

Security	Acquisition Date(s)	Principal	Cost	Market Value
Marrone Bio Innovations, Inc., 8.000%, 8-20-20	8-20-15	\$23,900	\$23,900	\$23,876
		Shares		
Marrone Bio Innovations, Inc., expires 8-20-23	8-20-15	2,390	\$ —	\$ —*
			\$23,900	\$23,876

The total value of these securities represented 0.5% of net assets at March 31, 2016.

(G) Rate shown is the yield to maturity at March 31, 2016.

(H) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following written options were outstanding at March 31, 2016 (contracts and exercise prices unrounded):

Underlying Security	Counterparty, if OTC	Type	Number of Contracts	Expiration Month	Exercise Price	Premium Received	Value
Xerox Corp.	Societe Generale Bank	Put	21,748	April 2016	\$9.25	\$1,069	\$(22)
	Societe Generale Bank	Put	7,570	April 2016	9.75	393	(15)
						\$1,462	\$(37)

SCHEDULE OF INVESTMENTS

Ivy Science and Technology Fund *(in thousands)*

MARCH 31, 2016

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$4,920,396	\$ —	\$—
Warrants	—	2,240	—
Purchased Options	—	938	—
Corporate Debt Securities	—	23,876	—
Short-Term Securities	—	58,348	—
Total	\$4,920,396	\$85,402	\$—
Liabilities			
Written Options	\$ —	\$ 37	\$—

During the year ended March 31, 2016, securities totaling \$2,029 were transferred from Level 1 to Level 2 due to the lack of observable market data due to decreased market activity or information for these securities. Transfers out of Level 1 represent the values as of the beginning of the reporting period.

The following acronyms are used throughout this schedule:

ADR = American Depositary Receipts
 GTD = Guaranteed
 OTC = Over the Counter
 REIT = Real Estate Investment Trust

Country Diversification		China	1.5%
(as a % of net assets)		Spain	1.3%
United States	80.1%	Germany	1.1%
Israel	4.0%	Bermuda	1.0%
India	3.9%	Other Countries	0.6%
Netherlands	3.4%	Other+	0.9%
United Kingdom	2.2%		

+ Includes options, cash and other assets (net of liabilities), and cash equivalents

See Accompanying Notes to Financial Statements.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) Annualized.

(5) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(6) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(7) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) Annualized.

(5) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(6) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(7) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

	Net Asset Value, End of Period	Total Return ⁽²⁾	Net Assets, End of Period (in millions)	Ratio of Expenses to Average Net Assets Including Expense Waiver	Ratio of Net Investment Income (Loss) to Average Net Assets Including Expense Waiver	Ratio of Expenses to Average Net Assets Excluding Expense Waiver ⁽³⁾	Ratio of Net Investment Income (Loss) to Average Net Assets Excluding Expense Waiver ⁽³⁾	Portfolio Turnover Rate

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) Ratio of expenses to average net assets excluding offering cost was 2.15%.

(6) Ratio of expenses to average net assets excluding offering cost was 1.27%.

(7) Ratio of expenses to average net assets excluding offering cost was 1.88%.

See Accompanying Notes to Financial Statements.

1. ORGANIZATION

Ivy Funds, a Delaware statutory trust (the “Trust”), is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company. Ivy Asset Strategy Fund, Ivy Balanced Fund, Ivy Energy Fund, Ivy Global Natural Resources Fund, Ivy LaSalle Global Real Estate Fund (formerly known as Ivy Global Real Estate Fund), Ivy LaSalle Global Risk-Managed Real Estate Fund (formerly known as Ivy Global Risk-Managed Real Estate Fund), Ivy Real Estate Securities Fund and Ivy Science and Technology Fund (each, a “Fund”) are eight series of the Trust and are the only series of the Trust included in these financial statements. The investment objective(s), policies and risk factors of each Fund are described more fully in the Funds’ Prospectus and Statement of Additional Information (“SAI”). Each Fund’s investment manager is Ivy Investment Management Company (“IICO” or the “Manager”).

Each Fund offers Class A, Class B, Class C, Class I, Class Y, and Class R shares. The Funds’ Class B shares are not available for purchase by new and existing investors. Class B shares will continue to be available for dividend reinvestment and exchanges from Class B shares of another fund within Ivy Funds. Certain Funds may also offer Class E shares. Class E shares are closed for all investments in the Ivy Balanced Fund and Ivy Energy Fund. Certain Funds may also offer Class R6 shares. Class A and Class E shares are sold at their offering price, which is normally net asset value (“NAV”) plus a front-end sales charge. For Class A shares, a 1% contingent deferred sales charge (“CDSC”) is only imposed on shares purchased at NAV for \$1 million or more that are subsequently redeemed within 12 months of purchase. Class B and Class C shares are sold without a front-end sales charge, but may be subject to a CDSC. Class I, Class R, Class R6 and Class Y shares are sold without either a front-end sales charge or a CDSC. All classes of shares have identical rights and voting privileges with respect to the Fund in general and exclusive voting rights on matters that affect that class alone. Net investment income, net assets and NAV per share may differ due to each class having its own expenses, such as transfer agent and shareholder servicing fees, directly attributable to that class. Class A, B, C, E, R and Y have a distribution and service plan. Class I shares and Class R6 shares are not included in the plan. Class B shares will automatically convert to Class A shares 96 months after the date of purchase.

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by each Fund.

Security Transactions and Related Investment Income. Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses are calculated on the identified cost basis. Interest income is recorded on the accrual basis and includes paydown gain (loss) and accretion of discounts and amortization of premiums. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. All or a portion of the distributions received from a real estate investment trust or publicly traded partnership may be designated as a reduction of cost of the related investment and/or realized gain.

Foreign Currency Translation. Each Fund’s accounting records are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars daily, using foreign exchange rates obtained from an independent pricing service authorized by the Board of Trustees of the Trust (the “Board”). Purchases and sales of investment securities and accruals of income and expenses are translated at the rate of exchange prevailing on the date of the transaction. For assets and liabilities other than investments in securities, net realized and unrealized gains and losses from foreign currency translation arise from changes in currency exchange rates. Each Fund combines fluctuations from currency exchange rates and fluctuations in value when computing net realized gain (loss) and net change in unrealized appreciation (depreciation) on investments. Foreign exchange rates are typically valued as of the close of the New York Stock Exchange (“NYSE”), normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

Allocation of Income, Expenses, Gains and Losses. Income, expenses (other than those attributable to a specific class), gains and losses are allocated on a daily basis to each class of shares based upon the relative proportion of net assets represented by such class. Operating expenses directly attributable to a specific class are charged against the operations of that class.

Income Taxes. It is the policy of each Fund to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. In addition, each Fund intends to pay distributions as required to avoid imposition of excise tax. Accordingly, no provision has been made for Federal income taxes. The Funds file income tax returns in U.S. federal and applicable state jurisdictions. The Funds’ tax returns are subject to examination by the relevant taxing authority until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax returns. Management of the Trust periodically reviews all tax positions to assess that it is more likely than not that the position would be sustained upon examination by the relevant tax authority based on the technical merits of each position. As of the date of these financial statements, management believes that no liability for unrecognized tax positions is required.

Dividends and Distributions to Shareholders. Dividends and distributions to shareholders are recorded by each Fund on the business day following record date. Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America (“U.S. GAAP”). If the total dividends and distributions made in any tax year exceeds net investment income and accumulated realized capital gains, a portion of the total distribution may be treated as a tax return of capital.

Segregation and Collateralization. In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (“SEC”), the Dodd Frank Wall Street Reform and Consumer Protection Act, or the interpretive rules and regulations of the U.S. Commodities Futures Trading Commission require that a Fund either deliver collateral or segregate assets in connection with certain investments (e.g., dollar rolls, financial futures contracts, foreign currency exchange contracts, options written, securities with extended settlement periods and swaps), the Fund will

segregate collateral or designate on its books and records cash or other liquid securities having a value at least equal to the amount that is required to be physically segregated for the benefit of the counterparty. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit cash or securities as collateral for certain investments. Certain countries require that cash reserves be held while investing in companies incorporated in that country. These cash reserves and cash collateral that has been pledged to cover obligations of the Funds under derivative contracts, if any, will be reported separately on the Statement of Assets and Liabilities as "Restricted cash." Securities collateral pledged for the same purpose, if any, is noted on the Schedule of Investments.

Concentration of Market and Credit Risk. In the normal course of business, the Funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (issuer credit risk). The value of securities held by the Funds may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Funds; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to issuer credit risk, the Funds may be exposed to counterparty credit risk, or the risk that an entity with which the Funds have unsettled or open transactions may fail to or be unable to perform on its commitments. The Funds manage counterparty credit risk by entering into transactions only with counterparties that they believe have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties. Financial assets, which potentially expose the Funds to market, issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of the Funds' exposure to market, issuer and counterparty credit risks with respect to these financial assets is generally approximated by their value recorded on the Funds' Statement of Assets and Liabilities, less any collateral held by the Funds.

Certain Funds may hold high-yield and/or non-investment-grade bonds, which may be subject to a greater degree of credit risk. Credit risk relates to the ability of the issuer to meet interest or principal payments or both as they become due. The Funds may acquire securities in default and are not obligated to dispose of securities whose issuers subsequently default.

Certain Funds may enter into financial instrument transactions (such as swaps, futures, options and other derivatives) that may have off-balance sheet market risk. Off-balance sheet market risk exists when the maximum potential loss on a particular financial instrument is greater than the value of such financial instrument, as reflected on the Statement of Assets and Liabilities.

If a Fund invests directly in foreign currencies or in securities that trade in, and receive revenues in, foreign currencies, or in financial derivatives that provide exposure to foreign currencies, it will be subject to the risk that those currencies will decline in value relative to the base currency of the Fund, or, in the case of hedging positions, that the Fund's base currency will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad.

Inflation-Indexed Bonds. Certain Funds may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed-income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, however, interest will be paid based on a principal value, which is adjusted for inflation. Any increase or decrease in the principal amount of an inflation-indexed bond will be included as interest income on the Statement of Operations, even though investors do not receive their principal until maturity.

Interest Only Obligations. These securities entitle the owner to receive only the interest portion from a bond, Treasury note or pool of mortgages. These securities are generally created by a third party separating a bond or pool of mortgages into distinct interest-only and principal-only securities. As the principal (par) amount of a bond or pool of mortgages is paid down, the amount of interest income earned by the owner will decline as well.

Loans. Certain Funds may invest in loans, the interest rates of which float or adjust periodically based upon a specified adjustment schedule, benchmark indicator, or prevailing interest rates, the debtor of which may be a domestic or foreign corporation, partnership or other entity ("Borrower"). Loans generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates generally include prime rates of one or more major U.S. banks, London Interbank Offered Rate ("LIBOR") rates or certificates of deposit rates. Loans often require prepayments from excess cash flow or permit the Borrower to repay at its election. The degree to which Borrowers repay cannot be predicted with accuracy. As a result, the actual maturity may be substantially less than the stated maturities. Loans are exempt from registration under the Securities Act of 1933, as amended, may contain certain restrictions on resale, and cannot be sold publicly. A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties.

When a Fund purchases assignments, it acquires all the rights and obligations under the loan agreement of the assigning lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than those held by the assigning lender. When a Fund purchases a participation of a loan interest, the Fund typically enters into a contractual agreement with the lender or other third party selling the participation. A participation interest in loans includes the right to receive payments of principal, interest and any fees to which it is entitled from the lender and only upon receipt by the lender of payments from the Borrower, but not from the Borrower directly. When investing in a participation interest, if a Borrower is unable to meet its obligations under a loan agreement, a Fund generally has no right to enforce compliance with the terms of the loan agreement. As a result, the Fund assumes the credit risk of the Borrower, the selling participant, and any other persons that are interpositioned between the Fund and the Borrower. If the lead lender in a typical lending syndicate becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy, the Fund may incur certain costs and delays in receiving payment or may suffer a loss of principal and/or interest.

Payment In-Kind Securities. Certain Funds may invest in payment in-kind securities (“PIKs”). PIKs give the issuer the option at each interest payment date of making interest payments in either cash or additional debt securities. Those additional debt securities usually have the same terms, including maturity dates and interest rates, and associated risks as the original bonds. The daily market quotations of the original bonds may include the accrued interest (referred to as a dirty price) and require a pro-rata adjustment from the unrealized appreciation or depreciation on investments to interest receivable on the Statement of Assets and Liabilities.

Securities on a When-Issued or Delayed Delivery Basis. Certain Funds may purchase securities on a “when-issued” basis, and may purchase or sell securities on a “delayed delivery” basis. “When-issued” or “delayed delivery” refers to securities whose terms and indenture are available and for which a market exists, but which are not available for immediate delivery. Delivery and payment for securities that have been purchased by a Fund on a when-issued basis normally take place within six months and possibly as long as two years or more after the trade date. During this period, such securities do not earn interest, are subject to market fluctuation and may increase or decrease in value prior to their delivery. The purchase of securities on a when-issued basis may increase the volatility of a Fund’s NAV to the extent the Fund executes such transactions while remaining substantially fully invested. When a Fund engages in when-issued or delayed delivery transactions, it relies on the buyer or seller, as the case may be, to complete the transaction. Their failure to do so may cause the Fund to lose the opportunity to obtain or dispose of the security at a price and yield IICO, or the Fund’s investment subadviser, as applicable, consider advantageous. The Fund maintains internally designated assets with a value equal to or greater than the amount of its purchase commitments. The Fund may also sell securities that it purchased on a when-issued or delayed delivery basis prior to settlement of the original purchase.

Custodian Fees. “Custodian fees” on the Statement of Operations may include interest expense incurred by a Fund on any cash overdrafts of its custodian account during the period. Such cash overdrafts may result from the effects of failed trades in portfolio securities and from cash outflows resulting from unanticipated shareholder redemption activity. A Fund pays interest to its custodian on such cash overdrafts, to the extent they are not offset by positive cash balances maintained by that Fund. The “Earnings credit” line item, if shown, represents earnings on cash balances maintained by that Fund during the period. Such interest expense and other custodian fees may be paid with these earnings.

Independent Trustees and Chief Compliance Officer Fees. Fees paid to the Independent Trustees can be paid in cash or deferred to a later date, at the election of the Trustee according to the Deferred Fee Agreement entered into between the Trust and the Trustee(s). Each Fund records its portion of the deferred fees as a liability on the Statement of Assets and Liabilities. All fees paid in cash plus any appreciation (depreciation) in the underlying deferred plan are shown on the Statement of Operations. Additionally, fees paid to the Chief Compliance Officer of the Funds are shown on the Statement of Operations.

Indemnifications. The Trust’s organizational documents provide current and former Trustees and Officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Trust. In the normal course of business, the Trust may also enter into contracts that provide general indemnification. The Trust’s maximum exposure under these arrangements is unknown and is dependent on future claims that may be made against the Trust. The risk of material loss from such claims is considered remote.

Basis of Preparation. Each Fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946 (“ASC 946”). The accompanying financial statements were prepared in accordance with U.S. GAAP, including but not limited to ASC 946. U.S. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity.

Subsequent Events. Management has performed a review for subsequent events through the date this report was issued.

3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

Each Fund’s investments are reported at fair value. Fair value is defined as the price that each Fund would receive upon selling an asset or would pay upon satisfying a liability in an orderly transaction between market participants at the measurement date. Each Fund calculates the NAV of its shares as of the close of the NYSE, normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

For purposes of calculating the NAV, the portfolio securities and other assets are valued on each business day using pricing and valuation methods as adopted by the Board. Where market quotes are readily available, fair value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services.

Prices for fixed-income securities are typically based on quotes that are obtained from an independent pricing service authorized by the Board. To determine values of fixed-income securities, the independent pricing service utilizes such factors as current quotations by broker/dealers, coupon, maturity, quality, type of issue, trading characteristics, and other yield and risk factors it deems relevant in determining valuations. Securities that cannot be valued by the independent pricing service may be valued using quotes obtained from dealers that make markets in the securities.

Short-term securities with maturities of 60 days or less are valued based on quotes that are obtained from an independent pricing service authorized by the Board as described in the preceding paragraph above.

Because many foreign markets close before the NYSE, events may occur between the close of the foreign market and the close of the NYSE that could have a material impact on the valuation of foreign securities. Waddell & Reed Services Company (“WRSCO”), pursuant to procedures adopted by the Board, evaluates the impact of these events and may adjust the valuation of foreign securities to reflect the fair value as of the close of the NYSE. In addition, all securities for which values are not readily available or are deemed unreliable are appraised at fair value as determined in good faith under the supervision of the Board.

Where market quotes are not readily available, portfolio securities or assets are valued at fair value, as determined in good faith by the Board or Valuation Committee pursuant to procedures approved by the Board.

Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes), including where events occur after the close of the relevant market, but prior to the NYSE close, that materially affect the values of a Fund's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available.

The Board has delegated to WRSCO the responsibility for monitoring significant events that may materially affect the values of a Fund's securities or assets and for determining whether the value of the applicable securities or assets should be re-evaluated in light of such significant events. The Board has established a Valuation Committee to administer and oversee the valuation process, including the use of third party pricing vendors.

The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available. For instances in which daily market quotes are not readily available, investments may be valued, pursuant to procedures established by the Board, with reference to other securities or indices. In the event that the security or asset cannot be valued pursuant to one of the valuation methods established by the Board, the value of the security or asset will be determined in good faith by the Valuation Committee in accordance with the procedures adopted by the Board.

When a Fund uses these fair valuation methods applied by WRSCO that use significant unobservable inputs to determine its NAV, securities will be priced by a method that the Board or persons acting at their direction believe accurately reflects fair value and are categorized as Level 3 of the fair value hierarchy. These methods may require subjective determinations about the value of a security. The prices used by a Fund may differ from the value that will ultimately be realized at the time the securities are sold.

WRSCO is responsible for monitoring the implementation of the pricing and valuation policies through a series of activities to provide reasonable comfort of the accuracy of prices including: 1) periodic vendor due diligence meetings to review methodologies, new developments, and process at vendors, 2) daily and monthly multi-source pricing comparisons reviewed and submitted to the Valuation Committee, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by management and the Valuation Committee.

Accounting standards establish a framework for measuring fair value and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the factors that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

An individual investment's fair value measurement is assigned a level based upon the observability of the inputs which are significant to the overall valuation.

The three-tier hierarchy of inputs is summarized as follows:

Level 1 – Observable input such as quoted prices, available in active markets, for identical assets or liabilities.

Level 2 – Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.

Level 3 – Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

A description of the valuation techniques applied to the Funds' major classes of assets and liabilities measured at fair value on a recurring basis follows:

Asset-Backed Securities and Mortgage-Backed Securities. The fair value of asset-backed securities and mortgage-backed securities are estimated using recently executed transactions and based on models that consider the estimated cash flows of each debt tranche of the issuer, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche including, but not limited to, the prepayment speed assumptions and attributes of the collateral. To the extent the inputs are observable and timely, the values would be categorized in Level 2 of the fair value hierarchy, and otherwise they would be categorized as Level 3.

Bullion. The fair value of bullion is at the last settlement price at the end of each day on the board of trade or exchange upon which they are traded and are categorized in Level 1 of the fair value hierarchy.

Corporate Bonds. The fair value of corporate bonds, as obtained from an independent pricing service, is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3 of the fair value hierarchy.

Derivative Instruments. Forward foreign currency contracts are valued based upon the closing prices of the forward currency rates determined at the close of the NYSE provided by an independent pricing service. Swaps derive their value from underlying asset prices, indices, reference rates and other inputs or a combination of these factors. Swaps are valued by an independent pricing service unless the price is unavailable, in which case they are valued at the price provided by a dealer in that security. Futures contracts traded on an exchange are generally valued at the settlement price. Listed options are ordinarily valued at the mean of the last bid and ask price provided by an independent pricing service unless the price is unavailable, in which case they are valued at a quotation obtained from a broker-dealer. Over-the-counter (“OTC”) options are ordinarily valued at the mean of the last bid and ask price provided by an independent pricing service for a comparable listed option unless such a price is unavailable, in which case they are valued at a quotation obtained from a broker-dealer. If no comparable listed option exists from which to obtain a price from an independent pricing service and a quotation cannot be obtained from a broker-dealer, the OTC option will be valued using a model reasonably designed to provide a current market price.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. OTC derivative contracts include forward foreign currency contracts, swap agreements, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties’ creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case with interest rate swap and option contracts. OTC derivative products valued using pricing models with significant observable inputs are categorized within Level 2 of the fair value hierarchy.

Equity Securities. Equity securities traded on U.S. or foreign securities exchanges or included in a national market system are valued at the official closing price at the close of each business day unless otherwise stated below. OTC equity securities and listed securities for which no price is readily available are valued at the average of the last bid and asked prices.

Mutual funds, including investment funds, typically are valued at the NAV reported as of the valuation date.

Securities that are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded and to the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Foreign securities, for which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intra-day trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange-traded funds, and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Preferred stock, repurchase agreements, and other equities traded on inactive markets or valued by reference to similar instruments are also generally categorized in Level 2.

Loans. Loans are valued using a price or composite price from one or more brokers or dealers as obtained from an independent pricing service. The fair value of loans is estimated using recently executed transactions, market price quotations, credit/market events, and cross-asset pricing. Inputs are generally observable market inputs obtained from independent sources. Loans are generally categorized in Level 2 of the fair value hierarchy, unless key inputs are unobservable in which case they would be categorized as Level 3.

Municipal Bonds. Municipal bonds are fair valued based on pricing models used by and obtained from an independent pricing service that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-wants lists, offerings, market movements, the callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable and timely, the fair values of municipal bonds would be categorized as Level 2; otherwise the fair values would be categorized as Level 3.

Restricted Securities. Restricted securities that are deemed to be both Rule 144A securities and illiquid, as well as restricted securities held in non-public entities, are included in Level 3 of the fair value hierarchy to the extent that significant inputs to valuation are unobservable, because they trade infrequently, and, therefore, the inputs are unobservable. Restricted securities that are valued at a discount to similar publicly traded securities may be categorized as Level 2 of the fair value hierarchy to the extent that the discount is considered to be insignificant to the fair value measurement in its entirety; otherwise they may be categorized as Level 3.

U.S. Government and Agency Securities. U.S. government and agency securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, quoted market prices, and reference data. Accordingly, U.S. government and agency securities are normally categorized in Level 1 or 2 of the fair value hierarchy depending on the liquidity and transparency of the market.

Transfers from Level 2 to Level 3 occurred primarily due to the lack of observable market data due to decreased market activity or information for these securities. Transfers from Level 3 to Level 2 occurred primarily due to the increased availability of observable market data due to increased market activity or information. Transfers between levels represent the values as of the beginning of the reporting period.

For fair valuations using unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in or out of the Level 3 category during the period. In accordance with the requirements of U.S. GAAP, a fair value hierarchy and Level 3 reconciliation, if any, have been included in the Notes to the Schedule of Investments for each respective Fund.

Net realized gain (loss) and net unrealized appreciation (depreciation), shown on the reconciliation of Level 3 investments if applicable, are included on the Statement of Operations in net realized gain (loss) on investments in unaffiliated and/or affiliated securities and in net change in unrealized appreciation (depreciation) on investments in unaffiliated and/or affiliated securities, respectively. Additionally, the net change in unrealized appreciation (depreciation) for all Level 3 investments still held as of March 31, 2016, if applicable, is included on the Statement of Operations in net change in unrealized appreciation (depreciation) on investments in unaffiliated and/or affiliated securities.

4. DERIVATIVE INSTRUMENTS (\$ amounts in thousands unless indicated otherwise)

The following disclosures contain information on why and how the Funds use derivative instruments, the associated risks of investing in derivative instruments, and how derivative instruments affect the Funds' financial positions and results of operations when presented by primary underlying risk exposure.

Forward Foreign Currency Contracts. Certain Funds may enter into forward foreign currency contracts ("forward contracts") for the purchase or sale of a foreign currency at a negotiated rate at a future date. Forward contracts are reported on a schedule following the Schedule of Investments. Forward contracts will be valued daily based upon the closing prices of the forward currency rates provided by an independent pricing service determined at the close of the NYSE as provided by a bank, dealer or independent pricing service. The resulting unrealized appreciation and depreciation is reported on the Statement of Assets and Liabilities as a receivable or payable and on the Statement of Operations within the change in unrealized appreciation (depreciation). At contract close, the difference between the original cost of the contract and the value at the close date is recorded as a realized gain (loss) on the Statement of Operations.

Risks to a Fund related to the use of such contracts include both market and credit risk. Market risk is the risk that the value of the forward contract will depreciate due to unfavorable changes in the exchange rates. Credit risk arises from the possibility that the counterparty will default. If the counterparty defaults, a Fund's maximum loss will consist of the aggregate unrealized gain on appreciated contracts that is not collateralized.

Ivy Asset Strategy Fund and Ivy Global Natural Resources Fund enter into forward foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio instruments or to obtain exposure to, or hedge exposure away from foreign currencies (foreign currency exchange rate risk).

Futures Contracts. Certain Funds may engage in buying and selling futures contracts. Upon entering into a futures contract, the Fund is required to deposit, in a segregated account, an amount equal to a varying specified percentage of the contract amount. This amount is known as the initial margin. Subsequent payments (variation margins) are made or received by the Fund each day, dependent on the daily fluctuations in the value of the underlying debt security or index.

Futures contracts are reported on a schedule following the Schedule of Investments. Securities held in collateralized accounts to cover initial margin requirements on open futures contracts are identified on the Schedule of Investments. Cash held by the broker to cover initial margin requirements on open futures contracts and the receivable and/or payable for the daily mark to market for the variation margin are noted on the Statement of Assets and Liabilities. The net change in unrealized appreciation (depreciation) is reported on the Statement of Operations. Realized gains (losses) are reported on the Statement of Operations at the closing or expiration of futures contracts.

Risks of entering into futures contracts include the possibility of loss of securities or cash held as collateral, that there may be an illiquid market where the Fund is unable to close the contract or enter into an offsetting position and, if used for hedging purposes, the risk that the price of the contract will correlate imperfectly with the prices of the Fund's securities.

Ivy Asset Strategy Fund invests in long and/or short positions in futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk), changes in the value of equity securities (equity risk) or foreign currencies (foreign currency exchange rate risk).

Option Contracts. Options purchased by a Fund are accounted for in the same manner as portfolio securities. The cost of instruments acquired through the exercise of call options is increased by the premium paid to purchase the call. The proceeds from instruments sold through the exercise of put options are decreased by the premium paid to purchase the put.

When a Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded as a liability. The amount of the liability is subsequently adjusted to reflect the current value of the option written. When an option expires on its stipulated expiration date or a Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the call option was sold), and the liability related to such option is extinguished. When a written call option is exercised, the premium is added to the proceeds from the sale of the underlying instrument in determining whether a Fund has realized a gain or loss. For each Fund, when a written put is exercised, the cost basis of the instruments purchased by a Fund is reduced by the amount of the premium received.

Investments in options, whether purchased or written, involve certain risks. Writing put options and purchasing call options may increase a Fund's exposure to the underlying instrument. With written options, there may be times when a Fund will be required to purchase or sell instruments to meet its obligation under the option contract where the required action is not beneficial to the Fund, due to unfavorable movement of the market price of the underlying instrument. Additionally, to the extent a Fund enters into OTC option transactions with counterparties, the Fund will be exposed to the risk that counterparties to these OTC transactions will be unable to meet their obligations under the terms of the transaction.

Ivy Asset Strategy Fund, Ivy Balanced Fund and Ivy Science and Technology Fund may purchase and write call and put options to increase or decrease hedging exposure to underlying instruments (which may include credit risk, equity risk, foreign currency exchange rate risk, event risk and/or interest rate risk), increase exposure to various equity markets or certain sectors, gain exposure to or facilitate trading in certain securities and/or, in the case of options written, to generate returns from options premiums.

Collateral and rights of offset. A Fund may mitigate credit risk with respect to OTC derivative counterparties through credit support annexes (“CSA”) included with an International Swaps and Derivatives Association, Inc. (“ISDA”) Master Agreement which is the standard contract governing most derivative transactions between the Fund and each of its counterparties. The CSA allows the Fund and its counterparty to offset certain derivative financial instruments’ payables and/or receivables against each other and/or with collateral, which is generally held by the Fund’s custodian. The amount of collateral moved to/from applicable counterparties is based upon minimum transfer amounts specified in the CSA. To the extent amounts due to the Fund from its counterparties are not fully collateralized contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. See Note 2 “Segregation and Collateralization” for additional information with respect to collateral practices.

Offsetting of Assets and Liabilities. The following tables present financial instruments that are either (1) offset or (2) subject to an enforceable master netting arrangement or similar agreement as of March 31, 2016:

Assets

Fund	Gross Amounts of Recognized Assets	Gross Amounts Offset on the Statement of Assets and Liabilities	Net Amounts of Assets Presented on the Statement of Assets and Liabilities	Gross Amounts Not Offset on the Statement of Assets and Liabilities			
				Financial Instruments and Derivatives Available for Offset	Non-Cash Collateral Received	Cash Collateral Received	Net Amount Receivable
Ivy Global Natural Resources Fund							
Unrealized appreciation on forward foreign currency contracts ⁽¹⁾	\$321	\$—	\$321	\$(67)	\$(254)	\$ —	\$ —
Ivy Science and Technology Fund							
Investments in unaffiliated securities at value*	\$938	\$—	\$938	\$(37)	\$ —	\$(280)	\$621

* Purchased options are reported as investments in unaffiliated securities on the Statement of Assets and Liabilities.

(1) Amounts include forward contracts that have an offset to an open and close contract, but have not settled. These amounts are included on the Statement of Assets and Liabilities line item for Investment securities sold receivable.

Liabilities

Fund	Gross Amounts of Recognized Liabilities	Gross Amounts Offset on the Statement of Assets and Liabilities	Net Amounts of Liabilities Presented on the Statement of Assets and Liabilities	Gross Amounts Not Offset on the Statement of Assets and Liabilities			
				Financial Instruments and Derivatives Available for Offset	Non-Cash Collateral Pledged	Cash Collateral Pledged	Net Amount Payable
Ivy Asset Strategy Fund							
Unrealized depreciation on forward foreign currency contracts	\$732	\$—	\$732	\$ —	\$(528)	\$—	\$204
Ivy Global Natural Resources Fund							
Unrealized depreciation on forward foreign currency contracts ⁽¹⁾	\$ 67	\$—	\$ 67	\$(67)	\$ —	\$—	\$ —
Ivy Science and Technology Fund							
Written options at value	\$ 37	\$—	\$ 37	\$(37)	\$ —	\$—	\$ —

(1) Amounts include forward contracts that have an offset to an open and close contract, but have not settled. These amounts are included on the Statement of Assets and Liabilities line item for Investment securities purchased payable.

Additional Disclosure Related to Derivative Instruments

Fair values of derivative instruments as of March 31, 2016:

Fund	Type of Risk Exposure	Assets		Liabilities	
		Statement of Assets & Liabilities Location	Value	Statement of Assets & Liabilities Location	Value
Ivy Asset Strategy Fund	Foreign currency		\$ —	Unrealized depreciation on forward foreign currency contracts	\$ 732
Ivy Balanced Fund	Equity	Investments in unaffiliated securities at value*	11,228	Written options at value	1,911
Ivy Global Natural Resources Fund	Foreign currency	Unrealized appreciation on forward foreign currency contracts	320	Unrealized depreciation on forward foreign currency contracts	65
Ivy Science and Technology Fund	Equity	Investments in unaffiliated securities at value*	938	Written options at value	37

* Purchased options are reported as investments in unaffiliated securities and are reflected on the accompanying Schedule of Investments.

Amount of realized gain (loss) on derivatives recognized on the Statement of Operations for the year ended March 31, 2016:

Fund	Type of Risk Exposure	Net realized gain (loss) on:					Total
		Investments in unaffiliated securities*	Swap agreements	Futures contracts	Written options	Forward foreign currency contracts	
Ivy Asset Strategy Fund	Equity	\$(205,815)	\$—	\$(48,660)	\$103,916	\$ —	\$(150,559)
	Foreign currency	—	—	—	—	(52,506)	(52,506)

Premium Received	N/A	\$ 31,432	\$ (29,355)	\$ (520)	\$ (95)	\$ 1,462

6. BASIS FOR CONSOLIDATION OF THE IVY ASSET STRATEGY FUND

Ivy ASF II, Ltd. (the “Subsidiary”), a Cayman Islands exempted company, was incorporated as a wholly owned subsidiary acting as an investment vehicle for the Ivy Asset Strategy Fund (referred to as “the Fund” in this subsection). Ivy ASF III (SBP), LLC and Ivy ASF, LLC (each a “Company”, collectively “the Companies”), Delaware limited liability companies, were incorporated as wholly owned companies acting as investment vehicles for the Fund. The Subsidiary and each Company acts as an investment vehicle for the Fund, in order to effect certain investments for the Fund consistent with the Fund’s investment objectives and policies as specified in its prospectus and SAI.

The Fund’s investment portfolio has been consolidated and includes the portfolio holdings of the Fund, its Subsidiary and the Companies. The consolidated financial statements include the accounts of the Fund and its Subsidiary and the Companies. All inter-company transactions and balances have been eliminated. A subscription agreement was entered into between the Fund and its Subsidiary and each Company comprising the entire issued share capital of the Subsidiary and each Company with the intent that the Fund will remain the sole shareholder and retain all rights. Under the Articles of Association, shares issued by the Subsidiary and each Company confer upon a shareholder the right to receive notice of, to attend and to vote at general meetings of the Subsidiary and each Company and shall confer upon the shareholder rights in a winding-up or repayment of capital and the right to participate in the profits or assets of the Subsidiary and each Company.

See the table below for details regarding the structure, incorporation and relationship as of March 31, 2016 of the Subsidiary and each Company to the Fund (amounts in thousands).

Subsidiary/Company	Date of Incorporation	Subscription Agreement	Fund Net Assets	Subsidiary Net Assets	Percentage of Fund Net Assets
Ivy ASF II, Ltd.	1-31-13	4-10-13	\$10,297,159	\$651,969	6.33%
Ivy ASF III (SBP), LLC	4-9-13	4-23-13	\$10,297,159	321,341	3.12
Ivy ASF, LLC	12-10-12	12-18-12	\$10,297,159	27,327	0.27

7. INVESTMENT MANAGEMENT AND PAYMENTS TO AFFILIATED PERSONS (\$ amounts in thousands unless indicated otherwise)

Management Fees. IICO, a wholly owned subsidiary of Waddell & Reed Financial, Inc. (“WDR”), serves as each Fund’s investment manager. The management fee is accrued daily by each Fund at the following annual rates as a percentage of average daily net assets:

Fund (M - Millions)	\$0 to \$500M	\$500 to \$1,000M	\$1,000 to \$2,000M	\$2,000 to \$3,000M	\$3,000 to \$5,000M	\$5,000 to \$8,000M	\$8,000 to \$10,000M	\$10,000 to \$13,000M	\$13,000 to \$28,000M	\$28,000 to \$53,000M	Over \$53,000M
Ivy Asset Strategy											
Fund	0.700%	0.700%	0.650%	0.600%	0.550%	0.550%	0.550%	0.550%	0.550%	0.545%	0.540%
Ivy Balanced Fund											
Fund	0.700	0.700	0.650	0.600	0.550	0.540	0.540	0.530	0.530	0.530	0.530
Ivy Energy Fund											
Fund	0.850	0.850	0.830	0.800	0.760	0.750	0.750	0.740	0.740	0.740	0.740
Ivy Global Natural Resources Fund											
Fund	1.000	0.850	0.830	0.800	0.760	0.730	0.730	0.700	0.700	0.700	0.700
Ivy LaSalle Global Real Estate Fund											
Fund	0.950	0.950	0.920	0.870	0.840	0.820	0.820	0.800	0.800	0.800	0.800
Ivy LaSalle Global Risk-Managed Real Estate Fund											
Fund	0.950	0.950	0.920	0.870	0.840	0.820	0.820	0.800	0.800	0.800	0.800
Ivy Real Estate Securities Fund											
Fund	0.900	0.900	0.870	0.840	0.800	0.760	0.760	0.720	0.720	0.720	0.720
Ivy Science and Technology Fund											
Fund	0.850	0.850	0.830	0.800	0.760	0.760	0.755	0.755	0.750	0.750	0.750

For Funds managed solely by IICO, IICO has voluntarily agreed to waive a Fund's management fee on any day that the Fund's net assets are less than \$25 million, subject to IICO's right to change or modify this waiver. See Expense Reimbursements and/or Waivers below for amounts waived during the year ended March 31, 2016.

IICO has entered into Subadvisory Agreements with the following entities on behalf of certain Funds:

Under an agreement between IICO and Advantus Capital Management, Inc. ("Advantus"), Advantus serves as subadviser to Ivy Real Estate Securities Fund. Under an agreement between IICO and LaSalle Investment Management Securities, LLC ("LaSalle"), LaSalle serves as subadviser to Ivy LaSalle Global Real Estate Fund and Ivy LaSalle Global Risk-Managed Real Estate Fund. Each subadviser makes investment decisions in accordance with the Fund's investment objectives, policies and restrictions under the supervision of IICO and the oversight of the Board. IICO pays all applicable costs of the subadvisers.

Accounting Services Fees. The Trust has an Accounting and Administrative Services Agreement with WRSCO, doing business as WI Services Company ("WISC"), an indirect subsidiary of WDR. Under the agreement, WISC acts as the agent in providing bookkeeping and accounting services and assistance to the Trust, including maintenance of Fund records, pricing of Fund shares and preparation of certain shareholder reports. For these services, each Fund pays WISC a monthly fee of one-twelfth of the annual fee based on the average net asset levels shown in the following table:

(M - Millions)	\$0 to \$10M	\$10 to \$25M	\$25 to \$50M	\$50 to \$100M	\$100 to \$200M	\$200 to \$350M	\$350 to \$550M	\$550 to \$750M	\$750 to \$1,000M	Over \$1,000M
Annual Fee Rate	\$0.00	\$11.50	\$23.10	\$35.50	\$48.40	\$63.20	\$82.50	\$96.30	\$121.60	\$148.50

In addition, for each class of shares in excess of one, each Fund pays WISC a monthly per-class fee equal to 2.5% of the monthly accounting services base fee.

Each Fund also pays WISC a monthly administrative fee at the annual rate of 0.01%, or one basis point, for the first \$1 billion of net assets with no fee charged for net assets in excess of \$1 billion. This fee is voluntarily waived by WISC until a Fund's net assets are at least \$10 million and is included in "Accounting services fee" on the Statement of Operations.

Shareholder Servicing. General. Under the Shareholder Servicing Agreement between the Trust and WISC, with respect to Class A, Class B, Class C and Class E shares, for each shareholder account that was in existence at any time during the prior month, each Fund pays a monthly fee that ranges from \$1.5042 to \$1.6958 per account; however, WISC has agreed to reduce that fee if the number of total shareholder accounts within the Complex (Waddell & Reed Advisors Funds, InvestEd Portfolios and Ivy Funds) reaches certain levels. Effective June 6, 2011 for Class R shares, each Fund pays a monthly fee equal to one-twelfth of 0.25 of 1% of the average daily net assets of the class for the preceding month. Prior to June 6, 2011 the fee was 0.20 of 1%. For Class I and Class Y shares, each Fund pays a monthly fee equal to one-twelfth of 0.15 of 1% of the average daily net assets of the class for the preceding month. For Class R6 shares, each Fund pays WISC a monthly fee equal to one-twelfth of 0.01 of 1% of the average daily net assets of the class for the preceding month. Each Fund also reimburses WISC for certain out-of-pocket costs for all classes.

Networked accounts. For certain networked accounts (that is, those accounts whose Fund shares are purchased through certain financial intermediaries), WISC has agreed to reduce its per account fees charged to the Funds to \$0.50 per month per shareholder account. Additional fees may be paid by the Funds to those intermediaries. The Fund will reimburse WISC for such costs if the annual rate of the third-party per account charges for a Fund are less than or equal to \$12.00 per account or an annual fee of 0.14 of 1% that is based on average daily net assets.

Broker accounts. Certain broker-dealers that maintain shareholder accounts with each Fund through an omnibus account provide transfer agent and other shareholder-related services that would otherwise be provided by WISC if the individual accounts that comprise the omnibus account were opened by their beneficial owners directly. Each Fund may pay such broker-dealers a per account fee for each open account within the omnibus account (up to \$18.00 per account), or a fixed rate fee (up to an annual fee of 0.20 of 1% that is based on average daily net assets), based on the average daily NAV of the omnibus account (or a combination thereof).

Distribution and Service Plan. Class A and Class E Shares. Under a Distribution and Service Plan adopted by the Trust pursuant to Rule 12b-1 under the 1940 Act (the "Distribution and Service Plan"), each Fund may pay a distribution and/or service fee to Ivy Funds Distributors, Inc. ("IFDI") for Class A and Class E shares in an amount not to exceed 0.25% of the Fund's average annual net assets. The fee is to be paid to compensate IFDI for amounts it expends in connection with the distribution of the Class A and Class E shares and/or provision of personal services to Fund shareholders and/or maintenance of shareholder accounts of that class.

Class B and Class C Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a service fee not to exceed 0.25% and a distribution fee not to exceed 0.75% of the Fund's average annual net assets for Class B and Class C shares to compensate IFDI for its services in connection with the distribution of shares of that class and/or provision of personal services to Class B or Class C shareholders and/or maintenance of shareholder accounts of that class.

Class R Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a fee of up to 0.50%, on an annual basis, of the average daily net assets of the Fund's Class R shares to compensate IFDI for, either directly or through third parties, distributing the Class R shares of that Fund, providing personal services to Class R shareholders and/or maintaining Class R shareholder accounts.

Class Y Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a fee of up to 0.25%, on an annual basis, of the average daily net assets of the Fund's Class Y shares to compensate IFDI for, either directly or through third parties, distributing the Class Y shares of that Fund, providing personal services to Class Y shareholders and/or maintaining Class Y shareholder accounts.

Sales Charges. As principal underwriter for the Trust's shares, IFDI receives sales commissions (which are not an expense of the Trust) for sales of Class A and Class E shares. A CDSC may be assessed against a shareholder's redemption amount of Class B, Class C or certain Class A and Class E shares and is paid to IFDI. During the year ended March 31, 2016, IFDI received the following amounts in sales commissions and CDSCs:

	Gross Sales Commissions	CDSC				Commissions Paid ⁽¹⁾
		Class A	Class B	Class C	Class E	
Ivy Asset Strategy Fund	\$1,297	\$31	\$869	\$504	\$ —	\$2,475
Ivy Balanced Fund	1,097	12	119	98	—	1,920
Ivy Energy Fund	297	6	6	40	—	474
Ivy Global Natural Resources Fund	385	2	16	8	—	400
Ivy LaSalle Global Real Estate Fund	27	—*	—	—*	N/A	24
Ivy LaSalle Global Risk-Managed Real Estate Fund	39	—*	1	—*	N/A	39
Ivy Real Estate Securities Fund	335	2	8	7	—	317
Ivy Science and Technology Fund	1,278	3	68	143	—	2,113

* Not shown due to rounding.

(1) IFDI reallocated/paid this portion of the sales charge to financial advisors and selling broker-dealers.

Expense Reimbursements and/or Waivers. Fund and class expense limitations and related waivers/reimbursements for the year ended March 31, 2016 were as follows:

Fund Name	Share Class Name	Type of Expense Limit	Commencement Date	End Date	Expense Limit	Amount of Expense Waiver/Reimbursement	Expense Reduced
Ivy Asset Strategy Fund	Class E	Contractual	8-1-2008	7-31-2016	1.00%	\$ 85	12b-1 Fees and/or Shareholder Servicing
	Class Y	Contractual	8-1-2011	7-31-2016	Not to exceed Class A	\$ 81	12b-1 Fees and/or Shareholder Servicing
Ivy Balanced Fund	Class Y	Contractual	8-1-2011	7-31-2016	Not to exceed Class A	\$ —	N/A

(1) The Fund's investment management fee is being reduced by 0.10% of average daily net assets until July 31, 2016.

(2) Reflects the lower contractual expense limit which went into effect August 1, 2015.

Any amounts due to the Funds as a reimbursement but not paid as of March 31, 2016 are shown as a receivable from affiliates on the Statement of Assets and Liabilities.

8. RELATED PARTY TRANSACTIONS

Certain Funds are permitted to purchase or sell securities from or to certain affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Funds from or to another fund or portfolio that are, or could be, considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a-7 of the Act. Further, as defined under the procedures, each transaction is effected at the current market price. During the year ended March 31, 2016, the Funds below engaged in purchases and sales of securities pursuant to Rule 17a-7 of the Act (amounts in thousands):

Fund	Purchases	Sales
Ivy Asset Strategy Fund	\$ —	\$19,271
Ivy Balanced Fund	50,562	1,609

9. INTERFUND LENDING PROGRAM

Pursuant to an exemptive order issued by the SEC ("Order"), the Trust and the Advisors Fund Complex (Waddell & Reed Advisors Funds, Ivy Funds Variable Insurance Portfolios and InvestEd Portfolios; referred to with the Funds for purposes of this section as Funds) have the ability to lend money to, and borrow money from, each other pursuant to a master interfund lending agreement ("Interfund Lending Program"). Under the Interfund Lending Program, the Funds may lend or borrow money for temporary purposes directly to or from one another (each an "Interfund Loan"), subject to meeting the conditions of the Order. The interest rate to be charged on an Interfund Loan is the average of the overnight repurchase agreement rate and the short-term bank loan rate. The Funds made no Interfund Loans under the Interfund Lending Program during the year ended March 31, 2016.

10. AFFILIATED COMPANY TRANSACTIONS (All amounts in thousands)

A summary of the transactions in affiliated companies during the year ended March 31, 2016 follows:

13. FEDERAL INCOME TAX MATTERS (\$ amounts in thousands)

For Federal income tax purposes, cost of investments owned at March 31, 2016 and the related unrealized appreciation (depreciation) were as follows:

Fund	Cost of Investments	Gross Appreciation	Gross Depreciation	Net Unrealized Appreciation (Depreciation)
Ivy Asset Strategy Fund	\$10,596,857	\$ 591,571	\$861,294	\$(269,723)
Ivy Balanced Fund	2,666,531	231,787	97,027	134,760
Ivy Energy Fund	469,793	18,746	63,830	(45,084)
Ivy Global Natural Resources Fund	775,149	97,544	162,743	(65,199)
Ivy LaSalle Global Real Estate Fund	32,326	2,870	1,214	1,656
Ivy LaSalle Global Risk-Managed Real Estate Fund	80,417	6,186	851	5,335
Ivy Real Estate Securities Fund	482,103	221,386	2,029	219,357
Ivy Science and Technology Fund	4,074,594	1,417,250	486,046	931,204

For Federal income tax purposes, the Funds' distributed and undistributed earnings and profit for the year ended March 31, 2016 and the post-October and late-year ordinary activity were as follows:

Fund	Distributed Ordinary Income	Undistributed Ordinary Income	Distributed Long-Term Capital Gains	Undistributed Long-Term Capital Gains	Tax Return of Capital	Post-October Capital Losses Deferred	Late-Year Ordinary Losses Deferred
Ivy Asset Strategy Fund	\$37,222	\$ —	\$959,717	\$ —	\$—	\$281,518	\$12,091
Ivy Balanced Fund	48,087	—	100,678	372	—	33,162	696
Ivy Energy Fund	—	—	—	—	—	—	1,202
Ivy Global Natural Resources Fund	—	1,433	—	—	—	—	—
Ivy LaSalle Global Real Estate Fund	711	492	368	—	—	512	—
Ivy LaSalle Global Risk-Managed Real Estate Fund	912	2,328	528	284	—	—	—
Ivy Real Estate Securities Fund	10,986	2,633	28,841	12,141	—	—	—
Ivy Science and Technology Fund	—	—	144,996	—	—	128,973	8,511

Internal Revenue Code regulations permit each Fund to elect to defer into its next fiscal year capital losses and certain specified ordinary items incurred between each November 1 and the end of its fiscal year. Each Fund is also permitted to defer into its next fiscal year certain ordinary losses that generated between each January 1 and the end of its fiscal year.

Accumulated capital losses represent net capital loss carryovers as of March 31, 2016 that may be available to offset future realized capital gains and thereby reduce future capital gains distributions. Under the Regulated Investment Company Modernization Act of 2010 (the "Modernization Act"), a Fund is permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. Any losses incurred during those future taxable years will be required to be utilized prior to any losses incurred in pre-enactment taxable years which have only an eight year carryforward period. As a result of this ordering rule, pre-enactment capital loss carryovers may expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under the previous law. The Fund's first fiscal year end subject to the Modernization Act was March 31, 2012. The following table shows the expiration dates for capital loss carryovers from pre-enactment taxable years and the amounts of capital loss carryovers, if any, by each of the applicable Funds electing to be taxed as a regulated investment company during the year ended March 31, 2016:

Fund	Pre-Enactment		Post-Enactment	
	Year of Expiration		Short-Term Capital Loss Carryover	Long-Term Capital Loss Carryover
	2017	2018		
Ivy Asset Strategy Fund	\$—	\$ —	\$ 4,076	\$ —
Ivy Balanced Fund	—	—	—	—
Ivy Energy Fund	—	6,022	36,821	27,087
Ivy Global Natural Resources Fund	—	1,529,206	277,990	373,570
Ivy LaSalle Global Real Estate Fund	—	—	—	—
Ivy LaSalle Global Risk-Managed Real Estate Fund	—	—	—	—
Ivy Real Estate Securities Fund	—	—	—	—
Ivy Science and Technology Fund	—	—	—	—

Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from U.S. GAAP. These differences are due to differing treatments for items such as deferral of wash sales, post-October losses, late-year ordinary losses, foreign currency transactions, net operating losses, income from passive foreign investment companies (PFICs), investments held within the wholly-owned subsidiary and companies, partnership transactions, and expiring capital loss carryovers. At March 31, 2016, the following reclassifications were made:

Fund	Undistributed Net Investment Income	Accumulated Net Realized Gain (Loss)	Paid-In Capital
Ivy Asset Strategy Fund	\$ (1,705)	\$144,627	\$(142,922)
Ivy Balanced Fund	(7,859)	7,866	(7)
Ivy Energy Fund	398	354	(752)
Ivy Global Natural Resources Fund	(221)	222	(1)
Ivy LaSalle Global Real Estate Fund	18	(18)	—
Ivy LaSalle Global Risk-Managed Real Estate Fund	92	(92)	—
Ivy Real Estate Securities Fund	—	—	—
Ivy Science and Technology Fund	45,697	(25,390)	(20,307)

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Ivy Funds

To the Shareholders and Board of Trustees of Ivy Funds:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Ivy Asset Strategy Fund, Ivy Balanced Fund, Ivy Energy Fund, Ivy Global Natural Resources Fund, Ivy LaSalle Global Real Estate Fund (formerly, Ivy Global Real Estate Fund), Ivy LaSalle Global Risk-Managed Real Estate Fund (formerly, Ivy Global Risk-Managed Real Estate Fund), Ivy Real Estate Securities Fund, and Ivy Science and Technology Fund, eight of the thirty-three funds constituting Ivy Funds (the "Funds"), as of March 31, 2016, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the statement of cash flows for the Ivy Asset Strategy Fund for the year then ended, and the financial highlights for each of the periods presented. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Funds are not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2016, by correspondence with the custodian, agent banks, and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the Funds as of March 31, 2016, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, the cash flows for the Ivy Asset Strategy Fund for the year then ended, and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

Kansas City, Missouri

Ivy Real Estate Securities Fund	28,841,043 ⁽²⁾
Ivy Science and Technology Fund	144,996,081

(1) Of this amount \$22,871 is Unrecaptured Section 1250 Gain.

(2) Of this amount \$375,256 is Unrecaptured Section 1250 Gain.

Shareholders are advised to consult with their tax advisors concerning the tax treatment of dividends and distributions from all the Funds.

BOARD OF TRUSTEES AND OFFICERS

Ivy Funds

The Trust is governed by the Board of Trustees (the “Board”). A majority of the Board members are not “interested persons” as defined in Section 2(a)(19) of the 1940 Act and therefore qualify as Disinterested Trustees. The Board elects the officers who are responsible for administering the Funds’ day-to-day operations. The Waddell & Reed Fund Complex (“Fund Complex”) is comprised of the Ivy Family of Funds, the Ivy High Income Opportunities Fund (a closed-end fund) (“IVH”) and the Advisors Fund Complex, which is comprised of each of the funds in the Waddell & Reed Advisors Funds (20 funds), Ivy Funds Variable Insurance Portfolios (29 funds) and InvestEd Portfolios (3 funds). Jarold W. Boettcher, Joseph Harroz, Jr., and Henry J. Herrmann also serve as trustees of each of the funds in the Advisors Fund Complex. Each member of the Board is also a member of the Board of Trustees of IVH.

Joseph Harroz, Jr. serves as Independent Chair of the Trust’s Board and of the Board of Trustees of IVH.

A Trustee serves until his or her successor is elected and qualified or until his or her earlier death, resignation or removal. The Board appoints officers and delegates to them the management of the day-to-day operations of each of the Funds, based on policies reviewed and approved by the Board, with general oversight by the Board.

The Statement of Additional Information (“SAI”) for the Trust includes additional information about the Trust’s Trustees. The SAI is available without charge, upon request by calling 1.800.777.6472. It is also available on the Ivy Funds website, www.ivyfund.com.

Disinterested Trustees

The following table provides information regarding each Disinterested Trustee.

Name, Address and Year of Birth	Position Held with the Trust	Trustee Since	Principal Occupation(s) During Past 5 Years	Number of Funds in Fund Complex Overseen	Other Directorships Held During Past 5 Years

Tighe 6300 Lamar Avenue Overland Park, KS 66202 1942	Trustee	2008	Retired; formerly, CEO and Director of Asgard Holdings LLC (computer network and security services) (2002 to 2004); President, Citco Technology Management (1995-2000); CEO, Global Mutual Fund Services (1993-2000); Sr. Vice President, Templeton Global Investors (1988-1992).	38	Director, The Research Coast Principium Foundation, Inc. (non-profit) (2012 to 2015); Trustee, IVH.

Interested Trustees

Mr. Herrmann is “interested” by virtue of his current or former engagement as an officer of Waddell & Reed Financial, Inc. (“WDR”) or its wholly owned subsidiaries, including each Fund’s investment manager, IICO, each Fund’s principal underwriter, IFDI, and each Fund’s shareholder servicing and accounting services agent, Waddell & Reed Services Company, doing business as WI Services Company (“WISC”), as well as by virtue of his personal ownership in shares of WDR.

Name, Address and Year of Birth	Position(s) Held With the Trust	Trustee/Officer Since	Principal Occupation(s) During Past 5 Years	Number of Funds in Fund Complex Overseen	Other Directorships Held
Henry J. Herrmann 6300 Lamar Avenue Overland Park, KS 66202 1942	President Trustee	2008 2008	Chairman, WDR (January 2010 to present); CEO, WDR (2005 to present); President, CEO and Chairman, IICO (2002 to present); President, CEO and Chairman, Waddell & Reed Investment Management Company (WRIMCO) (1993 to present); President and Trustee of each of the funds in the Fund Complex.	90	Director, WDR, IICO, WRIMCO, WISC, W&R Capital Management Group, Inc. and Waddell & Reed, Inc.; Director, Blue Cross Blue Shield of Kansas City (2007 to present); United Way of Greter Kansas City (2007 to 2012); Trustee, Advisors Fund Complex (52 portfolios overseen); Trustee, IVH.

Officers

The Board has appointed officers who are responsible for the day-to-day business decisions based on policies it has established. The officers serve at the pleasure of the Board. In addition to Mr. Herrmann, who is President, the Trust's principal officers are:

Name, Address and Year of Birth	Position(s) Held with the Trust and Fund Complex	Officer of Trust Since	Officer of Fund Complex Since*	Principal Occupation(s) During Past 5 Years
Joseph W. Kauten 6300 Lamar Avenue Overland Park, KS 66202 1969	Vice President	2008	2006	Principal Financial Officer of each of the funds in the Fund Complex (2007 to present); Vice President, Treasurer and Principal Accounting Officer of each of the funds in the Fund Complex (2006 to present); Assistant Treasurer of each of the funds in the Fund Complex (2003 to 2006).
	Treasurer	2008	2006	
	Principal Accounting Officer	2008	2006	
	Principal Financial Officer	2008	2007	
Scott J. Schneider 6300 Lamar Avenue Overland Park, KS 66202 1968	Vice President	2008	2006	Chief Compliance Officer (2004 to present) and Vice President (2006 to present) of each of the funds in the Fund Complex.
	Chief Compliance Officer	2008	2004	
Wendy J. Hills 6300 Lamar Avenue Overland Park, KS 66202 1970	Vice President	2014	2014	Senior Vice President and General Counsel of WDR, Waddell & Reed, WRIMCO and WISC (2014 to present); Senior Vice President and General Counsel of IICO (2014 to present); Vice President, General Counsel and Assistant Secretary for each of the funds in the Fund Complex (2014 to present).
	General Counsel	2014	2014	
	Assistant Secretary	2014	2014	
Philip A. Shipp 6300 Lamar Avenue Overland Park, KS 66202 1969	Assistant Secretary	2012	2012	Assistant Secretary of each of the funds in the Fund Complex (2012 to present).

* This is the date when the officer first became an officer of one or more of the funds that are the predecessors to current funds within Ivy Funds (each, a predecessor fund) (if applicable).

ANNUAL PRIVACY NOTICE

Ivy Funds

The following privacy notice is issued by Ivy Funds (the “Funds”), Ivy Investment Management Company (“IICO”) and Ivy Funds Distributor, Inc. (“IFDI”).

Information Collected

We collect nonpublic personal information about you from your account application and other forms that you may deliver to us, and from your transactions with us and our affiliates. This is information that regulators consider necessary for the proper servicing of your account. In order to effect your transactions and service your account properly, we may disclose all of the information that we collect, as described above, to firms that assist us in servicing your account, such as our transfer agent.

Confidentiality of Information Collected

All records containing your nonpublic personal information are kept at our various service providers. These entities include IICO, IFDI and our transfer agent and administrative services provider. We require these affiliates, and any non-affiliated service providers, to protect the confidentiality of your information and to use the information only for the purposes for which disclosure to them is made. The Funds, IICO, IFDI and other service providers restrict access to nonpublic personal information about you to those employees who need to know that information to provide products and services to you and maintain physical, electronic, and procedural safeguards that comply with federal standards to maintain the security of your nonpublic personal information.

Disclosure of Information in Limited Circumstances

We do not disclose nonpublic personal information about present or former customers to nonaffiliated third parties, except as permitted or required by law. In connection with servicing your account, your nonpublic personal information may be shared among the entities named in this notice, their affiliates, and non-affiliates, including a transfer agent or other service companies. We will adhere to the policies and practices above for both current and former customers.

PROXY VOTING INFORMATION

Ivy Funds

Proxy Voting Guidelines

A description of the policies and procedures Ivy Funds uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 1.800.777.6472 and (ii) on the Securities and Exchange Commission's ("SEC") website at www.sec.gov.

Proxy Voting Records

Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on Form N-PX through the Ivy Funds' website at www.ivyfund.com and on the SEC's website at www.sec.gov.

QUARTERLY PORTFOLIO SCHEDULE INFORMATION

Ivy Funds

Portfolio holdings can be found on the Trust's website at www.ivyfund.com. Alternatively, a complete schedule of portfolio holdings of each Fund for the first and third quarters of each fiscal year is filed with the SEC and can be found on the Trust's Form N-Q. These holdings may be viewed in the following ways:

- On the SEC's website at www.sec.gov.
- For review and copy at the SEC's Public Reference Room in Washington, DC. Information on the operations of the Public Reference Room may be obtained by calling 1.800.SEC.0330.

HOUSEHOLDING NOTICE

Ivy Funds

If you currently receive one copy of the shareholder reports and prospectus for your household (even if more than one person in your household owns shares of the Trust) and you would prefer to receive separate shareholder reports and prospectuses for each account holder living at your address, you can do either of the following:

Fax your request to 800.532.2749.

Write to us at the address listed on the back cover.

Please list each account for which you would like to receive separate shareholder reports and prospectus mailings. We will resume sending separate documents within 30 days of receiving your request.

TO ALL TRADITIONAL IRA PLANHOLDERS:

Ivy Funds

As required by law, we are hereby providing notice to you that income tax may be withheld automatically from any distribution or withdrawal from a traditional IRA. A Fund is generally required to withhold taxes unless you make a written election not to have taxes withheld. The election may be made on the distribution/withdrawal form provided by Waddell & Reed, Inc. which can be obtained from your Waddell & Reed representative or by submitting Internal Revenue Service Form W-4P. Once made, an election can be revoked by providing written notice to Waddell & Reed, Inc. If you elect not to have tax withheld you may be required to make payments of estimated tax. Penalties may be imposed by the IRS if withholding and estimated tax payments are not adequate.

This report is submitted for the general information of the shareholders of Ivy Funds. It is not authorized for distribution to prospective investors in the Funds unless preceded or accompanied by a current Ivy Funds prospectus, or summary prospectus, and current performance information, including current Lipper ranking information.

Henry J. Herrmann, CFA

Dear Shareholder,

Despite moderate economic growth in the U.S., financial markets have been volatile, especially in the latter half of the fiscal year. What's causing the fluctuations?

The simple answer is financial markets dislike uncertainty. In recent months we've been faced with significant uncertainty around numerous issues, including:

- Central bank actions;
- politics in the U.S., specifically surrounding the presidential election;
- credit concerns in the energy sector;
- very slow growth in Europe and Japan;
- credit quality issues in important emerging economies, including China;
- the U.K.'s June vote on exiting the European Union;
- fluctuations in currencies.

Amid the uncertain backdrop, the U.S. economic expansion has remained relatively good. Our investment team believes the U.S. is the bright spot, supported primarily by the U.S. consumer, who is benefitting from lower energy prices and lower inflation in general. The improved labor market allows for better demand for cars, homes, furnishings and various consumer goods.

When interest rates in the U.S. will rise, and by how much, remains an area of focus for the financial markets. Markets reacted negatively when the Federal Reserve raised rates slightly in December and seemed to imply more increases were likely. Since then, the Fed seems to have moderated its tightening plans. It's clear the Fed has become attuned to very sluggish global growth. Future rate increases in the U.S. will be very slow to develop, with job growth and inflation being most important determinants of central bank policy.

Overseas, the European Central Bank and Bank of Japan are actively engaged in aggressive easing. As yet, these steps are not leading to strengthening economic activity.

China, in the face of economic softening, has turned toward more aggressive stimulus. We believe moderate economic acceleration is likely in China in 2016, which should be beneficial to broader global growth.

While challenges remain, we do see potential catalysts for growth in several areas and industries and our team continues to seek investment opportunities around the globe.

Economic Snapshot

	3/31/2016	3/31/2015
S&P 500 Index	2,059.74	2,067.89
MSCI EAFE Index	1,652.04	1,849.34
10-Year Treasury Yield	1.78%	1.94%
U.S. unemployment rate	5.0%	5.5%
30-year fixed mortgage rate	3.71%	3.69%
Oil price per barrel	\$ 38.34	\$ 47.60

Sources: Bloomberg, U.S. Department of Labor, MBA, CME

All government statistics shown are subject to periodic revision. The S&P 500 Index is an unmanaged index that tracks the stocks of 500 primarily large-cap U.S. companies. MSCI EAFE Index is an unmanaged index comprised of securities that represent the securities markets in Europe, Australasia and the Far East. It is not possible to invest directly in any of these indexes. Mortgage rates are from BankRate and reflect the overnight national average rate on a conventional 30-year fixed loan. Oil prices reflect the market price of West Texas intermediate grade crude.

Respectfully,

Henry J. Herrmann, CFA
President

The opinions expressed in this letter are those of the President of the Ivy Funds and are current only through the end of the period of the report, as stated on the cover. The President's views are subject to change at any time, based on market and other conditions, and no forecasts can be guaranteed.

ILLUSTRATION OF FUND EXPENSES

Ivy Funds

(UNAUDITED)

Expense Example

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, exchange fees and account fees; and (2) ongoing costs, including management fees, distribution and service fees, and other Fund expenses. The following table is intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the six-month period ended March 31, 2016.

Actual Expenses

The first section in the following table provides information about actual account values and actual expenses for each share class. You may use the information in this section, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number in the first section under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. There may be additional fees charged to holders of certain accounts that are not included in the expenses shown in the table. Fees apply to Individual Retirement Accounts (IRAs), IRA Rollovers, Roth IRAs, Conversion Roth IRAs, Simplified Employee Pension (SEP), Savings Incentive Match Plan for Employees (SIMPLE) IRAs, Tax-Sheltered Accounts (TSAs), Keogh Plans, Owner Only 401(k) (Exclusive K) Plans and Final Pay Plans. As of the close of the six months covered by the table, a customer is charged an annual fee of \$18 within each plan type. This fee is waived for IRA Rollovers and Conversion Roth IRAs if the customer owns another type of IRA. Coverdell Education Savings Account plans are charged an annual fee of \$10 per customer. With limited exceptions, for Class A and Class C shares, if your Fund account

balance is below \$650 on the Friday prior to the last full week of September of each year, the account will be assessed an account fee of \$20. You should consider the additional fees that were charged to your Fund account over the six-month period when you estimate the total ongoing expenses paid over the period and the impact of these fees on your ending account value as such additional expenses are not reflected in the information provided in the following table. Additional fees have the effect of reducing investment returns.

Hypothetical Example for Comparison Purposes

The second section in the following table provides information about hypothetical account values and hypothetical expenses for each share class based on the Fund's actual expense ratio and an assumed rate of return of five percent per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this five percent hypothetical example with the five percent hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), exchange fees or account fees. Therefore, the second section in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Expenses paid may be impacted by expense reduction arrangements. If those arrangements had not been in place, expenses paid would have been higher. See Note 7 to the Financial Statements for further information.

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 183 days in the six-month period ended March 31, 2016, and divided by 366.

**These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

***Class share is closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column of this section.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

(3) Annualized Expense Ratio Based on the Six-Month Period does not include expenses of Underlying Ivy Funds in which Ivy Managed International Opportunities Fund invests.

(4) Annualized expense ratio based on the period excluding offering costs was 1.31%.

(5) Annualized expense ratio based on the period excluding offering costs was 2.03%.

(6) Annualized expense ratio based on the period excluding offering costs was 1.26%.

(7) Annualized expense ratio based on the period excluding offering costs was 1.01%.

(8) Annualized expense ratio based on the period excluding offering costs was 1.76%.

(9) Annualized expense ratio based on the period excluding offering costs was 1.01%.

(10) Annualized expense ratio based on the period excluding offering costs was 1.31%.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads or exchange fees.

Thomas B. Houghton

David W. Land

Christopher R. Sebald

Ivy Bond Fund is subadvised by Advantus Capital Management, Inc.

Below, Thomas B. Houghton, CFA; David W. Land, CFA and Christopher R. Sebald, CFA; portfolio managers of the Ivy Bond Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Houghton has managed the Fund since April 2005 and has 23 years of industry experience. Mr. Land has managed the Fund since April 2005 and has 26 years of industry experience. Mr. Sebald has managed the Fund since August 2003 and has 28 years of industry experience.

Fiscal Year Performance

For the 12 months ended March 31, 2016

Ivy Bond (Class A shares at net asset value)	0.21%
Ivy Bond (Class A shares with sales charge)	-5.57%
Benchmark(s) and/or Lipper Category	
Barclays U.S. Aggregate Bond Index (generally reflects the performance of securities representing the world's bond markets)	1.96%
Lipper Corporate Debt A Rated Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	0.36%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

The Fund underperformed its index and the average performance of its peer group for the 12 months ended March 31, 2016. The underperformance was due mainly to relatively poor performance of the Fund's positions in the energy sector, as falling energy prices put pressure on the Fund's holdings, particularly in the pipeline sector.

The Fund benefited from positive security selection results in the asset-backed and commercial mortgage-backed sectors.

Market

The Federal Reserve (Fed) raised interest rates for the first time in 9 years by 25 basis points (0.25 percent) in December 2015. Concerns about a global growth slowdown that gripped the markets in the third quarter of 2015 subsided rather quickly, despite further declines in commodity markets. As we began 2016, oil prices fell to mid-\$20 a barrel and stock, commodity and credit markets all tumbled early in the quarter, bottoming out in mid-February. It wasn't until the Fed lowered its expectation to two rate increases this year instead of four, along with improving economic data in the U.S. and globally, that markets picked up again. Oil prices returned to near \$40 a barrel by the end of the first quarter, helping to boost energy stocks and bonds, and fueling the bounce back in stocks and credit spreads to where they started the year.

Interest rates initially rose at the beginning of the Fund's fiscal year, causing bond returns to be negative for the first time since 2013. The 10-year Treasury yield rose 43 basis points (0.43 percent) during the second quarter of 2015, averaging 2.20% for the remainder of the year. However, interest rates fell in the first quarter of 2016, credit spreads were very volatile and weak fixed income liquidity accentuated the market's wild moves. Treasury yields fell across the curve with the 2-year falling about 30 basis points (0.30 percent), and the 10-year ending the quarter at 1.77%, near the lows in early 2015.

The U.S. economy continued to chug along in 2015 with decent employment growth, supportive housing growth and strong auto sales when compared to the performance of the past couple years. However, global growth continues to be a concern. The slump in China spread to other emerging markets and weighed on both U.S. and European equity markets in 2015. We saw volatility rise significantly in most markets, due also in part to divergent monetary policy between the U.S., Japan and Europe.

Positioning

Issuance was very strong at the beginning of the fiscal year and we participated in several attractively priced new issues, particularly in the banking, pipeline, utility and health care sectors. We also added exposure in the communications sector in order to take advantage of merger and acquisition

relative spread widening. We sold positions in real estate investment trust (REIT) bonds as we were concerned about liquidity in this sector. We also reduced exposure to high-yield corporate bonds over several months during the second quarter of 2015.

In the third and fourth quarters of 2015, we reduced risk exposure to energy in particular. The energy sector and Master Limited Partnership (MLP) bond prices were driven by the falling price of oil, despite actions to improve balance sheets and financials. We expect this sector to track oil prices leading to more downside. Within the financial sector, we first increased position in banks during 2015 and then shifted to insurance companies in 2016. The European Central Bank's negative interest rate policy and the slow normalization of rates by the Fed in the U.S. are likely to keep the pressure on banks and limit their credit improvement. We also added to agency mortgage-backed securities (MBS) as they appear to be an undervalued segment that isn't correlated with oil prices in the current environment.

We made no substantial changes to the interest rate positioning of the Fund over the course of the year. We maintained our view that interest rates would remain low and fairly range-bound.

Treasury futures are the only form of derivative the Fund has utilized. The Fund has historically used Treasury futures strictly to hedge interest rate positions and to help manage the duration of the Fund.

We have positioned the Fund for a continued slow-growth economy and a narrowing of non-government bond spreads.

Outlook

We expect the U.S. economy to continue its weak but steady growth trend. It improved 0.5% in the first quarter of 2016 from 1.4% in fourth quarter 2015. Longer term, slowing growth in China and other emerging markets may dampen the U.S. trend, but we don't think it will send the U.S. economy into recession anytime soon. Long-term interest rates in the U.S. are likely to remain low as a result. The pace of credit expansion and re-leveraging has been significant in the corporate sector, but it's been weak across the household sector and the combined corporate and household credit growth hasn't been enough in this expansion to be a catalyst for a deep downturn.

Despite the recent rebound in credit spreads, bond market liquidity remains weak. New issue and benchmark bonds trade sometimes points above the same credit issued just last year. Dodd-Frank's limits on market making and trading for banks continue to be a headwind against investors' liquidity needs.

Overall, the list of risks seems to be lengthening. Protectionist policies have become popular with U.S. presidential candidates and heightened rhetoric against trade would certainly be a negative for the U.S. global growth and credit. Beyond protectionism, the threat of terrorism in Europe is now expected. In addition, market uncertainty will likely rise as the United Kingdom entertains exiting the European Union in the second quarter of 2016. Stocks and credit haven't responded well to the prospect of faster rate hikes. Should the Fed become more hawkish again and the dollar rise, the negative feedback loop may kick in again from emerging markets. While the U.S. remains the bright spot in the world economy and investment markets, the constant economic and political pressures from both inside and outside the U.S. borders make investing analysis more than just a domestic exercise.

The Fund's performance noted above is at net asset value (NAV) and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government. However, other U.S. government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB) are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

On Sept. 7, 2008, the Federal Housing Finance Agency (FHFA), an agency of the U.S. government, placed Fannie Mae and Freddie Mac into conservatorship, a statutory process with the objective of returning the entities to normal business operations. FHFA will act as the conservator to operate Fannie Mae and Freddie Mac until they are stabilized. It is unclear what effect this conservatorship will have on the securities issued or guaranteed by Fannie Mae or Freddie Mac.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Bond Fund.

PORTFOLIO HIGHLIGHTS

Ivy Bond Fund

ALL DATA IS AS OF MARCH 31, 2016 (UNAUDITED)

Asset Allocation

Stocks	1.2%
Financials	1.2%
Bonds	98.8%
United States Government and Government Agency Obligations	42.9%
Corporate Debt Securities	38.6%
Asset-Backed Securities	10.8%
Mortgage-Backed Securities	5.3%

Cash and Other Assets (Net of Liabilities), and Cash Equivalents +	0.0%

Lipper Rankings

Category: Lipper Corporate Debt Funds A Rated	Rank	Percentile
1 Year	31/47	65
3 Year	24/42	56
5 Year	18/38	47
10 Year	25/31	79

Past performance is no guarantee of future results. Rankings are for Class A shares and are based on average annual total returns, but do not consider sales charges. Rankings for other share classes may vary.

+Cash equivalents are defined as highly liquid securities with maturities of less than three months. Cash equivalents may include U.S. Government Treasury bills, bank certificates of deposit, bankers' acceptances, corporate commercial paper and other money market instruments.

Quality Weightings

Investment Grade	87.7%
AAA	3.6%
AA	45.2%
A	9.7%
BBB	29.2%
Non-Investment Grade	11.1%
BB	9.3%
B	0.1%
CCC	0.2%
Below CCC	0.1%
Non-rated	1.4%
Cash and Other Assets (Net of Liabilities), Cash Equivalents+ and Equities	1.2%

Our preference is to always use ratings obtained from Standard & Poor's. For securities not rated by Standard & Poor's, ratings are obtained from Moody's. We do not evaluate these ratings, but simply assign them to the appropriate credit quality category as determined by the rating agency.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Bond Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-5.57%	-4.64%	-0.55%	-5.62%	0.49%	-0.11%	0.64%	0.26%
5-year period ended 3-31-16	2.61%	2.65%	3.06%	2.53%	4.16%	—	—	3.89%
10-year period ended 3-31-16	3.25%	2.95%	3.06%	—	—	—	—	3.90%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	2.81%	3.94%	1.90%	2.66%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Erik R. Becker

Gustaf C. Zinn

Below, Erik R. Becker, CFA, and Gustaf C. Zinn, CFA, portfolio managers of Ivy Core Equity Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2016. They have co-managed the Fund since 2006. Both have 17 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Core Equity Fund (Class A shares at net asset value)	–4.22%
Ivy Core Equity Fund (Class A shares including sales charges)	–9.72%
Benchmark(s) and/or Lipper Category	
S&P 500 Index (generally reflects the performance of large- and medium-sized U.S. stocks)	1.78%
Lipper Large-Cap Core Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	–1.24%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Key drivers

Market returns as measured by the S&P 500 Index, the Fund's benchmark, have been very moderate over the past fiscal year at 1.78%. While the period was pretty unexciting from a return standpoint, there was significant volatility versus recent history.

The bull market for U.S. stocks, which reached seven years on March 9, 2016, had proceeded without much of a pause until the first 10% pullback in August 2015. This pullback was primarily centered on a significant economic growth slowdown in China and the potential ramifications if that country were to devalue its currency. Then, after a strong fourth quarter market rebound in 2015, macro-related concerns resurfaced at the start of 2016. These concerns prompted many to view the Federal Reserve's (Fed) December rate hike as a mistake and called into question its internal forecasts for multiple rate hikes in 2016, which seemed increasingly disconnected from the consequences of further dollar strength and a likely continued drop in the price of oil. Much like August 2015, fears of China's slowing economic growth were centered on the U.S. dollar and the inability of China to maintain export competitiveness while its currency remained pegged to the dollar. These fears helped drive the price of oil below \$30 per barrel, triggering a whole new set of concerns in the debt markets, including rating agency downgrades in the energy sector, as well as contagion effects in the financial sector due to rising default risk.

Entering February 2016, with credit markets under significant pressure, predictions of an upcoming U.S. recession were gaining credibility. Concerns were so significant that the Fed began to change its commentary in February and March, acknowledging that the desire to normalize interest rates in the U.S. had too many negative consequences for the global economy. We believe this changing commentary from the Fed was the key driver for a weakening U.S. dollar, an increase in the price of oil and a significant rally in equity markets that more than made up for the beginning of the first quarter swoon. We would not be surprised to see more coordinated quantitative easing from major central banks around the world (primarily the U.S. Fed, the European Central Bank and the Bank of Japan) that would focus more on asset purchases instead of competitive currency devaluations. This development would be a welcomed change for equity markets.

Within a small gain for the fiscal year, there was some significant divergence between sectors. As one might predict, the more defensive sectors of the market, utilities, telecommunications and consumer staples, all posted double-digit returns for the fiscal year. It is also not surprising that with the significant price declines across the commodity complex that energy and materials were the worst performing sectors for the period. The biggest surprise from a sector standpoint was the negative performance of the health care sector, which historically has performed more in line with the defensive areas of the market, but was put under significant pressure over the past six months due to uncertainty surrounding the upcoming U.S. presidential election. The selloff in health care, and greater than expected decline in the commodity complex, made for a most difficult fiscal year on a relative basis over the past 10 years that we have managed the Fund.

Contributors and detractors

The Fund underperformed its benchmark and peer group for the fiscal year ending March 31, 2016. Stock selection across the health care, industrials and consumer discretionary sectors accounted for over 90% of this underperformance. In addition, the previous three months accounted for 300 of the 600 basis points of performance, as there was significant outperformance of the telecommunications and utility sectors and underperformance of the health care sector. Many health care companies are in the process of completing large merger and acquisition (M&A) transactions, which have pressured these stocks due to regulatory uncertainty more than the group as a whole. Much like the health care related political uncertainty due to the upcoming election, we believe the issues around M&A will be resolved in the next few quarters and the stocks will perform materially better than they have over the past several months.

The Fund's earnings-based philosophy continues to favor health care as the best defensive area in the market where we believe there is the potential for double-digit growth with valuations well below the market. The utilities and telecommunications sectors, as we have been writing many times over the past several quarters, are historically expensive versus their tepid earnings growth. While higher dividend-paying stocks remain in favor with interest rates low, we don't think continued outperformance of these stocks, with little to no earnings growth, is sustainable. As it relates to health care, the political noise has been the primary headwind for the sector. We do not think the long-term earnings power of the Fund's holdings will change based on the next president, and we expect the stocks to recover as the election nears and uncertainty fades.

Recent moves in the Fund included a continued increase in the energy weighting, with the high-conviction belief that current oil prices will result in falling production over the next fiscal year. At some point in 2017, we think the world will need the U.S. to resume oil production growth and this will benefit both the high-quality exploration and production companies as well as the services sector. We believe that certain Fund holdings such as EOG Resources, Inc., Cimarex Energy Co. and Haliburton Co. could materially benefit from this development.

Outlook

Despite the recent underperformance, our longer-term macroeconomic outlook has not changed. Slower-than-desired economic growth should continue to keep interest rates low and favor a more defensive positioning for the Fund overall.

Our sector overweight positions in consumer staples and health care are likely to remain in place. We expect companies to continue to look for attractive acquisition opportunities as a way to increase earnings power through cost and revenue synergies. Another symptom of continued slow growth so late in the recovery is the increased frequency of predictions that the U.S. economy is headed back into recession. We expect these negative views to result in increased volatility like we saw in the first quarter of 2016. We believe that patience likely will be rewarded, as investor mindsets transition from fear to greed and vice versa on a more regular basis. Oil price increases also could help our portfolio, as foreign exchange pressure on U.S. multinational earnings lessens. We believe foreign exchanges could act as a tailwind for U.S. multinational companies over the coming quarters.

Most importantly, we firmly believe that over a multi-year period, stocks will follow investor expectations for long-term earnings power. We continue to implement this belief by owning companies that we think have strong and improving competitive positions as well as underappreciated multi-year earnings catalysts. This belief is fundamental to our philosophy and we believe it has served us well over the past decade.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investments. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The portfolio managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of Ivy Core Equity Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Core Equity Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-9.72%	-8.69%	-5.00%	-9.90%	-3.93%	-4.53%	-3.84%	-3.91%
5-year period ended 3-31-16	7.81%	7.86%	8.26%	7.65%	9.45%	—	—	9.36%
10-year period ended 3-31-16	6.51%	6.28%	6.31%	—	—	—	—	7.35%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	6.17%	7.49%	10.58%	1.95%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Below, Andrew Massie, portfolio manager of the Ivy Cundill Global Value Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Massie has 33 years of industry experience and has managed the Fund since December 2007. Effective March 30, 2016, Jonathan D. Norwood and Richard Y.C. Wong joined Mr. Massie as additional portfolio managers on the Fund.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Cundill Global Value Fund (Class A shares at net asset value)	-12.51%
Ivy Cundill Global Value Fund (Class A shares including sales load)	-17.55%
Benchmark(s) and/or Lipper Category	
MSCI ACWI Value Index (generally reflects the performance of value-oriented securities that represent the global stock market, including emerging markets)	-5.70%
Lipper Global Multi-Cap Value Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-5.34%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Poor performance in volatile markets

For the 12 months ended March 31, 2016, the Fund posted losses and underperformed its benchmark. The largest drivers of underperformance were adverse utilization of forward currency contracts, poor stock selection in the energy sector, and an underweight allocation to the consumer staples sector. Additionally, a lack of exposure to the telecommunication services and utilities sectors negatively impacted the Fund's performance. Conversely, strong stock selection in the consumer discretionary and information technology sectors benefitted the Fund's performance.

From a geographic standpoint, a slight overweight to Japan benefitted performance, while an overweight allocation to South Korea detracted from the Fund's performance. The largest detractor from a geographic standpoint was a lack of exposure to the domestic U.S. market, which was exacerbated by poor stock selection.

Strategies and techniques

The fiscal year was generally challenging for fundamental, deep value investors, particularly in the U.S. market. During the 12 months ended March 31, 2016, the Fund reduced its exposure to interest-rate sensitive stocks such as insurers and banks, with the exception of the Fund's addition of Fairfax Financial Holdings Ltd., a property and casualty and reinsurance company. We also refined energy exposure, exiting exploration and production companies, notably Encana Corp. and the common shares of Chesapeake Energy Corp (Chesapeake). The Fund sold its common shares in Chesapeake to move up the capital structure of Chesapeake, which resulted in the purchase of the company's convertible preferred shares. The sale of Encana resulted in the purchase of U.K.-based Weir plc, a manufacturer of pumps and allied equipment to the energy and minerals industries. Technology and media stocks posted gains and those allocations were trimmed mainly in Europe. The Fund's exposure to South Korea remained largely unchanged, though the Fund sold its relatively small allocation to food, beverage and tobacco stocks. In addition, the Fund reduced its position in Hyundai Motor Co. The Fund added to domestic health care through purchases in McKesson Corp., a pharmaceutical distributor.

Outlook

We believe ongoing volatility in the global equity markets will present opportunities for value managers. In the U.S., a profit recession has loomed as currency headwinds and lower commodity prices continue to pressure energy companies, exporters and multinationals. Further, it appears that operating margins are peaking as labor force capacity tightens. The U.S. domestic economy has continued its slow growth and monetary tightening is now expected to occur at a slower pace this year. This latter point is evidenced by the U.S. Federal Reserve's (Fed) expanding financial lexicon which now includes "downside risks to the global economy" as part of its rationale for slower rate normalization.

Going forward, our view is that lower oil prices will continue to punish U.S. shale producers, but benefit U.S. consumers. As a result, we believe investor sentiment, spending and economic activity will improve. That said, despite the benefit to consumers, lower energy prices are putting tremendous pressure on the budgets of many Organization of the Petroleum Exporting Countries (OPEC) and non-OPEC nations. New capital investment in the energy sector has contracted despite growing global demand. We think that, in the near term, positioning and decisions from OPEC could drive significant volatility. We remain vigilant in the energy sector, seeking to gauge value versus risk.

The U.S. dollar has also pulled back following the Fed's recent dovish message. This could help to reduce foreign exchange headwinds and provide some relief to repatriated foreign earnings. Interest rates also remain historically low on an absolute basis, which we believe will make comparable fixed-return asset classes look unappealing relative to equities. We would classify the overall margin of safety in U.S. equities as moderate, with the most compelling opportunities in financials, health care, industrials and energy.

Internationally, we believe the political risks and mixed economic data out of the European Union and the U.K. should create investment opportunities. In our view, we are seeing better value in more segments of the market, including financials, health care and industrials. China's shift to

a more consumer-driven economy may present opportunities. However, the commodity demand outlook for that country is cloudy. We remain watchful about risks in commodities even as some stocks in this sector seem depressed. In addition, we are mindful of the potential drag emerging markets present from a gradually slowing China.

In summary, we are seeing opportunities in volatile markets. Portfolio construction remains — and we anticipate will remain — concentrated, while seeking to reflect a diversity of value-creation drivers.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. The value of the Fund's shares will change, and you could lose money on your investment.

Value stocks are stocks of companies that may have experienced adverse business or industry developments or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's manager to be undervalued may never reach what the manager believes to be its full value, or such security's value may decrease.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio managers and are current only through the end of the period of the report as stated on the cover. The portfolio managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Cundill Global Value Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Cundill Global Value Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-17.55%	-16.95%	-12.98%	-17.41%	-12.11%	-12.53%	-11.92%	-12.32%
5-year period ended 3-31-16	-0.51%	-0.62%	0.09%	-0.38%	1.18%	—	—	1.01%
10-year period ended 3-31-16	0.35%	0.19%	0.36%	—	—	—	—	1.40%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	-0.63%	0.54%	1.75%	-12.28%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Christopher J. Parker

Below, Christopher J. Parker, CFA, portfolio manager of Ivy Dividend Opportunities Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since August 2014 and has 20 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Dividend Opportunities Fund (Class A shares at net asset value)	–4.65%
Ivy Dividend Opportunities Fund (Class A shares including sales charges)	–10.12%
Benchmark(s) and/or Lipper Category	
Russell 1000 Index (generally reflects the performance of stocks that represent the equity market)	0.50%
Lipper Equity Income Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	–1.48%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Key drivers

The Russell 1000 Index, the Fund's benchmark was roughly flat, and Lipper Equity Income Funds peer group was down slightly over the past fiscal year. During the period, we entered a new chapter with respect to post global financial crisis monetary policy — divergence. Over the course of 2015, the U.S. Federal Reserve (Fed) prepared the market for an eventual increase in the Fed Funds rate, with the first hike occurring at the December meeting. Simultaneously, European policymakers began to make good on a long-standing promise to do “whatever it takes,” commencing a quantitative easing program that drove sovereign rates into negative territory for several nations. This division in policy caused the dollar to rise against the Euro, aiding Eurozone activity while dampening U.S. industrial activity. Adding an incremental variable, China allowed a “controlled” (we use the quotes as it was not well controlled at all) devaluation of the Yuan over the summer of 2015, while moving to alter its currency peg to a trade-weighted basket and away from the dollar. This was one of several unexpected or questionable moves, ranging from fueling a stock market bubble that eventually burst to doubling-down on deficit funded economic stimulus. All of this was done on the part of a central government that was working hard to steer a clearly slowing economy. Finally, a series of competitive devaluations across a number of emerging market nations layered another dimension into the mix. This confluence of actions marks a shift from the past several years when virtually every major central bank was executing some form of stimulus designed to add fuel to the global economy. Now the objective functions and actions of various players have begun to move in differing and sometimes opposing directions. This creates a new policy management dynamic, whereby players must think more deeply about the impact of actions on various other parties, and the response function of those parties when considering the appropriate course of action to achieve their own individual objectives. In our mind, with the global economy at such a sluggish level of growth this increases the risks of a policy error. We believe this increases uncertainty across the system, is likely to drive higher volatility and reduces the odds of higher valuations across equity markets.

The strongest performing sectors over the past year were telecommunications, utilities and consumer staples. These sectors feature a combination of above average dividend yields and reasonably predictable earnings (albeit with a fairly low level of growth in the earnings over time), making them attractive to investors seeking some basic certainty of return in uncertain times. Each of these sectors rose by over 10% over the course of the past fiscal year. In the case of telecommunications and utilities, a large amount of this return was realized in first quarter 2016. In our view, this move was not in response to an improvement in fundamentals, but was instead fueled by the flow of capital to income-generating securities in response to deeper moves into negative rates in Europe and an initial move negative in Japan. Though these sectors generate favorable levels of current income, the Fund has been underweight these areas as we have found valuations underwhelming relative to fundamentals (in particular for certain consumer staples stocks), and opportunities for dividend growth (a key part of our process) to be limited in telecommunications and utilities. If overall corporate earnings growth is materially slower than we expect over a longer duration (and not simply due to sharp negative earnings in energy and the translation drag of a stronger dollar), then our reluctance to participate in this space will have been misplaced.

On the other end of the spectrum, energy was the worst performing sector over the past 12 months, though performance in energy equities has turned positive in the first quarter of 2016. The issues in the energy sector are now well-trodden ground, as are the collateral impacts on the industrials sector. The proverbial tide has now flowed out, revealing what has been hiding below the waterline. While the path to recovery is still uncharted, we have a clear sense of where the unanticipated exposure existed. Additionally, we believe we have now learned the cash flow and earnings break-evens and pain points for the various participants. Within the past several months the banking system has entered a discovery process with respect to energy-related credit losses. The ultimate loss content has not been fully flushed out and is an equation incorporating (amongst many variables) time, any potential double-dip in the price of crude below \$30 (which appears to be the level that creates substantial stress from a credit viewpoint), and the ability of exploration and production (E&P) companies and others to repair balance sheets via secondary equity offerings. The propagation of the downturn in the energy sector onto bank balance sheets was a factor that caused the financials sector to decline over the past fiscal year in spite of the Fed finally raising interest rates at its December meeting. It appears crude has bottomed and is beginning a recovery process, though the durability and pace will be a function of the resilience of global demand and capital discipline on the part of U.S. E&Ps — both of which

are subject to debate. We believe overall recovery in the commodity and in activity levels will be uneven and likely more of a 2017-2018 event, though numerous equities in the space and adjacent areas seem to be discounting something much sooner.

Contributors and detractors

The Fund underperformed its benchmark and peer group for the fiscal year ended March 31, 2016. From a sector allocation viewpoint, the Fund benefited from being underweight energy over the course of the fiscal year. The Fund's overweight in the health care sector and underweights in utilities and telecommunication services negatively impacted performance. Performance in the health care sector was adversely impacted by rising political rhetoric with respect to drug pricing and availability — which was exacerbated by company-specific issues related to pricing activity and possible accounting and internal control issues at Valeant Pharmaceuticals (not a Fund holding). Relative to the benchmark, the Fund was significantly underweight technology, a sector that performed well. However, a fair portion of the universe of technology stocks within the benchmark does not fall within our investable universe (as they do not generate dividends). When adjusted for this factor, technology was a neutral from a sector allocation view.

From an individual stock perspective, McDonald's Corp. was the most favorable contributor to Fund performance. The quick service restaurant chain took significant action under its new CEO to improve operating performance, rationalize costs and manage its capital structure more optimally. Microsoft Corp. also performed well, as the growth in its cloud services business began to gain steam and positively impacted financial results. Philip Morris International, Time Warner Cable and PPL Corp. rounded out the top five relative contributors.

The worst contributors from a relative performance perspective were highlighted by three names in energy: Master Limited Partnership (MLP) holdings Energy Transfer Equity and Markwest Energy Partners, and E&P holding Devon Energy. (These three names are no long Fund holdings). While we were correct in being underweight in energy over the course of the fiscal year, we over-estimated the defensiveness of MLPs and underestimated the degree to which the migration of credit goal posts would impact MLPs. For each of the energy equities alluded to, the sensitivity around leverage and credit was exacerbated by merger activity and/or asset purchases that weakened the future credit profile of each. This dynamic was worsened by a slower than necessarily rationalization of future growth programs in light of the evolving investment and credit landscape across the sector. Citigroup Inc. and Teva Pharmaceuticals were also noteworthy detractors from relative performance over the past fiscal year.

Strategy and outlook

Our outlook for equities remains neutral to cautious. We believe weak or negative earnings growth is likely to persist in the near-term before eventually improving, and valuations could have a hard time increasing due to slow growth and the reappearance of substantial monetary policy uncertainty.

Over the past 6-12 months our view on overall earnings growth has been fairly negative as we felt the impact of the downturn in energy, rising U.S. dollar and slowing global growth would all be negatives for profitability. We remain of a view that earnings growth over the next one to two quarters will be negative to flat at best. The accounting impact of currency is no longer a headwind at current exchange rates, but energy remains a drag for E&Ps, oil services, parts of the industrials complex and now financials as credit costs hit bank income statements. We anticipate a positive inflection in earnings as these headwinds subside later in 2016. Upside drivers to growth look limited beyond cycling against easy comparisons. U.S. corporate spending is back toward the upper band of historical ranges. Thus, barring an acceleration in revenues, we would expect growth in corporate spending to be muted. U.S. consumers have received the benefit of an "energy cost cut," wage data has been favorable and employment trends remain good — though the quality of job creation in this recovery has been mediocre (especially with relatively higher paying jobs in the energy patch having dried up). We believe consumer trends should remain favorable, but are skeptical of a large uptick in spending that could fuel a notable increase in overall corporate earnings.

From a global growth perspective, we remain concerned that economic growth in China could be a source of downside risk given the law of large numbers, declining returns on stimulus and increasing financial leverage across the economy. Trees do not grow to the sky, and trees rooted in leverage sometimes topple. The near-term risk of a devaluation and possible round of competitive responses from others in the region looks to have ebbed, but remains a non-zero risk over time in our minds. Economic activity in Europe is creeping upward from a low level of growth as stimulus, time and improved confidence (off low levels) are having positive effects. Sustainability is still a crucial unanswered question.

Market valuations using a variety of criteria do not appear especially compelling outside of certain sectors within health care. Even when adjusting for sectors and sub-sectors of the market that are generating losses (such as energy), which would mathematically inflate multiples, valuations are not broadly compelling. We believe this combination of fair to elevated valuation metrics and increasingly macro uncertainty will drive volatility within the equity markets and act to dampen the potential for multiple expansion without some mitigation of those macro risk factors. In summary, we have muted expectations at best as earnings growth is sluggish, upside from multiple expansion looks limited and macro risks have re-emerged — even if they have dropped out of the headlines for now.

The Fund's basic objective and strategy remains unchanged. We are seeking to provide investors with an above-average dividend yield, better growth in income than the market as a whole and attractive capital appreciation. To accomplish this objective we employ two broad strategies. The first is to seek companies trading at an above-average yield that also feature a compelling valuation based on cash flow. The combination of these factors typically indicates skepticism regarding some aspect of a company's future prospects, and is a fertile hunting ground for attractive investments. To enhance the return profile of this strategy and incrementally mitigate value trap risk we apply the additional criteria of being able to grow income to shareholders at a faster rate than average rate over time. The second broad strategy centers on companies with the potential to grow their dividend at a

rate well above the market over a multi-year period. We focus on two sub-groups within this strategy. First companies in the midst of a change in the social contract with shareholders whereby capital management and return of capital is being increasingly emphasized. Such a substantial increase in payout drives strong growth in income, and a possibility for a positive re-rating due to a more favorable stance toward shareholders. The second sub-group focuses on rapid dividend growth at a reasonable price. This growth can come from either a durable pace of notably above-average earnings growth, or a combination of strong earnings growth and a steadily increasing payout of earnings to shareholders. We have no prescriptive policy with respect to how the Fund will be positioned across these approaches, beyond the general viewpoint that over time the majority of the Fund's assets are expected to be deployed in the high yield, attractive valuation arena as this is generally the most robust universe of opportunities. However, if at times we find dividend growth focused names feature greater return potential or more attractive fundamental characteristics our approach would skew more toward this direction (though we would generally not expect this area to be the bulk of the Fund's assets over time).

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investments. Dividend-paying instruments may not experience the same price appreciation as non-dividend paying investments. There is no guarantee that the companies in which the Fund invests will declare dividends in the future or that dividends, if declared, will remain at current levels or increase over time. The amount of any dividend paid by the company may fluctuate significantly. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of Ivy Dividend Opportunities Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Dividend Opportunities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-10.12%	-8.79%	-5.26%	-10.08%	-4.27%	-4.87%	-4.16%	-4.53%
5-year period ended 3-31-16	5.13%	5.35%	5.65%	5.04%	6.73%	—	—	6.46%
10-year period ended 3-31-16	4.44%	4.30%	4.34%	—	—	—	—	5.19%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	3.51%	4.71%	9.46%	1.39%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

(A) Listed on an exchange outside the United States.

(B) Rate shown is the yield to maturity at March 31, 2016.

(C) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$326,125	\$ —	\$ —
Short-Term Securities	—	35,491	—
Total	\$326,125	\$ 35,491	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronyms are used throughout this schedule:

ADR = American Depositary Receipts

GTD = Guaranteed

REIT = Real Estate Investment Trusts

See Accompanying Notes to Financial Statements.

Frederick Jiang

Below, Frederick Jiang, CFA, and Jonas M. Krumplys, CFA, portfolio managers of Ivy Emerging Markets Equity Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Jiang has 22 years in the industry and 12 years with the Fund. Mr. Krumplys has 34 years in the industry and two years with the Fund. Effective May 14, 2016, Frederick Jiang will no longer serve as a co-portfolio manager of the Fund.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Emerging Markets Equity Fund (Class A shares at net asset value)	-14.49%
Ivy Emerging Markets Equity Fund (Class A shares including sales charges)	-19.41%
Benchmark(s) and/or Lipper Category	
MSCI Emerging Markets Index (generally reflects the performance of stocks across emerging market countries worldwide)	-12.03%
Lipper Emerging Markets Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-11.54%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Jonas Krumplys

Volatile markets driven by policy makers

Slowing global growth was exacerbated by what many considered to be missteps of policy makers across the globe. In China, policy makers surprised the world with a one-off currency devaluation in August 2015 and a mishandled intervention after crashes in its onshore (A share) stock market both in the summer and at the beginning of 2016. These actions combined with the U.S. Federal Reserve (Fed) taking an on-again, off-again start to raising interest rates caused global equity investors to go through what turned out to be the worst start to a calendar year in many decades. Once investors realized that China was not going to sharply devalue its currency and that the Fed was not going to raise rates dramatically, calm returned to the equity, fixed income, currency and commodity markets. Most global central banks continued to cut interest rates to stimulate demand in their economies. Earlier this year the Bank of Japan followed other European banks into negative interest rate territories. Nearly a quarter of the world's economies are now at below zero interest rates. It is unclear what the unintended consequences may be from these policy moves.

Fund allocations drove performance

The Fund had a negative return for the fiscal year and underperformed its benchmark index and peer group average, both of which also had negative returns. Absolute and relative performance was hurt by overweight positions in Chinese and Indian equities. The issues with policy makers in China and the disappointing pace of economic reforms in these countries led to disappointing performance in both markets. We have subsequently cut back exposure to both.

The Fund was overweight versus the benchmark index in Russian equities (7% of assets under management at year end). That economy has been mired in a deep recession with a high inflation rate. At the trough, the combination of European Union (EU) and U.S. economic sanctions tied to Russia's moves in the Ukraine and the crash in global oil prices pushed GDP growth to mid-single digit declines and inflation rates to the high-teens. Recent figures show a significant improvement in these statistics, with GDP forecast at or near a positive figure by the end of 2016. Inflation has eased to high single digits and we think it is likely to improve through the balance of the year. We also expect the Russian Central Bank to begin lowering interest rates later this year.

We also are overweight Brazilian equities in the Fund (10% of assets under management at year end). The economy is in the second year of a sharp slowdown. The combination of high inflation, weak domestic growth and the inability of the government to implement fiscal reforms would not necessarily lead to strong investment opportunities. However, investor sentiment has shifted well before economic statistics have improved. There may be a significant change to Brazil's prospects as a widespread corruption scandal has put the country's president at risk of impeachment and potentially hundreds of top politicians and corporate executives at risk of criminal charges. Although Brazilian President Dilma Rouseff may survive the first attempt to impeach her, we think the negative information leaked to the press makes it unlikely she will complete her second term in office. We also think the Brazilian equity market and currency market will continue to outperform if there is a change in government in a reasonably short period of time. Depending on how a new government was structured, we believe there is the potential for the economy to begin a slow return to growth and offer longer-term investment opportunities.

We typically have used foreign currency hedges to protect the Fund from losses from the depreciation of local currencies versus the U.S. dollar. We bought the Malaysian ringgit, South African rand and Mexican peso late in the fiscal year. We think these commodity-driven currencies are undervalued and represent attractive investments.

Key contributors to the Fund's performance were Sberbank Russia, Russia's largest bank with dominant shares in retail and corporate banking; Raia Drogasil S.A. (RD), Brazil's largest drugstore chain which has been able accelerate new store openings at prime locations; and Celltrion, Inc., a South Korea-based biotechnology company which has received approvals for biosimilar products in the EU and U.S.

Key detractors to performance were CAR Inc., China's largest auto rental company which generated disappointing fleet growth; Red Star Macalline Group, a developer and operator of malls and retail home improvement outlets; and Larsen & Toubro Ltd, India's largest infrastructure and engineering firm. At the end of the fiscal year, Sberbank, Raia Drogasil and Celltrion were among the top ten holdings of the Fund. CAR Inc. and Red Star Macalline were not held as of the period's end. The Larsen & Toubro position was substantially decreased.

Outlook

As has been the case since the global financial crisis, geopolitics and central bank policy moves are likely to drive market performance. Among the key issues to follow for the balance of the year are the potential impeachment of Brazil's president, the potential for the U.K. to vote to leave the EU, the U.S. presidential election in November, the potential for unintended consequences of negative interest rates in Japan and across Europe, the question of whether the Organization of Petroleum Exporting Countries and Russia can stabilize global energy markets, and concerns about the handling of a wave of refugees and migrants into Europe and its neighbors.

We have positioned the Fund for a low-growth global environment. For the near term, we believe that the worst is behind us for a potential currency war and energy sector collapse. We will continue to emphasize investments in companies that have strong local market positions.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. The value of the Fund's investments, as measured in U.S. dollars, may be unfavorably affected by changes in foreign currency exchange rates and exchange control regulations.

Investments in countries with emerging economies or securities markets may carry greater risk than investments in more developed countries. Political and economic structures in many such countries may be undergoing significant evolution and rapid development, and such countries may lack the social, political and economic stability characteristics of more developed countries. Investments in securities issued in these countries may be more volatile and less liquid than securities issued in more developed countries. These and other risks are more fully described in the Fund's prospectus.

In early 2014, economic sanctions were imposed on Russian officials and banks following Russia's annexation of the Ukrainian territory of Crimea. Such events and resulting sanctions could negatively affect the value of the Fund's investments in Russian securities.

The Shanghai-Hong Kong Stock Connect Program (Connect Program) is subject to quota limitations, and an investor cannot purchase and sell the same security on the same trading day, which may restrict the Fund's ability to invest in China A-shares through the Connect Program and to enter into or exit trades on a timely basis. The Shanghai market may be open at a time when the Connect Program is not trading, with the result that prices of China A-shares may fluctuate at times when the Fund is unable to add to or exit its position. Only certain China A-shares are eligible to be accessed through the Connect Program. Such securities may lose their eligibility at any time, in which case they could be sold, but could no longer be purchased through the Connect Program.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The indexes noted are unmanaged, include reinvested dividends and do not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Emerging Markets Equity Fund's performance.

Robert E. Nightingale

Below, Robert E. Nightingale, portfolio manager of the Ivy European Opportunities Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Nightingale has managed the Fund since October 2013, and he has 20 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy European Opportunities Fund (Class A shares at net asset value)	-9.62%
Ivy European Opportunities Fund (Class A shares including sales load)	-14.82%
Benchmark(s) and/or Lipper Category	
MSCI Europe Index (generally reflects the performance of securities representing the European stock market)	-8.44%
Lipper European Region Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-5.76%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

A down year for European markets in U.S. dollars

Global equity markets were volatile in the fiscal year ended March 31, 2016. The global recovery experienced setbacks throughout the year, though we believe the gradual recovery should continue. Global growth for 2016 is expected to be weaker and more uneven than earlier forecasts. In the developed markets, the U.S. is emerging as the main driver for global growth, followed by the U.K. and the eurozone. For the fiscal year, European markets performed poorly, with the Fund's benchmark index down more than 8%. All sectors in the benchmark posted losses for the fiscal year except for consumer staples.

After many false starts, in the fourth quarter of 2015 the U.S. Federal Reserve (Fed) raised rates for the first time since June 2006 despite lackluster economic data. Expectations are high for an additional rate increase in 2016, though the Fed has downplayed the idea of more than one additional rate increase over the course of the year. As a result, the U.S. dollar was mixed relative to major currencies — weaker to the euro and yen but stronger to the British pound. This is not surprising as markets were discounting the change in interest rate policy by the Fed. Monetary policy in Europe and Japan remain very aggressive. Policy heads suggest they are prepared to do more, though the market was disappointed with European Central Bank (ECB) President Mario Draghi's tempered announcement during the December ECB meeting. The ECB lowered deposit rates to -0.3% and expanded its quantitative easing programs. In our opinion, the ECB's monetary posturing is the glue stabilizing the European Union (EU) markets. That said, potential turmoil remains as Britain set June 23 as the date for a referendum on the country's membership in the EU. In early 2015, the chances of a "Brexit" — Britain departing from the EU — seemed remote. Today, largely due to Europe's migration crisis and regulation concerns, the chances of a Brexit have increased. We believe the European market was hurt from a lack of real momentum in reforms and stimulus from the eurozone. This left the market embedded with slow gross domestic product (GDP) growth and political uncertainty in Spain, Italy, France and Germany.

The Middle East was the center of geopolitical strife during the fiscal year. Refugees fleeing the region continued to pour into Europe, while ISIS and other militant Middle Eastern groups were behind deadly attacks on civilians around the world, notably in Europe (Paris and Brussels).

China continues to be a significant driver of investor concern as uncertainty abounds in several areas. Key concerns include the economy's overall global competitiveness; the ability to rotate to a service- and consumption-based economy; and the sustainability of a controlled exchange rate. China's currency was granted SDR (Special Drawing Rights) status by the International Monetary Fund. The country also announced that it would be adjusting its currency from a dollar peg to a "basket" peg, which should help its competitiveness as the dollar strengthens with rising interest rates.

The decline in energy prices that started mid-year 2014 gathered steam during the fiscal year, as robust North American production, in addition to the recovery of oil supplies in OPEC nations (Iraq and now Iran), has overwhelmed tepid global demand for the commodity. The continued downgrading of demand growth through the year, along with OPEC's unwillingness to support price levels by curtailing output, led to the rapid decline in price levels. While the sharp fall in oil prices adversely affected the energy sector and oil-producing countries, we believe this will aid consumer-based economies/countries if the price stays at a relatively low level for an extended period.

Portfolio strategy — hits and misses

The Fund underperformed its benchmark and Lipper peer group for the fiscal year ended March 31, 2016. The Fund's sector allocation benefitted performance, with an underweight allocation to the poor-performing financial sector posting large relative gains. Overweight allocations to industrials and information technology aided performance as well. On the other hand, an underweight allocation to consumer staples detracted from performance for the period, as did the Fund's utilization of forward currency contracts. During the fiscal year, the Fund utilized currency hedges to the U.S. dollar ranging from 10-35% of Fund assets in an effort to protect the Fund against a weaker euro and British pound relative to the U.S. dollar. In our view, relatively stronger U.S. growth will likely initiate the further rise of interest rates in the U.S. In addition, the "Brexit" vote could weaken the euro if the referendum results in a move to leave the EU.

Stock selection helped the Fund's performance, with stock picks in industrials, consumer discretionary and consumer staples more than offsetting poor selection in energy (exploration and production) and health care. The Fund's country allocations neither benefitted nor detracted to performance, though strong stock selection in France and the U.S. helped performance.

Positioning

As the fiscal year progressed, we slightly increased our weighting to more defensive sectors versus the benchmark due to slow global growth concerns in China and volatility in credit markets. The Fund increased its allocation to consumer staples and telecommunication services at the expense of information technology and financials. The Fund also lowered its exposure to Switzerland and Italy, while increasing exposure to France and the Netherlands. From a country allocation standpoint, we continue to be overweight French stocks, as we feel investor sentiment will improve and stocks should rebound if business conditions recover in France and in the rest of the world.

The Fund remains overweight industrials and information technology, while underweight energy, financials and materials. We believe our overweight positions provide solid growth prospects, while our underweight allocations tend to have high relative valuations or poor fundamentals. In the industrial sector, we have invested in companies we believe should benefit from the ongoing recovery in Europe and continued growth in the U.S. In information technology, we believe semiconductor chips for smart cars and additional automation, as well as online and mobile payment systems and security, offer the prospect of long-term growth. We are maintaining our underweight position in financials as we believe there are challenges facing European financials due to increased regulation and extremely low interest rates. However, we recognize the low valuations in the area and may reduce our underweight allocation. In our view, our underweight allocation to materials tends to have high relative valuations and poor fundamentals as the emerging-market growth engine sputters.

As calendar year 2016 progresses, we intend to add to holdings we believe will realize secular growth or have better business models in this slow-growth world. In Europe, we expect slow but steady economic growth, which could hinder earnings per share growth. As a result, many of our holdings will have exposure to the faster growing U.S.

Outlook: opportunities exist — some progress, but issues remain

We think global economic growth will remain slow and face additional headwinds by slower-than-anticipated emerging-market growth. We believe monetary policy is likely to remain aggressive for the foreseeable future, but to a lesser extent in the U.S. We think the Fed will continue to raise interest rates in 2016, which will keep the markets on edge. We, as well as many investors, are concerned how the U.S. election will affect the stock market, as policies of the candidates vary on many issues.

Economic and political issues continue to simmer in Europe, which could result in market fluctuations. However, we believe the European economy is on firmer footing and will likely see steady slow expansion over the next 24 months. We are concerned about the recent terrorist attacks and the effects the large refugee influx will have on European politics and the economy. The constant drag of over-indebted governments in southern Europe and the U.K. should limit any fiscal stimulus to the economy. In our view, the European market has started to reflect this reality. We continue to follow policies stemming from Europe, including stimulation, reforms and regulation measures from foreign governments and the ECB. We believe the U.K. referendum on remaining in the EU will be close and will likely put pressure on the currency as the U.K. is running current account and government deficits.

We continue to target sectors, countries and stocks we believe best reflect our mixed economic outlook. We believe lower energy prices will benefit consumer balance sheets. We believe the odds of a recession are low, as there has not been a boom in spending, excluding some property markets around the world. We remain cautious on commodity sensitive areas until we see emerging markets begin to reaccelerate. In our view, the strongest long-term GDP growth should still occur in emerging markets and the U.S. due to better demographics. In an effort to capture this growth, we intend to continue investing in U.S. firms or European multinationals having exposure to the U.S. and/or emerging markets.

We believe China is in a hard landing, and its multi-year rebalancing to a more consumer-based economy, as well as its anticorruption efforts, need to be monitored. In our view, these changes could have lasting impacts throughout the global marketplace in shaping GDP growth, commodity prices and multinational profits based in Europe and the U.S.

As always, we remain focused on stocks that we consider higher quality or improving, which means they offer growth potential and are positioned well in their industries.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. The value of the Fund's investments, as measured in U.S. dollars, may be unfavorably affected by changes in foreign currency exchange rates and exchange control regulations. Focusing on a single geographic region involves increased currency, political, regulatory and other risks. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy European Opportunities Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy European Opportunities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E ⁽⁵⁾	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-14.82%	-14.23%	-10.24%	-14.57%	-9.24%	-9.77%	-9.11%	-9.52%
5-year period ended 3-31-16	0.77%	0.64%	1.31%	1.20%	2.53%	—	—	2.26%
10-year period ended 3-31-16	0.12%	-0.05%	0.08%	—	—	—	—	1.03%
Since Inception of Class through 3-31-16 ⁽⁶⁾	—	—	—	-1.65%	-0.85%	3.28%	-3.77%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) Class E shares are not currently available for investment.

(6) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Mark G. Beischel

Below, Mark G. Beischel, CFA, portfolio manager of Ivy Global Bond Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Beischel has been a manager of the Fund since 2008 and has 22 years of industry experience.

Fiscal Year Performance

For the 12 months ended March 31, 2016

Ivy Global Bond Fund (Class A shares at net asset value)	-1.54%
Ivy Global Bond Fund (Class A shares with sales charge)	-7.24%
Benchmark(s) and/or Lipper Category	
Barclays Multiverse Index (generally reflects the performance of the global bond market)	4.36%
Lipper Global Income Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	0.08%

Please note that Fund returns include applicable investment fees and expenses, whereas the index returns do not include any such fees. The performance discussion below is at net asset value.

Performance

The Ivy Global Bond Fund underperformed its Lipper average and its benchmark index for the year ending March 31, 2016. With 93% of its assets in the U.S. dollar, the Portfolio's performance was hindered relative to the indexes, as developed market currencies appreciated vs. the dollar over the year. The euro and yen had a 6.0% and 6.7% return, respectively, as the market priced in a less aggressive Federal Open Market Committee (FOMC). The Fund included a slight exposure to derivatives through the use of futures and currency forwards hedging. Together, these resulted in a slight loss. Additionally the Fund's shorter effective duration relative to the indexes hurt the performance, as the term structure of interest rates were sharply down with the Negative Interest Rate Policies (NIRP) enacted by the European Central Bank (ECB) and Bank of Japan (BOJ). Finally, the Fund's overweight exposure to credit hurt its relative performance, with credit spreads widening over the course of the year.

The Fund's performance was enhanced by its underweight exposure in Emerging Market (EM) currencies. Asian and Latin American commodity currencies underperformed the U.S. dollar as the markets priced in a slowing China and the lower global commodity prices. The portfolio return was also enhanced by the large portion of its investments in cash and U.S. Treasuries that acted as a buffer from the volatility in the currency, credit, and rate markets.

Slower global recovery

The global recovery has experienced setbacks over the past year. Although we believe the gradual recovery will continue, global growth in 2016 is now expected to be weaker and more uneven than earlier forecasts. In developed markets, the U.S. is emerging as the main driver for global growth followed by the United Kingdom (U.K.), Eurozone, and Japan. The FOMC started the normalization process of raising interest rates in December. Their projections for more rate moves were more aggressive than market expectations. This process led to a tightening in the global financial conditions. The U.S. dollar strengthened, credit spreads widened, and equity prices fell. Chairwoman Yellen appeased the market in February 2016 with a more dovish interpretation of the economic data and a reduction of estimated rate increases for the rest of the year.

The U.K. outperformed Europe with a 2.4% growth rate in 2015. There is enough momentum to sustain this rate throughout 2016. After much speculation about the Bank of England (BOE) raising rates in the first quarter of 2015, the market began discounting a rate hike in the second half of the year. Most participants feel that the BOE will wait and start their normalization process after the Fed raises its policy rate. Regardless of when the hikes commence, officials have emphasized that the pace of normalization in the U.K. is likely to be gradual as well. "Brexit" (British exit) fears are starting to work their way into U.K. securities, as the market tries to price the potential of the U.K. leaving the European Union (EU).

In the euro area, the ECB is struggling with weaker-than-expected growth and inflation expectations. ECB President Mario Draghi's most recent announcement of purchasing corporate credit and deemphasizing NIRP (Negative Interest Rate Policy) allows the central banks to move away from the controversial "Beggar thy neighbors" policies.

In China, the economy's potential growth rate is slowing significantly. The government's anti-corruption policy has created an atmosphere of "fear". Government officials are delaying any major projects because of the fear of reprisals from this campaign. Additionally, with the emphasis shifting towards reform, higher tolerance for lower growth will be allowed in the short run. Officials now speak about a "new normal" of slower growth, but they would like to hold growth close to 7%. The impact of a slowing China in global commodities has been painful, to say the least. The most recent announcement of reforming the currency's value to a "basket" of currency versus a "peg" to the U.S. dollar has capital markets anticipating a devaluation of the currency over the next few years.

And finally, the economic and political situation in Brazil continues to offer concern. With the deterioration of the energy markets and downgrade of the sovereign, estimates for 2016 gross domestic product in the country are -4%. In addition, the congress is starting the political process of impeaching President Dilma Rousseff.

Seeking low volatility

Amid this volatility, we are currently maintaining a low duration in the Fund and have built what we believe to be an adequate level of liquidity. We believe shorter duration will enable the Fund to focus on higher-yielding corporate bonds, while greater liquidity will allow us to be more responsive to changing market environments.

We continue to focus on maintaining what we believe to be proper diversification for the Fund. The Fund has the opportunity to invest in different securities, sectors, countries and currencies. This flexibility allows us to seek less volatility with a reasonable yield that we believe will reward investors over the longer term.

Given the volatility and uncertainty in some global markets, the Fund's majority of currency exposure remains in the U.S. dollar. We believe there will be better opportunities to add foreign currency bonds to the portfolio going forward, especially in the emerging markets.

We continue to search for value in the corporate bond space. Some of the best returns have been, and we think will continue to be, from emerging market bonds. There will be more opportunities to redeploy liquidity due to the volatility associated with Washington's politics and the Fed's normalization of interest rates.

Looking ahead

Given our expectation of slow growth globally in 2016, we expect interest rates to remain low overall. The Fed has started the normalization process and will gradually increase the policy rates as warranted by the economic data. The short end of the Treasury yield curve (five years and in) is expected to be less volatile due to the Fed's commitment to low policy rates. However, longer-term Treasury rates are expected to be more volatile and subject to market emotions regarding fiscal and monetary policies. The structural change in the financial markets has led us to build up more liquidity in the portfolio. Wall Street's incentives to carry high inventory levels of corporate bonds have been reduced by higher capital requirements. As a result, market liquidity has been reduced and there are more opportunities for dislocations in corporate bonds going further.

The Eurozone's growth outlook has stagnated. Macroeconomic adjustments are still underway in the peripheral countries, and the debt overhang remains a major impediment to economic activities. The euro area is still dependent on the global economic environment and remains vulnerable to any external shock. Geopolitical risks remain elevated; the most recent terrorist attacks in Paris have brought the surging refugee situation into question and will lead to more discussions about the open border environment which is the crux of the EU project.

Growth in emerging market economies remains generally lackluster, albeit with large regional differences. Despite China's loss of momentum, the rest of EM Asia is holding up well, while Latin America remains below trend and Europe, the Middle East and Africa suffer from a weaker Europe and geopolitics. The wild card will be the price of commodities going forward. Brazil is confronting a major scandal with Petrobras that has left investors questioning its transparency and corporate governance. The company has lost a lot of credibility from the capital markets with its inability to manage the complex capital spending program that it initiated 3 years ago.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations.

The Fund invests in derivative instruments, primarily total return swaps, futures on indexes and options, both written and purchased, in an attempt to increase exposure to various sectors and markets or to hedge market risk. Such investments involve additional risks, as the fluctuations in the values of the derivatives may not correlate perfectly with the overall markets or with the underlying asset from which the derivative's value is derived.

Fixed income securities are subject to interest rate risk and, as such, the net asset value of the Fund may fall as interest rates rise. These and other risks are more fully described in the fund's prospectus.

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (GinnieMae), are backed by the full faith and credit of the U.S. government. However, other U.S. government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB), are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Global Bond Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Global Bond Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-7.24%	-6.11%	-2.39%	-1.39%	-2.02%	-1.30%	-1.54%
5-year period ended 3-31-16	0.07%	0.30%	0.47%	1.49%	—	—	1.24%
10-year period ended 3-31-16	—	—	—	—	—	—	—
Since Inception of Class through 3-31-16 ⁽⁵⁾	1.67%	1.66%	1.66%	2.67%	-0.53%	-2.72%	2.43%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-4-08 for Class A shares, 4-4-08 for Class B shares, 4-4-08 for Class C shares, 4-4-08 for Class I shares, 12-19-12 for Class R shares, 7-31-14 for Class R6 shares and 4-4-08 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

*Not shown due to rounding.

(A) Principal amounts are denominated in the indicated foreign currency, where applicable (BRL - Brazilian Real, COP - Columbian Peso and RUB - Russian Ruble).

(B) Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2016 the total value of these securities amounted to \$83,589 or 46.0% of net assets.

(C) Non-income producing as the issuer has either missed its most recent interest payment or declared bankruptcy.

(D) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.

(E) Other Government Securities may include emerging markets sovereign, quasi-sovereign, corporate and supranational agency and organization debt securities.

(F) Interest-only security. Amount shown as principal represents notional amount for computation of interest.

(G) Rate shown is the yield to maturity at March 31, 2016.

(H) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following forward foreign currency contracts were outstanding at March 31, 2016:

	Currency to be Delivered	Currency to be Received	Settlement Date	Counterparty	Unrealized Appreciation	Unrealized Depreciation	
British Pound	1,500	U.S. Dollar	2,171	4-26-16	Barclays Capital, Inc.	\$16	\$—

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3

Robert E. Nightingale

Below, Robert E. Nightingale, portfolio manager of the Ivy Global Equity Income Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Nightingale has managed the Fund since its inception in June 2012, and he has 20 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Global Equity Income Fund (Class A shares at net asset value)	-5.22%
Ivy Global Equity Income Fund (Class A shares including sales load)	-10.65%
Benchmark(s) and/or Lipper Category	
MSCI World High Dividend Yield Index (generally reflects the performance of equities (excluding REITs) with higher-than-average dividend yields that are both sustainable and persistent)	0.22%
Lipper Global Equity Income Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-2.38%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

A volatile year

Global equity markets were volatile in the fiscal year ended March 31, 2016. The global recovery experienced setbacks throughout the year, though we believe the gradual recovery should continue. Global growth for 2016 is expected to be weaker and more uneven than earlier forecasts. In the developed markets, the U.S. is emerging as the main driver for global growth, followed by the U.K. and the eurozone. The Fund's benchmark, the MSCI World High Dividend Yield Index, was relatively flat (in U.S. dollars) for the year, returning 0.22%. The Fund posted subpar performance, underperforming the benchmark by more than 5%.

After many false starts, in the fourth quarter of 2015, the U.S. Federal Reserve (Fed) raised rates for the first time since June 2006 despite lackluster economic data. Expectations are high for an additional rate increase in 2016, though the Fed has downplayed the idea of more than one additional rate increase over the course of the year. As a result, the U.S. dollar was mixed relative to major currencies — weaker to the euro and yen but stronger to the British pound. This is not surprising as markets were discounting the change in interest rate policy by the Fed. Monetary policy in Europe and Japan remain very aggressive. Policy heads suggest they are prepared to do more, though the market was disappointed with European Central Bank (ECB) President Mario Draghi's tempered announcement during the December ECB meeting. The ECB lowered deposit rates to -0.3% and expanded its quantitative easing programs. In our opinion, the ECB's monetary posturing is the glue stabilizing the European Union (EU) markets. That said, potential turmoil remains as Britain set June 23 as the date for a referendum on the country's membership in the EU. In early 2015, the chances of a "Brexit" — Britain departing from the EU — seemed remote. Today, largely due to Europe's migration crisis and regulation concerns, the chances of a Brexit have increased.

China continues to be a significant driver of investor concern as uncertainty abounds in several areas. Key concerns include the economy's overall global competitiveness; the ability to rotate to a service and consumption based economy; and the sustainability of a controlled exchange rate. China's currency was granted SDR (Special Drawing Rights) status by the International Monetary Fund. The country also announced it would be adjusting its currency from a dollar peg to a "basket" peg, which should help its competitiveness as the dollar strengthens with rising interest rates.

The Middle East was the center of geopolitical strife during the fiscal year. Refugees fleeing the region continued to pour into Europe, while ISIS and other militant Middle Eastern groups were behind deadly attacks on civilians around the world, notably in Europe (Paris and Brussels).

The decline in energy prices that started mid-year 2014 gathered steam during the fiscal year as robust North American production, in addition to the recovery of oil supplies in OPEC nations (Iraq and now Iran), has overwhelmed tepid global demand for the commodity. The continued downgrading of demand growth through the year, along with OPEC's unwillingness to support price levels by curtailing output, led to the rapid decline in price levels. While the sharp fall in oil prices adversely affected the energy sector and oil-producing countries, we believe this will aid consumer-based economies/countries if the price stays at a relatively low level for an extended period.

Portfolio strategy — hits and misses

The Fund underperformed its benchmark and Lipper peer group for the fiscal year ended March 31, 2016, with the last quarter in the year providing the vast majority of the underperformance. Weak stock selection and currency hedges drove underperformance. In particular, security selection in financials, utilities, health care and energy were key contributors to underperformance and offset solid stock selection in materials and industrials. Additionally, the Fund's overweight allocations to Europe contributed to relative underperformance. In our view, U.S. dividend stocks remained relatively more expensive to comparable international stocks over the course of the year. As such, we purchased European stocks we believed possessed cheaper valuations, higher dividend yields and similar earnings growth. We assumed the U.S. dollar would continue to strengthen relative to European currencies. Top detractors to performance were Abengoa Yield Plc, a U.S. listed yield company with assets disseminated from the

Spanish parent, and Crescent Point Energy, a Canadian oil stock. The Fund no longer holds Abengoa Yield Plc or Crescent Point Energy. Top individual contributors to performance included Marine Harvest ASA, a Norwegian-based salmon fish farmer and Taylor Wimpey plc, a U.K.-based house builder.

During the year, the Fund utilized currency hedges to the U.S. dollar ranging from 10-35% of Fund assets. The Fund's hedges to the euro, yen and Australian dollar hurt performance as the year progressed.

Positioning

As the fiscal year progressed, we slightly increased our weighting to more defensive sectors versus the benchmark due to slow global growth concerns in China and volatility in credit markets. The Fund increased its allocation to consumer staples, energy and telecommunication services at the expense of industrials and financials. The Fund also lowered its exposure to Switzerland, Japan and the eurozone, while increasing exposure to the U.S. and the U.K. The Fund's cash allocation remained relatively stable over the course of year, hovering around 1%. The Fund's average dividend yield is around 4.3%, which is above the benchmark index.

The Fund's largest sector overweights include consumer discretionary and telecommunication services where we continue to find companies we believe provide good dividend yield and growth prospects. In our view, our underweight allocations to energy and information technology tend to have high relative valuations and poor fundamentals as the emerging-market growth engine sputters.

As calendar year 2016 progresses, we intend to add to holdings that we believe should sustain a solid dividend in a slow-growth world. In Europe, we expect slow but steady economic growth and are targeting companies with strong global growth prospects. We believe this should lead to steady or slowly growing dividends with earnings. The Fund has maintained its overweight allocation in France as we continue to find large cap, quality firms that pay good dividends and offer recovery or growth potential. In Asia, we eliminated our overweight to Japan, due to our belief that governmental reforms are not being implemented with enough urgency to offset the grinding impact of an aging population. The Fund ended the fiscal year with a 0% allocation to emerging markets, though a portion of its developed market exposure is tied indirectly to emerging-market economies.

Outlook — Opportunities exist, but issues remain

We think global economic growth will remain slow and face additional headwinds by slower-than-anticipated emerging-market growth. We believe monetary policy is likely to remain aggressive for the foreseeable future, but to a lesser extent in the U.S. We think the Fed will continue to raise interest rates in 2016, which will keep the markets on edge. We continue to look at U.S. dividend-paying companies, as firms in a slower growth world accompanied by lower interest rates may see value in an increased dividend. We, as well as most investors, are concerned how the U.S. election will affect the stock market, as policies of the candidates vary on many issues.

Economic and political issues continue to simmer in Europe, which could result in market fluctuations. However, we believe the European economy is on firmer footing and will likely see steady slow expansion over the next 24 months. We are concerned about the recent terrorist attacks and the effects the large refugee influx will have on European politics and the economy. The constant drag of over-indebted governments in southern Europe and the U.K. should limit any fiscal stimulus to the economy. In our view, the European market has started to reflect this reality. We continue to follow policies stemming from Europe, including stimulation, reforms and regulation measures from foreign governments and the ECB. We believe the U.K. referendum on remaining in the EU will be close and will likely put pressure on the currency as the U.K. is running current account and government deficits.

We continue to target sectors, countries and stocks we believe best reflect our mixed economic outlook. We believe lower energy prices will benefit consumer balance sheets. We believe the odds of a recession are low as there has not been a boom in spending, excluding some property markets around the world. We remain cautious on commodity sensitive areas until we see emerging markets begin to reaccelerate. In our view, the strongest long-term gross domestic product (GDP) growth should still occur in emerging markets and the U.S. due to better demographics. In an effort to capture this growth, we intend to continue investing in U.S. firms or European multinationals having exposure to the U.S. and/or emerging markets.

We believe China is in a hard landing, and its multi-year rebalancing to a more consumer-based economy as well as its anticorruption efforts need to be monitored. In our view, these changes could have lasting impacts throughout the global marketplace in shaping GDP growth, commodity prices and multinational profits based in Europe and the U.S.

As always, we remain focused on stocks with solid dividend yields, and continue to look for companies that we consider to be of above-average quality and well positioned in their industries throughout the world.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. The value of the Fund's investments, as measured in U.S. dollars, may be unfavorably affected by changes in foreign currency exchange rates and exchange control regulations. Focusing on a single geographic region involves increased currency, political, regulatory and other risks. These risks are magnified in emerging markets.

Dividend-paying stocks may fall out of favor with investors and underperform non-dividend paying stocks and the market as a whole. In addition, dividend-paying companies may not pay dividends in the future; such dividends, if declared, may not remain at current levels or increase over time. The amount of any dividend the company may pay may fluctuate significantly. Dividend-paying stocks can decline in value when interest rates rise; this risk may be greater during the current period of historically low interest rates. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Global Equity Income Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Global Equity Income Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-10.65%	-9.40%	-5.83%	-4.96%	-5.46%	-4.74%	-5.15%
5-year period ended 3-31-16	—	—	—	—	—	—	—
10-year period ended 3-31-16	—	—	—	—	—	—	—
Since Inception of Class through 3-31-16 ⁽⁵⁾	8.31%	8.62%	9.27%	10.38%	6.43%	-0.53%	10.10%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 6-4-12 for Class A shares, 6-4-12 for Class B shares, 6-4-12 for Class C shares, 6-4-12 for Class I shares, 12-19-12 for Class R shares, 7-31-14 for Class R6 shares and 6-4-12 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Sarah C. Ross

Below, Sarah C. Ross, CFA, portfolio manager of the Ivy Global Growth Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Ms. Ross has 20 years of industry experience and has managed the Fund since August 2014.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Global Growth Fund (Class A shares at net asset value)	-6.12%
Ivy Global Growth Fund (Class A shares including sales load)	-11.52%
Benchmark(s) and/or Lipper Category	
MSCI World Index (generally reflects the performance of securities markets around the world)	-3.45%
Lipper Global Large-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-2.33%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Economic uncertainty dominates markets

Global equity markets ended lower for the fiscal year ended March 31, 2016, as global gross domestic product (GDP) and corporate earnings growth continued to slow. Incremental monetary policy efforts in Japan and elsewhere yielded minimal results, giving rise to the concern that governments have fewer options at their disposal to affect economic stimulus. In particular, China faced a significant slowdown in economic growth as a result of the Chinese government's focus on an aggressive anti-corruption campaign. As a result, China's equity markets underperformed during the fiscal year. Weakness in the region negatively impacted global industrials, high-end luxury and many multinationals with significant Chinese exposure. Europe faced uncertainty as well with the upcoming vote in the U.K. to possibly exit the European Union. Latin American markets were materially negative for the 12-month period, despite a significant rally in the last quarter of the period. Political risks and significant commodity exposures (early in the 12-month period) negatively impacted the region. Most of Asia and Latin America underperformed, including China and Brazil, despite an emerging-market recovery in the last quarter of the fiscal year. Given macroeconomic pressures, we do not think it is surprising that larger, more established U.S. companies outperformed the broader global equity markets.

Global consumer-oriented companies (particularly staples, non-luxury and technology) fared much better than the broader market. Commodities took a significant hit from the slowdown in fixed-asset investment in China. During the fiscal year, energy underperformed (despite a last quarter rally), along with materials, financials and health care. Outperforming sectors included consumer staples, utilities, telecommunications and information technology.

Performance for the Year

The Fund underperformed its benchmark, the MSCI World Index, for the fiscal year. While sector allocation was a positive, negative stock selection and the negative impact of currency hedges more than offset the positives. Most of the pressure on performance came in the last quarter of the 12-month period when quality growth significantly underperformed the broader market. Stock selection in financials, industrials and information technology detracted from performance. While stock selection in financials hurt performance, an underweight allocation in both the poor-performing financial and energy sectors was a slight contributor.

Outlook

Despite the backdrop of a weakening global economy, we believe there are opportunities for growth within pockets of the market. We continue to favor the middle-income consumer globally with most of our consumer exposure in the U.S. and China. Unemployment in the U.S. is as low as it has been since the financial crisis, and consumers continue to spend on discretionary items including home improvement. In China, while luxury goods are under intense pressure due to the anti-corruption campaign, demand for household items continues to increase. We believe the loosening of the one child policy could be another boost to incremental household spending. We prefer exposure to consumer areas that have an incremental boost from secular share gains such as the shift to online retailing from bricks and mortar as well as the secular shift in many regions towards travel. We remain underweight in energy and materials. We believe health care can offer sustainable earnings growth in this uncertain environment.

Despite uncertainties in the market, we believe our portfolio of strong global growers with sustainable competitive advantages and unique products that serve large end-markets can continue to drive shareholder value over time.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Global Growth Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Global Growth Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-11.52%	-10.74%	-6.79%	-11.27%	-5.73%	-6.32%	-5.61%	-6.00%
5-year period ended 3-31-16	3.31%	3.32%	3.69%	3.57%	4.93%	—	—	4.66%
10-year period ended 3-31-16	3.22%	2.98%	2.89%	—	—	—	—	3.95%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	2.10%	3.01%	5.03%	-1.50%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

W. Jeffery Surles

Below, W. Jeffery Surles, CFA, Ivy Global Income Allocation Fund manager, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Surles has managed the Fund since June 2012 and has 14 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Global Income Allocation Fund (Class A shares at net asset value)	-5.74%
Ivy Global Income Allocation Fund (Class A shares including sales load)	-11.16%
Benchmark(s) and/or Lipper Category	
Barclays Multiverse Index (generally reflects the performance of fixed-income securities that represent the global bond market)	4.37%
MSCI World High Dividend Yield Index (generally reflects the performance of equities with higher-than-average dividend yields that are both sustainable and persistent)	0.22%
60% MSCI World High Dividend Yield / 40% Barclays Multiverse (generally reflects the performance of equities with higher-than-average dividend yields that are both sustainable and persistent and fixed-income securities that represent the global bond market)	2.05%
Lipper Flexible Portfolio Funds (generally reflects the performance of the universe of funds with similar investment objectives)	-5.36%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value. Multiple indexes are present because the Fund invests in multiple asset classes.

Market Review

This fiscal year was marked by international equity markets generally underperforming their U.S. counterparts. Much of this came late in the fiscal year when major central banks outside of the U.S. embarked further down the path of extraordinary monetary easing. The Bank of Japan (BOJ) surprised markets by introducing negative interest rates, as the European Central Bank (ECB) took rates further into negative territory and stepped up both its asset purchase program and liquidity provisions. Unlike previous rounds of monetary easing, which usually produced rallies in equity market prices, the additional rounds of stimulus were instead met by skepticism about the overall effectiveness of the monetary policy. Conversely, developed market yield curves have rallied in some cases to unprecedented levels as investors seek safer asset classes in the face of increasing uncertainties. The one exception to this in fixed income markets is credit, especially riskier parts of the credit markets. High-yield credit in particular was characterized by large amounts of volatility and underperformance in December around the Federal Reserve's (Fed) first interest rate increase in almost ten years.

Fund Performance

The Fund materially underperformed its blended benchmark during the fiscal year. Both the equity and fixed income portions of the portfolio underperformed their benchmarks, and asset allocation added to underperformance. Our underperformance was particularly acute on the equity side, where returns were materially negative even as the benchmark posted a slightly positive return for the fiscal year. While the fixed income portion also underperformed, it still managed a positive return for the year. While we correctly abandoned our overweight allocation in equities in November in favor of a more neutral asset allocation to the benchmark, our underweight to fixed income resulted in the Fund's asset allocation slightly detracting from performance during the fiscal year as well.

More specifically with respect to equities, given the income orientation of the Fund, we have long held high-yield-generating securities such as publically traded Real Estate Investment Trusts ("REITs"), yieldco's and limited liability companies, which differ from traditional equities as part of the equity portfolio. These types of investments usually have stable cash-flowing assets, which are leveraged with debt, allowing them to pay out high cash-flow streams. The Fund had anywhere from 6-10 percent of its assets invested in these types of securities during the fiscal year. Around the time of the Fed's interest rate increase in December, any asset which had a small amount of equity value sitting on a decent amount of debt, regardless of cash-flow stability, began to materially underperform as credit markets became disjointed.

Additionally, three of our holdings within the category, Terraform Global Inc., Abengoa Yield plc and Fortress Transportation and Infrastructure Investors LLC, had specific issues. The parent companies of both Terraform Global Inc. and Abengoa Yield plc came to the brink of bankruptcy when credit markets seized up. Additionally, Fortress Transportation and Infrastructure Investors LLC owns an underutilized crude oil terminal which comprised roughly 30 percent of its asset base. All three of these entities drastically repriced, causing almost 450bps (4.5 percent) of underperformance within the equity portfolio. The Fund exited its position in Terraform Global Inc. at a loss, while Abengoa Yield plc and Fortress Transportation and Infrastructure Investors LLC remain in the Fund. We lost confidence in Terraform Global Inc.'s management's independence from its parent company as the parent company struggled to fend off bankruptcy. In contrast, Abengoa Yield plc is successfully separating its management and operations from the parent company and has an alternative energy asset base that we continue to find attractive. Similarly, Fortress Transportation and Infrastructure Investors LLC's crude terminal sits in a strategic location outside of Houston, and is in a position to feed a number of new chemical plants coming on line next year. We continue to believe in the longer-term fundamentals of its asset base, which also include aviation leasing and transportation.

While these three assets caused the bulk of the Fund's underperformance over the fiscal year, we were again hit by the significant divergence in returns between U.S. and international equity markets. Greater yield in international markets has long biased us to an overweight position, which acted as a headwind for the second straight year. In November, as part of our reallocation out of equities and into fixed income, we reduced the international overweight but not enough to avoid it hindering the Fund's performance. The international overweight allocation constrained performance in the first quarter of 2016 as investors began to question the effectiveness of additional monetary easing by the ECB and BOJ.

The fixed income portion of the portfolio also underperformed its benchmark during the fiscal year. The underperformance is not surprising given the Fund's natural positioning to being overweight in credit and underweight in Japan relative to its benchmark. As an income fund we are looking for yield, which means our credit exposure is naturally high, and we have never owned a fixed income security in Japan given the low level of yields. That does not mean low-yielding securities cannot provide significant returns, as Japanese government bonds returned almost 12.5 percent during the fiscal year. Japanese government bonds represent 16.4 percent of our fixed income benchmark, the second highest weight behind the United States. Our zero weight fixed income allocation in Japan was by far the largest contributor to underperformance. As mentioned previously, the other detractor was credit, where we are naturally overexposed given our income focus. The overweight allocation of the Fund's credit holdings detracted from performance, even though our credit holdings held up relatively well compared to the credit portion of the index during the December and January market volatility.

The Fund continued its use of currency forwards during the year to both hedge and mitigate risk within the portfolio. We also used equity derivatives at times to express positive or negative positions on certain stocks as part of our security selection process. In some, but not all cases, the use of equity derivatives was additive to performance. We tend to only use derivative strategies when we believe dislocations in derivatives markets, either through volatility or skew, are significantly in our favor around the positioning we would like to take. Keep in mind that there are risks involved in the use of derivatives, including market, counterparty, liquidity and interconnection risks.

Outlook

We view the Fed's decision on whether to continue to normalize monetary policy as the most important factor going forward. The Fed has long stated it will be data dependent with regard to interest rate increases. We believe the Fed will instead be market dependent in respect to raising interest rates. Given the low unemployment rate and inflation that is close to target levels, one could argue the Fed should have raised interest rates multiple times already. Each time the market began pricing Fed interest rate increases, bouts of market volatility caused the Fed to decline to raise interest rates. Finally in December, the Fed increased interest rates and as well signaled the possibility for additional increases in the future; however, the Fed was forced to remove signals of future rate increases after financial markets became extremely volatile following their initial increase. Our belief going forward is that the Fed will be market dependent, only raising interest rates if financial markets allow them to through relatively benign financial conditions. As the prospect of Fed rate hikes seems to foretell volatility, at this point we believe it is unlikely that the Fed will raise interest rates significantly during the year. On the international front, we also continue to believe central banks globally will maintain an aggressive stance and increase monetary stimulus further. We think any additional easing by the BOJ is likely to result in the direct purchase of equity securities as Japan tries to stave off deflation. The ECB is also likely to be preparing additional measures if the programs announced in January do not have the desired impact.

Fund Positioning

We believe that the market will continue to question whether central banks will be successful in achieving their ultimate goal of higher nominal rates of gross domestic product. As a result, we are now implementing a more conservative asset allocation that is slightly underweight in equities relative to the benchmark. We have also become more focused on higher-quality investments, as the average credit quality of the Fund has been raised from BB- to BB+. In short, we are running closer to benchmark allocations than we ever have during the life of the Fund. This is also reflected in the fact we have little conviction for making big allocation bets in this uncertain macro-environment and would prefer to try to generate performance through individual security selection.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets.

Fixed-income securities are subject to interest-rate risk and, as such, the net asset value of the Fund may fall as interest rates rise. Investing in high-income securities may carry a greater risk of nonpayment of interest or principal than higher-rated bonds. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Global Income Allocation Fund's performance. Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Global Income Allocation Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

Effective June 4, 2012, Ivy International Balanced Fund changed its name to Ivy Global Income Allocation Fund. As a result, the Fund's benchmark was changed to a blended index composed of 60% MSCI World High Dividend Yield Index and 40% Barclays Multiverse Index. We believe this index is more representative of the types of equity and fixed-income securities in which the Fund invests.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Global Income Allocation Fund

(UNAUDITED)

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Chad A. Gunther

Below, Chad Gunther, portfolio manager of Ivy High Income Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Gunther was appointed portfolio manager of the Fund on July 9, 2014, and has 18 years of industry experience.

Fiscal Year Performance

For the 12 months ended March 31, 2016

Ivy High Income Fund (Class A shares at net asset value)	-7.75%
Ivy High Income Fund (Class A shares with sales charge)	-13.02%
Benchmark(s) and/or Lipper Category	
Bank of America Merrill Lynch High Yield Index (reflects the performance of securities generally representing the high-yield sector of the bond market)	-3.99%
Lipper High Yield Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-4.01%

Please note that Fund returns include applicable investment fees and expenses, while index returns do not include any such fees. The performance discussion below is at net asset value.

Market volatility

Concerns over slowing global growth; continued weakness in commodity prices; the first U.S. Federal Reserve (Fed) interest rate hike in almost a decade; substantial outflows in the asset class; a risk-off mentality in the investor base and concerns over liquidity after the shuttering of a distressed-debt focused fund all contributed to a significant widening in spreads and yields during the fiscal year ended March 31, 2016. Spreads on the Bank of America Merrill Lynch High Yield Index saw a widening of 223 basis points from March 31, 2015 to March 31, 2016, ending the fiscal year at a 705 basis point spread. This lowered the index yield to 8.36% for the fiscal year-end, compared to 6.28% on March 31, 2015. Flows for the high-yield asset class were unfavorable, with \$20.7 billion exiting the space. Of the \$20.7 billion, only a small portion consisted of passively managed accounts, with outflows totaling approximately \$100 million.

Investment performance

The Fund underperformed its benchmark and Lipper universe average for the fiscal year ending March 31, 2016. Underperformance relative to the benchmark was primarily attributable to the Fund's approximate 26% allocation to senior loans. Senior loans are not included in the benchmark and had a -9.45% return for the fiscal year. Additionally, poor credit selection in the retail and services sectors detracted from Fund performance.

While not enough to offset the negative performance from the categories mentioned above, our underweight allocation to the energy sector (approximate 8.25% underweight) positively impacted Fund performance during the fiscal year. Pressure on oil prices during the fiscal year negatively impacted the high-yield credit markets.

While the Fund used derivatives during the reporting period, they had minimal impact on the performance of the Fund.

Outlook

Recent economic data is pointing to continued slowing in manufacturing activity. There are also few signs of inflation, and companies continue to struggle to exhibit top-line growth. Finally, instability in China continues to weigh on the markets. Given this environment, we think the Fed could have a hard time making the case for any additional increases throughout 2016.

Given all of these uncertainties, we believe it is prudent to maintain a higher cash balance going forward as well as to maintain a more balanced portfolio in regards to liquidity and risk.

Our goal of finding businesses that offer the best risk-adjusted return characteristics will continue as it is our belief that bottom-up fundamental credit analysis should produce better relative performance in both up and down credit cycles.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. Investing in high-income securities may carry a greater risk of non-payment of interest or principal than higher-rated bonds. In addition to the risks typically associated with fixed-income securities, loan participations in which the fund may invest carry other risks including the risk of

insolvency of the lending bank or other intermediary. Loan participations may be unsecured or not fully collateralized, may be subject to restrictions on resale and sometimes trade infrequently on the secondary market. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy High Income Fund's performance.

PORTFOLIO HIGHLIGHTS

Ivy High Income Fund

ALL DATA IS AS OF MARCH 31, 2016 (UNAUDITED)

Asset Allocation

Stocks	1.6%
Telecommunication Services	1.2%
Financials	0.4%
Consumer Discretionary	0.0%
Warrants	0.0%
Bonds	88.2%
Corporate Debt Securities	65.7%
Loans	22.5%
Cash and Other Assets (Net of Liabilities), and Cash Equivalents+	10.2%

Lipper Rankings

Category: Lipper High Yield Funds	Rank	Percentile
1 Year	606/660	92
3 Year	405/541	75
5 Year	104/438	24
10 Year	12/290	5

Past performance is no guarantee of future results. Rankings are for Class A shares and are based on average annual total returns, but do not consider sales charges. Rankings for other share classes may vary.

+Cash equivalents are defined as highly liquid securities with maturities of less than three months. Cash equivalents may include U.S. Government Treasury bills, bank certificates of deposit, bankers' acceptances, corporate commercial paper and other money market instruments.

Quality Weightings

Investment Grade	0.9%
BBB	0.9%
Non-Investment Grade	87.3%
BB	12.8%
B	27.6%
CCC	42.3%
Below CCC	1.2%
Non-rated	3.4%
Cash and Other Assets (Net of Liabilities), Cash Equivalents+ and Equities	11.8%

Our preference is to always use ratings obtained from Standard & Poor's. For securities not rated by Standard & Poor's, ratings are obtained from Moody's. We do not evaluate these ratings, but simply assign them to the appropriate credit quality category as determined by the rating agency.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy High Income Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-13.02%	-11.84%	-8.40%	-13.26%	-7.52%	-8.07%	-7.36%	-7.76%
5-year period ended 3-31-16	3.44%	3.76%	3.96%	3.07%	4.95%	—	—	4.70%
10-year period ended 3-31-16	6.39%	6.26%	6.24%	—	—	—	—	7.09%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	5.49%	6.97%	1.29%	-4.41%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

*Not shown due to rounding.

(A)No dividends were paid during the preceding 12 months.

(B)Restricted securities. At March 31, 2016, the Fund owned the following restricted securities:

Security	Acquisition Date(s)	Shares	Cost	Market Value
Maritime Finance Co. Ltd.	9-19-13	1,750	\$30,173	\$16,887
Provo Craft & Novelty, Inc.	9-15-11	6,090	—	—*
			\$30,173	\$16,887

The total value of these securities represented 0.4% of net assets at March 31, 2016.

(C)Deemed to be an affiliate due to the Fund owning at least 5% of the voting securities.

(D)Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.

(E)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2016 the total value of these securities amounted to \$2,402,391 or 50.4% of net assets.

(F)Payment-in-kind bonds.

(G)Principal amounts are denominated in the indicated foreign currency, where applicable (CAD - Canadian Dollar and EUR - Euro).

(H)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.

(I)Non-income producing as the issuer has either missed its most recent interest payment or declared bankruptcy.

SCHEDULE OF INVESTMENTS

Ivy High Income Fund *(in thousands)*

MARCH 31, 2016

(J) All or a portion of this position has not settled. Full contract rates do not take effect until settlement date.

(K) Rate shown is the yield to maturity at March 31, 2016.

(L) Cash of \$4,380 is held in collateralized accounts for OTC derivatives collateral as governed by International Swaps and Derivatives Association, Inc. Master Agreements.

(M) Unit is comprised of \$172.61 principal amount of New Secured Convertible PIK Notes and one New Common Share.

The following forward foreign currency contracts were outstanding at March 31, 2016:

	Currency to be Delivered		Currency to be Received	Settlement Date	Counterparty	Unrealized Appreciation	Unrealized Depreciation
Canadian Dollar	36,230	U.S. Dollar	27,876	4-26-16	Morgan Stanley International	\$ —	\$21
Euro	7,000	U.S. Dollar	7,920	4-26-16	Morgan Stanley International	—	51
						\$ —	\$72

The following total return swap agreements were outstanding at March 31, 2016:

Counterparty	Underlying Security	Termination Date	Notional Amount ⁽¹⁾	Financing Fee ⁽²⁾⁽³⁾	Unrealized Appreciation
Morgan Stanley & Co., Inc.	iBoxx \$ Liquid High Yield Index	06/20/2016	\$15,857	3M LIBOR less 0.41528%	\$102

(1) Notional amount changes by the percentage change of the price of the index applied to the notional amount.

(2) The Fund pays the financing fee multiplied by the notional amount each quarter.

(3) At the termination date, a net cash flow is exchanged where the market-linked total return is equivalent to the return of the underlying security less a financing rate, if any. As the payer, a Fund would receive payments on any net positive total return, and would owe payments in the event of a negative total return.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$ —	\$ —	\$ 17,586
Preferred Stocks	57,229	—	—
Warrants	—	531	—
Corporate Debt Securities	—	3,137,158	—
Loans	—	747,378	327,012
Short-Term Securities	—	391,081	—
Total	\$57,229	\$4,276,148	\$344,598
Total Return Swaps	\$ —	\$ 102	\$ —
Liabilities			
Forward Foreign Currency Contracts	\$ —	\$ 72	\$ —

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Common Stocks	Warrants	Loans
Beginning Balance 4-1-15	\$31,309	\$ 595	\$ 472,642
Net realized gain (loss)	(1)	—	(27,340)
Net change in unrealized appreciation (depreciation)	(8,894)	—	(51,216)
Purchases	—	—	352
Sales	(4,828)	—	(223,793)
Amortization/Accretion of premium/discount	—	—	1,052
Transfers into Level 3 during the period	—	—	314,532
Transfers out of Level 3 during the period	—	(595)	(159,217)
Ending Balance 3-31-16	\$17,586	\$ —	\$ 327,012
Net change in unrealized appreciation (depreciation) for all Level 3 investments still held as of 3-31-16	\$ (8,895)	\$ —	\$ (62,612)

Transfers from Level 2 to Level 3 occurred primarily due to the lack of observable market data due to decreased market activity or information for these securities. Transfers from Level 3 to Level 2 occurred primarily due to the increased availability of observable market data due to increased market activity or information. As shown above, transfers in and out of Level 3 represent the values as of the beginning of the reporting period. During the year ended March 31, 2016, there were no transfers between Levels 1 and 2.

SCHEDULE OF INVESTMENTS

Ivy High Income Fund *(in thousands)*

MARCH 31, 2016

Information about Level 3 fair value measurements:

	Fair Value at 3-31-16	Valuation Technique(s)	Unobservable Input(s)
Assets			
Common Stocks	\$ 699	Broker	Broker quotes
	16,887	Third-party vendor pricing service	Broker quotes
Loans	327,012	Third-party vendor pricing service	Broker quotes

The following acronyms are used throughout this schedule:

GTD = Guaranteed
 REIT = Real Estate Investment Trust
 OTC = Over the Counter

See Accompanying Notes to Financial Statements.

John C. Maxwell

Below, John C. Maxwell, CFA, portfolio manager of Ivy International Core Equity Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Maxwell has managed the Fund since February 2006 and has 24 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy International Core Equity Fund (Class A shares at net asset value)	-9.95%
Ivy International Core Equity Fund (Class A shares including sales load)	-15.12%
Benchmark(s) and/or Lipper Category	
MSCI EAFE Index (generally reflects the performance of securities in Europe, Australasia and the Far East)	-8.27%
Lipper International Large-Cap Core Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-9.78%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

International markets posted negative gains

Equity markets were volatile in the fiscal year ended March 31, 2016. The Fund and its peer universe average were each down approximately 10%, while the Fund's benchmark index was down approximately 8%. The Fund's biggest detractor to performance was our top-down view that economic growth was going to be better than expected from March through November 2015. In the end, developed market and emerging market economic growth generally disappointed. The foundation for our belief of better growth was threefold: more competitive currencies (devaluations) in the major markets; extremely low rates and increased lending in key markets; and the dramatically lower cost of oil and energy. In the end, these three beliefs failed to deliver the growth we had expected. In November, we transitioned from our bullish growth outlook to a viewpoint of longer-term, low global growth.

Around the world

China continues to be at the forefront of investor concerns as uncertainty abounds in several areas. Key concerns include the economy's overall global competitiveness; the ability to rotate to a service and consumption based economy; and the sustainability of a controlled exchange rate. The International Monetary Fund granted China's currency special drawing rights status. The People's Bank of China also announced that it will be adjusting its currency from a dollar peg to a "basket" peg, which we think could help China's competitiveness as the dollar strengthens with rising rates. After many false starts, the U.S. Federal Reserve (Fed) raised rates for the first time in nearly a decade despite lackluster economic data. That said, the Fed has become more dovish post the raise. Monetary policy in Europe and Japan remains aggressive, but the role of the increasingly dovish Fed has been more important since the beginning of the calendar year, as the yen and euro have strengthened.

The weaker U.S. dollar since the beginning of the calendar year has reversed the negative spiral in commodity prices and provided a relief valve to potential stresses in bond markets. As a result, high-yield credit spreads have narrowed. In our belief, this has reduced the risk of financial contagion and ultimately, global recession.

Actions in the Fund during the year

We positioned the Fund to benefit from better-than-consensus economic growth to start the fiscal year. As such, from an asset allocation standpoint, we were happy to have a relative 5% overweight to cyclicals and were seeking to find companies with both operating, and, to a lesser extent, financial leverage. This strategy ultimately did not produce positive results. In June, the market started to trade off as the China A-shares market went into free fall despite aggressive policy moves by its government. Additionally, Greece experienced trouble forming a government and was in the process of negotiating its obligations to the European Union — increasing fears of a Greek exit from the Eurozone. As a result, we increased the liquidity of individual holdings in the Fund by selling smaller companies in favor of larger ones. In August, the market started to trade off as the Chinese yuan lost value, viewing such devaluation as confirmation that the Chinese economy was struggling. We continued to hold out for better economic growth, but began to sell positions in companies with the most financial leverage as spreads were widening. By fiscal year end, the Fund had a significantly lower financial leverage profile than the benchmark index, which profile aligned with the Fund's historical positioning.

In November, we transitioned from the better-than-expected economic growth outlook to the new normal outlook — slow growth ahead. We refocused on good business models we believed would perform well independent of the economy. That said, we continued to hold some of the names that should benefit from cheaper oil as we believe that the effects of lower oil prices often take more than a year to filter into the economy. Despite attractive valuations through the year, we reduced the Fund's weighting directly to emerging markets, as we found a number of attractively priced emerging market proxies in developed markets. We maintained the Fund's hedge on the Chinese yuan at about 10% of assets until March. At that time, we removed the Fund's hedge on the yuan and proceeded to initiate an approximate 7.5% hedge on our euro exposure.

From a geographic standpoint, country allocations were mixed, with holdings in Australia and emerging markets outperforming the index. Conversely, Japan detracted from performance. In the end, the outperforming regions were places the Fund generally owned more defensive stocks, while the underperformers were regions that had cyclical stocks. In Japan, for example, the Fund had a heavy concentration of cyclical names and virtually no defensives.

From a sector standpoint, our underweight allocation to the relatively poor-performing financials sector and strong stock selection in the consumer staples sector were the top contributors to Fund performance. Top individual contributors to performance included Fresenius SE & Co. and Svenska Cellulosa Aktiebolaget SCA. Poor stock selection and underweight allocations to the utilities and telecommunication services sectors were the top detractors to relative performance.

What we seek

As we move forward, we continue to look for companies that are underpriced relative to their prospects in both the growth and value parts of the market. We expect to keep the Fund balanced between defensives and cyclicals. Through the past fiscal year, our key themes did not change. We continue to seek exposure to:

- Disproportionate growth of emerging market consumers, particularly in the Asia-Pacific region
- Strong growth in infrastructure — with a focus on the internet
- Strong and believable dividend yields
- Stocks that we think will benefit from increased mergers and acquisition activity

In addition to the new normal outlook, we have adopted a view that margins (in aggregate) have peaked. The foundation for this is slow global growth; China moving from a low cost outsourcer to a direct competitor; internet disintermediation of established business models; and government moving up the stakeholder stack as they become more desperate for growth. We are seeking to create a portfolio of companies we believe are positioned to perform “better” in this environment — leading to a preference for high-quality companies across the valuation spectrum.

Outlook

Last calendar year, the combination of lower energy costs, more available and cheaper money, and generally weaker currencies outside the U.S. failed to deliver the better economic growth we were expecting. Therefore, we are returning to our stance that economic growth could remain muted for the longer term, which is in line with the general consensus. Global monetary policy remains at the extremes of easy and we do not see that changing materially any time soon. We believe relative valuation remains supportive for international equities, while absolute valuations are less attractive. Equities outside of emerging markets are trading at valuation levels above their historic averages (over the last 25 years), while bonds are trading at a dramatic historic premium to long-term averages. Emerging market equities are trading at valuation levels below historic averages.

Long term, we believe emerging market countries will try to improve their populations’ standards of living. Our view is that, to accomplish this feat, those countries will require solid real economic growth, which currently is not being achieved. There are increasing signs of stress in these emerging market countries, though in many cases their growth remains ahead of their developed market counterparts. In the end, we believe maintaining some exposure to emerging markets makes sense.

We continue to seek opportunities that are in line with the Fund’s current investment themes: disproportionate growth of emerging market consumers; believable and sustainable dividend yield; companies benefiting from increased mergers and acquisitions; and infrastructure development, particularly the internet.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund’s shares will change, and you could lose money on your investment.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. Investments in countries with emerging economies or securities markets may carry greater risk than investments in more developed countries. Political and economic structures in many such countries may be undergoing significant evolution and rapid development, and such countries may lack the social, political and economic stability characteristics of more developed countries. Investments in securities issued in these countries may be more volatile and less liquid than securities issued in more developed countries. These and other risks are more fully described in the Fund’s prospectus.

The opinions expressed in this report are those of the Fund’s portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager’s views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy International Core Equity Fund’s performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy International Core Equity Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-15.12%	-14.27%	-10.54%	-15.23%	-9.63%	-10.15%	-9.52%	-9.88%
5-year period ended 3-31-16	1.16%	1.32%	1.70%	1.08%	2.77%	—	—	2.50%
10-year period ended 3-31-16	3.46%	3.36%	3.39%	—	—	—	—	4.23%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	1.89%	3.13%	5.26%	-5.56%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

SCHEDULE OF INVESTMENTS

Ivy International Core Equity Fund *(in thousands)*

MARCH 31, 2016

Notes to Schedule of Investments

(A) No dividends were paid during the preceding 12 months.

(B) All or a portion of securities with an aggregate value of \$791 are held in collateralized accounts for OTC derivatives collateral as governed by International Swaps and Derivatives Association, Inc. Master Agreements.

(C) Rate shown is the yield to maturity at March 31, 2016.

(D) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following forward foreign currency contracts were outstanding at March 31, 2016:

	Currency to be Delivered		Currency to be Received	Settlement Date	Counterparty	Unrealized Appreciation	Unrealized Depreciation
Euro	301,400	U.S. Dollar	341,314	4-26-16	Barclays Capital, Inc.	\$—	\$1,876

The following written options were outstanding at March 31, 2016 (contracts and exercise prices unrounded):

Underlying Security	Counterparty, if OTC	Type	Number of Contracts	Expiration Month	Exercise Price	Premium Received	Value
Hypermarcas S.A.	Morgan Stanley & Co., Inc.	Call	438,000	April 2016	BRL27.00	\$ 73	\$(182)
	Morgan Stanley & Co., Inc.	Call	438,000	April 2016	28.00	82	(99)
						\$155	\$(281)

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$4,407,711	\$ —	\$—
Short-Term Securities	—	130,458	—

Daniel P. Becker

Philip J. Sanders

Below, Daniel P. Becker, CFA, and Philip J. Sanders, CFA, portfolio managers of Ivy Large Cap Growth Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Mr. Becker has managed the Fund since 2000 and Mr. Sanders has managed the Fund since 2006. Both men have 27 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Large Cap Growth Fund (Class A shares at net asset value)	-2.08%
Ivy Large Cap Growth Fund (Class A shares including sales charges)	-7.70%
Benchmark(s) and/or Lipper Category	
Russell 1000 Growth Index (generally reflects the performance of securities that represent the large-cap growth market)	2.52%
Lipper Large-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-1.43%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Key drivers

The Russell 1000 Growth Index, the Fund's benchmark, recorded a modest gain for the fiscal year ended March 31, 2016. The slight positive return falls far short of telling the story of what was a very volatile 12-month period in equities. Several times during the measurement period, the index was in negative, double-digit territory, reflecting the many potential outcomes of the removal of Federal Reserve (Fed) monetary policy in the current slow global economic environment. Prospects for continued volatility associated with a complex mix of variables, such as Chinese and emerging economy debt levels, the strength of the U.S. dollar and aggressive monetary policy accommodation from foreign central banks, remain with us as we enter spring 2016.

There exists much discussion concerning the divergence in both monetary policy and economic growth rates that the U.S. is experiencing relative to other markets and economies around the world. The continued divergence in monetary policy reached a climax during first quarter 2016 as interest rate differentials, as well as the assumed path for future interest rate moves, contributed to a meaningful appreciation in the U.S. dollar. Due to aggressive monetary easing in other global economies and specific Asian currency values that are pegged to the dollar, a tipping point was reached where potential future increases in the dollar may have caused capital flight from emerging economies. This situation had the potential to negatively impact the global banking system and financial markets.

In short, there was a risk that the combined actions of global central banks would create an error in monetary policy, thrusting fragile economies into recession and prompting a further downward spiral in commodity-led economies with large U.S. dollar-denominated debt burdens. In our view, the Fed acted appropriately by eventually acknowledging these risks and suggesting a less aggressive path to normalizing short-term interest rates over the rest of 2016. This acknowledgment ignited a stock market recovery late in first quarter 2016 that particularly benefited the most at-risk stocks and business models at the expense of growth stocks, much like what happened in early 2009.

The U.S. remains the stable pillar of hope (and growth) within an uncertain global macroeconomic environment. As such, investors continue to hold a more favorable view on the prospects for the U.S. economy primarily based on the positive indicators at work domestically, such as employment gains, solid consumer spending and low interest rates. However, these positives should be balanced by manufacturing data that has been less favorable and small signals that the downshift in energy investment is rippling into the industrial economy.

The index's fiscal year return attribution suggests that financial characteristics such as return on equity, dividend yield/dividend growth and free cash flow yield have been key variables in driving stock performance over the past few months. Our underrepresentation in stocks matching these value style factors minimized what was previously a fairly good start to the fiscal year through the end of calendar 2015. Recently, the market has continued to reward perceived "safe" stocks, with dividend yield and cash flow as the primary determinants of safety. Growth stocks have recently been out of favor; however, we believe this situation could change later in calendar year 2016.

Performance, strategies employed and attribution

For the fiscal year ended March 31, 2016, the Fund underperformed its benchmark index and peer group. Despite the recent underperformance, the Fund's philosophy has remained consistent — a process that seeks to identify structurally advantaged companies that can generate superior levels of profitability and growth over time. In many cases, short-term dislocations and volatility provided by macro uncertainty offer a favorable entry point for structurally advantaged businesses. We believe that the rapid changes in sentiment within the capital markets continue to create opportunities for patient growth stock investors.

In terms of performance attribution, the Fund's underperformance was largely driven by the health care sector, both in terms of an overweight position and unfavorable stock selection. Security selection and overall limited exposure in consumer staples also contributed to the Fund's underperformance during the fiscal period.

Concurrent to the above mentioned global macroeconomic events, the U.S. Presidential election and the negative disclosures by Valeant Pharmaceuticals (not a Fund holding) created a hostile environment for most health care companies, especially those that have benefitted from pricing power in therapeutic categories where list prices appear relatively high. This environment has catalyzed a potential move in public policy by both political parties' candidates that we believe would disrupt the health care industry, if implemented. While it would likely require a more liberal and united Congress to significantly change policy, the ongoing headlines may continue to depress stock performance leading up to the election. We believe some of these stocks could rebound later in 2016, as the market determines the actual path of policy may not be as detrimental as the campaign rhetoric would imply. Health care was by far the biggest negative contributor to the Fund's relative performance during the measurement period. There have been several favorable tailwinds benefiting health care over the past several years — exceptional innovation, strong commercial launches, supportive U.S. Food and Drug Administration and access to cheap funding — and many of these variables remained in place during the measurement period. However, there was a significant change in terms of perceived risk around the government's potential to enact regulations designed to curb increases in drug prices. The introduction of this risk and others created a poor investment climate that reduced health care stock valuations fairly rapidly despite limited changes in near-term fundamentals.

Consumer discretionary and technology sector exposure provided positive attribution, although not material enough to overcome pressures in health care. In consumer discretionary, a significant overweight in Amazon.com helped contribute positively toward performance. Amazon's performance during the fiscal year was outstanding and driven by much needed improvements in margins and additional disclosures that showed the growth and margin profile of the company's cloud computing business. In technology, positive contribution was generated by overweight positions in the fast growing companies such as Adobe Systems, Inc. and Facebook, Inc. Underweight positions in Apple, Inc., Starbuck's Corp., O'Reilly Automotive Inc. and NIKE, Inc. also helped performance during the fiscal period.

Outlook and positioning

Entering the next fiscal year feels a little like déjà vu, as many of the debates from the prior period remain, such as global growth instability and the timing of the Fed's move to a "normalized" monetary policy. The latter issue appears to have evolved into the "pace" at which the Fed will move interest rates higher. We expect continued sluggish economic growth out of the U.S. economy, likely in the 2% to 3% range, but stubbornly disappointing. We expect the direction of the U.S. economy will become a larger focal point in the coming fiscal year.

Particularly noteworthy, in our view, is the effort by the European Central Bank to increase the size and scope of its quantitative easing program, by purchasing more government and corporate bonds. This tactical change is a welcome move, as it should prevent further decline in low or already negative interest rates, thus taking pressure off the rising U.S. dollar. Since this shift was announced, the dollar has depreciated against most major currencies, helping to reduce systemic risk. As the dollar has appreciated so strongly over the past 18 months, we think some depreciation will be beneficial to fixed income, currency and equity markets globally.

Looking ahead, we continue to expect a slow rate of economic growth, limited profit growth and low inflation, conditions which usually support growth stocks. In the short term, value stocks may continue to outperform; however, many of these value stocks were priced for significant economic distress, especially if their revenues are exposed to global commodity market trends. After these distressed valuations improve, we expect the growth stock cycle to resume, as many of the Fund's growth stocks are now supported by attractive valuations and profit outlooks. These include some of the Fund's largest holdings, such as Visa, Inc., MasterCard, Inc., Alphabet, Inc. (Google), Celgene Corp., Microsoft Corp. and Gilead Sciences, Inc. We are selectively increasing exposure to these and other stocks that have been depressed by recent market weakness.

The Fund's positioning for coming fiscal year will focus more on seeking to take advantage of these sudden swings in risk appetite and more proactively adding exposure to long-term investments, as inevitable stock price dislocations occur relative to minimal actual fundamental changes. We continue to pursue a strategy that focuses on the smaller subset of companies that we believe have strong business models that originate and are maintained by a high and sustainable level of competitive advantage within their served addressable markets. Thank you for your continued confidence and support.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Prices of growth stocks may be more sensitive to changes in current or expected earnings than the prices of other stocks. Growth stocks may not perform as well as value stocks or the stock market in general. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio managers and are current only through the end of the period of the report as stated on the cover. The portfolio managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Large Cap Growth Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Large Cap Growth Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-7.70%	-6.57%	-2.74%	-7.71%	-1.79%	-2.39%	-1.64%	-2.03%
5-year period ended 3-31-16	9.49%	9.62%	9.96%	9.48%	11.10%	10.43%	–	10.88%
10-year period ended 3-31-16	6.46%	6.12%	6.21%	–	–	6.76%	–	7.19%
Since Inception of Class through 3-31-16 ⁽⁵⁾	–	–	–	6.97%	8.04%	–	6.65%	–

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

See Accompanying Notes to Financial Statements.

Susan Regan

Below, Susan K. Regan, portfolio manager of Ivy Limited-Term Bond Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Ms. Regan was named portfolio manager in 2014 and has 28 years industry experience. She co-managed the Fund from 2014 until April 30, 2015, when her co-manager, Mark J. Otterstrom, retired. Mr. Otterstrom had managed the Fund since 2010.

Fiscal Year Performance

For the 12 months ended March 31, 2016

Ivy Limited-Term Bond Fund (Class A shares at net asset value)	0.95%
Ivy Limited-Term Bond Fund (Class A shares with sales charge)	-1.57%
Benchmark(s) and/or Lipper Category	
Barclays 1-5 Year U.S. Government/Credit Index (generally reflects the performance of securities representing the bond market with greater than one and less than five years until maturity)	1.62%
Lipper Short-Intermediate Investment Grade Debt Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	0.73%

Please note that the Fund returns include applicable investment fees and expenses, whereas the index returns do not include any such fees. The performance discussion below is at net asset value.

The Ivy Limited-Term Bond fund performed better than the Barclays 1-5 Year U.S. Government/Credit Index before fees are included in the Fund's yield calculation. The Ivy Limited-Term Bond fund also had a greater return than the average of its Lipper peer group for the year ended March 31, 2016.

One of the keys to the Fund's performance was the decision to keep duration relatively close to the benchmark. Another key was credit selection and mortgage-backed security selection, as both those asset classes produced returns above the benchmark.

The U.S. Treasury market experienced significant volatility over the course of the twelve months beginning March 31, 2015. The high and low yields on the two-year note were 1.09% and 0.49%, respectively. The Federal Open Market Committee (FOMC) has said for some time that the timing of rate hikes is data dependent. As a result, each economic data release has the ability to move the market in either direction. This contributed to the volatility seen in the bond market over the past year.

In mid-August, we saw a string of weak manufacturing data out of China, confirming the world's second largest economy was slowing. Globally, equities sold off sharply, leading to a big move lower in U.S. Treasuries as the flight-to-quality trade resurfaced. The Federal Reserve had prepared the markets for a rate hike at their September meeting. After discussing the status of equities and emerging markets from the weakness in China, the FOMC instead chose to delay a rate hike when they met.

In December, the FOMC began the slow process of normalizing rates with a 25 basis point (0.25 percent) increase in the federal funds rate. The rate hike was so well telegraphed and so well received that market disruptions were minimal.

The energy and commodities sectors have seen extreme volatility in the last year. Oil prices have an impact on many markets across the world. When oil slipped close to \$30 in January and February 2016, deflation fears were growing and default fears were felt throughout the high-yield credit market. At the end of 1Q, the price of oil stabilized close to \$40 per barrel.

Over the course of the twelve months included in this report, the Fund's duration didn't vary from the benchmark by more than ten percent and often was much closer to the benchmark. With all the uncertainty about the timing and path of interest rates, we thought it made sense to keep duration in check. We began employing a slight barbell strategy in late 2014. As part of this strategy, the Fund was overweight at the very front end of the curve and had a relatively small exposure past five years, comprising the two ends of the barbell.

We increased the Fund's U.S. Treasury and government agency bond holdings over the period. We also increased its mortgage-backed securities exposure. We did this by reducing corporate bond exposure. The Fund is still currently overweight in investment-grade credit, but less so than a year ago. We have reduced the Fund's credit exposure as a response to the overall increase in leverage we are seeing in the credit market. Balance sheets, while still generally strong, have deteriorated somewhat. Liquidity in the corporate bond market is also a concern going forward. We feel we are nearer the end of the credit cycle than the beginning and feel having less credit exposure is prudent. These sector changes have naturally increased the quality in the portfolio as U.S. Treasuries, government agency bonds and government agency mortgage-backed securities are typically rated higher than most corporate bonds.

Fed Chair Janet Yellen, at a speech in late March 2016, again reiterated the data dependent nature of potential future interest rate hikes. The Federal Reserve realizes economies and markets around the world are very connected to one another. Growth in both the Eurozone and Japan are so weak that their central banks have engaged in negative interest rate programs as part of their efforts to stimulate their respective economies. While approximately 70% of the gross domestic product in the United States is generated by United States consumers, there is still a strong connection to the rest of the world. We will be watching U.S. gross domestic product, which has not exactly been robust — 2% for all of 2015, and first quarter 2016 is expected to be close to 1%. While the Fed would like to get rates higher, they are expected to raise rates slowly in the face of such external factors.

They don't want to raise rates so quickly that they derail the limited economic growth. They also do not want take rates higher than the country and world can handle. We think that this slow steady course of action probably translates into one, possibly two rate hikes in 2016. We believe the Fund should continue to perform well in this environment.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government. However, other government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB), are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

On September 7, 2008, the Federal Housing Finance Agency (FHFA), an agency of the U.S. government, placed Fannie Mae and Freddie Mac into conservatorship, a statutory process with the objective of returning the entities to normal business operations. FHFA will act as the conservator to operate Fannie Mae and Freddie Mac until they are stabilized. It is unclear what effect this conservatorship will have on the securities issued or guaranteed by Fannie Mae or Freddie Mac.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Limited-Term Bond Fund.

PORTFOLIO HIGHLIGHTS

Ivy Limited-Term Bond Fund

ALL DATA IS AS OF MARCH 31, 2016 (UNAUDITED)

Asset Allocation

Bonds	94.6%
Corporate Debt Securities	61.2%
United States Government and Government Agency Obligations	32.2%
Municipal Bonds – Taxable	1.0%
Mortgage-Backed Securities	0.2%
Cash and Other Assets (Net of Liabilities), and Cash Equivalents +	5.4%

Lipper Rankings

Category: Lipper Short-Intermediate Investment Grade Debt Funds	Rank	Percentile
1 Year	82/182	45
3 Year	117/154	76
5 Year	94/112	84
10 Year	53/87	61

Past performance is no guarantee of future results. Rankings are for Class A shares and are based on average annual total returns, but do not consider sales charges. Rankings for other share classes may vary.

+Cash equivalents are defined as highly liquid securities with maturities of less than three months. Cash equivalents may include U.S. Government Treasury bills, bank certificates of deposit, bankers' acceptances, corporate commercial paper and other money market instruments.

Quality Weightings

Investment Grade	86.6%
AAA	0.9%
AA	35.8%
A	20.6%
BBB	29.3%
Non-Investment Grade	8.0%
BB	4.0%
Non-rated	4.0%
Cash and Other Assets (Net of Liabilities), and Cash Equivalents +	5.4%

Our preference is to always use ratings obtained from Standard & Poor's. For securities not rated by Standard & Poor's, ratings are obtained from Moody's. We do not evaluate these ratings, but simply assign them to the appropriate credit quality category as determined by the rating agency.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Limited-Term Bond Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-1.57%	-3.86%	0.22%	-1.69%	1.20%	0.59%	1.35%	0.95%
5-year period ended 3-31-16	1.03%	0.50%	0.79%	0.92%	1.79%	—	—	1.54%
10-year period ended 3-31-16	3.12%	2.69%	2.60%	—	—	—	—	3.42%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	2.91%	3.60%	0.35%	1.60%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 2.50%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Ivy Limited-Term Bond Fund *(in thousands)*

MARCH 31, 2016

Notes to Schedule of Investments

(A) Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2016 the total value of these securities amounted to \$263,736 or 14.6% of net assets.

(B) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.

(C) Rate shown is the yield to maturity at March 31, 2016.

(D) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Corporate Debt Securities	\$ —	\$1,107,848	\$ —
Mortgage-Backed Securities	—	3,822	—
Municipal Bonds	—	18,267	—
United States Government Agency Obligations	—	382,320	—
United States Government Obligations	—	201,831	—
Short-Term Securities	—	89,954	—
Total	\$ —	\$1,804,042	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronyms are used throughout this schedule:

CMO = Collateralized Mortgage Obligation

GTD = Guaranteed

REMIC = Real Estate Mortgage Investment Conduit

REIT = Real Estate Investment Trust

See Accompanying Notes to Financial Statements.

Michael L. Avery

Below, Michael L. Avery, portfolio manager of the Ivy Managed International Opportunities Fund, discusses the positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since its inception on April 2, 2007, and he has 37 years of industry experience. Mr. Avery will retire from the firm effective June 30, 2016.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Managed International Opportunities Fund (Class A shares at net asset value)	-9.41%
Ivy Managed International Opportunities Fund (Class A shares including sales charges)	-14.61%
Benchmark	
MSCI AC World ex USA Index (generally reflects the performance of overseas stocks)	-9.19%

Please note that Fund returns include applicable fees and expenses, whereas index returns do not include any such fees. The performance discussion below is at net asset value.

Volatility marks the year

Fear seemed to be the operative word in 2015 and early in 2016 in global equity, fixed income and currency markets, though the beginning and end points masked the volatility throughout the fiscal year. The U.S. Treasury 10-year yield began the year at 1.94%, peaking around 2.50% in June 2015 and hitting a trough around 1.63% in February 2016 before ending the fiscal year at 1.78%. Similarly, the S&P 500 Index began and ended the fiscal year at 2059, but had four +10% swings in between.

The U.S. dollar had been in a strengthening trend for many months but began to weaken during the final quarter of the fiscal year. The dollar strengthened broadly against developed market currencies such as the yen, Canadian dollar and the euro, but the currencies of emerging areas such as Russia, Brazil, Thailand, Argentina and Colombia suffered as well. The yen has rallied to start 2016, despite the Bank of Japan moving to a negative interest rate policy in January with the intent of weakening the yen. Similarly, though not as dramatic as the yen, the euro has moved off its lows of November 2015 and onto a slightly stronger trajectory in 2016, even as the European Central Bank continued to cut rates and expand its quantitative easing (QE) facility.

Commodities prices weakened through most of the year, but showed signs of stabilization in the second half of the fiscal year. West Texas Intermediate crude oil prices (the U.S. benchmark) have perhaps found a floor in early 2016, closing below \$27 in February but above \$40 at the end of March on reduced supply expectations and a weaker U.S. dollar. Though inflation expectations continue to look well-contained, the consumer price index has trended higher because of energy, and the core measure excluding food and energy is running above the target of 2% because of increases in core goods and housing-related indicators.

Fed funds futures had an interest rate hike priced in from the U.S. Federal Reserve (Fed) during the second half of calendar 2015, though the odds were lower after Greece's "No" vote in its July referendum on austerity and debt relief, and following the market correction after China's yuan devaluation. We had doubts the Fed would be able to begin the normalization process of moving off of the "zero-bound" after seven years, given the macroeconomic risks globally. However, in spite of increasingly volatile markets, the Fed raised its base rate by 0.25% at its December meeting. Several years into the economic cycle, we believe the Fed prefers to build capacity to cut rates in the future, when warranted.

It is impossible to fully know the amount of leverage amassed in the global financial system, though we know there has been massive buildup in debt on emerging market country balance sheets — corporates and sovereigns alike. We think this is not a great recipe and the magnitude of the global impact is one of the most important questions facing investors today. The multiple growth scares during the fiscal year typically gain potency in a highly levered, low-growth world.

As of the end of the fiscal year, the Fed had not acted to raise rates again and softened its rhetoric on what would prompt further hikes. This, combined with a renewed pro-cyclical shift from China, changed the markets' tone in February.

Global growth decelerated to roughly 3% in 2015 and we expect a further slowdown in 2016, with developed market gross domestic product (GDP) growth below 2% and emerging market economies coming in at 3.5-4.0%. The U.S. is likely to continue to lead developed economies, though estimates for the U.S. were revised lower after the final release of fourth-quarter 2015 GDP. Growth in Europe and Japan remains positive, but fails to show signs of real acceleration despite the central bank accommodation in place. The ongoing trends of slower growth and rising debt will continue to magnify the effects of slight changes in the markets' assumptions for global growth.

Portfolio review

The Fund ended the fiscal year with a negative return that nearly matched its benchmark index. The Fund's performance reflected the negative returns for the fiscal year in all of the underlying funds and the allocation weighting to them.

We ended the fiscal year with the largest percentage of the Fund's assets allocated to Ivy International Core Equity Fund at about 29%, above the 20% weighting of a year ago, for its exposure to holdings in international markets. We increased the allocation to the Ivy Global Growth Fund to about

26% from 20% the prior year in order to maintain wide exposure to global markets overall. The allocation to Ivy European Opportunities Fund increased to about 19% from roughly 10% a year earlier, and Ivy Global Income Allocation Fund increased to nearly 16% from 10%. The largest allocation change was in the Ivy Emerging Markets Equity Fund, which ended the year at about 10%, down significantly from the 40% weighting a year earlier. Allocations in general reflected the slowing economic growth in across emerging markets, led primarily by China, along with a theme focused on the rising discretionary incomes of consumers in many countries.

Facing several headwinds

Looking ahead, we think the unintended consequences associated with global central bank policies are a primary risk for the markets and we expect to see increased volatility as central bankers attempt to reconcile a number of uncertainties. Those headwinds include a relatively stronger U.S. economy, but concern regarding the timing of additional rate hikes; the fading effects of easier monetary policy combined with slow growth and mounting global leverage, geopolitical events, and China's growth prospects although that country's economic data have strengthened recently in response to fiscal policy changes to stimulate investment areas within infrastructure.

Emerging market consumers have had a prominent role within the portfolio since the financial crisis — particularly in China — and we continue to believe in their long-term growth as the rise in discretionary income is likely to continue to eclipse that of their developed market counterparts. However, we believe the growth rate for consumption will be slower and, from here, more dependent on structural reforms. In addition, multinationals are seeing increased competition from local companies as quality improves.

Absent a perceived policy mistake (monetary or fiscal) or global shock, the equity markets could experience another year of volatility and bond yields with little movement in one direction or another, particularly at the long end and in spite of the Fed's desire to normalize rates.

Performance shown at NAV does not include the effect of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These risks are magnified in emerging markets. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of Ivy Managed International Opportunities Fund's performance.

Ivy Managed International Opportunities Fund

Ivy International Core Equity Fund, Class I	29.4%
Ivy Global Growth Fund, Class I	25.7%
Ivy European Opportunities Fund, Class I	19.2%
Ivy Global Income Allocation Fund, Class I	15.7%
Ivy Emerging Markets Equity Fund, Class I	9.9%
Cash and Other Assets (Net of Liabilities), and Cash Equivalents+	0.1%

The percentages of investments in the underlying funds may not currently be within the target allocation ranges disclosed in the Fund's prospectus due to market movements; these percentages are expected to change over time, and deviation from the target allocation ranges due to market movements is permitted by the prospectus.

+Cash equivalents are defined as highly liquid securities with maturities of less than three months. Cash equivalents may include U.S. Government Treasury bills, bank certificates of deposit, bankers' acceptances, corporate commercial paper and other money market instruments.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Managed International Opportunities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E ⁽⁵⁾	Class I	Class R	Class Y
1-year period ended 3-31-16	-14.61%	-14.00%	-10.30%	-14.55%	-9.00%	-9.55%	-9.28%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) Class E shares are not currently available for investment.

(6) 4-2-07 for Class A shares, 4-2-07 for Class B shares, 4-2-07 for Class C shares, 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 4-2-07 for Class Y shares (the date on which shares were first acquired by shareholders).

On March 17, 2014, the Ivy Managed European/Pacific Fund merged into the Fund. Performance prior to such time in part reflects the Ivy Pacific Opportunities Fund's former strategy and may have differed if the merger had not taken place.

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

See Accompanying Notes to Financial Statements.

John Bichelmeyer

John P. Bichelmeyer, CFA, who has 19 years of industry experience, became portfolio manager of Ivy Micro Cap Growth Fund on July 1, 2015. Prior to July 1, 2015, the Fund was subadvised by Wall Street Associates (WSA), which managed the Fund since its inception in February 2009. Below, Mr. Bichelmeyer discusses positioning, performance and results for the fiscal year ended March 31, 2016.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Micro Cap Growth Fund (Class A shares at net asset value)	-23.51%
Ivy Micro Cap Growth Fund (Class A shares including sales charges)	-27.91%
Benchmark(s) and/or Lipper Category	
Russell 2000 Growth Index (generally reflects the performance of smaller market cap company stocks within the growth market)	-11.84%
Russell Microcap Growth Index (generally reflects the performance of stocks in the smallest category of publicly traded companies within the growth market)	-17.02%
Lipper Small-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-12.11%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. Multiple indexes are shown because the Fund's portfolio manager expects to typically invest in companies within a wider range of market capitalization. The performance discussion below is at net asset value.

Key Drivers

For the fiscal year ended March 31, 2016, equity investors, especially those focused on the smallest of companies, have been subjected to an extremely challenging and volatile investment landscape. Economies around the world continue to experience difficulty in achieving and/or maintaining healthy economic growth even though interest rates have fallen to unprecedented levels, including negative rates. Despite the lack of sustained economic growth, the Federal Reserve (Fed) complicated the matter further in December 2015 by raising interest rates for the first time after seven years of near zero rates and indicated more increases were on the horizon. This in turn exacerbated the strength of the U.S. dollar and the pressure it was putting on most commodities and foreign countries that hold significant amounts of dollar-denominated debt. The level of strain in the financial system continued to mount until late February/early March 2016, when the Fed toned down its rhetoric about the pace of future interest rate increases, at which time equities began to trend higher into the fiscal year end. Given this set of circumstances, investors' appetite for risk, and smaller companies in general, continued to diminish throughout the fiscal period.

Since the spring of 2014 when the Fed first began to discuss the possibility of rising interest rates, micro-cap growth equities have trailed larger capitalization companies by over 27%, as measured by the Russell Microcap Growth Index and the S&P 500 index. After such a strong multi-year run of outperformance that ended in early 2014, it is not uncommon to see this type of underperformance; however, this doesn't make the returns any more palatable. The indiscriminate selling that has been so common in the marketplace today has created a situation where the median stock is down much more than the index, creating a difficult investment backdrop for active managers over the past fiscal year.

Performance

In regard to the Fund's benchmarks, for the fiscal year ended March 31, 2016, the Russell 2000 Growth Index declined 11.84% while the Russell Microcap Growth Index fell 17.02%. The Fund dropped -23.51% for the fiscal period.

For the fiscal year, energy and health care were worst two performing sectors in the Russell Microcap Growth Index. The collapse in crude oil prices was the obvious reason for energy weakness while risk aversion and lack of positive cash flow and earnings were key factors in health care's decline. The Fund did not have any meaningful exposure to energy, thus its impact was limited for the year. Health care, on the other hand, was a meaningful detractor from the Fund's absolute return given the decline of approximately 21% for the holdings in this sector. Despite this sharp drawdown, the Fund compared favorably to the Russell Microcap Growth Index's decline of approximately 31% in the health care sector. Strong stock selection led to this relative outperformance, as several companies advanced their commercial development efforts by reporting positive clinical trial data while several holdings were acquired at significant premiums by larger companies.

Sectors that detracted most from the Fund's relative performance for the fiscal year included technology, industrials and materials. Despite having an in-line weighting in technology, stocks that the Fund held within this sector declined meaningfully more than the Russell Microcap Growth Index benchmark. While some of this underperformance is a result of poor management execution and/or loss of competitive position, we believe other stocks were sold indiscriminately. In situations where a particular company's future prospects appeared impaired, decisions were made to eliminate the positions. However, in cases where our research led us to conclude that investors had lost focus of the long-term opportunity, positions sizes were increased. Another area of weakness was the industrials sector, as many companies in this sector sell to businesses in the energy and materials sectors. This made for

a challenging business environment that caused several of the Fund's holding to suffer. Lastly, the materials sector, while only representing a small percentage of the Fund, had two holdings in particular that declined meaningfully as a result of the extreme collapse in commodity prices.

Fund positioning

Over the past fiscal year, the Fund has been repositioned with the average position size increasing as the Fund has held significantly fewer issuers. Health care remains the largest weighting in the Fund, but it is below the benchmark's weighting, and biotech exposure has been reduced in favor of more medical instrument and services-related companies. The weighting within technology has shifted toward companies that have a software-as-a-service (SaaS) business model and away from businesses that are more hardware-related. The Fund is now meaningfully overweight the benchmark in the technology sector. Consumer discretionary remains an area of focus and the Fund's relative overweight in that sector has increased since last year's annual report. The job market remains healthy, wages are rising, home values are increasing and lower energy prices are acting like a tax cut for consumers, which should provide a healthy backdrop for discretionary spending. As a group, the energy, materials and industrials sectors are underweight; however, the steep sell off in early 2016 created what appears to be buying opportunities for existing positions, as well as good entry points for new holdings that have the potential to be attractive long-term investments. Financials and consumer staples remain a small portion of the benchmark and the Fund's overall portfolio. Telecommunications represents a small portion of the benchmark but it is a relative overweight given the trend toward next generation communications services.

Outlook

The past fiscal year was yet again another reminder of the emotional roller coaster ride that equities can take investors on. The many cross currents facing the market today make it especially easy for emotions to drive trading behavior, both up and down, in the short term, yet we believe fundamentals will always win out over time.

Our primary focus during challenging times is to double down on our research efforts to seek to enhance the Fund's holdings and return potential. The objective is to focus on areas of the economy that are experiencing longer-term secular growth tailwinds, and more importantly, the companies that we believe should benefit from this. Further, the goal is to identify what we believe are innovative companies with strong business models and management teams that can execute against the opportunity. Companies as described above could be affected by the economic environment surrounding them, but ideally their robust end market opportunity, innovative and/or unique products and services could allow them to emerge stronger once the economic weakness subsides. Given the weakness in some stock prices over the past fiscal year, we were able to add to some of our favorite holdings at what we believe to be attractive prices, as well as add many new holdings to the portfolio. Rather than being emotional and reactionary, the Fund's primary goal is to follow the research to wherever it leads. We believe this strategy will uncover companies with quite favorable prospects for long-term capital appreciation. So while we don't wish for anymore sudden, dramatic declines in equity prices, we know there will always be times like this and our objective will be to take advantage of those investment opportunities when they present themselves.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Investing in micro-cap stocks may carry more risk than investing in stocks of larger, more established companies. Prices of growth stocks may be more sensitive to changes in current or expected earnings than the prices of other stocks. Growth stocks may not perform as well as value stocks or the stock market in general. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The indexes noted are unmanaged, include reinvested dividends and do not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Micro Cap Growth Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Micro Cap Growth Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-27.91%	-27.06%	-24.06%	-23.14%	-23.63%	-23.03%	-23.36%
5-year period ended 3-31-16	2.05%	2.07%	2.49%	3.72%	—	—	3.89%
10-year period ended 3-31-16	—	—	—	—	—	—	—
Since Inception of Class through 3-31-16 ⁽⁵⁾	12.51%	12.16%	12.54%	13.92%	5.43%	-8.27%	13.89%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 2-17-09 for Class A shares, 2-17-09 for Class B shares, 2-17-09 for Class C shares, 2-17-09 for Class I shares, 12-19-12 for Class R shares, 7-31-14 for Class R6 shares and 2-17-09 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Kimberly A. Scott

Below, Kimberly A. Scott, CFA, portfolio manager of Ivy Mid Cap Growth Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. She has managed the Fund since 2001 and has 29 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Mid Cap Growth Fund (Class A shares at net asset value)	-10.27%
Ivy Mid Cap Growth Fund (Class A shares including sales charges)	-15.43%
Benchmark(s) and/or Lipper Category	
Russell Midcap Growth Index (generally reflects the performance of securities that represent the mid-cap sector of the stock market)	-4.74%
Lipper Mid-cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-8.46%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

The mid-cap growth sector of the market as measured by Russell Midcap Growth Index, the Fund's benchmark, lost 4.75% in the 12-month period ended March 31, 2016. During this same period, the Ivy Mid Cap Growth Fund lost -10.27% before accounting for sales charges.

Contributors and detractors over the period

The primary factors in the Fund's underperformance were stock selection issues in the consumer discretionary and consumer staples sectors. An overweight position in the poorly performing energy sector was also a significant, factor contributing to the Fund's relative underperformance. Technology was the other sector that negatively impacted performance in 2016. All other sectors contributed to relative performance, with the greatest positive impacts coming from the financials, materials, health care and industrials sectors. The Fund's exposure in utilities and telecommunications also generated positive relative performance for the fiscal year. Our cash position, which averaged approximately 1% across the period, was seven basis points positive to performance, while the performance of our equity options, used primarily for hedging purposes, or to build or exit positions, was seven basis points negative to performance.

The Fund's consumer discretionary sector exposure made the greatest negative contribution to its return for the fiscal year. We were underweight this underperforming sector, but our exposure to retail and related sectors was a liability for the Fund in a year when e-commerce activity accelerated, taking market share and requiring many retailers to step up investment to try to maintain competitiveness and relevance to consumers. These costs and higher labor expenses pressured the profitability of many companies in the portfolio, such as Bed Bath and Beyond, Inc., Williams-Sonoma and DSW, Inc. Other key factors significantly impacting retailers over the past 12 months were weak demand in emerging markets and the appreciation of the dollar, which hurt many retailers based both on currency translation effects and the ultimate negative impact on travel to the U.S. from abroad. Related demand for retail goods in flagship stores in markets such as New York City also hurt many retailers. Companies in our portfolio that struggled related to these issues included Tiffany & Co., Polo Ralph Lauren Corp., Burberry Group and Kate Spade & Co. Another notably weak name in our consumer discretionary sector was Polaris Industries, a manufacturer and marketer of all-terrain vehicles, Indian motorcycles, and snowmobiles. Weakness in energy and agriculture began to hurt demand for their products in the last half of 2015, and then a very warm and mild start to winter in many of their key markets piled on as we closed out the calendar year and began 2016. Several names in this sector, however, managed to perform well last year. Companies such as Mattel, Inc., which posted a very strong return after a prolonged period of weakness, Ulta Salon, Cosmetics and Fragrance, Carter's Inc., the children's clothing retailer, and Under Armour, Inc., the fast-growing athletic apparel company, generated strong positive returns last year. Ulta and Carter's are no longer Fund holdings. The greater domestic market exposure for most of these names was a benefit to their business versus many other companies.

An opportunity cost for the Fund's consumer discretionary performance came from lack of exposure to Netflix, which was in our benchmark index for part of the year, returning greater than 56% while in the benchmark, and contributing 38 basis points to index performance for the fiscal year.

Our consumer staples names were broadly weak over the past fiscal year, and contributed significantly to the Fund's underperformance. We were underweight a strongly outperforming group, and had stock selection issues. The issues were varied. Both Hain Celestial Group and Whole Foods Market, Inc. struggled with issues related largely to competitive pressures in the market for organic and natural foods. Both of these companies have been highly successful leaders in the growth of this industry, setting a pace and example that has fostered competition. We believe these companies will continue to lead in this robust sector, and we think the stocks will once again reflect as management teams address the nearer-term dislocations and questions about their positions in the marketplace. Mead Johnson Nutrition Company, the maker of Enfamil infant formula and a stellar consumer product company, struggled last fiscal year related to competitive issues in China, significant changes in product distribution patterns in that country, and the foreign currency translation impact of a strong dollar. A stock that ended the fiscal year on a strong note was Blue Buffalo Pet Products, which produces and sells pet food made from natural ingredients. The stock was weak for much of the period following its initial public offering in 2015, but it delivered strong performance in the first quarter of 2016 as the strength of its business became clearer to investors.

The negative contribution from our technology exposure resided in a number of names, including Pandora Media, Teradata Corp. (no longer a Fund holding), GrubHub, Inc., ServiceNow, Harris Corp. and Alliance Data Systems (no longer a Fund holding). We were also underweight the strong

semiconductor and computer services sectors. One of our biggest disappointments in the technology sector this fiscal year was Pandora, the internet radio service company. The stock struggled for much of the period under the weight of concern about a 2015 Copyright Royalty Board rate decision. That decision materialized as a neutral to positive factor for Pandora's business going forward, as we expected, but the stock continued to be weak as concerns mounted regarding the company's future investments to expand and diversify its business. We continue to believe that Pandora is the premier asset in the internet radio space with a strong and growing commercial opportunity. We retain the name in the portfolio. Weakness in Teradata continued related to concerns about its place in a rapidly changing computing and storage infrastructure marketplace. The Fund held some stocks that performed very well in the group over that past 12-month period, including Electronic Arts, SanDisk Corp. (no longer a Fund holding), which received a buyout offer, Ellie Mae, Inc., a rapidly growing software-as-a-service provider to the mortgage industry, and Trimble Navigation Ltd., a recent re-addition to the portfolio.

Energy names were weak across the board, as the swift decline in the price of oil from June through December of 2015 became a woodshed moment for the group generally, and our names, specifically. Our largest negative contribution for the fiscal year came from the names we own with exposure to domestic shale oil drilling in the Bakken region. Oasis Petroleum, Continental Resources and Southwestern Energy all delivered significantly weak performance. (Oasis is no longer a Fund holding). Cabot Oil & Gas Corporation, which is heavily exposed to the natural gas market, also struggled. We understood the severe reaction by investors to the rapid changes in the economics of oil and gas related companies, but we were of the opinion that the problem became considerably discounted, as the dynamics of shale oil drilling may be such that the oversupply problem is solved with greater expediency than we've seen historically. We retained most of our energy positions in the portfolio, and have added exposure since late 2014, in both new and existing positions, where we have seen stock price opportunities present themselves. Noble Energy and Cimarex Energy are both new to the portfolio since late 2014. We eliminated two positions, Southwestern Energy and Dril-Quip, given our concern that the problems of deep water drillers, such as Petrobras, to whom Dril-Quip sells its equipment, would be severe and protracted.

Our financial names made the greatest positive contribution to the Fund's performance over the past 12 months, largely based on stock selection. We were overweight this underperforming group, delivering a strong positive return against a sector that had a negative return in the benchmark. Two of our bank stocks led the performance, based on strong growth in their businesses and a more favorable interest rate environment. First Republic Bank and Signature Bank of New York have been perennially strong growth banks. CME Group was another strong performer in the Fund. Northern Trust Corporation, a high quality moderately growing trust bank, was slightly weak, but outperformed the financials sector. UMB Financial Corp., conversely, did not capitalize on the benefits to banks and their stocks last fiscal year, as difficulties in its asset management business offset solid loan growth at the bank.

When compared to the index, our materials exposure performed strongly on the back of a takeout in one of our two names, Valspar Corp., which is being acquired by Sherwin-Williams. Scotts Miracle-Gro Corp. also delivered a strong positive return on strength in its business.

Our health care stocks made a positive contribution to performance, largely based on stock selection. We were overweight this underperforming group, and our names delivered significantly better performance than those in the benchmark. Most of our stocks in this well-diversified group of holdings posted positive returns for the fiscal year. Strength came from Align Technology, the maker of Invisalign braces, Henry Schein, Inc., a long-term holding, Incyte Corp., a biotechnology stock that we have sold, and Edwards Lifesciences, a relatively recent addition. Weakness in the group was led by our biotechnology names, including Alkermes plc, BioMarin, ACADIA Pharmaceuticals and Medivation. Alkermes, in particular, was very weak late in the fiscal year following disappointing data related to a clinical trial for a new drug to treat depression. The company is doing additional research on this drug and is confident in its ultimate success. Alkermes has a strong base business of central nervous system compounds, and a sizeable pipeline of new drugs. The health care sector continues to offer opportunities for both growth and defensiveness, often in the same name. We added aspects of both to the sector last period with purchases of Laboratory Corp. of America, a moderately growing laboratory diagnostics business, and Edwards Lifesciences Corp., an innovator in the area of heart valves.

The Fund's industrials exposure added to performance in the past 12-month period. We were slightly underweight industrials and our names rose in value as a group, while the sector in the index posted a loss. We had reduced our exposure to energy-related industrial companies, which was a benefit to performance. Still, those names, including Flowserve and Joy Global, among others, had a negative impact on the group in our portfolio and were sold. Names that performed well and helped deliver the outperformance included Fortune Brand Home & Security, which is benefitting from a better housing economy related to its sale of cabinets, faucets, and its Master Lock security products; Fastenal Co., a long term holding whose performance began to improve based on optimism for demand for its products related to improvements in the energy and manufacturing areas of our economy, and Verisk Analytics and Willis Towers Watson plc., both business services companies with relatively consistent operating models.

The Fund's lack of exposure to utilities and telecommunications, both underperformers in the index, was slightly positive to performance.

We were overweight health care and technology, financials and energy last fiscal year, and underweight consumer staples, materials, consumer discretionary, industrials, telecommunications and utilities.

Outlook

The markets became more volatile and unsettled in the back half of 2015 than in some time, and that volatility was magnified as we entered 2016. Weakness in commodity markets and dollar strength has threatened profitability for many companies in energy, materials and industrials, with risk of a wider impact based on related stresses in credit markets. Concerns about economic growth in emerging markets, including China, where there is considerable murkiness around the pace of growth and the functioning of the country's capital markets has been a source of angst, as is the direction and level of conviction of the Federal Reserve (Fed) with respect to future interest rate increases.

Complicating the assessment of the current and future investing environment is the rapid pace of change that is in motion for many sectors of our economy. The technology industry is always rapidly evolving, but even there, concentration of computing power in the hands of a few big companies is changing the economics and demand dynamics for many users and producers of equipment, software and services. Consumer discretionary is finding new fault lines in many subsectors as consumer migration to e-commerce and over-the-top media consumption upends brick and mortar retailing, the business models of cable television providers and their content partners, and advertising models in general, all at an accelerating pace. The success of technological innovation as applied to oil and gas exploration by frackers in shale formations in the U.S. has led to both a boom and a bust for that industry that is currently reverberating throughout the domestic and world economies.

Transportation is another area that we think could benefit from applied information and logistics, at the same time that it is reeling from the downturn in energy and agriculture, not to mention the yet uncertain impact of the evolving brick and mortar retail landscape. The commercial real estate sector has yet to experience the full impact of many of these changes, but as evidenced by the restructuring announced by Macy's in the first week of January 2016, we believe much change lies ahead for that area. The automobile industry is in the early stages of extreme innovation as it moves from focusing on improving fuel efficiency and controlling emissions to delivering fail safe driver assist safety features and autonomously operating vehicles. We believe that semiconductor and software companies that can develop the operating systems and hardware that can lead these innovations will be huge beneficiaries.

In the financials sector, regulation has brought many changes and unintended consequences for capital markets, much of which we have likely not yet witnessed, but technology promises to bring even greater change as payment systems and methodologies evolve to meet the demands of mobile consumers who want to shop and pay whenever, wherever, with great efficiency and the highest levels of security. We believe the status quo will be challenged and today's financial system giants will be tasked with maintaining relevance and profitability. Health care is another important area where we think changes in product development, the delivery of care, and the use of information to tie it all together and make it perform at an even higher level in the future will have significant implications for patients, providers and investors.

All of this, across all of the economy is just the beginning. As investors we must balance the stresses of the current environment with the challenges and opportunities of the future — even as the future seems to be speeding toward us at an unprecedented pace. The worry over the current state of affairs in the economy and the stock market, while appropriate, seems a little late to us. The hit to our economy from oil price weakness, dollar strength and emerging market growth difficulties began to develop over a year ago, gaining strength and impact as 2015 developed. A recession has been at hand across much of our economy and stocks across energy, industrials, materials and consumer discretionary have logged significant losses relative to the broader stock market indices. While the all-clear signal has yet to sound, we believe opportunity is developing in the stocks of very good companies across all of these groups. Many market participants are loathe to risk finding that opportunity in such a rapidly changing and challenging environment, especially as the Fed has signaled that it will be less accommodative as the year progresses. In addition, the stresses in the credit markets from the troubles in the energy sector will become more widespread, presenting a risk to broad economic activity. We believe, however, that there are many encouraging offsets to the negatives we see in the economy, including low oil prices, which are a big benefit to consumers, solid job growth, encouraging wage gains, firmness in the service sector, several quarters of strong household formation activity, and growth in the housing market. Many stocks have discounted serious concerns and are poised for better performance as investors look beyond the safety of consensus leaders in the market to find differentiated return opportunities. We think a shift in investor perspective about real value in the market will be a benefit to the Fund and we will continue to invest in companies that present a balance of growth and valuation which we think should yield substantial return opportunities for our shareholders over time.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in mid-cap stocks may carry more risk than investing in stocks of larger, more-established companies. Prices of growth stocks may be more sensitive to changes in current or expected earnings than the prices of other stocks. Growth stocks may not perform as well as value stocks or the stock market in general. The use of derivatives presents several risks, including the risk that these instruments may change in value in a manner that adversely affects the Fund's NAV and the risk that fluctuations in the value of the derivatives may not correlate with securities markets or the underlying asset upon which the derivative's value is based. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Mid Cap Growth Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Mid Cap Growth Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-15.43%	-14.12%	-10.92%	-15.57%	-10.00%	-10.55%	-9.85%	-10.26%
5-year period ended 3-31-16	5.09%	5.31%	5.58%	4.83%	6.68%	6.05%	—	6.42%
10-year period ended 3-31-16	6.45%	6.25%	6.33%	—	—	6.90%	—	7.32%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	6.43%	7.91%	—	0.68%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$3,139,371	\$ —	\$ —
Purchased Options	54	180	—
Total	\$3,139,425	\$ 180	\$ —
Liabilities			
Written Options	\$ —	\$9,166	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronym is used throughout this schedule:

OTC = Over the Counter

See Accompanying Notes to Financial Statements.

MANAGEMENT DISCUSSION

Ivy Mid Cap Income Opportunities Fund

(UNAUDITED)

Kimberly A. Scott

Nathan A. Brown

Below, Kimberly A. Scott, CFA, and Nathan A. Brown, CFA, portfolio managers of Ivy Mid Cap Income Opportunities Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2016. Ms. Scott has 29 years of industry experience and Mr. Brown has 16 years of industry experience. They have co-managed the Fund since its inception on October 1, 2014.

Fiscal Year Performance

For the 12 months ended March 31, 2016

Ivy Mid Cap Income Opportunities Fund (Class A shares at net asset value)	0.06%
Ivy Mid Cap Income Opportunities Fund (Class A shares including sales charges)	-5.72%
Benchmark(s) and/or Lipper Category	
Russell Midcap Index (generally reflects the performance of securities that represent the mid-cap sector of the stock market)	-4.04%
Lipper Mid-Cap Core Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-6.27%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Key drivers

The Russell Midcap Index, the Fund's benchmark, struggled over the past 12 months, generating a decline of 4.04%. The most significant event during the fiscal year was the continued decline in commodity prices, particularly oil, throughout the period with an annual decline of 23% for WTI (West Texas Intermediate, a grade of crude oil used as a benchmark in oil pricing). While this obviously put pressure on the energy sector, the weakness extended to the materials and industrials sectors as well. Despite a better backdrop from a macroeconomic perspective, certain consumer discretionary stocks struggled during the fiscal year given the secular realities of a growing piece of sales that is garnered by e-commerce as well as the impact of an unseasonably warm winter that caused less demand for winter apparel.

The best performing categories were consumer staples, as activism has helped create more discipline in that sector, and utilities, as investors sought safety in the down market coupled with continued low interest rates despite an increase in the Fed Funds rate in December. Financials and technology both outperformed the benchmark, but still produced negative total returns. Health care experienced significant negative pressure to start calendar year 2016 after being an outperformer for multiple years. This pressure is likely associated with political risk given the rhetoric about reducing prescription drug prices.

Stocks with income yields (both return of capital or dividends), particularly higher-yielding securities, saw significant outperformance during the fiscal year. The highest quartile of dividend-yielding securities posted positive returns while the lowest quartile was the worst performing group. We attribute this performance to both the negative returns in the overall market and a muted move in long-term interest rates keeping dividend yields attractive versus fixed-income instruments.

Strategy, contributors and detractors

The Fund, while remaining relatively flat for the fiscal year ending March 31, 2016, significantly outperformed its benchmark, before sales charges. Dividend income produced 3.7% of performance during the period. The outperformance is explained by strong stock selection and preference for high-yielding income stocks as the Fund's sector allocation was a headwind during the fiscal year.

The Fund's sector allocation stayed consistent throughout the fiscal year. Overweight sectors continue to be materials, energy and consumer staples while underweighted sectors were financials, utilities and health care. These weightings predominantly the result of finding good growth opportunities at reasonable valuations that also have a substantial dividend yield.

The outperformance in the Fund fell predominately into four sectors: materials, technology, consumer staples and consumer discretionary. All of our stocks in the materials sector outperformed both the sector and benchmark, with exceptionally strong performance from Avery Dennison Corp., as underlying strength in its business helped produce better-than-expected revenues with lower commodity costs. Our semiconductor exposure through Xilinx Inc., Maxim Integrated Products and Microchip Technology drove much of the outperformance in the technology sector as the proliferation of semiconductors continued beyond the traditional consumer electronics end market. While the consumer staples sector had many strong performers during the fiscal year, our exposure through McCormick & Co., Kellogg Co. and Clorox Co. bested the overall strong sector performance. Each of these companies has a renewed focus on cost containment given increased activism in the overall sector. In addition, these companies are also producing better than market expectations for constant currency revenue growth. Finally, a significant operational and financial turnaround appears to be unfolding at Mattel, which was one of the Fund's best performing stocks during the fiscal year, and was the reason for outperformance in consumer discretionary.

Fund performance in the energy sector was quite challenged during the fiscal year. Weakness in that sector was caused by both a large overweight position and exposure to master limited partnerships through Targa Resources Partnership and Plains All American Pipeline. Both companies were very weak during the period for both fundamental as well as technical reasons. During the fiscal year, Targa Resources Partnership was acquired by its parent Targa Resources Corp. and the company saw significant appreciation after the close date, which limited some of the negative performance in this sector.

Financials was also an area of weakness in performance caused predominately by Fund exposure to Artisan Partners Asset Management. This asset manager experienced difficult relative performance in some of its largest mutual funds, which caused net redemptions for the company during the period. This, coupled with negative equity markets, likely drove the pressures in the stock.

Outlook

Since inception of the Fund, we have been watching several key variables to determine positioning. These variables (domestic economic growth, change in interest rates, change in commodity prices and foreign economic growth) have remained consistent over the fiscal year of the Fund and continue to be monitored.

Domestic economic growth: Many early indicators are pointing to much better growth for the industrial economy in the U.S. Commodity prices have begun to firm and the ISM Manufacturing Index has improved above 50 with very strong new orders in the survey. While we are a bit skeptical about the magnitude of the improvement, we expect the industrial side of the economy will show some sequential improvement from a miserable fourth quarter of 2015 as inventory was being liquidated. The consumer environment remains very constructive. The job market remains accretive, the wage environment appears to be tilting toward inflationary, and non-disposable spending on items like utilities and gasoline are still benefiting the consumer because of low commodity prices. This continues to create an environment where consumers have the ability to spend and we believe they will continue to do so. We believe the U.S. economy will grow at a faster pace than in recent years, but still remain below historical growth averages.

Change in interest rates: After what seemed like years of threats, the Federal Reserve (Fed) finally increased interest rates. The overall result within the interest rate environment has been muted, particularly in longer-dated securities. Global yields remain very low and seem to be putting pressure on the U.S. yield curve. We expect that short-term yields will continue to increase as the Fed slowly steps up the Fed Funds rates, but we remain less confident in the direction of longer-term yields. We believe the current scenario is quite favorable for the Fund to enable it to offer a competitive yield component to other securities in the market but also have the potential for capital appreciation.

Change in commodity prices: We believe the next change in commodity prices to be decisively positive, particularly for oil. This outlook is based on the declining production we have already seen and will likely continue to see in the U.S. given the realities of the lower oil price since the beginning of the calendar year. Inventories are still high and will get worked off over the ensuing months, which should help to increase prices. Higher prices will be met with more production, so a spike seems very unlikely at this time. We remain comfortable with Fund's overweight position in energy.

Pressures on foreign economies: China's growth continues to disappoint and based on regular dialog we have with individual companies, the growth appears to be even slower than the economic numbers would suggest. The currency benefit that many companies were able to take advantage of over the past year appears to have run out of steam as most currency rates are now flat on a year-over-year basis versus the dollar. This has the potential to put pressure on some of the large exporting nations; however, we think it likely that economies that are dependent on commodities should see a benefit as most commodities are priced in dollars. Latin America and the Middle East remain areas that garner attention, but both are relatively small and their ability to dramatically impact global markets should be contained. We believe that negative interest rates in multiple countries across the global should cause skepticism about the overall strength of the world's markets, but their biggest impact in the short term is that our Fund's investment style should remain in favor.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in mid-cap stocks may carry more risk than investing in stocks of larger, more-established companies. Dividend-paying instruments may not experience the same price appreciation as non-dividend paying investments. There is no guarantee that the companies in which the Fund invests will declare dividends in the future or that dividends, if declared, will remain at current levels or increase over time. The amount of any dividend paid by the company may fluctuate significantly. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Mid Cap Income Opportunities Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Mid Cap Income Opportunities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-5.72%	-0.70%	-5.76%	0.28%	-0.41%	0.28%	-0.03%
5-year period ended 3-31-16	—	—	—	—	—	—	—
10-year period ended 3-31-16	—	—	—	—	—	—	—
Since Inception of Class through 3-31-16 ⁽⁴⁾	3.45%	6.89%	3.50%	7.95%	7.18%	7.95%	7.63%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) 10-1-14 for Class A shares, 10-1-14 for Class C shares, 10-1-14 for Class E shares, 10-1-14 for Class I shares, 10-1-14 for Class R shares, 10-1-14 for Class R6 shares and 10-1-14 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Common Stocks	\$114,326	\$ —	\$ —
Short-Term Securities	—	4,557	—
Total	<u>\$114,326</u>	<u>\$ 4,557</u>	<u>\$ —</u>

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

See Accompanying Notes to Financial Statements.

Mira Stevovich

Below, Mira Stevovich, CFA, portfolio manager of the Ivy Money Market Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. She has managed the Fund for 15 years and has 29 years of industry experience.

The Fund's fiscal year ended on March 31, 2016 with short-term rates higher due to the 0.25 percent rate increase by the Federal Reserve Board (Fed) on December 16, 2015. The Fed continued to maintain an accommodative policy that provided liquidity to the economy during most of the Fund's fiscal year. However, the move by the Fed in December began the process of draining liquidity from the economy, albeit gradually. During the fiscal year, the money markets continued to be affected by low rates, as well as regulatory changes in the banking sector. The economy showed signs of improvement, and although there was some anticipation that the Fed would increase short-term rates by 0.25 percent by its September 2015 board meeting, the low rate of inflation and economic turmoil in other parts of the world allowed for the continuation of an ultra-low federal funds target rate until the December rate increase.

Lower rates, higher-quality bias

The Fund's fiscal year started with the federal funds rate ranging from 0 percent to 0.25 percent, and changed on December 16, 2015 to a rate ranging from 0.25 percent to 0.50 percent. The Fed had been testing a "Reverse Repo Program" to determine if reverse repurchase agreements could be integral to managing the federal funds' rate once the Fed began increasing short-term rates. This program helped the short-term market manage liquidity and provided the Fed with useful data. The Reverse Repo Program had been capped at \$300 billion, but with the rate increase, the cap on this program was lifted to allow for better management of short-term rates in the 0.25 percent to 0.50 percent target range. Although there is anticipation that the Fed will increase the federal funds' rate during 2016, it is anticipated that the process would remain gradual. As a result, we continue to manage the Fund based on the interest rate environment, closely monitoring any potential rate changes and adjusting investments accordingly.

The drastically low rates of interest during the fiscal year restrained the performance of the Fund and rates on money market investments, in general. The Securities and Exchange Commission's (SEC) regulation requiring that at least 30% of the Fund's holdings mature in five business days or less also affected the Fund's return because very short maturities tend to carry the lowest interest rates.

Also acting to depress rates on the shortest maturities are new banking regulations that make short-term borrowing by banks more difficult. These new regulations have reduced the supply of securities in the short maturity range, adding downward pressure on rates. Within the confines of the Fund's liquidity and maturity requirements, we sought to maintain yield by purchasing longer-dated securities when credit spreads were wide. We also invested in floating rate notes based on the one- or three-month London Interbank Offered Rate (LIBOR). These notes carry an attractive rate of investment, while allowing us to maintain a modest weighted average maturity of the Fund. The 3-month LIBOR rate began the fiscal year at 0.27075 percent and has moved gradually upwards until the December rate move, ending the fiscal year higher at 0.62860 percent. The one-month LIBOR rate began the fiscal year at 0.1755 percent and ended the fiscal year considerably higher at 0.43725 percent. Investments based on these indexes provide quick upward rate resets as rates increase.

Credit quality remained an important factor in the management and performance of the Fund. We are cautious in our review of the companies and securities in which we invest. We select investments that we believe to be of the highest credit quality, based on our credit risk constraints, although this higher-quality bias can negatively affect yield.

Staying the course

This past fiscal year, we have emphasized investments of the highest credit quality from many industries and sectors, and we intend to continue to do so going forward. We remain very selective of our investments. Corporate debt was used as an alternative investment when possible. We continue to use floating-rate securities in anticipation of future rate increases. We will also consider investing in U.S. Treasury and government agency securities, as necessary.

We are managing the Fund to comply with recent amendments to SEC regulations of money market funds. The SEC adopted such amendments in an effort to provide money market fund investors with greater protection and more timely information about the fund in which they invest. To this end, we are maintaining daily and weekly liquidity levels according to the regulations to provide for the liquidity needs of our shareholders. We continue to manage the Fund in a prudent manner and in accordance with SEC regulations.

You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

SCHEDULE OF INVESTMENTS

Ivy Money Market Fund *(in thousands)*

MARCH 31, 2016

Notes to Schedule of Investments

(A) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

(B) Rate shown is the yield to maturity at March 31, 2016.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Corporate Obligations	\$ —	\$153,477	\$ —
Municipal Obligations	—	31,778	—
United States Government and Government Agency Obligations	—	38,464	—
Total	\$ —	\$223,719	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronym is used throughout this schedule:

GTD = Guaranteed

See Accompanying Notes to Financial Statements.

Bryan J. Bailey

Below, Bryan J. Bailey, CFA, portfolio manager of the Ivy Municipal Bond Fund (the “Fund”), discusses positioning, performance and results for the fiscal year ending March 31, 2016. He has managed the Fund since 2008 and previously was the manager of the Fund from 2000 through 2007. He has 27 years of industry experience.

Fiscal Year Performance

For the 12 months ended March 31, 2016

Ivy Municipal Bond Fund (Class A shares at net asset value)	2.87%
Ivy Municipal Bond Fund (Class A shares with sales charge)	-1.53%
Benchmark(s) and/or Lipper Category	
S&P Municipal Bond Index (generally reflects the performance of the U.S. municipal bond market)	3.84%
Lipper General & Insured Municipal Debt Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	3.49%

Please note that Fund returns include applicable investment fees and expenses, while index returns do not include any such fees. The performance discussion below is at net asset value.

1. How did the fund/portfolio perform relative to its benchmark?

The Fund underperformed its benchmark index and Lipper peer group for the fiscal year (“FY”) ending March 31, 2016. Underperformance can be explained by a defensive-to-neutral duration (interest rate sensitivity) and an overall defensive portfolio structure.

2. What market conditions or events affected the Fund’s return?

The beginning of the FY brought about an abrupt shift in investor sentiment. Investor flows, which had been very strong in Q1 2015, quickly turned negative as market expectations that the Federal Reserve Board (Fed) would finally begin moving the Fed funds rate off of 0% (“liftoff”) began to gain traction. Comments at the March 2015 Federal Open Market Committee (FOMC) meeting that additional Fed action would be “data dependent” elevated volatility in the market, and daily market moves saw wide swings up and down, depending on the strength/weakness of the most recently reported economic data point. This high level of uncertainty around the timing of the initial Fed funds rate liftoff, coupled with the seemingly non-stop media discourse on the topic, appeared to add an element of confusion on the part of municipal investors. As a result, demand for the product was muted in Q2 and Q3 of 2015.

Q3 2015 brought an elevated level of concern regarding the slowing Chinese, Japanese, and European economies, as well as continued downward pressure on commodity prices. While the U.S. economy appeared to be growing modestly, global equity markets sold off aggressively. U.S. equity market sentiment turned negative on the belief that problems outside of the U.S. would eventually constrain U.S. growth and that continued U.S. dollar strength would increase the odds of a deflationary spiral. Against this backdrop, market expectations for the initial Fed rate liftoff were pushed back. The result was an aggressive flight-to-quality that drove Treasury and municipal bond yields lower. This in turn stimulated a renewed interest in the municipal bond space as investor flows once again turned positive heading into Q4 2015. Constrained supply and high demand for municipal bonds in Q4 2015 set the stage for impressive municipal bond market performance, once again stimulating increased investor flows into the sector. While the Fed finally lifted the funds rate to 0.25% in December 2015, the market seemingly continues to question the strength of the U.S. economic recovery, and therefore the trajectory and schedule of potential additional monetary policy actions.

In Q1 2016, constrained supply and high demand within the municipal bond market continued. In our view, absolute yields continue to be attractive relative to most global investment-grade fixed income alternatives, including foreign investors, and flows into the asset class continues to be robust. Returns for the asset class continue to be positive as we enter Q2 2016.

3. What strategies and techniques did you employ that affected fund performance?

The Fund both began and ended the fiscal year positioned defensively in anticipation of the increasing interest rate cycle and the potential end of the 30-year bull market in bonds. Fund sensitivity to interest rates was held at a neutral-to-slightly-lower sensitivity level relative to the Fund’s benchmark index throughout the FY. This was achieved by holding an elevated cash position as well as approximately 5.5% exposure to municipal floating rate notes and municipal auction rate notes. The shorter duration strategy hindered performance over the fiscal year, and the elevated cash position reduced the income contribution to total return modestly. Portfolio turnover remained very low, as we felt that the Fund was structured appropriately entering the FY.

4. What sectors (if applicable) did you emphasize during the fiscal year?

Overall performance was negatively impacted by the portfolio’s defensive structure, as well as its elevated cash position. The elevated cash position was intended to provide a cushion against potential redemptions as we entered the most recently completed FY, as well as a tactical position to redeploy into anticipated higher-yielding investments as the year progressed. Neither of these events materialized and, while the market traded in a

narrow range over the course of the year, the resulting income sacrifice from the cash allocation constrained overall performance. The Fund has a long-term track record of providing above-average total returns to shareholders with what we consider to be one of the lowest volatility measures in the industry. We will not compromise our investment principles. Therefore, we are not willing to take excessive credit and duration risks or utilize leverage in an effort to produce out-sized returns that historically have been unsustainable. We believe doing so subjects investors to increased risks of the likely downside and a higher level of NAV volatility. We will not compromise our management discipline. Preservation of capital is an important consideration in our efforts.

5. What is your outlook for the year ahead?

We enter the new fiscal year facing many of the same challenges that we faced entering FY 2015: interest rate risk, geopolitical risk, global slowdown/deflation risk and currency risk, as well as having to deal with speculation and uncertainty regarding the Fed's timetable and trajectory for U.S. monetary policy moving forward. There is also the issue of municipal headline risk — when you must deal with negative press coverage that could affect either the entire bond market, or even just a specific sector or state.

We believe these are very trying and volatile times for investors. While we anticipate U.S. gross domestic product numbers to grow at a respectable level over the next year, there is much that could go wrong and curtail what appears to be a moderate U.S. economic recovery. While the Fed has begun to tighten monetary policy, recent rhetoric and comments from Fed Chairwoman Yellen, as well as other FOMC Governors, apparently has introduced more uncertainty and confusion than clarity into the market. Geopolitical and terrorism (i.e., ISIS) tensions continue to be elevated in the Middle East and across Europe. The Chinese and Japanese economies have been slowing, and most European economies are either in or near recession. However, despite all of these negative factors, we remain cautiously optimistic that the U.S. economy will continue to grow modestly and that situations outside of U.S. borders will not be powerful enough to derail the recovery. Recent dollar weakness, viewed by many as a counterintuitive response to the Fed funds rate increase, has provided a welcomed respite for U.S. exporters and has stabilized commodity prices. There is also scant evidence that expectations for inflation may be picking up, as the U.S. labor market continues to tighten. Another uncertain factor that could impact markets in 2016 is the upcoming contentious U.S. Presidential election.

We could be entering a challenging period for fixed income investors, and total return expectations should probably be tempered to some degree. We believe it is unlikely that outsized total returns will continue into the future, especially given that interest rates are still extremely low by all historical measures. In this low-yield environment, the Fund's yield cushion does not provide much protection from capital losses when measuring total return. However, if and when rates begin to rise, more attractive reinvestment opportunities may become available, which could potentially boost portfolio income. We believe that the Fund's cash position will be able to provide reinvestment opportunities at higher prevailing future rates.

We believe that market volatility will remain elevated as a result of the risk-on/risk-off trades playing out in the Treasury market. When investors are nervous, they tend to shift their investments to the treasury market, which offers a lower general risk level (risk-off). Conversely, as they feel confident about the economy, they will shift away from treasuries into investments that may offer a greater return and more risk (risk-on). We continue to be very cognizant that the pendulum may at some point swing back to renewed interest outside of the municipal bond asset class, which would potentially result in less interest (and increased liquidations) in the investment-grade municipal bond space. While we believe that the 30+ year bull market in bonds is nearing the end, or has already ended, we do not believe that a bear market is necessarily imminent in the short run. Bond yields could stay in a low, narrow range for the remainder of 2016, into 2017, or even longer. Very low, even negative, interest rates across the globe could continue to boost demand for higher-yielding U.S. Treasury and municipal bonds, despite an improvement in the U.S. economy and increased domestic inflation expectations. Municipal bond new issue volume trends will need to be monitored closely. We will remain proactive and vigilant in assessing risk to the portfolio from a change in inflation expectations, as monetary policy continues to be extraordinarily accommodative. Inflation does not appear to be on the immediate horizon, and recent dialogue from the Fed suggests that they view deflation as a bigger risk.

We anticipate an elevated level of headline risk in our market. However, despite all of the naysayers, in our opinion, the municipal bond market is, and will remain, a very strong market from a credit perspective. Since the 2008 financial crisis, there has been an average of 4.5 municipal defaults per year, up from an average of 1.3 defaults annually from 1970 to 2007, according to Moody's. There were four defaults among Moody's rated municipal issuers in 2015. Municipal bond defaults continue to be heavily concentrated in the high-yield category.

Given these crosscurrents, the high level of uncertainty on all fronts, and our aforementioned viewpoint on the eventual direction of interest rates, we expect to keep the interest rate sensitivity of the Fund lower than, or neutral to, the benchmark index. The Fund will continue to hold an overweight cash position to give us the flexibility to take advantage of what we hope to be more attractive investment opportunities in the future. The Fund will continue to hold a reduced level of overweight positions in low A — BBB investment grade credits in an attempt to capture additional refinancing opportunities and credit upgrades. However, we do not anticipate actively adding lower quality exposure, and at this time we anticipate future investments to be higher quality in nature. The municipal yield curve continued to flatten over the last FY, and is currently much flatter than the 10-year average slope. Going forward, we expect to keep the average credit quality of the Fund in the A-AA range, while actively seeking relative value opportunities between sectors, states, and security structures. Positioning and asset distribution across the yield curve will continue to be a vital part of our investment strategy, as well as monitoring cross market technical factors. We will occasionally attempt to exploit trading opportunities in the high yield space without compromising our style discipline. We believe that the Fund is well positioned relative to its peers entering Q2 2016. The objective of the Fund remains the same: to seek to provide the level of current income consistent with preservation of capital and that is not subject to Federal income tax. To achieve that objective, we plan to continue investing in short, intermediate and longer-term investment grade (primarily) municipal bonds with an emphasis on overall quality and capital preservation with minimal yield sacrifice.

6. Were any derivatives used and, if so, what impact did they have?

No derivatives were used in the fiscal year.

The Fund's performance noted above is at net asset value (NAV) and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Municipal Bond Fund.

The Fund may include a significant portion of its investments that will pay interest that is taxable under the Alternative Minimum Tax (AMT). Exempt-interest dividends the Fund pays may be subject to state and local income taxes. The portion of the dividends the Fund pays that is attributable to interest earned on U.S. government securities generally is not subject to those taxes, although distributions by the Fund to its shareholders of net realized gains on the sale of those securities are fully subject to those taxes. The municipal securities market generally, or certain municipal securities in particular, may be significantly affected by adverse political, legislative or regulatory changes or litigation at the Federal or state level. These and other risks are more fully described in the fund's prospectus. Not all funds or fund classes may be offered at all broker/ dealers.

Our preference is to always use ratings obtained from Standard & Poor's. For securities not rated by Standard & Poor's, ratings are obtained from Moody's. We do not evaluate these ratings, but simply assign them to the appropriate credit quality category as determined by the rating agency.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Municipal Bond Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I	Class Y ⁽⁵⁾
1-year period ended 3-31-16	-1.53%	-1.89%	2.12%	3.09%	2.87%
5-year period ended 3-31-16	4.09%	4.06%	4.22%	5.23%	5.01%
10-year period ended 3-31-16	3.89%	3.70%	3.55%	—	4.27%
Since Inception of Class through 3-31-16 ⁽⁶⁾	—	—	—	4.78%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 4.25%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) The return shown for Class Y is hypothetical because there were no shares or assets for the period from September 24, 2008 through October 7, 2009. Class A data has been substituted for Class Y data during that period.

(6) 11-4-09 for Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

(A) Purchased on a when-issued basis with settlement subsequent to March 31, 2016.

(B) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.

(C) Zero coupon bond.

(D) Rate shown is the yield to maturity at March 31, 2016.

(E) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$6,710	\$ —	\$ —
Municipal Bonds	—	177,286	—
Short-Term Securities	—	47,489	—
Total	\$6,710	\$224,775	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronyms are used throughout this schedule:

AGM = Assured Guaranty Municipal
 AMBAC = American Municipal Bond Assurance Corp.
 BHAC = Berkshire Hathaway Assurance Corporation
 CR = Custodial Receipts
 FGIC = Financial Guaranty Insurance Co.
 FHA = Federal Housing Administration
 FHLMC = Federal Home Loan Mortgage Corp.
 FNMA = Federal National Mortgage Association
 GNMA = Government National Mortgage Association
 GTD = Guaranteed

See Accompanying Notes to Financial Statements.

Michael J. Walls

Below, Michael J. Walls, portfolio manager of the Ivy Municipal High Income Fund (the “Fund”), discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund for six years and has 18 years of industry experience.

Fiscal Year Performance

For the 12 months ended March 31, 2016

Municipal High Income Fund (Class A shares at net asset value)	3.61%
Municipal High Income Fund (Class A shares with sales charge)	–0.87%
Benchmark(s) and/or Lipper Category	
Barclays Municipal High Yield Index (reflects the performance of securities generally representing the municipal bond market)	3.45%
Lipper High Yield Municipal Debt Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	4.85%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Fund performance

The underperformance of the Ivy Municipal High Income Fund vs. the Barclays Municipal High Yield Index (“Index”) when sales charges are included can be attributed primarily to two investment decisions: one concerned duration positioning and the other a credit issue. First, and as discussed more fully below, as the municipal market rallied over the course of the past year, the Fund underperformed because it had a relatively shorter duration than the Index. Second, the Fund owned one municipal bond that significantly underperformed during the first quarter of 2016. When performance is looked at without sales charges, the Fund performed slightly better than its benchmark. It is important to note that the Fund did not invest in any derivative products over the last 12 months.

Market commentary

The municipal bond market remained full speed ahead for the fiscal year ending March 31, 2016 and, as concerns over global growth and geopolitical risks persisted, bond prices continued to rally. Fund inflows continued to be strongly positive. These inflows — as well as the continued lack of supply of new issuances — resulted in the high yield municipal bond market being once again one of the top performing asset classes.

Duration and credit management

During the fiscal year ended March 31, 2016, funds with longer durations outperformed those with shorter durations (excluding any potential price movements based on credit issues). The Fund had a modified adjusted duration of approximately 5.05 years vs. the Index, which weighed in at 12.68 years. Obviously, this was a negative driver in the Fund’s underperformance. While shorter duration proved a negative this past year, we feel that positioning the Fund with a shorter duration is warranted at the current time, as interest rates are at historic lows and spreads are at very tight levels. We believe the Fund will benefit over the long term, as we anticipate that the Federal Reserve Bank will continue to raise rates. While our primary goal is for the Fund to obtain high levels of tax-exempt income, we also want to protect the investor’s downside risk as rates rise.

While duration management is important for any asset class, credit selection is paramount when investing in a high-yield municipal bond fund. With that being said, the Fund holds an investment that has had negative credit issues in the first quarter of 2016. It is important to note that, while it has negatively affected performance, we believe that as the issuer works through the project’s issues the investment should be able to become a positive performer in the future. We are optimistic the result will be a performing bond with potential to provide tax-exempt interest for our shareholders.

Looking ahead

With another strong year behind us, we have become less constructive on the high-yield municipal space. We believe new issues are coming to market fully priced and offer very little in the way of security provisions for the investor. We will continue to participate selectively in the new issue market, although attractive deals have been difficult to find. That being said, even with our concern over new issue spreads and weak covenants, we believe the near-term demand for municipal bonds should cause continued positive performance as a result of higher taxes. We continue to believe municipals will provide high net worth investors with attractive levels of income over the long term.

The Fund’s performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund’s shares will change, and you could lose money on your investment.

As with any mutual fund, the value of the Fund’s shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest-rate risk, so the NAV of the Fund’s shares may fall as interest rates rise. These and other risks are more fully described in the Fund’s prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager’s views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted is unmanaged and includes reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Municipal High Income Fund.

PORTFOLIO HIGHLIGHTS

Ivy Municipal High Income Fund

Our preference is to always use ratings obtained from Standard & Poor's. For securities not rated by Standard & Poor's, ratings are obtained from Moody's. We do not evaluate these ratings, but simply assign them to the appropriate credit quality category as determined by the rating agency.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Municipal High Income Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1)The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I ⁽⁵⁾	Class Y ⁽⁶⁾
1-year period ended 3-31-16	-0.87%	-1.14%	2.87%	3.80%	3.60%
5-year period ended 3-31-16	5.86%	5.80%	6.01%	6.97%	6.80%
10-year period ended 3-31-16	—	—	—	5.58%	—
Since Inception of Class through 3-31-16 ⁽⁷⁾	7.51%	7.35%	7.39%	—	8.03%

(2)Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 4.25%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I and Class Y shares are not subject to sales charges.

(3)Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4)Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5)The Class Y shares of Waddell & Reed Advisors Municipal High Income Fund were reorganized as the Class I shares of Ivy Municipal High Income Fund on May 18, 2009. The performance shown for periods prior to this date is that of the Class Y shares of Waddell & Reed Advisors Municipal High Income Fund. Performance has not been restated to reflect the estimated annual operating expenses of the Ivy Municipal High Income Fund. If those expenses were reflected, performance shown would differ.

(6)The return shown for Class Y is hypothetical because there were no shares or assets for the period from July 28, 2009 through October 7, 2009. Class A data has been substituted for Class Y data during that period.

(7)5-18-09 for Class A shares, 5-18-09 for Class B shares, 5-18-09 for Class C shares and 5-18-09 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

- (A) No dividends were paid during the preceding 12 months.
- (B) Deemed to be an affiliate due to the Fund owning at least 5% of the voting securities.
- (C) Payment-in-kind bonds.
- (D) Purchased on a when-issued basis with settlement subsequent to March 31, 2016.
- (E) Non-income producing as the issuer has either missed its most recent interest payment or declared bankruptcy.
- (F) Zero coupon bond.
- (G) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016.
- (H) Rate shown is the yield to maturity at March 31, 2016.
- (I) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$—	\$ 1,250	\$—
Corporate Debt Securities	—	3,355	—
Municipal Bonds	—	1,243,091	—
Short-Term Securities	—	95,483	—
Total	\$—	\$1,343,179	\$—

During the year ended March 31, 2016, securities totaling \$1,250 were transferred from Level 3 to Level 2 due to increased availability of observable market data due to increased market activity or information for these securities. Transfers out of Level 3 represent the values as of the beginning of the reporting period. There were no transfers between Level 1 and 2 during the year.

The following acronyms are used throughout this schedule:

AMBAC = American Municipal Bond Assurance Corp.
AGM = Assured Guaranty Municipal
GTD = Guaranteed

See Accompanying Notes to Financial Statements.

Timothy J. Miller

Below, Timothy Miller, CFA, portfolio manager of the Ivy Small Cap Growth Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since 2010 and has 37 years of investment experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Small Cap Growth Fund (Class A shares at net asset value)	-8.91%
Ivy Small Cap Growth Fund (Class A shares including sales charges)	-14.14%
Benchmark(s) and/or Lipper Category	
Russell 2000 Growth Index (generally reflects the performance of small-company growth stocks)	-11.84%
Lipper Small-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-12.11%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Key drivers

The small-cap market proved to be disappointing for investors over the past fiscal year ending March 31, 2016. After holding a relatively flat pattern from the beginning of 2014 until the end of 2015, the Russell 2000 Growth Index, the Fund's benchmark, fell sharply during the late December through early February time period. Issues affecting the stocks were numerous, led by domestic recession fears, collapsing oil prices, widening credit spreads, and the prospect of Federal Reserve (Fed) interest rate hikes. The result was a double-digit decline for the index. For the fiscal year, small-caps stocks underperformed both large- and mid-cap stocks. In addition, small-cap growth stocks slightly lagged small-cap value stocks during the period. All hope was not lost, however, as the index staged a nice rally from the February lows to the end of March. The plethora of fears proved to be overly pessimistic, and a rally in oil prices relieved some of the aforementioned concerns.

There were two noteworthy and unrelated trends that had an inordinate impact on the index and the Fund over the past fiscal year. The first was the end of the powerful, multi-year uptrend in the small-cap biotech and pharmaceutical stocks. This group makes up as much as 13% of the index and the stocks tend to trade as a group (with the exception of a periodic spike up or down for individual stocks based on a drug success or failure). The fundamental drivers of biotech over the past few years have been many. A strong commercialization cycle of large revenue-generating drugs raised expectations for all pipelines. A promising innovation cycle was fueled by easy access to capital in a friendly initial public offering (IPO) market buoyed by low interest rates and high valuations. A supportive Food and Drug Administration (FDA) regulatory environment also eased the pathway for new drugs to market; and finally, mergers and acquisitions (M&As) available at big premiums were abundant. So the forces behind the multi-year move were legitimate, but expectations and valuations were also rising to levels that were not incorporating much risk. A little "tweet" from the Hilary Clinton campaign, and the scandal at Valeant Pharmaceuticals (not a Fund holding) raised the issue of pharmaceutical pricing, which proved to be a trend-buster and the subsequent carnage was significant. The biotech portion of the index was down for the year, with much of the decline occurring in the most recent quarter. The spillover effect on the rest of health care dragged the performance for the sector down for the fiscal year. The health care sector represents about 26% of the index so the impact was substantial.

The second major negative trend for small caps was the sharp correction in oil prices, an impact that goes well beyond the small sector weighting of energy in the index. Oil prices collapsed over the past fiscal year from a \$60 per barrel range to the mid \$20 per barrel range. The inflection point was somewhere in the \$30 range, where virtually all production in the U.S. becomes uneconomic. The result of this downtrend was a sharp correction in drilling and economic activity in all of the oil-producing regions of the country. The unforeseen impact was on all of the peripheral industries supporting oil production, from transports to banks to machinery to lodging, retail and restaurants. High yield bond spreads in the energy sector widened dramatically and dragged general credit spreads wider. The admittedly small energy sector was down 47% for the year, but it pressured the industrials, materials and transport sectors as well. It seemed that the oil price "dividend" of cheaper gas for consumers was overwhelmed by the damage it inflicted on the rest of the U.S. economy. These two powerful forces were the primary drag on small-cap performance over the past 12 months.

Contributors and detractors

Over the past fiscal year, the Fund performed better than the benchmark, before sales charges. Conservative positioning in the two sectors previously mentioned were a significant contributor to performance compared to the benchmark. In the energy sector, the Fund nearly generated a gain for the year versus decline in the benchmark. The strategy employed was to focus on exploration and production (E&P) companies primarily in the lowest cost, most prolific basin, which is the Permian Basin of West Texas. In addition, the Fund emphasized companies with the best reserve positions, lowest debt and most efficient operations. Stocks such as Diamondback Energy, RSP Permian, and Parsley Energy generated positive returns for the Fund over the 12-month period. Timely trades in Bonanza Creek Energy (no longer a Fund holding) and Synergy Resources also generated gains. These gains were offset by relatively small losses from Matador Resources and Viper Energy Partners. The strategy going forward will be to maintain an overweight position in the sector focused on the higher quality E&P companies with an eye toward broadening out the positions and considering exposure to the oil service sector. At some point over the next year it should become clear that domestic oil production has contracted meaningfully,

inventories have begun to decline, and we believe the global supply/demand balance should shift more favorably for oil prices. A moderate improvement in oil prices would be a good recipe for many sectors of the economy and could similarly benefit the stock market.

The Fund's performance in health care was benefited due to a combination of limited exposure to the biotech correction and absolute gains from DexCom, Inc. and a number of health care service stocks. The Fund's biotech exposure is principally derived via a total return swap, which provides an index-like position in the index's biotech and pharmaceutical stocks. The weighting of the swap in the Fund has ranged from zero to 3%, significantly below the benchmark, which resulted in a modest loss for the Fund versus the substantial decline in the index. On the health care services front, the Fund focused on the attractive surgery center industry and temporary help sector with stocks like Amsurg Corp., Surgical Care Affiliates and AMN Healthcare. All three of these stocks were up for the fiscal year. Similarly, DexCom is one of the top positions in the Fund, and it was also up for the fiscal year. The company's extraordinary success with its continuous glucose monitoring systems for diabetics has led to consistent year-over-year revenue growth above 50% for the past three years. Advanced applications continue to broaden the market and penetration of the product in a multi-billion global opportunity. Gains from these stocks were offset by the broad health care correction, which pressured other medical device and technology stocks in the portfolio. The outlook for the sector appears to be a bit mixed; macro trends remain supportive of the sector, but regulatory trends have turned more negative and the momentum on new drug commercialization has slowed. M&A remains a potential positive for the sector but is a difficult situation to predict.

Two other significant contributors to the Fund's outperformance, compared to the benchmark, were the technology and consumer discretionary sectors. In both cases, the strategy to focus on the higher quality, recurring revenue, service oriented business models proved successful. In the case of technology, this was accomplished with an emphasis on leading SAAS (software as a service) companies like Ultimate Software; tech services companies like Jack Henry & Associates and Manhattan Associates; and the initiation during the fiscal year of positions in the defense technology services industry with Booz Allen & Hamilton, CACI International, and defense electronics via Mercury Computer Systems. The defense sector has been under Federal budget pressure for the past four to five years but that trend is appearing to reverse in the budget cycle for the next few years, with particular growth in spending for cyber security and technology systems. Looking ahead we also expect to see renewed acceleration in global communication equipment spending, which will benefit a number of our component, semiconductor and contract manufacturing positions.

The consumer discretionary sector was quite erratic in spite of the strongly favorable macro trends, which included strong job growth, plunging oil prices and historic low interest rates. The Fund navigated through this confusion fortunately with more weight on the winners than the disappointments, which led to a positive attribution for the fiscal year. The largest contributor was ski resort owner/operator Vail Resorts. The stock never buckled during the market corrections as investors are appreciating the dominant position of the company and its amazingly stable financial model in spite of the weather variations that can affect visitation at its resorts. The company's successful takeover of Park City Mountain Resort (not a holding) in Utah added another marquee property to its global diversification of resorts, which fuel the success of its season pass-driven business model. Other winners in this sector included Pool Corp., Dave & Buster's Entertainment, Monro Muffler and Sonic Corp. These and others more than offset surprising weakness from a number of retailers including Zumiez (no longer a Fund holding), Kate Spade and Burlington Stores. The retail industry is facing secular challenges from e-commerce and consumer spending trends moving away from retail, so the Fund will attempt to follow the growth areas of this sector.

Outlook

The upcoming fiscal year appears to hold promise for better returns from the small-cap sector, but the tenuous global macro condition will keep the Fund more concentrated in the aforementioned domestic service sectors of technology, health care and consumer discretionary and staples. The Fund will attempt to opportunistically pursue out-of-favor growth opportunities in energy, industrials and financials.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in small-cap stocks may carry more risk than investing in stocks of larger, more well-established companies. Prices of growth stocks may be more sensitive to changes in current or expected earnings than the prices of other stocks. Growth stocks may not perform as well as value stocks or the stock market in general. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Small Cap Growth Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Small Cap Growth Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-14.14%	-12.74%	-9.48%	-14.17%	-8.59%	-9.10%	-8.46%	-8.80%
5-year period ended 3-31-16	5.50%	5.61%	6.07%	5.41%	7.17%	6.54%	—	6.92%
10-year period ended 3-31-16	6.18%	5.96%	6.13%	—	—	6.69%	—	7.04%
Since Inception of Class through 3-31-16 ⁽⁵⁾	—	—	—	6.65%	8.14%	—	3.04%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) 4-2-07 for Class E shares, 4-2-07 for Class I shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

(A)No dividends were paid during the preceding 12 months.

(B)All or a portion of securities with an aggregate value of \$2,337 are held in collateralized accounts for OTC derivatives collateral as governed by International Swaps and Derivatives Association, Inc. Master Agreements.

(C>Listed on an exchange outside the United States.

(D)Rate shown is the yield to maturity at March 31, 2016.

(E)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following total return swap agreements were outstanding at March 31, 2016:

Counterparty	Number of Shares	Underlying Security	Termination Date	Notional Amount	Financing Fee ⁽¹⁾⁽²⁾	Unrealized Depreciation
JPMorgan Chase Bank N.A.	243,972	Biotech Custom Index	09/05/2016	\$21,311	1M LIBOR less 50 bps	\$(865)

(1)The Fund pays the financing fee multiplied by the notional amount each month.

(2)At the termination date, a net cash flow is exchanged where the market-linked total return is equivalent to the return of the underlying security less a financing rate, if any. As the payer, a Fund would receive payments on any net positive total return, and would owe payments in the event of a negative total return.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$917,928	\$ —	\$ —
Short-Term Securities	—	26,356	—
Total	<u>\$917,928</u>	<u>\$26,356</u>	<u>\$ —</u>
Liabilities			
Total Return Swaps	\$ —	\$ 865	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronyms are used throughout this schedule.:

GTD = Guaranteed

OTC = Over the Counter

See Accompanying Notes to Financial Statements.

Kenneth G. Gau

Below, Kenneth G. Gau, portfolio manager of Ivy Small Cap Value Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since 2014 and has 21 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Small Cap Value Fund (Class A shares at net asset value)	-5.11%
Ivy Small Cap Value Fund (Class A shares including sales charges)	-10.59%
Benchmark(s) and/or Lipper Category	
Russell 2000 Value Index (generally reflects the performance of small-company value style stocks)	-7.72%
Lipper Small-Cap Value Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-6.46%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Key factors

After a pretty long uninterrupted run without a 10% correction in the broader market, the Russell 2000 Value Index, the Fund's benchmark, finally succumbed in the third quarter of calendar year 2015. This situation proved to be too much of a deficit to recover in the fiscal 12-month period ended March 31, 2016 and the index finished down 7.72%. What led to the struggles during the fiscal year was a combination of concerns regarding decelerating global growth, uncertainty around movements in central bank policies, geopolitical concerns (Syria), and implications of the impending U.S. presidential election.

Within this tough environment, the Fund performed very well on a relative basis, exceeding the index return by over 400 basis points gross of sales charges. While losing in an absolute sense is never comforting, we believe it is important that we have exhibited that the Fund has performed well relative to its benchmark in both up and down markets during the past several years.

Contributors and detractors

As is often is the case, stock selection was the ultimate driver for relative outperformance versus the index during the fiscal period. Being that we run a more concentrated Fund (targeting 45-65 holdings), we had 10 stocks that contributed 50 basis points or greater to returns (representing six different sectors), and six stocks that detracted 50 basis points or greater (representing five different sectors). More importantly, when these greatest contributors and detractors were combined, the group netted roughly a positive 400 basis point contribution to the Fund's relative annual return.

At the sector level, four sectors contributed greater than 50 basis points to performance while only one detracted greater than 50 basis points. The Fund's four best sectors in terms of attribution were consumer staples, technology, industrials and energy, while the worst performing sector was consumer discretionary.

Outlook

Over the past fiscal year, two factors have played a major role in the more defensive posturing of the Fund. First, the continued strengthening of the U.S. dollar perpetuated a negative feedback loop that had a destabilizing effect on the market. The strong dollar pressured commodities, which pressured credit markets (high yield bonds have a considerable amount of commodity exposure), and pressured emerging markets (not only do many emerging market countries have exposure to U.S. dollar-denominated debt, but many are huge commodity exporters). Second, the precipitous fall in energy prices, while clearly benefiting the consumer, was more destabilizing to markets and economies than the consumer benefit.

Over the past few months these risk factors have somewhat subsided, which has made us rethink our allocations within the Fund. In the case of the strengthening U.S. dollar, it seems that the Federal Reserve (Fed) more clearly recognizes the damage caused by this factor and it has taken a more dovish route. While the Fed clearly can change directions, this appears to us as something that will stick around for some time as implications from troubles in emerging markets seems greater than getting behind on attacking inflationary pressures (which don't seem to even exist at the moment). As far as oil is concerned, it finally seems like the supply correction brought upon by the massive price drop has led to some price stabilization (the U.S. dollar cooling off also helps). Since we believe we now have greater clarity on both of these issues and both appear to have directionally improved, we have become less defensive in our portfolio construction. Overall, we believe that these new dynamics should be positive for stocks in general and in particular for some of the market sectors that have been under tremendous pressure for a number of quarters.

Within the Fund, we have added some cyclical (energy, materials and industrials, more specifically with focus on gaining great exposure to areas that would benefit from a flat to weakening U.S. dollar), and we took some profits in some defensive areas where we had been considerably overweight (predominantly consumer staples). In addition, due to the most recent communications from the Fed and recognizing that there are negative interest rates in numerous parts of the world, we more firmly believe that interest rates will be lower for longer in the U.S. and therefore have trimmed some bank exposure while adding to real estate investment trusts.

Independent of this tweak to our macro assessment, we remain committed to bottom-up analysis first and foremost. Focusing on identifying what we think are quality undervalued companies over time is designed to serve our clients' best interests, and therefore continues to garner our greatest attention. We are confident in our process and are looking forward to see what the next fiscal year yields.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is no guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in small-cap stocks may carry more risk than investing in stocks of larger, more established companies. Value stocks are stocks of companies that may have experienced adverse business or industry developments, or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's manager to be undervalued may never reach what the manager believes to be its full value, or such security's value may decrease. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The portfolio manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Small Cap Value Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Small Cap Value Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E ⁽⁵⁾	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-10.59%	-9.17%	-5.77%	-10.25%	-4.71%	-5.24%	-4.52%	-4.92%
5-year period ended 3-31-16	4.69%	4.74%	5.20%	5.10%	6.46%	—	—	6.18%
10-year period ended 3-31-16	4.91%	4.60%	4.75%	—	—	—	—	5.86%
Since Inception of Class through 3-31-16 ⁽⁶⁾	—	—	—	5.00%	5.87%	10.02%	1.96%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) Class E shares are not currently available for investment.

(6) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

Notes to Schedule of Investments

(A)No dividends were paid during the preceding 12 months.

(B)Rate shown is the yield to maturity at March 31, 2016.

(C)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$242,061	\$ —	\$ —
Short-Term Securities	—	8,811	—
Total	\$242,061	\$ 8,811	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronym is used throughout this schedule:

REIT = Real Estate Investment Trust

See Accompanying Notes to Financial Statements.

Bradley M. Klappmeyer

Below, Bradley M. Klappmeyer, CFA, portfolio manager of Ivy Tax-Managed Equity Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since 2014 and has 16 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Tax-Managed Equity Fund (Class A shares at net asset value)	-1.51%
Ivy Tax-Managed Equity Fund (Class A shares including sales charges)	-7.18%
Benchmark(s) and/or Lipper Category	
Russell 1000 Growth Index (generally reflects the performance of securities that represent the large-cap growth market)	2.52%
Lipper Large-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	-1.43%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Market conditions

Relative to prior years, the Russell 1000 Growth Index, the Fund's benchmark, recorded a modest gain for the fiscal year ended March 31, 2016. However, a slight positive return does not fully explain what it was a very volatile year in equities. In addition, at several points during the period, the benchmark index was down nearly double digits, reflecting points of great stress and building fear. There were two material sell-offs during the fiscal year; both were driven by a combination of weakening commodity prices, slowing global economic growth, particularly fears related to decelerating growth in China, soft U.S. economic growth, and fears around Federal Reserve ("Fed") policy mistakes. Notably, we believe many of these concerns still exist.

Although the Fed was a source of market fear from time to time, with concerns that interest rates would rise too quickly, it was ultimately the Fed's policy decision, or withdrawal from raising rates, that worked to appease investors and drive a rebound in equities. We find this interplay between the Fed and reversals in equity performance disconcerting.

We believe that the U.S. remains the bastion of hope (and growth) within an uncertain global macro environment. Investors continue to hold a more favorable view on the prospects for the U.S. economy and focus mainly on the positive indicators at work in the U.S. such as employment gains, a strong consumer base and low interest rates. However, these positive indicators should be balanced by manufacturing data that has been less favorable and small signals that the downshift in energy investments is rippling into the manufacturing economy.

Looking at the return of the index, factor performance shows that return on equity, dividend yield and dividend growth and free cash flow yield were key variables in driving performance during the fiscal year. This implies that the market was directing investments toward the perceived safe stocks with dividend and cash flow as the screen. Growth factors were out of favor with estimate revisions, beta, 5-year earnings per share growth and momentum characteristics all generating large negative returns.

Strategies employed, contributors and detractors

Performance for the Fund was underwhelming for the fiscal year as the Fund underperformed its benchmark. Despite the recent underperformance, the Fund's philosophy has remained consistent — a process that seeks to identify structurally advantaged companies that can generate superior levels of profitability and growth over time. We believe that in many cases, short-term dislocations and volatility provided by macro uncertainty offer a favorable entry point for structurally advantaged businesses. The process tends to appreciate the near-term nuances but tends to stress the importance of getting the maturity value correct and taking advantage of periodic dislocations.

In terms of performance attribution, the Fund's underperformance was largely driven by the health care sector, both in terms of an overweight position and unfavorable stock selection. Security selection in telecommunications and consumer staples were other factors that contributed to unfavorable relative performance.

Health care was by far the biggest negative contributor to the Fund's relative performance during the measurement period. There have been several favorable tailwinds benefiting the health care sector over the past several years including exceptional innovation, strong commercial launches, a supportive Food and Drug Administration ("FDA") and access to cheap funding. Many of these variables remained in place during the measurement period. We believe there was a significant change in terms of perceived risk as a result of the U.S. government's enactment of regulations to curb drug price increases as well as its attempt to end inversions, a practice whereby companies look to domicile outside the U.S. in jurisdictions with lower tax rates. The introduction of these variables deflated the health care sector multiple fairly rapidly despite the reality that there were no material changes in near-term fundamentals.

In addition to macro health care pressures, there were also stock specific performance issues for the Fund. Shire Pharmaceuticals announced the acquisition of Baxalta, which became a debated deal. A request from PTC Therapeutics to the FDA for review of its Duchenne muscular dystrophy

drug was rejected. Aratana Therapeutics (no longer a Fund holding) announced delays to the timing of its commercialization efforts in the companion animal therapeutics space. Layered on top of these company-specific issues was general negative sentiment for health care sector, and these company-specific disappointments only compounded the underperformance.

The consumer discretionary and technology sectors provided positive attribution, although not material enough to overcome the underperformance in health care. In the consumer discretionary sector, a significant overweight in Amazon.com and a new position in Lululemon helped contribute positively to the Fund's return. Amazon.com's performance during the fiscal year was exceptional and driven by much needed improvements in margins and additional disclosures that illustrated the growth and margin potential of its cloud computing business. In technology, positive contribution was generated by an overweight position in growers, such as Adobe, Facebook and salesforce.com, and an underweight position in Apple, a non-grower.

Outlook and positioning

Many of the issues from the prior reporting period remain as we enter the next fiscal year, including global growth instability and the timing of the Fed's move to a "less accommodative" fiscal policy. The latter issue has now evolved into concern over the "pace" at which the Fed will increase interest rates. Although we believe that the tone should generally remain positive regarding sustainable growth out of the U.S. economy, we believe growth will be in the 2.5%-3.0% range; however, an economy rarely perpetually stays at 2.5% growth, instead either moving into stronger growth territory or heading toward recessionary levels. We believe the direction of the U.S. economy will become a larger focal point in the coming fiscal period.

Global macro indicators remained weak during the fiscal period, although the latest rounds of weak data now include a notable deceleration in the growth rate in China and other emerging economies. As per the recent playbook, central banks around the world continue to ease monetary policy by creating liquidity and devaluing their currencies in an attempt to fuel economic growth. Thus far, the easing monetary policy in the U.S., and one could argue thus far in Europe and Japan, has been an exercise of "pushing on a string." Furthermore, easing monetary policy to stimulate economies has created an environment in which countries are fighting for currency devaluation in order to import growth. We think the global set-up remains tenuous and complicated.

We noted in the past our belief that the U.S. was being viewed as a temporary bastion of growth, but the question remains whether U.S. economic growth is perpetually sustainable at 2.5% and whether a better global macro backdrop is necessary to kick start the next growth cycle. A possible explanation for the market's sudden appetite change for risk exposure is that the U.S. economy continues to walk the line of slow growth, neither tipping toward strong growth nor recessionary territory, but investors fear they will miss either trade. With this view investors quickly flip from risk-on to risk-off without any real discernment of fundamentals. Instead investors focus on market characteristics or factors such as growth, value, beta and dividend yield when deciding the next course of action.

Although the first interest rate increase is in the rearview, the market now appears concerned over how quickly the Fed is going to move rates higher. The markets are concerned because low rates have provided liquidity, which in turn has supported asset prices and possibly the current modest growth in the U.S. economy. We believe that investors' myopic focus on interest policy continues to validate how the market lacks conviction in sustainable U.S. economic growth and illustrates the fragility of global growth. Furthermore, market performance remains highly dependent on the Fed's interest rate policy.

The Fund's positioning for the coming fiscal year will focus more so on taking advantage of these sudden swings in risk appetite and more proactively adding exposure to long-term investments as factor divergences occur versus actual fundamentals changes. There will be no change in the Fund's strategy of seeking to find the subset of companies with strong business models that we believe also have maturity values materially higher than current levels. This type of investment philosophy seeks longer holding periods and lower turnover. Within this approach, the Fund will attempt to minimize taxable gains and income to shareholders. Thank you for your continued confidence and support.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is not a guarantee of future results. As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Tax-management strategies may alter investment decisions and affect portfolio holdings, when compared to those of non-tax-managed mutual funds. Market conditions may limit the Fund's ability to generate tax losses or to generate dividend income taxed at favorable Federal income tax rates. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Tax-Managed Equity Fund's performance.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Tax-Managed Equity Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class I ⁽⁵⁾	Class Y ⁽⁶⁾
1-year period ended 3-31-16	-7.18%	-6.09%	-2.30%	-1.32%	-1.50%
5-year period ended 3-31-16	9.25%	9.71%	9.78%	10.72%	10.60%
10-year period ended 3-31-16	—	—	—	7.63%	—
Since Inception of Class through 3-31-16 ⁽⁷⁾	12.11%	12.37%	12.32%	—	13.12%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) The Class Y shares of Waddell & Reed Advisors Tax-Managed Equity Fund were reorganized as the Class I shares of Ivy Tax-Managed Equity Fund on May 18, 2009. The performance shown for periods prior to this date is that of the Class Y shares of Waddell & Reed Advisors Tax-Managed Equity Fund. Performance has not been restated to reflect the estimated annual operating expenses of the Ivy Tax-Managed Equity Fund. If those expenses were reflected, performance shown would differ.

(6) The return shown for Class Y is hypothetical because there were no shares or assets for the period from July 28, 2009 through October 7, 2009. Class A data has been substituted for Class Y data during that period.

(7) 5-18-09 for Class A shares, 5-18-09 for Class B shares, 5-18-09 for Class C shares and 5-18-09 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

BEFORE – AND AFTER – TAX RETURNS

Ivy Tax-Managed Equity Fund

(UNAUDITED)

Before- and After-Tax Returns ⁽¹⁾	1-year period ended 3-31-16	5-year period ended 3-31-16	10-year period ended 3-31-16	Since inception of Class through 3-31-16 ⁽²⁾

After Taxes on Distributions and Sale of Fund Shares	-0.98% ⁽⁴⁾	7.74%	—	10.04%
Class I⁽⁶⁾				
Before Taxes	-1.32%	10.72%	7.63%	—
After Taxes on Distributions	-1.79%	10.34%	7.44%	—
After Taxes on Distributions and Sale of Fund Shares	-0.33% ⁽⁴⁾	8.52%	6.20%	—
Class Y⁽⁷⁾				
Before Taxes	-1.50%	10.60%	—	13.12%
After Taxes on Distributions	-1.92%	10.23%	—	12.85%
After Taxes on Distributions and Sale of Fund Shares	-0.48% ⁽⁴⁾	8.41%	—	10.73%
Russell 1000 Growth Index	2.52%	12.38%	8.28%	16.27%

(1) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I and Class Y shares are not subject to sales charges.

(2) 5-18-09 for Class A shares, 5-18-09 for Class B shares, 5-18-09 for Class C shares and 5-18-09 for Class Y shares (the date on which shares were first acquired by shareholders).

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) After-tax returns may be better than before-tax returns due to an assumed tax benefit from losses on a sale of the Fund's shares at the end of the period.

(5) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(6) The Class Y shares of Waddell & Reed Advisors Tax-Managed Equity Fund were reorganized as the Class I shares of Ivy Tax-Managed Equity Fund on May 18, 2009. The performance shown for periods prior to this date is that of the Class Y shares of Waddell & Reed Advisors Tax-Managed Equity Fund. Performance has not been restated to reflect the estimated annual operating expenses of the Ivy Tax-Managed Equity Fund. If those expenses were reflected, performance shown would differ.

(7) The return shown for Class Y is hypothetical because there were no shares or assets for the period from July 28, 2009 through October 7, 2009. Class A data has been substituted for Class Y data during that period.

The table above shows average annual returns on a before-tax and after-tax basis. Returns Before Taxes shows the actual change in the value of the Fund shares over the periods shown, but does not reflect the impact of taxes on Fund distributions or the sale of Fund shares. The two after-tax returns take into account taxes that may be associated with owning Fund shares. Returns After Taxes on Distributions is the Fund's actual performance, adjusted by the effect of taxes on distributions made by the Fund during the period shown. Returns After Taxes on Distributions and Sale of Fund Shares is further adjusted to reflect the tax impact on any change in the value of Fund shares as if they had been sold on the last day of the period.

After-tax returns are calculated using the historical highest individual Federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts, or to shares held by non-taxable entities.

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronym is used throughout this schedule:

ADR = American Depositary Receipts

See Accompanying Notes to Financial Statements.

Matthew T. Norris

Below, Matthew T. Norris, CFA, portfolio manager of Ivy Value Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2016. He has managed the Fund since inception and has 24 years of industry experience.

Fiscal Year Performance

For the 12 Months Ended March 31, 2016

Ivy Value Fund (Class A shares at net asset value)	–4.60%
Ivy Value Fund (Class A shares including sales charges)	–10.09%
Benchmark(s) and/or Lipper Category	
Russell 1000 Value Index (generally reflects the performance of large-company value style stocks)	–1.54%
Lipper Large-Cap Value Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	–3.68%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. The performance discussion below is at net asset value.

Key drivers

The U.S. economy continues its slow growth pattern. Corporate earnings are strong with many companies at historically high margins and equities have roughly tripled from their low in March 2009. The Federal Reserve (Fed) has employed many forms of loose monetary policy to stimulate this recovery, and now that approach is changing. The Fed raised interest rates in December 2015, and rates are expected to rise once or twice during 2016. This is not a response to fight inflation, which remains low, but rather a plan to “normalize” rates at some level higher than zero. Heightened volatility is anticipated around these interest rate increases, as the market debates the ultimate impact.

Contributors and detractors

The Fund underperformed the Russell 1000 Value Index, its benchmark, for the year ended March 31, 2016. It was a poor 12-month period for value, with the index down 1.54%, compared to growth stocks, as measured by the Russell 1000 Growth Index, which rose 2.52%. This is the second year in a row that this trend has occurred. Although the timing is unknown, we believe that the cycle will eventually turn and that value investing will once again have its day in the sun.

The Fund’s underperformance during the period was due to a select number of individual holdings underperforming. The two worst performing holdings were in technology, with Micron Technology, Inc. and Western Digital Corp., falling sharply. Some may recall last year’s annual letter, in which we highlighted Sandisk’s poor performance and our reasons for continuing to hold the stock. Sandisk was acquired during this past fiscal year. It added a healthy return to the portfolio and the holding was subsequently sold. We continue to hold Micron and Western Digital because we believe our investment thesis is sound and that there will be an eventual redemption for these stocks.

While the Fund performed well in consumer staples and consumer cyclicals, the energy and industrials sectors were an outsized drag on performance. Examples of positive performers held by the Fund included Philip Morris International, Inc., Ingredion, Inc., Time Warner Cable, Inc. and Molson Coors Brewing Co.

Outlook

Last fiscal year we stated that caution was in order when it came to rising interest rates, and we warned shareholders not to expect the returns we had enjoyed in the past. This concern unfortunately turned out to be correct, with the S&P Index rising 1.78%. We remain cautiously constructive on the equity markets, especially with individual names we find compelling. The Fed’s tightening cycle is not to be taken lightly, and must be watched and anticipated carefully. Higher interest rates are historically not supportive of higher equity prices.

On a macro level, we would like to see a supportive backdrop with continued gross domestic product growth and lower unemployment. One potential risk is the volatility in oil prices, which makes it difficult for companies to budget long term. The upside of lower oil prices is that consumer’s should have more to spend on other goods and services.

Historically, the Fund has had a strong long-term performance record, but it has been affected by short term periods of volatility. As a long-term investor, we typically view these bouts of volatility as opportunities and not threats. The Fund will continue to seek to purchase what we believe are high-quality companies whose stock prices are below what we believe to be fair value to sell those same names when they reach what we believe to be appropriate valuation levels. We believe a bottom-up, company-by-company analysis can produce solid returns over the long haul.

Performance shown at NAV does not include the effects of sales charges. If reflected, the performance shown would have been lower. Performance including sales charges reflects the maximum applicable front-end sales load.

Past performance is no guarantee of future results. As with any mutual fund, the value of the Fund’s shares will change, and you could lose money on your investment.

Value stocks are stocks of companies that may have experienced adverse business or industry developments, or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's manager to be undervalued may never reach what the manager believes to be its full value, or such security's value may decrease. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the Fund's portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index noted is unmanaged, includes reinvested dividends and does not include fees. One cannot invest directly in an index, nor is an index representative of the Ivy Value Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Value Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A ⁽³⁾	Class B ⁽⁴⁾	Class C	Class E ⁽⁵⁾	Class I	Class R	Class R6	Class Y
1-year period ended 3-31-16	-10.09%	-8.88%	-5.25%	-9.83%	-4.28%	-4.82%	-4.12%	-4.51%
5-year period ended 3-31-16	6.27%	6.31%	6.79%	6.57%	7.95%	—	—	7.68%
10-year period ended 3-31-16	4.73%	4.34%	4.52%	—	—	—	—	5.57%
Since Inception of Class through 3-31-16 ⁽⁶⁾	—	—	—	4.08%	4.88%	10.03%	-1.49%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry a maximum contingent deferred sales charge (CDSC) of 5% and 1%, respectively (the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase). Class I, Class R, Class R6 and Class Y shares are not subject to sales charges.

(3) Class A shares carry a CDSC on shares purchased at net asset value for \$1 million or more that are subsequently redeemed within 12 months of purchase.

(4) Class B shares are not currently available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) Class E shares are not currently available for investment.

(6) 4-2-07 for Class E shares, 4-2-07 for Class I shares, 12-19-12 for Class R shares and 7-31-14 for Class R6 shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. Performance results may include the effect of expense reduction arrangements for some or all of the periods shown. If those arrangements had not been in place, the performance results for those periods would have been lower.

SCHEDULE OF INVESTMENTS

Ivy Value Fund *(in thousands)*

MARCH 31, 2016

Notes to Schedule of Investments

(A) All or a portion of securities with an aggregate value of \$29,937 are held in collateralized accounts to cover potential obligations with respect to outstanding written options.

(B) No dividends were paid during the preceding 12 months.

(C) Rate shown is the yield to maturity at March 31, 2016.

(D) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2016. Date shown represents the date that the variable rate resets.

The following written options were outstanding at March 31, 2016 (contracts and exercise prices unrounded):

Underlying Security	Counterparty, if OTC	Type	Number of Contracts	Expiration Month	Exercise Price	Premium Received	Value
Amgen, Inc.	N/A	Call	45	May 2016	\$165.00	\$ 8	\$ (3)
Exelon Corp.	N/A	Call	810	April 2016	31.00	32	(397)
	N/A	Call	810	July 2016	33.00	28	(279)
Hess Corp.	N/A	Put	198	April 2016	45.00	46	(3)
Las Vegas Sands, Inc.	N/A	Call	312	May 2016	48.00	165	(156)
	N/A	Call	593	May 2016	49.00	318	(249)
Reinsurance Group of America, Inc.	N/A	Call	70	April 2016	90.00	24	(44)
Time Warner Cable, Inc.	N/A	Call	319	April 2016	195.00	318	(365)
VTI Energy Partners L.P.	N/A	Put	196	April 2016	20.00	62	(25)
						<u>\$1,001</u>	<u>\$(1,521)</u>

The following table is a summary of the valuation of the Fund's investments by the fair value hierarchy levels as of March 31, 2016. See Note 3 to the Financial Statements for further information regarding fair value measurement.

	Level 1	Level 2	Level 3
Assets			
Investments in Securities			
Common Stocks	\$257,557	\$ —	\$ —
Short-Term Securities	—	24,154	—
Total	<u>\$257,557</u>	<u>\$ 24,154</u>	<u>\$ —</u>
Liabilities			
Written Options	\$ 899	\$ 622	\$ —

During the year ended March 31, 2016, there were no transfers between Level 1 and 2.

The following acronyms are used throughout this schedule:

ADR = American Depositary Receipts
 GTD = Guaranteed
 OTC = Over the Counter
 REIT = Real Estate Investment Trust

See Accompanying Notes to Financial Statements.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) For the period from December 19, 2012 (commencement of operations of the class) through March 31, 2013.

(6) Annualized.

(7) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(8) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2013.

(9) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) For the period from December 19, 2012 (commencement of operations of the class) through March 31, 2013.

(6) Annualized.

(7) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(8) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2013.

(9) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) For the period from December 19, 2012 (commencement of operations of the class) through March 31, 2013.

(6) Annualized.

(7) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(8) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2013.

(9) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) For the period from December 19, 2012 (commencement of operations of the class) through March 31, 2013.

(6) Annualized.

(7) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(8) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2013.

(9) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Does not include expenses of underlying Ivy Funds in which the Fund invests.

(4) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(5) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(6) Class share is closed to investment.

(7) For the period from December 19, 2012 (commencement of operations of the class) through March 31, 2013.

(8) Annualized.

(9) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2013.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(6) Annualized.

(7) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) Ratios excluding expense waivers are included only for periods in which the class had waived or reimbursed expenses.

(4) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(5) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(6) Annualized.

(7) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

* Not shown due to rounding.

(1) Based on average weekly shares outstanding.

(2) Based on net asset value, which does not reflect the sales charge, redemption fee or contingent deferred sales charge, if applicable. Total returns for periods less than one year are not annualized.

(3) These class shares are not available for direct investment. However, they are available for dividend reinvestment and exchange of the same class shares of another Ivy Fund or Waddell & Reed Advisors Fund.

(4) Class share is closed to investment.

(5) For the period from December 19, 2012 (commencement of operations of the class) through March 31, 2013.

(6) Annualized.

(7) For the period from July 31, 2014 (commencement of operations of the class) through March 31, 2015.

(8) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2013.

(9) Portfolio turnover is calculated at the fund level. Percentage indicated was calculated for the year ended March 31, 2015.

1. ORGANIZATION

Ivy Funds, a Delaware statutory trust (the “Trust”), is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company. Ivy Bond Fund, Ivy Core Equity Fund, Ivy Cundill Global Value Fund, Ivy Dividend Opportunities Fund, Ivy Emerging Markets Equity Fund, Ivy European Opportunities Fund, Ivy Global Bond Fund, Ivy Global Equity Income Fund, Ivy Global Growth Fund, Ivy Global Income Allocation Fund, Ivy High Income Fund, Ivy International Core Equity Fund, Ivy Large Cap Growth Fund, Ivy Limited-Term Bond Fund, Ivy Managed International Opportunities Fund, Ivy Micro Cap Growth Fund, Ivy Mid Cap Growth Fund, Ivy Mid Cap Income Opportunities Fund, Ivy Money Market Fund, Ivy Municipal Bond Fund, Ivy Municipal High Income Fund, Ivy Small Cap Growth Fund, Ivy Small Cap Value Fund, Ivy Tax-Managed Equity Fund and Ivy Value Fund (each, a “Fund”) are 25 series of the Trust and are the only series of the Trust included in these financial statements. The investment objective(s), policies and risk factors of each Fund are described more fully in the Funds’ Prospectus and Statement of Additional Information (“SAI”). Each Fund’s investment manager is Ivy Investment Management Company (“IICO” or the “Manager”).

Each Fund offers Class A and Class C shares. Each fund (excluding Ivy Mid Cap Income Opportunities Fund) offers Class B shares. The Funds’ Class B shares are not available for purchase by new and existing investors. Class B shares will continue to be available for dividend reinvestment and exchanges from Class B shares of another fund within Ivy Funds. Class C shares are not available for direct investment in the Ivy Money Market Fund. Class C shares of Ivy Money Market Fund will continue to be available for dividend reinvestment and exchanges from Class C shares of another fund within Ivy Funds. Certain Funds may also offer Class E, Class I, Class R, Class R6 and/or Class Y shares. Class E shares are closed for all investments in the Ivy Emerging Markets Equity Fund, Ivy European Opportunities Fund, Ivy Global Growth Fund, Ivy Managed International Opportunities Fund, Ivy Small Cap Value Fund and Ivy Value Fund. Class A and Class E shares are sold at their offering price, which is normally net asset value (“NAV”) plus a front-end sales charge. For Class A shares, a 1% contingent deferred sales charge (“CDSC”) is only imposed on shares purchased at NAV for \$1 million or more that are subsequently redeemed within 12 months of purchase. Class B and Class C shares are sold without a front-end sales charge, but may be subject to a CDSC. Class I, Class R, Class R6 and Class Y shares are sold without either a front-end sales charge or a CDSC. All classes of shares have identical rights and voting privileges with respect to the Fund in general and exclusive voting rights on matters that affect that class alone. Net investment income, net assets and NAV per share may differ due to each class having its own expenses, such as transfer agent and shareholder servicing fees, directly attributable to that class. Class A, B, C, E, R and Y have a distribution and service plan. Class I shares and Class R6 shares are not included in the plan. Class B shares will automatically convert to Class A shares 96 months after the date of purchase.

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by each Fund.

Security Transactions and Related Investment Income. Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses are calculated on the identified cost basis. Interest income is recorded on the accrual basis and includes paydown gain (loss) and accretion of discounts and amortization of premiums. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. All or a portion of the distributions received from a real estate investment trust or publicly traded partnership may be designated as a reduction of cost of the related investment and/or realized gain.

Foreign Currency Translation. Each Fund’s accounting records are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars daily, using foreign exchange rates obtained from an independent pricing service authorized by the Board of Trustees of the Trust (the “Board”). Purchases and sales of investment securities and accruals of income and expenses are translated at the rate of exchange prevailing on the date of the transaction. For assets and liabilities other than investments in securities, net realized and unrealized gains and losses from foreign currency translation arise from changes in currency exchange rates. Each Fund combines fluctuations from currency exchange rates and fluctuations in value when computing net realized gain (loss) and net change in unrealized appreciation (depreciation) on investments. Foreign exchange rates are typically valued as of the close of the New York Stock Exchange (“NYSE”), normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

Allocation of Income, Expenses, Gains and Losses. Income, expenses (other than those attributable to a specific class), gains and losses are allocated on a daily basis to each class of shares based upon the relative proportion of net assets represented by such class. Operating expenses directly attributable to a specific class are charged against the operations of that class.

Income Taxes. It is the policy of each Fund to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. In addition, each Fund intends to pay distributions as required to avoid imposition of excise tax. Accordingly, no provision has been made for Federal income taxes. The Funds file income tax returns in U.S. federal and applicable state jurisdictions. The Funds’ tax returns are subject to examination by the relevant taxing authority until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax returns. Management of the Trust periodically reviews all tax positions to assess that it is more likely than not that the position would be sustained upon examination by the relevant tax authority based on the technical merits of each position. As of the date of these financial statements, management believes that no liability for unrecognized tax positions is required.

Dividends and Distributions to Shareholders. Dividends and distributions to shareholders are recorded by each Fund on the business day following record date. Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America (“U.S. GAAP”). If the total dividends and distributions made in any tax year exceeds net investment income and accumulated realized capital gains, a portion of the total distribution may be treated as a tax return of capital.

Segregation and Collateralization. In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (“SEC”), the Dodd Frank Wall Street Reform and Consumer Protection Act, or the interpretive rules and regulations of the U.S. Commodities Futures Trading Commission require that a Fund either deliver collateral or segregate assets in connection with certain investments (e.g., dollar rolls, financial futures contracts, foreign currency exchange contracts, options written, securities with extended settlement periods and swaps), the Fund will segregate collateral or designate on its books and records cash or other liquid securities having a value at least equal to the amount that is required to be physically segregated for the benefit of the counterparty. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit cash or securities as collateral for certain investments. Certain countries require that cash reserves be held while investing in companies incorporated in that country. These cash reserves and cash collateral that has been pledged to cover obligations of the Funds under derivative contracts, if any, will be reported separately on the Statement of Assets and Liabilities as “Restricted cash.” Securities collateral pledged for the same purpose, if any, is noted on the Schedule of Investments.

Concentration of Market and Credit Risk. In the normal course of business, the Funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (issuer credit risk). The value of securities held by the Funds may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Funds; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to issuer credit risk, the Funds may be exposed to counterparty credit risk, or the risk that an entity with which the Funds have unsettled or open transactions may fail to or be unable to perform on its commitments. The Funds manage counterparty credit risk by entering into transactions only with counterparties that they believe have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties. Financial assets, which potentially expose the Funds to market, issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of the Funds’ exposure to market, issuer and counterparty credit risks with respect to these financial assets is generally approximated by their value recorded on the Funds’ Statement of Assets and Liabilities, less any collateral held by the Funds.

Certain Funds may hold high-yield and/or non-investment-grade bonds, which may be subject to a greater degree of credit risk. Credit risk relates to the ability of the issuer to meet interest or principal payments or both as they become due. The Funds may acquire securities in default and are not obligated to dispose of securities whose issuers subsequently default.

Certain Funds may enter into financial instrument transactions (such as swaps, futures, options and other derivatives) that may have off-balance sheet market risk. Off-balance sheet market risk exists when the maximum potential loss on a particular financial instrument is greater than the value of such financial instrument, as reflected on the Statement of Assets and Liabilities.

If a Fund invests directly in foreign currencies or in securities that trade in, and receive revenues in, foreign currencies, or in financial derivatives that provide exposure to foreign currencies, it will be subject to the risk that those currencies will decline in value relative to the base currency of the Fund, or, in the case of hedging positions, that the Fund’s base currency will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad.

Inflation-Indexed Bonds. Certain Funds may invest in inflation-indexed bonds. Inflation-indexed bonds are fixed-income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these bonds is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond, however, interest will be paid based on a principal value, which is adjusted for inflation. Any increase or decrease in the principal amount of an inflation-indexed bond will be included as interest income on the Statement of Operations, even though investors do not receive their principal until maturity.

Interest Only Obligations. These securities entitle the owner to receive only the interest portion from a bond, Treasury note or pool of mortgages. These securities are generally created by a third party separating a bond or pool of mortgages into distinct interest-only and principal-only securities. As the principal (par) amount of a bond or pool of mortgages is paid down, the amount of interest income earned by the owner will decline as well.

Loans. Certain Funds may invest in loans, the interest rates of which float or adjust periodically based upon a specified adjustment schedule, benchmark indicator, or prevailing interest rates, the debtor of which may be a domestic or foreign corporation, partnership or other entity (“Borrower”). Loans generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates generally include prime rates of one or more major U.S. banks, London Interbank Offered Rate (“LIBOR”) rates or certificates of deposit rates. Loans often require prepayments from excess cash flow or permit the Borrower to repay at its election. The degree to which Borrowers repay cannot be predicted with accuracy. As a result, the actual maturity may be substantially less than the stated maturities. Loans are exempt from registration under the Securities Act of 1933, as amended, may contain certain restrictions on resale, and cannot be sold publicly. A Fund’s investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties.

When a Fund purchases assignments, it acquires all the rights and obligations under the loan agreement of the assigning lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than those held by the assigning lender. When a Fund purchases a participation of a loan interest, the Fund typically enters into a contractual agreement with the lender or other third party selling the participation. A participation interest in loans includes the right to receive payments of principal, interest and any fees to which it is entitled from the lender and only upon receipt by the lender of payments from the Borrower, but not from the Borrower directly. When investing in a participation interest, if a Borrower is unable to meet its obligations under a loan agreement, a Fund generally has no right to enforce compliance with the terms of the loan agreement. As a result,

the Fund assumes the credit risk of the Borrower, the selling participant, and any other persons that are interpositioned between the Fund and the Borrower. If the lead lender in a typical lending syndicate becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy, the Fund may incur certain costs and delays in receiving payment or may suffer a loss of principal and/or interest.

Payment In-Kind Securities. Certain Funds may invest in payment in-kind securities ("PIKs"). PIKs give the issuer the option at each interest payment date of making interest payments in either cash or additional debt securities. Those additional debt securities usually have the same terms, including maturity dates and interest rates, and associated risks as the original bonds. The daily market quotations of the original bonds may include the accrued interest (referred to as a dirty price) and require a pro-rata adjustment from the unrealized appreciation or depreciation on investments to interest receivable on the Statement of Assets and Liabilities.

Securities on a When-Issued or Delayed Delivery Basis. Certain Funds may purchase securities on a "when-issued" basis, and may purchase or sell securities on a "delayed delivery" basis. "When-issued" or "delayed delivery" refers to securities whose terms and indenture are available and for which a market exists, but which are not available for immediate delivery. Delivery and payment for securities that have been purchased by a Fund on a when-issued basis normally take place within six months and possibly as long as two years or more after the trade date. During this period, such securities do not earn interest, are subject to market fluctuation and may increase or decrease in value prior to their delivery. The purchase of securities on a when-issued basis may increase the volatility of a Fund's NAV to the extent the Fund executes such transactions while remaining substantially fully invested. When a Fund engages in when-issued or delayed delivery transactions, it relies on the buyer or seller, as the case may be, to complete the transaction. Their failure to do so may cause the Fund to lose the opportunity to obtain or dispose of the security at a price and yield IICO, or the Fund's investment subadviser, as applicable, consider advantageous. The Fund maintains internally designated assets with a value equal to or greater than the amount of its purchase commitments. The Fund may also sell securities that it purchased on a when-issued or delayed delivery basis prior to settlement of the original purchase.

Custodian Fees. "Custodian fees" on the Statement of Operations may include interest expense incurred by a Fund on any cash overdrafts of its custodian account during the period. Such cash overdrafts may result from the effects of failed trades in portfolio securities and from cash outflows resulting from unanticipated shareholder redemption activity. A Fund pays interest to its custodian on such cash overdrafts, to the extent they are not offset by positive cash balances maintained by that Fund. The "Earnings credit" line item, if shown, represents earnings on cash balances maintained by that Fund during the period. Such interest expense and other custodian fees may be paid with these earnings.

Independent Trustees and Chief Compliance Officer Fees. Fees paid to the Independent Trustees can be paid in cash or deferred to a later date, at the election of the Trustee according to the Deferred Fee Agreement entered into between the Trust and the Trustee(s). Each Fund records its portion of the deferred fees as a liability on the Statement of Assets and Liabilities. All fees paid in cash plus any appreciation (depreciation) in the underlying deferred plan are shown on the Statement of Operations. Additionally, fees paid to the Chief Compliance Officer of the Funds are shown on the Statement of Operations.

Indemnifications. The Trust's organizational documents provide current and former Trustees and Officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Trust. In the normal course of business, the Trust may also enter into contracts that provide general indemnification. The Trust's maximum exposure under these arrangements is unknown and is dependent on future claims that may be made against the Trust. The risk of material loss from such claims is considered remote.

Basis of Preparation. Each Fund is an investment company and follows accounting and reporting guidance in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 ("ASC 946"). The accompanying financial statements were prepared in accordance with U.S. GAAP, including but not limited to ASC 946. U.S. GAAP requires the use of estimates made by management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates, and the valuations reflected in the accompanying financial statements may differ from the value ultimately realized upon sale or maturity.

New Rule Issuance. In July 2014, the SEC issued *Final Rule Release No. 33-9616, Money Market Fund Reform; Amendments to Form PF*, which amends the rules governing money market funds. The final amendments impose different implementation dates for the changes that certain money market funds will need to make. Management is currently evaluating the implication of these amendments and their impact of the Final Rule to the Funds' financial statements and related disclosures.

Subsequent Events. Management has performed a review for subsequent events through the date this report was issued.

3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

Each Fund's investments are reported at fair value. Fair value is defined as the price that each Fund would receive upon selling an asset or would pay upon satisfying a liability in an orderly transaction between market participants at the measurement date. Each Fund calculates the NAV of its shares as of the close of the NYSE, normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

For purposes of calculating the NAV, the portfolio securities and other assets are valued on each business day using pricing and valuation methods as adopted by the Board. Where market quotes are readily available, fair value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services.

Prices for fixed-income securities are typically based on quotes that are obtained from an independent pricing service authorized by the Board. To determine values of fixed-income securities, the independent pricing service utilizes such factors as current quotations by broker/dealers, coupon,

maturity, quality, type of issue, trading characteristics, and other yield and risk factors it deems relevant in determining valuations. Securities that cannot be valued by the independent pricing service may be valued using quotes obtained from dealers that make markets in the securities.

Investments in Ivy Money Market Fund are valued on the basis of amortized cost (which approximates value), whereby a portfolio security is valued at its cost initially, and thereafter valued to reflect a constant amortization to maturity of any discount or premium. Short-term securities with maturities of 60 days or less held in all Funds (with the exception of Ivy Money Market Fund) are valued based on quotes that are obtained from an independent pricing service authorized by the Board as described in the preceding paragraph above.

Because many foreign markets close before the NYSE, events may occur between the close of the foreign market and the close of the NYSE that could have a material impact on the valuation of foreign securities. Waddell & Reed Services Company ("WRSCO"), pursuant to procedures adopted by the Board, evaluates the impact of these events and may adjust the valuation of foreign securities to reflect the fair value as of the close of the NYSE. In addition, all securities for which values are not readily available or are deemed unreliable are appraised at fair value as determined in good faith under the supervision of the Board.

Where market quotes are not readily available, portfolio securities or assets are valued at fair value, as determined in good faith by the Board or Valuation Committee pursuant to procedures approved by the Board.

Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information or broker quotes), including where events occur after the close of the relevant market, but prior to the NYSE close, that materially affect the values of a Fund's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available.

The Board has delegated to WRSCO the responsibility for monitoring significant events that may materially affect the values of a Fund's securities or assets and for determining whether the value of the applicable securities or assets should be re-evaluated in light of such significant events. The Board has established a Valuation Committee to administer and oversee the valuation process, including the use of third party pricing vendors.

The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available. For instances in which daily market quotes are not readily available, investments may be valued, pursuant to procedures established by the Board, with reference to other securities or indices. In the event that the security or asset cannot be valued pursuant to one of the valuation methods established by the Board, the value of the security or asset will be determined in good faith by the Valuation Committee in accordance with the procedures adopted by the Board.

When a Fund uses these fair valuation methods applied by WRSCO that use significant unobservable inputs to determine its NAV, securities will be priced by a method that the Board or persons acting at their direction believe accurately reflects fair value and are categorized as Level 3 of the fair value hierarchy. These methods may require subjective determinations about the value of a security. The prices used by a Fund may differ from the value that will ultimately be realized at the time the securities are sold.

WRSCO is responsible for monitoring the implementation of the pricing and valuation policies through a series of activities to provide reasonable comfort of the accuracy of prices including: 1) periodic vendor due diligence meetings to review methodologies, new developments, and process at vendors, 2) daily and monthly multi-source pricing comparisons reviewed and submitted to the Valuation Committee, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by management and the Valuation Committee.

Accounting standards establish a framework for measuring fair value and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the factors that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

An individual investment's fair value measurement is assigned a level based upon the observability of the inputs which are significant to the overall valuation.

The three-tier hierarchy of inputs is summarized as follows:

- Level 1 – Observable input such as quoted prices, available in active markets, for identical assets or liabilities.
- Level 2 – Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.
- Level 3 – Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

A description of the valuation techniques applied to the Funds' major classes of assets and liabilities measured at fair value on a recurring basis follows:

Asset-Backed Securities and Mortgage-Backed Securities. The fair value of asset-backed securities and mortgage-backed securities are estimated using recently executed transactions and based on models that consider the estimated cash flows of each debt tranche of the issuer, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche including, but not limited to, the prepayment speed assumptions and attributes of the collateral. To the extent the inputs are observable and timely, the values would be categorized in Level 2 of the fair value hierarchy, and otherwise they would be categorized as Level 3.

Bullion. The fair value of bullion is at the last settlement price at the end of each day on the board of trade or exchange upon which they are traded and are categorized in Level 1 of the fair value hierarchy.

Corporate Bonds. The fair value of corporate bonds, as obtained from an independent pricing service, is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3 of the fair value hierarchy.

Derivative Instruments. Forward foreign currency contracts are valued based upon the closing prices of the forward currency rates determined at the close of the NYSE provided by an independent pricing service. Swaps derive their value from underlying asset prices, indices, reference rates and other inputs or a combination of these factors. Swaps are valued by an independent pricing service unless the price is unavailable, in which case they are valued at the price provided by a dealer in that security. Futures contracts traded on an exchange are generally valued at the settlement price. Listed options are ordinarily valued at the mean of the last bid and ask price provided by an independent pricing service unless the price is unavailable, in which case they are valued at a quotation obtained from a broker-dealer. Over-the-counter ("OTC") options are ordinarily valued at the mean of the last bid and ask price provided by an independent pricing service for a comparable listed option unless such a price is unavailable, in which case they are valued at a quotation obtained from a broker-dealer. If no comparable listed option exists from which to obtain a price from an independent pricing service and a quotation cannot be obtained from a broker-dealer, the OTC option will be valued using a model reasonably designed to provide a current market price.

Listed derivatives that are actively traded are valued based on quoted prices from the exchange and are categorized in Level 1 of the fair value hierarchy. OTC derivative contracts include forward foreign currency contracts, swap agreements, and option contracts related to interest rates, foreign currencies, credit standing of reference entities, equity prices, or commodity prices. Depending on the product and the terms of the transaction, the fair value of the OTC derivative products are modeled taking into account the counterparties' creditworthiness and using a series of techniques, including simulation models. Many pricing models do not entail material subjectivity because the methodologies employed do not necessitate significant judgments and the pricing inputs are observed from actively quoted markets, as is the case with interest rate swap and option contracts. OTC derivative products valued using pricing models with significant observable inputs are categorized within Level 2 of the fair value hierarchy.

Equity Securities. Equity securities traded on U.S. or foreign securities exchanges or included in a national market system are valued at the official closing price at the close of each business day unless otherwise stated below. OTC equity securities and listed securities for which no price is readily available are valued at the average of the last bid and asked prices.

Mutual funds, including investment funds, typically are valued at the NAV reported as of the valuation date.

Securities that are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded and to the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Foreign securities, for which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intra-day trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange-traded funds, and the movement of certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Preferred stock, repurchase agreements, and other equities traded on inactive markets or valued by reference to similar instruments are also generally categorized in Level 2.

Loans. Loans are valued using a price or composite price from one or more brokers or dealers as obtained from an independent pricing service. The fair value of loans is estimated using recently executed transactions, market price quotations, credit/market events, and cross-asset pricing. Inputs are generally observable market inputs obtained from independent sources. Loans are generally categorized in Level 2 of the fair value hierarchy, unless key inputs are unobservable in which case they would be categorized as Level 3.

Municipal Bonds. Municipal bonds are fair valued based on pricing models used by and obtained from an independent pricing service that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-wants lists, offerings, market

movements, the callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable and timely, the fair values of municipal bonds would be categorized as Level 2; otherwise the fair values would be categorized as Level 3.

Restricted Securities. Restricted securities that are deemed to be both Rule 144A securities and illiquid, as well as restricted securities held in non-public entities, are included in Level 3 of the fair value hierarchy to the extent that significant inputs to valuation are unobservable, because they trade infrequently, and, therefore, the inputs are unobservable. Restricted securities that are valued at a discount to similar publicly traded securities may be categorized as Level 2 of the fair value hierarchy to the extent that the discount is considered to be insignificant to the fair value measurement in its entirety; otherwise they may be categorized as Level 3.

U.S. Government and Agency Securities. U.S. government and agency securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, quoted market prices, and reference data. Accordingly, U.S. government and agency securities are normally categorized in Level 1 or 2 of the fair value hierarchy depending on the liquidity and transparency of the market.

Transfers from Level 2 to Level 3 occurred primarily due to the lack of observable market data due to decreased market activity or information for these securities. Transfers from Level 3 to Level 2 occurred primarily due to the increased availability of observable market data due to increased market activity or information. Transfers between levels represent the values as of the beginning of the reporting period.

For fair valuations using unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to total realized and unrealized gains or losses, purchases and sales, and transfers in or out of the Level 3 category during the period. In accordance with the requirements of U.S. GAAP, a fair value hierarchy and Level 3 reconciliation, if any, have been included in the Notes to the Schedule of Investments for each respective Fund.

Net realized gain (loss) and net unrealized appreciation (depreciation), shown on the reconciliation of Level 3 investments if applicable, are included on the Statement of Operations in net realized gain (loss) on investments in unaffiliated and/or affiliated securities and in net change in unrealized appreciation (depreciation) on investments in unaffiliated and/or affiliated securities, respectively. Additionally, the net change in unrealized appreciation (depreciation) for all Level 3 investments still held as of March 31, 2016, if applicable, is included on the Statement of Operations in net change in unrealized appreciation (depreciation) on investments in unaffiliated and/or affiliated securities.

4. DERIVATIVE INSTRUMENTS (\$ amounts in thousands unless indicated otherwise)

The following disclosures contain information on why and how the Funds use derivative instruments, the associated risks of investing in derivative instruments, and how derivative instruments affect the Funds' financial positions and results of operations when presented by primary underlying risk exposure.

Forward Foreign Currency Contracts. Certain Funds may enter into forward foreign currency contracts ("forward contracts") for the purchase or sale of a foreign currency at a negotiated rate at a future date. Forward contracts are reported on a schedule following the Schedule of Investments. Forward contracts will be valued daily based upon the closing prices of the forward currency rates provided by an independent pricing service determined at the close of the NYSE as provided by a bank, dealer or independent pricing service. The resulting unrealized appreciation and depreciation is reported on the Statement of Assets and Liabilities as a receivable or payable and on the Statement of Operations within the change in unrealized appreciation (depreciation). At contract close, the difference between the original cost of the contract and the value at the close date is recorded as a realized gain (loss) on the Statement of Operations.

Risks to a Fund related to the use of such contracts include both market and credit risk. Market risk is the risk that the value of the forward contract will depreciate due to unfavorable changes in the exchange rates. Credit risk arises from the possibility that the counterparty will default. If the counterparty defaults, a Fund's maximum loss will consist of the aggregate unrealized gain on appreciated contracts that is not collateralized.

Ivy Cundill Global Value Fund, Ivy Emerging Markets Equity Fund, Ivy European Opportunities Fund, Ivy Global Bond Fund, Ivy Global Equity Income Fund, Ivy Global Growth Fund, Ivy Global Income Allocation Fund, Ivy High Income Fund and Ivy International Core Equity Fund enter into forward foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio instruments or to obtain exposure to, or hedge exposure away from foreign currencies (foreign currency exchange rate risk).

Futures Contracts. Certain Funds may engage in buying and selling futures contracts. Upon entering into a futures contract, the Fund is required to deposit, in a segregated account, an amount equal to a varying specified percentage of the contract amount. This amount is known as the initial margin. Subsequent payments (variation margins) are made or received by the Fund each day, dependent on the daily fluctuations in the value of the underlying debt security or index.

Futures contracts are reported on a schedule following the Schedule of Investments. Securities held in collateralized accounts to cover initial margin requirements on open futures contracts are identified on the Schedule of Investments. Cash held by the broker to cover initial margin requirements on open futures contracts and the receivable and/or payable for the daily mark to market for the variation margin are noted on the Statement of Assets and Liabilities. The net change in unrealized appreciation (depreciation) is reported on the Statement of Operations. Realized gains (losses) are reported on the Statement of Operations at the closing or expiration of futures contracts.

Risks of entering into futures contracts include the possibility of loss of securities or cash held as collateral, that there may be an illiquid market where the Fund is unable to close the contract or enter into an offsetting position and, if used for hedging purposes, the risk that the price of the contract will correlate imperfectly with the prices of the Fund's securities.

Ivy Bond Fund, Ivy Emerging Markets Equity Fund, Ivy Global Bond Fund and Ivy Municipal High Income Fund invest in long and/or short positions in futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk), changes in the value of equity securities (equity risk) or foreign currencies (foreign currency exchange rate risk).

Option Contracts. Options purchased by a Fund are accounted for in the same manner as portfolio securities. The cost of instruments acquired through the exercise of call options is increased by the premium paid to purchase the call. The proceeds from instruments sold through the exercise of put options are decreased by the premium paid to purchase the put.

When a Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded as a liability. The amount of the liability is subsequently adjusted to reflect the current value of the option written. When an option expires on its stipulated expiration date or a Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the call option was sold), and the liability related to such option is extinguished. When a written call option is exercised, the premium is added to the proceeds from the sale of the underlying instrument in determining whether a Fund has realized a gain or loss. For each Fund, when a written put is exercised, the cost basis of the instruments purchased by a Fund is reduced by the amount of the premium received.

Investments in options, whether purchased or written, involve certain risks. Writing put options and purchasing call options may increase a Fund's exposure to the underlying instrument. With written options, there may be times when a Fund will be required to purchase or sell instruments to meet its obligation under the option contract where the required action is not beneficial to the Fund, due to unfavorable movement of the market price of the underlying instrument. Additionally, to the extent a Fund enters into OTC option transactions with counterparties, the Fund will be exposed to the risk that counterparties to these OTC transactions will be unable to meet their obligations under the terms of the transaction.

Ivy Dividend Opportunities Fund, Ivy Emerging Markets Equity Fund, Ivy Global Income Allocation Fund, Ivy International Core Equity Fund, Ivy Mid Cap Growth Fund, Ivy Small Cap Growth Fund and Ivy Value Fund may purchase and write call and put options to increase or decrease hedging exposure to underlying instruments (which may include credit risk, equity risk, foreign currency exchange rate risk, event risk and/or interest rate risk), increase exposure to various equity markets or certain sectors, gain exposure to or facilitate trading in certain securities and/or, in the case of options written, to generate returns from options premiums.

Swap Agreements. Certain Funds may invest in swap agreements. Swaps are marked to market daily and changes in value are recorded as unrealized appreciation (depreciation) on the Statement of Operations. Payments received or made by the Fund are recorded as realized gain or loss on the Statement of Operations. Any upfront premiums paid are recorded as assets and any upfront fees received are recorded as liabilities and are shown as swap premiums paid and swap premiums received, respectively, if any, on the Statement of Assets and Liabilities and amortized over the term of the swap. A liquidation payment received or made at the termination or maturity of the swap is recorded as realized gain or loss on the Statement of Operations.

Total return swaps involve a commitment to pay or receive periodic interest payments in exchange for a market-linked return based on a security or a basket of securities representing a variety of securities or a particular index. To the extent the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Ivy Emerging Markets Equity Fund, Ivy High Income Fund and Ivy Small Cap Growth Fund enter into total return swaps to hedge exposure to a security or market.

The creditworthiness of the counterparty with which a Fund enters into a swap agreement is monitored by IICO. If a firm's creditworthiness declines, the value of the agreement would likely decline, potentially resulting in losses. If a default occurs by the counterparty to such a transaction, the Fund will have contractual remedies pursuant to the agreement related to the transaction. The maximum loss a Fund may incur consists of the aggregate unrealized gain on appreciated contracts that is not collateralized.

Collateral and rights of offset. A Fund may mitigate credit risk with respect to OTC derivative counterparties through credit support annexes ("CSA") included with an International Swaps and Derivatives Association, Inc. ("ISDA") Master Agreement which is the standard contract governing most derivative transactions between the Fund and each of its counterparties. The CSA allows the Fund and its counterparty to offset certain derivative financial instruments' payables and/or receivables against each other and/or with collateral, which is generally held by the Fund's custodian. The amount of collateral moved to/from applicable counterparties is based upon minimum transfer amounts specified in the CSA. To the extent amounts due to the Fund from its counterparties are not fully collateralized contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. See Note 2 "Segregation and Collateralization" for additional information with respect to collateral practices.

Offsetting of Assets and Liabilities. The following tables present financial instruments that are either (1) offset or (2) subject to an enforceable master netting arrangement or similar agreement as of March 31, 2016:

Assets

Assets				Gross Amounts Not Offset on the Statement of Assets and Liabilities			
Fund	Gross Amounts of Recognized Assets	Gross Amounts Offset on the Statement of Assets and Liabilities	Net Amounts of Assets Presented on the Statement of Assets and Liabilities	Financial Instruments and Derivatives Available for Offset	Non-Cash Collateral Received	Cash Collateral Received	Net Amount Receivable

6. BASIS FOR CONSOLIDATION OF THE IVY EMERGING MARKETS EQUITY FUND

Ivy EME, Ltd. (the “Subsidiary”), a Cayman Islands exempted company, was incorporated as a wholly owned subsidiary acting as an investment vehicle for the Ivy Emerging Markets Equity Fund (referred to as “the Fund” in this subsection). The Subsidiary acts as an investment vehicle for the Fund, in order to effect certain investments for the Fund consistent with the Fund’s investment objectives and policies as specified in its prospectus and SAI. The Fund’s investment portfolio has been consolidated and includes the portfolio holdings of the Fund and its Subsidiary. The consolidated financial statements include the accounts of the Fund and its Subsidiary. All inter-company transactions and balances have been eliminated. A subscription agreement was entered into between the Fund and its Subsidiary comprising the entire issued share capital of the Subsidiary with the intent that the Fund will remain the sole shareholder and retain all rights. Under the Articles of Association, shares issued by the Subsidiary confer upon a shareholder the right to receive notice of, to attend and to vote at general meetings of the Subsidiary and shall confer upon the shareholder rights in a winding-up or repayment of capital and the right to participate in the profits or assets of the Subsidiary.

See the table below for details regarding the structure, incorporation and relationship as of March 31, 2016 of the Subsidiary to the Fund (amounts in thousands).

Subsidiary	Date of Incorporation	Subscription Agreement	Fund Net Assets	Subsidiary Net Assets	Percentage of Fund Net Assets
Ivy EME, Ltd.	1-31-13	4-10-13	\$533,902	\$354	0.07%

7. INVESTMENT MANAGEMENT AND PAYMENTS TO AFFILIATED PERSONS

(\$ amounts in thousands unless indicated otherwise)

Management Fees. IICO, a wholly owned subsidiary of Waddell & Reed Financial, Inc. ("WDR"), serves as each Fund's investment manager. The management fee is accrued daily by each Fund at the following annual rates as a percentage of average daily net assets:

Fund (M - Millions)	\$0 to \$250M	\$250 to \$500M	\$500 to \$1,000M	\$1,000 to \$1,500M	\$1,500 to \$2,000M	\$2,000 to \$3,000M	\$3,000 to \$5,000M	\$5,000 to \$6,000M	\$6,000 to \$10,000M	\$10,000 to \$15,000M	\$15,000 to \$20,000M	Over \$20,000M
Ivy Bond Fund	0.525%	0.525%	0.500%	0.450%	0.400%	0.400%	0.400%	0.395%	0.395%	0.390%	0.390%	0.390%

For the period from May 18, 2009 to September 30, 2016, IICO voluntarily agreed to reduce the management fee paid to 0.485%, on an annual basis, of net assets for any day that Ivy Municipal High Income Fund's net assets are below \$500 million.

For Funds managed solely by IICO, IICO has voluntarily agreed to waive a Fund's management fee on any day that the Fund's net assets are less than \$25 million, subject to IICO's right to change or modify this waiver. See Expense Reimbursements and/or Waivers below for amounts waived during the year ended March 31, 2016.

IICO has entered into Subadvisory Agreements with the following entities on behalf of certain Funds:

Under an agreement between IICO and Mackenzie Financial Corporation (“Mackenzie”), Mackenzie serves as subadviser to Ivy Cundill Global Value Fund. Under an agreement between IICO and Advantus Capital Management, Inc. (“Advantus”), Advantus serves as subadviser to Ivy Bond Fund. Each subadviser makes investment decisions in accordance with the Fund’s investment objectives, policies and restrictions under the supervision of IICO and the oversight of the Board. IICO pays all applicable costs of the subadvisers.

Accounting Services Fees. The Trust has an Accounting and Administrative Services Agreement with WRSCO, doing business as WI Services Company (“WISC”), an indirect subsidiary of WDR. Under the agreement, WISC acts as the agent in providing bookkeeping and accounting services and assistance to the Trust, including maintenance of Fund records, pricing of Fund shares and preparation of certain shareholder reports. For these services, each Fund, other than Ivy Managed International Opportunities Fund, pays WISC a monthly fee of one-twelfth of the annual fee based on the average net asset levels shown in the following table:

(M - Millions)	\$0 to \$10M	\$10 to \$25M	\$25 to \$50M	\$50 to \$100M	\$100 to \$200M	\$200 to \$350M	\$350 to \$550M	\$550 to \$750M	\$750 to \$1,000M	Over \$1,000M
Annual Fee Rate	\$0.00	\$11.50	\$23.10	\$35.50	\$48.40	\$63.20	\$82.50	\$96.30	\$121.60	\$148.50

In addition, for each class of shares in excess of one, each Fund pays WISC a monthly per-class fee equal to 2.5% of the monthly accounting services base fee.

Under the Accounting and Administrative Services Agreement for the Ivy Managed International Opportunities Fund, the Fund pays WISC a monthly fee of one-twelfth of the annual fee shown in the following table:

(M - Millions)	\$0 to \$10M	\$10 to \$25M	\$25 to \$50M	\$50 to \$100M	\$100 to \$200M	\$200 to \$350M	\$350 to \$550M	\$550 to \$750M	\$750 to \$1,000M	Over \$1,000M
Annual Fee Rate	\$0.000	\$5.748	\$11.550	\$17.748	\$24.198	\$31.602	\$41.250	\$48.150	\$60.798	\$74.250

In addition, for each class of shares in excess of one, the Ivy Managed International Opportunities Fund pays WISC a monthly per-class fee equal to 1.25% of the monthly accounting services base fee.

Each Fund also pays WISC a monthly administrative fee at the annual rate of 0.01%, or one basis point, for the first \$1 billion of net assets with no fee charged for net assets in excess of \$1 billion. This fee is voluntarily waived by WISC until a Fund’s net assets are at least \$10 million and is included in “Accounting services fee” on the Statement of Operations.

Shareholder Servicing. General. Under the Shareholder Servicing Agreement between the Trust and WISC, with respect to Class A, Class B, Class C and Class E shares, for each shareholder account that was in existence at any time during the prior month, each Fund pays a monthly fee that ranges from \$1.5042 to \$1.6958 per account; however, WISC has agreed to reduce that fee if the number of total shareholder accounts within the Complex (Waddell & Reed Advisors Funds, InvestEd Portfolios and Ivy Funds) reaches certain levels. Ivy Money Market Fund pays a monthly fee of \$1.75 for each shareholder account that was in existence at any time during the prior month plus, for Class A shareholder accounts, \$0.75 for each shareholder check processed in the prior month. Ivy Limited-Term Bond Fund Class A, which also has check writing privileges, pays \$0.75 for each shareholder check processed in the prior month. Effective June 6, 2011 for Class R shares, each Fund pays a monthly fee equal to one-twelfth of 0.25 of 1% of the average daily net assets of the class for the preceding month. Prior to June 6, 2011 the fee was 0.20 of 1%. For Class I and Class Y shares, each Fund pays a monthly fee equal to one-twelfth of 0.15 of 1% of the average daily net assets of the class for the preceding month. For Class R6 shares, each Fund pays WISC a monthly fee equal to one-twelfth of 0.01 of 1% of the average daily net assets of the class for the preceding month. Each Fund also reimburses WISC for certain out-of-pocket costs for all classes.

Networked accounts. For certain networked accounts (that is, those accounts whose Fund shares are purchased through certain financial intermediaries), WISC has agreed to reduce its per account fees charged to the Funds to \$0.50 per month per shareholder account. Additional fees may be paid by the Funds to those intermediaries. The Fund will reimburse WISC for such costs if the annual rate of the third-party per account charges for a Fund are less than or equal to \$12.00 per account or an annual fee of 0.14 of 1% that is based on average daily net assets.

Broker accounts. Certain broker-dealers that maintain shareholder accounts with each Fund through an omnibus account provide transfer agent and other shareholder-related services that would otherwise be provided by WISC if the individual accounts that comprise the omnibus account were opened by their beneficial owners directly. Each Fund may pay such broker-dealers a per account fee for each open account within the omnibus account (up to \$18.00 per account), or a fixed rate fee (up to an annual fee of 0.20 of 1% that is based on average daily net assets), based on the average daily NAV of the omnibus account (or a combination thereof).

Distribution and Service Plan. Class A and Class E Shares. Under a Distribution and Service Plan adopted by the Trust pursuant to Rule 12b–1 under the 1940 Act (the “Distribution and Service Plan”), each Fund, other than Ivy Money Market Fund, may pay a distribution and/or service fee to Ivy Funds Distributors, Inc. (“IFDI”) for Class A and Class E shares in an amount not to exceed 0.25% of the Fund’s average annual net assets. The fee is to be paid to compensate IFDI for amounts it expends in connection with the distribution of the Class A and Class E shares and/or provision of personal services to Fund shareholders and/or maintenance of shareholder accounts of that class.

Class B and Class C Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a service fee not to exceed 0.25% and a distribution fee not to exceed 0.75% of the Fund’s average annual net assets for Class B and Class C shares to compensate IFDI for its services in connection with the distribution of shares of that class and/or provision of personal services to Class B or Class C shareholders and/or maintenance of shareholder accounts of that class.

Class R Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a fee of up to 0.50%, on an annual basis, of the average daily net assets of the Fund's Class R shares to compensate IFDI for, either directly or through third parties, distributing the Class R shares of that Fund, providing personal services to Class R shareholders and/or maintaining Class R shareholder accounts.

Class Y Shares. Under the Distribution and Service Plan, each Fund may pay IFDI a fee of up to 0.25%, on an annual basis, of the average daily net assets of the Fund's Class Y shares to compensate IFDI for, either directly or through third parties, distributing the Class Y shares of that Fund, providing personal services to Class Y shareholders and/or maintaining Class Y shareholder accounts.

Sales Charges. As principal underwriter for the Trust's shares, IFDI receives sales commissions (which are not an expense of the Trust) for sales of Class A and Class E shares. A CDSC may be assessed against a shareholder's redemption amount of Class B, Class C or certain Class A and Class E shares and is paid to IFDI. During the year ended March 31, 2016, IFDI received the following amounts in sales commissions and CDSCs:

	Gross Sales Commissions	CDSC				Commissions Paid ⁽¹⁾
		Class A	Class B	Class C	Class E	
Ivy Bond Fund	\$ 280	\$ 4	\$ 9	\$ 3	\$ —	\$ 239

* Not shown due to rounding.

(1) Reflects the lower contractual expense limit which went into effect 8-1-2015.

(2) The Fund's management fee is being reduced by 0.14% of average daily net assets.

(3) The Fund's management fee is being reduced by 0.02% of average daily net assets.

(4) Due to Class A, Class B, Class C, Class E, Class I, Class R, Class R6, and/or Class Y contractual expense limits, investment management fees were waived for all share classes.

(5) Minimum yield was 0.02% throughout the period of this report.

Any amounts due to the Funds as a reimbursement but not paid as of March 31, 2016 are shown as a receivable from affiliates on the Statement of Assets and Liabilities.

8. RELATED PARTY TRANSACTIONS

Certain Funds are permitted to purchase or sell securities from or to certain affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Funds from or to another fund or portfolio that are, or could be, considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a-7 of the Act. Further, as defined under the procedures, each transaction is effected at the current market price. During the year ended March 31, 2016, the Funds below engaged in purchases and sales of securities pursuant to Rule 17a-7 of the Act (amounts in thousands):

Fund	Purchases	Sales
Ivy European Opportunities Fund	\$ 261	\$ —
Ivy Global Income Allocation Fund	5,000	—
Ivy High Income Fund	—	256,587
Ivy International Core Equity Fund	23,092	215
Ivy Municipal Bond Fund	2,067	—

9. INTERFUND LENDING PROGRAM

Pursuant to an exemptive order issued by the SEC ("Order"), the Trust and the Advisors Fund Complex (Waddell & Reed Advisors Funds, Ivy Funds Variable Insurance Portfolios and InvestEd Portfolios; referred to with the Funds for purposes of this section as Funds) have the ability to lend money to, and borrow money from, each other pursuant to a master interfund lending agreement ("Interfund Lending Program"). Under the Interfund Lending Program, the Funds may lend or borrow money for temporary purposes directly to or from one another (each an "Interfund Loan"), subject to meeting the conditions of the Order. The interest rate to be charged on an Interfund Loan is the average of the overnight repurchase agreement rate and the short-term bank loan rate. The Funds made no Interfund Loans under the Interfund Lending Program during the year ended March 31, 2016.

10. AFFILIATED COMPANY TRANSACTIONS (All amounts in thousands)

13. COMMITMENTS (\$ amounts in thousands)

Bridge loan commitments may obligate a Fund to furnish temporary financing to a borrower until permanent financing can be arranged. In connection with these commitments, the Fund earns a commitment fee, typically set as a percentage of the commitment amount. Such fee income is included in interest income on the Statement of Operations. As of March 31, 2016, there were no outstanding bridge loan commitments.

14. FEDERAL INCOME TAX MATTERS (\$ amounts in thousands)

For Federal income tax purposes, cost of investments owned at March 31, 2016 and the related unrealized appreciation (depreciation) were as follows:

Fund	Cost of Investments	Gross Appreciation	Gross Depreciation	Net Unrealized Appreciation (Depreciation)
Ivy Bond Fund	\$ 789,130	\$ 15,926	\$ 8,531	\$ 7,395

Internal Revenue Code regulations permit each Fund to elect to defer into its next fiscal year capital losses and certain specified ordinary items incurred between each November 1 and the end of its fiscal year. Each Fund is also permitted to defer into its next fiscal year certain ordinary losses that generated between each January 1 and the end of its fiscal year.

Accumulated capital losses represent net capital loss carryovers as of March 31, 2016 that may be available to offset future realized capital gains and thereby reduce future capital gains distributions. Under the Regulated Investment Company Modernization Act of 2010 (the "Modernization Act"), a Fund is permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. Any losses incurred during those future taxable years will be required to be utilized prior to any losses incurred in pre-enactment taxable years which have only an eight year carryforward period. As a result of this ordering rule, pre-enactment capital loss carryovers may expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under the previous law. The Fund's first fiscal year end subject to the Modernization Act was March 31, 2012. The following table

shows the expiration dates for capital loss carryovers from pre-enactment taxable years and the amounts of capital loss carryovers, if any, by each of the applicable Funds electing to be taxed as a regulated investment company during the year ended March 31, 2016:

Fund	Pre-Enactment			Post-Enactment	
	Year of Expiration			Short-Term Capital Loss Carryover	Long-Term Capital Loss Carryover

Ivy Mortgage Securities Fund was merged into Ivy Bond Fund as of January 24, 2011. At the time of the merger, Ivy Mortgage Securities Fund had capital loss carryovers available to offset future gains of the Ivy Bond Fund. These carryovers are limited to \$14,641 for the period ending March 31, 2017 and \$4,298 for the period ending from March 31, 2018 plus any unused limitations from prior years.

Ivy Asset Strategy New Opportunities Fund was merged into Ivy Emerging Markets Equity Fund as of March 17, 2014. At the time of the merger, Ivy Asset Strategy New Opportunities Fund had capital loss carryovers available to offset future gains of the Ivy Emerging Markets Equity Fund. These carryovers are annually limited to \$7,827 plus any unused limitations from prior years.

Ivy Managed European/Pacific Fund was merged into Ivy Managed International Opportunities Fund as of March 17, 2014. At the time of the merger, Ivy Managed European/Pacific Fund had capital loss carryovers available to offset future gains of the Ivy Managed International Opportunities Fund. These carryovers are annually limited to \$2,377 plus any unused limitations from prior years.

Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from U.S. GAAP. These differences are due to differing treatments for items such as deferral of wash sales, post-October losses, late-year ordinary losses, foreign currency transactions, net operating losses, income from passive foreign investment companies (PFICs), partnership transactions, and expiring capital loss carryovers. At March 31, 2016, the following reclassifications were made:

Fund	Undistributed Net Investment Income	Accumulated Net Realized Gain (Loss)	Paid-In Capital	Unrealized Appreciation (Depreciation)
Ivy Bond Fund	\$ 1,070	\$ (1,052)	\$ (18)	\$—

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Ivy Funds

To the Shareholders and Board of Trustees of Ivy Funds:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Ivy Bond Fund, Ivy Core Equity Fund, Ivy Cundill Global Value Fund, Ivy Dividend Opportunities Fund, Ivy Emerging Markets Equity Fund, Ivy European Opportunities Fund, Ivy Global Bond Fund, Ivy Global Equity Income Fund, Ivy Global Growth Fund, Ivy Global Income Allocation Fund, Ivy High Income Fund, Ivy International Core Equity Fund, Ivy Large Cap Growth Fund, Ivy Limited-Term Bond Fund, Ivy Managed International Opportunities Fund, Ivy Micro Cap Growth Fund, Ivy Mid Cap Growth Fund, Ivy Mid Cap Income Opportunities Fund, Ivy Money Market Fund, Ivy Municipal Bond Fund, Ivy Municipal High Income Fund, Ivy Small Cap Growth Fund, Ivy Small Cap Value Fund, Ivy Tax-Managed Equity Fund, and Ivy Value Fund, twenty-five of the thirty-three funds constituting Ivy Funds (the "Funds"), as of March 31, 2016, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended (as to the Ivy Mid Cap Income Opportunities Fund, for the year then ended and for the period from October 1, 2014 (commencement of operations) through March 31, 2015), and the financial highlights for each of the periods presented. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Funds are not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2016, by correspondence with the custodian, transfer agent, agent banks, and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the Funds as of March 31, 2016, and the results of their operations, the changes in their net assets, and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

Kansas City, Missouri
May 23, 2016

INCOME TAX INFORMATION

Ivy Funds

AMOUNTS NOT ROUNDED (UNAUDITED)

The Funds hereby designate the following amounts of dividends paid from net ordinary income as dividends qualifying for the 70% dividends received deduction for corporations or as qualified dividend income for individuals for the tax period ended March 31, 2016:

	Dividends Received Deduction for Corporations	Qualified Dividend Income for Individuals
Ivy Bond Fund	\$ —	\$ —

Ivy Global Income Allocation Fund	7,090,200	21,211,247
Ivy High Income Fund	—	—
Ivy International Core Equity Fund	1,017,096	47,277,725
Ivy Large Cap Growth Fund	—	—
Ivy Limited-Term Bond Fund	—	—
Ivy Managed International Opportunities Fund	412,059	1,818,576
Ivy Micro Cap Growth Fund	—	—
Ivy Mid Cap Growth Fund	37,301,753	38,684,497
Ivy Mid Cap Income Opportunities Fund	1,322,358	1,322,358
Ivy Money Market Fund	—	—
Ivy Municipal Bond Fund	—	—
Ivy Municipal High Income Fund	—	—
Ivy Small Cap Growth Fund	—	—
Ivy Small Cap Value Fund	—	—
Ivy Tax-Managed Equity Fund	349,755	349,755
Ivy Value Fund	4,335,128	4,806,372

Ivy Municipal Bond Fund and Ivy Municipal High Income Fund hereby designate \$4,172,481 and \$53,126,471, respectively, of the dividends declared from net investment income as exempt from federal income tax for the tax period ending March 31, 2016.

The Funds hereby designate the following amounts as distributions of long-term capital gains:

Ivy Bond Fund	\$ —
Ivy Core Equity Fund	62,571,543
Ivy Cundill Global Value Fund	—
Ivy Dividend Opportunities Fund	30,138,788
Ivy Emerging Markets Equity Fund	—
Ivy European Opportunities Fund	—
Ivy Global Bond Fund	—

Ivy Managed International Opportunities Fund	—
Ivy Micro Cap Growth Fund	7,628,407
Ivy Mid Cap Growth Fund	339,016,794
Ivy Mid Cap Income Opportunities Fund	—
Ivy Money Market Fund	—
Ivy Municipal Bond Fund	—
Ivy Municipal High Income Fund	—
Ivy Small Cap Growth Fund	130,985,205
Ivy Small Cap Value Fund	33,900,603
Ivy Tax-Managed Equity Fund	1,745,686
Ivy Value Fund	28,457,471

Income from Ivy Municipal Bond Fund and Ivy Municipal High Income Fund may be subject to the alternative minimum tax. Shareholders are advised to consult with their tax advisors concerning the tax treatment of dividends and distributions from all the Funds.

Internal Revenue Code regulations permit each qualifying Fund to elect to pass through a foreign tax credit to shareholders with respect to foreign taxes paid by the Fund. As of March 31, 2016, the Funds hereby designate the following as a foreign tax credit from the taxes paid on income derived from sources within foreign countries or possession of the United States:

	Foreign Tax Credit	Foreign Derived Income
Ivy Cundill Global Value Fund	\$ 468,212	\$ 5,130,828
Ivy European Opportunities Fund	359,323	5,021,416
Ivy Global Equity Income Fund	828,975	11,109,380
Ivy Global Income Allocation Fund	880,112	26,137,939
Ivy International Core Equity Fund	8,117,110	108,510,909
Ivy Managed International Opportunities Fund	332,433	2,389,976

BOARD OF TRUSTEES AND OFFICERS

Ivy Funds

The Trust is governed by the Board of Trustees (the “Board”). A majority of the Board members are not “interested persons” as defined in Section 2(a)(19) of the 1940 Act and therefore qualify as Disinterested Trustees. The Board elects the officers who are responsible for administering the Funds’ day-to-day operations. The Waddell & Reed Fund Complex (“Fund Complex”) is comprised of the Ivy Family of Funds, the Ivy High Income Opportunities Fund (a closed-end fund) (“IVH”) and the Advisors Fund Complex, which is comprised of each of the funds in the Waddell & Reed Advisors Funds (20 funds), Ivy Funds Variable Insurance Portfolios (29 funds) and InvestEd Portfolios (3 funds). Jarold W. Boettcher, Joseph Harroz, Jr., and Henry J. Herrmann also serve as trustees of each of the funds in the Advisors Fund Complex. Each member of the Board is also a member of the Board of Trustees of IVH.

Joseph Harroz, Jr. serves as Independent Chair of the Trust’s Board and of the Board of Trustees of IVH.

A Trustee serves until his or her successor is elected and qualified or until his or her earlier death, resignation or removal. The Board appoints officers and delegates to them the management of the day-to-day operations of each of the Funds, based on policies reviewed and approved by the Board, with general oversight by the Board.

The Statement of Additional Information (“SAI”) for the Trust includes additional information about the Trust’s Trustees. The SAI is available without charge, upon request by calling 1.800.777.6472. It is also available on the Ivy Funds website, www.ivyfund.com.

Disinterested Trustees

The following table provides information regarding each Disinterested Trustee.

Name, Address and Year of Birth	Position Held With the Trust	Trustee Since	Principal Occupation(s) During Past 5 Years	Number of Funds in Fund Complex Overseen	Other Directorships Held During Past 5 Years

Tighe 6300 Lamar Avenue Overland Park, KS 66202 1942	Trustee	2008	Retired; formerly, CEO and Director of Asgard Holdings LLC (computer network and security services) (2002 to 2004); President, Citco Technology Management (1995-2000); CEO, Global Mutual Fund Services (1993-2000); Sr. Vice President, Templeton Global Investors (1988-1992).	38	Director, The Research Coast Principium Foundation, Inc. (non-profit) (2012 to 2015); Trustee, IVH.

Interested Trustees

Mr. Herrmann is “interested” by virtue of his current or former engagement as an officer of Waddell & Reed Financial, Inc. (“WDR”) or its wholly owned subsidiaries, including each Fund’s investment manager, IICO, each Fund’s principal underwriter, IFDI, and each Fund’s shareholder servicing and accounting services agent, Waddell & Reed Services Company, doing business as WI Services Company (“WISC”), as well as by virtue of his personal ownership in shares of WDR.

Name, Address and Year of Birth	Position(s) Held with the Trust	Trustee/Officer Since	Principal Occupation(s) During Past 5 Years	Number of Funds in Fund Complex Overseen	Other Directorships Held
Henry J. Herrmann 6300 Lamar Avenue Overland Park, KS 66202 1942	President Trustee	2008 2008	Chairman, WDR (January 2010 to present); CEO, WDR (2005 to present); President, CEO and Chairman, IICO (2002 to present); President, CEO and Chairman, Waddell & Reed Investment Management Company (WRIMCO) (1993 to present); President and Trustee of each of the funds in the Fund Complex.	90	Director, WDR, IICO, WRIMCO, WISC, W&R Capital Management Group, Inc. and Waddell & Reed, Inc.; Director, Blue Cross Blue Shield of Kansas City (2007 to present); United Way of Greter Kansas City (2007 to 2012); Trustee, Advisors Fund Complex (52 portfolios overseen); Trustee, IVH.

Officers

The Board has appointed officers who are responsible for the day-to-day business decisions based on policies it has established. The officers serve at the pleasure of the Board. In addition to Mr. Herrmann, who is President, the Trust's principal officers are:

Name, Address and Year of Birth	Position(s) Held with the Trust and Fund Complex	Officer of Trust Since	Officer of Fund Complex Since*	Principal Occupation(s) During Past 5 Years
Joseph W. Kauten 6300 Lamar Avenue Overland Park, KS 66202 1969	Vice President	2008	2006	Principal Financial Officer of each of the funds in the Fund Complex (2007 to present); Vice President, Treasurer and Principal Accounting Officer of each of the funds in the Fund Complex (2006 to present); Assistant Treasurer of each of the funds in the Fund Complex (2003 to 2006).
	Treasurer	2008	2006	
	Principal Accounting Officer	2008	2006	
	Principal Financial Officer	2008	2007	
Scott J. Schneider 6300 Lamar Avenue Overland Park, KS 66202 1968	Vice President	2008	2006	Chief Compliance Officer (2004 to present) and Vice President (2006 to present) of each of the funds in the Fund Complex.
	Chief Compliance Officer	2008	2004	
Wendy J. Hills 6300 Lamar Avenue Overland Park, KS 66202 1970	Vice President	2014	2014	Senior Vice President and General Counsel of WDR, Waddell & Reed, WRIMCO and WISC (2014 to present); Senior Vice President and General Counsel of IICO (2014 to present); Vice President, General Counsel and Assistant Secretary for each of the funds in the Fund Complex (2014 to present).
	General Counsel	2014	2014	
	Assistant Secretary	2014	2014	
Philip A. Shipp 6300 Lamar Avenue Overland Park, KS 66202 1969	Assistant Secretary	2012	2012	Assistant Secretary of each of the funds in the Fund Complex (2012 to present).

* This is the date when the officer first became an officer of one or more of the funds that are the predecessors to current funds within Ivy Funds (each, a predecessor fund) (if applicable).

ANNUAL PRIVACY NOTICE

Ivy Funds

The following privacy notice is issued by Ivy Funds (the “Funds”), Ivy Investment Management Company (“IICO”) and Ivy Funds Distributor, Inc. (“IFDI”).

Information Collected

We collect nonpublic personal information about you from your account application and other forms that you may deliver to us, and from your transactions with us and our affiliates. This is information that regulators consider necessary for the proper servicing of your account. In order to effect your transactions and service your account properly, we may disclose all of the information that we collect, as described above, to firms that assist us in servicing your account, such as our transfer agent.

Confidentiality of Information Collected

All records containing your nonpublic personal information are kept at our various service providers. These entities include IICO, IFDI and our transfer agent and administrative services provider. We require these affiliates, and any non-affiliated service providers, to protect the confidentiality of your information and to use the information only for the purposes for which disclosure to them is made. The Funds, IICO, IFDI and other service providers restrict access to nonpublic personal information about you to those employees who need to know that information to provide products and services to you and maintain physical, electronic, and procedural safeguards that comply with federal standards to maintain the security of your nonpublic personal information.

Disclosure of Information in Limited Circumstances

We do not disclose nonpublic personal information about present or former customers to nonaffiliated third parties, except as permitted or required by law. In connection with servicing your account, your nonpublic personal information may be shared among the entities named in this notice, their affiliates, and non-affiliates, including a transfer agent or other service companies. We will adhere to the policies and practices above for both current and former customers.

PROXY VOTING INFORMATION

Ivy Funds

Proxy Voting Guidelines

A description of the policies and procedures Ivy Funds uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 1.800.777.6472 and (ii) on the Securities and Exchange Commission's ("SEC") website at www.sec.gov.

Proxy Voting Records

Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on Form N-PX through the Ivy Funds' website at www.ivyfund.com and on the SEC's website at www.sec.gov.

QUARTERLY PORTFOLIO SCHEDULE INFORMATION

Ivy Funds

Portfolio holdings can be found on the Trust's website at www.ivyfund.com. Alternatively, a complete schedule of portfolio holdings of each Fund for the first and third quarters of each fiscal year is filed with the SEC and can be found on the Trust's Form N-Q. These holdings may be viewed in the following ways:

- On the SEC's website at www.sec.gov.
- For review and copy at the SEC's Public Reference Room in Washington, DC. Information on the operations of the Public Reference Room may be obtained by calling 1.800.SEC.0330.

TO ALL TRADITIONAL IRA PLANHOLDERS:

Ivy Funds

As required by law, we are hereby providing notice to you that income tax may be withheld automatically from any distribution or withdrawal from a traditional IRA. A Fund is generally required to withhold taxes unless you make a written election not to have taxes withheld. The election may be made on the distribution/withdrawal form provided by Waddell & Reed, Inc. which can be obtained from your Waddell & Reed representative or by submitting Internal Revenue Service Form W-4P. Once made, an election can be revoked by providing written notice to Waddell & Reed, Inc. If you elect not to have tax withheld you may be required to make payments of estimated tax. Penalties may be imposed by the IRS if withholding and estimated tax payments are not adequate.

HOUSEHOLDING NOTICE

Ivy Funds

If you currently receive one copy of the shareholder reports and prospectus for your household (even if more than one person in your household owns shares of the Trust) and you would prefer to receive separate shareholder reports and prospectuses for each account holder living at your address, you can do either of the following:

Fax your request to 800.532.2749.

Write to us at the address listed on the back cover.

Please list each account for which you would like to receive separate shareholder reports and prospectus mailings. We will resume sending separate documents within 30 days of receiving your request.
