GOAL/APPROACH

The fund seeks as high a level of current income exempt from federal and New Jersey state income taxes as is consistent with the preservation of capital. To pursue this goal, the fund normally invests substantially all of its assets in municipal bonds that provide income exempt from federal and New Jersey state personal income taxes. The fund generally maintains a dollar-weighted average portfolio maturity between three and ten years. Although the fund currently intends to invest only in municipal bonds rated investment grade, or the unrated equivalent as determined by Dreyfus, it has the ability to invest up to 20% of its net assets in municipal bonds of below investment grade credit quality.

The portfolio manager may buy and sell bonds based on credit quality, market outlook and yield potential. In selecting municipal bonds for investment, the portfolio manager may assess the current interest rate environment and the municipal bond's potential volatility in different rate environments. The portfolio manager focuses on bonds with the potential to offer attractive current income, typically looking for bonds that can provide consistently attractive current yields or that are trading at competitive market prices. A portion of the fund's assets may be allocated to "discount" bonds, which are bonds that sell at a price below their face value, or to "premium" bonds, which are bonds that sell at a price above their face value. The fund's allocation to either discount bonds or to premium bonds will change along with the portfolio manager's changing views of the current interest rate and market environment. The portfolio manager also may look to select bonds that are most likely to obtain attractive prices when sold.

Although the fund seeks to provide income exempt from federal and New Jersey state income taxes, interest from some of its holdings may be subject to the federal alternative minimum tax. In addition, the fund temporarily may invest in taxable bonds and municipal bonds that pay income exempt only from federal personal income tax.

The fund may, but is not required to, use derivatives, such as futures, options and swap agreements, as a substitute for taking a position in an underlying asset, to increase returns, to manage interest rate risk, or as part of a hedging strategy. The fund may buy securities that pay interest at rates that float inversely with changes in prevailing interest rates and may make forward commitments in which the fund agrees to buy a security in the future at a price agreed upon today.

Concepts to understand

Municipal bonds: debt securities that provide income free from federal income tax, and state income tax if you live in the issuing state. Municipal bonds are typically of two types:

- **general obligation bonds**, which are secured by the full faith and credit of the issuer and its taxing power
- **revenue bonds**, which are payable from the revenue derived from a specific revenue source, such as charges for water and sewer service or highway tolls

Dollar-weighted average maturity: an average of the stated maturities of the securities held by the fund, based on their dollar-weighted proportions in the fund.

Investment grade bonds: independent rating organizations analyze and evaluate a bond issuer's, and/or any credit enhancer's, credit profile and ability to repay debts. Based on their assessment, these rating organizations assign letter grades that reflect the issuer's, and/or any credit enhancer's, creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, which means you could lose money.

- *Interest rate risk.* Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the fund's portfolio, the more the fund's share price is likely to react to interest rates.
- *Call risk.* Some bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the fund might have to reinvest the proceeds in an investment offering a lower yield.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a bond, can cause a bond's price to fall, potentially lowering the fund's share price.
- *Liquidity risk.* The secondary market for certain municipal bonds tends to be less well developed or liquid than many other securities markets, which may adversely affect the fund's ability to sell such municipal bonds at attractive prices. When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically.
- *State-specific risk.* The fund is subject to the risk that New Jersey's economy, and the revenues underlying its municipal bonds, may decline. Investing primarily in a single state makes the fund more sensitive to risks specific to the state and may magnify other risks.
- *Market sector risk.* The fund's overall risk level will depend on the market sectors in which the fund is invested and the current interest rate, liquidity and credit quality of such sectors. The fund may significantly overweight or underweight certain industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those industries or sectors.
- *Tax risk.* To be tax-exempt, municipal bonds generally must meet certain regulatory requirements. Although the fund will invest in municipal bonds that pay interest that is exempt, in the opinion of counsel to the issuer (or on the basis of other

authority believed by Dreyfus to be reliable), from federal income tax, if any such municipal bond fails to meet these regulatory requirements, the interest received by the fund from its investment in such bonds and distributed to fund shareholders will be taxable.

- *Derivatives risk.* The fund may use derivative instruments, such as options, futures, and options on futures (including those related to securities, indexes and interest rates), swaps and inverse floaters. Certain derivatives may cause taxable income. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Non-diversification risk.* The fund is non-diversified, which means that a relatively high percentage of the fund's assets may be invested in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's performance from year to year. The table compares the fund's average annual total returns to those of the Lehman Brothers 7-Year Municipal Bond Index, an unmanaged benchmark of total return performance for non-New Jersey-specific municipal bonds. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

Best Quarter: Q3 '02 **+4.18%**
Worst Quarter: Q2 '04 **-2.45%**

The fund's year-to-date total return as of 6/30/06 was -0.27%.

Average annual total returns as of 12/31/05

	1 Year	5 Years	10 Years
Fund			
<i>returns before taxes</i>	1.93%	4.36%	3.38%
Fund			
<i>returns after taxes on distributions</i>	1.91%	4.34%	4.37%
Fund			
<i>returns after taxes on distributions and sale of fund shares</i>	2.58%	4.30%	4.35%
Lehman Brothers 7-Year Municipal Bond Index*			
<i>reflects no deduction for fees, expenses or taxes</i>	1.72%	5.13%	5.26%

* Unlike the fund, the Lehman Brothers 7-year index is not geographically limited (it is not composed of bonds of a single state).

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Shareholder transaction fees are paid from your account. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees.

Fee table

Shareholder transaction fees

% of transaction amount

Maximum redemption fee **1.00%**

charged only when selling shares you have owned for less than 30 days

Annual fund operating expenses

% of average daily net assets

Management fees 0.60%

Shareholder services fee 0.06%

Other expenses 0.14%

Total 0.80%

Expense example

1 Year	3 Years	5 Years	10 Years
\$82	\$255	\$444	\$990

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. For the fiscal year ended March 31, 2006, Dreyfus waived a portion of its fee so that the effective management fee paid by the fund was 0.59%, reducing total expenses from 0.80% to 0.79%. This waiver was voluntary.

Shareholder services fee: a fee of up to 0.25% used to reimburse the fund's distributor for shareholder account service and maintenance.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

MANAGEMENT

Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$170 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.59% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's semiannual report for the six months ended September 30, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.1 trillion in assets under management, administration or custody, including \$870 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Scott Sprauer has been the fund's primary portfolio manager since November 2001. Mr. Sprauer joined Dreyfus in October 1998. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, record-keeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

FINANCIAL HIGHLIGHTS

This table describes the fund's performance for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distribu-

tions. These figures have been audited by Ernst & Young LLP, independent registered public accounting firm, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

¹ Based on average shares outstanding at each month end.

Your Investment

ACCOUNT POLICIES

Buying shares

You pay **no sales charges** to invest in this fund. Your price for fund shares is the fund's net asset value per share (NAV), which is generally calculated as of the close of trading on the New York Stock Exchange (usually 4:00 p.m. Eastern time) on days the exchange is open for regular business.

Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Because the fund seeks tax-exempt income, it is not recommended for purchase in IRAs or other qualified retirement plans.

When calculating its NAV, the fund's investments generally are valued by an independent pricing service approved by the fund's board. The pricing service's procedures are reviewed under the general supervision of the board. If valuations for investments (received from the pricing service or otherwise) are not readily available, or are determined not to reflect accurately fair value, the fund may value those investments at fair value as determined in accordance with the procedures approved by the fund's board. Fair value of investments may be done by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Using fair value to price investments may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values.

Investments in certain municipal bonds and thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

Minimum investments

	Initial	Additional
Regular accounts	\$2,500	\$100
Dreyfus automatic investment plans	\$100	\$100

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

Net asset value (NAV): a mutual fund's share price on a given day. A fund's NAV is calculated by dividing the value of its net assets by the number of its existing shares outstanding.

Third-party investments

If you invest through a third party (rather than directly with Dreyfus), the policies and fees may be different than those described herein. Banks, brokers, financial advisers and financial supermarkets may charge transaction fees and may set different minimum investments or limitations on buying or selling shares. Consult a representative of your financial institution for further information.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly, and you will generally receive the proceeds within a week.

Before selling or writing a check against shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not honor redemption checks, or process wire, telephone, online or Dreyfus TeleTransfer redemption requests, for up to eight business days following the purchase of those shares

If you are selling or exchanging shares you have owned for less than 30 days, the fund may deduct a 1% redemption fee (not charged on shares sold through the Checkwriting Privilege, Automatic Withdrawal Plan or Dreyfus Auto-Exchange Privilege, or on shares acquired through dividend reinvestment).

Limitations on selling shares by phone or online through www.dreyfus.com

Proceeds sent by	Minimum phone/online	Maximum phone/online
Check*	no minimum	\$250,000 per day
Wire	\$1,000	\$500,000 for joint accounts every 30 days/ \$20,000 per day
Dreyfus TeleTransfer	\$500	\$500,000 for joint accounts every 30 days/ \$20,000 per day

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in thinly traded municipal bonds, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policies

To offset the relatively higher costs of servicing smaller accounts, the fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; Education Savings Accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends once a month and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

The fund anticipates that virtually all dividends paid to you will be exempt from federal and New Jersey personal income taxes. However, for federal tax purposes, certain distributions, such as distributions of short-term capital gains, are taxable to you as ordinary income, while long-term capital gains are taxable to you as capital gains.

For New Jersey personal income tax purposes, distributions derived from interest on municipal securities of New Jersey issuers and from interest on qualifying securities issued by U.S. territories and possessions are generally exempt from tax. Distributions that are federally taxable as ordinary income or capital gains are generally subject to New Jersey personal income tax.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

SERVICES FOR FUND INVESTORS

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application or by calling 1-800-645-6561.

For investing

Dreyfus Automatic Asset Builder®	For making automatic investments from a designated bank account.
Dreyfus Payroll Savings Plan	For making automatic investments through a payroll deduction.
Dreyfus Government Direct Deposit Privilege	For making automatic investments from your federal employment, Social Security or other regular federal government check.
Dreyfus Dividend Sweep	For automatically reinvesting the dividends and distributions from one Dreyfus fund into another (not available for IRAs).

For exchanging shares

Dreyfus Auto-Exchange Privilege	For making regular exchanges from one Dreyfus fund into another.
--	--

For selling shares

Dreyfus Automatic Withdrawal Plan	For making regular withdrawals from most Dreyfus funds.
--	---

Dreyfus Financial Centers

Through a nationwide network of Dreyfus Financial Centers, Dreyfus offers a full array of investment services and products. This includes information on mutual funds, brokerage services, tax-advantaged products and retirement planning.

Experienced financial consultants can help you make informed choices and provide you with personalized attention in handling account transactions. The Financial Centers also offer informative seminars and events. To find the Financial Center nearest you, call **1-800-499-3327**.

Checkwriting privilege

You may write redemption checks against your account in amounts of \$500 or more. These checks are free; however, a fee may be charged if you request a stop payment or if the transfer agent cannot honor a redemption check due to insufficient funds or another valid reason. Please do not post-date your checks or use them to close your account.

Exchange privilege

You can exchange shares worth \$500 or more from one Dreyfus fund into another. You can request your exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application.

Dreyfus Express® voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, purchase fund shares, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling **1-800-645-6561**. Certain requests may require the services of a representative.

INSTRUCTIONS FOR **REGULAR ACCOUNTS**

TO OPEN AN ACCOUNT

Concepts to understand

Wire transfer: for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

Electronic check: for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

Annual/Semiannual Report

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semi-annual reports are available at www.dreyfus.com.

Statement of Additional Information (SAI)

Provides more details about the fund and its policies. A current SAI is available at www.dreyfus.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at www.dreyfus.com its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

DESCRIPTION OF THE FUND

The Fund is a Massachusetts business trust that commenced operations on June 26, 1992. The Fund is an open-end management investment company, known as a municipal bond fund. As a municipal bond fund, the Fund invests in debt obligations issued by states, territories, and possessions of the United States and the District of Columbia and their political subdivisions, agencies and other instrumentalities, or multistate agencies or authorities, and certain other specified securities, the interest from which is, in the opinion of bond counsel to the issuer, exempt from Federal income tax ("Municipal Bonds").

The Dreyfus Corporation (the "Manager" or "Dreyfus") serves as the Fund's investment adviser.

Dreyfus Service Corporation (the "Distributor") is the distributor of the Fund's shares.

Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund's Prospectus.

New Jersey Municipal Bonds. As a fundamental policy, the Fund normally invests at least 80% of its net assets (plus any borrowings for investment purposes) in Municipal Bonds of the State of New Jersey, its political subdivisions, authorities and corporations, and certain other specified securities, that provide income exempt from Federal and New Jersey income taxes (collectively, "New Jersey Municipal Bonds"). To the extent acceptable New Jersey Municipal Bonds are at any time unavailable for investment by the Fund, the Fund will invest temporarily in other Municipal Bonds the interest from which is, in the opinion of bond counsel to the issuer, exempt from Federal, but not State of New Jersey, personal income tax. Municipal Bonds generally include debt obligations issued to obtain funds for various public purposes as well as certain industrial development bonds issued by or on behalf of public authorities. Municipal Bonds are classified as general obligation bonds, revenue bonds and notes. General obligation bonds are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue bonds are payable from the revenue derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source, but not from the general taxing power. Tax exempt industrial development bonds, in most cases, are revenue bonds that do not carry the pledge of the credit of the issuing municipality, but generally are guaranteed by the corporate entity on whose behalf they are issued. Notes are short-term instruments which are obligations of the issuing municipalities or agencies and are sold in anticipation of a bond sale, collection of taxes or receipt of other revenues. Municipal Bonds include municipal lease/purchase agreements, which are similar to installment purchase contracts for property or equipment issued by municipalities. Municipal Bonds bear fixed, floating or variable rates of interest, which are determined in some instances by formulas under which the security's interest rate will change directly or inversely to changes in interest rates or an index, or multiples thereof, in many cases subject to a maximum and minimum. Certain Municipal Bonds are subject to redemption at a date earlier than their stated maturity pursuant to call options, which may be separated from the related security and purchased and sold separately.

The yields on Municipal Bonds are dependent on a variety of factors, including general economic and monetary conditions, money market factors, conditions in the Municipal Bond market, size of a particular offering, maturity of the obligation and rating of the issue.

Municipal Bonds include certain private activity bonds (a type of revenue bond), the income from which is subject to the alternative minimum tax (AMT). The Fund may invest without limitation in such Municipal Bonds if the Manager determines that their purchase is consistent with the Fund's investment objective.

Certain Tax Exempt Obligations. The Fund may purchase floating and variable rate demand notes and bonds, which are tax exempt obligations ordinarily having stated maturities in excess of one year, but which permit the holder to demand payment of principal at any time or at specified intervals. Variable rate demand notes include master demand notes which are obligations that permit the Fund to invest fluctuating amounts, at varying rates of interest, pursuant to direct arrangements between the Fund, as lender, and the borrower. These obligations permit daily changes in the amount borrowed. Because these obligations are direct lending arrangements between the lender and borrower, it is not contemplated that such instruments generally will be traded, and there generally is no established secondary market for these obligations, although they are redeemable at face value, plus accrued interest. Accordingly, where these obligations are not secured by letters of credit or other credit support arrangements, the Fund's right to redeem is dependent on the ability of the borrower to pay principal and interest on demand. Each obligation purchased by the Fund will meet the quality criteria established for the purchase of Municipal Bonds.

Tax Exempt Participation Interests. The Fund may purchase from financial institutions participation interests in Municipal Bonds (such as industrial development bonds and municipal lease/purchase agreements). A participation interest gives the Fund an undivided interest in the Municipal Bond in the proportion that the Fund's participation interest bears to the total principal amount of the Municipal Bond. These instruments may have fixed, floating or variable rates of interest. If the participation interest is unrated, it will be backed by an irrevocable letter of credit or guarantee of a bank that the Fund's Board has determined meets prescribed quality standards for banks, or the payment obligation otherwise will be collateralized by U.S. Government securities. For certain participation interests, the Fund will have the right to demand payment, on not more than seven days' notice, for all or any part of the Fund's participation interest in the Municipal Bond, plus accrued interest. As to these instruments, the Fund intends to exercise its right to demand payment only upon a default under the terms of the Municipal Bond, as needed to provide liquidity to meet redemptions, or to maintain or improve the quality of its investment portfolio.

Municipal lease obligations or installment purchase contract obligations (collectively, "lease obligations") have special risks not ordinarily associated with Municipal Bonds. Although lease obligations do not constitute general obligations of the municipality for which the municipality's taxing power is pledged, a lease obligation ordinarily is backed by the municipality's covenant to budget for, appropriate and make the payments due under the lease obligation. However, certain lease obligations in which the Fund may invest contain "non-appropriation" clauses which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. Although "non-appropriation" lease obligations are secured by the leased

property, disposition of the property in the event of foreclosure might prove difficult. Certain lease obligations may be considered illiquid. Determination as to the liquidity of such securities is made in accordance with guidelines established by the Fund's Board. Pursuant to such guidelines, the Board has directed the Manager to monitor carefully the Fund's investment in such securities with particular regard to: (1) the frequency of trades and quotes for the lease obligation; (2) the number of dealers willing to purchase or sell the lease obligation and the number of other potential buyers; (3) the willingness of dealers to undertake to make a market in the lease obligation; (4) the nature of the marketplace trades, including the time needed to dispose of the lease obligation, the method of soliciting offers and the mechanics of transfer; and (5) such other factors concerning the trading market for the lease obligation as the Manager may deem relevant. In addition, in evaluating the liquidity and credit quality of a lease obligation that is unrated, the Fund's Board has directed the Manager to consider: (a) whether the lease can be canceled; (b) what assurance there is that the assets represented by the lease can be sold; (c) the strength of the lessee's general credit (e.g., its debt, administrative, economic, and financial characteristics); (d) the likelihood that the municipality will discontinue appropriating funding for the leased property because the property is no longer deemed essential to the operations of the municipality (e.g., the potential for an "event of nonappropriation"); (e) the legal recourse in the event of failure to appropriate; and (f) such other factors concerning credit quality as the Manager may deem relevant.

Tender Option Bonds. The Fund may purchase tender option bonds. A tender option bond is a Municipal Bond (generally held pursuant to a custodial arrangement) having a relatively long maturity and bearing interest at a fixed rate substantially higher than prevailing short-term tax exempt rates, that has been coupled with the agreement of a third party, such as a bank, broker-dealer or other financial institution, pursuant to which such institution grants the security holders the option, at periodic intervals, to tender their securities to the institution and receive the face value thereof. As consideration for providing the option, the financial institution receives periodic fees equal to the difference between the Municipal Bond's fixed coupon rate and the rate, as determined by a remarketing or similar agent at or near the commencement of such period, that would cause the securities, coupled with the tender option, to trade at par on the date of such determination. Thus, after payment of this fee, the security holder effectively holds a demand obligation that bears interest at the prevailing short-term tax exempt rate. The Manager, on behalf of the Fund, will consider on an ongoing basis the creditworthiness of the issuer of the underlying Municipal Bond, of any custodian and of the third party provider of the tender option. In certain instances and for certain tender option bonds, the option may be terminable in the event of a default in payment of principal or interest on the underlying Municipal Bond and for other reasons.

The Fund will purchase tender option bonds only when the Manager is satisfied that the custodial and tender option arrangements, including the fee payment arrangements, will not adversely affect the tax exempt status of the underlying Municipal Bonds and that payment of any tender fees will not have the effect of creating taxable income for the Fund. Based on the tender option bond agreement, the Fund expects to be able to value the tender option bond at par; however, the value of the instrument will be monitored to assure that it is valued at fair value.

Custodial Receipts. The Fund may purchase custodial receipts representing the right to receive certain future principal and interest payments on Municipal Bonds which underlie the custodial receipts. A number of different arrangements are possible. In a typical custodial receipt

arrangement, an issuer or a third party owner of Municipal Bonds deposits such obligations with a custodian in exchange for two classes of custodial receipts. The two classes have different characteristics, but, in each case, payments on the two classes are based on payments received on the underlying Municipal Bonds. One class has the characteristics of a typical auction rate security, where at specified intervals its interest rate is adjusted, and ownership changes, based on an auction mechanism. The interest rate on this class generally is expected to be below the coupon rate of the underlying Municipal Bonds and generally is at a level comparable to that of a Municipal Bond of similar quality and having a maturity equal to the period between interest rate adjustments. The second class bears interest at a rate that exceeds the interest rate typically borne by a security of comparable quality and maturity; this rate also is adjusted, but in this case inversely to changes in the rate of interest of the first class. The aggregate interest paid with respect to the two classes will not exceed the interest paid by the underlying Municipal Bonds. The value of the second class and similar securities should be expected to fluctuate more than the value of a Municipal Bond of comparable quality and maturity, which would increase the volatility of the Fund's net asset value. These custodial receipts are sold in private placements. The Fund also may purchase directly from issuers, and not in a private placement, Municipal Bonds having characteristics similar to custodial receipts. These securities may be issued as part of a multi-class offering and the interest rate on certain classes may be subject to a cap or floor.

Inverse Floaters. The Fund may invest in residual interest Municipal Bonds whose interest rates bear an inverse relationship to the interest rate on another security or the value of an index ("inverse floaters"). An investment in inverse floaters may involve greater risk than an investment in a fixed-rate Municipal Bond. Because changes in the interest rate on the other security or index inversely affect the residual interest paid on the inverse floater, the value of an inverse floater is generally more volatile than that of a fixed-rate Municipal Bond. Inverse floaters have interest rate adjustment formulas which generally reduce or, in the extreme, eliminate the interest paid to the Fund when short-term interest rates rise, and increase the interest paid to the Fund when short-term interest rates fall. Although volatile, inverse floaters typically offer the potential for yields exceeding the yields available on fixed-rate Municipal Bonds with comparable credit quality, coupon, call provisions and maturity. These securities usually permit the investor to convert the floating rate to a fixed rate (normally adjusted downward), and this optional conversion feature may provide a partial hedge against rising rates if exercised at an opportune time.

Zero Coupon, Pay-In-Kind and Set-Up Municipal Bonds. The fund may invest in zero coupon securities which are Municipal Bonds issued or sold at a discount from their face value that do not entitle the holder to any periodic payment of interest prior to maturity or a specified redemption date or cash payment date; pay-in-kind bonds, which are Municipal Bonds that generally pay interest through the issuance of additional bonds; and step-up coupon bonds, which are Municipal Bonds that typically do not pay interest for a specified period of time and then pay interest at a series of different rates. For zero coupon securities, the amount of any discount varies depending on the time remaining until maturity or cash payment date, prevailing interest rates, liquidity of the security and perceived credit quality of the issuer. Zero coupon securities also may take the form of Municipal Bonds that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interest in such stripped debt obligations and coupons. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of Municipal Bonds that pay cash interest periodically having similar maturities and credit

qualities. In addition, unlike Municipal Bonds which pay cash interest throughout the period to maturity, the Fund will realize no cash until the cash payment date unless a portion of such securities is sold and, if the issuer defaults, the Fund may obtain no return at all on its investments.

Ratings of Municipal Bonds. The Fund will invest at least 80% of the value of its net assets in securities which, in the case of Municipal Bonds, are rated no lower than Baa by Moody's Investors Service, Inc. ("Moody's") or BBB by Standard & Poor's Ratings Services ("S&P") or Fitch Ratings ("Fitch" and, together with Moody's and S&P, the "Rating Agencies").

The Fund may invest up to 20% of the value of its net assets in securities which, in the case of Municipal Bonds, are rated lower than Baa by Moody's and BBB by S&P and Fitch and as low as the lowest rating assigned by the Rating Agencies, but it currently is the intention of the Fund that this portion of the Fund's portfolio be invested primarily in Municipal Bonds rated no lower than Baa by Moody's or BBB by S&P or Fitch. Municipal Bonds rated BBB by S&P and Fitch are regarded as having adequate capacity to pay principal and interest, while those rated Baa by Moody's are considered medium grade obligations which lack outstanding investment characteristics and have speculative characteristics. If a security is not rated or is subject to some external agreement (such as a letter of credit) from a bank which was not considered when the security was rated, the Manager may determine that the security is of comparable quality to those rated securities in which the Fund may invest; for purposes of the 80% requirement described in this paragraph, such unrated securities will be considered to have the rating so determined.

The average distribution of Fund investments (at value) in Municipal Bonds (including notes) by ratings for the fiscal year ended March 31, 2006, computed on a monthly basis, was as follows:

<u>Fitch</u>	or	<u>Moody's</u>	or	<u>S&P</u>	<u>Percentage of Value</u>
AAA		Aaa		AAA	74.6%
AA		Aa		AA	6.1%
A		A		A	6.9%
BBB		Baa		BBB	10.2%
BB		Ba		BB	0.3%
F-1		MIG 1/P-1		SP-1/A-1	1.5%
Not Rated		Not Rated		Not Rated	<u>0.4%*</u>
					<u>100.0%</u>

* Those securities which are not rated have been determined by the Manager to be of comparable quality to securities in the following rating category: Baa/BBB (0.4%).

Subsequent to its purchase by the Fund, an issue of rated Municipal Bonds may cease to be rated or its rating may be reduced below the minimum required for purchase by the Fund. Neither event will require the sale of such Municipal Bonds by the Fund, but the Manager will consider such event in determining whether the Fund should continue to hold the Municipal Bonds. To the extent that the ratings given by a Rating Agency for Municipal Bonds may change as a result of changes in such organization or its rating system, the Fund will attempt to use comparable ratings as standards for its investments in accordance with the investment policies described in the Prospectus and this Statement of Additional Information. The ratings of the Rating Agencies represent their opinions as to the quality of the Municipal Bonds which they undertake to rate. It should be emphasized, however, that ratings are relative and subjective and are not absolute standards of quality. Although these ratings may be an initial criterion for selection of portfolio investments, the Manager also will evaluate these securities and the creditworthiness of the issuers of such securities.

Taxable Investments. From time to time, on a temporary basis other than for temporary defensive purposes (but not to exceed 20% of the value of the Fund's net assets) or for temporary defensive purposes, the Fund may invest in taxable short-term investments ("Taxable Investments") consisting of: notes of issuers having, at the time of purchase, a quality rating within the two highest grades of a Rating Agency; obligations of the U.S. Government, its agencies or instrumentalities; commercial paper rated not lower than P-1 by Moody's, A-1 by S&P or F-1 by Fitch; certificates of deposit of U.S. domestic banks, including foreign branches of domestic banks, with assets of \$1 billion or more; time deposits; bankers' acceptances and other short-term bank obligations; and repurchase agreements in respect of any of the foregoing. Dividends paid by the Fund that are attributable to income earned by the Fund from Taxable Investments will be taxable to investors. See "Dividends, Distributions and Taxes." Except for temporary defensive purposes, at no time will more than 20% of the value of the Fund's net assets be invested in Taxable Investments. When the Fund has adopted a temporary defensive position, including when acceptable New Jersey Municipal Bonds are unavailable for investment by the Fund, in excess of 20% of the Fund's net assets may be invested in securities that are not exempt from New Jersey income tax. Under normal market conditions, the Fund anticipates that not more than 5% of the value of its total assets will be invested in any one category of Taxable Investments.

Investment Companies. The Fund may invest in securities issued by other investment companies. Under the Investment Company Act of 1940, as amended (the "1940 Act"), the Fund's investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund's total assets with respect to any one investment company and (iii) 10% of the Fund's total assets in the aggregate. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. The Fund also may invest its uninvested cash reserves, or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund's securities lending program in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above, except that the Fund's aggregate investment of uninvested cash reserves in such money market funds may not exceed 25% of its total assets. See "Lending Portfolio Securities."

Illiquid Securities. The Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund's investment objective. Such securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, and repurchase agreements providing for settlement in more than seven days after notice.

As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

Investment Techniques

The following information supplements and should be read in conjunction with the Fund's Prospectus. The Fund's use of certain of the investment techniques described below may give rise to taxable income.

Borrowing Money. The Fund is permitted to borrow to the extent permitted under the 1940 Act, which permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. The Fund currently intends to borrow money only for temporary or emergency (not leveraging) purposes, in an amount up to 15% of the value of its total assets (including the amount borrowed) valued at the lesser of cost or market, less liabilities (not including the amount borrowed) at the time the borrowing is made. While such borrowings exceed 5% of the Fund's total assets, the Fund will not make any additional investments.

Lending Portfolio Securities. The Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund's investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund's total assets (including the value of assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The Fund may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Short-Selling. In these transactions, the Fund sells a security it does not own in anticipation of a decline in the market value of the security. The Fund may make short-sales to hedge positions, for duration and risk management, to maintain portfolio flexibility or to enhance returns. To complete a short-sale transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is obligated to replace the security borrowed by purchasing it subsequently at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund, which would result in a loss or gain, respectively.

The Fund will not sell securities short if, after effect is given to any such short sale, the total market value of all securities sold short would exceed 25% of the value of the Fund's net assets. The Fund may not make a short sale which results in the Fund having sold short in the aggregate more than 5% of the outstanding securities of any class of an issuer.

The Fund also may make short sales "against the box," in which the Fund enters into a short sale of a security it owns or has the immediate and unconditional right to acquire at no additional cost at the time of sale. At no time will more than 15% of the value of the Fund's net assets be in deposits on short sales against the box.

Until the Fund closes its short position or replaces the borrowed security, it will: (a) segregate permissible liquid assets in an amount that, together with the amount provided as collateral, always equals the current value of the security sold short; or (b) otherwise cover its short position.

Derivatives. The Fund may invest in, or enter into, derivatives for a variety of reasons, including to hedge certain market or interest rate risks, to provide a substitute for purchasing or selling particular securities or to increase potential income gain. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, and related indexes. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to invest than "traditional" securities would. Examples of derivative instruments the Fund may use include options contracts, futures contracts, options on futures contracts, and swap agreements. The portfolio manager may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by the Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance.

If the Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund's return or result in a loss. The Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if

the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. By contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Manager will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by the Fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Pursuant to regulation and/or published positions of the Securities and Exchange Commission, the Fund may be required to segregate permissible liquid assets to cover its obligations relating to its transactions in derivatives.

The Fund will not be a commodity pool. The Fund has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility, as a registered investment company, for an exclusion from the definition of commodity pool operator and that the Fund is not subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

Futures Transactions--In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. Transaction costs also are included in these calculations.

The Fund may enter into futures contracts in U.S. domestic markets. Engaging in these transactions involves risk of loss to the Fund which could adversely affect the value of the Fund's net assets. Although the Fund intends to purchase or sell futures contracts only if there is an

active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures and options with respect thereto by the Fund also is subject to the Manager's ability to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Specific Futures Transactions. The Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

The Fund may purchase and sell municipal bond index futures contracts. Municipal bond index futures contracts are based on an index of Municipal Bonds. The index assigns relative values to the Municipal Bonds included in the index, and fluctuates with changes in the market value of such Municipal Bonds. The contract is an agreement pursuant to which two parties agree to take or make delivery of an amount of cash based upon the difference between the value of the index at the close of the last trading day of the contract and the price at which the index contract was originally written.

Swap Transactions. The Fund may engage in swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, to mitigate risk, manage duration and reduce portfolio turnover. Swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, may be individually negotiated and include exposure to a variety of different interest rates. Swaps involve two parties exchanging a series of cash flows at specified intervals. In the case of an interest rate swap, the parties exchange interest payments based upon an agreed upon principal amount (referred to as the "notional principal amount"). Under the most basic scenario, Party A would pay a fixed rate on the notional principal amount to Party B, which would pay a floating rate on the same notional principal amount to Party A. Swap agreements can take many forms and are known by a variety of names.

In a typical cap or floor agreement, one party agrees to make payments only under specified circumstances, usually in return for payment of a fee by the other party. For example, the buyer of an interest rate cap obtains the right to receive payments to the extent that a specified interest rate exceeds an agreed-upon level, while the seller of an interest rate floor is

obligated to make payments to the extent that a specified interest rate falls below an agreed-upon level. An interest rate collar combines elements of buying a cap and selling a floor.

In a typical interest rate lock transaction, if Party A desires to lock in a particular interest rate on a given date it may enter into an agreement to pay, or receive a payment from, Party B based on the yield of a reference index or security, such as a Municipal Bond or U.S. Treasury security. At the maturity of the term of the agreement, one party makes a payment to the other party as determined by the relative change in the yield of the reference security or index. An interest rate lock transaction may be terminated prior to its stated maturity date by calculating the payment due as of the termination date, which generally differs from the make-whole provisions for an early termination of an interest rate swap transaction in which the party terminating the swap early is required to give its counterparty the economic benefit of the transaction.

The Fund will set aside cash or permissible liquid assets to cover its current obligations under swap transactions. If the Fund enters into a swap agreement on a net basis (that is, the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments), the Fund will maintain cash or permissible liquid assets with a daily value at least equal to the excess, if any, of the Fund's accrued obligations under the swap agreement over the accrued amount the Fund is entitled to receive under the agreement.

The most important factor in the performance of a swap agreement is the change in the specific interest rate or other factor(s) that determine the amounts of payments due to and from the Fund. If a swap agreement called for payments by the Fund, the Fund must be prepared to make such payments when due. In addition, if the counterparty's creditworthiness declines, the value of a swap agreement would likely decline, potentially resulting in losses.

The Fund will enter into swaps, interest rate locks, caps, collars and floors only with banks and recognized securities dealers believed by the Manager to present minimal credit risks. If there were a default by the other party to such transaction the Fund would have to rely on its contractual remedies (which may be limited by bankruptcy, insolvency or similar laws) pursuant to the agreement relating to the transaction.

The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If the Manager is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would diminish compared with what it would have been if these investment techniques were not used. Moreover, even if the Manager is correct in its forecasts, there is a risk that the swap position may correlate imperfectly with the price of the asset or liability being hedged.

The Fund will enter into swap transactions only when the Manager believes it would be in the best interests of the Fund's shareholders to do so. Depending on the circumstances, gains from a swap transaction can be treated either as ordinary income or as short- or long-term capital gains. The Fund currently intends to enter into swap transactions on a "forward settlement" basis (settlement set out several months) and to close-out such transactions before the settlement date.

This methodology should result in there being no exchange of income and, therefore, no taxable income to report. Any principal gain or loss at settlement would be a capital gain or loss.

Options--In General. The Fund may invest up to 5% of its assets, represented by the premium paid, in the purchase of call and put options. The Fund may write (i.e., sell) covered call and put option contracts to the extent of 20% of the value of its net assets at the time such option contracts are written. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by the Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction such as by segregating permissible liquid assets. A put option written by the Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken or otherwise covers the transaction. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. The Fund may purchase and sell call and put options in respect of specific securities (or groups or "baskets" of specific securities) or indices listed on national securities exchanges or traded in the over-the-counter market. An option on an index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the index upon which the option is based is greater than in the case of a call, or less than in the case of a put, the exercise price of the option. Thus, the effectiveness of purchasing or writing stock index options will depend upon price movements in the level of the index rather than the price of a particular security.

The Fund may purchase cash-settled options on interest rate swaps in pursuit of its investment objectives. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (for example, an exchange floating-rate payments for fixed-rate payments) denominated in U.S. dollars. A cash-settled option on a swap gives the purchaser the right, but not the obligation, in return for the premium paid, to

receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms.

Successful use by the Fund of options will be subject to the Manager's ability to predict correctly movements in interest rates. To the extent the Manager's predictions are incorrect, the Fund may incur losses.

Future Developments. The Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in the Prospectus or this Statement of Additional Information.

Stand-By Commitments. To the extent consistent with the requirements for a "qualified investment fund" under the New Jersey gross income tax, the Fund may acquire "stand-by commitments" with respect to Municipal Bonds held in its portfolio. Under a stand-by commitment, the Fund obligates a broker, dealer or bank to repurchase, at the Fund's option, specified securities at a specified price and, in this respect, stand-by commitments are comparable to put options. The exercise of a stand-by commitment, therefore, is subject to the ability of the seller to make payment on demand. The Fund will acquire stand-by commitments solely to facilitate its portfolio liquidity and does not intend to exercise its rights thereunder for trading purposes. The Fund may pay for stand-by commitments if such action is deemed necessary, thus increasing to a degree the cost of the underlying Municipal Bond and similarly decreasing such security's yield to investors. Gains realized in connection with stand-by commitments will be taxable. The Fund also may acquire call options on specific Municipal Bonds. The Fund generally would purchase these call options to protect the Fund from the issuer of the related Municipal Bond redeeming, or other holder of the call option from calling away, the Municipal Bond before maturity. The sale by the Fund of a call option that it owns on a specific Municipal Bond could result in the receipt of taxable income by the Fund.

Forward Commitments. The Fund may purchase or sell Municipal Bonds and other securities on a forward commitment, when-issued or delayed-delivery basis, which means that delivery and payment take place a number of days after the date of the commitment to purchase. The payment obligation and the interest rate receivable on a forward commitment when-issued or delayed-delivery security are fixed when the Fund enters into the commitment, but the Fund does not make payment until it receives delivery from the counterparty. The Fund will commit to purchase such securities only with the intention of actually acquiring the securities, but the Fund may sell these securities before the settlement date if it is deemed advisable. The Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Municipal Bonds or other securities purchased on a forward commitment, when-issued or delayed-delivery basis are subject to changes in value (generally changing in the same way, i.e. appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the

level of interest rates. Securities purchased on a forward commitment, when-issued or delayed-delivery basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a forward commitment, when-issued or delayed-delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed-delivery basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share.

Certain Investment Considerations and Risks

General. Even though interest-bearing securities are investments, which promise a stable stream of income, the prices of such securities are inversely affected by changes in interest rates and, therefore, are subject to the risk of market price fluctuations. Certain securities that may be purchased by the Fund, such as those with interest rates that fluctuate directly or indirectly based on multiples of a stated index, are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and possibly loss of principal. The values of fixed-income securities also may be affected by changes in the credit rating or financial condition of the issuing entities. The net asset value of the Fund generally will not be stable and should fluctuate based upon changes in the value of its respective portfolio securities. Securities in which the Fund invests may earn a higher level of current income than certain shorter-term or higher quality securities, which generally have greater liquidity, less market risk and less fluctuation in market value.

Investing in Municipal Bonds. The Fund may invest more than 25% of the value of its total assets in Municipal Bonds which are related in such a way that an economic, business or political development or change affecting one such security also would affect the other securities; for example, securities the interest upon which is paid from revenues of similar types of projects. As a result, the Fund may be subject to greater risk as compared to a municipal bond fund that does not follow this practice.

Certain provisions in the Internal Revenue Code of 1986, as amended (the "Code"), relating to the issuance of Municipal Bonds may reduce the volume of Municipal Bonds qualifying for Federal tax exemption. One effect of these provisions could be to increase the cost of the Municipal Bonds available for purchase by the Fund and thus reduce the available yield. Shareholders should consult their tax advisers concerning the effect of these provisions on an investment in the Fund. Proposals that may restrict or eliminate the income tax exemption for interest on Municipal Bonds may be introduced in the future. If any such proposal were enacted that would reduce the availability of Municipal Bonds for investment by the Fund so as to adversely affect Fund shareholders, the Fund would reevaluate its investment objective and policies and submit possible changes in the Fund's structure to shareholders for their consideration. If legislation were enacted that would treat a type of Municipal Bond as taxable, the Fund would treat such security as a permissible Taxable Investment within the applicable limits set forth herein.

Investing in New Jersey Municipal Bonds. Since the Fund is concentrated in securities issued by New Jersey or entities within New Jersey, an investment in the Fund may involve greater risk than investments in certain other types of municipal bond funds. You should

consider carefully the special risks inherent in the Fund's investment in New Jersey Municipal Bonds. You should review "Appendix A" which provides a brief summary of special investment considerations and risk factors relating to investing in New Jersey Municipal Bonds.

Lower Rated Bonds. The Fund may invest up to 20% of the value of its net assets in higher yielding (and, therefore, higher risk) debt securities such as those rated below investment grade by the Rating Agencies (commonly known as "high yield" or "junk" bonds). They may be subject to greater risks and market fluctuations than certain lower yielding, higher rated municipal securities. See "Appendix B" for a general description of the Rating Agencies' ratings of municipal securities. Although ratings may be useful in evaluating the safety of interest and principal payments, they do not evaluate the market value risk of these bonds. The Fund will rely on the Manager's judgment, analysis and experience in evaluating the creditworthiness of an issuer.

The market values of many of these bonds tend to be more sensitive to economic conditions than are higher rated securities and will fluctuate over time. These bonds generally are considered by the Rating Agencies to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation and generally will involve more credit risk than securities in the higher rating categories.

Because there is no established retail secondary market for many of these securities, the Fund anticipates that such securities could be sold only to a limited number of dealers or institutional investors. To the extent a secondary trading market for these bonds does exist, it generally is not as liquid as the secondary market for higher rated securities. The lack of a liquid secondary market may have an adverse impact on market price and yield and the Fund's ability to dispose of particular issues when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of a liquid secondary market for certain securities also may make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio and calculating its net asset value. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of these securities. In such cases, judgment may play a greater role in valuation because less reliable objective data may be available.

These bonds may be particularly susceptible to economic downturns. An economic recession could adversely affect the ability of the issuers of lower-rated bonds to repay principal and pay interest thereon which would increase the incidence of default for such securities. It is likely that any economic recession also could disrupt severely the market for such securities and have an adverse impact on their value.

The Fund may acquire these bonds during an initial offering. Such securities may involve special risks because they are new issues. The Fund has no arrangement with any person concerning the acquisition of such securities, and the Manager will review carefully the credit and other characteristics pertinent to such new issues.

The credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon bonds, pay-in-kind bonds and step-up bonds, in which the Fund may invest up to 5% of

its net assets. In addition to the risks associated with the credit rating of the issuers, the market prices of these securities may be very volatile during the period no interest is paid.

Investment Restrictions

The Fund's investment objective, and its policy to normally invest at least 80% of its net assets (plus any borrowings for investment purposes) in the New Jersey Municipal Bonds (or other instruments with similar economic characteristics) are fundamental policies, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. In addition, the Fund has adopted investment restrictions numbered 1 through 6 as fundamental policies. Investment restrictions numbered 7 through 12 are not fundamental policies and may be changed by vote of a majority of the Fund's Board members at any time. The Fund may not:

1. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowings to no more than 33-1/3% of the Fund's total assets). For purposes of this investment restriction, the entry into options, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.
2. Purchase or sell real estate, real estate investment trust securities, commodities or commodity contracts, or oil and gas interests, but this shall not prevent the Fund from investing in Municipal Bonds secured by real estate or interests therein, or prevent the Fund from purchasing and selling futures contracts, including those relating to indices, and options on futures contracts or indices.
3. Underwrite the securities of other issuers, except that the Fund may bid separately or as part of a group for the purchase of Municipal Bonds directly from an issuer for its own portfolio to take advantage of the lower purchase price available, and except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.
4. Make loans to others except through the purchase of debt obligations and the entry into repurchase agreements; however, the Fund may lend its portfolio securities in an amount not to exceed 33-1/3% of the value of its total assets. Any loans of portfolio securities will be made according to guidelines established by the Securities and Exchange Commission and the Fund's Board.
5. Invest more than 25% of its total assets in the securities of issuers in any single industry; provided that there shall be no such limitation on the purchase of Municipal Bonds and, for temporary defensive purposes, obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.
6. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except to the extent that the activities permitted in Investment Restriction Nos. 1, 2, 8 and 10 may be deemed to give rise to a senior security.

7. Purchase securities other than Municipal Bonds and Taxable Investments and those arising out of transactions in futures and options or as otherwise provided in the Fund's Prospectus.

8. Purchase securities on margin, but the Fund may make margin deposits in connection with transactions in futures, including those relating to indices, and options on futures contracts or indices.

9. Invest in securities of other investment companies, except to the extent permitted under the 1940 Act.

10. Pledge, hypothecate, mortgage or otherwise encumber its assets, except to the extent necessary to secure permitted borrowings, and to the extent related to the deposit of assets in escrow in connection with the purchase of securities on a when-issued or delayed-delivery basis and collateral arrangements with respect to futures contracts, including those related to indices, and options on futures contracts or indices, and collateral arrangements with respect to initial or variation margin for futures contracts, including those relating to indices, and options on futures contracts or indices.

11. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities which are illiquid (which securities could include participation interests (including municipal lease/purchase agreements) that are not subject to the demand feature described in the Fund's Prospectus or the Statement of Additional Information, and floating and variable rate demand obligations as to which the Fund cannot exercise the demand feature described in the Fund's Prospectus or the Statement of Additional Information on less than seven days' notice and as to which there is no secondary market) if, in the aggregate, more than 15% of its net assets would be so invested.

12. Invest in companies for the purpose of exercising control.

For purposes of Investment Restriction No. 5, industrial development bonds, where the payment of principal and interest is the ultimate responsibility of companies within the same industry, are grouped together as an "industry."

If a percentage restriction is adhered to at the time of investment, a later increase or decrease in percentage resulting from a change in values or assets will not constitute a violation of such restriction. With respect to Investment Restriction No. 1, however, if borrowings exceed 33-1/3% of the value of the Fund's total assets as a result of a change in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

The Fund and the Manager have received an exemptive order from the Securities and Exchange Commission which, among other things, permits the Fund to use cash collateral received in connection with lending the Fund's securities and other uninvested cash to purchase shares of one or more registered money market funds advised by the Manager in excess of the limitations imposed by the 1940 Act.

MANAGEMENT OF THE FUND

The Fund's Board is responsible for the management and supervision of the Fund and approves all significant agreements with those companies that furnish services to the Fund. These companies are as follows:

The Dreyfus Corporation	Investment Adviser
Dreyfus Service Corporation.	Distributor
Dreyfus Transfer, Inc.	Transfer Agent
The Bank of New York	Custodian

Board Members of the Fund*

Board members of the Fund, together with information as to their positions with the Fund, principal occupations and other board memberships and affiliations, are shown below.

* None of the Board members are "interested persons" of the Fund, as defined in the 1940 Act.

Name (Age) Position with Fund (Since)	Principal Occupation During Past 5 Years	Other Board Memberships and Affiliations
Joseph S. DiMartino (62) Chairman of the Board (1995)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Levcor International, Inc., an apparel fabric processor, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i> Sunair Services Corporation, engaging in the design, manufacture and sale of high frequency systems for long- range voice and data communications, as well as providing certain outdoor- related services to homes and businesses, <i>Director</i>
David W. Burke (70) Board Member (1994)	Corporate Director and Trustee	John F. Kennedy Library Foundation, <i>Director</i> U.S.S. Constitution Museum, <i>Director</i>
Diane Dunst (66) Board Member (1992)	President, Huntting House Antiques	None
Jay I. Meltzer (77) Board Member (1992)	Physician, Internist and Specialist in Clinical Hypertension Clinical Professor of Medicine at Columbia University & College of Physicians and Surgeons Faculty Associate, Center for Bioethics, Columbia	None

Name (Age) Position with Fund (Since)	Principal Occupation During Past 5 Years	Other Board Memberships and Affiliations
Daniel Rose (76) Board Member (1992)	Chairman and Chief Executive Officer of Rose Associates, Inc., a New York based real estate development and management firm	Baltic-American Enterprise Fund, <i>Vice Chairman and Director</i> Harlem Educational Activities Fund, Inc., <i>Chairman</i> Housing Committee of the Real Estate Board of New York, Inc., <i>Director</i>
Warren B. Rudman (76) Board Member (1993)	Of Counsel to (from January 1993 to December 31, 2003, Partner in) the law firm Paul, Weiss, Rifkind, Wharton & Garrison, LLP	Collins & Aikman Corporation, <i>Director</i> Allied Waste Corporation, <i>Director</i> Raytheon Company, <i>Director</i> Boston Scientific, <i>Director</i>
Sander Vanocur (78) Board Member (1992)	President of Old Owl Communications	None

Board members are elected to serve for an indefinite term. The Fund has standing audit, nominating and compensation committees, each comprised of its Board members who are not "interested persons" of the Fund, as defined in the 1940 Act. The function of the audit committee is (i) to oversee the Fund's accounting and financial reporting processes and the audits of the Fund's financial statements and (ii) to assist in the Board's oversight of the integrity of the Fund's financial statements, the Fund's compliance with legal and regulatory requirements and the independent registered public accounting firm's qualifications, independence and performance. The Fund's nominating committee is responsible for selecting and nominating persons as members of the Board for election or appointment by the Board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the committee takes into consideration various factors listed in the nominating committee charter, including character and integrity, business and professional experience, and whether the committee believes the person has the ability to apply sound and independent business judgment and would act in the interest of the Fund and its shareholders. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Fund, c/o The Dreyfus Corporation Legal Department, 200 Park Avenue, 8th Floor East, New York, New York 10166, which includes information regarding the recommended nominee as specified in the nominating committee charter. The function of the compensation committee is to establish the appropriate compensation for serving on the Board. The Fund also has a standing pricing committee comprised of any one Board member. The function of the pricing committee is to assist in valuing the Fund's investments. The Fund's audit committee met five times during the fiscal year ended March 31, 2006. The pricing, nominating and compensation committees did not meet during the fiscal year ended March 31, 2006.

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2005.

<u>Name of Board Member</u>	<u>Fund</u>	<u>Aggregate Holding of Funds in the Dreyfus Family of Funds for Which Responsible as a Board Member</u>
Joseph S. DiMartino	None	Over \$100,000
David W. Burke	None	Over \$100,000
Diane Dunst	None	\$50,001 - \$100,000
Jay I. Meltzer	None	Over \$100,000
Daniel Rose	None	Over \$100,000
Warren B. Rudman	None	Over \$100,000
Sander Vanocur	None	\$1 - \$10,000

As of December 31, 2005, none of the Board members or their immediate family members owned securities of the Manager, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager or the Distributor.

The Fund typically pays its Board members its allocated portion of an annual retainer of \$25,000 and a fee of \$4,000 per meeting (with a minimum of \$500 per meeting and per telephone meeting) attended for the Fund and eight other funds (comprised of 11 portfolios) in the Dreyfus Family of Funds, and reimburses them for their expenses. The Chairman of the Board receives an additional 25% of such compensation. Emeritus Board members, if any, are entitled to receive an annual retainer and a per meeting attended fee of one-half the amount paid to them as Board members. The aggregate amount of compensation paid to each Board member by the Fund for the fiscal year ended March 31, 2006, and by all funds in the Dreyfus Family of Funds for which such person is a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) for the year ended December 31, 2005, was as follows:

Name of Board Member	Aggregate Compensation From the Fund*	Total Compensation From the Fund and Fund Complex Paid to Board Member(**)
Joseph S. DiMartino	\$3,469	\$833,262 (190)
David W. Burke	\$2,778	\$287,500 (84)
Diane Dunst	\$2,778	\$42,000 (11)
Rosalind Gersten Jacobs ⁺	\$1,829	\$126,898 (33)
Jay I. Meltzer	\$2,778	\$46,500 (11)
Daniel Rose	\$2,778	\$93,000 (22)
Warren B. Rudman	\$2,778	\$88,500 (20)
Sander Vanocur	\$2,778	\$97,000 (22)

* Amount does not include the cost of office space, secretarial services and health benefits for the Chairman and expenses reimbursed to Board members for attending Board meetings, which in the aggregate amounted to \$601.

** Represents the number of separate portfolios comprising the investment companies in the Fund Complex, including the Fund, for which the Board member serves.

+ Emeritus Board member as of June 9, 2005.

Officers of the Fund

STEPHEN E. CANTER, President since March 2000. Chairman of the Board and Chief Executive Officer and an officer of 90 investment companies (comprised of 186 portfolios) managed by the Manager. Mr. Canter also is a Board member and, where applicable, an Executive Committee Member of the other investment management subsidiaries of Mellon Financial Corporation, each of which is an affiliate of the Manager. He is 60 years old and has been an employee of the Manager since May 1997.

STEPHEN R. BYERS, Executive Vice President since November 2002. Chief Investment Officer, Vice Chairman and a director of the Manager, and an officer of 90 investment companies (comprised of 186 portfolios) managed by the Manager. Mr. Byers also is an officer, director or an Executive Committee Member of certain other investment management subsidiaries of Mellon Financial Corporation, each of which is an affiliate of the Manager. He is 52 years old and has been an employee of the Manager since January 2000.

MARK N. JACOBS, Vice President since March 2000. Executive Vice President, Secretary and General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 60 years old and has been an employee of the Manager since June 1977.

JAMES WINDELS, Treasurer since November 2001. Director-Mutual Fund Accounting of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 47 years old and has been an employee of the Manager since April 1985.

MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 46 years old and has been an employee of the Manager since October 1993.

JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since February 1993.

JAMES BITETTO, Vice President and Assistant Secretary since August 2005. Assistant General Counsel and Assistant Secretary of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since December 1996.

JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. She is 50 years old and has been an employee of the Manager since October 1988.

JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005. Assistant General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 44 years old and has been an employee of the Manager since June 2000.

JANETTE E. FARRAGHER, Vice President and Assistant Secretary since 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. She is 43 years old and has been an employee of the Manager since February 1984.

ROBERT R. MULLERY, Vice President and Assistant Secretary since 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 54 years old and has been an employee of the Manager since May 1986.

JEFF PRUSNOFSKY, Vice President and Assistant Secretary since 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since October 1990.

ERIK D. NAVILOFF, Assistant Treasurer since August 2005. Senior Accounting Manager – Taxable Fixed Income Funds of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 37 years old and has been an employee of the Manager since November 1992.

GAVIN C. REILLY, Assistant Treasurer since August 2005. Tax Manager of the Investment Accounting and Support Department of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 37 years old and has been an employee of the Manager since April 1991.

ROBERT S. ROBOL, Assistant Treasurer since August 2005. Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 42 years old and has been an employee of the Manager since October 1988.

ROBERT SVAGNA, Assistant Treasurer since August 2005. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 91 investment companies (comprised of 202 portfolios) managed by the Manager. He is 39 years old and has been an employee of the Manager since November 1990.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since August 2002. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 87 investment companies (comprised of 198 portfolios) managed by the Manager. He is 35 years old and has been an employee of the Distributor since October 1998.

JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004. Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (91 investment companies, comprised of 202 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 49 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

The address of each Board member and officer of the Fund is 200 Park Avenue, New York, New York 10166.

The Fund's Board members and officers, as a group, owned less than 1% of the Fund's shares outstanding on July 7, 2006.

As of July 7, 2006, the following shareholders were known by the Fund to own of record 5% or more of the outstanding voting securities of the Fund: Charles Schwab & Company, Inc.,

101 Montgomery St., San Francisco, CA 94104-4151 (9.05%) and National Financial Services, 82 Devonshire St., Boston, MA 02109-3605 (5.52%).

MANAGEMENT ARRANGEMENTS

Investment Adviser. The Manager is a wholly-owned subsidiary of Mellon Financial Corporation ("Mellon"). Mellon is a global financial holding company incorporated under Pennsylvania law in 1971 and registered under the Federal Bank Holding Company Act of 1956, as amended. Mellon provides a comprehensive range of financial products and services in domestic and selected international markets.

The Manager provides management services pursuant to a Management Agreement (the "Agreement") between the Fund and the Manager. The Agreement is subject to annual approval by (i) the Fund's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. The Agreement is terminable without penalty, on 60 days' notice, by the Fund's Board or by vote of the holders of a majority of the Fund's shares, or, upon not less than 90 days' notice, by the Manager. The Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of the Manager: Stephen E. Canter, Chair of the Board and Chief Executive Officer; Thomas F. Eggers, President, Chief Operating Officer and a director; Jonathan Baum, Vice Chair – Distribution; Stephen R. Byers, Chief Investment Officer, Vice Chair and a director; J. Charles Cardona, Vice Chair and a director; Diane P. Durnin, Vice Chair and a director; J. David Officer, Vice Chair and a director; Mark N. Jacobs, Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President-Corporate Communications; Lisa A. Fox, Vice President – Human Resources; Anthony Mayo, Vice President-Information Systems; Theodore A. Schachar, Vice President-Tax; Alex G. Sciulli, Vice President; Wendy H. Strutt, Vice President; Gary Pierce, Controller; Joseph W. Connolly, Chief Compliance Officer; James Bitetto, Assistant Secretary; and Steven G. Elliott, Robert P. Kelly, David F. Lamere and Ronald P. O'Hanley III, directors.

The Manager's Code of Ethics subjects its employees' personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics and are also subject to the oversight of Mellon's Investment Ethics Committee (the "Committee"). Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

The Manager maintains office facilities on behalf of the Fund, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Fund. The Manager may pay the Distributor for

shareholder services from the Manager's own assets, including past profits but not including the management fee paid by the Fund. The Distributor may use part or all of such payments to pay securities dealers, banks or other financial institutions (collectively, "Service Agents") in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

Expenses. All expenses incurred in the operation of the Fund are borne by the Fund, except to the extent specifically assumed by the Manager. The expenses borne by the Fund include, without limitation: taxes, interest, loan commitment fees, interest and distributions paid on securities sold short, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager, Securities and Exchange Commission fees, state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of maintaining the Fund's existence, costs of independent pricing services, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of shareholders' reports and meetings, costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders, and any extraordinary expenses.

As compensation for the Manager's services, the Fund has agreed to pay the Manager a monthly management fee at the annual rate of 0.60% of the value of the Fund's average daily net assets. All fees and expenses are accrued daily and deducted before the declaration of dividends to shareholders. For the fiscal years ended March 31, 2004, 2005 and 2006, the management fees payable by the Fund amounted to \$1,308,605, \$1,188,293 and \$1,126,981, respectively, which amounts were reduced by \$11,014, \$3,365 and \$11,025, respectively, pursuant to undertakings by the Manager then in effect, resulting in net management fees paid by the Fund of \$1,297,591 in fiscal 2004, \$1,184,928 in fiscal 2005 and \$1,115,956 in fiscal 2006.

The Manager has agreed that if in any fiscal year the aggregate expenses of the Fund, exclusive of taxes, brokerage, interest on borrowings and (with the prior written consent of the necessary state securities commissions) extraordinary expenses, but including the management fee, exceed the expense limitation of any state having jurisdiction over the Fund, the Fund may deduct from the payment to be made to the Manager under the Agreement, or the Manager will bear, such excess expense to the extent required by state law. Such deduction or payment, if any, will be estimated daily, and reconciled and effected or paid, as the case may be, on a monthly basis.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of the Fund's net assets increases.

Portfolio Managers. The Manager manages the Fund's portfolio of investments in accordance with the stated policies of the Fund, subject to the approval of the Fund's Board members. The Manager is responsible for investment decisions and provides the Fund with portfolio managers who are authorized by the Fund's Board to execute purchases and sales of securities. The Fund's portfolio managers are Joseph P. Darcy, A. Paul Disdier, Douglas J. Gaylor, Joseph Irace, Colleen Meehan, W. Michael Petty, Scott Sprauer, James Welch, Monica S. Wieboldt and Bill Vasiliou. The Manager also maintains a research department with a

professional staff of portfolio managers and securities analysts who provide research services for the Fund and for other funds advised by the Manager.

Portfolio Manager Compensation. Portfolio manager compensation is comprised primarily of a market-based salary and an incentive compensation plan. The Fund's portfolio managers are compensated by Dreyfus or its affiliates and not by the Fund. The incentive compensation plan is comprised of three components: portfolio performance (approximately 60%), individual qualitative performance (approximately 20%) and Dreyfus financial performance as measured by Dreyfus' pre-tax net income (approximately 20%). Up to 10% of the incentive plan compensation may be paid in Mellon restricted stock.

Portfolio performance is measured by a combination of yield (35%) and total return (65%) relative to the appropriate Lipper peer group. 1-year performance in each category is weighted at 40% and 3-year performance at 60%. The portfolio manager's performance is measured on either a straight average (each account weighted equally) or a combination of straight average and asset-weighted average. Generally, if the asset-weighted average is higher, then that is used to measure performance. If the straight average is higher, then typically an average of the two is used to measure performance.

Individual qualitative performance is based on Dreyfus' Chief Investment Officer's evaluation of the portfolio manager's performance based on any combination of the following: marketing contributions; new product development; performance on special assignments; people development; methodology enhancements; fund growth/gain in market; and support to colleagues. The Chief Investment Officer may consider additional factors at his discretion.

Portfolio managers are also eligible for Dreyfus' Long Term Incentive Plan. Under that plan, cash and/or Mellon restricted stock is awarded at the discretion of the Chief Investment Officer based on individual performance and contributions to the Investment Management Department and the Mellon organization.

Additional Information About the Portfolio Managers. The following table lists the number and types of other accounts advised by the Fund's primary portfolio manager and assets under management in those accounts as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Registered Investment Company Accounts</u>	<u>Assets Managed</u>	<u>Pooled Accounts</u>	<u>Assets Managed</u>	<u>Other Accounts</u>	<u>Assets Managed</u>
Scott Sprauer	6	0	0	0	6	\$693 M

None of the funds or accounts are subject to a performance-based advisory fee.

The dollar range of Fund shares beneficially owned by the primary portfolio manager are as follows as of the end of the Fund's fiscal year:

Portfolio Manager	Fund Name	Dollar Range of Fund Shares Beneficially Owned
Scott Sprauer	Dreyfus New Jersey Intermediate Municipal Bond Fund	None

Portfolio managers at Dreyfus may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of institutions such as pension funds, insurance companies and foundations), bank common trust accounts and wrap fee programs ("Other Accounts").

Potential conflicts of interest may arise because of Dreyfus' management of the Fund and Other Accounts. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Dreyfus may be perceived as causing accounts it manages to participate in an offering to increase Dreyfus' overall allocation of securities in that offering, or to increase Dreyfus' ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as Dreyfus may have an incentive to allocate securities that are expected to increase in value to preferred accounts. Initial public offerings, in particular, are frequently of very limited availability. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the Fund, that they are managing on behalf of Dreyfus. Dreyfus periodically reviews each portfolio manager's overall responsibilities to ensure that he or she is able to allocate the necessary time and resources to effectively manage the Fund. In addition, Dreyfus could be viewed as having a conflict of interest to the extent that Dreyfus or its affiliates and/or portfolios managers have a materially larger investment in Other Accounts than their investment in the Fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the Fund. For these or other reasons, the portfolio manager may purchase different securities for the Fund and the Other Accounts, and the performance of securities purchased for the Fund may vary from the performance of securities purchased for Other Accounts. The portfolio manager may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the Fund, which could have the potential to adversely impact the Fund, depending on market conditions.

A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in another account, such as when a purchase increases the value of securities previously purchased by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Dreyfus' goal is to provide high quality investment services to all of its clients, while meeting Dreyfus' fiduciary obligation to treat all clients fairly. Dreyfus has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that it believes address the conflicts associated with managing multiple accounts for multiple clients. In addition, Dreyfus monitors a variety of areas, including compliance with Fund guidelines, the allocation of IPOs, and compliance with the firm's Code of Ethics.

Furthermore, senior investment and business personnel at Dreyfus periodically review the performance of Dreyfus' portfolio managers.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager located at 200 Park Avenue, New York, New York 10166, serves as the Fund's distributor on a best efforts basis pursuant to an agreement with the Fund which is renewable annually.

The Manager or the Distributor may provide cash payments out of its own resources to financial intermediaries that sell shares of the Fund or provide other services. Such payments are in addition to any shareholder services fees or other expenses paid by the Fund. These additional payments may be made to Service Agents, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid to Service Agents for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a Service Agent to recommend or sell shares of the Fund to you. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

From time to time, the Manager or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets, or other entertainment; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

Transfer and Dividend Disbursing Agent and Custodian. Dreyfus Transfer, Inc. (the "Transfer Agent"), a wholly-owned subsidiary of the Manager, 200 Park Avenue, New York, New York 10166, is the Fund's transfer and dividend disbursing agent. Under a transfer agency agreement with the Fund, the Transfer Agent arranges for the maintenance of shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by the Fund. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses.

The Bank of New York (the "Custodian"), One Wall Street, New York, New York 10286, is the Fund's custodian. The Custodian has no part in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund. Under a custody agreement with the Fund, the Custodian holds the Fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of the Fund's assets held in custody and receives certain securities transactions charges.

HOW TO BUY SHARES

General. Fund shares may be purchased through the Distributor or Service Agents that have entered into service agreements with the Distributor. Fund shares are sold without a sales charge. You will be charged a fee if an investment check is returned unplayable. You may be

charged a fee if you effect transactions in Fund shares through a Service Agent. Share certificates are issued only upon your written request. No certificates are issued for fractional shares. It is not recommended that the Fund be used as a vehicle for Keogh, IRA or other qualified retirement plans.

The Fund reserves the right to reject any purchase order. The Fund will not establish an account for a "foreign financial institution," as that term is defined in Department of the Treasury rules implementing section 312 of the USA PATRIOT Act of 2001. Foreign financial institutions include: foreign banks (including foreign branches of U.S. depository institutions); foreign offices of U.S. securities broker-dealers, futures commission merchants, and mutual funds; non-U.S. entities that, if they were located in the United States, would be securities broker-dealers, futures commission merchants or mutual funds; and non-U.S. entities engaged in the business of currency dealer or exchanger or money transmitter.

The minimum initial investment is \$2,500, or \$1,000 if you are a client of a securities dealer, bank or other financial institution which maintains an omnibus account in the Fund and has made an aggregate minimum initial purchase for its customers of \$2,500. Subsequent investments must be at least \$100. The initial investment must be accompanied by the Account Application. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Fund's Board, or the spouse or minor child of any of the foregoing, the minimum initial investment is \$1,000. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. Fund shares are offered without regard to the minimum initial investment requirements to Board members of a fund advised by the Manager, including members of the Fund's Board, who elect to have all or a portion of their compensation for servicing in that capacity automatically invested in the Fund. The Fund reserves the right to vary the initial and subsequent investment minimum requirements at any time.

Fund shares also are offered without regard to the minimum initial investment requirements through Dreyfus-Automatic Asset Builder[®], Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan pursuant to the Dreyfus Step Program described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this Statement of Additional Information, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. You should consult your Service Agent in this regard. As discussed under "Management Arrangements – Distributor," Service Agents may receive revenue sharing payments from the Manager or the Distributor. The receipt of such payments could create an incentive for a Service Agent to recommend or sell shares of the Fund instead of other mutual funds where such payments are not received. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

Shares are sold on a continuous basis at the net asset value per share next determined after an order in proper form is received by the Transfer Agent or other entity authorized to receive orders on behalf of the Fund. Net asset value per share is determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for regular business. For purposes of determining net asset value per share, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share is computed by dividing the value of the Fund's net assets (i.e., the value of its assets less liabilities) by the total number of shares outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

Dreyfus TeleTransfer Privilege. You may purchase shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the share price determined on that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or made on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the share price determined on the next business day following such purchase order. To qualify to use Dreyfus TeleTransfer Privilege, the initial payment for purchase of Fund shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares--Dreyfus TeleTransfer Privilege."

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

SHAREHOLDER SERVICES PLAN

The Fund has adopted a Shareholder Services Plan (the "Plan") pursuant to which the Fund reimburses the Distributor an amount not to exceed an annual rate of 0.25% of the value of the Fund's average daily net assets for certain allocated expenses of providing personal services and/or maintaining shareholder accounts. The services provided may include personal services

relating to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of shareholder accounts.

A quarterly report of the amounts expended under the Plan, and the purposes for which such expenditures were incurred, must be made to the Fund's Board for its review. In addition, the Plan provides that material amendments of the Plan must be approved by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect interest in the operation of the Plan by vote cast in person at a meeting called for the purpose of considering such amendments. The Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Plan. The Plan is terminable at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Plan.

For the fiscal year ended March 31, 2006, the Fund paid the Distributor \$116,610 under the Plan.

HOW TO REDEEM SHARES

General. The Fund ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the rules of the Securities and Exchange Commission. However, if you have purchased Fund shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder® and subsequently submit a written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Fund will not honor redemption checks under the Checkwriting Privilege, and will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege, for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder® order against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares may not be redeemed until the Transfer Agent has received your Account Application.

Redemption Fee. The Fund will deduct a redemption fee equal to 1% of the net asset value of Fund shares redeemed (including redemptions through the use of the Fund Exchanges service) less than 30 days following the issuance of such shares. The redemption fee will be deducted from the redemption proceeds and retained by the Fund. For the fiscal year ended March 31, 2006, the Fund retained \$5,506 in redemption fees.

No redemption fee will be charged on the redemption or exchange of shares (1) through the Fund's Checkwriting Privilege, Automatic Withdrawal Plan or Dreyfus Auto-Exchange Privilege, (2) through accounts that are reflected on the records of the Transfer Agent as omnibus accounts approved by the Distributor, (3) through accounts established by securities dealers, banks or other financial institutions approved by the Distributor that utilize the National Securities Clearing Corporation's networking system, or (4) acquired through the reinvestment of dividends or distributions. The redemption fee may be waived, modified or terminated at any time.

Checkwriting Privilege. The Fund provides redemption checks ("Checks") to investors automatically upon opening an account, unless you specifically refuse the Checkwriting Privilege by checking the applicable "No" box on the Account Application. The Checkwriting Privilege may be established for an existing account by a separate signed Shareholder Services Form. Checks will be sent only to the registered owner(s) of the account and only to the address of record. The Account Application or Shareholder Services Form must be manually signed by the registered owner(s). Checks are drawn on your Fund account and may be made payable to the order of any person in an amount of \$500 or more. When a Check is presented to the Transfer Agent for payment, the Transfer Agent, as your agent, will cause the Fund to redeem a sufficient number of shares in your account to cover the amount of the Check. Dividends are earned until the Check clears. After clearance, a copy of the Check will be returned to you. You generally will be subject to the same rules and regulations that apply to checking accounts, although the election of this Privilege creates only a shareholder-transfer agent relationship with the Transfer Agent.

You should date your Checks with the current date when you write them. Please do not postdate your Checks. If you do, the Transfer Agent will honor, upon presentment, even if presented before the date of the Check, all postdated Checks which are dated within six months of presentment for payment, if they are otherwise in good order.

Checks are free, but the Transfer Agent will impose a fee for stopping payment of a Check upon your request or if the Transfer Agent cannot honor a Check due to insufficient funds or other valid reason. If the amount of the Check is greater than the value of the shares in your account, the Check will be returned marked insufficient funds. Checks should not be used to close an account.

The Checkwriting Privilege will be terminated immediately, without notice, with respect to any account which is, or becomes, subject to backup withholding on redemptions. Any Check written on an account which has become subject to backup withholding on redemptions will not be honored by the Transfer Agent.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Fund will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt by the Transfer Agent of a redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Share Certificates; Signatures."

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. See "How to Buy Shares--Dreyfus TeleTransfer Privilege."

Share Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. A fee may be imposed to replace lost or stolen certificates, or certificates that were never received. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program ("STAMP") and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and "Signature-Guaranteed" must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians and may accept other suitable verification arrangements from foreign investors, such as consular verification. For more information with respect to signature-guarantees, please call one of the telephone numbers listed on the cover.

Redemption Commitment. The Fund has committed itself to pay in cash all redemption requests by any shareholder of record, limited in amount during any 90-day period to the lesser of \$250,000 or 1% or the value of the Fund's net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the Securities and Exchange Commission. In the case of requests for redemption in excess of such amount, the Fund's Board reserves the right to make payments in whole or in part in securities or other assets of the Fund in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Fund's portfolio is valued. If the recipient sells such securities, brokerage charges might be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when trading in the markets the Fund ordinarily utilizes is restricted, or when an emergency exists as determined by the Securities and Exchange Commission so that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods as the Securities and Exchange Commission by order may permit to protect the Fund's shareholders.

SHAREHOLDER SERVICES

Fund Exchanges. You may purchase, in exchange for shares of the Fund, shares of certain other funds managed or administered by the Manager or shares of certain funds advised

by Founders Asset Management LLC ("Founders"), an indirect subsidiary of the Manager, to the extent such shares are offered for sale in your state of residence. The Fund will deduct a redemption fee equal to 1% of the net asset value of Fund shares exchanged where the exchange is made less than 30 days after the issuance of such shares. Shares of other funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.

To accomplish an exchange under item D above, you must notify the Transfer Agent of your prior ownership of fund shares and your account number.

To request an exchange, you or your Service Agent acting on your behalf must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone or online is given to all Fund shareholders automatically, unless you check the applicable "No" box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic and online instructions (including over the Dreyfus Express® voice response telephone system) from any person representing himself or herself to be you and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form are not eligible for telephone or online exchange. No fees currently are charged shareholders directly in connection with exchanges, although the Fund reserves the right, upon not less than 60 days' written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the Securities and Exchange Commission.

To establish a personal retirement plan by exchange, shares of the fund being exchanged must have a value of at least the minimum initial investment required for the fund into which the exchange is being made.

During times of drastic economic or market conditions, the Fund may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate

components -- redemption orders with a simultaneous request to purchase the other fund's shares. In such a case, the redemption request would be processed at the Fund's next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of the Fund, shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under "Fund Exchanges." Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by you. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction. Shares held under IRA and other retirement plans are eligible for this Privilege. Exchanges of IRA shares may be made between IRA accounts and from regular accounts to IRA accounts, but not from IRA accounts to regular accounts. With respect to all other retirement accounts, exchanges may be made only among those accounts.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-645-6561, or visiting www.dreyfus.com. The Fund reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus-Automatic Asset Builder®. Dreyfus-Automatic Asset Builder permits you to purchase Fund shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Fund shares (minimum of \$100 and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the U.S. Government automatically deposited into your Fund account.

Dreyfus Payroll Savings Plan. Dreyfus Payroll Savings Plan permits you to purchase Fund shares (minimum of \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer's payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Step Program. Dreyfus Step Program enables you to purchase Fund shares without regard to the Fund's minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll

Savings Plan. To establish a Dreyfus Step Program account, you must supply the necessary information on the Account Application and file the required authorization form(s) with the Transfer Agent. For more information concerning this Program, or to request the necessary authorization form(s), please call toll free 1-800-782-6620. You may terminate your participation in this Program at any time by discontinuing your participation in Dreyfus-Automatic Asset Builder, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan, as the case may be, as provided under the terms of such Privilege(s). The Fund may modify or terminate this Program at any time.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from the Fund in shares of another fund in the Dreyfus Family of Funds or certain funds advised by Founders of which you are a shareholder. Shares of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund that does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that impose a contingent deferred sales charge ("CDSC") and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from the Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. The Automatic Withdrawal Plan may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. The Fund's investments are valued each business day by an independent pricing service (the "Service") approved by the Fund's Board. When, in the judgment of the Service, quoted bid prices for investments are readily available and are representative of the bid side of the market, these investments are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other investments is determined by the Service based on methods which include consideration of: yields or prices of municipal bonds of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. The Service may employ electronic data processing techniques and/or a matrix system to determine valuations. The Service's procedures are reviewed under the general supervision of the Fund's Board. If valuations for investments (received from the Service or otherwise) are not readily available, or are determined not to reflect accurately fair value, the Fund may value those investments at fair value as determined in accordance with the procedures approved by the Fund's Board. Fair value of investments may be done by the Fund's Board, its pricing committee or its valuation committee in good faith using such information deemed appropriate under the circumstances. The factors that may be considered in fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased or sold, and public trading of similar securities of the issuers or comparable issuers. Using fair value to price investments may result in a value that is different from a security's most recent price and from prices used by other mutual funds to calculate their net asset values. These procedures need not be used to determine the value of securities held by the Fund if, in the opinion of a committee appointed by the Fund's Board, some other method would more accurately reflect the fair value of such securities. Expenses and fees, including the management fee (reduced by the expense limitation, if any), are accrued daily and are taken into account for the purpose of determining the net asset value of Fund shares.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Management believes that the Fund has qualified for treatment as a "regulated investment company" under the Code for the fiscal year ended March 31, 2006. The Fund intends to continue to so qualify if such qualification is in the best interests of its shareholders. As a regulated investment company, the Fund will pay no Federal income tax on net investment income and net realized capital gains to the extent that such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment company, the Fund must distribute to its shareholders at least 90% of its net income (consisting of net investment income from tax exempt obligations and taxable obligations, if any, and net short-term capital gains) and must meet certain asset diversification and other requirements. If the Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

The Fund ordinarily declares dividends from its net investment income on each day the New York Stock Exchange is open for regular business. Fund shares begin earning income dividends on the day following the date of purchase. The Fund's earnings for Saturdays, Sundays and holidays are declared as dividends on the next business day. Dividends usually are paid on the last business day of each month and are automatically reinvested in additional Fund shares at net asset value or, at your option, paid in cash. If you redeem all shares in your account at any time during the month, all dividends to which you are entitled will be paid to you along with the proceeds of the redemption. If you are an omnibus accountholder and indicate in a partial redemption request that a portion of any accrued dividends to which such account is entitled belongs to an underlying accountholder who has redeemed all shares in his or her account, such portion of the accrued dividends will be paid to you along with the proceeds of the redemption.

If you elect to receive dividends and distributions in cash and your dividend or distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividend or distribution and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

The Fund is a "qualified investment fund" for purpose of the New Jersey gross income tax. The primary criteria for constituting a "qualified investment fund" are that (i) the Fund is an investment company registered with the Securities and Exchange Commission which, for the calendar year in which the dividends and distributions (if any) are paid, has no investments other than interest-bearing obligations, obligations issued at a discount, and cash and cash items, including receivables, and financial options, futures and forward contracts, or other similar financial instruments relating to interest-bearing obligations, obligations issued at a discount or bond indices related thereto and (ii) at the close of each quarter of the taxable year, the Fund has not less than 80% of the aggregate principal amount of all of its investments excluding financial options, futures and forward contracts, or other similar financial instruments related to interest-bearing obligations, obligations issued at a discount or bond indices related thereto, cash and cash items, which cash items shall include receivables, in New Jersey Municipal Bonds, including obligations of Puerto Rico, the Virgin Islands and other territories and possessions of

the United States and certain other specified securities exempt from New Jersey income taxes. Additionally, a qualified investment fund must comply with certain continuing reporting requirements.

If the Fund continues to qualify as a qualified investment fund and the Fund complies with its reporting obligations, (a) dividends and distributions by the Fund to a New Jersey resident individual shareholder will not be subject to New Jersey gross income tax to the extent that the dividends and distributions are attributable to income earned by the Fund as interest on or gain from New Jersey Municipal Bonds, and (b) gain from the sale of Fund shares by a New Jersey resident individual shareholder will not be subject to the New Jersey gross income tax. Shares of the Fund are not subject to property taxation by New Jersey or its political subdivisions. To the extent that you are subject to state and local taxes outside of New Jersey, dividends and distributions earned by an investment in the Fund may represent taxable income.

If, at the close of each quarter of its taxable year, at least 50% of the value of the Fund's total assets consists of Federal tax exempt obligations, the Fund may designate and pay Federal exempt-interest dividends from interest earned on all such tax exempt obligations. Such exempt-interest dividends may be excluded by shareholders of the Fund from their gross income for Federal income tax purposes. Dividends derived from Taxable Investments, together with distributions from any net realized short-term securities gains, generally are taxable as ordinary income for Federal income tax purposes whether or not reinvested. Distributions from net realized long-term securities gains generally are taxable as long-term capital gains to a shareholder who is a citizen or resident of the United States, whether or not reinvested and regardless of the length of time the shareholder has held his or her shares.

Any dividend or distribution paid shortly after an investor's purchase of Fund shares may have the effect of reducing the net asset value of the shares below the cost of investment. Such a distribution should be a return of capital in an economic sense, although taxable as described in the Prospectus. In addition, the Code provides that if a shareholder holds Fund shares for six months or less and has received an exempt-interest dividend with respect to such shares, any loss incurred on the sale of such shares shall be disallowed to the extent of the exempt-interest dividend received.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gain or loss. However, all or a portion of any gain realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. In addition, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by the Fund from certain financial futures and options transactions ("Section 1256 contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing transactions. In addition, any Section 1256 contracts remaining unexercised at the end of the Fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund characterized as described above.

Offsetting positions held by the Fund involving certain financial futures contracts or options transactions may constitute "straddles." To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by the Fund may constitute "mixed straddles." The Fund may make one or more elections with respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If the Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial position") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") with respect to the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to the underlying property, the Fund generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively.

Investment by the Fund in securities issued or acquired at a discount or providing for deferred interest or for payment of interest in the form of additional obligations, such as zero coupon, pay-in-kind or step-up securities, could, under special tax rules, affect the amount, timing and character of distributions to shareholders by causing the Fund to recognize income prior to the receipt of cash payment. For example, the Fund could be required to take into account annually a portion of the discount (or deemed discount) at which such securities were issued and to distribute such portion in order to maintain its qualification as a regulated investment company. In such case, the Fund may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy these distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Fund could subject you to a \$50 penalty imposed by the Internal Revenue Service.

PORTFOLIO TRANSACTIONS

General. The Manager assumes general supervision over the placement of securities purchase and sale orders on behalf of the funds it manages. In cases where the Manager or fund employs a sub-adviser, the sub-adviser, under the supervision of the Manager, places orders on behalf of the applicable fund(s) for the purchase and sale of portfolio securities. Certain funds are managed by dual employees of the Manager and an affiliated entity in the Mellon organization. Funds managed by dual employees use the research and trading facilities, and are subject to the internal policies and procedures, of the affiliated entity. In this regard, the Manager places orders on behalf of those funds for the purchase and sale of securities through the trading desk of the affiliated entity, applying the written trade allocation procedures of such affiliate.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) generally has the authority to select brokers (for equity securities) or dealers (for fixed income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions, including their frequency, is made in the best judgment of the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) and in a manner deemed fair and reasonable to shareholders. The primary consideration in placing portfolio transactions is prompt execution of orders at the most favorable net price. In choosing brokers or dealers, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) evaluates the ability of the broker or dealer to execute the particular transaction (taking into account the market for the security and the size of the order) at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of a fund are selected on the basis of their professional capability and the value and quality of their services. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) attempts to obtain best execution for the funds by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) the availability of natural liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the measured quality and efficiency of the broker's or dealer's execution; (v) the broker's or dealer's willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counter-party risk (*i.e.*, the broker's or dealer's financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (*e.g.*, foreign or domestic security, large block, illiquid security). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors will be more important than others in determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

With respect to the receipt of research, the brokers or dealers selected may include those that supplement the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) research facilities with statistical data, investment information, economic facts and opinions. Such information may be useful to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in serving funds or accounts that it advises and, conversely, supplemental information obtained by the placement of business of other clients may be useful to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in carrying out its obligations to the funds. Information so received is in addition to, and not in lieu of, services required to be performed by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate), and the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) fees are not reduced as a consequence of the receipt of such supplemental information. Although the receipt of such research services does not reduce the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) normal independent research activities, it enables it to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff.

Under the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) procedures, portfolio managers and their corresponding trading desks may seek to aggregate (or

"bunch") orders that are placed or received concurrently for more than one fund or account. In some cases, this policy may adversely affect the price paid or received by a fund or an account, or the size of the position obtained or liquidated. As noted above, certain brokers or dealers may be selected because of their ability to handle special executions such as those involving large block trades or broad distributions, provided that the primary consideration of best execution is met. Generally, when trades are aggregated, each fund or account within the block will receive the same price and commission. However, random allocations of aggregate transactions may be made to minimize custodial transaction costs. In addition, at the close of the trading day, when reasonable and practicable, the completed securities of partially filled orders will generally be allocated to each participating fund and account in the proportion that each order bears to the total of all orders (subject to rounding to "round lot" amounts).

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) will not be deterred from changing a Fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of brokerage commissions paid is evaluated by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that a fund invests in foreign securities, certain of a fund's transactions in those securities may not benefit from the negotiated commission rates available to a fund for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may deem it appropriate for one of its accounts to sell a security while another of its accounts is purchasing the same security. Under such circumstances, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may arrange to have the purchase and sale transactions effected directly between its accounts ("cross transactions"). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

Portfolio securities ordinarily are purchased from and sold to parties acting either as principal or agent. Newly-issued securities ordinarily are purchased directly from the issuer or from an underwriter; other purchases and sales usually are placed with those dealers from which it appears that the best price or execution will be obtained. Usually no brokerage commissions, as such, are paid by the fund for such purchases and sales, although the price paid usually includes an undisclosed compensation to the dealer acting as agent. The prices paid to underwriters of newly-issued securities usually include a concession paid by the issuer to the underwriter, and purchases of after-market securities from dealers ordinarily are executed at a price between the bid and asked price.

When transactions are executed in the over-the-counter market (*i.e.*, with dealers), the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) will typically deal with the primary market makers unless a more favorable price or execution otherwise is obtainable.

Disclosure of Portfolio Holdings. It is the policy of the Fund to protect the confidentiality of the Fund's portfolio holdings and prevent the selective disclosure of non-public information about such holdings. The fund will publicly disclose its holdings in accordance with regulatory requirements, such as periodic portfolio disclosure in filings with the Securities and Exchange Commission. The Fund will publicly disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com. The information will be posted with a one-month lag and will remain accessible until the Fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the Fund will publicly disclose on the website its complete schedule of portfolio holdings as of the end of such quarter.

If the Fund's portfolio holdings are released pursuant to an ongoing arrangement with any party, the Fund must have a legitimate business purpose for doing so, and neither the Fund nor the Manager or its affiliates may receive any compensation in connection with an arrangement to make available information about the Fund's portfolio holdings. The Fund may distribute portfolio holdings to mutual fund evaluation services such as Standard & Poor's, Morningstar or Lipper Analytical Services; due diligence departments of broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds before their public disclosure; and broker-dealers that may be used by the Fund, for the purpose of efficient trading and receipt of relevant research, provided that (a) the recipient does not distribute the portfolio holdings to persons who are likely to use the information for purposes of purchasing or selling Fund shares or Fund portfolio holdings before the portfolio holdings become public information; and (b) the recipient signs a written confidentiality agreement.

The Fund may also disclose any and all portfolio information to its service providers and others who generally need access to such information in the performance of their contractual duties and responsibilities and are subject to duties of confidentiality, including a duty not to trade on nonpublic information, imposed by law and/or contract. These service providers include the Fund's custodians, auditors, investment adviser, administrator, and each of their respective affiliates and advisers.

Disclosure of the Fund's portfolio holdings may be authorized only by the Fund's Chief Compliance Officer, and any exceptions to this policy are reported quarterly to the Fund's Board.

INFORMATION ABOUT THE FUND

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and non-assessable. Fund shares are of one class and have equal

rights as to dividends and in liquidation. Shares have no preemptive, subscription or conversion rights and are freely transferable.

The Fund is organized as an unincorporated business trust under the laws of the Commonwealth of Massachusetts. Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Fund's Agreement and Declaration of Trust ("Trust Agreement") disclaims shareholder liability for acts or obligations of the Fund and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the Fund or a Board member. The Trust Agreement provides for indemnification from the Fund's property for all losses and expenses of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund itself would be unable to meet its obligations, a possibility which management believes is remote. Upon payment of any liability incurred by the Fund, the shareholder paying such liability will be entitled to reimbursement from the general assets of the Fund. The Fund intends to conduct its operations in a way so as to avoid, as far as possible, ultimate liability of the shareholders for liabilities of the Fund.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Fund to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Fund to hold a special meeting of shareholders for purposes of removing a Board member from office. Fund shareholders may remove a Board member by the affirmative vote of two-thirds of the Fund's outstanding voting shares. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing shares of other funds in the Dreyfus Family of Funds. Accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive or abusive trading. In addition, the Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Fund will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Fund will take reasonable steps to prevent excessive short term trading deemed to be harmful to the Fund, it may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

To offset the relatively higher costs of servicing smaller accounts, the Fund will charge regular accounts with balances below \$2,000 an annual fee of \$12. The valuation of accounts and the deductions are expected to take place during the last four months of each year. The fee will be waived for any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000, and will not apply to accounts participating in automatic investment programs or opened through a securities dealer, bank or other financial institution, or to other fiduciary accounts.

The Fund sends annual and semi-annual financial statements to all its shareholders.

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Fund, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Fund's Prospectus.

Ernst & Young LLP, 5 Times Square, New York, New York 10036, an independent registered public accounting firm, have been selected to serve as the independent registered public accounting firm of the Fund.

APPENDIX A

RISK FACTORS — INVESTING IN NEW JERSEY MUNICIPAL BONDS

The following information constitutes only a brief summary, does not purport to be a complete description, and is based on information drawn from official statements relating to securities offerings of the State of New Jersey (the "State") and various local agencies available as of the date of this Statement of Additional Information. While the Fund has not independently verified this information, it has no reason to believe that such information is not correct in all material respects.

General Information

Demographics. New Jersey is the ninth largest state in population and the fifth smallest in land area. With an average of 1,134 persons per square mile, it is the most densely populated of all the states. New Jersey is located at the center of the megalopolis that extends from Boston to Washington D.C., which includes over one-fifth of the nation's population. New Jersey's extensive port developments augment the air, land and water transportation complex that influences much of the State's economy. The State's central location also makes it an attractive location for corporate headquarters and international business offices.

The State's economic base is diversified, consisting of a variety of manufacturing, construction and service industries, supplemented by rural areas with selective commercial agriculture. New Jersey is bordered on the east by the Atlantic Ocean and on the north and northwest by lakes and mountains, providing recreation for both residents and tourists. Since 1976, casino gambling in Atlantic City has been an important State tourist attraction.

New Jersey's population grew rapidly following World War II, but slowed to an annual rate of 0.27% in the 1970's. Between 1980 and 1990, the annual growth rate increased to 0.51%, and to 0.83% in the 1990's and 2000's. While this growth rate is below that of the nation, it compares favorably with other Middle Atlantic states. However, the increase in the State's population since the 1970's masks the redistribution of the population within the State. There has been a significant shift from the northeastern industrial areas towards coastal and central counties within the State. The State's population was 8,414,350 in 2000.

Economic Outlook. New Jersey's economy continues to expand steadily in 2005, with the State adding over 103,200 jobs between March 2003 and September 2005. The generally improving labor market conditions have kept the State's jobless rate below 5% for the sixteenth consecutive month since May 2004. New Jersey's unemployment rate increased slightly to 4.3% in September 2005, but still remains well below the corresponding national rate of 5.1%.

Payroll employment in September 2005 grew at a 1.3% average annual rate, continuing the positive year-to-year growth trend for the eighteenth consecutive month. The level of payroll employment in July 2005 of 4.1 million surpassed the last record level reported in December 2000 for the ninth month in a row. Employment gains were primarily spread across the services sectors, with particularly strong growth in trade, transportation and utilities (10,900 jobs) and professional and business services (10,600 jobs). The State, however, continues to suffer from losses in manufacturing (-7,900 jobs) and downsizing in the telecommunications industry (-3,300 jobs). The total government sector also added 3,000 jobs during this period.

New Jersey and the nation were expected to experience continuing economic momentum through 2005 and 2006. The preliminary growth rate for the State's personal income (6.4%) was above the revised estimates (6.1%), and personal income is expected to grow at a steady pace through 2006. Despite current inflationary pressures due to surges in energy costs, the improving labor market conditions benefit New Jersey consumers and businesses. A low interest rate environment has supported spending on housing, which continues to remain robust, and other consumer durables in the State. Rising interest rates, however, in 2005 are expected to have a moderating influence on interest-sensitive spending in the economy.

The State and the nation may experience further near-term slow growth and the expected pace of economic expansion may stall if consumers, investors, and businesses become more cautious than currently assumed. However, the fundamentals of the State's economic health remain stable and the State's long run prospects for economic growth are favorable.

State Funds and Accounting

The State operates on a fiscal year beginning July 1 and ending June 30. Annual budgets are adopted for the General Fund and certain special revenue funds. The Legislature enacts the annual budget through specific departmental appropriations, the sum of which may not exceed estimated resources. It is a Constitutional requirement that the annual State budget be balanced. Pursuant to the State Constitution, no money may be drawn from the State Treasury except for appropriations made by law. In addition, all monies for the support of State government and all other State purposes, as far as can be reasonably ascertained or predicted, must be provided for in one general appropriation law covering the span of a single fiscal year. No general appropriations law or other law appropriating money for any State purpose may be enacted if the amount of money appropriated, together with all other appropriations for that fiscal year, exceeds the total amount of revenue available (current and anticipated) for such fiscal year, as certified by the Governor.

State Funds.

General Fund. This fund consists of all State revenues, not otherwise restricted by State statute. The largest part of the total financial operations of the State is accounted for in the General Fund. Most revenues received from taxes, most Federal sources, and certain miscellaneous revenue items are recorded in this fund. The Appropriations Act enacted by the Legislature provides the basic framework for the operations of the General Fund.

Property Tax Relief Fund. This fund accounts for revenues from the Gross Income Tax, which are dedicated by the State Constitution. All receipts from taxes levied on personal income of individuals, estates and trusts must be appropriated exclusively for the purpose of reducing or offsetting property taxes. Annual appropriations are made from the fund, pursuant to formulas established by the Legislature, to counties, municipalities and school districts.

State Lottery Fund. Monies derived from the sale of State lottery tickets are deposited into this fund. Disbursements are authorized for the payment of prizes to holders of winning lottery tickets and for the administrative expenses of the Division of State Lottery. Available fund balances are transferred to the State's General Fund in support of the amounts annually

appropriated for State institutions and for education. The present value of obligations for future installment payments of lottery prizes, which are funded by the purchase of deposit fund contracts, are accounted for in this fund. The Lottery is a major source of revenue for State education and institutions. Higher Education programs have received approximately \$4.56 billion in Lottery funds. For elementary and secondary education, the State Department of Education has received approximately \$2.454 billion. State institutions have received a total of \$6.899 billion in Lottery monies.

Special Revenue Funds. These funds account for the resources legally restricted to expenditure for specified purposes. Such purposes must be other than special assessments, private-purpose trusts, or major capital projects. Special Revenue Funds include the Casino Control Fund, the Casino Revenue Fund and the Gubernatorial Elections Fund. Other Special Revenue Funds have been created that are either reported ultimately in the General Fund or are created to hold revenues derived from private sources.

Capital Projects Fund. This fund accounts for financial resources, usually general obligation bonds, to be used for the acquisition or construction of major capital facilities for the State. Such projects may include mental health, educational and correctional facilities and public transportation projects.

Fiduciary Funds. These funds include the Pension Trust Fund, the Investment Trust Fund, the Agency Funds, Private-Purpose Trust Funds and Agency Funds. These funds hold and report financial resources for their respective beneficiaries.

Proprietary Funds. These funds may be used to report any activity for which a fee is charged to external use for goods and services. Activities are required to be reported as enterprise funds if laws or regulations require that the activity's cost of providing services be recovered with fees and charges, rather than with taxes or similar revenues.

Other Revenue Sources.

Federal Aid. Actual Federal aid receipts in the General Fund and Special Transportation Fund for Fiscal Years 2002, 2003 and 2004 amounted to approximately \$7.17 million, \$7.47 billion and \$7.95 billion, respectively. Federal aid receipts in the General Fund and Special Transportation Fund for Fiscal Year 2005 were estimated to be \$8.58 billion. Federal aid receipts in the General Fund and Special Transportation Fund for Fiscal Year 2006 are estimated to be \$9.3 billion.

Atlantic City and Legalized Gambling. Legalized casino gambling was introduced into Atlantic City in 1977. As of July 2003, there are twelve casinos operating in Atlantic City. For the calendar year ended December 31, 2004, the industry reported net income of \$109.5 million compared to net income of \$82.9 million reported for the previous calendar year. For the three months ended March 31, 2005, the industry reported a net loss of \$20 million compared to net income of \$1.9 million for the three-month period ended March 31, 2004. The Casino Revenue Fund funds several programs that assist the elderly and disabled. From May 1978, the date the first casino opened, through May 31, 2005, the industry has paid a total of \$6.4 billion to the State for these programs. As of May 31, 2005, the Casino Revenue Fund earned \$125 million in interest.

State Economy and Finances

Fiscal Year 2004 Summary. For Fiscal Year 2004, State revenues, net of transfers, totaled \$40.2 billion, an increase of \$471.6 million from the prior fiscal year. General taxes totaled \$20.9 billion and accounted for 52.1% of total State revenues. This amount reflects a \$1.6 billion increase from Fiscal Year 2003. The State's gross income tax totaled \$7.3 billion, the sales and use tax totaled \$6.3 billion and the corporation business tax totaled \$2.4 billion. These three taxes comprised 76% of the total general taxes that were collected during Fiscal Year 2004.

Fiscal Year 2004 expenditures totaled \$43.7 billion, an increase of \$1.6 billion from Fiscal Year 2003. The largest increase in expenditures occurred in educational, cultural, and intellectual development areas. Public safety and criminal justice increased \$163.5 million primarily as a result of increased funding in domestic security initiatives. Overall, 48.8% of all State expenditures occurred in the areas of education, higher education and physical and mental health. In Fiscal Year 2004, net assets of business-type activities totaled \$1.7 billion, a \$522.2 million decrease over the prior fiscal year.

The State's governmental funds reported June 30, 2004 balances of \$7.1 billion. Of this amount, \$601.4 million, or 8.5% constituted unreserved undesignated fund balances. For Fiscal Year 2004, the General Fund's fund balance totaled \$2.9 billion, of which, \$1.5 billion represented unreserved fund balances. During Fiscal Year 2004, the total fund balance in the General Fund increased by \$601.9 million. On a budgetary basis, general revenues of \$23.7 billion were \$3 billion lower than the final 2004 budget (the "2004 Budget"). Total expenditures were \$3.3 billion lower than combined appropriations during Fiscal Year 2004. Although general revenues were lower than expected, momentum from the State's economic recovery resulted in General Fund revenues increasing by \$564.8 million over original estimates. During Fiscal Year 2004, \$7.2 billion of property tax relief expenditures were made. The Property Tax Relief Fund's Fiscal Year 2004 ending undesignated fund balance was \$175.2 million. In Fiscal Year 2004, gross revenues for the State Lottery Fund totaled \$2.2 billion, of which 55.6% was returned in prizes, 35.6% went to State education and institutions, 7.8% was paid to sales agents and ticket vendors, and 1% covered Lottery operational and promotional expenses. As of June 30, 2004, the State Lottery, since its inception, has generated over \$34.7 billion in gross revenues, \$17.8 billion in prizes, and contributed \$13.9 billion to the State. The 2004 Budget imposed a new, graduated, supplemental fee on realty transfers, which is payable to the county in which the deed is recorded. A portion of the fee is retained by the county to support public health services with the remainder remitted to the State Treasurer for deposit to the General Fund. The 2004 Budget also inaugurated the State's Hotel/Motel Occupancy Tax. Effective July 1, 2003, the State imposed a 7% fee. For Fiscal Year 2005 and thereafter, a 5% fee is imposed. The legislation establishing the Hotel/Motel Occupancy Tax designates special rate provisions for those municipalities that already impose local taxes or fees on hotel/motel occupancies.

Fiscal Year 2005 Summary. The General Fund ended Fiscal Year 2005 with a fund balance of \$3.2 billion, of which, \$1.7 billion represented unreserved fund balances. During Fiscal Year 2005, the General Fund's total balance increased by \$436.2 million. The State's governmental funds reported a fiscal year-end balance of \$8.2 billion. On a budgetary basis, general revenues of \$25.1 billion were \$2.4 billion lower than the final 2005 Budget. The

negative variances of \$1.5 billion were primarily the result of unearned Federal and other grant revenues, licenses and fees of \$160.9 million and service and assessments of \$217.3 million. During Fiscal Year 2005, State revenues (including transfers) totaled \$45.1 billion, an increase of \$4.9 billion from Fiscal Year 2004. General taxes amounted to \$23.3 billion, which reflects a \$2.4 billion increase from Fiscal Year 2004. Gross income taxes, the sales and use tax and the corporation business tax totaled \$9.5 billion, \$6.5 billion and \$2.4 billion, respectively. These three taxes constituted 78.8% of the State's general taxes collected in Fiscal Year 2005. Approximately 51.6% of the State's total revenue came from general taxes, while 23.3% was derived from charges for services. Operating grants amounted to 20.5% of total revenues, while other items such as government subsidies and grants, capital grants, interest and investment earnings and other miscellaneous revenues accounted for the remainder.

Fiscal Year 2005 expenditures totaled \$48.6 billion, an increase of \$5.2 billion over Fiscal Year 2004. The largest increase in expenditures occurred in the area of government direction, management and control. This increase of \$2.1 billion represented a 34.2% increase over Fiscal Year 2004. Overall, 47.7% of the State's expenditures in Fiscal Year 2005 occurred in the areas of education, higher education and physical and mental health. Total expenditures were \$3.3 billion lower than appropriated throughout Fiscal Year 2005. A major cause of the State's under spending resulted from the historic practice of over appropriating Federal funds, which permits the State to receive the maximum amount of Federal dollars that become available throughout the fiscal year. During Fiscal Year 2005, the State over appropriated \$1.5 billion of Federal funds and other grants, which are now available for use in future years. Other programs that were affected by under spending included physical and mental health (\$708.1 million), economic planning, development and security (\$606.3 million), community development and environmental management (\$581.9 million), government direction, management and control (\$473.3 million) and public safety and criminal justice (\$447.4 million).

During Fiscal Year 2005, the State made \$1.9 billion in expenditures that were supported by the securitization of a portion of cigarette tax revenue and motor vehicle surcharges. Another \$1.4 billion was distributed for school construction. State expenditures covered a range of services, with the largest expenses for educational, cultural and intellectual development (28%), physical and mental health (19.7%) and government direction, management and control (16.6%). During Fiscal Year 2005, governmental activity expenses exceeded program revenues, resulting in the use of \$26 billion general revenues (taxes and transfers).

Fiscal Year 2006 Revenues—Estimates. Total General Fund revenues are expected to be approximately \$17.06 billion in Fiscal Year 2006. Revenues for the Property Tax Relief Fund are estimated to be approximately \$10.275 billion in Fiscal Year 2006. Total revenues, include all other State funds, are forecasted to be approximately \$27.88 billion.

Sales and use tax collections for Fiscal Year 2006 are estimated at \$6.85 billion. Collections of the State's gross income tax for Fiscal Year 2006 are estimated to total \$10.28 billion. A portion of the Fiscal Year 2005 revenue was expected to be derived from legislation that raised the tax rate to 8.97%, from 6.37% for households with annual incomes of \$500,000 or greater. It was estimated that an additional \$1.08 billion will be collected based on this legislation during Fiscal Year 2005. The Fiscal Year 2006 estimate includes \$45 million for the elimination of the exclusion for up to \$20,000 in retirement income for taxpayers with over \$100,000 in income. Corporation business tax collections for Fiscal Year 2006 are estimated to

total \$2.4 billion. The 2005 Budget continued the suspension of the net operating loss deduction at a 50% rate. The Fiscal Year 2006 estimate assumes an increase in estimated net operating loss deductions as the phase-in is completed, and a 7.5% growth in refunds over Fiscal Year 2005.

Estimated receipts from State taxes and revenues, including the three principal taxes set forth above, are forecasts based on the best information available at the time of such forecasts. Changes in economic activity in the State and the nation are difficult to predict and may result in actual collections being more or less than forecasted. In the past when actual revenues have been less than the amount anticipated in the budget, the Governor has exercised his or her plenary powers leading to, among other actions, implementation of a hiring freeze for all State departments and the discontinuation of programs for which appropriations were budgeted but not yet spent.

Fiscal Year 2006 Expenditures--Estimates. The State has made appropriations for principal and interest payments for general obligation bonds for Fiscal Year 2006 in the amount of \$169.3 million. The Fiscal Year 2006 appropriation for debt service reflects the effect of the issuance of general obligation refunding bonds in November 2005. Of the approximately \$28 billion appropriated for Fiscal Year 2006 from the General Fund, the Property Tax Relief Fund, the Casino Control Fund, the Casino Revenue Fund and the Gubernatorial Elections Fund, approximately \$11.4 billion (40.9%) is appropriated for State Aid, \$9.3 billion (33.3%) is appropriated for Grants-in-Aid, \$5.9 billion (21.3%) is appropriated for direct State services, \$169.3 million (0.6%) is appropriated for debt service payments and \$1.1 billion (3.9%) is appropriated for capital construction.

State Aid. State Aid constitutes the largest portion of Fiscal Year 2006 appropriations, with the largest appropriation, in the amount of approximately \$9.36 billion, provided for local elementary and secondary education programs. Of this amount, \$3.1 billion is for core curriculum standards. The Department of Community Affairs ("DCA") planned to receive \$1.03 billion in State Aid for Fiscal Year 2006. Fiscal Year 2006 State Aid appropriations for the Department for Human Services ("DHS") are \$468.6 million and for the Department of the Treasury ("DOT") are \$470 million.

Grants-in-Aid. The second largest appropriation in Fiscal Year 2006 is for Grants-in-Aid, which represent payments to individuals or public or private agencies for benefits to whom a recipient is entitled by law, or for the provision of services on behalf of the State. Fiscal Year 2006 appropriations totaled approximately \$9.3 billion. This amount reflects a reduction of approximately \$1.3 billion from Fiscal Year 2005, which is predominantly due to reduction of the FAIR (Fair and Immediate Relief) program. Included in Fiscal Year 2006 appropriations is \$1.02 billion for DOT, \$4.03 billion for DHS, \$1.59 billion for programs administered by the Department of Health and Senior Services, \$273.7 million for the Department of Transportation, \$914.3 million for State colleges and universities and \$116.7 million for the Department of Corrections.

Direct State Services. The third largest portion of Fiscal Year 2006 appropriations is applied to direct State services, which supports the operation of State government's departments, the Executive Office, several commissions, the Legislature and the Judiciary. In Fiscal Year 2006, appropriations are estimated to aggregate approximately \$5.94 billion.

State Indebtedness

General. As of June 30, 2005, New Jersey's outstanding long-term debt totaled \$38.1 billion, a \$5.5 billion increase over Fiscal Year 2004. In addition, the State has \$6.7 billion of legislatively authorized bonding capacity that has not yet been issued. During Fiscal Year 2005, the legislatively authorized bonding capacity decreased by \$1.7 billion. The State's long-term debt bonded obligations can be broken in the following categories: General Obligation Bonds, Revenue Bonds, Installment Obligations, Certificates of Participation, Tobacco Settlement Financing Corporation, Inc. Bonds, and Unamortized Premium (Net) Bonds.

General Obligation Bonds. The State finances certain capital projects through the sale of general obligation bonds of the State. These bonds are backed by the full faith and credit of the State. Certain State tax revenues and certain other fees are pledged to meet the principal payments, interest payments and redemption premium payments, if any, required to fully pay the bonds. The appropriation for debt service on the State's general obligation bonds was \$444.5 million for Fiscal Year 2005. As of June 30, 2005, the State had \$3.2 billion of general obligation bonds issued and outstanding with another \$742.4 million of bonds authorized, but not yet issued.

In Fiscal Year 2003, the State issued more than \$1.5 billion in general obligation bonds to fund various projects, including school construction, refunding of various general obligation bonds, funding of public and private higher educational institutions, construction of State and municipal community projects and other various voter-approved purposes. Final maturity for these bonds ranges from 2011 to 2027, with semi-annual interest payments commencing for the issued bonds in calendar year 2003. In prior years, the State has refunded various bond issuances by creating separate irrevocable trust funds. Refunding debt has been issued and the proceeds have been used to purchase United States Treasury Obligations--State and Local Government Series that were placed in the trust funds. The investments and fixed earnings from the investments have been sufficient to fully service the defeased debt until the debt is called or matures.

Revenue Bonds. This debt classification represents bond issuances whose segment of debt service is derived solely from legally restricted revenues. Revenue bonds include debt issued by the New Jersey Building Authority, the Garden State Preservation Trust, and the New Jersey Transportation Trust Fund Authority. As of June 30, 2005 the State had \$7.9 billion of revenue bonds outstanding with another \$1.3 billion of bonding authorization remaining for funding various programs.

Installment Obligations. This debt classification represents obligations whose debt service is subject to and dependent upon the Legislature making annual appropriations. Installment obligations include bonds issued to help fund the State's school facilities construction program, and help fund the installation of college and university dormitory fire suppression equipment. The State's installment obligation bonds outstanding as of June 30, 2005 totaled \$15.4 billion. Total authorized but unissued installment obligations equaled \$4.6 billion as of June 30, 2005.

Certificates of Participation. Proceeds from certificates of participation are used primarily to finance State equipment needs under the State's master lease program. Currently, the State uses a line of credit as its preferred financing method. The State's Certificates of Participation outstanding as of June 30, 2005 totaled \$66.1 million.

Unamortized Premium (Net). During Fiscal Year 2005, unamortized premium totaled \$1.2 billion, a \$705.7 million increase from Fiscal Year 2004.. This increase is mainly attributed to the State issuing \$8.8 billion of bonds with associated premium.

Short-Term Debt. The State's short-term note program provides effective cash flow management of imbalances that occur in the timing between collections and disbursements of State revenues and appropriations during the fiscal year. The State Treasurer is authorized to issue short-term debt instruments without it constituting a general obligation of the State, or a debt, or a liability within the meaning of the State Constitution. All short-term notes must be retired within twelve months of their issuance date. During Fiscal Year 2005, the State issued and retired \$1.5 billion in short-term notes.

Tax and Revenue Anticipation Notes. In Fiscal Year 1992, the State initiated a program under which it issued tax and revenue anticipation notes ("TANs") to aid in providing effective cash flow management to fund imbalances that occur in the collection and disbursement of the General Fund and Property Tax Relief Fund revenues. On July 16, 2002, the State issued \$1.9 billion of TANs, which matured on June 12, 2003. The State issued \$1.5 billion of TANs on September 25, 2003, \$400 million on January 23, 2004, and \$2 billion on August 3, 2005. The TANs were payable on June 23, 2006. The State has authorized the issuance of up to \$3.1 billion of TANs for Fiscal Year 2006. Such tax and revenue anticipation notes do not constitute a general obligation of the State or a debt or liability within the meaning of the State Constitution. Such notes constitute special obligations of the State payable solely from monies on deposit in the General Fund and the Property Tax Relief Fund and legally available for such payment.

The Port Authority. The Port Authority is a municipal corporate instrumentality of the States of New York and New Jersey created by compact between the two states in 1921 with the consent of the Congress of the United States. It is authorized and directed to plan, develop and operate terminals and other facilities of transportation and commerce, and to advance projects in the general fields of transportation, economic development and world trade that contribute to promoting and protecting the commerce and economy of the Port District, defined in the compact, which comprises an area of about 1,500 square miles in both states, centering around New York Harbor. The Governor of each State appoints six of the twelve members of the governing Board of Commissioners, subject to confirmation by the respective State Senate. The commissioners serve six-year overlapping terms as public officials without compensation. They establish Authority policy, appoint an Executive Director to implement it, and also appoint a General Counsel to act as legal advisor to the Board and to the Executive Director. The Authority undertakes only those projects authorized by the two states. Each Governor has from time to time exercised the statutory power to veto the actions of the commissioners from their state.

The compact envisions the Port Authority as being financially self-sustaining and, as such, it must obtain the funds necessary for the construction or acquisition of facilities upon the basis of its own credit, its reserve funds, and its future revenues. The agency has neither the

power to pledge the credit of either state or any municipality nor to levy taxes or assessments. Except for Special Project Bonds, the Authority's debt is secured by its full faith and credit, its reserve funds, or a pledge of future revenues. Special Project Bonds are secured by a mortgage on the financed properties.

Tobacco Settlement Financing Corporation, Inc. In November, 1998 the State entered into a master settlement agreement (the "MSA") with participating cigarette manufacturers, 46 states, and six other United States jurisdictions in the settlement of certain smoking-related litigation. During Fiscal Year 2003, the State sold to the newly established Tobacco Settlement Financing Corporation, Inc. ("TSFC"), the State's right, title, and beneficial ownership interest in the State's right to receive tobacco settlement payments under the MSA. In return, TSFC issued \$3.5 billion of bonds to pay for the tobacco settlement rights. Proceeds were used to fund General Fund expenditures during Fiscal Year 2003 and Fiscal Year 2004. Pursuant to accounting regulations, TSFC's debt is reflected as a part of the State's debt. After taking into account its bond discount, TSFC had \$3.3 billion of bonds outstanding at the end of Fiscal Year 2005.

Ratings. As of July 19, 2005, the State's short-term credit ratings were SP-1+ (Standard & Poor's Ratings Group), MIG 1 (Moody's Investors Services) and F1+ (Fitch Investors Services). The State's long-term credit ratings were AA (Standard & Poor's Ratings Group), Aa3 (Moody's Investors Services) and AA- (Fitch Investors Services).

Litigation

The following are cases presently pending or threatened in which the State has the potential for either a significant loss of revenue or a significant unanticipated expenditure. At any given time, there are various numbers of claims and cases pending against the State, State agencies and employees, seeking recovery of monetary damages that are primarily paid out of the fund created pursuant to the New Jersey Tort Claims Act. The State does not formally estimate its reserve representing potential exposure for these claims and cases. At any given time there are also various numbers of claims seeking monetary damages or other relief, which, if granted, would require the expenditure of funds. The State is unable to estimate its exposure for these claims and cases.

Buena Regional Commercial Township et al. v. New Jersey Department of Education et al. This lawsuit was filed on December 9, 1997 on behalf of 17 rural school districts seeking the same type of relief as has been mandated to be provided to the poor urban school districts in *Abbott v. Burke*, which included, without limitation, sufficient funds to allow the school districts to spend at the average of wealthy suburban school districts, to implement additional programs such as full-day kindergarten, half-day preschool programs for three and four year olds, technology, alternative school, accountability and school-to-work and college transition programs, and to upgrade school facilities. The *Buena* school districts are seeking to be treated as special needs districts and to receive parity funding with the *Abbott* school districts as a remedial measure. They also are seeking additional funding as may be necessary to provide an education equivalent to that being provided in the *Abbott* districts. On September 26, 2002, the Administrative Law Judge (the "ALJ") issued an Initial Decision, finding that five of the 17 petitioning school districts were unable to provide a thorough and efficient education to their

students. As a remedy, the ALJ recommended full "Abbott" funding for these five districts. On November 9, 2002, the parties submitted written exceptions to the Initial Decision. Of the 12 districts that were unsuccessful in demonstrating a failure to provide a thorough and efficient education to their students and therefore no remedy was proposed by the ALJ, only six filed exceptions that the ALJ was incorrect as to them.

On February 10, 2003, following a review of the Initial Decision, exceptions and record, the Commissioner of Education (the "Commissioner") adopted in part and rejected in part the Initial Decision. The Commissioner directed the respective County Superintendents to undertake thorough reviews of each of their districts' 2003 and 2004 budgets to determine their sufficiency to provide a thorough and efficient education to their students. On March 6, 2003, 10 districts appealed the Commissioner's decision to the State Board of Education. On July 2, 2003, two of the 10 districts withdrew their appeals. On December 3, 2003, the State filed a brief with the State Board of Education urging that the Commissioner's decision be upheld.

On July 15, 2005, the Legal Committee of the State Board of Education ("Legal Committee") issued a report (the "Initial Report") to the parties. The Initial Report found that the current methods of funding school districts in the State are ineffective and cause disparities. Moreover, the Initial Report found that the appealing school districts and those school districts in this litigation, which did not pursue an appeal, were entitled to relief. The Initial Report directed the Commissioner to undertake a Statewide study of components necessary for a thorough and efficient education and for the Commissioner to conduct individual school district needs assessments for all of the original school districts in this litigation. The Department of Education (the "DOE") filed exceptions to the Initial Report on July 25, 2005. On September 26, 2005, the DOE received a revised report from the Legal Committee, which came virtually to the same conclusions as the Initial Report. The Department has filed exceptions to the revised report and the State intends to continue to vigorously defend this matter.

Abbott V Appeals. Abbott districts, in furtherance of the Court's decision in *Abbott v. Burke* ("*Abbott V*") and DOE regulations, have developed operational plans for the provision of early childhood programs. To date, only one of the original districts that filed petitions for the 1999-2000 school year remains active. Additionally, the Education Law Center (the "ELC") filed petitions for the 1999-2000 school year on behalf of students in each of the three State-operated school districts of Newark, Jersey City and Paterson, and on behalf of the students of West New York arising from the 1999 early childhood departmental decisions. By decisions dated August 20 and November 8, 2001, the matters brought by the ELC were dismissed for mootness, administrative reasons and failure to comply with an order of a judge. Six districts also filed appeals with the Commissioner, which were later transferred to the Office of Administrative Law (the "OAL") and subsequently resolved.

On March 7, 2000 the Supreme Court issued its decision clarifying the requirements of *Abbott V* as to early childhood education and requiring licensed community providers to serve Abbott preschool children with a preschool program meeting DOE standards. On June 1, 2001, after resolving a number of appeals by Abbott districts seeking additional aid for early childhood programs for the 2000-01 school year, a final OAL decision was rendered on the early childhood "global issues". The State is facilitating the expedition of the remaining early childhood appeal from 1999-2000 in the OAL and will vigorously defend DOE's actions.

2001-2002 Abbott District Appeals. Several Abbott districts filed administrative petitions of appeal to the Commissioner of Education regarding departmental decisions rendered on approved programs and funding for the 2001-2002 school year. Four districts asked that their programs be approved as originally requested, and such requests were amicably resolved or dismissed. Eleven districts filed petitions of appeal on DOE decisions awarding additional State aid, seeking over \$353 million in addition to the aid previously awarded. The ELC filed petitions challenging the decisions and non-decisions of the DOE in this regard on behalf of students in the 30 Abbott districts. Generally, the ELC takes issue with the DOE's process and decisions regarding additional Abbott v. Burke State aid. On August 24, 2001, the State filed a motion for summary decision in lieu of answer and will continue to vigorously defend this appeal.

Carteret, et. Al. v. New Jersey Department of Education. In July 2004, the Carteret school district filed a petition with the Commissioner claiming that the statutory funding formula, the Comprehensive Educational Improvement and Financing Act ("CEIFA"), is unconstitutional as applied to the district because it is alleged that the district cannot raise its local tax levy. In 1994, the district initially sought a judicial determination that it should be accorded *Abbott* status. The complaint was dismissed on various grounds including failure to exhaust administrative remedies. In the current matter, the district restated its case to clarify that it is seeking determinations that (i) CEIFA is unconstitutional as applied, and (ii) that Carteret is entitled to the same type of relief as has been mandated to be provided to the poor urban school districts in *Abbott v. Burke*, which includes, without limitation, sufficient funds to allow the school district to spend at the average of wealthy suburban school districts, to implement additional programs such as full-day kindergarten, half-day preschool programs for three and four year olds, technology, alternative school, accountability and school-to-work and college transition programs, and to upgrade school districts. Much like the *Buena* school districts, Carteret now seeks to be treated as a special needs district and to receive parity funding with the *Abbott* school districts. The matter was transmitted to the OAL for decision on the motion to consolidate and motion to amend the petition. On August 30, 2005, the ALJ granted the DOE's motion to dismiss the Mayor of the Borough of Carteret, in his official and individual capacities, and the Borough of Carteret filed exceptions to the ALJ's August 30, 2005 decision. The Department filed reply exceptions on October 3, 2005. The State intends to vigorously defend this matter.

Medford Township Board of Education et al. v. New Jersey Department of Education. A petition of appeal was filed with the Commissioner on or about May 4, 2005, on behalf of the Medford Township Board of Education, the Evesham Township Board of Education, the Lenape Regional High School District, the Hainesport Township Board of Education (collectively, the "Districts"), the Medford Township Council and the Evesham Township Council (together, the "Townships") against the DOE. The petition alleges that (i) State aid has not increased in the Districts despite the Districts' increases in student enrollment and this failure to increase aid is contrary to the formula established under CEIFA; (ii) the failure to increase State aid has resulted in the Districts being "negatively impacted" in their ability to provide their students with a thorough and efficient education as required by the State Constitution; and (iii) the Townships will have to restore money to the Districts' budgets if the Districts' budgets are not increased through State aid for the 2003-2004 school year.

The DOE filed a motion to dismiss on June 3, 2005, arguing that: (1) the petition of appeal requesting additional State aid for the 2003-2004 school year was out of time; (2) the Commissioner did not have the authority to provide additional State aid for the 2003-2004 school year; (3) the Townships did not have standing to raise the State aid claims; and (4) even if the Townships did have standing, the claims regarding the Townships are moot as the Districts' budgets passed. The petition was amended on June 6, 2005, to include additional petitioners. Also, the petitioners amended their petition to request an increase in State aid for the 2005-2006 school year and to withdraw their request for an increase in State aid for the 2003-2004 school year. The State intends to vigorously defend this matter.

United Hospitals et al. v. State of New Jersey and William Waldman et al. There are several matters involving approximately 40 hospitals challenging Medicaid hospital inpatient reimbursement rates for rate years 1995 through 2001. The appellate court has remanded some of these matters to the Division of Medical Assistance and Health Services to make further findings, which has been further remanded to the OAL. Some of the hospitals also have filed a notice of appeal. United Hospitals, the lead plaintiff, is in bankruptcy and this case has been settled so far as United Hospitals is concerned. The State intends to vigorously defend these matters.

New Jersey Protection and Advocacy, Inc. v. James Davy (I). Plaintiff, a non-profit agency designated as New Jersey's protection and advocacy organization ("NJP&A") filed this action on April 5, 2005, and subsequently amended its complaint to remove its state law claims. The suit alleges that the DHS is in violation of the due process provisions of the United States Constitution. NJP&A is seeking prospective injunctive relief, specifically an order requiring DHS to promptly take all necessary steps to enable patients in State psychiatric hospitals on Conditional Extension Pending Placement ("CEPP") status to receive services in the most integrated setting appropriate to their needs; monetary penalties, specifically that DHS pay a *per diem* penalty of \$60 to individuals who remain on CEPP status for longer than 60 days; prevailing party costs, disbursements and attorneys' fees; and an injunction requiring DHS to report to NJP&A on the number and names of CEPP patients and other information as NJP&A may require, on an ongoing basis. The State filed a motion to dismiss the complaint. In its opposition to the motion, NJP&A agreed to strike the portion of the complaint in which it requested a *per diem* penalty of \$60 to individuals who remain on CEPP status for longer than 60 days. The remainder of the motion to dismiss was denied by the court on September 30, 2005. The State filed its answer denying liability on all claims asserted by NJP&A on October 13, 2005. At this time, the State estimates its exposure for these claims to be in excess of \$20 million per year in increased costs for community placements. The State intends to vigorously defend this matter.

New Jersey Protection and Advocacy, Inc. et al. v. James Davy (II). NJP&A and two clients of the DHS filed this action on September 29, 2005. NJP&A alleges that DHS is in violation of the Americans With Disabilities Act, the Rehabilitation Act and the Medicaid Act. Plaintiffs are seeking declaratory and prospective injunctive relief, attorneys fees, litigation expenses and other relief. More specifically, the Plaintiffs seek community placements for the people that Plaintiffs allege are in State-operated developmental centers while awaiting community placement. The State intends to vigorously defend this matter.

East Cape May Associates v. New Jersey Department of Environmental Protection. This matter is a regulatory taking case in which the plaintiff claims that it is entitled to in excess of \$28 million in damages for a taking of its property without just compensation. The property is approximately 80 acres of freshwater wetlands, where the Department of Environmental Protection (the "DEP") denied an application for 366 single-family homes. On July 25, 2001, the appellate court held that before DEP could approve limited development to prevent its action from constituting a taking it was required to adopt protective rules for the planned development. Upon remand to the trial court, DEP promulgated regulations under the Freshwater Wetlands Protections Act, which took effect on January 22, 2002, and is now in the process of implementing those rules. In July 2003, the trial judge referred the case to mediation. On February 17, 2005, the assigned mediator advised the court that mediation had concluded without agreement. However, informal settlement discussions continue and no trial date has been set. The State is continuing to vigorously defend this matter.

Southern New Jersey Light Rail Group v. New Jersey Transit Corporation. On July 31, 2002, New Jersey Transit Corporation's contractor for the construction of the Southern New Jersey Light Rail Transit Project filed suit alleging over \$125 million in damages and claims on the project. The contractor, Southern New Jersey Rail Group (a consortium of Bechtel Infrastructure and Bombardier), alleges breach of contract, breach of the covenant of good faith and fair dealing, equitable adjustment, unjust enrichment, and negligent misrepresentation resulting from alleged delays caused by New Jersey Transit and changes in the contract work for which the plaintiff alleges it is entitled to be compensated. The State intends to vigorously defend this matter.

Robert William Moss v. John E. McCormac, Treasurer, State of New Jersey. Plaintiff filed an action in superior court alleging that the Legislature's appropriation of bond proceeds to be used to pay interest on certain bonds was unconstitutional. Plaintiff seeks a declaration that the appropriation is unconstitutional and seeks an order directing the Treasurer to restore any money charged against the bond proceeds. On December 6, 2002, the court dismissed plaintiff's complaint with prejudice for failure to state a claim upon which relief can be granted and for lack of subject matter jurisdiction, and executed an appropriate dismissal order. Plaintiff's time for filing an appeal on this matter has run. On January 9, 2003, plaintiff filed a new complaint, naming the State as defendant and demanding the same relief as in that prior matter. Plaintiff's new complaint also contains an additional allegation that the Legislative fiscal estimate for the appropriation falsely stated that the charge against the bond funds was permitted under the bond acts. On January 31, 2003, plaintiff filed a motion to add the Treasurer as a named party and a motion for summary judgment. On April 25, 2003, the court entered an order dismissing the plaintiff's second complaint with prejudice for failure to state a claim upon which relief can be granted. On May 20, 2003, plaintiff appealed the decision. The matter has been fully briefed, but oral argument has not yet been scheduled.

New Jersey Education Association et al. v. State of New Jersey et al. Plaintiffs' complaint alleges that the State violated various State constitutional provisions, statutes and common law by failing to fund the Teachers' Pension and Annuity Fund ("TPAF") in the amount and manner prescribed by law while increasing the contribution paid by employees who participate in the fund from 3% to 5%. In their complaint, plaintiffs ask that the defendants be directed to make a payment into the TPAF in the approximate amount of \$484 million, or in the alternative, that the employees' contribution be maintained at 3% and not increased. In addition, plaintiffs are seeking attorney's fees, disbursements and costs.

On April 28, 2004, the State moved to dismiss the complaint for failure to state a claim upon which relief can be granted. On July 15, 2004, the court granted the State's motion to dismiss as to claims of violation of the constitutional principles of uniformity and fairness in taxation, violation of the Internal Revenue Code of 1986, as amended, and breach of promissory estoppel. The court denied the State's motion on the other claims. On or about June 28, 2004, the plaintiffs had filed an amended complaint, which included allegations of underfunding the TPAF for Fiscal Year 2005. On November 23, 2004, the State moved to dismiss the amended complaint, which motion was denied. The State then moved for leave to appeal to the Appellate Division seeking review of the court's denial of the State's motion to dismiss. On January 13, 2005, the Appellate Division denied the State's motion. On February 2, 2005, the State moved for leave to appeal to the State Supreme Court. By order dated September 12, 2005, the Supreme Court denied the State's motion for leave to appeal. As a result, this matter will be returned to the trial court for further proceedings. The State intends to vigorously defend this matter.

Professional Firefighters Association of New Jersey at al. v. State of New Jersey et al. This matter was filed on October 4, 2005. The Plaintiffs' complaint alleges that the State violated various U.S. and State constitutional provisions, statutes and common law by failing to adequately fund the Police and Firemen's Retirement System ("PFRS") for Fiscal Years 2004 and 2005. The Plaintiffs also challenge the constitutionality of reductions in PFRS contributions required of local employers for Fiscal Years 2004-07. The State intends to vigorously defend this matter.

AMEC Civil, LLC v. State of New Jersey, Department of Transportation. Plaintiff alleges that the Department of Transportation breached a construction contract through, among other claims, work limitations, design defects, failure to disclose access problems and the obtainment of permits. The claims were originally filed in three separate complaints in 2003 and 2004. On December 15, 2004, all outstanding claims were consolidated into one complaint. Discovery in the consolidated matter is ongoing. The State intends to vigorously defend this matter.

K.J., T.J. and M.J. v. Division of Youth and Family Services. et al. The minor plaintiffs filed a complaint on May 26, 2004 against the Division of Youth and Family Services ("DYFS"), the State and various employees and directors of DYFS, alleging they were starved while in the custody of foster and/or adoptive parents and that DYFS should have been aware of the abuse, thus constituting violations of their substantive and procedural due process rights under the U.S. and State Constitutions and violations of State child welfare laws. A settlement agreement was signed by the parties and filed with the trial court on October 3, 2005 for a total of \$12.5 million. The hearing before the court to approve the settlement was scheduled for November 16, 2005.

DeCamp Bus Lines v. New Jersey Transit Corporation ("NJ Transit"). On October 13, 2004, the plaintiff filed a complaint against NJ Transit alleging claims of inverse takings, destructive competition and other damage-based claims. On January 25, 2005, the trial court dismissed all counts except the inverse condemnation claim. The State intends to vigorously defend this matter.

Horizon Blue Cross/Blue Shield of New Jersey v. The State of New Jersey, et al. The Plaintiff has filed a complaint seeking a declaration that recent State legislation removing the

availability of insurance premiums tax "cap" for health services corporations is unconstitutional under various provisions of the U.S. and New Jersey Constitutions, and to enjoin the State from collecting the insurance premiums tax. On October 28, 2005, the trial court granted the State's motion to transfer the matter to the Tax Court. The State intends to vigorously defend this matter.

Lance et al. v. Codey et al. On August 4, 2005, two State legislators filed a complaint alleging that the 2006 Budget violated the State Constitution because it anticipates \$150 million in revenues from the sales of tobacco-settlement bonds to be issued by the TSFC. The complaint seeks to enjoin the issuance of such bonds and the spending of any proceeds from such bonds. On August 12, 2005, the court enjoined the issuance of such bonds in excess of the amount necessary to effect the refunding of tobacco-settlement bonds issued in 2003, and enjoined the transfer of such proceeds to the State. The State and the TSFC filed a notice to appeal on September 25, 2005. The State and the TSFC intends to vigorously defend this matter.

APPENDIX B

Rating Categories

Description of certain ratings assigned by S&P, Moody's and Fitch:

S&P

Long-term

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A subordinated debt or preferred stock obligation rated 'C' is currently highly vulnerable to nonpayment. The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action taken, but payments on this obligation are being continued. A 'C' also will be assigned to a preferred stock issue in arrears on dividends or sinking fund payments, but that is currently paying.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

r

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

N.R.

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.

Short-term

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus sign (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

Commercial paper**A-1**

This designation indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

Moody's**Long-term****Aaa**

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

A

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B

Bonds rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa

Bonds rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca

Bonds rated 'Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C

Bonds rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

MIG/VMIG—U.S. short-term

Municipal debt issuance ratings are designated as Moody's Investment Grade (MIG) and are divided into three levels—MIG 1 through MIG 3.

The short-term rating assigned to the demand feature of variable rate demand obligations (VRDOs) is designated as VMIG. When either the long- or short-term aspect of a VRDO is not rated, that piece is designated NR, e.g., Aaa/NR or NR/VMIG 1.

MIG 1/VMIG1

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2/VMIG 2

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3/VMIG 3

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Fitch

Long-term investment grade

AAA

Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA

Very high credit quality. 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. 'BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Long-term speculative grade

BB

Speculative. 'BB' ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B

Highly speculative. 'B' ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. 'CC' ratings indicate that default of some kind appears probable. 'C' ratings signal imminent default.

DDD, DD, D

Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. 'DDD' obligations have the highest potential for recovery, around 90% - 100% of outstanding amounts and accrued interest. 'DD' ratings indicate potential recoveries in the range of 50% - 90% and 'D' the lowest recovery potential, i.e., below 50%.

Entities rated in this category have defaulted on some or all of their obligations. Entities rated 'DDD' have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated 'DD' and 'D' are generally undergoing a formal reorganization or liquidation process; those rated 'DD' are likely to satisfy a higher portion of their outstanding obligations, while entities rated 'D' have a poor prospect of repaying all obligations.

Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

'NR' indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' long-term rating category, to categories below 'CCC', or to short-term ratings other than 'F1.'
