FORM 10-Q

(Mark One)

**[X] QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2010

OR

**[] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number 0-21554

DENMARK BANCSHARES, INC.

(Exact name of registrant as specified in its charter)

Wisconsin	39-1472124
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

103 East Main Street, Denmark, Wisconsin 54208-0130
(Address of principal executive offices, zip code)

(920) 863-2161
(Registrant's telephone number, including area code)

(Former name, address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [X] No []

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes [] No []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

___ Large accelerated filer
___ Non-accelerated filer
(Do not check if a smaller reporting company)

___ Accelerated filer
X **Smaller reporting company**

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes [] No [X]

As of August 6, 2010, there were 118,917 shares of the registrant's common stock (no par value) outstanding.

DENMARK BANCSHARES, INC.

Denmark Bancshares, Inc. and Subsidiaries
Notes to the Consolidated Financial Statements
(Unaudited)

NOTE 1 – FINANCIAL STATEMENTS

The consolidated financial statements included herein are unaudited. In the opinion of management, these statements contain all adjustments necessary to present fairly the financial position of Denmark Bancshares, Inc. (“DBI”), its results of operations and cash flows for the periods presented. All adjustments necessary for the fair presentation of the financial statements are of a normal recurring nature. These consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in DBI’s latest annual report on Form 10-K. DBI’s subsidiaries are Denmark State Bank (“DSB”), Denmark Agricultural Credit Corporation (“DACC”), and DBI Properties, Inc. (“Properties”).

Reclassifications – Certain amounts in the prior period financial statements have been reclassified for comparative purposes to conform to the presentation in the current year.

Notes to the Consolidated Financial Statements
(Unaudited)

The amortized cost and estimated fair values of securities at June 30, 2010, by maturity were as follows:

	Securities Available-for-Sale		Securities Held-to-Maturity	
	Amortized	Estimated	Amortized	Estimated
Amounts Maturing	Cost	Fair Value	Cost	Fair Value
Within one year	\$1,475,644	\$1,474,531	\$4,100,628	\$4,234,954
From one through five years	25,433,843	25,709,633	3,882,020	4,132,117
From five through ten years	6,895,271	5,492,609	11,278,686	11,781,953
After ten years	2,946,565	2,226,429	8,407,335	8,356,409
	<u>\$36,751,323</u>	<u>\$34,903,202</u>	<u>\$27,668,669</u>	<u>\$28,505,433</u>

Mortgage-backed securities are allocated according to their expected prepayments rather than their contractual maturities. Certain state and local governments' securities are allocated according to their put date. Fair values of securities are estimated based on financial models or prices paid for similar securities. It is possible interest rates could change considerably resulting in a material change in the estimated fair value.

At June 30, 2010, sixteen debt securities have unrealized losses with aggregate depreciation of 14.8% from DSB's amortized cost basis. Information pertaining to securities with gross unrealized losses aggregated by investment category and length of time that individual securities have been in a continuous loss position follows:

<u>June 30, 2010</u>	Less Than Twelve Months		Over Twelve Months	
	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value

Notes to the Consolidated Financial Statements

(Unaudited)

All securities with unrealized losses are assessed to determine if the impairment is other-than-temporary. Factors that are evaluated include the mortgage loan types supporting the securities, delinquency and foreclosure rates, credit support, weighted average loan-to-value, and year of origination, among others.

Currently, a quarterly analysis by a third party is performed on three residential mortgage-backed securities secured by non-traditional loan types in order to determine whether they are other-than-temporarily impaired (“OTTI”). The purpose of the third party evaluation is to determine if the present value of the expected cash flows was less than the amortized costs, thereby resulting in credit loss, in accordance with the authoritative accounting guidance under *FASB ASC Topic 320*. The third party determines an estimated fair value for each security based on discounted cash flow analyses. The estimates are based on the following key valuation assumptions – collateral cash flows, prepayment assumptions, default rates, loss severity, liquidation lag, bond waterfall and internal rate of return. Since there is currently no active secondary market for these types of securities, due to the non-traditional loan types supporting the securities, these valuations are considered Level 3 inputs as defined below in Note 5 – Fair Value Measurement. Additional securities may be analyzed in the future if deemed necessary to determine whether they are OTTI and if so, if any possible credit loss exists.

Two of the three securities supported by non-traditional loan types were found to have credit losses during an analysis as of March 31, 2009 since a portion of the unrealized losses is due to an expected cash flow shortfall. As such, these securities were determined to be other-than-temporarily impaired. DBI does not intend to sell the investments and it is not more likely than not that DBI will be required to sell the securities before the anticipated recovery of their remaining amortized cost bases, which may be maturity. The total credit loss that was recognized in earnings as of March 31, 2009 for these securities was \$0.3 million. Based on the June 30, 2010 analysis, no additional credit loss was recognized during the current quarter. The analysis on the other security did not reveal any credit loss nor was the security found to be OTTI. Unrealized losses on the three securities analyzed by the third party were recognized through accumulated other comprehensive loss on the balance sheet as of June 30, 2010, net of tax, in the amount of \$1.2 million.

The unrealized losses on the remainder of the residential mortgage-backed securities are due to the distressed and illiquid markets for collateralized mortgage obligations. The securities are investments in senior tranches with adequate credit support from subordinate tranches, are supported by traditional mortgage loans that originated between 2002 and 2005, have low delinquency and foreclosure rates, and reasonable loan-to-value ratios. DBI does not consider these investments to be OTTI at June 30, 2010.

Changes in credit losses recognized for securities with OTTI were as follows:				
		For the six months ended		For the year ended
		June 30,		December 31,
		2010	2009	2009
Credit losses recognized in earnings, beginning of period		(\$312,716)	\$0	\$0
Credit losses for OTTI not previously recognized		0	(312,716)	(312,716)
Credit losses recognized in earnings, end of period		(\$312,716)	(\$312,716)	(\$312,716)

Notes to the Consolidated Financial Statements

NOTE 3 - LOANS			
Major categories of loans included in the loan portfolio are as follows:			
		June 30,	December 31,
		2010	2009
Real Estate:			
Residential		\$83,080,639	\$86,975,312
Commercial		64,957,143	58,242,163
Agricultural		61,552,003	54,661,093
Construction		13,996,925	15,736,878
		<u>\$223,586,710</u>	<u>\$215,615,446</u>
Commercial		\$30,422,766	\$27,309,621
Agricultural		35,801,839	42,164,396
Consumer and other		11,168,169	11,543,444
TOTAL		<u>\$300,979,484</u>	<u>\$296,632,907</u>

Nonaccrual loans totaled \$8,490,430 and \$12,753,127 at June 30, 2010 and December 31, 2009, respectively. Information concerning DBI's investment in impaired loans is as follows:

	June 30,	December 31,
	2010	2009
Impaired loans with a related allowance	5,055,308	7,230,732
Impaired loans without a related allowance	7,305,847	6,339,082
Total investment in impaired loans	<u>\$12,361,155</u>	<u>\$13,569,814</u>
Related allowance	<u>(1,120,801)</u>	<u>(1,133,461)</u>

Changes in the allowance for loan losses were as follows:			
	For the Six Months Ended		For the Year
	June 30,		Ended
	2010	2009	December 31,
			2009
Balance, beginning of period	\$6,225,627	\$6,355,857	\$6,355,857
Provision charged to operations	730,000	2,535,000	5,500,500
Recoveries	64,290	91,572	308,547
Charge-offs	(495,765)	(2,376,214)	(5,939,277)
Balance, end of period	<u>\$6,524,152</u>	<u>\$6,606,215</u>	<u>\$6,225,627</u>

NOTE 4 – NEW ACCOUNTING PRONOUNCEMENTS

In January 2010, the Financial Accounting Standards Board ("FASB") issued updated guidance to amend *Topic 820, "Fair Value Measurements and Disclosures"* requirements related to recurring and nonrecurring fair value measurements. This update requires new disclosures on significant transfers of assets and liabilities between Level 1 and Level 2 of the fair value hierarchy, including the reasons for these transfers, and the reasons for any transfers in or out of Level 3. This update also requires a reconciliation of recurring Level 3 measurements about purchases, sales, issuances and settlements on a gross basis.

Notes to the Consolidated Financial Statements

(Unaudited)

In an effort to clarify existing fair value disclosures, these amendments also add a level of disaggregation by requiring entities to provide fair value measurement disclosures for each class of assets and liabilities rather than each major category of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the financial statements. Additional clarification is also required on the valuation techniques and inputs. Entities should provide disclosures about the valuation techniques and inputs used to measure fair value for assets or liabilities valued on both a recurring and non-recurring basis where those measurements are considered to be either Level 2 or Level 3 inputs. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in roll forward activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. Adoption of these disclosures did not have a significant impact on DBI's financial statements.

In February 2010, the FASB issued guidance that amended *Topic 855, "Subsequent Events."* These *Amendments to Certain Recognition and Disclosure Requirements* remove the requirement for a Securities and Exchange Commission ("SEC") filer to disclose a date through which subsequent events have been evaluated in both issued and revised financial statements. The FASB believes these amendments remove potential conflicts with the SEC's literature. This amendment was effective immediately upon final issuance and did not have a significant impact on DBI's financial statements.

In April 2010, the FASB issued guidance that updated *Topic 310, "Receivables."* The *Effect of Loan Modification when the Loan is Part of a Pool that is Accounted for as a Single Asset* clarifies how a loan that is part of a pool should be accounted for if the loan is modified in such a manner that it would constitute a troubled debt restructuring. This amendment to *Topic 310* indicates that modifications of loans that are accounted for within a pool do not result in the removal of these loans from the pool even if the modification of those loans would be considered troubled debt restructuring. The amendment is effective for modifications of loans accounted for within pools occurring in the first interim or annual period ending on or after July 15, 2010. Early adoption is permitted. Adoption of this amendment is not expected to have a significant impact on DBI's financial statements.

NOTE 5 – FAIR VALUE MEASUREMENT

Fair value is the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in a transaction between market participants on the measurement date. Some assets and liabilities are measured on a recurring basis while others are measured on a non-recurring basis, as required by U.S. GAAP, which also establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instrument. The three levels of inputs defined in the standard that may be used to measure fair value are as follows:

Level 1: Quoted prices for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that are supported by little, if any, market activity. These unobservable inputs reflect estimates that market participants would use in pricing the asset or liability.

DBI used the following methods and significant assumptions to estimate fair value.

Cash, Cash Equivalents, and Federal Funds Sold: For cash, cash equivalents and federal funds sold, the carrying amount is a reasonable estimate of fair value.

Notes to the Consolidated Financial Statements

(Unaudited)

Investment Securities: Investment securities available-for-sale are recorded at fair value on a recurring basis. The fair value measurement of most of DBI's available-for-sale securities is currently determined by an independent provider using Level 2 inputs (except as noted below). The measurement is based upon quoted prices for similar assets, if available. If quoted prices are not available, fair values are measured using matrix pricing models, or other model based valuation techniques requiring observable inputs other than quoted prices such as yield curves, prepayment speed and default rates. Two of DBI's available-for-sale mortgage-backed securities (MBS) that are secured by non-traditional mortgage loans and one available-for-sale MBS secured by traditional mortgage loans that was downgraded during 2009 were analyzed by a third party in order to determine an estimated fair value. The estimated fair values were based on discounted cash flow analyses and are considered Level 3 inputs.

Refer to Note 2 – Investment Securities above for additional detail on the assumptions used in determining the estimated fair values and additional disclosures regarding DBI's investment securities. For other securities held as investments, fair value equals quoted market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Loans Receivable: The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Loans Held for Sale: Mortgage loans held for sale are recorded at the lower of cost or market value. The fair value is based on a market commitment for the sale of the loan in the secondary market. These loans are typically sold within one week of funding. DBI classifies mortgage loans held for sale as nonrecurring Level 2 assets.

Impaired Loans: As defined below in the *Glossary of Loan Terms* section, a loan is considered to be impaired when, based on current information or events, it is probable that not all amounts due will be collected according to the contractual terms of the loan agreement. Impairment is measured based on the fair value of the underlying collateral. The collateral value is determined based on appraisals and other market valuations for similar assets. Under FASB ASC Topic 820, "*Fair Value Measurements and Disclosures*," the fair value of impaired loans is reported before selling costs of the related collateral, while FASB ASC Topic 310, "*Receivables*," requires that impaired loans be reported on the balance sheet net of estimated selling costs. Therefore, significant estimated selling costs would result in the reported fair value of impaired loans being greater than the measurement value of impaired loans as maintained on the balance sheet. In most instances, selling costs were estimated for real estate-secured collateral and included broker commissions, legal and title transfer fees and closing costs. Impaired loans are classified as nonrecurring Level 2 assets.

Other Investments: For other investments, the carrying amount is a reasonable estimate of fair value.

Other Real Estate Owned: Real estate that DBI has taken control of in partial or full satisfaction of debt is currently valued at fair value. The fair value is determined by analyzing the collateral value of the real estate using appraisals and other market valuations for similar assets less any estimated selling costs. The value carried on the balance sheet for other real estate owned is the estimated fair value of the properties. Other real estate owned is classified as nonrecurring Level 2 assets.

Bank Owned Life Insurance: The carrying amount of bank owned life insurance approximates fair value.

Deposit Liabilities: The fair value of demand deposits, savings accounts and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities.

Borrowings: Rates currently available to DSB for debt with similar terms and remaining maturities are used to estimate fair value of existing debt.

Notes to the Consolidated Financial Statements
(Unaudited)

Commitments to Extend Credit, Standby Letters of Credit and Financial Guarantees Written: The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of guarantees and letters of credit is not material.

Assets Recorded at Fair Value on a Recurring Basis

Assets measured at fair value on a recurring basis, are summarized in the table below:

	June 30, 2010			
	Fair Value Measurements Using			
<u>Description</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Fair Value</u>
U.S. Government-sponsored agencies	\$ -	\$ -	\$ -	\$ -

This report may contain certain forward-looking statements, including without limitation, statements regarding results of operations, the appropriateness of the allowance for loan losses, the amounts of charge-offs and recoveries, capital to assets ratios, capacity for paying dividends and liquidity. These statements speak of DBI's plans, goals, beliefs or expectations, refer to estimates or use similar terms. Forward looking statements can generally be identified because they contain words and phrases such as "may," "project," "are confident," "should," "predict," "believe," "plan," "expect," "estimate," "anticipate," and similar expressions. These forward looking statements are inherently uncertain and actual results may differ from DBI's expectations. The factors that, among others, could impact current and future performance include but are not limited to: (i) adverse changes in asset quality and resulting credit risk-related losses and expenses; (ii) adverse changes in the local economy; (iii) fluctuations in market rates and prices which can negatively affect net interest margin, asset valuations and expense expectations; (iv) changes in regulatory requirements of federal and state agencies applicable to banks and bank holding companies, and (v) the factors set forth in Item 1A of DBI's Annual Report on Form 10-K for the year ended December 31, 2009 (the "2009 Annual Report") which item is incorporated herein by reference, as well as other risks identified in this Report. When reviewing forward looking statements to make decisions with respect to DBI, investors and others are cautioned to consider these and other risks and uncertainties. All forward-looking statements contained in this report are based upon information presently available and DBI assumes no obligation to update any forward-looking statements.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") into law. This legislation makes extensive changes to the laws regulating financial services firms and requires significant rule-making. In addition, the legislation mandates multiple studies, which could result in additional legislative or regulatory action. While the full effects of the legislation on DBI and DSB cannot yet be determined, this legislation is generally perceived as negatively impacting the banking industry. This legislation may result in higher compliance and other costs, reduced revenues and higher capital and liquidity requirements, among other things, which could adversely affect our business.

Critical Accounting Policies

The accounting and reporting policies of DBI are in accordance with accounting principles generally accepted in the United States of America and conform to general practices in the banking industry. The preparation of financial statements in conformity with these principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions are based on information available at the date of the financial statements. Certain policies inherently have a greater reliance on the use of estimates, assumptions, and judgments and as such have a greater possibility of producing results that could be materially different than originally reported.

Management believes that DBI's critical accounting policies are those relating to the allowance for loan and lease losses.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses ("ALLL") is an estimate of the losses that may be sustained in the loan and lease portfolio. The allowance is based on two basic principles of accounting: (1) Statement of Financial Accounting Standards ("SFAS") No. 5, *"Accounting for Contingencies,"* which has been incorporated into FASB ASC Topic 450, *"Contingencies,"* and requires that losses be accrued when they are probable of occurring and estimable, and (2) SFAS No. 114, *"Accounting by Creditors for Impairment of a Loan,"* which has been incorporated into FASB ASC Topic 310, *"Receivables,"* which requires that the loan be categorized as impaired when it is probable that DBI will not collect all principal and interest payments according to the loan's or lease's contractual terms. Guidelines for determining allowances for loan losses are also provided in the ASC 310-10-S99, *"Accounting for Loan Losses by Registrants Engaged In Lending Activities,"* and the Federal Financial Institutions Examination Council's interagency guidance, *"Interagency Policy Statement on the Allowance for Loan and Lease Losses"* (the "FFIEC Policy Statement").

DSB's and DACC's boards of directors have approved policies to provide management with a systematic methodology to determine an appropriate allowance for loan and lease losses. This methodology includes a systematic loan grading system that requires quarterly reviews, identification of loans to be evaluated on an individual basis for impairment, results of independent reviews of asset quality and the adequacy of the allowance by regulatory agencies as an integral part of their examination process, consideration of current trends and volume of total nonperforming, past due, nonaccrual and potential problem loans, and consideration of national and local economic trends and industry conditions.

In applying the methodology, nonaccrual loans, restructured loans and potential problem loans, above a certain size, are reviewed to determine if they are impaired. Impaired loans are individually analyzed and an allowance amount is calculated for each one of these loans, based on the estimated fair value of collateral, in conjunction with FAS 114. Loans that are not impaired are segmented into groups by type of loan. The following loan types are utilized so that each segment of loans will have similar risk factors; 1) residential real estate, 2) agricultural real estate, 3) commercial real estate, 4) agricultural, 5) commercial, 6) consumer installment, and 7) other. In addition, based on internal reviews and external reviews performed by regulatory authorities, DSB and DACC further segregate loans that are not impaired by loan risk classification within each type of loan based on an assessment of risk for a particular loan.

Management's Discussion and Analysis

The applicable risk classifications are "special mention" and "substandard". A "substandard" loan is a loan that is inadequately protected by the current net worth and paying capacity of the borrower or of any collateral. Loans classified "substandard" have well-defined weaknesses that jeopardize liquidation and are characterized by the distinct possibility that some loss will be sustained if the deficiencies are not corrected.

Loans classified "special mention" are one step above substandard; these loans contain some weakness which if not corrected or improved upon could lead to further deterioration and a lower rating. Risk factor percentages are applied to the identified segments of each of the nonclassified and classified portions of the portfolios to calculate an allowance in conjunction with ASC Topic 450. These risk factor percentages are based on historical loan loss experience adjusted for current economic conditions and trends and internal loan quality trends.

The foregoing calculations in accordance with ASC Topics 310 and 450 are used to confirm the adequacy and appropriateness of the ALLL as developed through provisions for credit losses charged to expense, recognizing that the ALLL represents an aggregation of judgments and estimates by management. Such calculations also influence the amount of future provisions for credit losses charged to expense, pending reapplication of the described systematic methodology.

Management evaluates the appropriateness of the ALLL on a quarterly basis and submits to the board of directors of DSB each quarter a recommendation of the amount of a monthly provision for loan losses. If the amount of future charge-offs differ significantly from those assumptions used by management in making its determination, the ALLL and the provision for loan losses on the income statement could be materially affected. Management believes that the ALLL is appropriate as of June 30, 2010.

Glossary of Loan Terms

Impaired Loan - A loan is impaired when, based on current information and events, it is probable that not all amounts due will be collected according to the contractual terms of the loan agreement. Impaired loans are measured at the estimated fair value of the collateral. If the estimated fair value of the impaired loan is less than the recorded investment in the loan, an impairment is recognized by creating a valuation allowance.

Nonaccrual Loan - DSB's policy is to place in nonaccrual status all loans which are contractually past due 90 days or more as to any payment of principal or interest and all other loans as to which reasonable doubt exists as to the full, timely collection of interest or principal based on management's view of the financial condition of the borrower. When a loan is placed on nonaccrual, all interest previously accrued but not collected is reversed against current period interest income. Income on such loans is then recognized only to the extent that cash is received and where the future collection of principal is probable. Interest accruals are resumed on such loans only when they are brought fully current with respect to interest and principal and when, in the judgment of management, the loans are estimated to be fully collectible as to both principal and interest.

Non-Performing Assets - Non-performing assets include nonaccrual loans as defined above and real and personal properties acquired in satisfaction of debts previously owed.

Past Due Accruing Loans - A loan on which all or part of a scheduled payment is delinquent by more than 30 days but less than 90 days past due, except loans that are considered nonaccrual.

Potential Problem Loans - Potential problem loans are accruing loans in which there exists doubt as to the ability of the borrower to comply with present loan repayment terms. Management's decision to place loans in this category does not necessarily mean that DBI expects losses to occur on these loans, but that management recognizes that a higher degree of risk is associated with these accruing loans and they deserve closer scrutiny.

Restructured Loans - Restructured loans involve the granting of some concession to the borrower involving the modification of terms of the loan, such as changes in the payment schedule, the amortization term, the interest rate, or a combination of these.

Management's Discussion and Analysis

Risk Rating – Risk rating, which is also sometimes referred to as loan grade, is the credit quality grade assigned to each loan. Loans are assigned a risk rating upon origination. Lenders and credit review analysts conduct periodic reviews and evaluations and make adjustments to the assigned grades when appropriate. The range of categories from the best quality to worst is as follows: highest quality, solid quality, some weakness, inherent industry weakness, special mention, substandard, doubtful and loss. Impaired loans are generally rated a substandard or lower risk grade.

Special Mention Loans - Loans classified "special mention" are one step above substandard loans as described below. These loans contain some weakness, which if not corrected or improved upon could lead to further deterioration and a lower rating.

Substandard - A "substandard" loan is a loan that is inadequately protected by the current net worth and paying capacity of the borrower or the value of any collateral. Loans classified "substandard" have well-defined weaknesses that jeopardize prospects for liquidation and are characterized by the distinct possibility that some loss will be sustained if the deficiencies are not corrected.

Results of Operations

Net income for the quarter ended June 30, 2010, was \$0.8 million, an increase of \$662,566 or 372.9%, compared to \$0.2 million for the corresponding period in 2009. This improvement was primarily the result of a \$1.2 million decrease in the provision for loan losses. This was partially offset by an increase in income tax expense of \$0.4 million, a decline in noninterest income of \$0.1 million and a decrease in net interest income of \$0.1 million.

Net interest income for the quarter ended June 30, 2010 was \$3,655,863 a decrease of 1.4%, compared to \$3,707,209 recorded for the corresponding period of the prior year. The following table sets forth a summary of the changes in interest earned and interest paid resulting from changes in volume and changes in rates:

	Increase (Decrease) Due to Change In		
	Average Balance	Average Rate	Total Change
Interest income	(\$56,412)	(\$386,652)	(\$443,064)
Interest expense	(53,074)	(338,644)	(391,718)
Net interest income	(\$3,338)	(\$48,008)	(\$51,346)

Net interest income decreased slightly despite an improvement in the net interest spread of 4 basis points. The average net interest rate spread was 3.58% during the quarter ended June 30, 2009 compared to 3.62% during the current period. DBI's average cost of funds declined 54 basis points from 2.12% for the quarter ended June 30, 2009 to 1.58% during the most recent quarter. This reduction in the cost of funds was nearly offset by a decline in the yield on earning assets of 50 basis points during the same period. The yield on earning assets was 5.20% during the second quarter of 2010 compared to 5.70% during the quarter ended June 30, 2009. The average cost of funds was impacted by a significant shift of average deposit balances from certificates of deposits into money market accounts. During the current quarter the average cost of funds on certificates of deposits was 2.19% as compared to the average rate of 0.91% for money market accounts.

For the second quarter of 2010, DBI's provision for credit losses was \$0.3 million as compared to \$1.5 million during the same period of 2009. Net charge-offs of \$0.4 million were recognized in the current period compared to net charge-offs of \$1.2 million during the corresponding period in 2009.

Noninterest income for the three months ended June 30, 2010 and 2009 was \$0.5 million. Non interest expense increased from \$2.6 million for the three months ended June 30, 2009 to \$2.7 million for the comparable quarter in 2010. The increase is primarily due to higher salaries and employee benefits which were up \$0.1 million when compared to the same period in 2009.

Noninterest expense for the three months ended June 30, 2010 increased \$38,886 or 1.5% compared to the corresponding period in 2009. The increase is primarily due to higher salaries and employee benefits which were up \$98,969 when compared to the same period in 2009. The increase was partially offset by declines in other real estate-related expenses of \$34,671 and professional fees of \$28,121.

Management's Discussion and Analysis

Salaries and employee benefits increased 6.6% during the second quarter of 2010 over the same period in 2009, primarily due to expenses related to deferred compensation agreements in place during 2010 that were not in place in 2009.

For the three months ended June 30, 2010 and 2009, DBI recorded combined federal and state income tax expense of \$0.3 million and benefit of \$0.1 million, respectively. These provisions and benefits reflect effective income tax rates of 25% in 2010 and (199%) in 2009. DBI's combined statutory tax rate is 39%. The lower effective income tax rates are primarily due to certain federally tax exempt interest earned on state and local government investment securities.

Financial Condition

Total assets increased by \$3.3 million between December 31, 2009 and June 30, 2010. Cash, cash equivalents and fed funds sold increased by \$2.6 million since December 31, 2009. Investment securities decreased \$4.5 million during the first six months of 2010 due to calls of \$8.3 million, sales of \$5.0 million, and regular pay-downs. These reductions were partially offset by purchases of new securities during the first half of 2010 of \$11.6 million, along with the improvement in the fair value of certain available-for-sale securities.

Loans were \$4.3 million higher as of June 30, 2010 compared to year-end 2009 balances. The following table sets forth major types of loans (excluding loans held for sale) by primary collateral and the percentage of total loans for each type:

<i>(In thousands)</i>	June 30, 2010		December 31, 2009	
	Amount	%	Amount	%
Real Estate:				
Residential	\$83,081	27.6%	\$86,975	29.3%
Commercial	64,957	21.6%	58,242	19.7%
Agricultural	61,552	20.5%	54,661	18.4%
Construction	13,997	4.7%	15,737	5.3%
	\$223,587	74.4%	\$215,615	72.7%
Commercial	30,423	10.1%	27,310	9.2%
Agricultural	35,802	11.9%	42,164	14.2%
Consumer and other	11,167	3.7%	11,544	3.9%
TOTAL	\$300,979	100.0%	\$296,633	100.0%

During the first six months of 2010, agricultural real estate loans increased by \$6.9 million or 12.6% while commercial real estate loans increased by \$6.7 million, or 11.5%. These increases were partially offset by a decline in agricultural loans not secured by real estate during the same period of \$6.4 million or 15.1%, along with decreases of \$3.9 million in residential real estate loans and \$1.7 million in construction and development loans.

The allowance for credit losses increased approximately \$300,000 during the six months ended June 30, 2010. Provisions of \$730,000 were added to the allowance during the first half of 2010 and were partially offset by net charge offs of \$431,475. The allowance equals 2.17% of total loans at June 30, 2010 compared to 2.10% at December 31, 2009. Nonaccrual loans totaled \$8.5 million at June 30, 2010, a decrease of approximately \$4.3 million compared to December 31, 2009. DBI's ratio of loans more than 30 days past due (including nonaccrual loans) to total loans was 3.25% at June 30, 2010, compared to 5.47% at year-end 2009. As of June 30, 2010, management has identified \$42.2 million of potential problem loans compared to \$43.0 million at year-end 2009. Loan quality continues to be a concern and improving the portfolio is the primary focus for management. DBI has no accruing loans that are past due 90 days or more.

Management's Discussion and Analysis

The following table sets forth certain data concerning nonaccrual loans, past due accruing loans, restructured loans and other real estate (property acquired through foreclosure or in satisfaction of loans):

	June 30, 2010		December 31, 2009	
		% of Total		% of Total
<i>(In thousands)</i>	Amount	Loans	Amount	Loans
Nonaccrual Loans (1)	\$8,490	2.8%	\$12,753	4.3%
Restructured Accruing Loans	4,609	1.5%	1,185	0.4%
Accruing Loans Past Due				
90 Days or More	0	0.0%	0	0.0%
Total	\$13,099	4.4%	\$13,938	4.7%
Other Real Estate	\$1,592		\$1,700	

- (1) Includes restructured loans of \$1.0 million and \$1.2 million as of June 30, 2010 and December 31, 2009, respectively.

Noninterest-bearing deposits decreased by \$2.6 million, or 7.0%, during the first six months of 2010. Management attributes this decline to a seasonal fluctuation. Interest-bearing deposits increased by \$6.5 million between December 31, 2009 and June 30, 2010. Money market accounts increased \$16.4 million or 16.5%, during this period while certificates of deposits declined \$8.9 million or 6.7% during the same period. Given the current interest rate environment, there has been a shift away from certificates of deposits into money market accounts as customers seem to be reluctant to lock into a rate at this time. DBI's money market rates are currently higher than the rates for short-term certificate of deposits. Interest-bearing deposits consisted of the following:

<i>(In thousands)</i>		6/30/2010	12/31/2009
NOW accounts		\$18,761	\$20,494
Savings accounts		17,815	17,137
Money market accounts		115,813	99,422
Certificates of deposit		123,503	132,374
TOTAL		\$275,892	\$269,427

Short-term borrowings remained stable as of June 30, 2010 compared to the prior year-end while long-term borrowings declined \$2.4 million or 7.8% during the same period.

Stockholders' equity increased by \$1.4 million to \$52.5 million as of June 30, 2010 due in part to a reduction in accumulated other comprehensive loss on securities of \$0.6 million. As of June 30, 2010 DBI's leverage ratio was 13.0%, its risk-based core capital ratio was 16.8% and its risk-based total capital ratio was 18.1%. DBI and DSB continue to maintain capital levels well above the regulatory minimum levels. Management has agreed with regulators to maintain DSB's leverage ratio at a level equal to or exceeding 8% and its risk-based total capital ratio equal to or exceeding 10%. As of June 30, 2010, DSB's leverage ratio was 10.4% and its risk-based total capital ratio was 14.9%.

Liquidity

Liquidity refers to the ability of DBI to generate adequate amounts of cash to meet its needs. DBI maintains liquid assets and established lines of credit to meet its liquidity needs. DBI's Board of Directors annually approves a Consolidated Contingent Liquidity Plan, which reviews the sources and uses of liquidity for DBI, DSB and DACC. Cash and cash equivalents increased \$2.6 million or 12.6% to \$23.6 million during the first six months of 2010. The major sources and uses of cash are detailed in the accompanying Consolidated Statements of Cash Flows.

Management's Discussion and Analysis

In addition to on-balance sheet sources of funds, DBI also has off-balance sheet sources available to meet liquidity needs. Specifically, DBI has unused lines of credit of \$52.5 million as of June 30, 2010. This includes a \$20 million line of credit with the Federal Reserve Bank that was established in 1999. DSB has not borrowed on this line. DBI also has \$64.2 million of eligible loans and securities that could be pledged to increase its available credit. Management believes DBI's liquidity position as of June 30, 2010 is adequate under current economic conditions.

Off-Balance Sheet Arrangements

DBI and its subsidiaries are parties to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of their customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the statement of financial condition. The contract or notional amounts of those instruments reflect the extent of involvement DBI and its subsidiaries have in particular classes of financial instruments.

The exposure of DBI and its subsidiaries to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual or notional amount of these instruments. DBI and its subsidiaries use the same credit policies in making commitments and conditional obligations as for on-balance sheet instruments. DBI and its subsidiaries require collateral or other security to support financial instruments with credit risk. The following table sets forth DBI's commitments to extend credit and standby letters of credit:

					Contract or Notional Amount	Secured Portion
<i>(In thousands)</i>					June 30, 2010	
<i>Financial instruments whose contract amounts represent credit risk:</i>						
Commitments to extend credit					\$37,823	\$32,424
Standby letters of credit and financial guarantees written					1,394	1,394

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. DBI and its subsidiaries evaluate each customer's creditworthiness on a case-by-case basis. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment and income-producing commercial properties.

Standby letters of credit are conditional commitments issued by DSB to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support commercial business transactions. When a customer fails to perform according to the terms of the agreement, DSB honors drafts drawn by the third party in amounts up to the contract amount. A majority of the letters of credit expire within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment and income-producing commercial properties and residential properties. All letters of credit are fully collateralized.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

DBI's primary market risk position has not materially changed from that disclosed in DBI's 2009 Form 10-K Annual Report.

Management's Discussion and Analysis

Item 4T. Controls and Procedures

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as amended, DBI's management, under the supervision and with the participation of DBI's principal executive officer and principal financial officer, has evaluated DBI's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, management believes that DBI's disclosure controls and procedures are effective as of the end of the period covered by this report.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

There were no significant changes in DBI's internal controls over financial reporting or in other factors that have significantly affected these controls during the fiscal quarter covered by this report, including any corrective actions with regard to significant deficiencies and material weaknesses.

Part II. Other Information

Item 1A. Risk Factors

A discussion of the risks that may affect DBI's business can be found at Item 1A – Risk Factors of DBI's Annual Report on Form 10-K for the year ended December 31, 2009. Other than as set forth below, there have been no material changes in risk factors as described in such Report.

Financial reforms and related regulations may affect DBI's and DSB's business activities, financial position and profitability.

The Dodd-Frank Act, signed into law on July 21, 2010, makes extensive changes to the laws regulating financial services firms and requires significant rulemaking. In addition, the legislation mandates multiple studies, which could result in additional legislative or regulatory action. DBI is currently reviewing the impact the legislation will have on its and DSB's business.

The legislation charges the federal banking agencies, including the Federal Reserve and the FDIC with drafting and implementing enhanced supervision, examination and capital standards for depository institutions and their holding companies. The Dodd-Frank Act also authorizes various new assessments and fees, expands supervision and oversight authority over nonbank subsidiaries, increases the standards for certain covered transactions with affiliates and requires the establishment of minimum leverage and risk-based capital requirements for insured depository institutions. In addition, the Dodd-Frank Act contains several provisions that change the manner in which deposit insurance premiums are assessed and which could increase the FDIC deposit insurance premiums paid by DSB.

The Dodd-Frank Act establishes a new, independent Consumer Financial Protection Bureau which will have broad rulemaking, supervisory and enforcement authority over consumer financial products and services, including deposit products, residential mortgages, home-equity loans and credit cards. States will be permitted to adopt stricter consumer protection laws and state attorney generals can enforce consumer protection rules issued by the Bureau.

The changes resulting from the Dodd-Frank Act, as well as the regulations promulgated by federal agencies, may impact the profitability of DBI's and DSB's business activities, require changes to certain of their business practices or otherwise adversely affect their businesses. These changes may also require DBI and DSB to invest significant management attention and resources to evaluate and make necessary changes.

Management's Discussion and Analysis

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the quarter ended June 30, 2010, DBI did not sell any equity securities which were not registered under the Securities Act of 1933, as amended, or repurchase any of its equity securities.

The Federal Reserve Board ("the Board") has adopted regulations that deal with the measure of capitalization for bank holding companies. The Board has also issued a policy statement on the payment of cash dividends by bank holding companies, wherein the Board has stated that a bank holding company experiencing earnings weaknesses should not pay cash dividends exceeding its net income or which could only be funded in ways that weaken the bank holding company's financial health, such as by borrowing.

The ability of DBI to pay dividends on the Common Stock is largely dependent upon the ability of DSB to pay dividends on its stock held by DBI. DSB's ability to pay dividends is restricted by both state and federal laws and regulations. DSB is subject to policies and regulations issued by the FDIC and the Division of Banking of the Wisconsin Department of Financial Institutions ("the Division"), which, in part, establish minimum acceptable capital requirements for banks, thereby limiting the ability of such banks to pay dividends. In addition, Wisconsin law provides that state chartered banks may declare and pay dividends out of undivided profits but only after provision has been made for all expenses, losses, required reserves, taxes and interest accrued or due from the bank. Payment of dividends in some circumstances may require the written consent of the Division.

Item 6. Exhibits

(a) Exhibits:

31.1 Certification by the Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification by the Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification of Periodic Financial Report by the Chief Executive Officer and Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
