

2022 ANNUAL REPORT

To Our Shareholders,

As we reflect on the past year, we are pleased to report that The Cheesecake Factory has once again demonstrated its resilience and ability to adapt to a dynamic operating environment. 2022 marked another year of evolution and growth for our company thanks to the hard work and dedication of our staff members and the enduring appeal of our concepts. We further reinforced our position as a leader in experiential dining through our ongoing commitment to delivering exceptional guest experiences and driving growth across our diverse portfolio of high-quality concepts.

In 2022 we were also especially proud to celebrate a significant milestone in our company's history, the 50th anniversary of our bakery. This achievement showcases the rich history and expansion of this business from a small bakery opened in 1972 by Oscar and Evelyn Overton to the two vertically integrated bakery facilities that produce over 60 award-winning desserts and baked goods to be sold in over 20 countries. A distinct competitive advantage we will continue to leverage, our signature desserts and high-quality cheesecakes are an essential element of the strong affinity for The Cheesecake Factory brand as illustrated by our industry-leading dessert sales of 17% for fiscal 2022.

As we continue our journey further into this new decade, we will leverage our fundamental strengths – our relentless focus on menu innovation, service, hospitality and operational excellence – to navigate the evolving landscape and drive growth. These pillars form the foundation of our success and have made The Cheesecake Factory one of the most differentiated restaurant concepts in the casual dining industry for over 45 years and through numerous economic cycles.

Our success is due in no small part to our incredible team of dedicated staff members, who share our passion for delivering excellent hospitality and creating delicious, memorable experiences for our guests. Our 46,000 restaurant staff members operate 318 restaurants, including our flagship concept, The Cheesecake Factory, North Italia, and Fox Restaurant Concepts (FRC), supported by our nearly 1,500 staff members in our corporate office, FRC headquarters and our two bakery facilities.

As a testament to our strong culture and commitment to our employees, we are honored to have been named to the Fortune magazine "100 Best Companies to Work For" list for the tenth consecutive year and the PEOPLE Companies that Care® list for a second year. We are proud to stand out as the only restaurant company to have made the Fortune 100 list for ten straight years, which provides a powerful recruiting advantage amidst a competitive labor backdrop and highlights the industry-leading training and career advancement opportunities we provide our staff members. These accolades along with our commitment to fostering a diverse and inclusive workplace support our belief that we are uniquely well-positioned with respect to attracting and retaining talent in the restaurant industry as we continue to remain an employer of choice in a tight labor market.

Our commitment to delivering distinct, high quality dining experiences and exceptional hospitality remains at the core of our strategy, as we remain focused on the long-term drivers of success that have made us a leader in casual dining. In terms of financial performance, we accomplished the majority of our key financial objectives for 2022. We attribute this primarily to the strength of our brands, our belief that we have the best operators in the business, and our strategic approach to managing our business for long-term growth while effectively managing through headwinds.

In 2022, we achieved record annual revenue of \$3.3 billion, driven by comparable sales growth and a total of 13 new restaurant openings across our portfolio, highlighting the strength of our concepts and our ability to gain market share. Further to this point, year-over-year sales increased 10% at The Cheesecake Factory restaurants, 33% at North Italia and 30% at FRC excluding Flower Child. Notably, our average unit volumes for The Cheesecake Factory restaurants exceeded \$12 million, with strong contributions from the off-premise channel which continued to be a key driver of growth, accounting for 25% of total sales in 2022. Note fiscal year 2022 consisted of 53 weeks and fiscal year 2021 consisted of 52 weeks.

Despite the challenging operating environment, we generated nearly \$160 million in cash flow from operations for the year. Our strong financial position has enabled us to accelerate our new unit development and return \$105 million to our

shareholders through a combination of dividends and share repurchases. We believe our solid liquidity position along with our expected cash flow levels will support our long-term growth objectives as well as our capital shareholder return programs.

In 2023, we are planning to open as many as 20 to 22 new restaurants, including five to six The Cheesecake Factory restaurants, five to six North Italia restaurants, and as many as ten other FRC restaurants, including three to four Flower Child locations. We also expect to open two to three international locations under licensing agreements and continue exploring additional opportunities for international expansion, building on the success of our existing licensing agreements.

Longer-term, we believe our portfolio of differentiated, high quality concepts, combined with our strong financial position, will support sustained unit growth and diversification in the coming years. Our target for long-term annual unit growth is 7%, which we believe will place us among the top performers in the casual dining industry. Our concepts deliver some of the most compelling unit economics in the industry and position us to drive significant accretive growth over time. It is our continued belief that with the strength of our restaurant concepts, operations teams and balance sheet, we are well positioned to provide our guests with exceptional dining experiences and drive long-term value for our shareholders. We feel confident we are poised to take advantage of our increased scale to deliver meaningful earnings growth and generate robust cash flows going into 2023.

In closing, I would like to express my heartfelt appreciation to our talented team members, who continue to deliver exceptional experiences to our guests. To our shareholders, restaurant guests, bakery customers, suppliers and international partners, we thank you for your unwavering support and partnership. Your confidence in our brands and our team fuels our passion for excellence and innovation. We look forward to accomplishing our goals together and continuously striving for excellence as a leader in experiential dining in the years to come. As we move forward, we will continue to embrace change, adapt to evolving market conditions and pursue opportunities to drive profitable, sustainable growth and enhance shareholder value. We enter 2023 with optimism and a clear vision for the future, confident that our diverse, talented team and strong financial foundation can propel us to new heights.

Best regards,

A handwritten signature in black ink, consisting of a series of overlapping, curved strokes that form a cursive name.

PART I

Forward-Looking Statements

Certain information included in this Form 10-K and other materials we have filed or may file with the Securities and Exchange Commission (“SEC”), as well as information included in our oral or written statements, may contain forward-looking statements about our current and presently expected performance trends, growth plans, business goals and other matters.

These statements may be contained in our filings with the SEC, in our press releases, in other written communications, and in oral statements made by or with the approval of one of our authorized officers. These statements are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, as codified in Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (together with the Securities Act, the “Acts”). This includes, without limitation, statements regarding corporate social responsibility (“CSR”) and in our CSR report, the effects of the COVID-19 pandemic and other geopolitical and macroeconomic factors on our financial condition and our results of operations, financial guidance and projections as well as expectations of our future financial condition, results of operations, sales, target growth rates, cash flows, corporate strategy, plans, targets, goals, objectives, performance, growth potential, competitive position and business, and statements regarding our ability to: leverage our competitive strengths, including developing, investing in or acquiring new restaurant concepts and expanding The Cheesecake Factory® brand to other retail opportunities; maintain our aggregate sales volumes; deliver comparable sales growth; provide a differentiated experience to customers; outperform the casual dining industry and increase our market share; leverage sales increases and manage flow through; manage cost pressures, including increasing wage rates, insurance costs and legal expenses, and stabilize margins; grow earnings; remain relevant to consumers; attract and retain qualified management and other staff; manage risks associated with the magnitude and complexity of regulations in the jurisdictions where our restaurants are located; increase shareholder value; find suitable sites and manage increasing construction costs; profitably expand our concepts domestically and in Canada, and work with our licensees to expand our concept internationally; support the growth of North Italia and other FRC restaurants; and utilize our capital effectively. These forward-looking statements may be affected by various factors including: the COVID-19 pandemic and related containment measures, including the potential for quarantines or restrictions on in-person dining; supply chain disruptions; demonstrations, political unrest, potential damage to or closure of our restaurants and potential reputational damage to us or any of our brands; economic, public health and political conditions that impact consumer confidence and spending, including rising interest rates, periods of heightened inflation and market instability, of the COVID-19 pandemic and other health epidemics or pandemics, and armed conflicts; acceptance and success of The Cheesecake Factory in international markets; acceptance and success of North Italia and the FRC concepts; the risks of doing business abroad through Company-owned restaurants and/or licensees; foreign exchange rates, tariffs and cross border taxation; changes in unemployment rates; changes in laws impacting our business, including laws and regulations related to COVID-19 impacting restaurant operations and customer access to off- and on-premises dining; increases in minimum wages and benefit costs; the economic health of our landlords and other tenants in retail centers in which our restaurants are located, and our ability to successfully manage our lease arrangements with landlords; the economic health of suppliers, licensees, vendors and other third parties providing goods or services to us; the timing of our new unit development; compliance with debt covenants; strategic capital allocation decisions including with respect to share repurchases or dividends; the ability to achieve projected financial results; economic and political conditions that impact consumer confidence and spending; the resolution of uncertain tax positions with the Internal Revenue Service and the impact of tax reform legislation; adverse weather conditions in regions in which our restaurants are located; factors that are under the control of government agencies, landlords and other third parties; the risks, costs and uncertainties associated with opening new restaurants; and other risks and uncertainties detailed from time to time in our filings with the SEC. Such forward-looking statements include all other statements that are not historical facts, as well as statements that are preceded by, followed by or that include words or phrases such as “believe,” “plan,” “will likely result,” “expect,” “intend,” “will continue,” “is anticipated,” “estimate,” “project,” “may,” “could,” “would,” “should” and similar expressions. These statements are based on our current expectations and involve risks and uncertainties which may cause results to differ materially from those set forth in such statements.

In connection with the “safe harbor” provisions of the Acts, we have identified and are disclosing important factors, risks and uncertainties that could cause our actual results to differ materially from those projected in forward-looking statements made by us, or on our behalf. (See Item 1A — Risk Factors.) These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the SEC. Because of these factors, risks and uncertainties, we caution against placing undue reliance on forward-looking statements. Although we believe that the assumptions underlying forward-looking statements are currently reasonable, any of the assumptions could be incorrect or incomplete, and there can be no assurance that forward-looking statements will prove to be accurate. Forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to publicly update or revise any forward-looking statements or to make any other forward-looking statements, whether as a result of new information, future events or otherwise, unless required to do so by law.

Summary Risk Factors

Our business is subject to a number of risks and uncertainties. These risks are more fully described in the section titled “Risk Factors” included in Part I, Item 1A of this report. These risks include, among others, the following:

- The COVID-19 pandemic significantly disrupted our business and its ongoing effects and other geopolitical macroeconomic events are having and may continue to have an adverse impact on our operating environment.
- The impact global and domestic economic conditions have on consumer discretionary spending could materially adversely affect our financial performance.
- Our inability to grow comparable restaurant sales could materially adversely affect our financial performance.
- If we are unable to protect our reputation, the value of our brands and sales at our restaurants may be negatively impacted.
- If we are unable to offset higher labor costs, our cost of doing business will significantly increase.
- Pandemics, epidemics, endemics and other public health emergencies, or food safety and food-borne illness could reduce customer traffic to our restaurants, disrupt our food supply chain or cause us to be the target of litigation.
- Changes in, or any failure to comply with, applicable laws or regulations could materially adversely affect our ability to operate our restaurants and/or increase our cost to do so.
- Our inability to respond appropriately to changes in consumer health and disclosure regulations, and to adapt to evolving consumer dining preferences, could negatively impact our operations and competitive position.
- Labor organizing could harm our operations and competitive position in the restaurant industry.
- Adverse weather conditions, natural disasters and public health emergencies, including as a result of climate change, could unfavorably impact our restaurant sales.
- Acts of violence at or threatened against our restaurants or the centers in which they are located, including civil unrest, customer intimidation, active shooter situations and terrorism, could unfavorably impact our restaurant sales.
- Our inability to anticipate and react effectively to changes in the costs of key operating resources may increase our cost of doing business.
- Our financial performance could be materially adversely affected if we fail to retain, or effectively respond to a loss of, key executives.
- If we are unable to staff and retain qualified restaurant management and operating personnel in an increasingly competitive market, we may be unable to effectively operate and grow our business and revenues.
- If any of our third-party vendors experiences a failure that affects a significant aspect of our business, we may experience data loss, increased costs or other harm.
- Our failure to realize the anticipated benefits of our acquisition of North Italia and the remaining business of Fox Restaurant Concepts LLC could materially adversely affect our financial performance.
- We may incur additional costs if we are unable to renew our restaurant leases on similar terms and conditions, or at all, or to relocate our restaurants in certain trade areas.
- Information technology system failures or breaches of our network security could interrupt our operations and subject us to increased operating costs, as well as to litigation and other liabilities.

- Our inability to maintain a secure environment for customers' and staff members' personal data could result in liability and harm our reputation.
- Our failure to satisfy financial covenants and/or repayment requirements under our credit facility could harm our financial condition.
- Our convertible senior notes due 2026 and the incurrence of any additional indebtedness could limit the cash flow available for our operations.

ITEM 1. BUSINESS

General

The Cheesecake Factory Incorporated is a leader in experiential dining. We are culinary forward and relentlessly focused on hospitality. We currently own and operate 318 restaurants throughout the United States and Canada under brands including The Cheesecake Factory®, North Italia® and a collection within our Fox Restaurant Concepts (“FRC”) business. Internationally, 30 The Cheesecake Factory® restaurants operate under licensing agreements. Our bakery division operates two facilities that produce quality cheesecakes and other baked products for our restaurants, international licensees and third-party bakery customers.

Our business originated in 1972 when Oscar and Evelyn Overton founded a small bakery in the Los Angeles area. In 1978, their son, David Overton, our Chairman of the Board and Chief Executive Officer, led the creation and opening of the first The Cheesecake Factory restaurant in Beverly Hills, California. In 1992, the Company was incorporated in Delaware as The Cheesecake Factory Incorporated (referred to herein as the “Company” or as “we,” “us” and “our”). Our executive offices are located at 26901 Malibu Hills Road, Calabasas Hills, California 91301, and our telephone number is (818) 871-3000.

We maintain a general website at www.thecheesecakefactory.com, as well as websites for our bakery and other subsidiaries, including www.northitalia.com and www.foxrc.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, all amendments to those reports and our proxy statements are available on our general website at no charge, as soon as reasonably practicable after these materials are filed with or furnished to the SEC. Our filings are also available on the SEC’s website at www.sec.gov. The content of our websites is *not* incorporated by reference into this Form 10-K.

We utilize a 52/53-week fiscal year ending on the Tuesday closest to December 31 for financial reporting purposes. Fiscal year 2022 consisted of 53 weeks. Fiscal years 2021 and 2020 each consisted of 52 weeks. Fiscal year 2023 will consist of 52 weeks.

COVID-19 Pandemic, Geopolitical and Other Macroeconomic Impacts to our Operating Environment

We have experienced significant disruptions to our business as federal, state and local restrictions have fluctuated over time to mitigate the spread of the COVID-19 virus. While most of our restaurants operated with no restrictions on indoor dining during fiscal years 2021 and 2022, our revenues were negatively impacted during periods of accelerating case counts during which we incurred increased restaurant staff absenteeism and temporary shifts in consumer behavior, such as changes in customer traffic or the mix between on-premise and off-premise channels. We have incurred and may continue to incur additional costs to address government regulations and the safety of our staff members and customers.

In addition, we experienced labor shortfalls relative to our sales levels in certain parts of our workforce and/or geographies as we reopened our dining rooms after the lifting of mandatory social-distancing regulations related to the COVID-19 pandemic. During fiscal 2021, we also began to experience certain supply shortages and transportation delays largely attributable to impacts of the COVID-19 pandemic. These shortages continued in fiscal 2022 and were exacerbated by geopolitical unrest. The aggregate impact of these and other geopolitical and macroeconomic factors contributed to significantly increased commodity and wage inflation and other increased costs. We have also encountered delays in opening new restaurants due to supply chain challenges, as well as to longer lead times in obtaining licenses and permits and in the timeline required to complete the overall leasing process with landlords.

The ongoing effects of COVID-19 and its variants, along with other geopolitical and macroeconomic events could lead to further government mandates, including but not limited to capacity restrictions, shifts in consumer behavior, wage inflation, staffing challenges, product and services cost inflation, disruptions in the supply chain and delay in new restaurant openings. If these factors significantly impact our cash flow in the future, we may again implement mitigation actions such as suspending share repurchases, not declaring future dividends, increasing borrowings under our credit facility or modifying our operating strategies. Any of these measures may have an adverse impact on our business and materially adversely affect our financial performance.

The Cheesecake Factory

As of February 27, 2023, we operated 210 The Cheesecake Factory restaurants, which strive to provide a distinctive, high-quality dining experience at moderate prices by offering an extensive, innovative and evolving menu in an upscale casual, high-energy setting with attentive, efficient and friendly service. As a result, The Cheesecake Factory restaurants appeal to a diverse customer base across a broad demographic range. Our extensive menu and strategic selection of locations enable us to compete for substantially all dining preferences and occasions, from the key lunch and dinner day parts to the mid-afternoon and late-night day parts, which are traditionally weaker times for most casual dining restaurants, as well as special occasion dining. The Cheesecake Factory restaurants are generally open seven days a week for lunch and dinner, and we offer additional menu items for weekend brunch.

All of our restaurants offer a full-service bar where our entire menu is served. During fiscal 2022, alcoholic beverage sales represented 12% of The Cheesecake Factory restaurant sales. We offer all items on our menu, except alcoholic beverages where disallowed by regulation, for off-premise consumption, sales of which comprised approximately 25% of The Cheesecake Factory restaurant sales during fiscal 2022. We work with a third party to provide delivery service from all of our locations and offer online ordering for to-go sales at all of our domestic locations.

The Cheesecake Factory menu features approximately 235 items, exclusive of beverage and dessert items and including items presented on supplemental menus, such as our SkinnyLicious[®] menu that offers innovative items at 590 calories or less. Our menu offerings include appetizers, pizza, seafood, steaks, chicken, burgers, small plates, pastas, salads, sandwiches and omelettes, including a selection of vegan and gluten-free items.

Our ability to create, promote and attractively display our unique line of desserts is also important to the competitive positioning and financial success of our restaurants. We offer approximately 45 varieties of proprietary cheesecake and other desserts in our restaurants. Our brand identity and reputation for offering premium desserts results in a significant level of dessert sales, representing approximately 17% of The Cheesecake Factory sales during fiscal 2022.

Competitive Positioning

The restaurant industry is comprised of multiple segments, including fine dining, casual dining, fast casual and quick-service. The Cheesecake Factory restaurants operate in the upscale casual dining segment, which is positioned above core casual dining, with standards that are closer to fine dining. Upscale casual dining is differentiated by freshly prepared and innovative food, flavorful recipes with creative presentations, unique restaurant layouts, eye-catching design elements and more personalized service. We believe that we are a leader in upscale casual dining given the historically high average sales per square foot of our restaurants as compared to others in this segment.

The restaurant industry is highly competitive with respect to menu and food quality, service, personnel, location, décor and value. We compete directly and indirectly with national and regional casual dining restaurant chains, as well as independently-owned restaurants. In addition, we face competition from fast casual and quick-service restaurants, grocery stores and meal kits that have increased the quality and variety of their food products in response to consumer demand. We also compete with other restaurants and retail establishments for quality sites and staff and managers to operate our restaurants.

The key elements that drive our total customer experience and help position us from a competitive standpoint include the following:

Extensive and Innovative Menu, Made Fresh from Scratch. Our restaurants offer one of the broadest menus in casual dining and feature a wide array of flavors with portions designed for sharing. In contrast to many restaurant chains, substantially all of our menu items, except those desserts produced at our bakery facilities, are prepared from scratch daily at our restaurants with high-quality, fresh ingredients using innovative and proprietary recipes. One of our competitive strengths is our ability to anticipate customer preferences and adapt our expansive menu to the latest trends. We regularly update our ingredients and cooking methods, as well as create new menu items and new categories of food offerings at our restaurants, further enhancing the variety, quality and price points offered and keeping our menu relevant to our customers. All new menu items are selected based on anticipated sales popularity and profitability. We also regularly introduce new and innovative cheesecakes and other baked desserts. In 2022, we launched the Classic Basque Cheesecake in conjunction with National Cheesecake Day.

We generally update The Cheesecake Factory menus twice each year, and our philosophy is to use price increases to help offset key operating cost increases in a manner that balances supporting both our margin objectives and customer traffic levels. We have historically targeted menu price increases of approximately 2% to 3% annually, utilizing a market-based strategy to help mitigate cost pressure in higher-wage geographies. Due to the inflationary cost pressures we experienced in fiscal 2022, we implemented price increases above our historical levels to support our longer-term restaurant-level margin objectives. Future near-term pricing actions are likely to be at levels above historical norms to keep pace with any significant cost increases. We will continue to consider the cost environment and consumer price sensitivity when evaluating future menu price increases. In addition, on a regular basis, we carefully consider opportunities to adjust our menu offerings or ingredients to help manage product availability and cost.

Value Proposition. We believe our restaurants are recognized by customers for offering value with a large variety of freshly prepared menu items across a broad array of price points and generous portions at moderate prices. The average check for each customer, including beverages and desserts, was approximately \$29.40 during fiscal 2022.

Commitment to Excellent Service and Hospitality through the Selection, Training and Retention of High-Quality Staff Members. Our mission is to “create an environment where absolute guest satisfaction is our highest priority.” We strive to consistently exceed the expectations of our customers in all aspects of their experiences in our restaurants. One of the most important aspects of delivering a consistent and dependable level of service is having a team of experienced managers who can successfully operate our high-volume, complex restaurants. Our recruitment, selection, training, retention and internal promotion programs are among the most comprehensive in the restaurant industry, helping us to attract and retain qualified staff members who are motivated to consistently provide excellence in restauranting and customer hospitality. By providing extensive training, our goal is to encourage our staff members to develop a sense of personal commitment to our core values and culture of excellence. (See “Restaurant Operations, Development and Training” below.) Our commitment to people-focused programs and creating a great workplace for all of our staff and managers contributed to The Cheesecake Factory being named to Fortune magazine’s list of “100 Best Companies to Work For[®]” in 2022, for the ninth consecutive year.

High-Quality, High-Profile Restaurant Locations and Flexible Site Layouts. We target restaurant sites in high-quality, high-profile locations with a balanced mix of retail shopping, entertainment, residences, tourism and businesses. We have the flexibility to design our restaurants to accommodate a wide array of urban and suburban site layouts, including multi-level locations. Our restaurants feature large, open dining areas, high ceilings where available, a contemporary kitchen design and a bakery counter that features our desserts while also serving as a strategic location to facilitate our off-premise sales. The layouts are flexible, permitting tables and seats to be easily rearranged to accommodate small and large parties, thus permitting more effective utilization of seating capacity. Interior and exterior patio seating, either or both of which are available at approximately 95% of our restaurants, allow for additional customer capacity at a comparatively low occupancy cost per seat. Exterior patio seating is generally available as weather permits. (See “New Restaurant Site Selection and Development” below.)

Distinctive Restaurant Design and Decor. We place significant emphasis on the contemporary interior design and decor of our restaurants, which create a high-energy ambiance in a casual setting and contribute to the distinctive dining experience enjoyed by our customers. We have evolved our restaurants’ design over time to remain current while retaining a similar look and feel to our earlier restaurants. Our restaurants feature large, open dining areas, and where

feasible, both exterior and interior patios. We apply high standards to the maintenance of our restaurants to keep them in “like new” condition.

Integration of our Bakery Operations. The primary role of our bakery operations is to produce innovative, high-quality cheesecakes and other baked desserts for sale at The Cheesecake Factory restaurants and those of our international licensees, which is important to our competitive positioning. Integration of this vital part of our brand gives us control over the creativity and quality of our desserts and is also more profitable than buying from a third party.

New Restaurant Site Selection and Development

The Cheesecake Factory concept has demonstrated success in a variety of layouts (e.g., single or multi-level and varying interior square feet), site locations (e.g., urban or suburban shopping malls, lifestyle centers, retail strip centers, office complexes, entertainment centers and urban street locations — either freestanding or in-line) and trade areas. Accordingly, we intend to continue developing The Cheesecake Factory restaurants in high-quality, high-profile locations that meet our rigorous site standards. In accordance with our broader capital allocation strategy, we plan to open as many locations in any given year as there are sites available that meet our site selection criteria and for which we can negotiate acceptable lease terms, obtain necessary permits, complete construction, and recruit and train personnel. We have the flexibility in our restaurant designs to penetrate a wide variety of markets across varying population densities in both existing and new markets. We continue to target approximately 300 Company-owned and operated The Cheesecake Factory restaurants domestically over time.

The locations of our restaurants are critical to our long-term success, and we devote significant time and resources to analyzing each prospective site. We consider many factors when assessing the suitability of a site, including the demographics of the trade area such as average household income and population density, as well as site-specific characteristics such as visibility, accessibility and proximity to activity centers such as shopping centers and competitive influences. Since our restaurants can be successfully executed within a variety of site locations and layouts, we are highly flexible in choosing suitable locations. While there are common decor elements within each of our restaurant sites, the designs are customized for the specifics of each location, including the building type, square footage and layout of available space. We expect the majority of our new restaurants to vary between 7,000 and 10,000 interior square feet, generally with additional exterior and/or interior patio seating, selected appropriately for each market and specific site.

The relatively high sales productivity of our restaurants provides opportunities to obtain competitive leasing terms from landlords. Due to the flexible and customized nature of our restaurant operations and the complex design, construction and preopening processes for each new location, our lease negotiation and restaurant development time frames vary. The development and opening process usually ranges from six to eighteen months, depending largely on the type and availability of the leased space we intend to occupy, as well as our ability to obtain goods, materials, permits and adequate staffing, and is subject to delays either due to factors outside of our control or to our selective timing of restaurant openings. In recent years, we have encountered delays in opening new restaurants due to supply chain challenges, as well as to longer lead times in obtaining licenses and permits.

Unit Economics

The operation of high-quality restaurants in premier locations fitting our criteria contributes to the continuing customer appeal of The Cheesecake Factory. This popularity is reflected in our average sales per restaurant and per square foot, which are among the highest of any publicly-held restaurant company.

Average sales per location for The Cheesecake Factory restaurants open for the full year were approximately \$12.1 million and \$11.8 million on a 53-week and 52-week basis, respectively, for fiscal 2022. Since each of our restaurants has a customized layout and differs in size, an effective method to measure the unit economics of our sites is by square foot. Average sales per productive square foot (defined as all interior square footage plus seasonally adjusted exterior patio square footage) for restaurants open for the full year were approximately \$1,116 and \$1,089 on a 53-week and 52-week basis, respectively, for fiscal 2022. Fluctuations in both average sales per location and average sales per productive square foot generally track with comparable restaurant sales trends.

We currently lease all of our restaurant locations and utilize capital for leasehold improvements and furnishings, fixtures and equipment to build out our restaurant premises. Our distinctive design and decor require a higher investment

per square foot than is typical for the casual dining industry. However, our restaurants have historically generated annual sales per square foot that are also typically higher than our competitors. Total construction costs to build our restaurant premises average approximately \$1,000 per interior square foot. However, these costs vary depending on a number of factors, including geography, the complexity of our build-out, site characteristics, governmental fees and permits, labor and material conditions in the local market, weather and the amount, if any, of construction contributions obtained from our landlords for structural additions and other leasehold improvements.

Our new restaurants typically open with initial sales volumes well in excess of their future run-rate levels. This initial “honeymoon” effect usually results from grand opening publicity and other customer awareness activities that generate higher than usual customer traffic, particularly in new markets. During the three to six months following the opening of new restaurants, customer traffic generally settles into its normal pattern, resulting in sales volumes that gradually adjust downward to their post-opening run-rate level. Additionally, our new restaurants usually require a period of time after reaching normal traffic levels to achieve their targeted restaurant-level margins due to actual-to-theoretical food cost inefficiencies and labor productivity inefficiencies commonly associated with new, highly complex restaurants such as ours.

Restaurant Operations

Our ability to consistently execute a complex menu offering items prepared daily with high-quality, fresh ingredients in an upscale casual, high-volume dining environment is critical to our overall success. We employ detailed operating procedures, standards, controls, food line management systems and cooking methods and processes to accommodate our extensive menu and to drive sales productivity.

We believe that the high average sales volumes and popularity of our restaurants allow us to attract and retain high-quality, experienced restaurant-level management and other operational personnel. Each restaurant is generally staffed with one General Manager (“GM”), one Executive Kitchen Manager (“EKM”), and an average of six to ten additional kitchen and front-of-the-house managers and approximately 170 hourly staff members, both depending on the size and sales volume of each restaurant. Our GMs and EKMs possess an average of more than ten years of experience with the Company. This tenure and knowledge drive our high productivity and contribute to our ability to deliver an exceptional customer experience. All newly-recruited restaurant managers complete an extensive training program during which they receive both classroom and on-the-job instruction in areas such as food quality and safety, customer service, financial management, staff relations and safely serving alcohol. Managers continue their development by participating in and completing a variety of training and development activities to assess and further develop their skills and knowledge necessary for upward progression through our management levels. Our GMs regularly meet to receive hands-on training, share best practices and celebrate Company successes, all of which help to foster the unique culture of our brand.

Each restaurant GM reports to an Area Director of Operations (“ADO”), who in turn reports to a Regional Vice President of Restaurant Operations. Our EKMs report to their GMs but are also supervised by an Area Kitchen Operations Manager. Our restaurant field supervision organization also includes our Senior Vice President of Restaurant Operations, Senior Vice President of Kitchen Operations, an operations services team and our performance development department who are collectively responsible for day-to-day operations, managing new restaurant openings and training for all operational managers and staff.

To enable us to more effectively compete for, and retain, the highest quality restaurant management personnel, we offer an innovative and comprehensive compensation program for our restaurant GMs and EKMs. Each participant receives a competitive base salary and has the opportunity to earn a cash bonus based on quantitative restaurant performance metrics. GMs are also eligible to use a Company-leased vehicle. In addition, we provide a longer-term, equity incentive program to our GMs and EKMs based on their extended service with us in their respective positions and their achievement of certain performance objectives. We believe that these awards encourage our GMs and EKMs to think and act as business owners, assist in retention of restaurant management and align our managers’ interests with those of our stockholders.

Restaurant-Level Preopening Costs

Due to the highly customized and operationally complex nature of our upscale, high-volume concept and the investment we make in properly training our staff to operate our restaurants, our preopening process is more extensive, time consuming and costly than that of many restaurant chains. Restaurant-level preopening costs for a typical location in an established market average approximately \$1.0 million to \$1.5 million and include all costs to relocate and compensate restaurant management staff members during the preopening period, costs to recruit and train hourly restaurant staff members, and wages, travel and lodging costs for our opening training team and other support staff members.

Restaurant-level preopening costs can fluctuate significantly from period to period, based on the number and timing of restaurant openings and the specific costs incurred for each restaurant. These costs vary by location depending on a number of factors, including the proximity of our existing restaurants, the size and physical layout of each location, the number of management and hourly staff members required to operate each restaurant, the availability of qualified restaurant staff members, the cost of travel and lodging for different metropolitan areas, the timing of the restaurant opening and the extent of unexpected delays, if any, in obtaining final licenses and permits to open the restaurant, which may also depend on our landlords obtaining their licenses and permits and completing their construction activities. Restaurant-level preopening costs are generally higher for larger restaurants and initial entry into new markets and lower when we relocate a restaurant within its local market. We usually incur the most significant portion of restaurant-level preopening costs within the two months immediately preceding and the month of a restaurant's opening.

Licensed Locations

We currently have licensing agreements with three restaurant operators to develop and operate The Cheesecake Factory® brand restaurants in selected international markets. Our licensees invest their capital to build and operate the restaurants, and we receive initial development fees, site and design fees and ongoing royalties based on our licensees' restaurant sales. In addition, these licensees purchase bakery products branded under The Cheesecake Factory® mark from us. As of February 27, 2023, our international licensees operated the following The Cheesecake Factory restaurants:

<u>Licensee Location</u>	<u>Restaurant Location</u>	<u># of Restaurants</u>
Kuwait ⁽¹⁾	Bahrain	1
	Kingdom of Saudi Arabia	4
	Kuwait	3
	Qatar	3
	United Arab Emirates	6
	Mexico ⁽²⁾	Mexico
Hong Kong ⁽³⁾	Beijing	1
	Hong Kong	1
	Macau	1
	Shanghai	3
Total		<u>30</u>

- (1) This licensee, or its affiliates, also has the right to develop restaurants in Egypt, with the opportunity to expand the agreement to include Algeria, Hungary, Iraq, Libya, Morocco, Poland, Russia, Slovakia, The Czech Republic, Tunisia, Turkey and Ukraine.
- (2) This licensee, or its affiliates, also has the right to develop restaurants in Chile, with the opportunity to expand the agreement to include Argentina, Brazil, Colombia and Peru.
- (3) This licensee, or its affiliates, also has the right to develop restaurants in Thailand and Taiwan, with the opportunity to expand the agreement to include Japan, South Korea, Malaysia and Singapore.

We are actively working to extend and expand the agreements with our current licensees in their primary geographies and are also exploring potential opportunities to expand our licensing business into Western Europe.

Our corporate infrastructure includes a dedicated global development team that works with our international licensees and coordinates the initial training, ongoing quality control, product specifications and brand oversight at our

licensed locations. Our internal audit department also performs periodic reviews of our international licensees' compliance with our licensing agreements.

As we evaluate other international markets, we will consider opportunities to directly operate certain locations and/or enter into licensing, joint venture or partnership arrangements with established third-party companies. We are selective in our assessment of potential partners and licensees, focusing on well-capitalized companies that have established business infrastructures, expertise in multiple countries, experience in operating upscale casual dining restaurants and sound governance practices. We look to associate with companies who will protect The Cheesecake Factory® brand and operate the concept in a high-quality, consistent manner.

Due to the complexities of opening The Cheesecake Factory restaurants in other countries, including, but not limited to, the selection and design of appropriate sites, construction of our complex restaurant designs, training of licensees' staff members, approval of supply sources and exportation of our bakery products to new countries, the number and timing of new openings in foreign countries may vary from expectations.

Consumer Packaged Goods

Given the strong affinity for The Cheesecake Factory® brand, we leverage opportunities in the consumer packaged goods channel by partnering with third-party manufacturers to offer a variety of products marketed under The Cheesecake Factory At Home® mark, including our Famous "Brown Bread," refrigerated puddings and ice cream available in select retail stores nationwide. We continue to evaluate other synergistic, on-brand licensing opportunities to add incremental revenue streams to our business.

North Italia

North Italia is a modern interpretation of Italian cooking in the upscale casual dining segment. North Italia strives to be a modern Italian restaurant with a neighborhood feel, offering classic Italian favorites with a fresh twist made from scratch daily. Contemporary design and décor elements including large dining rooms, high ceilings and open kitchen layouts coupled with a focus on exceptional hospitality and high-quality, personalized service creates a warm, lively atmosphere for guests to create memorable experiences. The menu features a broad selection of delicious, handcrafted dishes including appetizers, salads, fresh pastas, pizzas and entrees, and each restaurant includes unique menu items tailored to local markets. North Italia offers an assortment of wines, beers and house-made cocktails which represented 25% of North Italia sales in fiscal 2022. The average check for each customer, including beverages and desserts, for fiscal 2022 averaged approximately \$32.00 for lunch and approximately \$41.50 for dinner. Our North Italia restaurants are generally open seven days a week for lunch, dinner and weekend brunch. Currently, we operate 33 North Italia restaurants.

With Italian cuisine the number one ethnic food category in the United States, coupled with strong national reception of the North Italia concept to-date, we believe there is potential for 200 domestic locations over time, which supports our plan for approximately 20% average annual unit growth. Average sales per mature location, defined as open prior to 2020 and adjusted to exclude impaired locations, for North Italia restaurants were approximately \$8.0 million for fiscal 2022, or approximately \$1,300 per productive square foot on a 53-week basis. We target an average North Italia unit size of 6,000 to 7,000 square feet, and total construction costs average approximately \$650 per interior square foot. Restaurant-level preopening costs for a typical location in an established market average approximately \$0.5 million to \$0.7 million and include all costs to relocate and compensate restaurant management staff members during the preopening period, costs to recruit and train hourly restaurant staff members, and wages, travel and lodging costs for our opening training team and other support staff members.

Fox Restaurant Concepts

FRC operates as an independent subsidiary in Phoenix, Arizona and serves as an incubation engine, innovating new food, dining and hospitality experiences to create fresh, exciting concepts for the future. With over a dozen evolving restaurant brands launched to-date, its concepts are diverse in industry segment, occasions, square footage and geography. FRC's largest concept, Flower Child, operates in the fast casual dining segment, offering a customizable menu, made fresh from scratch, featuring locally-sourced, all-natural and organic ingredients. Flower Child is a potential opportunity for us to diversify our portfolio in a strong and growing niche. Other FRC potential growth concepts include

Culinary Dropout and Blanco, which together with the other FRC brands, serve as an ecosystem for talent, menu and design development. Currently, we operate 30 and 35 Flower Child and other FRC locations, respectively.

We target approximately 15% to 20% average annual unit growth for the aggregate FRC portfolio, driven primarily by the anticipated growth of Flower Child, complemented by additional market tests of the potential growth concepts. Average sales per location open for the full year for the FRC restaurants were approximately \$5.8 million for fiscal 2022, or approximately \$1,000 per interior square foot. FRC unit sizes range from approximately 3,500 to 15,000 square feet, and total construction costs average approximately \$500 per interior square foot, depending on the concept.

Bakery Operations

We own and operate two bakery production facilities, one in Calabasas Hills, California, and one in Rocky Mount, North Carolina. Our facility in California accommodates both production operations and corporate support personnel, while our facility in North Carolina houses production operations and a distribution center. We produce approximately 60 varieties of proprietary cheesecakes and other baked desserts using high-quality ingredients for The Cheesecake Factory restaurants and for international licensees and third-party customers.

The primary role of our bakery operations is to produce innovative, high-quality cheesecakes and other baked desserts for sale at our restaurants and those of our international licensees. Integration of this vital part of our brand gives us control over the creativity and quality of our desserts and is also more profitable than buying from a third party. We also leverage The Cheesecake Factory brand identity and utilize our bakery production capacity by selling cheesecakes and other baked products to external foodservice operators, retailers and distributors. Current large-account customers include retail and supermarkets, foodservice distributors and operators, a national retail bookstore, other restaurants and national warehouse clubs. Additionally, we currently sell a selection of our cakes online and in catalogs domestically through an agreement with an upscale retailer. Items produced for outside accounts are marketed under The Cheesecake Factory At Home[®] and The Cheesecake Factory Bakery[®] marks, as well as private labels.

We sell baked goods internationally in approximately 20 countries under The Cheesecake Factory At Home[®] mark. Offering our cheesecakes and other baked desserts internationally is important to our branding, creating awareness and driving demand, not only for bakery products but for the international expansion of our restaurants.

Human Capital

At the heart of our culture is the belief that our people are the foundation of our success. We depend on our staff members to effectively execute all aspects of our day-to-day operations that differentiate our concepts. Our ability to attract highly motivated staff members and retain an engaged, experienced team is key to successful execution of our strategy. While we continue to operate in a competitive labor environment, we believe our people practices contribute significantly to our ability to attract talent and to The Cheesecake Factory restaurants' historically industry-leading retention rates.

Retention and engagement of our staff members is fostered by our investment and support particularly in the following areas:

Culture

Cultivating and maintaining our culture is a key strategic focus. Our core values and purpose reflect who we are and how our staff members interact with one another, as well as with our customers and other external stakeholders.

Our purpose – to nurture bodies, minds, hearts and spirits – and our values – quality in everything we do; passion for excellence; integrity, respect and responsibility; people – our greatest resource; service-mindedness; dynamic leadership; high performance and create a sustainable future – are the foundation of our company culture. We seek to embed our purpose in everything we do by cultivating a sense of pride and belonging to the Company and our brands. We are proud of the way our people nurture one another and extend that nurturing to our customers and communities.

We believe our efforts to build and maintain a strong culture have contributed to two notable recognitions in 2022. We were named to the FORTUNE 100 Best Companies to Work For® list for a ninth consecutive year and the PEOPLE Companies that Care® list for a second consecutive year.

Diversity, Equity, Inclusion and Belonging

We strive to offer an atmosphere of inclusion and belonging for all. We believe the cultural alignment we cultivate around respect and inclusion builds trust and promotes teamwork to achieve our common goals. Furthermore, when our people feel valued and respected for their worth as individuals, they are better able to maximize their potential at work and more likely to share their perspectives, opinions and ideas, which contributes to our ability to innovate. We created our Diversity, Equity, Inclusion and Belonging working group to help provide focus, feedback and ideas in this important area.

We are committed to providing equal opportunities and seek to ensure there is equity in hiring, development and advancement. In 2022, we continued our inclusive leadership training for above-restaurant leadership and restaurant managers and reviewed our interview processes for key above-restaurant leadership to enhance opportunity and development for candidates at The Cheesecake Factory and North Italia concepts. We also sponsored developmental support groups, such as The Cheesecake Factory Women’s Network Group, with the goal of advancing women into senior-level positions. Our Female Kitchen Leader’s Program paired new female managers with an advisor to provide extra support with navigating kitchen environments, which tend to be predominantly male. The Leaders of Color Program provided networking and development opportunities for managers from diverse racial or ethnic groups. As of January 3, 2023, approximately 47% of The Cheesecake Factory and North Italia staff members were women and approximately 72% of our The Cheesecake Factory and North Italia staff members were racially or ethnically diverse. Further details on representation can be found in the CSR Report (see “Corporate Social Responsibility” below). To enhance opportunity and development for participants in these groups, we reinstated certain programs in 2022 that had been paused during the COVID-19 pandemic, such as in-person conferences.

We are committed to conducting pay analyses among our The Cheesecake Factory and North Italia restaurants, as well as our bakery and corporate teams, to help ensure that we are paying fairly and equitably. In 2021, we retained a third-party consulting firm to conduct an independent pay equity analysis of our area managers, restaurant managers, corporate field and corporate support center staff to identify risks and determine if there were unexplained base pay gaps in our organization by gender or race. To help ensure that we are paying fairly and equitably, we are committed to conducting both internal reviews and external third-party audits and verification. We have also trained our recruiters to help enable them to identify and address pay equity issues during the hiring process utilizing internal reporting and partnership with the compensation team.

Development and Training

We invest significant resources to ensure our people receive, what we believe is industry-leading training in order to maximize their potential. Our hourly staff members and managers receive a considerable amount of training through a combination of in-person learning and development and online coursework. In addition to company-provided job training, we encourage the pursuit of educational opportunities at The Cheesecake Factory and North Italia restaurants through free high school equivalency and associate degree programs. In 2022, we expanded availability of these programs to include all hourly staff members (previously, only kitchen staff were eligible). We also strive to provide our staff with career advancement opportunities, and our fiscal 2022 internal management promotion rate at The Cheesecake Factory and North Italia concepts was 53%.

Benefits and Wellness

We believe access to healthcare is a compelling benefit for many staff members, and we offer healthcare benefits to our hourly staff members who work a minimum of 25 hours per week, on average. We provide a robust suite of benefits and wellness offerings, including free mental health resources, free tutoring to support our staff and managers, and access to chronic disease care management, substance abuse treatment, a maternal health program, financial wellness resources and adoption assistance. The Cheesecake Factory and North Italia staff, as well as our bakery and corporate teams, have paid sick time available to them starting at hire and are eligible to earn vacation time. Our continued management of human capital related to the COVID-19 pandemic during fiscal 2022 focused on keeping

our teams and customers safe, adhering to local requirements and providing paid time off for our hourly staff and managers to care for their health.

In fiscal 2022, we also sought to provide staff with additional benefit through implementation of an earned wage access program that allows staff who qualify to receive up to 50% of their earned wages the day after they work a shift.

Employee Engagement

As of January 3, 2023, we employed approximately 47,500 people, with approximately 46,000 in our restaurants and the remainder in our corporate support center, FRC headquarters and bakery operations. We believe that engaging our workforce is a key factor in our business success and in turn, have developed programs to promote enthusiasm and commitment, while providing a sense of belonging. We measure our performance in this area through an annual engagement survey and pulse surveys throughout the year. These surveys give staff company-wide the opportunity to share honest feedback about their work experience. Based on survey results, leaders across the Company are tasked with responsibility for creating action plans to address and respond to staff feedback. Listening to our staff members is an essential part of building an engaged workforce, and we provide additional avenues for staff to share their ideas and concerns, including our internal crowdsourcing innovation website and our Careline, which staff can use to confidentially express their concerns, as well as restaurant townhalls where our staff can bring their ideas and concerns forward. Our staff members are not covered by any collective bargaining agreements, and we consider our staff member relations to be good.

A significant part of our employee engagement strategy involves staff appreciation and recognition efforts. After pausing them during the pandemic, we reinstated key cultural events such as our week-long team appreciation celebrations, manager recognitions, Commitment to Excellence staff member awards and new menu rollout all-staff meetings.

Giving Back

Another key aspect of our culture is giving back to the communities where our staff live and work, as well as uniting our staff members around charitable causes personal to them. We provide donations to Feeding America and participate in their annual campaign as an opportunity to engage our teams in a culturally-aligning company-wide service program. We have similarly promoted our teams' participation in community volunteer events, and through our gift card program, we contribute to local fundraising events for community non-profit organizations. Additionally, we provide a method for our staff members to assist other staff members in need through our The Cheesecake Factory "HELP" fund.

We also participate in a nationwide food donation program which redirects surplus food away from landfills to local food banks and non-profit organizations, and believe our sustainability programs and initiatives like restaurant-based composting and recycling and replacing our off-premise packaging with materials that reduce the use of plastics and improve recyclability serve to foster pride in our staff.

Corporate Social Responsibility

For us, the term "Corporate Social Responsibility" or "CSR" informs how we operate in relation to our people and communities, natural environment and our supply chain. We evaluate our business and how we operate our corporate-owned restaurants in an effort to identify, create and implement meaningful and sustained change. The Corporate Governance and Nominating Committee of our Board is responsible for reviewing the Company's sustainability and CSR policies. For more information, please review our CSR report on the Corporate Social Responsibility page on our website at www.thecheesecakefactory.com. The contents of the CSR report and our website are *not* incorporated by reference into this Form 10-K.

Purchasing and Distribution

Our purchasing philosophy is designed to procure quality ingredients, supplies and services for our operations from reliable sources at competitive prices and consistent with our sustainability goals. We research and evaluate various

ingredients and products in an effort to maintain high quality, be responsive to changing consumer tastes and manage costs. Should any items from a particular supply source become unavailable, we generally believe that these items could be obtained, or alternative products substituted, in sufficient quantities from other sources to allow us to avoid any long-term material adverse effects that could be caused by such unavailability.

In order to maximize purchasing efficiencies and to obtain the freshest ingredients that meet our required standards, each restaurant's management determines the quantities of food and supplies needed for their location and orders the items from qualified local, regional, national and international suppliers based upon specifications determined and terms negotiated at a corporate level. We strive to maintain restaurant-level inventories at a minimum dollar level in relation to sales due to the relatively rapid turnover of the perishable commodities we use in our operations, coupled with the limited storage space at our restaurants. Independent foodservice distributors, including the largest foodservice distributor in North America, deliver most items multiple times per week to our restaurants.

The cost of products and services used in our operations are subject to volatility due to the relative availability of labor and distribution, weather, natural disasters, inventory levels and other supply and/or demand impacting events such as the COVID-19 pandemic, geopolitical events, economic conditions or other unforeseen circumstances. Climate change may further exacerbate a number of these factors. During fiscal 2021, we began to experience certain supply shortages and transportation delays largely attributable to impacts of the COVID-19 pandemic. These shortages continued in fiscal 2022 and were exacerbated by geopolitical unrest. The aggregate impact of these and other factors contributed to significant cost inflation.

We attempt to negotiate short-term and long-term agreements for some of our principal commodity, supply and equipment requirements, such as certain dairy products and poultry, depending on market conditions and expected demand. While we are in the process of contracting for certain key food and non-food supplies for fiscal 2023, these efforts may not be successful or yield our intended benefits. We continue to evaluate the possibility of entering into similar arrangements for other commodities and periodically evaluate hedging vehicles, such as direct financial instruments, to assist us in managing risk and variability associated with such commodities. As of the end of fiscal 2022, we had no hedging contracts in place.

Information Technology

Our technology-enabled business solutions are designed to provide effective financial controls, cost management, improved efficiencies and enhanced customer experience. Our business intelligence solution and data warehouse architecture provide corporate and restaurant management with information and insights into key operational metrics and performance indicators. This framework delivers enterprise reporting, dashboards and analytics, and allows access to metrics such as quote and wait time accuracy, staff member retention trends, and restaurant quality and service analyses.

Our restaurant systems are designed to enhance the guest experience, protect guest information and allow our staff to focus on delivering the best experience possible. We have implemented systems for touchless/online menu, ordering and payment, inventory management, labor management, recipe management, kitchen order orchestration and table management. Our kitchen order orchestration tool is designed to route items in such a way that balances the workload across multiple stations to ensure our guests receive the highest quality menu items. Our labor management tool delivers optimized scheduling based on business demands and staff availability coupled with web and app-based access delivering flexibility to our staff. Guest payment data is of the utmost importance, and we employ measures to help ensure every payment is secured and encrypted.

Information and data security is a priority for us and is led by our information technology department in conjunction with an interdepartmental information security council representing our key functional areas. We employ a multi-discipline security approach to recognize, manage and resolve cybersecurity threats, and require cybersecurity awareness training for all staff members with access to our cyber systems. This approach includes continuous monitoring and detection programs, network security precautions, encryption of critical data, and in-depth security assessment of vendors and incident response guidelines. We continue to invest and innovate around the areas of protection of systems, sensitive data, technology, and processes using third-party and in-house tools and resources. We remain focused on protecting against new and emerging risks utilizing our tools and security teams and continue to review and make strategic investments in our systems to help keep the Company's, our guests', and our team members' data secure. We

maintain a disaster recovery plan and protect against business interruption by backing up our major systems. In addition, we periodically scan our environment for any vulnerability, perform penetration testing and engage third parties to assess the effectiveness of our data security practices. A third party conducts regular network security reviews, scans, and audits. The Audit Committee of the Board of Directors reviews with management steps the Company has taken to monitor or mitigate significant cybersecurity risk and the effectiveness of these practices.

Marketing and Advertising

The Cheesecake Factory

We rely on our reputation, as well as our high-profile locations, media exposure and positive “word of mouth,” to maintain and grow market share. Historically, we have not used significant paid national advertising through television, radio or print, nor significant discounting for on-premise dining occasions. We utilize a social media and digital marketing strategy that allows us to engage regularly with our customers outside of our restaurants, including communication and paid advertising on social media platforms such as Instagram® and TikTok® and other, influencer marketing, Google search advertising and direct email to customers. We refreshed our website in 2022, including our online ordering capabilities. We also are currently testing a guest rewards program pilot for potential national rollout in 2023.

Public relations is another important aspect of our marketing approach, and we frequently appear on local and national television in connection with a variety of promotional opportunities, such as National Cheesecake Day, to perform cooking demonstrations and other brand-building exposure. We generated approximately 8.5 billion media impressions in fiscal 2022 at minimal cost to us. To raise awareness in the off-premise channel, we execute marketing campaigns with our third-party delivery provider and through our online ordering platform. In addition, we work with several premiere third-party gift card distributors, contributing to our brand awareness and gift card sales, as well as our consumer packaged goods licensees on co-branded marketing campaigns.

Our international licensees are committed to opening each new restaurant with marketing that can be comprised of a mix of elements including print, billboards, digital and radio. We maintain final approval of our licensees’ marketing campaigns and social media posts to promote consistency in the look and feel of marketing efforts including our brand, domestically and abroad.

North Italia and FRC

North Italia and FRC execute localized marketing programs focused on awareness, frequency and brand engagement through a variety of channels, including store-level marketing, public relations, in-store events, digital advertising, email programs and social media. Each restaurant is positioned as an individual brand with a neighborhood connection. Additionally, the restaurant interiors and exteriors are utilized for brand engagement and messaging through art and graphics, creating an important part of a brand experience for the customer. We believe minimal discounts ensure compelling brand proposition for experience and value.

Seasonality and Quarterly Results

While seasonal fluctuations generally do not have a material impact on our quarterly results, year-over-year comparisons can be significantly impacted by factors such as significant differences in year-over-year inflation, the number and timing of new restaurant openings and associated preopening costs, the timing of holidays, inclement weather and the additional week in a 53-week fiscal year. Therefore, our financial results for any quarter or fiscal year are not necessarily indicative of the results that may be achieved for the full fiscal year or subsequent fiscal years.

Food Safety and Quality Assurance

Our food safety processes and systems are designed to mitigate the risk of contamination and illness and to ensure compliance with regulatory requirements as well as industry standards. Adherence is monitored through routine restaurant management reviews, third-party health inspection/food safety audits and regulatory agency inspections. In addition, our bakery facilities are Safe Quality Food certified in alignment with the Global Food Safety Initiative’s Global Markets Program. Our restaurants and bakery facilities also follow regulatory guidelines required for conducting

and managing ingredient and product traceability. We utilize a web-based solution to efficiently contact our restaurants and monitor progress in the event of a product withdrawal or recall.

In selecting suppliers, we utilize key performance indicators relating to sanitation, operations and facility management, good manufacturing and agricultural practices, product protection, government inspections and compliance, recovery and food security. We perform annual food safety and quality system audits for certain suppliers, while others are audited every other year or as needed.

Government Laws and Regulations

Our Company is subject to numerous federal, state, local and foreign laws and regulations. Each of our restaurants is subject to various laws and regulations, including license and permit requirements, that regulate many aspects of our business, including, among other things, alcoholic beverage control, health, sanitation, labor, immigration, zoning and public safety. We are also subject to various environmental regulations governing areas such as water usage, sanitation disposal and transportation mitigation.

Our international business exposes us to additional laws and regulations, including, without limitation, antitrust and tax requirements, anti-boycott legislation, import/export and customs regulations and other international trade regulations, privacy laws, anti-terrorism laws and anti-corruption laws.

As a provider of food products, we are subject to a comprehensive regulatory framework that governs the manufacture (including composition and ingredients), labeling, packaging and safety of food.

In order to serve alcoholic beverages in our restaurants or off-premise where permitted, we must comply with alcoholic beverage control regulations which require us to apply to a state or other governmental alcoholic beverage control authority for licenses and permits. In addition, we are subject to dram shop statutes in most of the jurisdictions in which we operate, which generally provide a person injured by an intoxicated person the right to recover damages from an establishment that wrongfully served alcoholic beverages to the intoxicated person. Dram shop litigation may result in significant judgments, including punitive damages. We attempt to mitigate this risk by carrying liquor liability insurance coverage.

Various federal, state, local and foreign laws and regulations govern our operations as they relate to our staff members, including such matters as minimum wages, breaks, scheduling, exempt classifications, equal pay, overtime, tip credits, fringe benefits, leaves, safety, working conditions, provision of health insurance, the COVID-19 pandemic and citizenship or work authorization requirements. We must also comply with local, state and federal laws and regulations protecting the right to equal employment opportunities and prohibiting discrimination and harassment in the workplace. We regularly review and update our training and awareness programs addressing these concerns. We are also subject to the regulations of the Department of Homeland Security, the U.S. Citizenship and Immigration Services and U.S. Immigration and Customs Enforcement.

Our facilities must comply with applicable requirements of the Americans with Disabilities Act of 1990 (“ADA”) and related federal, state and foreign laws and regulations which prohibit discrimination on the basis of disability with respect to public accommodations and employment. We take steps to ensure our places of public accommodation and our website comply with the requirements of the ADA and related state and local laws and regulations. We also make reasonable accommodations for the employment of disabled persons as required by applicable laws and regulations.

A significant number of our hourly restaurant staff members receive income from gratuities. In the United States, many of our locations participate voluntarily in a Tip Reporting Alternative Commitment (“TRAC”) agreement with the Internal Revenue Service (“IRS”). By complying with the educational and other requirements of the TRAC agreement, we reduce the likelihood of potential employer-only FICA tax assessments for unreported tips.

We are subject to laws and regulations relating to information security, privacy, cashless payments and consumer credit, protection and fraud. We make efforts to comply with an increasing number of data privacy laws, regulations and industry standards regarding the protection of personally identifiable information and protected health information.

Trade Names, Trademarks and Other Intellectual Property

We own and have applied to register trade names, logos, service marks, trademarks, copyrights and other intellectual property (collectively, “Intellectual Property”) in the United States, Canada and in additional countries throughout the world in various categories, including without limitation, restaurant services and bakery goods. We regard our Intellectual Property, including “The Cheesecake Factory,” “North Italia,” and a collection with the Fox Restaurant Concepts subsidiary, as well as our trade dress, as having substantial value and as being important to our marketing efforts. Our policy is to pursue registration of our important Intellectual Property whenever commercially feasible and to vigorously oppose any infringement of it. Generally, with appropriate renewal and use, the registration of our Intellectual Property will continue indefinitely. We have also registered various internet domain names, including, “www.thecheesecakefactory.com,” “www.northitalia.com,” and “www.foxrc.com.”

Executive Officers of the Registrant

David Overton, age 76, serves as our Chairman of the Board and Chief Executive Officer. Mr. Overton co-founded our predecessor company in 1972 with his parents, Oscar and Evelyn Overton. He is also a founding member and director of our Foundation.

David M. Gordon, age 58, was appointed President of the Company in February 2013. Mr. Gordon joined our Company in 1993 as a Manager and held operational positions, including General Manager, Area Director of Operations, Regional Vice President and Chief Operating Officer prior to his appointment as President. He is also a director of our Foundation.

Matthew E. Clark, age 53, was appointed Executive Vice President and Chief Financial Officer in 2017. Mr. Clark joined our Company in 2006 as Vice President of Strategic Planning and most recently oversaw the strategy, financial planning, treasury and risk management functions as Senior Vice President, Finance and Strategy. Earlier in his career, Mr. Clark held a number of finance positions of increasing responsibility at Groupe Danone, Kinko’s and The Walt Disney Company. He is also an advisory director of our Foundation.

Keith T. Carango, age 61, serves as President of The Cheesecake Factory Bakery Incorporated, our bakery subsidiary. Mr. Carango joined our bakery operations in 1996 to lead manufacturing and provide continuous improvement to the bakery operation. In his most recent role of Senior Vice President and Chief Operating Officer, he oversaw strategic planning, supply chain, manufacturing, distribution, human resources, quality assurance and finance. Prior to joining the Company, he held manufacturing and finance roles at Frito-Lay, Inc. and Prince Foods.

Scarlett May, age 56, serves as our Executive Vice President, General Counsel and Secretary. Ms. May joined our Company in 2018, from Brinker International, Inc., where she served as Senior Vice President, General Counsel and Secretary from 2014 to 2018. Prior to that, she was Senior Vice President, Chief Legal Officer and Secretary for Ruby Tuesday, Inc. following her earlier career in private practice.

ITEM 1A. RISK FACTORS

An investment in our common stock involves risks and uncertainties. In addition to the information contained elsewhere in this Annual Report on Form 10-K and other filings that we make with the SEC, you should carefully read and consider the risks described below before making an investment decision. The occurrence of any of the following risks could materially harm our business, operating results, earnings per share, financial position, cash flows and/or the trading price of our common stock (individually and collectively referred to as our “financial performance.”) In addition, our actual financial performance could vary materially from any results expressed or implied by forward-looking statements contained in this report, in any of our other filings with the SEC and other communications by us, both written and oral, depending on a variety of factors, including the risks and uncertainties described below. It is not possible for us to predict all possible risk factors or the impact these factors could have on us or the extent to which any one factor, or combination of factors, may materially adversely affect our financial performance. The risk factors set forth below are not guarantees that no such conditions exist as of the date of this report and should not be interpreted as an affirmative statement that such risks or conditions have not materialized, in whole or in part.

Risks Related to the COVID-19 Pandemic and Other Geopolitical and Macroeconomic Events

The COVID-19 pandemic significantly disrupted our business and its ongoing effects and other geopolitical and macroeconomic events are having and may continue to have an adverse impact on our operating environment.

We have experienced significant disruptions to our business as federal, state and local restrictions have fluctuated over time to mitigate the spread of the COVID-19 virus. While most of our restaurants operated with no restrictions on indoor dining during fiscal years 2021 and 2022, our revenues were negatively impacted during periods of accelerating case counts during which we incurred increased restaurant staff absenteeism and temporary shifts in consumer behavior, such as changes in customer traffic or the mix between on-premise and off-premise channels. We have incurred and may continue to incur additional costs to address government regulations and the safety of our staff members and customers.

In addition, we experienced labor shortfalls relative to our sales levels in certain parts of our workforce and/or geographies as we reopened our dining rooms after the lifting of mandatory social-distancing regulations related to the COVID-19 pandemic. During fiscal 2021, we also began to experience certain supply shortages and transportation delays largely attributable to impacts of the COVID-19 pandemic. These shortages continued in fiscal 2022 and were exacerbated by geopolitical unrest. The aggregate impact of these and other geopolitical and macroeconomic factors contributed to significantly increased commodity and wage inflation and other increased costs. We have also encountered delays in opening new restaurants due to supply chain challenges, as well as to longer lead times in obtaining licenses and permits and in the timeline required to complete the overall leasing process with landlords.

The ongoing effects of COVID-19 and its variants, along with other geopolitical and macroeconomic events could lead to further government mandates, including but not limited to capacity restrictions, shifts in consumer behavior, wage inflation, staffing challenges, product and services cost inflation, disruptions in the supply chain and delay in new restaurant openings. If these factors significantly impact our cash flow in the future, we may again implement mitigation actions such as suspending share repurchases, not declaring future dividends, increasing borrowings under our credit facility or modifying our operating strategies. Any of these measures may have an adverse impact on our business and materially adversely affect our financial performance.

Risks Related to the Restaurant Industry

The impact global and domestic economic conditions have on consumer discretionary spending could materially adversely affect our financial performance.

The COVID-19 pandemic and other geopolitical and macroeconomic events have had a significant impact on global and domestic economies and will likely continue to do so for some time in the future. Dining out is a discretionary expenditure that historically has been influenced by domestic and global economic conditions, including, but not limited to: the COVID-19 pandemic, geopolitical instability, including armed conflicts, supply shortages, interest rates above recent historical norms, unemployment, significant cost inflation, consumer confidence, consumer

purchasing and saving habits, credit conditions, stock market performance, home values, population growth, household incomes and tax policy. Material changes to governmental policy related to domestic and international fiscal concerns, and/or changes in central bank policies with respect to monetary policy, also could affect consumer discretionary spending. Any factor affecting consumer discretionary spending may influence customer traffic in our restaurants and average check amount, thus potentially having a material impact on our financial performance.

Our inability to grow comparable restaurant sales could materially adversely affect our financial performance.

We strive to increase comparable restaurant sales by improving customer traffic trends and growing average check. Changes in customer traffic and average check amount may be impacted by a variety of factors, including, without limitation: macroeconomic conditions that impact consumer discretionary spending (such as significant cost inflation and interest rates above recent historical norms); perception of our concepts' offerings in terms of quality, price, value and service; increased competition; changes in consumer eating habits; the evolving retail landscape, which is becoming increasingly influenced by technology and a growing consumer preference for convenience, value and experience; adverse weather conditions; and demographic, economic and other adverse changes in the trade areas in which our restaurants are located and changes in the regulatory environment.

We compete directly and indirectly for customer traffic with national and regional casual dining restaurant chains, as well as independently-owned restaurants. In addition, we face competition from fast casual and quick-service restaurants, grocery stores and meal kits that have increased the quality and variety of their food products in response to consumer demand. We believe that many consumers remain focused on value and if our competitors, many of whom have significantly greater resources to market aggressively to customers, promote and deliver a higher degree of perceived value, our customer traffic could suffer.

We utilize menu price increases in an effort to offset inflation of key operating costs. However, our menu price increases may be insufficient to meaningfully offset increased costs and may, if not accepted by customers, result in reduced customer traffic and unfavorable menu mix shifts (i.e. customers reducing their spend by purchasing fewer menu items or lower cost menu items). These risks became more pronounced fiscal 2022, as persistent supply shortages and a worsening inflationary environment significantly increased our costs causing us to implement pricing actions above our historical levels to protect margins. (See Item 1A — Risk Factors — “Our inability to anticipate and react effectively to changes in the costs of key operating resources may increase our cost of doing business, which could materially adversely affect our financial performance.”)

In recent years we have generated a higher mix of sales from off-premise channels as consumers have increasingly demonstrated a preference for convenience and at-home dining due to COVID-19. Growing competition in off-premise channels or our inability to differentiate our concepts in these channels could negatively impact our comparable restaurant sales performance.

If we are unable to protect our reputation, the value of our brands and sales at our restaurants may be negatively impacted, which could materially adversely affect our financial performance.

Our greatest asset is the value of our brands, which is directly linked to our reputation. We must protect our reputation in order to continue to be successful and to grow the value of our brands domestically and internationally.

Negative publicity directed at any of our brands, regardless of factual basis, such as relating to the quality of our restaurant food or consumer packaged goods, the quality of our restaurant facilities, customer complaints or litigation alleging injury or food-borne illnesses, food tampering or contamination or poor health inspection scores, sanitary or other issues with respect to food processing by us or our suppliers, the condition of our restaurants, labor relations, any failure to comply with applicable regulations or standards, allegations of harassment or disparate treatment based upon race, gender, national origin, religion or other class, allegations of sexual harassment, politically motivated accusations or other negative publicity, could damage our reputation. Any failure of our third-party delivery provider to represent our brands in a favorable manner could damage our reputation. These concerns are exacerbated by the speed with which negative information can be disseminated through social media. (See Item 1A — Risk Factors — “Any inability to effectively use and manage social media could harm our marketing efforts as well as our reputation, which could materially adversely affect our financial performance.”) Negative publicity about us could harm our reputation and damage the value of our brands, which could materially adversely affect our financial performance.

Over the past several years we have experienced and continue to experience significant labor cost inflation, which has and may continue to significantly increase our cost of doing business.

Low unemployment coupled with increases in minimum wages and minimum tip credit wages, extensions of personal and other leave policies, other governmental regulations affecting labor costs, reduced levels of legal immigration and a diminishing pool of potential staff members, which has been exacerbated by potential staff members choosing to exit the workforce, in general and hospitality industry, in particular, especially in certain localities, have and may continue to significantly increase our labor costs and make it more difficult to fully staff our restaurants, any of which could materially adversely affect our financial performance.

We believe it is becoming increasingly likely that the United States federal government will significantly increase the federal minimum wage and tip credit wage (or eliminate the tip credit wage) and require significantly more mandated benefits than what is currently required under federal law. Should this occur, other jurisdictions that have historically mandated higher wages and greater benefits than what is required under federal law may seek to further increase wages and mandated benefits. In addition to increasing the overall wages paid to our minimum wage and tip credit wage earners, these increases create pressure to increase wages and other benefits paid to other staff members who, in recognition of their tenure, performance, job responsibilities and other similar considerations, historically received a rate of pay exceeding the applicable minimum wage or minimum tip credit wage. Because we employ a large workforce, any wage increase and/or expansion of benefits mandates will have a particularly significant impact on our labor costs. Our vendors, contractors and business partners are similarly impacted by wage and benefit cost inflation, and many have or will increase their price for goods, construction and services in order to offset their increasing labor costs.

Our labor expenses include significant costs related to our self-insured health, pharmacy and dental benefit plans. Health care costs continue to rise and are especially difficult to project given that material increases in costs associated with medical claims, or an increase in the severity or frequency of such claims, may cause health care costs to vary substantially from quarter-to-quarter and year-over-year. Any significant changes to the healthcare insurance system could also impact our health care costs. Material increases in health care costs could materially adversely affect our financial performance.

While we seek to offset labor cost increases through menu price increases, more efficient purchasing practices, productivity improvements, greater economies of scale and by offering a variety of health plans to our staff members, including lower cost high deductible health plans, there can be no assurance that these efforts will be successful. If we are unable to effectively anticipate and respond to increased labor costs, our financial performance could be materially adversely affected.

The impacts of and our failure to effectively respond to pandemics, epidemics, endemics and other public health emergencies, or food safety and food-borne illness, could reduce customer traffic to our restaurants, disrupt our food supply chain or cause us to be the target of litigation, which could materially adversely affect our financial performance.

The COVID-19 pandemic significantly disrupted our business and its ongoing effects may continue to do so for the foreseeable future. The impacts of and our failure to effectively respond to future pandemics, epidemics, endemics and other public health emergencies may also significantly disrupt our business.

We also face food safety risks, including the risk of food-borne illness and food contamination (including allergen cross contamination), which are common both in the restaurant industry and the food supply chain. While we dedicate substantial resources and provide training to help ensure the safety and quality of the food we serve, these risks cannot be completely eliminated. Additionally, we rely on our network of suppliers to properly handle, store and transport our ingredients for delivery to our restaurants. Any failure in our supply chain could cause our ingredients to be contaminated, which could be difficult to detect and jeopardize the safety of our food. We freshly prepare our menu items at our restaurants, which may put us at greater risk for food-borne illness and food contamination outbreaks than some of our competitors who use processed foods or commissaries to prepare their food. The risk of food-borne illness also may increase whenever our menu items are served outside of our control, such as by third-party food delivery services, customer take-out or at catered events.

Publicized food safety concerns, regardless of accuracy, whether specifically concerning food served at any of our restaurant brands, desserts produced at our bakeries, any products bearing our branding or regarding our third-party suppliers or service providers, or the food supply more generally, could negatively affect consumer demand for our restaurants and products, which in turn could materially adversely affect our financial performance.

The demand for and availability and price of certain food items may be adversely impacted if a pathogen, such as coronavirus, Ebola, mad cow disease, SARS, swine flu, avian influenza, norovirus or other virus or bacteria, such as salmonella or E.coli, or if parasites or other toxins infect or are believed to have infected the food supply, including the food supply chain for our restaurants or bakery facilities. Additionally, customers may avoid our restaurants and it may become difficult to adequately staff our restaurants if our customers or staff members become infected with a pathogen which was actually or alleged to be contracted at our restaurants. Any adverse food safety occurrence may result in litigation against us. Although we carry liability and other insurance coverage to mitigate costs we may incur as a result of these risks, not all risks of this nature are fully insurable. Even if insured, the negative publicity associated with such an event could damage our reputation and materially adversely affect our financial performance.

In addition to selling products throughout the world through various distribution channels, including, without limitation, supermarkets, mass market retailers, club stores and various other food service and retail channels, our two bakery facilities are the only sources of most of our baked desserts to our restaurants. If any of our bakery products becomes subject to a product recall or market withdrawal, whether voluntary or involuntary, our costs to conduct such recall or market withdrawal could be significant, restaurant sales as well as third-party sales of bakery products could be negatively impacted and our reputation could be damaged, any of which could materially adversely affect our financial performance.

In addition, any adverse food safety event could result in mandatory or voluntary product withdrawals or recalls, regulatory and other investigations, and/or criminal fines and penalties, any of which could disrupt our operations, increase our costs, require us to respond to findings from regulatory agencies that may divert resources and assets, and result in potential civil fines and penalties as well as other legal action, any of which could materially adversely affect our financial performance.

Changes in, or any failure to comply with, applicable laws or regulations could materially adversely affect our ability to operate our restaurants and/or increase our cost to do so, which could materially adversely affect our financial performance.

We are subject to numerous federal, state, local and foreign laws and regulations. Each of our restaurants is subject to various laws and regulations, including license and permit requirements, that regulate many aspects of our business, including, among other things, alcoholic beverage control, health, sanitation, labor, immigration, zoning and public safety. Our failure to obtain and/or retain licenses, permits or other regulatory approvals required to operate our business could delay or prevent the opening and/or continued operation of any of our restaurants or bakeries, materially adversely affecting that facility's operations and profitability and our ability to obtain similar licenses, permits or approvals elsewhere, any of which could materially adversely affect our financial performance. We are also subject to various environmental regulations governing areas such as water usage, sanitation disposal and transportation mitigation. The United States and other countries are expanding the type, nature and scope of laws and regulations governing other environmental matters, such as climate change, reducing greenhouse gas emission and water consumption. We may incur significant additional costs to comply with these laws and regulations and may incur legal liability in the event of our failure to do so.

Our international business exposes us to additional laws and regulations, including antitrust and tax requirements, anti-boycott legislation, import/export and customs regulations and other international trade regulations, privacy laws, the USA Patriot Act and the Foreign Corrupt Practices Act.

As a provider of food products, we are subject to a comprehensive regulatory framework that governs the manufacture (including composition and ingredients), labeling, packaging and safety of food in the United States, including the Federal Food, Drug and Cosmetic Act, the Public Health Security and Bioterrorism Preparedness Response Act of 2002, the Federal Food Safety Modernization Act and regulations concerning nutritional labeling under the Patient Protection and Affordable Care Act of 2010. (See Item 1A — Risk Factors — Risks Related to the Restaurant Industry — “Our inability to respond appropriately to changes in consumer health and disclosure regulations, and to

adapt to evolving consumer dining preferences could negatively impact our operations and competitive position, which could materially adversely affect our financial performance.”)

In order to serve alcoholic beverages in our restaurants or off-premise where permitted, we must comply with alcoholic beverage control regulations which require us to apply to a state or other governmental alcoholic beverage control authority for licenses and permits. In addition, we are subject to dram shop statutes in most of the jurisdictions in which we operate, which generally provide a person injured by an intoxicated person the right to recover damages from an establishment that wrongfully served alcoholic beverages to the intoxicated person. Dram shop litigation may result in significant judgments, including punitive damages. Various federal, state, local and foreign laws and regulations govern our operations as they relate to our staff members, including such matters as minimum wages, breaks, scheduling, exempt classifications, equal pay, overtime, tip credits, fringe benefits, leaves, safety, working conditions, provision of health insurance, and citizenship or work authorization requirements. Significant increases in minimum wage rates, including the tip credit wage rate in certain states, paid or unpaid leaves of absence, equal wage legislation, mandatory sick pay and paid time off regulations in a growing number of jurisdictions, mandated health and/or COBRA benefits, or increased tax reporting, assessment or payment requirements related to our staff members who receive gratuities, or changes in interpretations of existing employment laws, including with respect to classification of exempt versus non-exempt employees, could significantly increase our labor costs, which would materially adversely affect our financial performance.

We must also comply with local, state and federal laws and regulations protecting the right to equal employment opportunities and prohibiting discrimination and harassment in the workplace. Compliance with these laws and regulations can be costly and failure to comply could create exposure to government proceedings and litigation. Even a perceived failure to comply could result in negative publicity that could damage our reputation and materially adversely affect our financial performance.

We are also subject to the regulations of the Department of Homeland Security, the U.S. Citizenship and Immigration Services and U.S. Immigration and Customs Enforcement. Despite our efforts to maintain compliance with legal requirements, including implementation of electronic verification of legal work status, some of our staff members may not meet legal citizenship or residency requirements. In addition, immigration-related employment regulations may make it more difficult for us to identify and hire qualified staff members. Our inability to maintain an experienced and qualified work force comprised of individuals who meet all legal citizenship or residency requirements could result in a disruption in our work force, sanctions against us and adverse publicity, any of which could materially adversely affect our financial performance.

Our facilities must comply with applicable requirements of the Americans with Disabilities Act of 1990 (“ADA”) and related federal, state and foreign laws and regulations which prohibit discrimination on the basis of disability with respect to public accommodations and employment. We are also subject to laws and regulations relating to information security, privacy, cashless payments and consumer credit, protection and fraud.

Many laws and regulations governing our business and operations also extend to independent third-party service providers we engage to perform certain services. While we take precautions to help ensure that our third-party service providers comply with applicable laws and to maintain an independent contractor relationship, we cannot be assured such efforts will be successful, and we may incur liability as a joint employer for failures by our independent third-party service providers to comply with applicable laws. Additionally, some jurisdictions have introduced (or may be planning to introduce) legislation seeking to mandate an employment relationship between companies that facilitate third-party delivery services and their service personnel. The U.S. Department of Labor recently introduced proposed rules the effect of which, if adopted, would be to establish a new independent contractor standard for employees nationwide. If these measures are successful, delivery costs will significantly increase and/or these companies may alter their operations or choose to no longer operate within such jurisdiction, either of which result could significantly impact our off-premise sales.

Any changes to the numerous laws governing our business or operations may create challenges for us. While we subscribe to certain services and have established procedures to identify legal and regulatory changes, we may not be able to identify and comply with every change on a timely basis. We may incur penalties and other costs, sanctions and adverse publicity by failing to comply with applicable laws, any of which could materially adversely affect our financial performance.

Our inability to respond appropriately to changes in consumer health and disclosure regulations, and to adapt to evolving consumer dining preferences, could negatively impact our operations and competitive position, which could materially adversely affect our financial performance.

Federal law requires restaurant operators with twenty or more locations to make certain nutritional information available to customers. Additionally, some state, local and foreign governments also have enacted legislation regulating or prohibiting the sale of or mandating disclosures relating to certain types and/or levels of ingredients in food served in restaurants, such as trans fats, sodium, genetically modified organisms (GMOs) and gluten, and are taxing or considering taxing and/or otherwise regulating high fat, high sugar and high sodium foods. While it remains unclear if and to what extent consumers may reconsider dining preferences in response to such requirements, it is clear that consumer dining preferences continue to evolve, and these preferences may evolve more rapidly in response to any of these new requirements. Our failure to quickly and effectively adapt to any significant shift in consumer dining preference could cause our or our licensees' restaurants to lose market share, which could materially adversely affect our financial performance.

Labor organizing could harm our operations and competitive position in the restaurant industry, which could materially adversely affect our financial performance.

Our staff members and others may attempt to unionize our workforce, establish boycotts or picket lines or interrupt our supply chains which could limit our ability to manage our workforce effectively and cause disruptions to our operations, which could materially adversely affect our financial performance. Our labor costs may significantly increase if we become unable to effectively manage our workforce and the compensation and benefits we offer to our staff members, which also could materially adversely affect our financial performance.

Adverse weather conditions, natural disasters and public health emergencies, including as the result of climate change, could unfavorably impact our restaurant sales, which could materially adversely affect our financial performance.

Adverse weather conditions, natural disasters and public health emergencies can impact customer traffic, make it more difficult to fully staff our restaurants and, more severe events, such as hurricanes, earthquakes, tornadoes, blizzards, wildfires and other natural disasters and public health emergencies, such as the COVID-19 pandemic, have resulted in and may in the future result in restaurant closures, underutilization of outdoor patio dining and curtailed operations, impediments to availability of staff and supplies and increased commodity costs, sometimes for prolonged periods of time. These effects may become more pronounced in the future as climatologists predict climate change and global warming may cause extended droughts and certain adverse weather conditions and natural disasters to become more frequent, more severe and less predictable over time. Our cash flows may be negatively impacted by delay in the receipt of proceeds under any insurance policies or programs we maintain against certain of these risks or the proceeds may not fully offset any such losses. Any or all these situations could materially adversely affect our financial performance.

Acts of violence at or threatened against our restaurants or the centers in which they are located, including civil unrest, customer intimidation, active shooter situations and terrorism, could unfavorably impact our restaurant sales, which could materially adversely affect our financial performance.

Any act of violence at or threatened against our restaurants or the centers in which they are located, including civil unrest, customer intimidation, active shooter situations and terrorist activities, may result in damage and restricted access to our restaurants and/or restaurant closures in the short-term and, in the long-term, may cause our customers and staff to avoid our restaurants. Any such situation could adversely impact customer traffic and make it more difficult to fully staff our restaurants, which could materially adversely affect our financial performance.

Risks Related to Our Business

Our inability to anticipate and react effectively to changes in the costs of key operating resources may increase our cost of doing business, which could materially adversely affect our financial performance.

The cost of products and services used in our operations are subject to volatility due to the relative availability of labor and distribution, weather, natural disasters, inventory levels and other supply and/or demand impacting events such as the COVID-19 pandemic, geopolitical events, economic conditions or other unforeseen circumstances. Climate change may further exacerbate a number of these factors. During fiscal 2021, we began to experience certain supply shortages and transportation delays largely attributable to impacts of the COVID-19 pandemic. These shortages continued in fiscal 2022 and were exacerbated by geopolitical unrest. The aggregate impact of these and other factors contributed to significant cost inflation.

We attempt to negotiate short-term and long-term agreements for some of our principal commodity, supply and equipment requirements, such as certain dairy products and poultry, depending on market conditions and expected demand. While we are in the process of contracting for certain key food and non-food supplies for fiscal 2023, these efforts may not be successful or yield our intended benefits. Due to the inflationary cost pressures we experienced in fiscal 2022, we implemented price increases above our historical levels to support our longer-term restaurant-level margin objectives. Future near-term pricing actions are likely to be at levels above historical norms to keep pace with any significant cost increases. We will continue to consider the cost environment and consumer price sensitivity when evaluating future menu price increases. In addition, on a regular basis, we carefully consider opportunities to adjust our menu offerings or ingredients to help manage product availability and cost. However, we can provide no assurance that these efforts will be successful.

We continue to evaluate the possibility of entering into similar arrangements for other commodities and periodically evaluate hedging vehicles, such as direct financial instruments, to assist us in managing risk and variability associated with such commodities. As of the end of fiscal 2022, we had no hedging contracts in place. Products and services for which we have not entered into contracts can be subject to unforeseen supply and cost fluctuations, which at times may be significant. Additionally, the cost of commodities subject to governmental regulation, such as dairy and corn, can be especially susceptible to price fluctuation. Goods we purchase on the international market may be subject to even greater fluctuations in cost and availability, which could result from a variety of factors, including the value of the U.S. dollar relative to other currencies, international trade disputes, tariffs, geopolitical unrest and varying global demand.

While we strive to engage in a competitive bidding process for our principal commodity, supply, service and equipment requirements, because certain of these products and services may only be available from a few vendors or service providers, we may not always be able to do so. Because of this lack of competition, we may be vulnerable to excessive price demands, especially as they relate to the cost of products or services that are critical to our operations or profitability.

Certain products and ingredients commonly used in food preparation are under scrutiny for possibly posing social and environmental risks, including from an animal welfare and sustainability perspective. We use many of these products and ingredients and have adopted a comprehensive Sustainable Sourcing Policy under which, among other things, we commit to a buying preference by 2025, or sooner where required, for products and ingredients that are sustainably grown and harvested and which do not have negative social impact, and for products from animals that are humanely raised and processed (“sustainable products”). While we are committed to implementing these changes in as timely and commercially feasible manner as possible, there is a risk that some of our products or ingredients may become the subject of adverse publicity before we are able to do so, regardless of factual basis. Additionally, while we make significant efforts to help ensure we will have a sufficient ongoing supply of sustainable products at a reasonable cost, because there is currently a smaller market for certain of these products, any condition affecting the demand for or supply of these products may cause significant cost and supply volatility. For example, during fiscal 2022, we experienced supply shortages and significant price volatility with respect to certain sustainable products, which largely resulted from challenges related to the COVID-19 pandemic and a growing framework of laws mandating the use of sustainable products. For these and other reasons, we cannot be certain that our supply and cost mitigation efforts or commitment to purchase sustainable products will be successful. Our international licensees are also subject to commodity price fluctuations. While they generally employ strategies to mitigate the impact these fluctuations have on

their businesses, neither we nor they can be assured such strategies will be successful. Commodity price fluctuations have and may continue to impede our international licensees' profitability, which may hamper their ability to grow and negatively impact our ability to expand our brand internationally.

Our financial performance could be materially adversely affected if we fail to retain, or effectively respond to a loss of, key executives.

The success of our business continues to depend in critical respects on the contributions of David Overton, our founder, Chairman of the Board and Chief Executive Officer, and our other senior executives. The departure of Mr. Overton or other senior executives for any reason could have a material adverse effect on our business and long-term strategic plan. We have a succession plan that includes short-term and long-term planning elements intended to allow us to successfully continue operations should any of our senior management become unavailable to serve in their respective roles. However, there is a risk that we may not be able to implement the succession plan successfully or in a timely manner or that the succession plan will not result in the same financial performance we currently achieve under the guidance of our existing executive team.

If we are unable to staff and retain qualified restaurant management and operating personnel in an increasingly competitive market, we may be unable to effectively operate and grow our business and revenues, which could materially adversely affect our financial performance.

Similar to the restaurant industry and broader economy, we have experienced and continue to experience labor shortfalls relative to our sales levels in certain parts of our workforce as we have reopened our dining rooms after the lifting of mandatory social-distancing regulations related to the COVID-19 pandemic and have expanded our bakery production. If we are unable to attract and retain qualified personnel, our restaurants and bakery operations could be short staffed, we may be forced to incur overtime expenses, and our ability to operate and expand our concepts effectively and to meet our customers' demand could be limited, any of which could materially adversely affect our financial performance.

If any of our third-party vendors experiences a failure that affects a significant aspect of our business, we may experience data loss, increased costs or other harm, any of which could materially adversely affect our financial performance.

In order to leverage our internal resources and information technology infrastructure, and to support our business continuity and disaster recovery planning efforts, we rely on third-party vendors to provide some of our essential business processes. For example, we rely on a network of third-party distribution warehouses to deliver ingredients and other materials to our restaurants. In some instances, these processes rely on technology and may be outsourced to the vendor in their entirety and in other instances we utilize these vendors' externally-hosted business applications. Our vendors' systems have experienced cybersecurity breaches, including credential stuffing attacks in which compromised user credentials were used to breach the systems, and may be vulnerable to a variety of risks, including, without limitation, theft, casualties such as fire, power loss, telecommunications failure or other catastrophic events, as well as from internal and external security breaches, denial of service attacks, viruses, worms, malware, ransomware, breaches of the algorithms they or their third-party service providers use to encrypt and protect data and other malicious or disruptive events (each, a "Security Incident" and collectively, "Security Incidents").

We also utilize third parties to provide gift card distribution and transaction processing services and to perform food delivery services. We derive substantial revenue from these aspects of our business, which could suffer in the event of any factor that adversely impacts our vendors' ability to provide such services. Such factors include, without limitation, loss of, or significant change in contractual terms of, key vendor contracts, vendor or processor failures, technology failures, damage to the reputation of any key vendor and mandated employment relationships between companies that facilitate third-party delivery services and their service personnel. (See Item 1A — Risk Factors — "Changes in, or any failure to comply with, applicable laws or regulations could materially adversely affect our ability to operate our restaurants and/or increase our cost to do so, which could materially adversely affect our financial performance.")

We continue to review options to expand the use of third-party providers in other areas. Our general practice is to seek to work with service providers that are leading performers in their industries and with technology vendors that

employ up-to-date and appropriate data security practices and internal control practices. However, we cannot guarantee that failures will not occur. The failure of third-party vendors to provide adequate services, including, as result of any Security Incident, could significantly harm our operations and reputation, which could materially adversely affect our financial performance.

We may incur additional costs if we are unable to renew our restaurant leases on similar terms and conditions, or at all, or to relocate our restaurants in certain trade areas, which could materially adversely affect our financial performance.

We currently lease all our restaurant premises and, although we may consider other arrangements, we currently plan to continue to lease our restaurant locations in the future. Some of our leases have terms that will expire in the next few years and beyond. Many of these leases include renewal options; some do not. While lease expirations allow us to opportunistically evaluate the possibility of relocating certain restaurants to higher quality sites and trade areas over time, doing so may involve additional costs, such as increased rent and other expenses related to renegotiating the terms of occupancy of an existing lease, and the costs to relocate and develop a replacement restaurant if we choose not to renew a lease, or are unable to do so, on favorable terms in a desirable location. In addition, we may elect to terminate certain leases prior to their expiration dates, and we may be unable to negotiate favorable terms for such early terminations. Additional costs related to expiring restaurant lease terms, our inability to terminate certain restaurant leases under favorable terms or the unavailability of suitable replacement locations could materially adversely affect our financial performance.

Any inability to effectively use and manage social media could harm our marketing efforts as well as our reputation, which could materially adversely affect our financial performance.

Social media provides a powerful medium for consumers, staff members and others to communicate their approval of or displeasure with a business. This aspect of social media is especially challenging because it allows any individual to reach a broad audience with an ability to respond or react, in near real time, with comments that are often not filtered or checked for accuracy. If we are unable to quickly and effectively respond, any negative publicity could “go viral” causing nearly immediate and potentially significant harm to our brand and reputation, whether or not factually accurate. Our marketing strategy includes an emphasis on social media. As social media continues to grow in popularity, many of our competitors have expanded and improved their use of social media, making it more difficult for us to differentiate our social media messaging. As a result, we need to continuously innovate and develop our social media strategies.

If we do not appropriately use and manage our social media strategies, our marketing efforts in this area may not be successful, and any failure to effectively respond to negative or potentially damaging social media, whether accurate or not, could damage our reputation, which could materially adversely affect our financial performance.

Our failure to adequately protect our intellectual property could materially adversely affect our financial performance.

We own and have applied to register trade names, logos, service marks, trademarks, copyrights and other intellectual property (collectively, “Intellectual Property”), including The Cheesecake Factory[®], North Italia[®], a collection within the Fox Restaurant Concepts subsidiary and other trademarks related to our restaurant and bakery businesses in the United States and in other countries throughout the world. Our Intellectual Property is valuable to our business and requires continuous monitoring to protect. We regularly and systemically search for misappropriations of our Intellectual Property and seek to enforce our rights whenever appropriate to do so; however, we cannot ensure success in every case and cannot possibly find all infringing uses of our Intellectual Property. Furthermore, we have not registered all our Intellectual Property throughout the world, and doing so may not be feasible because of associated costs, various foreign trademark law prohibitions or registrations by others. Our failure or inability to protect our Intellectual Property worldwide could limit our ability to globally expand our brand.

Our inability to effectively protect our Intellectual Property domestically or internationally could cause our customers to believe lesser quality products or services are ours, may reduce the capacity of our Intellectual Property to uniquely identify our products and services and/or may limit our ability to globally expand our brand, any of which could materially adversely affect our financial performance.

We face a variety of risks and challenges related to our international operations and global brand development efforts, any of which could materially adversely affect our financial performance.

International operations have a unique set of risks and challenges that differ from country to country, and include, among other risks, political instability, governmental corruption, war and threats of war, social, religious and ethnic unrest, anti-American sentiment, delayed and potentially less effective ability to respond to a crisis occurring internationally, changes in global economic conditions (such as currency valuation, disposable income, unemployment levels and increases in the prices of products and services and labor), the regulatory environment, immigration, labor and pension laws, income and other taxes, consumer preferences and practices, as well as changes in the laws and regulations governing foreign investment, joint ventures or licensing arrangements in countries where our restaurants or licensees are located and local import controls.

Operations at our international Company-owned and licensed restaurants may be negatively affected by factors outside of our control, including, but not limited to:

- difficulties in achieving the consistency of product quality and service as compared to restaurants we operate in the United States;
- changes to our recipes required by cultural norms;
- inability to obtain, at a reasonable cost, adequate and reliable supplies of ingredients and products necessary to execute our diverse menu;
- availability of experienced management to operate international restaurants according to our domestic standards;
- changes in economic conditions of our licensees, whether or not related to the operation of our restaurants;
- differences, changes or uncertainties in economic, regulatory, legal, immigration, social, climatic, and political conditions, including the possibility of terrorism, social unrest, trade embargos and/or trade restrictions, which may result in periodic or permanent closure of foreign restaurants, affect our ability to supply our international restaurants with necessary supplies and ingredients and affect international perception of our brand;
- inability of our licensees to locate profitable or suitable sites for development;
- rising cost and scarcity of labor world-wide;
- exchange rate fluctuations; and
- currency fluctuations, trade restrictions, taxes or tariffs adversely affecting our or our licensees' ability to import goods from the United States and other parts of the world that are required for operating our branded restaurants, including our cakes which are wholly manufactured in the United States.

Our international licensees are authorized to operate The Cheesecake Factory restaurant concept in licensed trade areas using certain of our Intellectual Property, including our proprietary systems. We provide extensive and detailed training to our licensees to enable their staff members to effectively execute our operating processes and procedures, and we periodically audit their performance and adherence to our requirements. However, because we do not operate these restaurants directly, we can provide no assurance that our licensees will adhere to our operating standards to the same extent as we would.

If we or our licensees fail to effectively operate our international restaurants, or if we or they fail to receive an adequate return on investment, and these difficulties are attributed to us or our brand, our reputation and brand value could be harmed, our revenues from these restaurants could be diminished and our international growth may be slowed, any of which could materially adversely affect our financial performance.

In order to support our international expansion, our bakeries supply certain of our bakery products to our branded international restaurants. In order to supply bakery products to restaurants in other countries, we may be required to adapt certain recipes to eliminate locally prohibited ingredients, comply with labeling requirements that differ from those in the United States and maintain certifications required to export to such countries. In addition, unexpected events outside of our control, such as, without limitation, trade restrictions, import and export embargos, governmental shutdowns and disruptions in shipping, may affect our ability to transport adequate levels of our bakery products to our or our licensees' international restaurants, for which we are the sole source of supply. A failure to adequately supply bakery products to our or our licensees' international restaurants could affect the customer experience

at those restaurants, resulting in decreased sales, and could, depending upon the reason for the failure, trigger contractual defaults on our part, any of which could materially adversely affect our financial performance.

As we continue to expand our brand internationally, we must comply with regulations and legal requirements, including those related to immigration and the protection of our Intellectual Property. Additionally, we must comply with domestic laws affecting U.S. businesses that operate internationally, including the Foreign Corrupt Practices Act and anti-boycott laws, and with foreign laws in the countries in which we expand our restaurants. (See Item 1A — Risk Factors — “Changes in, or any failure to comply with, applicable laws or regulations could materially adversely affect our ability to operate our restaurants and/or increase our cost to do so, which could materially adversely affect our financial performance.”) We may incur considerable liability in the event we or our licensees fail to comply with foreign or domestic laws relating to our or their operation of any international restaurant and can provide no assurance that our insurance programs or contractual indemnification rights would be effective to protect against such liabilities.

We may engage in expansion opportunities or other initiatives which may create risks to our business that could materially adversely affect our financial performance.

We may engage in other means to leverage our competitive strengths, including acquisitions of other companies, expansion of our brand to other retail opportunities and/or other initiatives. Many risks are inherent in any such merger and acquisition activity, development, investment arrangement, expansion of our brand or other initiative, including, without limitation:

- complexities associated with combining independent companies with separate businesses, customers, employees, cultures and systems;
- damaging our reputation if retail products bearing our brand are not of the same value and quality that our customers associate with our brand;
- dilution of the goodwill associated with our brand as it become more common and increasingly accessible;
- inaccurate assessment of value, growth potential, weaknesses, liabilities, contingent or otherwise, and expected profitability of such initiatives; and
- diversion of management’s attention and focus from existing operations to the expansion of our brand to non-restaurant items.

In addition to these risks, we may not achieve the intended results of any such expansion opportunities or other initiatives, which could materially adversely affect our financial performance.

If we do not appropriately scale our infrastructure in a timely manner, we may be unable to respond to and support our domestic or international opportunities for growth, which could materially adversely affect our financial performance.

We continually evaluate the appropriate level of infrastructure necessary to support our operational and development plans, including our domestic and international expansion. Likewise, if sales decline, we may be unable to reduce our infrastructure quickly enough to prevent sales deleveraging. Either circumstance could materially adversely affect our financial performance.

Our international license agreements require us to provide training and support to our licensees for their development and operation of The Cheesecake Factory restaurants. We have dedicated certain corporate personnel to international development and continue to utilize the talents of existing management to support our international licensing and operations infrastructure. In addition, one of the most important aspects of our restaurant operations is our ability to deliver dependable, quality service by experienced staff members who can execute our concepts according to our high standards. This may require training our licensees’ management personnel in the United States and our licensees’ staff members in the licensed territories, as well as providing support in the selection and development of restaurant sites, product sourcing logistics, technological systems, menu modification and other areas. If, for any reason, we are unable to provide the appropriate level of infrastructure support to our international licensees, our licensees’ operations could suffer, which could make it more difficult for us to grow our brand internationally and materially adversely affect our financial performance.

We have and may again be required to record impairment charges, be unable to fully recoup landlord improvement allowances and/or decide to discontinue operations at certain restaurants, any of which could materially adversely affect our financial performance.

We assess the potential impairment of our long-lived assets on an annual basis or whenever events or changes in circumstances indicate the carrying value of the assets or asset group may not be recoverable. Factors considered include, but are not limited to, negative cash flow, significant underperformance relative to historical or projected future operating results, significant changes in the manner in which an asset is being used, an expectation that an asset will be disposed of significantly before the end of its previously estimated useful life and significant negative industry or economic trends. At any given time, we may be monitoring a number of locations, and future impairment charges and/or closures may occur if individual restaurant performance does not improve, which could materially adversely affect our financial performance. During fiscal 2022, we recorded impairment of assets and lease terminations expense of \$31.4 million primarily related to the impairment of long-lived assets for three The Cheesecake Factory, one Other FRC and three Other restaurants. (See Note 1 of Notes to Consolidated Financial Statements in Part IV, Item 15 for further discussion of impairment of long-lived assets.)

We test our goodwill and other indefinite-lived intangible assets for impairment annually or on an interim basis if events or changes in circumstances between annual tests indicate a potential impairment. Factors considered include, but are not limited to, historical financial performance, a significant decline in expected future cash flows, unanticipated competition, changes in management or key personnel, macroeconomic and industry conditions and the legal and regulatory environment. We cannot accurately predict the amount and timing of any impairment of these assets. Should the value of goodwill or other intangible assets become impaired, there could be a material adverse effect on our financial performance. (See Note 1 of Notes to Consolidated Financial Statements in Part IV, Item 15 for further discussion of impairment of intangible assets.)

A portion of our tenant allowances at certain premises may be subject to recoupment against percentage rent otherwise payable for such sites. When we are unable to achieve sales in a sufficient amount to generate percentage rent obligations, we are not able to fully recoup available allowances at affected sites, which also could materially adversely affect our financial performance.

Our inability to secure an adequate number of high-quality sites for future restaurant openings could adversely affect our ability to grow our business.

Our ability to grow our business depends on the availability and selection of high-quality sites that meet our criteria. The number and timing of new restaurants opened during any given period, and their associated contribution to the growth of our business, depend on a number of factors including, but not limited to:

- unforeseen delays due to market conditions;
- the identification and availability of high-quality locations;
- an increase in competition for available premier locations;
- the influence of consumer shopping trends on the availability of sites in traditional locations, such as premier shopping centers;
- acceptable lease terms and the lease negotiation process;
- the availability of suitable financing for our landlords;
- the financial viability of our landlords;
- timing of the delivery of the leased premises to us from our landlords in order to perform build-out construction activities;
- obtaining, on a timely basis, all governmental licenses and permits necessary to construct and operate our restaurants, which has become more challenging beginning in 2022 as we have and may continue to experience longer than usual governmental delays in the licensing and permitting process;
- obtaining, on a timely basis, all third-party consents necessary to construct and operate our restaurants;
- successfully managing the complex design, construction and preopening processes for our highly customized restaurants;
- the availability and/or cost of raw materials and labor used in construction;
- the availability of qualified tradespeople in the local market;

- any unforeseen engineering or environmental problems with the leased premises; and
- adverse weather or other delays during the construction period.

If we are unable to manage risks related to our business, costs associated with litigation and insurance could increase, which could materially adversely affect our financial performance.

We are subject to lawsuits, administrative proceedings and claims that arise in the ordinary course of business. These matters typically involve claims by customers, staff members and others regarding issues such as food-borne illness, food safety, premises liability, dram shop liability, compliance with wage and hour requirements, work-related injuries, discrimination, harassment, disability and other operational issues common to the foodservice industry. We could be materially adversely affected by negative publicity and litigation costs resulting from these claims, regardless of their validity. Employment-related litigation, particularly with respect to claims styled as class action lawsuits, are especially costly to defend. Also, some employment-related claims in the area of wage and hour disputes are not insurable risks and many employment-related disputes involve uncertainty in judicial interpretation from state to state and from federal to state court with respect to the effectiveness of arbitration agreements with our staff members, particularly those which provide for class waivers. In recent years, we have experienced an increase in wage and hour litigation, particularly in California.

We are involved in legal proceedings, including litigation, arbitration and other claims, investigations, inspections, audits, inquiries and similar actions with litigants and other government governmental authorities. Legal proceedings, including class or collective actions can be expensive and disruptive. Some of these suits may purport or may be determined to be class or collective actions and/or involve parties seeking large and/or indeterminate amounts and may remain unresolved for several years. For example, we are currently a defendant in a number of cases containing class or collective-action allegations, or both, in which the plaintiffs have brought claims under federal and state wage and hour laws. Significant legal fees and costs in complex class action litigation or an adverse judgment or settlement that are not insured or are in excess of insurance coverage can materially and adversely affect our financial performance.

We retain financial responsibility for a significant portion of our risks and associated liabilities with respect to workers' compensation, general liability, staff member health benefits, employment practices and certain other insurable risks. Several factors may significantly increase our self-insurance costs, such as conditions of the insurance market, the availability of insurance, or changes in applicable regulations. The accrued liabilities associated with these programs are based on our annual estimate of the ultimate costs to settle known claims, as well as claims incurred but not yet reported to us ("IBNR"). Significant judgment is required to estimate IBNR amounts, as parties have yet to assert such claims. Our financial performance may be materially adversely affected if our actual claims costs significantly exceed our estimates.

Our inability or failure to execute on comprehensive business continuity and disaster recovery plans following a major disaster could interfere with our business operations, which could materially adversely affect our financial performance.

All our core and critical applications are housed in an external tier 3 data center, which is a location with redundant and dual-powered servers, storage, network links and other IT components. To mitigate business interruptions, we employ a disk-based data backup and replication infrastructure between our onsite and external data centers. We provide support for our restaurant operations, with the exception of design and construction, from our corporate headquarters in Calabasas, California, an area that is prone to natural disasters such as earthquakes and wildfires. Corporate support for our bakery operations is also performed from this centralized location. If we are unable to execute our disaster recovery procedures in whole or in part, we may experience delays in recovery and losses of data, inability to perform vital corporate functions, tardiness in required reporting and compliance, failures to adequately support field operations and other breakdowns in normal operating procedures that could expose us to administrative and other legal claims, any of which could materially adversely affect our financial performance.

A closure of or material damage to one or both of our bakery facilities could impede our ability to supply bakery products to our own and our international licensees' restaurants as well as to other bakery customers. Such an incident could also result in the loss of critical data regarding our bakery operations. Any of these events could materially adversely affect our financial performance.

Risks Related to Information Technology and Cyber Security

Information technology system failures or breaches of our network security could interrupt our operations and subject us to increased operating costs, as well as to litigation and other liabilities, any of which could materially adversely affect our financial performance.

We rely heavily on our in-restaurant and enterprise-wide computer systems and network infrastructure across our operations (“Cyber Environment”), which could be vulnerable to various risks. This reliance has grown recently as we have had to rely to a greater extent on systems such as online ordering, contactless payments, online reservations, systems supporting a remote workforce and the like. The efficient management of our operations depends upon our ability to protect our Cyber Environment against damage from theft, casualties such as fire, power loss, telecommunications failure or other catastrophic events, as well as from Security Incidents. We employ both internal resources and external consultants to conduct auditing and testing for weaknesses in our Cyber Environment to reduce the likelihood of any Security Incident and have developed a multi-discipline Security Incident response plan to help ensure that our executives are fully and accurately informed and manage, with the help of content experts, the discovery, investigation and auditing of, and recovery from any Security Incidents.

Despite these efforts, we can provide no assurance that these measures will successfully prevent all Security Incidents or mitigate losses resulting from a Security Incident. For example, during the past year we learned of a potential compromise of employee credentials that could be used to access our corporate network. While we were able to address this incident through remediation efforts including rotating the credentials at issue and did not experience any significant impacts as a result, we cannot provide assurances that future cyber incidents will not occur or that they will not materially adversely affect our business and financial performance.

Our international licensees have access to certain elements of our intellectual property within their Cyber Environment and may not have developed adequate processes to secure their Cyber Environments against a Security Incident and may not maintain robust discovery, investigation, auditing or recovery protocols, or have the ability to promptly and effectively respond to a Security Incident. Available cyber-risk insurance coverage and policy limits may not adequately cover or compensate us in the event of a Security Incident. Our financial performance could be materially adversely affected if our operations are interrupted by a Security Incident from which we are not able to promptly and fully recover, if any cyber-risk insurance is unable to fully address our losses and/or if we become subjected to litigation or regulatory action because of such an incident.

Our inability to maintain a secure environment for customers’ and staff members’ personal data could result in liability and harm our reputation, which could materially adversely affect our financial performance.

We receive and maintain certain personal information about our customers and staff members. For example, we transmit confidential credit card information in connection with credit card transactions, and we are required to collect and maintain certain personal information in connection with our employment practices, including the administration of our benefit plans. Our collection, storage, handling, use, disclosure and security of this information is regulated by U.S. federal, state and local and foreign laws and regulations. For instance, the California Consumer Privacy Act (“CCPA”), which became effective on January 1, 2020 and the California Privacy Rights Act (“CPRA”) which became effective on January 1, 2023 (the CCPA and CPRA are collectively referred to as “California Privacy Laws”), provide California residents broad rights with respect to their personal data, including the right to know about the personal information a business collects about them, the right to delete personal information collected from them, the right to opt-out of the sale of their personal information and the right to non-discrimination for exercising their rights under the California Privacy Laws. In addition, the California Privacy Laws provide a private right of action for certain data breaches coupled with statutory damages under certain circumstances. Compliance with the California Privacy Laws and other laws relating to the protection of personal information involve significant costs and could result in significant liability in the event we allow an unauthorized disclosure of personal information.

If a Security Incident were to occur involving loss of or inappropriate access to or dissemination of such personal information, we may become liable under applicable law for damages (including statutory damages) and incur penalties and other costs to remedy such an incident. Depending on the facts and circumstances of such an incident, these damages, penalties and costs could be significant and may not be covered by insurance or could exceed our

applicable insurance coverage limits. Such an event also could harm our reputation and result in litigation against us. Any of these results could materially adversely affect our financial performance.

Our ability to accept credit cards as a form of payment depends on us remaining compliant with standards set by the PCI Security Standards Council (PCI). These standards require certain levels of Cyber Environment security and procedures to protect our customers' credit card and other personal information. We have implemented a robust end-to-end encryption and tokenization technology, a public key infrastructure, to help ensure that only trusted devices can access our network, and Intrusion Detection and Intrusion Prevention (IDS/IPS) that scans data in transit detecting and to help prevent the execution of harmful code. In addition, we utilize a third-party security operations center (SOC) provider to monitor and analyze internal network traffic for potential malicious content. However, we can provide no assurance that our security measures will be successful in the event of an attempted or actual Security Incident. If these security measures are not successful, we may become subject to litigation or the imposition of regulatory penalties, which could result in negative publicity and significantly harm our reputation, either of which could materially adversely affect our financial performance.

Risks Related to Our Indebtedness

Any failure to satisfy financial covenants and/or repayment requirements under our credit facility could harm our financial condition.

On October 6, 2022, we entered into a Fourth Amended and Restated Loan Agreement (the "Loan Agreement" and the credit facility provided thereunder, the "Revolver Facility").

Under the Revolver Facility, we are subject to the following financial covenants as of the last day of each fiscal quarter: (i) a maximum ratio of net adjusted debt to EBITDAR (the "Amended Net Adjusted Leverage Ratio") of 4.25 and (ii) a minimum ratio of EBITDAR to interest and rent expense of 1.90. The Loan Agreement also contains customary events of default that include, among others, non-payment of principal, interest or fees, violation of covenants, inaccuracy of representations and warranties, bankruptcy and insolvency events, material judgements, cross defaults to material indebtedness and events constituting a change of control. The occurrence of an event of default could result in the termination of commitments under the New Revolver, the declaration that all outstanding loans are immediately due and payable in whole or in part and the requirement of cash collateral deposits in respect of outstanding letters of credit.

Any failure to maintain financial covenants under the Loan Agreement or to have sufficient liquidity to either repay or refinance the then outstanding balance at expiration of the Loan Agreement, or upon any violation of the covenants, could materially adversely affect our financial performance. In addition, the Loan Agreement contains, and any future indebtedness that we may incur may contain, financial and other restrictive covenants that limit our ability to operate our business, raise capital or make payments under our other indebtedness. (See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 for further discussion of our long-term debt.)

In addition, our increased indebtedness related to our acquisition of Fox Restaurant Concepts and our resulting higher debt-to-equity ratio, as compared to that which has existed on a historical basis, could limit our ability to obtain additional financing in the future and have other material consequences, including: increasing our vulnerability to, and limiting our flexibility in planning for, changing business and market conditions, making us more vulnerable to adverse economic and industry conditions; limiting our ability to use proceeds from any offering or divestiture transaction for purposes other than the repayment of debt; and creating competitive disadvantages compared to other companies with less indebtedness.

The indenture governing our outstanding Notes will not restrict us from incurring additional indebtedness, and the Notes and the incurrence of any additional indebtedness could limit the cash flow available for our operations, expose us to risks that could adversely affect our business, financial condition and results of operations and impair our ability to satisfy our obligations under the Notes.

In June 2021, we completed the offering of \$345.0 million aggregate principle amount of convertible senior notes due 2026 ("Notes") and issued \$175.0 million of shares of our common stock (the "Issuance"). The Notes and Issuance are collectively referred to as the "Offerings." We used the net proceeds from the Offerings to fund

approximately \$457.3 million payable in connection with the cash-settled conversion of 150,000 shares of our previously outstanding Series A convertible preferred stock and the share-settled conversion of the remaining 50,000 shares of Series A convertible preferred stock into approximately 2.4 million shares of our common stock. (See Notes 10 and 15 of Notes to Consolidated Financial Statements in Part 1, Item 1 of this report for further discussion of these events.)

As of January 3, 2023, we had approximately \$475 million in principal amount of consolidated indebtedness. The indenture governing the Notes does not contain any meaningful restrictive covenants and does not prohibit us or our subsidiaries from incurring additional indebtedness in the future. Accordingly, we may incur a significant amount of additional indebtedness to meet future financing needs. The incurrence of indebtedness could have significant negative consequences for our security holders and our business, results of operations and financial condition by, among other things:

- increasing our vulnerability to adverse economic and industry conditions;
- limiting our ability to obtain additional financing;
- requiring the dedication of a substantial portion of our cash flow from operations to service our indebtedness, which will reduce the amount of cash available for other purposes;
- limiting our flexibility to plan for, or react to, changes in our business;
- diluting the interests of our existing stockholders as a result of issuing shares of our common stock upon conversion of the Notes; and
- placing us at a possible competitive disadvantage with competitors that are less leveraged than us or have better access to capital.

Our business may not generate sufficient funds, and we may otherwise be unable to maintain sufficient cash reserves, to pay amounts due under our indebtedness, including the Notes, and our cash needs may increase in the future. If we fail to comply with covenants or to make payments under our indebtedness when due, then we would be in default under that indebtedness, which could, in turn, result in that and our other indebtedness becoming immediately payable in full.

The issuance or sale of shares of our common stock, or rights to acquire shares of our common stock, could depress the trading price of our common stock and the Notes.

We have the right to elect to settle conversion of the Notes either entirely in cash or in combination of cash and shares of common stock. Our election to convert Notes into common stock may further dilute the economic and voting rights of our existing stockholders and/or reduce the market price of our common stock. In addition, the market's expectation that conversions may occur could depress the trading price of our common stock even in the absence of actual conversions. Moreover, the expectation of conversions could encourage the short selling of our common stock, which could place further downward pressure on the trading price of our common stock.

We may also conduct future offerings of our common stock, preferred stock or other securities that are convertible into or exercisable for our common stock to finance our operations or fund acquisitions, or for other purposes. In addition, we have reserved approximately 4.0 million shares of common stock for grant under our The Cheesecake Factory Incorporated Stock Incentive Plan as of January 3, 2023. If we issue additional shares of our common stock or rights to acquire shares of our common stock, if any of our existing stockholders sells a substantial amount of our common stock, or if the market perceives that such issuances or sales may occur, then the trading price of our common stock may significantly decline. In addition, our issuance of additional shares of common stock will dilute the ownership interests of our existing common stockholders.

Hedging activity by investors in the Notes could depress the trading price of our common stock.

We expect that many investors in the Notes, including potential purchasers of the Notes, will seek to employ a convertible note arbitrage strategy. Under this strategy, investors typically short sell a certain number of shares of our common stock and adjust their short position over time while they continue to hold the Notes. Investors may also implement this type of strategy by entering into swaps on our common stock in lieu of, or in addition to, short selling shares of our common stock. This market activity, or the market's perception that it will occur, could depress the trading price of our common stock.

Provisions in the indenture governing the Notes could delay or prevent an otherwise beneficial takeover of us.

Certain provisions in the Notes and the indenture governing the Notes could make a third-party attempt to acquire us more difficult or expensive. For example, if a takeover constitutes a “fundamental change” (which is defined in the indenture governing the Notes to include certain change-of-control events and the delisting of our common stock), then noteholders will have the right to require us to repurchase their Notes for cash. In addition, if a takeover constitutes a “make-whole fundamental change” (which is defined in the indenture governing the Notes to include, among other events, fundamental changes and certain additional business combination transactions), then we may be required to temporarily increase the conversion rate for the Notes. In either case, and in other cases, our obligations under the Notes and the indenture could increase the cost of acquiring us or otherwise discourage a third party from acquiring us or removing incumbent management, including in a transaction that holders of our common stock may view as favorable.

We may be unable to raise the funds necessary to repurchase the Notes for cash following a fundamental change, or to pay the cash amounts due upon conversion, and our other indebtedness limits our ability to repurchase the Notes or pay cash upon their conversion.

Noteholders of our outstanding Notes may, subject to limited exceptions, require us to repurchase their Notes following a “fundamental change” (which is defined in the indenture governing the Notes) at a cash repurchase price generally equal to the principal amount of the Notes to be repurchased, plus accrued and unpaid interest, if any. In addition, all conversions of the Notes will be settled partially or entirely in cash. We may not have enough available cash or be able to obtain financing at the time we are required to repurchase the Notes or pay the cash amounts due upon conversion. In addition, applicable law, regulatory authorities and the Loan Agreement or any future indebtedness may restrict our ability to repurchase the Notes or pay the cash amounts due upon conversion. For example, the Loan Agreement restricts us from paying cash upon conversion of the Notes in an amount that exceeds the sum of (i) the principal amount being converted and (ii) any payments received by us or any of our subsidiaries pursuant to the exercise, settlement or termination of any related permitted bond hedge transaction.

Furthermore, the Loan Agreement places several restrictions on our ability to repurchase the Notes upon a fundamental change. Under the Loan Agreement we are permitted to repurchase Notes upon a fundamental change only if (i) no default of event of default exists and (ii) our pro forma net adjusted leverage ratio (as measured in accordance with the Loan Agreement) does not exceed 4.25 to 1.00 and our EBITDAR to interest and rental expense ratio (as measured in accordance with the Loan Agreement) is at least 1.90 to 1.00.

Our failure to repurchase the Notes or pay the cash amounts due upon conversion when required will constitute a default under the indenture governing the Notes. A default under the indenture governing the Notes or the fundamental change itself could also lead to a default under the Loan Agreement and agreements governing our other or future indebtedness, which may result in that other indebtedness becoming immediately payable in full. We may not have sufficient funds to satisfy all amounts due under the such indebtedness and the Notes.

Risks Related to Owning Our Stock

The market price of our common stock is subject to volatility.

During fiscal 2022, the price of our common stock fluctuated between \$26.05 and \$44.65 per share. The market price of our common stock may be significantly affected by a number of factors, including, but not limited to, actual or anticipated variations in our operating results or those of our competitors as compared to analyst expectations, changes in financial estimates by research analysts with respect to us or others in the restaurant industry, and announcements of significant transactions (including mergers or acquisitions, divestitures, joint ventures or other strategic initiatives) by us or others in the restaurant industry. In addition, the equity markets have experienced price and volume fluctuations that affect the stock price of companies in ways that have been unrelated to an individual company’s operating performance. The price of our common stock may continue to be volatile, based on factors specific to our company and industry, as well as factors related to the equity markets overall.

Our stock price could be adversely affected if our performance falls short of our financial guidance and/or market expectations.

Our failure to achieve performance consistent with any financial guidance we provide and/or market expectations could adversely affect the price of our stock. Factors such as comparable restaurant sales that are below our target, slowing growth of our concepts domestically, failure to execute other growth opportunities, a decline in growth of our international business, any event that causes our operating costs to substantially increase, including, without limitation, any of the events described elsewhere in these Risk Factors, our inability to obtain additional capital at market terms, or our failure to repurchase stock as expected or pay or increase dividends over time, could cause our performance to fall short of our financial guidance and/or market expectations.

Our stock price could be adversely affected if we are unable to pay or increase dividends.

While our Board declared a quarterly dividend in the second quarter of fiscal 2022 and has declared quarterly dividends since then, following the suspension that began in fiscal 2020 due to the impact of COVID-19 on our business and in conjunction with the terms of our Loan Agreement, there are no assurances that our Board will continue to declare quarterly dividends. Our ability to pay or to increase dividends on our common stock will depend on our ability to do so under the Loan Agreement or any future credit agreement as well as our ability to generate sufficient cash flows from operations and capacity to borrow funds, which may be subject to economic, financial, competitive and other factors that are beyond our control. (See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.) Our failure to pay a dividend or to increase it over time may negatively impact investor confidence in us and may negatively impact our stock price.

We cannot guarantee that our share repurchase program will be utilized to the full value approved or that it will enhance long-term stockholder value.

Our Board of Directors has authorized a share repurchase program of up to 61.0 million shares, of which approximately 5.8 million shares remained available for repurchase as of January 3, 2023. The share repurchase program does not have an expiration date, does not require the Company to purchase a specific number of shares and may be modified, suspended or terminated at any time, which may result in a decrease in the trading price of our common stock. The timing and total amount of share repurchases will depend upon market conditions and other factors and may be made from time to time in open market purchases, privately negotiated transactions, accelerated share repurchase programs, issuer self-tender offers or otherwise. Future decisions to repurchase shares are at the discretion of the Board of Directors and are based on several factors, including current and forecasted operating cash flows, capital needs associated with new restaurant development and maintenance of existing locations, dividend payments, debt levels and cost of borrowing, obligations associated with the Fox Restaurant Concepts LLC acquisition agreement (the “FRC Acquisition”), our share price and current market conditions. The timing and number of shares repurchased are also subject to legal constraints and covenants under the Loan Agreement that limit share repurchases based on a defined ratio. (See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.) In addition, the Inflation Reduction Act of 2022 introduced a 1% excise tax on share repurchases, which increases the costs associated with repurchasing shares of our common stock. Even if our share repurchase program is fully implemented, it may not enhance long-term stockholder value or may not prove to be the best use of our cash. Share repurchases could have an impact on the trading price of our common stock, increase the volatility of the price of our common stock or reduce our available cash balance such that we will be required to seek financing to support our operations.

Our stock price could be adversely affected by future sales or other dilution of our equity.

Subject to Nasdaq Listing Rules and certain restrictions on the issuance of convertible indebtedness under the Loan Agreement, we are not restricted from issuing additional common stock or preferred stock, including any securities that are convertible into or exchangeable for, or that represent the right to receive, common stock or preferred stock or any substantially similar securities. Our Board of Directors is authorized to issue additional shares of common stock and additional classes or series of preferred stock without any action on the part of the stockholders. The Board of Directors also has the discretion, without stockholder approval, to set the terms of any such classes or series of preferred stock that may be issued, including voting rights, dividend rights and preferences over the common stock with respect to dividends or upon the liquidation or winding up of our business and other terms. If we issue preferred shares that have a preference over our common stock with respect to the payment of dividends or upon liquidation, dissolution or winding up, or if we issue preferred shares with voting rights that dilute the voting power of our common stock, the rights of our common stockholders or the market price of our common stock could be materially adversely affected.

General Risk Factors

Changes in tax laws and resulting regulations could result in changes to our tax provisions and expose us to additional tax liabilities that could materially adversely affect our financial performance.

We are subject to income and other taxes in the U.S. and foreign jurisdictions. Changes in applicable U.S. or foreign tax laws and regulations, such as the 2017 enactment of Federal legislation commonly referred to as the Tax Cuts and Jobs Act, The Coronavirus Aid, Relief, and Economic Security Act of 2020 , and the Inflation Reduction Act of 2022 (collectively, the “Tax Acts”), or their interpretation and application, including the possibility of retroactive effect and changes to state tax laws that may occur in response to the Tax Acts, could affect our tax expense and profitability. In addition, the final determination of any tax audits or related litigation could be materially different from our historical income tax provisions and accruals. Changes in our tax provision or an increase in our tax liabilities, whether due to changes in applicable laws and regulations, the interpretation or application thereof, or a final determination of tax audits or litigation, could materially adversely affect our financial performance.

Our failure to establish, maintain and apply adequate internal control over our financial reporting and comply with changes in financial accounting standards or interpretations of existing standards could limit our ability to report our financial results accurately and timely or to detect and prevent fraud, any of which could materially adversely affect our financial performance.

We are subject to the ongoing internal control provisions of Section 404 of the Sarbanes-Oxley Act of 2002. These provisions provide for the identification of material weaknesses in internal control over financial reporting - a process to provide reasonable assurance regarding the reliability of financial reporting for external purposes in accordance with accounting principles generally accepted in the United States. There can be no assurance that we will be able to timely remediate material weakness in internal controls (if any) or maintain all of the controls necessary to remain in compliance. Any failure to maintain an effective system of internal control over financial reporting could limit our ability to report our financial results accurately and timely or to detect and prevent fraud, any of which could materially adversely affect our financial performance. Additionally, changes in accounting standards or new accounting pronouncements and interpretations could materially adversely affect our previously reported or future financial results, which could materially adversely affect our financial performance.

Our business and stock price could be adversely affected by the actions of activist investors.

Publicly-traded companies have increasingly become subject to activist investor campaigns. Responding to actions of an activist investor may be a significant distraction for our management and staff and could require us to expend significant time and resources, including legal fees and potential proxy solicitation expenses. Any of these conditions could materially adversely affect our financial performance.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Our corporate support center and one of our bakery production facilities are located in Calabasas Hills, California. The corporate support center consists of an 88,000 square foot main facility and a 19,000 square foot training facility on an approximately five-acre parcel of land. The bakery production facility is a 60,000 square foot facility on an approximately three-acre parcel of land. Our second bakery facility located in Rocky Mount, North Carolina is a 100,000 square foot facility on an approximately 31-acre parcel of land. Our development and design department is in a 29,000 square foot facility on approximately one acre of land in Irvine, California. All of these properties are owned by the Company. FRC's headquarters are located in Phoenix, Arizona in approximately 22,000 square feet of leased office space.

All of our Company-owned restaurants are located on leased properties, and we have no current plans to own the real estate underlying our restaurants. Below is a table showing the number of Company-owned restaurants by location.

ITEM 3. LEGAL PROCEEDINGS

See Note 14 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for a summary of legal proceedings.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on The Nasdaq Global Select Market under the symbol CAKE. There were approximately 1,450 holders of record of our common stock at February 14, 2023, and we estimate there were approximately 156,700 beneficial stockholders on that date.

On October 26, 2022, our Board increased the authorization to repurchase our common stock by 5.0 million shares to 61.0 million shares. Under this authorization, we have cumulatively repurchased 55.1 million shares at a total cost of \$1,765.6 million through January 3, 2023 with 0.7 million shares repurchased at a cost of \$21.6 million during the fourth quarter of fiscal 2022. Our share repurchase program does not have an expiration date, does not require us to purchase a specific number of shares and may be modified, suspended or terminated at any time. The timing and number of shares repurchased are subject to legal constraints and financial covenants under our credit facility that limit share repurchases based on a defined ratio.

The following table presents our purchases of our common stock during the fiscal quarter ended January 3, 2023 (in thousands, except per share data):

<u>Period</u>	<u>Total Number of Shares Purchased ⁽¹⁾</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs</u>
September 28 — November 1, 2022	255	\$ 31.64	253	6,256
November 2 — November 29, 2022	169	34.55	156	6,086
November 30 — January 3, 2023	240	32.24	240	5,847
Total	<u>664</u>		<u>649</u>	

(1) The total number of shares purchased includes 14,607 shares withheld upon vesting of restricted share awards to satisfy tax withholding obligations.

Our Board declared a quarterly dividend in the second quarter of fiscal 2022 and has declared quarterly dividends since then, following the suspension that began in fiscal 2020 due to the impact of COVID-19 on our business and in conjunction with the terms of our Loan Agreement. Future decisions to pay or to increase or decrease dividends or to repurchase shares are at the discretion of the Board and will be dependent on a number of factors, including limitations pursuant to the terms and conditions of the Loan Agreement and applicable law. (See Item 1A — Risk Factors — “Our stock price could be adversely affected if we are unable to pay or increase dividends.”)

Price Performance Graph

The following graph compares the cumulative five-year total return provided to stockholders on the Company’s common stock relative to the S&P 400 Midcap Index, the NASDAQ US Benchmark TR Index and the S&P 600 Restaurants Index. The graph assumes a \$100 initial investment and the reinvestment of dividends in each of the indices. The measurement points utilized in the graph consist of the last trading day in each calendar year, which closely approximates the last day of the respective fiscal year of the Company. The historical stock performance presented below is not intended to and may not be indicative of future stock performance.

(1) Underlying data provided by Nasdaq Global Indexes.

(2) The S&P 600 Restaurants Index is a comprehensive restaurant industry index that includes casual dining, fast casual and quick-service constituents.

This graph shall not be deemed incorporated by reference by any general statement incorporating by reference this Annual Report on Form 10-K into any filing under the Securities Act of 1933 or under the Securities Exchange Act of 1934, except to the extent that the Company specifically incorporates this information by reference, and shall not otherwise be deemed filed under such Acts.

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), which contains forward-looking statements, should be read in conjunction with our audited consolidated financial statements and related notes in Part IV, Item 15 of this report, the "Risk Factors" included in Part I, Item 1A of this report and the cautionary statements included throughout this report. The inclusion of supplementary analytical and related information herein may require us to make estimates and assumptions to enable us to fairly present, in all material respects, our analysis of trends and expectations with respect to our results of operations and financial position.

We utilize a 52/53-week fiscal year ending on the Tuesday closest to December 31 for financial reporting purposes. Fiscal year 2022 consisted of 53 weeks, while fiscal year 2021 consisted of 52 weeks. Fiscal year 2023 will consist of 52 weeks. The following MD&A includes a discussion comparing our results in fiscal 2022 to fiscal 2021. For a discussion comparing our results from fiscal 2021 to fiscal 2020, refer to "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of our Annual Report on Form 10-K for the fiscal year ended December 28, 2021, filed with the SEC on February 22, 2022.

COVID-19 Pandemic , Geopolitical and Other Macroeconomic Impacts to our Operating Environment

We have experienced significant disruptions to our business as federal, state and local restrictions have fluctuated over time to mitigate the spread of the COVID-19 virus. While most of our restaurants operated with no restrictions on indoor dining during fiscal years 2021 and 2022, our revenues were negatively impacted during periods of accelerating case counts during which we incurred increased restaurant staff absenteeism and temporary shifts in consumer behavior, such as changes in customer traffic or the mix between on-premise and off-premise channels. We have incurred and may continue to incur additional costs to address government regulations and the safety of our staff members and customers.

In addition, we experienced labor shortfalls relative to our sales levels in certain parts of our workforce and/or geographies as we reopened our dining rooms after the lifting of mandatory social-distancing regulations related to the COVID-19 pandemic. During fiscal 2021, we also began to experience certain supply shortages and transportation delays largely attributable to impacts of the COVID-19 pandemic. These shortages continued in fiscal 2022 and were exacerbated by geopolitical unrest. The aggregate impact of these and other geopolitical and macroeconomic factors contributed to significantly increased commodity and wage inflation and other increased costs. We have also encountered delays in opening new restaurants due to supply chain challenges, as well as to longer lead times in obtaining licenses and permits and in the timeline required to complete the overall leasing process with landlords.

The ongoing effects of COVID-19 and its variants, along with other geopolitical and macroeconomic events could lead to further government mandates, including but not limited to capacity restrictions, shifts in consumer behavior, wage inflation, staffing challenges, product and services cost inflation, disruptions in the supply chain and delay in new restaurant openings. If these factors significantly impact our cash flow in the future, we may again implement mitigation actions such as suspending share repurchases, not declaring future dividends, increasing borrowings under our credit facility or modifying our operating strategies. Any of these measures may have an adverse impact on our business and materially adversely affect our financial performance.

General

The Cheesecake Factory Incorporated is a leader in experiential dining. We are culinary forward and relentlessly focused on hospitality. We currently own and operate 318 restaurants throughout the United States and Canada under brands including The Cheesecake Factory[®] (210 locations), North Italia[®] (33 locations), Flower Child[®] (30 locations) and a collection of other FRC brands (35 locations). Internationally, 30 The Cheesecake Factory[®] restaurants operate under licensing agreements. Our bakery division operates two facilities that produce quality cheesecakes and other baked products for our restaurants, international licensees and third-party bakery customers.

Overview

Our strategy is driven by our commitment to customer satisfaction and is focused primarily on menu innovation, service and operational execution to continue to differentiate ourselves from other restaurant concepts, as well as to drive competitively strong performance that is sustainable. Financially, we are focused on prudently managing expenses at our restaurants, bakery facilities and corporate support center, and leveraging our size to make the best use of our purchasing power.

Investing in new Company-owned restaurant development is our top long-term capital allocation priority, with a focus on opening our concepts in premier locations within both new and existing markets. We plan to continue expanding The Cheesecake Factory and North Italia concepts, and in addition, our FRC subsidiary serves as an incubation engine, creating additional concepts for potential future growth. For The Cheesecake Factory concept, we target an average cash-on-cash return on investment of approximately 20% to 25% at the unit level, calculated by dividing restaurant-level profit (earnings before interest, taxes, depreciation and amortization and preopening costs) by our cash investment. We target an average cash-on-cash return on investment of approximately 35% for the North Italia concept and 25% to 30% for the FRC concepts. Returns are affected by the cost to build restaurants, the level of revenues that each restaurant can deliver and our ability to maximize the profitability of restaurants. Investing in new restaurant development that meets our return on investment criteria is expected to support achieving mid-teens Company-level return on invested capital.

Our overall revenue growth is primarily driven by revenues from new restaurant openings and increases in comparable restaurant sales.

For The Cheesecake Factory concept, our strategy is to increase comparable restaurant sales by growing average check and maintaining customer traffic through (1) continuing to offer innovative, high quality menu items that offer customers a wide range of options in terms of flavor, price and value, (2) focusing on service and hospitality with the goal of delivering an exceptional customer experience and (3) continuing to provide our customers with convenient options for off-premise dining, as we believe there is opportunity for a longer-term elevation of our off-premise mix compared to pre-COVID-19 pandemic levels. We are continuing our efforts on a number of initiatives, including menu innovation, a greater focus on increasing customer throughput in our restaurants, leveraging our gift card program, working with a third party to provide delivery services for our restaurants, increasing customer awareness of our online ordering capabilities, augmenting our marketing programs, enhancing our training programs and leveraging our customer satisfaction measurement platform.

Average check variations are driven by menu price increases and/or changes in menu mix. We generally update The Cheesecake Factory menus twice each year, and our philosophy is to use price increases to help offset key operating cost increases in a manner that balances supporting both our margin objectives and customer traffic levels. In prior years, we have targeted menu price increases of approximately 2% to 3% annually, utilizing a market-based strategy to help mitigate cost pressure in higher-wage geographies. Due to the inflationary cost pressures we are experiencing, we implemented menu price increases above our historical levels in the first and third quarters of fiscal 2022 and also implemented an incremental price increase in the fourth quarter of fiscal 2022 to support our longer-term restaurant-level margin objectives. Future near-term pricing actions are likely to be at levels above historical norms to keep pace with any significant cost increases. In addition, on a regular basis, we carefully consider opportunities to adjust our menu offerings or ingredients to help manage product availability and cost.

Margins are subject to fluctuations in commodity costs, labor, restaurant-level occupancy expenses, general and administrative (“G&A”) expenses and preopening expenses. Our objective is to recapture our pre-COVID-19 pandemic margins and longer-term to drive margin expansion, by leveraging incremental sales to increase restaurant-level margins at The Cheesecake Factory concept, leveraging our bakery operations, international and consumer packaged goods royalty revenue streams and G&A expense over time, and optimizing our restaurant portfolio.

We plan to employ a balanced capital allocation strategy, comprised of: investing in new restaurants that are expected to meet our targeted returns, repaying borrowings under our Revolver Facility and returning capital to shareholders through our dividend and share repurchase programs, the latter of which offsets dilution from our equity compensation program and supports our earnings per share growth. Future decisions to pay or to increase or decrease

dividends or to repurchase shares are at the discretion of the Board and will be dependent on a number of factors, including limitations pursuant to the terms and conditions of the Loan Agreement and applicable law.

Longer-term, we believe our domestic revenue growth (comprised of our targeted annual unit growth of 7%, in aggregate across concepts, and comparable sales growth), combined with margin expansion, planned debt repayments and an anticipated capital return program will support our long-term financial objective of 13% to 14% total return to shareholders, on average. We define our total return as earnings per share growth plus our dividend yield. (See Item 1A — Risk Factors — “Our stock price could be adversely affected if our performance falls short of our financial guidance and/or market expectations.”)

Results of Operations

The following table presents, for the periods indicated, information from our consolidated statements of income/(loss) expressed as percentages of revenues.

	<u>2022</u>	<u>2021</u>
Revenues	100.0 %	100.0 %
Costs and expenses:		
Food and beverage costs	24.6	22.3
Labor expenses	36.7	36.6
Other operating costs and expenses	26.7	27.0
General and administrative expenses	6.2	6.4

Net income/(loss) available to common stockholders	<u>1.3 %</u>	<u>1.7 %</u>

Fiscal 2022 Compared to Fiscal 2021

Revenues

Revenues increased 12.8% to \$3,303.2 million for fiscal 2022, including approximately \$78.4 million contributed by the 53rd week, compared to \$2,927.5 million for fiscal 2021, primarily due to an increase in comparable restaurant sales, reflecting the impact of the COVID-19 pandemic in fiscal 2021, as well as additional revenue related to new restaurant openings.

The Cheesecake Factory comparable sales increased by 7.0%, or \$162.5 million, from fiscal 2021 and increased 10.6% from fiscal 2019. The increase from fiscal 2021 was primarily driven by increased customer traffic of 6.8% primarily due to the impact of the COVID-19 pandemic in the prior year, and an increase in average check of 0.2% (based on an increase of 5.9% in menu pricing, partially offset by a 5.7% negative change in mix). Sales through the off-premise channel comprised approximately 25% of our restaurant sales during fiscal 2022 as compared to 32% in fiscal 2021. However, off-premise sales mix remains elevated versus the pre-pandemic level of 16% during fiscal 2019, even as customers continue to return to on-premise dining. We account for each off-premise order as one customer for traffic measurement purposes. Therefore, average check is generally higher for off-premise orders as most of these orders are

for more than one customer. In turn, the lower mix of sales in the off-premise channel during fiscal 2022 compared to fiscal 2021 comprised approximately 2% of the negative change in mix with a positive correlative impact to traffic. We implemented effective menu price increases of approximately 3.25%, 4.25% and 2.8% in the first, third and fourth quarters of fiscal 2022, respectively. The Cheesecake Factory average sales per restaurant operating week increased 7.3% to \$228,741 in fiscal 2022 from \$213,165 in fiscal 2021. Total operating weeks at The Cheesecake Factory restaurants increased 2.7% to 11,052 in fiscal 2022 compared to 10,758 in the comparable prior year period. Excluding the impact of the 53rd week in fiscal 2022, total operating weeks increased 0.8% to 10,841.

North Italia comparable sales increased approximately 15% from fiscal 2021 and increased approximately 22% compared to fiscal 2019. The increase from fiscal 2021 was primarily driven by increased customer traffic of 11% primarily due to the impact of the COVID-19 pandemic in the prior year, and an increase in average check of 4.0% (based on an increase of 5.5% in menu pricing, partially offset by a 1.5% negative impact from mix). North Italia average sales per restaurant operating week increased 12.1% to \$142,532 in fiscal 2022 from \$127,146 in fiscal 2021. Total operating weeks at North Italia increased 18.6% to 1,604 in fiscal 2022 compared to 1,352 in the prior year. Excluding the impact of the 53rd week in fiscal 2022, total operating weeks increased 16.2% to 1,571.

Restaurants become eligible to enter the comparable sales base in their 19th month of operation. At January 3, 2023, there were four The Cheesecake Factory restaurants and eight North Italia restaurants not yet in the comparable sales base. International licensed locations and restaurants that are no longer in operation, including those which we have relocated, are excluded from comparable sales calculations.

Food and Beverage Costs

Food and beverage costs consist of raw materials and ingredients used in the food and beverage products sold in our restaurants and to our third-party bakery customers. As a percentage of revenues, food and beverage costs were 24.6% for fiscal 2022 compared to 22.3% for fiscal 2021, primarily due to inflation across most categories in excess of menu price increases (1.9%). Beginning in the fourth quarter of fiscal 2022, we retitled this income statement line item from “Cost of Sales” to “Food and Beverage Costs.” This is a title change only, and there is no difference in the classification of items within this category of costs.

The Cheesecake Factory restaurant menus are among the most diversified in the foodservice industry and, accordingly, are not overly dependent on a few select commodities. Changes in costs for one commodity sometimes can be offset by cost changes in other commodity categories. The principal commodity categories for our restaurants include general grocery items, dairy, produce, seafood, poultry, meat and bread. (See the discussion of our contracting activities in Part II, Item 7A — “Quantitative and Qualitative Disclosures About Market Risk.”)

For new restaurants, food and beverage costs are typically higher for a period of time after opening until our management team becomes more accustomed to predicting, managing and servicing the sales volumes at these restaurants.

Labor Expenses

As a percentage of revenues, labor expenses, which include restaurant-level labor costs and bakery production labor, including associated fringe benefits, were 36.7% and 36.6% in fiscal 2022 and fiscal 2021, respectively. This increase was primarily due to wage rate inflation in excess of menu price increases (0.8%), offset by a decrease in group medical insurance costs due to lower claim activity (0.8%) in fiscal 2022.

For new restaurants, labor expenses are typically higher for a period of time after opening while our management team becomes more accustomed to predicting and managing the sales volumes at the new restaurants.

Other Operating Costs and Expenses

Other operating costs and expenses consist of all other restaurant-level operating costs, the major components of which are occupancy expenses (rent, common area expenses, insurance, licenses, taxes and utilities), dining room and to-go supplies, repairs and maintenance, janitorial expenses, credit card processing fees, marketing including delivery commissions, and incentive compensation, as well as bakery production overhead. As a percentage of revenues, other

operating costs and expenses were 26.7% and 27.0% in fiscal 2022 and fiscal 2021, respectively. This variance was primarily driven by sales leverage within occupancy and building costs (0.2%) and increased restaurant-level incentive compensation expense (0.2%).

G&A Expenses

G&A expenses consist of the restaurant management recruiting and training program, restaurant field supervision, corporate support and bakery administrative organizations, as well as gift card commissions to third-party distributors. As a percentage of revenues, G&A expenses were 6.2% and 6.4% for fiscal 2022 and fiscal 2021, respectively. This variance was primarily driven by lower corporate incentive compensation expense (0.2%).

Depreciation and Amortization Expenses

As a percentage of revenues, depreciation and amortization expenses were 2.8% in fiscal 2022 compared to 3.1% in fiscal 2021 primarily due to sales leverage.

Impairment of Assets and Lease Termination Expenses

During fiscal 2022, we recorded impairment of assets and lease terminations expense of \$31.4 million primarily related to the impairment of long-lived assets for three The Cheesecake Factory, one Other FRC and three Other restaurants that are primarily located in areas which have not fully recovered from the pandemic.

During fiscal 2021, we recorded impairment of assets and lease terminations expense of \$18.1 million primarily related to the impairment of long-lived assets for three The Cheesecake Factory and two Other restaurants.

See Notes 1 and 6 of Notes to Consolidated Financial Statements in Part 1V, Item 15 of this report for further discussion of our long-lived and intangible assets.

Acquisition-Related Contingent Consideration, Compensation and Amortization Expense/(Benefit)

We recorded a \$13.4 million and \$19.5 million of expense during fiscal 2022 and 2021, respectively, of acquisition-related contingent consideration, compensation and amortization. In fiscal 2022, the fair value of the contingent consideration and compensation liability increased by \$4.7 million due to a \$8.3 million increase in the fair value primarily stemming from a change in the volatility factors, as well as an increase in fiscal 2022 revenues and estimated future revenues utilized in the calculation and amortization, partially offset by a payment of \$7.2 million per the FRC acquisition agreement. In fiscal 2021, we recorded a \$15.3 million increase in the contingent consideration and compensation liability due to the impact of an amendment to the FRC acquisition agreement that, among other things, extended the measurement period through fiscal 2026, as well as to an increase in fiscal 2021 revenues and estimated future revenues utilized in the fair value calculation.

Preopening Costs

Preopening costs were \$16.8 million for fiscal 2022 compared to \$13.7 million for fiscal 2021. We opened 13 restaurants in fiscal 2022 comprised of three The Cheesecake Factory, four North Italia, three Other FRC and three Other locations compared to 14 restaurants in fiscal 2021 comprised of two The Cheesecake Factory, six North Italia, four Other FRC and two Other locations. Restaurant-level preopening costs include all costs to relocate and compensate restaurant management staff members during the preopening period, costs to recruit and train hourly restaurant staff members, and wages, travel and lodging costs for our opening training team and other support staff members. Also included in preopening costs are expenses for maintaining a roster of trained managers for pending openings, the associated temporary housing and other costs necessary to relocate managers in alignment with future restaurant opening and operating needs. Preopening costs can fluctuate significantly from period to period based on the number, mix and timing of restaurant openings and the specific preopening costs incurred for each restaurant. The increase in preopening cost from fiscal 2021 primarily relates to a higher number of managers in reserve for pending openings, partially offset by decreased number of openings.

Interest and Other Expense, Net

Interest and other expense, net was \$6.0 million in fiscal 2022 compared to \$10.7 million in fiscal 2021. This decrease was primarily due to higher interest expense in the prior year (\$3.5 million), mainly related to our interest rate swap, which was terminated in June 2021.

Income Tax Benefit

In fiscal 2022, we had an income tax benefit of \$10.2 million, an effective tax rate of (31.1%), compared to an income tax benefit of \$0.8 million, an effective tax rate of (1.1%), in fiscal 2021. The change was due primarily to a higher proportion of employment credits in relation to income before income taxes (48.7%) and our reserve for uncertain tax positions in fiscal 2021 (12.6%). These favorable factors were partially offset by a higher proportion of non-deductible losses as compared to non-taxable gains in fiscal 2021 on our investments in variable life insurance contracts used to support our non-qualified deferred compensation plan (“Non-Qualified Plans”) in relation to income before income taxes (12.6%), the benefit to our net operating loss carryback recorded in fiscal 2021 of our decision to accelerate payment of certain FICA taxes deferred pursuant to the CARES Act (6.3%), a tax shortfall in fiscal 2022 related to equity compensation (5.5%) and a higher proportion of state taxes expense in relation to income before income taxes (4.7%). (See Note 18 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of income taxes.)

Non-GAAP Measures

Adjusted net income and adjusted diluted net income per share are supplemental measures of our performance that are not required by or presented in accordance with GAAP. These non-GAAP measures may not be comparable to similarly-titled measures used by other companies and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. We calculate these non-GAAP measures by eliminating from net income and diluted net income per common share the impact of items we do not consider indicative of our ongoing operations. To reflect the potential impact of the conversion of our Series A preferred stock into common stock for the period that it was outstanding prior to the conversion on June 15, 2021, we exclude the preferred dividend and assume all convertible preferred shares have been converted into common stock. (See Note 15 of Notes to Condensed Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our preferred stock.) We use these non-GAAP financial measures for financial and operational decision-making and as a means to evaluate period-to-period comparisons. Our inclusion of these adjusted measures should not be construed as an indication that our future results will be unaffected by unusual or infrequent items. In the future, we may incur expenses or generate income similar to the adjusted items.

Following is a reconciliation from net income and diluted net income per common share to the corresponding adjusted measures (in thousands, except per share data):

	<u>2022</u>	<u>2021</u>
Net income available to common stockholders	\$ 43,123	\$ 49,131
Dividends on Series A preferred stock	—	18,661
Net income attributed to Series A preferred stock	—	4,581
COVID-19 related costs ⁽¹⁾	—	4,917
Impairment of assets and lease termination expenses	31,387	18,139
Acquisition-related contingent consideration, compensation and amortization expenses	13,368	19,510
Termination of interest rate swap	—	2,354
Uncertain tax positions	—	7,139
Tax effect of adjustments ⁽²⁾	<u>(11,637)</u>	<u>(11,679)</u>
Adjusted net income	<u>\$ 76,241</u>	<u>\$112,753</u>
Diluted net income per common share	\$ 0.86	\$ 1.01
Dividends on Series A preferred stock	—	0.35
Net income attributable to Series A preferred stock	—	0.09
Assumed impact of potential conversion of Series A preferred stock into common stock ⁽³⁾	—	(0.08)
COVID-19 related costs ⁽¹⁾	—	0.09
Impairment of assets and lease termination expenses	0.62	0.34
Acquisition-related contingent consideration, compensation and amortization expenses	0.27	0.37
Termination of interest rate swap	—	0.04
Uncertain tax positions	—	0.13
Tax effect of adjustments ⁽²⁾	<u>(0.23)</u>	<u>(0.22)</u>
Adjusted net income per share ⁽⁴⁾	<u>\$ 1.51</u>	<u>\$ 2.13</u>

(1) Represents incremental costs associated with the COVID-19 pandemic such as additional sanitation, personal protective equipment, sick and vaccination pay, and healthcare benefits. During fiscal 2021, we recorded \$4.9 million for these costs with approximately \$4.6 million reflected in labor expenses and \$0.3 million in other operating expenses.

(2) Based on the federal statutory rate and an estimated blended state tax rate, the tax effect on all adjustments assumes a 26% tax rate.

(3) Represents the impact of assuming the conversion of Series A preferred stock into common stock (0 and 4,431,140 shares for fiscal 2022 and fiscal 2021, respectively), resulting in an assumption of 50,414,160 and 51,959,879 weighted-average common shares outstanding for fiscal 2022 and fiscal 2021, respectively.

(4) Adjusted net income per share may not add due to rounding.

Fiscal 2023 Outlook

This discussion contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, as codified in Section 27A of the Securities Act, and Section 21E of the Exchange Act and should be read in conjunction with our consolidated financial statements and related notes in Part IV, Item 15 of this report, the “Risk Factors” included in Part I, Item 1A of this report and the cautionary statements included throughout this report.

Based on recent trends and assuming no material operating or consumer disruptions, we anticipate total revenue for fiscal 2023 to be approximately \$3.5 billion to \$3.6 billion, with The Cheesecake Factory average sales per location reaching approximately \$13 million. Including the 3.5% February 2023 price increase, we will have 10.5% pricing in The Cheesecake Factory menu, and we will evaluate the level of pricing for the summer menu based on inflationary trends.

During fiscal 2023, we currently estimate total inflation across our commodities, total labor (factoring in the latest trends in wage rates and channel mix, as well as in other components such as payroll taxes and benefits) and other operating costs and expenses to be in the mid-single digit range. However, there remains measurable risk associated with cost fluctuations driven by the current environment. We estimate preopening costs of approximately \$24 million. Based on these factors, we expect fiscal 2023 net income margin of approximately 4% at the mid-point of the estimated revenue range.

We plan to open as many as 20 to 22 new restaurants in fiscal 2023, including five to six The Cheesecake Factory restaurants, five to six North Italia restaurants and 10 restaurants within our FRC business, which includes three to four Flower Child locations. We anticipate approximately \$165 to \$175 million in cash capital expenditures to support this level of unit development, as well as required maintenance on our restaurants. Restaurant opening dates may be impacted by supply chain challenges and permit approval delays.

Total revenue for the first quarter of fiscal 2023 are expected to be approximately \$850 million to \$880 million. We anticipate commodity inflation of approximately 10% to 12% and expect labor inflation of approximately 6%. Based on these factors, we expect first quarter fiscal 2023 net income margin of approximately 3% to 3.5%.

Liquidity and Capital Resources

Our corporate financial objectives are to maintain a sufficiently strong and conservative balance sheet to support our operating initiatives and unit growth while maintaining financial flexibility to provide the financial resources necessary to protect and enhance the competitiveness of our restaurant and bakery brands and to provide a prudent level of financial capacity to manage the risks and uncertainties of conducting our business operations under various economic and industry cycles. Typically, cash flows generated from operating activities are our principal source of liquidity, which we use to finance our restaurant expansion plans, ongoing maintenance of our restaurants and bakery facilities and investment in our corporate and information technology infrastructures. However, given the impact of the COVID-19 pandemic on our operations, during fiscal 2020 we increased borrowings under our then-existing credit facility and issued convertible preferred stock to increase our liquidity. During fiscal 2021, we used net proceeds from issuing convertible senior notes and additional common stock to fund the repurchase of the majority of our Series A preferred stock and the conversion of the remaining Series A preferred stock into common stock, simplifying our capital structure and eliminating future convertible preferred stock dividends. We also utilized a portion of the net proceeds to reduce borrowings under our then-existing credit facility.

Similar to many restaurant and retail chain store operations, we utilize operating lease arrangements for all of our restaurant locations. Accordingly, our lease arrangements reduce, to some extent, our capacity to utilize funded indebtedness in our capital structure. We are not limited to the use of lease arrangements as our only method of opening new restaurants. However, we believe our operating lease arrangements continue to provide appropriate leverage for our capital structure in a financially efficient manner.

During fiscal 2022, our cash and cash equivalents decreased by \$74.9 million to \$114.8 million. The following table presents, for the periods indicated, a summary of our key cash flows from operating, investing and financing activities (in millions):

	<u>Fiscal Year</u>	
	<u>2022</u>	<u>2021</u>
Cash provided by operating activities	\$ 161.9	\$ 213.0
Additions to property and equipment	(112.5)	(66.9)
Acquisition-related deferred consideration and compensation	(18.3)	(17.0)
Convertible debt issuance, net of issuance cost	—	334.9
Common stock issuance, net of issuance cost	—	167.1
Borrowings on credit facility	130.0	—
Repayments on credit facility	(130.0)	(150.0)
Series A preferred stock cash-settled conversion	—	(443.8)
Series A preferred stock dividends paid	—	(18.7)
Proceeds from exercises of stock options	0.1	24.8
Common stock dividends paid	(42.3)	(0.3)
Treasury stock purchases	(63.1)	(5.8)

Cash Provided by Operating Activities

Cash flows from operations decreased by \$51.1 million from fiscal 2021 primarily due to lower net income, the timing of payroll disbursements in relation to the fiscal 2022 versus 2021 year-end dates, higher gift card redemptions and lower accrued incentive compensation. These factors were partially offset by collection of our fiscal 2020 net operating loss carryback refund in fiscal 2022, the payback in fiscal 2021 of payroll taxes that were deferred in fiscal 2020 under the CARES Act and higher non-cash impairment expense in fiscal 2022. Typically, our requirement for working capital has not been significant since our restaurant customers pay for their food and beverage purchases in cash or cash equivalents at the time of sale, and we are able to sell many of our restaurant inventory items before payment is due to the suppliers of such items.

Property and Equipment

Capital expenditures for new restaurants, including locations under development as of each fiscal year-end, were \$55.1 million and \$31.7 million for fiscal 2022 and 2021, respectively. Capital expenditures also included \$51.8 million and \$30.1 million for our existing restaurants and \$5.6 million and \$5.1 million for bakery and corporate capacity and infrastructure investments in fiscal 2022 and 2021, respectively.

We opened 13 restaurants in fiscal 2022 comprised of three The Cheesecake Factory, four North Italia, three Other FRC and three Other locations compared to 14 restaurants in fiscal 2021 comprised of two The Cheesecake Factory, six North Italia, four Other FRC and two Other locations. We expect to open as many as 20 to 22 new restaurants in fiscal 2023 across our portfolio of concepts. We anticipate approximately \$165 to \$175 million in capital expenditures to support this level of unit development, as well as required maintenance on our restaurants.

Acquisition-Related Deferred Consideration and Compensation

During fiscal 2022 and 2021, we made payments of \$11.1 million and \$17.0 million, respectively, for deferred consideration related to the FRC acquisition. During fiscal 2022, we also made a payment of \$7.2 million for deferred consideration and contingent consideration related to the FRC acquisition.

Convertible Senior Notes

On June 15, 2021, we issued \$345.0 million in aggregate principal amount of convertible senior notes (“Notes”), which will mature on June 15, 2026, unless earlier repurchased, redeemed or converted. The net proceeds from the sale of the Notes were approximately \$334.9 million after deducting issuance costs related to the Notes. At January 3, 2023, the conversion rate for the Notes was 13.0675 shares of common stock per \$1,000 principal amount of the Notes, which represents a conversion price of approximately \$76.53 per share of common stock. In connection with the cash dividend that was declared by our Board on February 16, 2023, on March 21, 2023 we will adjust the conversion rate (which is expected to increase) and the conversion price (which is expected to decrease) of the Notes in accordance with the terms. (See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of the Notes.)

Common Stock Issuance

On June 15, 2021, we issued 3.125 million shares of our common stock for \$175.0 million. In connection with the issuance, we incurred direct and incremental costs of \$8.0 million.

Credit Facility

On October 6, 2022, we entered into a Fourth Amended and Restated Loan Agreement (the “Loan Agreement” and the revolving credit facility provided thereunder, the “Revolver Facility”). The Loan Agreement amends and restates in its entirety our prior credit agreement. The Revolver Facility, which terminates on October 6, 2027, provides us with revolving loan commitments that total \$400 million, of which \$50 million may be used for issuances of letters of credit. The Revolver Facility contains a commitment increase feature that, subject to certain conditions precedent, could provide for an additional \$200 million in revolving loan commitments. Our obligations under the Revolver Facility are unsecured. Certain of our material subsidiaries have guaranteed our obligations under the Revolver Facility. During fiscal 2021, we utilized a portion of the net proceeds from our Notes and common share offerings to reduce the balance on our then-existing credit facility by \$150.0 million. On October 6, 2022, we repaid the outstanding balance under the prior credit facility and borrowed the same amount on the Revolver Facility. As of January 3, 2023, we had net availability for borrowings of \$238.5 million, based on a \$130.0 million outstanding debt balance and \$31.5 million in standby letters of credit under the Revolver Facility.

Under the Revolver Facility, we are subject to financial covenants, as well as to customary events of default that, if triggered, could result in acceleration of the maturity of the Revolver Facility. Subject to certain exceptions, the Revolver Facility also limits distributions with respect to our equity interests, such as cash dividends and share repurchases, based on a defined ratio, and also sets forth negative covenants that restrict indebtedness, liens, investments, sales of assets, fundamental changes and other matters. At January 3, 2023, we were in compliance with all covenants in effect at that date. (See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.)

Series A Preferred Stock

During the second quarter of fiscal 2021, we paid a cash dividend on our Series A preferred stock of \$5.1 million. Additionally, during the second quarter of fiscal 2021, we paid \$457.3 million in connection with the cash-settled conversion of 150,000 shares of our outstanding Series A preferred stock (effected through a repurchase agreement), and the share-settled conversion of the remaining 50,000 shares of our outstanding Series A preferred stock into 2,400,864 shares of our common stock, of which \$13.6 million was deemed to be a dividend. (See Note 15 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our preferred stock.)

Common Stock Dividends

Common stock dividends of \$42.3 million and \$0.3 million were paid in fiscal 2022 and 2021, respectively. The increase is primarily due to the resumption of our quarterly dividend in the second quarter of fiscal 2022 after the suspension that began in fiscal 2020 due to the impact of COVID-19 on our business and in conjunction with the terms of our Loan Agreement. As further discussed in Note 15 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report, in February 2023, our Board declared a quarterly dividend to be paid in March 2023. Future decisions

to pay or to increase or decrease dividends are at the discretion of the Board and will be dependent on our operating performance, financial condition, capital expenditure requirements, limitations on cash distributions pursuant to the terms and conditions of the Loan Agreement and applicable law, and other such factors that the Board considers relevant.

Share Repurchases

On October 26, 2022, our Board increased the authorization to repurchase our common stock by 5.0 million shares to 61.0 million shares. Under this authorization, we have cumulatively repurchased 55.1 million shares at a total cost of \$1,765.6 million through January 3, 2023. We repurchased 2.0 million shares at a cost of \$63.1 million during fiscal 2022 compared to 0.1 million shares at a cost of \$5.8 million fiscal 2021. This increase is primarily due to the resumption of our share repurchase program in the second quarter of fiscal 2022 after the suspension that began in fiscal 2020 due to the impact of COVID-19 on our business and in conjunction with the terms of our Loan Agreement.

Our objectives with regard to share repurchases have been to offset the dilution to our shares outstanding that results from equity compensation grants and to supplement our earnings per share growth. Our share repurchase program does not have an expiration date, does not require us to purchase a specific number of shares and may be modified, suspended or terminated at any time. Future decisions to repurchase shares are at the discretion of the Board and are based on several factors, including current and forecasted operating cash flows, capital needs associated with new restaurant development and maintenance of existing locations, dividend payments, debt levels and cost of borrowing, obligations associated with the FRC acquisition, our share price and current market conditions. The timing and number of shares repurchased are also subject to legal constraints and financial covenants under our credit facility that limit share repurchases based on a defined ratio. (See Note 15 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our repurchase authorization and methods.)

Contractual Obligations and Commercial Commitments

The following table summarizes our undiscounted contractual obligations and commercial commitments as of January 3, 2023 (amounts in millions):

	Payment Due by Period				
	Total	Less than 1 Year	1-3 Years	4-5 Years	More than 5 Years
<u>Contractual obligations</u>					
Recorded contractual obligations:					
Operating leases liabilities ⁽¹⁾	\$ 2,021.0	\$ 142.8	\$ 267.2	\$ 271.4	\$ 1,339.6
Long-term debt	468.0	—	—	468.0	—
Acquisition-related deferred consideration	11.3	11.3	—	—	—
Uncertain tax positions ⁽²⁾	3.8	—	3.8	—	—
Unrecorded contractual obligations:					
Purchase obligations ⁽³⁾	129.9	112.1	16.4	1.0	0.4
Real estate obligations ⁽⁴⁾	252.4	75.9	28.8	14.3	133.4
Total	<u>\$ 2,886.4</u>	<u>\$ 342.1</u>	<u>\$ 316.2</u>	<u>\$ 754.7</u>	<u>\$ 1,473.4</u>
<u>Other commercial commitments</u>					
Standby letters of credit	<u>\$ 31.5</u>	<u>\$ 31.5</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>

(1) Includes \$845.1 million related to options to extend lease terms that are reasonably certain of being exercised. (See Note 11 in Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for discussion of leases.)

(2) Represents liability for uncertain tax positions. (See Note 18 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of income taxes.)

(3) Includes obligations for inventory purchases, equipment purchases, information technology and other miscellaneous commitments. Amounts exclude agreements that are cancelable without significant penalty.

- (4) Real estate obligations include construction commitments, net of up-front landlord construction contributions, and legally binding minimum lease payments for leases signed but not yet commenced. Amounts exclude agreements that are cancelable without significant penalty.

The FRC acquisition agreement also included a contingent consideration provision which is payable annually from 2022 through 2027 and is based on achievement of revenue and profitability targets for the FRC brands other than North Italia and Flower Child with considerations made in the event we undergo a change in control or divest any FRC brand (other than North Italia and Flower Child) during the five years after Closing. The liability for this contingent consideration provision was \$28.6 million at January 3, 2023. See Note 2 in Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for discussion of the fair value measurement for this liability. We are also required to provide financing to FRC in an amount sufficient to support achievement of these targets during the five years after Closing.

Cash Flow Outlook

We believe that our cash and cash equivalents, combined with expected cash flows provided by operations and available borrowings under the Revolver Facility, will provide us with adequate liquidity for the next 12 months and the foreseeable future.

As of January 3, 2023, we had no financing transactions, arrangements or other relationships with any unconsolidated entities or related parties. Additionally, we had no financing arrangements involving synthetic leases or trading activities involving commodity contracts.

Critical Accounting Estimates

Critical accounting policies are those we believe are most important to portraying our financial condition and results of operations and also require the greatest amount of subjective or complex judgments by management. Judgments and uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. We consider the following policies to be the most critical in understanding the judgment that is involved in preparing our consolidated financial statements.

Contingent Consideration and Compensation Liability

The Acquisition agreement included a contingent consideration provision, a portion of which was considered part of the acquisition consideration and the remainder of which was considered future compensation expense. This contingent consideration and compensation is payable annually from 2022 through 2027 and is based on achievement of revenue and profitability targets for the FRC brands other than North Italia and Flower Child. The fair value of the contingent consideration and compensation liability is determined utilizing a Monte Carlo model based on estimated future revenues, margins, volatility factors and discount rates, among other variables and estimates and has no minimum or maximum payment. The undiscounted range of outcomes per the Monte Carlo model was \$0 to \$276.0 million at January 3, 2023 and \$0 to \$204.0 million at December 28, 2021. During fiscal 2022, the fair value of the contingent consideration and compensation liability increased by \$4.7 million to \$28.6 million due to an \$8.3 million increase in the fair value primarily stemming from a change in the volatility factors, as well as an increase in fiscal 2022 revenues and estimated future revenues utilized in the calculation and amortization, partially offset by a payment of \$7.2 million per the FRC acquisition agreement. The fair value of the contingent consideration and compensation liability is highly subjective, and results could change materially if different estimates and assumptions were used.

Indefinite-Lived Intangible Assets

Goodwill and other indefinite-lived intangible assets are not amortized and are tested for impairment annually as of the first day of our fiscal fourth quarter or on an interim basis if events or changes in circumstances between annual tests indicate a potential impairment. First, we determine if, based on qualitative factors, it is more likely than not that an impairment exists. Factors considered include, but are not limited to, historical financial performance, assumptions related to the COVID-19 pandemic, wage, product and services inflation, competitive environment, macroeconomic and industry conditions, results of prior impairment tests and share price performance. Any adverse change in these factors could have a significant impact on the recoverability of these assets and could have a material impact on our

consolidated financial statements. If the qualitative assessment indicates that it is more likely than not that an impairment exists, then a quantitative assessment is performed.

The quantitative assessments require the use of estimates and assumptions regarding future cash flows and asset fair values. For the goodwill impairment test, the estimated fair value of the reporting units is determined using a blend of the income approach using a discounted cash flow analysis and the market capitalization approach. The fair value of the trade names and trademarks is estimated using the relief from royalty method. Key assumptions include projected revenue growth and operating expenses, discount rates, royalty rates and other factors that could affect fair value or otherwise indicate potential impairment. Estimates of revenue growth and operating expenses are based on internal projections and consider historical performance and forecasted growth, including assumptions related to the COVID-19 pandemic, the cost environment and macroeconomic and industry conditions. The discount rate is based on the estimated cost of capital that reflects the risk profile of the related business. These estimates, as well as the selection of comparable companies and valuation multiples used in the market approaches, are subjective, and our ability to realize future cash flows and asset fair values is affected by factors such as changes in economic conditions and operating performance. These fair value assessments could change materially if different estimates and assumptions were used.

We did not record any impairment charges related to indefinite-lived intangible assets in fiscal 2022 or 2021. We recorded impairment charges related to indefinite-lived intangible assets of \$180.8 million in fiscal 2020. (See Note 1 in Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of these impairments.)

Long-Lived Assets

We assess the potential impairment of our long-lived assets on an annual basis or whenever events or changes in circumstances indicate that the carrying value of the assets or asset group may not be recoverable. Factors considered include, but are not limited to, negative cash flow, significant underperformance relative to historical or projected future operating results, significant changes in the manner in which an asset is being used, an expectation that an asset will be disposed of significantly before the end of its previously estimated useful life and significant negative industry or economic trends.

Assessing whether impairment testing is warranted and, if so, determining the amount of expense require the use of estimates and assumptions regarding future cash flows and asset fair values. Key assumptions include projected revenue growth and operating expenses, as well as forecasting asset useful lives and selecting an appropriate discount rate. Estimates of revenue growth and operating expenses are based on internal projections and consider the restaurant's historical performance, the local market economics and the business environment. The discount rate is based on the yield curve rate for U.S. Treasury securities with a duration that coincides with the period covered by the cash flows. These estimates are subjective and our ability to realize future cash flows and asset fair values is affected by factors such as changes in economic conditions and operating performance.

In fiscal 2022, we recorded \$31.4 million of expense primarily related to the impairment of three The Cheesecake Factory, one Other FRC and three Other restaurants. In fiscal 2021, we recorded \$16.3 million of expense primarily related to the impairment of long-lived assets for three The Cheesecake Factory and two Other restaurants. In fiscal 2020, we recorded \$36.2 million of expense primarily related to the impairment of one The Cheesecake Factory, one North Italia, two Other FRC and six Other restaurants, as well as lease termination costs and accelerated depreciation for one The Cheesecake Factory and seven Other restaurants. (See Note 1 in Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion related to long-lived asset impairment.)

Leases

Lease terms include the build-out period for our leases where no rent payments are typically due under the terms of the lease, as well as options to renew when we deem we have significant economic incentive to exercise the extension. When determining if we have a significant economic incentive, we consider relevant factors, such as contractual, asset, entity and market-based considerations. Option periods are included in the lease term for the majority of our leases. Termination rights have not been factored into the lease terms since based on our probability assessment we are reasonably certain we will not terminate our leases.

We cannot determine the interest rate implicit in our leases because we do not have access to the lessor's estimated residual value or the amount of the lessor's deferred initial direct costs. Therefore, we use our incremental borrowing rate as the discount rate for our leases. Our incremental borrowing rate for a lease is the rate of interest we would have to pay on a collateralized basis to borrow an amount equal to the lease payments under similar terms. Because we do not generally borrow on a collateralized basis, we derive an appropriate incremental borrowing rate using the interest rate we pay on our non-collateralized borrowings, adjusted for the amount of the lease payments, the lease term and the effect of designating specific collateral with a value equal to the unpaid lease payments for that lease.

The reasonably certain lease term and the incremental borrowing rate for each restaurant location require judgment by management and can impact the classification and accounting for a lease as operating or finance, the value of the operating lease asset and liability and the term over which leasehold improvements for each restaurant are depreciated. These judgments may produce materially different amounts of operating lease assets and liabilities, rent expense and interest expense than would be reported if different assumptions were used.

Income Taxes

We compute income taxes based on estimates of our federal, state and foreign tax liabilities. Our estimates include, but are not limited to, effective state and local income tax rates, allowable tax credits, depreciation expense allowable for tax purposes, the tax deductibility of certain other items and applicable valuation allowances on deferred tax assets. Our estimates are made based on the best available information at the time we prepare our consolidated financial statements. In making our estimates, we consider the impact of legislative and judicial developments. As these developments evolve, we update our estimates, which, in turn, may result in adjustments to our effective tax rate.

We anticipate realization of a significant portion of our deferred tax assets through the reversal of existing deferred tax liabilities. Realization of some of our deferred tax assets, in particular those which have statutorily limited time periods within which they must be used, is dependent on generating sufficient taxable income in the relevant jurisdictions prior to expiration of these time periods. Although realization is not assured, management believes it is more likely than not that our deferred tax assets, net of valuation allowances, will be realized. The amount of deferred tax assets considered realizable could be reduced, however, if estimates of future earnings and taxable income in the carryforward periods are reduced.

Uncertain tax positions taken or expected to be taken in a tax return are recognized (or derecognized) in the financial statements when it is more likely than not that the position would be sustained on its technical merits upon examination by tax authorities, taking into account available administrative remedies and litigation. Assessment of uncertain tax positions requires significant judgments relating to the amounts, timing and likelihood of resolution.

Recent Accounting Pronouncements

See Note 1 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for a summary of new accounting standards.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The following discussion of market risks contains forward-looking statements and should be read in conjunction with our consolidated financial statements and related notes in Part IV, Item 15 of this report, the "Risk Factors" in Part I, Item 1A of this report, the "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of this report and the cautionary statements included throughout this report. Actual results may differ materially from the following discussion based on general conditions in the commodity and financial markets.

The cost of products and services used in our operations is subject to volatility due to the relative availability of labor and distribution, weather, natural disasters, inventory levels and other supply and/or demand impacting events such as the COVID-19 pandemic, geopolitical events, economic conditions or other unforeseen circumstances. Climate change may further exacerbate a number of these factors. During fiscal 2021, we began to experience certain supply shortages and transportation delays largely attributable to impacts of the COVID-19 pandemic. These shortages

continued in fiscal 2022 and were exacerbated by geopolitical unrest. The aggregate impact of these and other factors contributed to significant cost inflation.

We attempt to negotiate short-term and long-term agreements for some of our principal commodity, supply and equipment requirements, such as certain dairy products and poultry, depending on market conditions and expected demand. While we are in the process of contracting for certain key food and non-food supplies for fiscal 2023, these efforts may not be successful or yield our intended benefits. We continue to evaluate the possibility of entering into similar arrangements for other commodities and periodically evaluate hedging vehicles, such as direct financial instruments, to assist us in managing risk and variability associated with such commodities. As of the end of fiscal 2022, we had no hedging contracts in place.

Commodities for which we have not entered into contracts can be subject to unforeseen supply and cost fluctuations, which at times may be significant. Additionally, the cost of commodities subject to governmental regulation, such as dairy and corn, can be especially susceptible to price fluctuation. Goods we purchase on the international market may be subject to even greater fluctuations in cost and availability, which could result from a variety of factors, including the value of the U.S. dollar relative to other currencies, international trade disputes, tariffs, geopolitical unrest and varying global demand. We may not have the ability to increase menu prices or vary menu items in response to food commodity price increases. For fiscal 2022 and 2021, a hypothetical increase of 1% in food costs would have negatively impacted food and beverage costs by \$8.1 million and \$6.5 million, respectively. (See Item 1A — Risk Factors — “Our inability to anticipate and react effectively to changes in the costs of key operating resources may increase our cost of doing business, which could materially adversely affect our financial performance.”)

We are exposed to market risk from interest rate changes on our funded debt. This exposure relates to the component of the interest rate on the Loan Agreement that is indexed to market rates. Based on outstanding borrowings at January 3, 2023 and December 28, 2021, a hypothetical 1% rise in interest rates would have increased interest expense by \$1.3 million on an annual basis. (See Note 10 of Notes to Consolidated Financial Statements in Part IV, Item 15 of this report for further discussion of our long-term debt.)

We are also subject to market risk related to our investments in variable life insurance contracts used to support our Non-Qualified Plans to the extent these investments are not equivalent to the related liability. In addition, because changes in these investments are not taxable, gains and losses result in tax benefit and tax expense, respectively, and directly affect net income through the income tax provision. Based on balances at January 3, 2023 and December 28, 2021, a hypothetical 10% decline in the market value of our deferred compensation asset and related liability would not have impacted income before income taxes. However, under such scenario, net income would have declined by \$2.0 million and \$2.3 million at January 3, 2023 and December 28, 2021, respectively.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The consolidated financial statements required to be filed hereunder are set forth in Part IV, Item 15 of this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have established and maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter

how well designed and operated, can provide only a reasonable assurance of achieving the desired control objectives, and management was necessarily required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of January 3, 2023.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in Exchange Act Rule 13a-15(f), internal control over financial reporting is a process designed by, or under the supervision of, our principal executive and principal financial officers and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States (“GAAP”) and includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of our internal control over financial reporting as of January 3, 2023 based on the criteria in “Internal Control - Integrated Framework (2013)” issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on this evaluation, our management concluded that our internal control over financial reporting was effective as of January 3, 2023.

The effectiveness of our internal control over financial reporting as of January 3, 2023 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report which appears in Part IV, Item 15 of this report.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the three months ended January 3, 2023 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not Applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

We have adopted a code of ethics which applies to our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, who are the Company's principal executive, financial and accounting officers, respectively, and the Company's other executive officers and members of the Board of Directors, entitled "Code of Ethics for Executive Officers, Senior Financial Officers and Directors." We have also adopted a code of ethics which applies to other employees entitled "Code of Ethics and Code of Business Conduct." The codes of ethics are available on our corporate website at www.thecheesecakefactory.com in the "Governance" section of our "Investors" page. The contents of our website are *not* incorporated by reference into this report. We intend to satisfy disclosure requirements under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, a provision of the Code of Ethics for Executive Officers, Senior Financial Officers and Directors by posting such information on our website, at the address and location specified above, or as otherwise required by the Nasdaq Global Market.

Information with respect to our executive officers is included in Part I, Item 1 of this report. Other information required by this item is hereby incorporated by reference from the sections entitled "Election of Directors," "The Board and Corporate Governance," and "Delinquent Section 16(a) Reports" in our definitive proxy statement for the annual meeting of stockholders to be held on June 1, 2023 (the "Proxy Statement").

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is hereby incorporated by reference to the sections entitled "Directors Compensation," "Executive Compensation," "Compensation of Named Executive Officers" and "Compensation Committee Interlocks and Insider Participation" in the Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item is hereby incorporated by reference to the section entitled "Beneficial Ownership of Principal Stockholders and Management" and "Equity Compensation Plan Information" in the Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item is hereby incorporated by reference to the sections entitled "Policies Regarding Review, Approval or Ratification of Transactions with Related Persons" and "The Board and Corporate Governance" in the Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is hereby incorporated by reference to the section entitled "Independent Registered Public Accounting Firm Fees and Services" (in the proposal entitled "Ratification of Selection of Independent Registered Public Accounting Firm") in the Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

The following documents are filed as a part of this Report:

- (a) 1. Financial statements:
The consolidated financial statements required to be filed hereunder are listed in the Index to Consolidated Financial Statements on page 58 of this report.
2. Financial statement schedules:
All schedules have been omitted because they are not applicable, not required or the information has been otherwise supplied in the financial statements or notes to the financial statements.
3. Exhibits:
The Exhibits required to be filed hereunder are listed in the exhibit index included herein at page 91.

ITEM 16. FORM 10-K SUMMARY

None.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
The Cheesecake Factory Incorporated:

Opinions on the Consolidated Financial Statements and Internal Control Over Financial Reporting

We have audited the accompanying consolidated balance sheets of The Cheesecake Factory Incorporated and subsidiaries (the Company) as of January 3, 2023 and December 28, 2021, the related consolidated statements of income/(loss), comprehensive income/(loss), stockholders' equity and series A convertible preferred stock, and cash flows for each of the years in the three-year period ended January 3, 2023, and the related notes (collectively, the consolidated financial statements). We also have audited the Company's internal control over financial reporting as of January 3, 2023, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of January 3, 2023 and December 28, 2021, and the results of its operations and its cash flows for each of the years in the three-year period ended January 3, 2023, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 3, 2023 based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are

recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Evaluation of long-lived assets for impairment

As discussed in Notes 1, 6 and 11 to the consolidated financial statements, the Company assesses the potential impairment of long-lived assets on an annual basis or whenever events or changes in circumstances indicate the carrying value of the asset or asset group may not be recoverable. If the carrying amount of an asset group exceeds its estimated undiscounted future cash flows, an impairment charge is recognized for the amount by which the carrying amount of the asset group exceeds the fair value of the asset group. The Company's property and equipment, net, and operating lease asset balances as of January 3, 2023 were \$746.1 million and \$1,269.0 million, respectively. Based upon the analyses performed, the Company recognized pre-tax impairment charges for long-lived assets of \$31.4 million in fiscal 2022.

We identified the evaluation of long-lived assets for impairment as a critical audit matter. The evaluation of the assumptions used in the undiscounted cash flow analysis and determination of fair value of certain long-lived assets resulted in the application of challenging auditor judgment. These assumptions include revenue growth and the operating margin.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls over the Company's long-lived asset impairment assessment process. This included controls related to the determination of the undiscounted cash flow and fair value of the restaurant asset groups, and the related revenue growth and operating margin assumptions. For certain restaurant asset groups, we performed sensitivity analyses over the revenue growth and operating margin assumptions to assess the impact of changes in those assumptions on the Company's determination of the undiscounted cash flow and fair value of these restaurant asset groups. We compared the Company's prior year revenue growth and operating margin assumptions to current year actual results to assess the Company's ability to accurately forecast. We evaluated the Company's revenue growth and operating margin assumptions for certain restaurant asset groups by comparing the assumptions to the restaurant asset groups' historical and peer group performance.

/s/ KPMG LLP

We have served as the Company's auditor since 2018.

THE CHEESECAKE FACTORY INCORPORATED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Description of Business

The Cheesecake Factory Incorporated is a leader in experiential dining. We are culinary forward and relentlessly focused on hospitality. We currently own and operate 318 restaurants throughout the United States and Canada under brands including The Cheesecake Factory[®] (210 locations), North Italia[®] (33 locations) and a collection within our Fox Restaurant Concepts (“FRC”) business. Internationally, 30 The Cheesecake Factory[®] restaurants operate under licensing agreements. Our bakery division operates two facilities that produce quality cheesecakes and other baked products for our restaurants, international licensees and third-party bakery customers.

Basis of Presentation

The accompanying consolidated financial statements include the accounts of The Cheesecake Factory Incorporated and its wholly owned subsidiaries (referred to herein collectively as the “Company,” “we,” “us” and “our”) and are prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). All intercompany accounts and transactions for the periods presented have been eliminated in consolidation.

We utilize a 52/53-week fiscal year ending on the Tuesday closest to December 31 for financial reporting purposes. Fiscal year 2022 consisted of 53 weeks. Fiscal years 2021 and 2020 each consisted of 52 weeks. Fiscal year 2023 will consist of 52 weeks.

Beginning in the fourth quarter of fiscal 2022, we retitled the income statement line item “Cost of Sales” to “Food and Beverage Costs.” This is a title change only, and there is no difference in the classification of items within this category of costs.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions for the reporting periods covered by the financial statements. These estimates and assumptions affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent liabilities. Actual results could differ from these estimates.

COVID-19 Pandemic, Geopolitical and Other Macroeconomic Impacts to our Operating Environment

We have experienced significant disruptions to our business as federal, state and local restrictions have fluctuated over time to mitigate the spread of the COVID-19 virus. While most of our restaurants operated with no restrictions on indoor dining during fiscal years 2021 and 2022, our revenues were negatively impacted during periods of accelerating case counts during which we incurred increased restaurant staff absenteeism and a temporary shift in consumer behavior, such as changes in customer traffic or the mix between on-premise and off-premise channels. We have incurred and may continue to incur additional costs to address government regulations and the safety of our staff members and customers.

In addition, we experienced labor shortfalls relative to our sales levels in certain parts of our workforce and/or geographies as we reopened our dining rooms after the lifting of mandatory social-distancing regulations related to the COVID-19 pandemic. During fiscal 2021, we also began to experience certain supply shortages and transportation delays largely attributable to impacts of the COVID-19 pandemic. These shortages continued in fiscal 2022 and were exacerbated by geopolitical unrest. The aggregate impact of these and other geopolitical and macroeconomic factors contributed to significantly increased commodity and wage inflation and other increased costs. We have also encountered delays in opening new restaurants due to supply chain challenges, as well as to longer lead times in obtaining licenses and permits and in the timeline required to complete the overall leasing process with landlords.

The ongoing effects of COVID-19 and its variants, along with other geopolitical and macroeconomic events could lead to further government mandates, including but not limited to capacity restrictions, shifts in consumer behavior, wage inflation, staffing challenges, product and services cost inflation, disruptions in the supply chain and delay in new restaurant openings. If these factors significantly impact our cash flow in the future, we may again implement mitigation actions such as suspending share repurchases, not declaring future dividends, increasing borrowings under our credit facility or modifying our operating strategies. Any of these measures may have an adverse impact on our business and materially adversely affect our financial performance.

Cash and Cash Equivalents

Amounts receivable from credit card processors, totaling \$19.1 million and \$17.5 million at January 3, 2023 and December 28, 2021, respectively, are considered cash equivalents because they are both short-term and highly liquid in nature and are typically converted to cash within three days of the sales transaction. Our cash management system provides for the funding of all major bank disbursement accounts on a daily basis as checks are presented for payment. Under this system, outstanding checks are in excess of the cash balances at certain banks, which creates book overdrafts. Book overdrafts are presented as a current liability in other accrued expenses on our consolidated balance sheet.

Concentration of Credit Risk

Financial instruments that potentially subject us to a concentration of credit risk are cash and cash equivalents and receivables. We maintain our day-to-day operating cash balances in non-interest-bearing transaction accounts, which are insured by the Federal Deposit Insurance Corporation (“FDIC”) up to \$250,000. We invest our excess cash in a money market deposit account, which is insured by the FDIC up to \$250,000. Although we maintain balances that exceed the federally insured limit, we have not experienced any losses related to this balance, and we believe credit risk to be minimal.

We consider the concentration of credit risk for accounts receivable from our bakery customers to be minimal due to the payment histories and general financial condition of our larger bakery accounts. Concentration of credit risk related to other receivables is limited as this balance is comprised primarily of amounts due from our gift card distributors, insurance providers and delivery partner.

Inventories

Inventories consist of restaurant food and other supplies, bakery raw materials and bakery finished goods and are stated at the lower of cost or net realizable value on an average cost basis at the restaurants and on a first-in, first-out basis at the bakeries.

Property and Equipment

We record property and equipment at cost less accumulated depreciation. Improvements are capitalized, while repairs and maintenance costs are expensed as incurred. Depreciation and amortization are calculated using the straight-line method over the estimated useful life of the assets or the reasonably certain lease term, whichever is shorter. Leasehold improvements include the cost of our internal development and construction department. Depreciation and amortization periods are as follows:

Buildings and land improvements	30 years
Leasehold improvements	10 to 30 years
Furnishings, fixtures and equipment	3 to 15 years ⁽¹⁾
Computer software and equipment	5 years

(1) Other than certain types of restaurant equipment with estimated useful lives that equal or exceed the reasonably certain lease term, in which case the reasonably certain lease term is utilized.

Gains and losses related to property and equipment disposals are recorded in depreciation and amortization expenses.

Impairment of Long-Lived Assets and Lease Termination Expenses

We assess the potential impairment of our long-lived assets on an annual basis or whenever events or changes in circumstances indicate the carrying value of the assets or asset group may not be recoverable. Factors considered include, but are not limited to, negative cash flow, significant underperformance relative to historical or projected future operating results, significant changes in the manner in which an asset is being used, an expectation that an asset will be disposed of significantly before the end of its previously estimated useful life and significant negative industry or economic trends. At any given time, we may be monitoring a number of locations, and future impairment charges could be required if individual restaurant performance does not improve or we make the decision to close or relocate a restaurant.

Long-lived assets are grouped with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. Impairment testing is performed at the individual restaurant asset group level, which is inclusive of property and equipment and lease right-of-use assets. Recoverability is assessed by comparing the carrying value of the assets to the undiscounted cash flows expected to be generated by those assets. Impairment losses are measured as the amount by which the carrying values of the assets exceed their fair value, which is determined based on discounted future net cash flows expected to be generated by the assets.

In fiscal 2022, we recorded \$31.4 million of expense primarily related to the impairment of long-lived assets for three The Cheesecake Factory, one Other FRC and three Other restaurants. In fiscal 2021, we recorded \$16.3 million of expense primarily related to the impairment of long-lived assets for three The Cheesecake Factory and two Other restaurants. In fiscal 2020, we recorded \$36.2 million of expense primarily related to the impairment of long-lived assets for one The Cheesecake Factory, one North Italia, two Other FRC and six Other restaurants, as well as lease termination costs and accelerated depreciation for one The Cheesecake Factory and seven Other restaurants. These amounts are recorded in impairment of assets and lease terminations on the consolidated statements of income/(loss).

Intangible Assets

The following table presents components of intangible assets, net (in thousands):

	Fiscal year ended	
	January 3, 2023	December 28, 2021
Indefinite-lived intangible assets:		
Goodwill	\$ 1,451	\$ 1,451
Trade names and trademarks	234,077	233,767
Transferable alcoholic beverage licenses	7,683	7,446
Total indefinite-lived intangible assets	<u>243,211</u>	<u>242,664</u>
Definite-lived intangible assets, net:		
Licensing agreements	5,092	5,690
Non-transferable alcoholic beverage licenses	3,221	3,347
Total definite-lived intangible assets	<u>8,313</u>	<u>9,037</u>
Total intangible assets, net	<u>\$ 251,524</u>	<u>\$ 251,701</u>

Goodwill and other indefinite-lived intangible assets are not amortized and are tested for impairment annually as of the first day of our fiscal fourth quarter or on an interim basis if events or changes in circumstances between annual tests indicate a potential impairment. First, we determine if, based on qualitative factors, it is more likely than not that an impairment exists. Factors considered include, but are not limited to, historical financial performance, assumptions related to the COVID-19 pandemic, wage, product and services inflation, competitive environment, macroeconomic and industry conditions, results of prior impairment tests and share price performance. Any adverse change in these factors could have a significant impact on the recoverability of these assets and could have a material impact on our consolidated financial statements. If the qualitative assessment indicates that it is more likely than not that an impairment exists, then a quantitative assessment is performed. The quantitative assessments require the use of estimates and assumptions regarding future cash flows and asset fair values. Key assumptions include projected revenue growth and operating expenses, discount rates, royalty rates, valuation multiples and other factors that could affect fair value or

otherwise indicate potential impairment. Such assessments could change materially if different estimates and assumptions were used.

We performed our annual impairment assessment of indefinite-lived intangible assets as of the first day of the fourth quarters of fiscal 2022 and 2021 and concluded there was no impairment. During the first quarter of fiscal 2020, we determined it was necessary to perform an interim assessment of our goodwill, trade names and trademarks due to the decrease in our stock price coupled with the dining room closures related to the COVID-19 pandemic and significant decline to the equity value of our peers and overall U.S. stock market. Based on the results of this assessment, we recorded goodwill impairment expense related to the Other FRC, North Italia and Flower Child operating segments of \$33.8 million, \$27.7 million and \$17.9 million, respectively. In addition, we recorded impairment expense of \$101.0 million related to trade names and trademarks. We performed our annual assessment of indefinite-lived intangible assets as of the first day of our fiscal fourth quarter of fiscal year 2020 and concluded there was no further impairment of these assets, other than \$0.4 million of expense related to transferable alcoholic beverage licenses.

Definite-lived intangible assets are amortized on a straight-line basis over their estimated useful lives and reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable based on estimated undiscounted future cash flows. If impaired, the asset or asset group is written down to fair value based on discounted future cash flows. We performed our annual impairment assessment of definite-lived intangible assets as of the first day of the fourth quarters of fiscal 2022 and 2021. We concluded there was no impairment for fiscal 2022 and recorded \$1.3 million of impairment expense in fiscal 2021 related to licensing agreements. During the first quarter of fiscal 2020, we determined it was necessary to perform an interim assessment of our licensing agreements and we recorded impairment expense of \$2.3 million related to licensing agreements. Amortization expenses related to our definite-lived intangible assets were \$0.5 million, \$0.7 million and \$0.7 million for fiscal 2022, 2021 and 2020, respectively. Definite-lived intangible assets will be amortized over one to 53 years.

We evaluate the useful lives of our intangible assets, other than goodwill, at each reporting period to determine if they are definite or indefinite-lived. A determination on useful life requires judgments and assumptions regarding the future effects of obsolescence, demand, competition, other economic factors (such as the stability of the industry, legislative action that results in an uncertain or changing regulatory environment and expected changes in distribution channels), the level of required maintenance expenditures and the expected lives of other related groups of assets.

Revenue Recognition

Our revenues consist of sales at our Company-owned restaurants, sales from our bakery operations to our licensees and other third-party customers, royalties from our licensees' restaurant sales and from consumer packaged goods sales, and licensee development and site fees. Revenues are presented net of sales taxes. Sales tax collected is included in other accrued expenses until the taxes are remitted to the appropriate taxing authorities.

Revenues from restaurant sales are recognized when payment is tendered at the point of sale. Revenues from bakery sales are recognized upon transfer of title and risk to customers. Royalty revenues are recognized in the period the related sales occur, utilizing the sale-based royalty exception available under current accounting guidance. Our consumer packaged goods minimum guarantees do not require distinct performance obligations. Therefore, related revenue is recognized on a straight-line basis over the life of the applicable agreements, ranging from five to seven years. As our development and site fee agreements do not contain distinct performance obligations, related revenue is recognized on a straight-line basis over the life of the applicable agreements, ranging from eight to 30 years. Deferred and recognized revenue for new minimum guarantees for consumer packaged goods and for new site and development agreements were immaterial in all periods presented.

We recognize a liability upon the sale of our gift cards and recognize revenue when these gift cards are redeemed in our restaurants. Based on our historical redemption patterns, we can reasonably estimate the amount of gift cards for which redemption is remote, which is referred to as "breakage." Breakage is recognized over a three-year period in proportion to historical redemption trends and is classified as revenues in our consolidated statements of income/(loss). We recognized \$7.0 million, \$6.8 million and \$7.6 million of gift card breakage in fiscal years 2022, 2021 and 2020, respectively. Incremental direct costs related to gift card sales, including commissions and credit card fees, are deferred and recognized in earnings in the same pattern as the related gift card revenue.

Certain of our promotional programs include multiple element arrangements that incorporate various performance obligations. We allocate revenue using the relative selling price of each performance obligation considering the likelihood of redemption and recognize revenue upon satisfaction of each performance obligation. During fiscal 2022, we deferred and recognized previously deferred revenue of \$27.3 million and \$23.6 million, respectively, related to promotional programs. During fiscal 2021, we deferred and recognized previously deferred revenue of \$27.5 million and \$15.2 million, respectively, related to promotional programs. During fiscal 2020, we deferred and recognized previously deferred revenue of \$11.6 million and \$11.2 million, respectively, related to promotional programs.

Leases

We currently lease all of our restaurant locations, generally with initial terms of 10 to 20 years plus two five-year renewal options. Our leases typically require contingent rent above the minimum base rent payments based on a percentage of revenues ranging from 2% to 10%, have escalating minimum rent requirements over the term of the lease and require payment for various expenses incidental to the use of the property. A majority of our leases provide for a reduced level of overall rent obligation if specified co-tenancy requirements are not satisfied. We expend cash for leasehold improvements and furniture, fixtures, and equipment to build out and equip our leased premises. We may also expend cash for structural additions that we make to leased premises. Generally, a portion of the leasehold improvements and building costs are reimbursed to us by our landlords as construction contributions. If obtained, landlord construction contributions usually take the form of up-front cash, full or partial credits against our future minimum or percentage rents, or a combination thereof. We do not meet any of the accounting criteria under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 842, Leases, for being the owner of the asset under construction. Many of our leases provide early termination rights permitting us to terminate the lease prior to expiration in the event our revenues are below a stated level for a period of time, generally conditioned upon repayment of the unamortized landlord contributions.

In addition to leases for our restaurant locations, we also lease automobiles and certain equipment that is used in the restaurants, bakeries and corporate office. The leases for our restaurant locations, automobiles and certain restaurant equipment are included in our operating lease assets and liabilities. All other leases are immaterial or qualify for the short-term lease exclusion.

The assessment of whether a contract is or contains a lease is performed at contract inception. A lease is defined as a contract that conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is defined as having both the right to obtain substantially all the economic benefits from the use of the asset and to direct how and for what purpose the asset is used.

At lease commencement, we evaluate each material lease and those that don’t qualify for the short-term exclusion to determine its appropriate classification as an operating or finance lease. All of the leases evaluated meet the criteria for classification as operating leases. For restaurant leases that existed as of the adoption of ASC 842, we continued to apply our historical practice of excluding executory costs, and only minimum base rent was factored into the initial operating lease liability and corresponding lease asset. For restaurant leases beginning after adoption of ASC 842, we have elected the single lease component practical expedient. Operating lease assets and liabilities are recorded on the balance sheet at lease commencement based on the present value of minimum base rent and other fixed payments over the reasonably certain lease term. The difference between the amounts we expend for structural costs and the construction contributions received from our landlords is recorded as an adjustment to the operating lease asset. Lease terms include the build-out period for our leases where no rent payments are typically due under the terms of the lease, as well as options to renew when we deem we have significant economic incentive to exercise the extension. When determining if we have a significant economic incentive, we consider relevant factors, such as contractual, asset, entity and market-based considerations. Option periods are included in the lease term for the majority of our leases. Termination rights have not been factored into the lease terms since based on our probability assessment we are reasonably certain we will not terminate our leases.

We cannot determine the interest rate implicit in our leases because we do not have access to the lessor’s estimated residual value or the amount of the lessor’s deferred initial direct costs. Therefore, we use our incremental borrowing rate as the discount rate for our leases. Our incremental borrowing rate for a lease is the rate of interest we would have to pay on a collateralized basis to borrow an amount equal to the lease payments under similar terms. Because we do not generally borrow on a collateralized basis, we derive an appropriate incremental borrowing rate using

the interest rate we pay on our non-collateralized borrowings, adjusted for the amount of the lease payments, the lease term and the effect of designating specific collateral with a value equal to the unpaid lease payments for that lease.

We monitor for events or changes in circumstances that require reassessment of our leases. When a reassessment results in the re-measurement of a lease liability, a corresponding adjustment is made to the carrying amount of the operating lease asset. We also assess the potential impairment of our operating lease assets under long-lived asset impairment guidance in ASC 360, Property, Plant, and Equipment: Impairment or disposal on long-lived assets.

Rent expense included in our operating lease assets is recognized on a straight-line basis. Contingent rent expense is recorded as incurred to the extent it exceeds minimum base rent per the lease agreement. Variable lease payments, which primarily consist of real estate taxes, common area maintenance charges, insurance cost and other operating expenses, are not included in the operating lease right-of-use asset or operating lease liability balances and are recognized as incurred. Rent expense is included in other operating costs and expenses in the consolidated statements of income/(loss).

The reasonably certain lease term and the incremental borrowing rate for each restaurant location require judgment by management and can impact the classification and accounting for a lease as operating or finance, the value of the operating lease asset and liability and the term over which leasehold improvements for each restaurant are depreciated. These judgments may produce materially different amounts of operating lease assets and liabilities, rent expense and interest expense than would be reported if different assumptions were used.

Self-Insurance Liabilities

We retain financial responsibility for a significant portion of our risks and associated liabilities with respect to workers' compensation, general liability, staff member health benefits, employment practices and other insurable risks. The accrued liabilities associated with these programs are based on our estimate of the ultimate costs to settle known claims, as well as claims incurred but not yet reported to us ("IBNR") as of the balance sheet date and are recorded in other accrued expenses. Our estimated liabilities, which are not discounted, are based on information provided by our insurance brokers and insurers, combined with our judgment regarding a number of assumptions and factors, including the frequency and severity of claims, claims development history, case jurisdiction, applicable legislation and our claims settlement practices. Significant judgment is required to estimate IBNR amounts, as parties have yet to assert such claims. If actual claims trends, including the severity or frequency of claims, differ from our estimates, our financial results could be impacted.

Stock-Based Compensation

We maintain stock-based incentive plans under which equity awards may be granted to staff members, consultants and non-employee directors. We account for the awards based on fair value measurement guidance and amortize to expense over the vesting period using a straight-line or graded-vesting schedule, as applicable. (See Note 16 for further discussion of our stock-based compensation.)

Advertising Costs

We expense advertising production costs at the time the advertising first takes place. All other advertising costs are expensed as incurred. Most of our advertising costs are included in other operating costs and expenses and were \$21.0 million, \$18.3 million and \$16.0 million in fiscal 2022, 2021 and 2020, respectively.

Preopening Costs

Preopening costs include all costs to relocate and compensate restaurant management staff members during the preopening period, costs to recruit and train hourly restaurant staff members, and wages, travel and lodging costs for our opening training team and other support staff members. Also included are expenses for maintaining a roster of trained managers for pending openings, the associated temporary housing and other costs necessary to relocate managers in alignment with future restaurant opening and operating needs, and corporate travel and support activities. We expense preopening costs as incurred.

Income Taxes

We provide for federal, state and foreign income taxes currently payable and for deferred taxes that result from differences between financial accounting rules and tax laws governing the timing of recognition of various income and expense items. We recognize deferred income tax assets and liabilities for the future tax effects of such temporary differences based on the difference between the financial statement and tax bases of existing assets and liabilities using the statutory rates expected in the years in which the differences are expected to reverse. The effect on deferred taxes of any enacted change in tax rates is recognized in income in the period that includes the enactment date. Income tax credits are recorded as a reduction of tax expense.

We routinely evaluate the likelihood of realizing the benefit of our deferred tax assets and record a valuation allowance if, based on all available evidence, we determine that some portion of the tax benefit will not be realized. In evaluating our ability to recover our deferred tax assets within the jurisdictions from which they arise, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies (when applicable) and results of recent operations. If we later determine that we would be able to realize our deferred tax assets in excess of their net recorded amount, we adjust the deferred tax asset valuation allowance and reduce income tax expense.

We evaluate our exposures associated with our various tax filing positions and recognize a tax benefit from an uncertain tax position only if it is more-likely-than-not that the position will be sustained upon examination by the relevant taxing authorities based solely on its technical merits, taking into account available administrative remedies and litigation. If this threshold is met, we recognize only the portion of the tax benefit that has a greater than 50% likelihood of being realized upon ultimate resolution. We record a liability for any portion of the tax benefit that does not meet these recognition and measurement criteria and we adjust this liability through income tax expense in the period in which the uncertain tax position is effectively settled, when the statute of limitations expires for the relevant taxing authority to examine the tax position or when new information becomes available. We recognize interest and penalties related to uncertain tax positions in income tax expense.

Net Income/(Loss) per Share

Basic net income/(loss) per share is computed by dividing net income/(loss) available to common stockholders by the weighted-average number of common shares outstanding during the period, reduced by unvested restricted stock awards. At January 3, 2023, December 28, 2021 and December 29, 2020, 2.5 million shares, 2.1 million shares and 2.0 million shares, respectively, of restricted stock and restricted stock units issued were unvested and, therefore, excluded from the calculation of basic earnings per share for the fiscal years ended on those dates.

Diluted net income/(loss) per share is computed by dividing net income/(loss) available to common stockholders by the weighted-average number of common stock equivalents outstanding for the period. Common stock equivalents for our convertible senior notes due 2026 (“Notes”) are determined by application of the if-converted method, and common stock equivalents for outstanding stock options and restricted stock are determined by the application of the treasury stock method.

Holders of our Series A Convertible Preferred Stock, par value \$0.01 per share (the “Series A preferred stock”) participated in dividends on an as-converted basis when declared on common stock. As a result, our Series A preferred stock met the definition of a participating security which required us to apply the two-class method to compute both basic and diluted net income per share. The two-class method is an earnings allocation formula that treats participating securities as having rights to earnings that would otherwise have been available to common stockholders. In addition, as our Series A preferred stock was a participating security, we were required to calculate diluted net income per share under the if-converted method in addition to the two-class method and utilize the most dilutive result. In periods where there is a net loss, no allocation of undistributed net loss to preferred stockholders was performed as the holders of our Series A preferred stock were not contractually obligated to participate in our losses.

	Fiscal Year		
	2022	2021	2020
	(In thousands, except per share data)		
Basic net income/(loss) per common share:			
Net income/(loss)	\$ 43,123	\$ 72,373	\$ (253,365)
Dividends on Series A preferred stock	—	(18,661)	(13,485)
Direct and incremental Series A preferred stock issuance costs	—	—	(10,257)
Undistributed earnings allocated to Series A preferred stock	—	(4,581)	—
Net income/(loss) available to common stockholders	43,123	49,131	(277,107)
Basic weighted-average shares outstanding	49,815	47,529	43,869
Basic net income/(loss) per common share	<u>\$ 0.87</u>	<u>\$ 1.03</u>	<u>\$ (6.32)</u>
Diluted net income/(loss) per common share:			
Net income/(loss) available to common stockholders	43,123	49,131	(277,107)
Reallocation of undistributed earnings to Series A preferred stock	—	85	—
Net income/(loss) available to common stockholders for diluted EPS	43,123	49,216	(277,107)
Basic weighted-average shares outstanding	49,815	47,529	43,869
Dilutive effect of equity awards ⁽¹⁾	599	981	—
Diluted weighted-average shares outstanding	50,414	48,510	43,869
Diluted net income/(loss) per common share	<u>\$ 0.86</u>	<u>\$ 1.01</u>	<u>\$ (6.32)</u>

(1) Shares of common stock equivalents related to outstanding stock options, restricted stock and restricted stock units of 3.3 million, 1.9 million and 4.0 million for fiscal 2022, 2021 and 2020, respectively, were excluded from the diluted calculation due to their anti-dilutive effect. No shares of common stock equivalents related to the Notes were included in the diluted calculation due to their anti-dilutive effect.

Comprehensive Income/(Loss)

Comprehensive income/(loss) includes all changes in equity during a period except those resulting from investment by and distribution to owners. Our comprehensive income consists of net income/(loss), unrealized gains/(losses) on our interest rate swap and translation gains/(losses) related to our Canadian restaurant operations.

Foreign Currency

The Canadian dollar is the functional currency for our Canadian restaurant operations. Revenue and expense accounts are translated into U.S. dollars using the average exchange rates during the reporting period. Assets and liabilities are translated using the exchange rates in effect at the reporting period end date. Equity accounts are translated at historical rates, except for the change in retained earnings which is the result of the income statement translation process. Translation gains and losses are reported as a separate component in our consolidated statements of comprehensive income/(loss) and would only be realized upon the sale or upon complete or substantially complete liquidation of the business. Gains and losses from foreign currency transactions are recognized in our consolidated statements of income/(loss) in interest and other expense, net.

Recent Accounting Pronouncements

In August 2020, the FASB issued Accounting Standards Update (“ASU”) 2020-06, Accounting for Convertible Instruments and Contracts in an Entity’s Own Equity, which is intended to simplify the accounting and measurement of convertible instruments and the settlement assessment for contracts in an entity’s own equity. This pronouncement was effective for fiscal years beginning after December 15, 2021 and early adoption was permitted. The guidance allowed for either full retrospective adoption or modified retrospective adoption. We adopted this guidance in the first quarter of fiscal 2021 utilizing the modified retrospective method and, accordingly, recorded a \$4.8 million cumulative adjustment to retained earnings to reverse previously-recorded beneficial conversion features. As further discussed in Note 10, we issued certain Notes during the second quarter of fiscal 2021, and the accounting for these instruments was based on the guidance in ASU 2020-06. Additionally, the impact on diluted earnings per share of the Notes was calculated based on the if-converted method, as further described in Note 1.

2. Fair Value Measurements

Fair value measurements are estimated based on valuation techniques and inputs categorized as follows:

- Level 1: Quoted prices in active markets for identical assets or liabilities
- Level 2: Observable inputs other than quoted prices in active markets for identical assets and liabilities
- Level 3: Unobservable inputs in which little or no market activity exists, therefore requiring the Company to develop its own assumptions

The following tables present the components and classification of our assets and liabilities that are measured at fair value on a recurring basis (in thousands):

	January 3, 2023		
	Level 1	Level 2	Level 3
Assets/(Liabilities)			
Non-qualified deferred compensation assets	\$ 78,542	\$ —	\$ —
Non-qualified deferred compensation liabilities	(78,286)	—	—
Acquisition-related deferred consideration	—	(10,751)	—
Acquisition-related contingent consideration and compensation liability	—	—	(28,565)
	December 28, 2021		
	Level 1	Level 2	Level 3
Assets/(Liabilities)			
Non-qualified deferred compensation assets	\$ 92,588	\$ —	\$ —
Non-qualified deferred compensation liabilities	(92,012)	—	—
Acquisition-related deferred consideration	—	(21,642)	—
Acquisition-related contingent consideration and compensation liabilities	—	—	(23,894)

Changes in the fair value of non-qualified deferred compensation assets and liabilities are recognized in interest and other expense, net in our consolidated statements of income/(loss). Changes in the fair value of the acquisition-related deferred and contingent consideration and compensation liability are recognized in acquisition-related contingent consideration, compensation and amortization expenses in our consolidated statements of income/(loss).

The following table presents a reconciliation of the beginning and ending amounts of the fair value of the acquisition-related contingent consideration and compensation liability categorized as Level 3 (in thousands):

	<u>Fiscal year ended</u>	
	<u>January 3, 2023</u>	<u>December 28, 2021</u>
Beginning balance	\$ 23,894	\$ 7,465
Payment	(7,187)	—
Change in fair value	11,858	16,429
Ending balance	<u>\$ 28,565</u>	<u>\$ 23,894</u>

The fair value of the Acquisition-related contingent consideration and compensation liability was determined utilizing a Monte Carlo model based on estimated future revenues, margins and volatility factors, among other variables and estimates and has no minimum or maximum payment. The undiscounted range of outcomes per the Monte Carlo model utilized to determine the fair value of the acquisition-related contingent consideration and compensation liability was \$0 to \$276.0 million at January 3, 2023 and \$0 to \$204.0 million at December 28, 2021. Results could change materially if different estimates and assumptions were used. During fiscal 2022, the fair value of the contingent consideration and compensation liability increased by \$4.7 million due to an \$8.3 million increase in the fair value primarily stemming from a change in the volatility factors, as well as an increase in fiscal 2022 revenues and estimated future revenues utilized in the calculation and amortization, partially offset by a payment of \$7.2 million per the FRC acquisition agreement. The increase in the fair value of the contingent consideration and compensation liability during fiscal 2021 was primarily due to a \$15.3 million decrease related to the impact of an amendment to the Acquisition agreement that, among other things, extended the measurement period through fiscal 2026, as well as to an increase in fiscal 2021 revenues and estimated future revenues utilized in the fair value calculation, partially offset by amortization.

The fair values of our cash and cash equivalents, accounts receivable, income taxes receivable, other receivables, prepaid expenses, accounts payable, income taxes payable and other accrued expenses approximate their carrying amounts due to their short duration.

At both January 3, 2023 and December 28, 2021, we had \$345.0 million aggregate principal amount of Notes outstanding. The estimated fair value of the Notes based on a market approach as of January 3, 2023 and December 28, 2021 was approximately \$282.9 million and \$309.8 million, respectively, and determined based on the estimated or actual bids and offers of the Notes in an over-the-counter market on the last business day of the reporting period. The decrease in the fair value of the Notes was primarily due to a decline in our stock price from the date of the issuance of Notes. See Note 10 for further discussion of the Notes.

3. Accounts and Other Receivables

Accounts and other receivables consisted of (in thousands):

	<u>Fiscal year ended</u>	
	<u>January 3, 2023</u>	<u>December 28, 2021</u>
Gift card distributors	\$ 37,586	\$ 38,564
Bakery customers	16,561	18,457
Insurance providers	10,529	9,193
Landlord construction contributions	9,492	2,811
Delivery partner	7,757	6,873
Other	23,586	24,606
Total	<u>\$ 105,511</u>	<u>\$ 100,504</u>

4. Inventories

Inventories consisted of (in thousands):

	Fiscal year ended	
	January 3, 2023	December 28, 2021
Restaurant food and supplies	\$ 30,783	\$ 27,877
Bakery finished goods and work in progress ⁽¹⁾	17,250	7,951
Bakery raw materials and supplies	7,526	7,011
Total	<u>\$ 55,559</u>	<u>\$ 42,839</u>

⁽¹⁾ The increase in bakery finished goods and work in progress inventory primarily relates to lower than typical levels at December 28, 2021 due to challenges ramping back up after the initial COVID-19 shutdown, as well as higher valuations at January 3, 2023 due to the significant cost inflation experienced during fiscal 2022.

5. Prepaid Expenses

Prepaid expenses consisted of (in thousands):

	Fiscal year ended	
	January 3, 2023	December 28, 2021
Gift card contract assets	\$ 19,886	\$ 18,468
Other ⁽¹⁾	28,513	17,978
Total	<u>\$ 48,399</u>	<u>\$ 36,446</u>

⁽¹⁾ The primary cause for the increase in other prepaid expenses is that our January 2023 rent payments fell before the fiscal 2022 year-end date compared to the January 2022 rent payments which fell after the fiscal 2021 year-end date.

6. Property and Equipment

Property and equipment consisted of (in thousands):

	Fiscal year ended	
	January 3, 2023	December 28, 2021
Land and related improvements	\$ 15,852	\$ 15,852
Buildings	44,138	44,049
Leasehold improvements	1,225,860	1,188,848
Furnishings, fixtures and equipment	584,924	550,416
Computer software and equipment	60,861	54,853
Restaurant smallwares	36,494	35,285
Construction in progress	36,675	35,071
Property and equipment, total	2,004,804	1,924,374
Less: Accumulated depreciation	(1,258,753)	(1,182,628)
Property and equipment, net	<u>\$ 746,051</u>	<u>\$ 741,746</u>

Depreciation expenses related to property and equipment for fiscal 2022, 2021 and 2020 were \$92.1 million, \$89.4 million and \$91.1 million, respectively. Repair and maintenance expenses for fiscal 2022, 2021 and 2020 were \$89.1 million, \$77.4 million and \$61.8 million, respectively. Net expense for property and equipment disposals was \$1.6 million, \$1.1 million and \$0.6 million, in fiscal 2022, 2021 and 2020, respectively.

7. Other Assets

Other assets consisted of (in thousands):

	<u>Fiscal year ended</u>	
	<u>January 3, 2023</u>	<u>December 28, 2021</u>
Non-qualified deferred compensation assets	\$ 78,542	\$ 92,588
Deferred income taxes ⁽¹⁾	76,245	57,634
Other	8,104	7,630
Total	<u>\$ 162,891</u>	<u>\$ 157,852</u>

⁽¹⁾ See Note 18 for further discussion of our income taxes.

8. Gift Cards

The following tables present information related to gift cards (in thousands):

	<u>Fiscal year ended</u>	
	<u>January 3, 2023</u>	<u>December 28, 2021</u>
Gift card liabilities:		
Beginning balance	\$ 211,182	\$ 184,655
Activations	152,368	144,892
Redemptions and breakage	(143,743)	(118,365)
Ending balance	<u>\$ 219,808</u>	<u>\$ 211,182</u>

	<u>Fiscal year ended</u>	
	<u>January 3, 2023</u>	<u>December 28, 2021</u>
Gift card contract assets: ⁽¹⁾		
Beginning balance	\$ 18,468	\$ 17,955
Deferrals	16,440	15,852
Amortization	(15,022)	(15,339)
Ending balance	<u>\$ 19,886</u>	<u>\$ 18,468</u>

⁽¹⁾ Included in prepaid expenses on the consolidated balance sheets.

9. Other Accrued Expenses

Other accrued expenses consisted of (in thousands):

	<u>Fiscal year ended</u>	
	<u>January 3, 2023</u>	<u>December 28, 2021</u>
Self-insurance	\$ 71,872	\$ 67,649
Salaries and wages ⁽¹⁾	43,402	67,489
Staff member benefits	27,332	28,489
Payroll and sales taxes	24,861	22,944
Rent	12,713	8,009
Deferred consideration	10,751	11,250
Other	40,202	33,357
Total	<u>\$ 231,133</u>	<u>\$ 239,187</u>

⁽¹⁾ The decrease in accrued salaries and wages was primarily due to the timing of payroll disbursements in relation to the fiscal 2022 versus 2021 year-end dates.

10. Long-Term Debt

Credit Facility

On October 6, 2022, we entered into a Fourth Amended and Restated Loan Agreement (the “Loan Agreement” and the revolving credit facility provided thereunder, the “Revolver Facility”). The Loan Agreement amends and restates in its entirety our prior credit agreement. The Revolver Facility, which terminates on October 6, 2027, provides us with revolving loan commitments that total \$400 million, of which \$50 million may be used for issuances of letters of credit. The Revolver Facility contains a commitment increase feature that, subject to certain conditions precedent, could provide for an additional \$200 million in revolving loan commitments. Our obligations under the Revolver Facility are unsecured. Certain of our material subsidiaries have guaranteed our obligations under the Revolver Facility.

During fiscal 2021, we utilized a portion of the net proceeds from our Notes and common share offerings to reduce the balance on our then-existing credit facility by \$150.0 million. On October 6, 2022, we repaid the outstanding balance under the then-existing credit agreement and borrowed the same amount on the Revolver Facility. As of January 3, 2023, we had net availability for borrowings of \$238.5 million, based on a \$130.0 million outstanding debt balance and \$31.5 million in standby letters of credit under the Revolver Facility.

Under the Revolver Facility, we are subject to the following financial covenants as of the last day of each fiscal quarter: (i) a maximum ratio of net adjusted debt to EBITDAR (the “Amended Net Adjusted Leverage Ratio”) of 4.25 and (ii) a minimum ratio of EBITDAR to interest and rent expense (“EBITDAR Ratio”) of 1.90. The Amended Net Adjusted Leverage Ratio includes a rental expense multiplier of six as compared to eight in the Amended Credit Agreement. At January 3, 2023, we were in compliance with all covenants in effect at that date.

Borrowings under the Loan Agreement bear interest, at the Company’s election, at a rate equal to either: (i) the sum of (A) adjusted term SOFR (as defined in the Loan Agreement, the “Term SOFR Rate”) plus (B) a rate variable based on the Amended Net Adjusted Leverage Ratio, ranging from 1.00% to 1.75%, or (ii) the sum of (A) the highest of (x) the rate of interest last quoted by The Wall Street Journal as the prime rate in effect in the United States, (y) the greater of the rate calculated by the Federal Reserve Bank of New York as the federal funds effective rate or the rate that is published by the Federal Reserve Bank of New York as the overnight bank funding rate, in either case, plus 0.50%, and (z) the one-month Term SOFR Rate plus 1.00%, plus (B) a rate variable based on the Net Adjusted Leverage Ratio, ranging from 0.00% to 0.75%. The Company will also pay a fee variable based on the Net Adjusted Leverage Ratio, ranging from 0.125% to 0.25%, on the daily amount of unused commitments under the Loan Agreement. Letters of credit bear fees that are equivalent to the interest rate margin that is applicable to revolving loans that bear interest at the adjusted SOFR plus other customary fees charged by the issuing bank. We paid certain customary loan origination fees in conjunction with the Loan Agreement.

We are also subject to customary events of default that, if triggered, could result in acceleration of the maturity of the Revolver Facility. Subject to certain exceptions, the Revolver Facility also limits distributions with respect to our equity interests, such as cash dividends and share repurchases, based on a defined ratio, and also sets forth negative covenants that restrict indebtedness, liens, investments, sales of assets, fundamental changes and other matters.

Convertible Senior Notes

On June 15, 2021, we issued \$345.0 million aggregate principal amount of convertible senior notes due 2026 (“Notes”). The net proceeds from the sale of the Notes were approximately \$334.9 million after deducting issuance costs related to the Notes.

The Notes are senior, unsecured obligations and are (i) equal in right of payment with our existing and future senior, unsecured indebtedness; (ii) senior in right of payment to our existing and future indebtedness that is expressly subordinated to the Notes; (iii) effectively subordinated to our existing and future secured indebtedness, to the extent of the value of the collateral securing that indebtedness; and (iv) structurally subordinated to all existing and future indebtedness and other liabilities, including trade payables, and (to the extent we are not a holder thereof) preferred equity, if any, of our subsidiaries. The Notes were issued pursuant to, and are governed by, an indenture (the “Base Indenture”) between us and a trustee (“Trustee”), dated as of June 15, 2021, as supplemented by a first supplemental

indenture (the “Supplemental Indenture,” and the Base Indenture, as supplemented by the Supplemental Indenture, the “Indenture”), dated as of June 15, 2021, between the Company and the Trustee.

The Notes accrue interest at a rate of 0.375% per annum, payable semi-annually in arrears on June 15 and December 15 of each year, beginning on December 15, 2021. The Notes will mature on June 15, 2026, unless earlier repurchased, redeemed or converted. Before February 17, 2026, noteholders will have the right to convert their Notes only upon the occurrence of certain events. From and after February 17, 2026, noteholders may convert their Notes at any time at their election until the close of business on the second scheduled trading day immediately before the maturity date. We will have the right to elect to settle conversions either entirely in cash or in a combination of cash and shares of our common stock. However, upon conversion of any Notes, the conversion value, which will be determined over an “Observation Period” (as defined in the Indenture) consisting of 30 trading days, will be paid in cash up to at least the principal amount of the Notes being converted. The initial conversion rate is 12.7551 shares of common stock per \$1,000 principal amount of Notes, which represents an initial conversion price of approximately \$78.40 per share of common stock. The conversion rate and conversion price will be subject to customary adjustments upon the occurrence of certain events. In addition, if certain corporate events that constitute a “Make-Whole Fundamental Change” (as defined in the Indenture) occur, then the conversion rate will, in certain circumstances, be increased for a specified period of time. At January 3, 2023, the conversion rate for the Notes was 13.0675 shares of common stock per \$1,000 principal amount of the Notes, which represents a conversion price of approximately \$76.53 per share of common stock. In connection with the cash dividend that was declared by our Board on February 16, 2023, on March 21, 2023 we will adjust the conversion rate (which is expected to increase) and the conversion price (which is expected to decrease) of the Notes in accordance with the terms.

The Notes are redeemable, in whole or in part (subject to certain limitations described below), at our option at any time, and from time to time, on or after June 20, 2024 and on or before the 30th scheduled trading day immediately before the maturity date, at a cash redemption price equal to the principal amount of the Notes to be redeemed, plus accrued and unpaid interest, if any, to, but excluding, the redemption date, but only if the last reported sale price per share of our common stock exceeds 130% of the conversion price on (i) each of at least 20 trading days, whether or not consecutive, during the 30 consecutive trading days ending on, and including, the trading day immediately before the date we send the related redemption notice; and (ii) the trading day immediately before the date we send such notice. However, we may not redeem less than all of the outstanding Notes unless at least \$150.0 million aggregate principal amount of Notes are outstanding and not called for redemption as of the time we send the related redemption notice. In addition, calling any Note for redemption will constitute a Make-Whole Fundamental Change with respect to that Note, in which case the conversion rate applicable to the conversion of that Note will be increased in certain circumstances if it is converted after it is called for redemption.

If certain corporate events that constitute a “Fundamental Change” (as defined in the Indenture) occur, then, subject to a limited exception for certain cash mergers, noteholders may require us to repurchase their Notes at a cash repurchase price equal to the principal amount of the Notes to be repurchased, plus accrued and unpaid interest, if any, to, but excluding, the fundamental change repurchase date. The definition of Fundamental Change includes certain business combination transactions involving us and certain de-listing events with respect to our common stock.

The Notes will have customary provisions relating to the occurrence of “Events of Default” (as defined in the Indenture), which include the following: (i) certain payment defaults on the Notes (which, in the case of a default in the payment of interest on the Notes, will be subject to a 30-day cure period); (ii) our failure to send certain notices under the Indenture within specified periods of time; (iii) our failure to comply with certain covenants in the Indenture relating to our ability to consolidate with or merge with or into, or sell, lease or otherwise transfer, in one transaction or a series of transactions, all or substantially all of our assets and our subsidiaries, taken as a whole, to another person; (iv) a default by us in our other obligations or agreements under the Indenture or the Notes if such default is not cured or waived within 60 days after notice is given in accordance with the Indenture; (v) certain defaults by us or any of our significant subsidiaries with respect to indebtedness for borrowed money of at least \$20,000,000; (vi) the rendering of certain judgments against us or any of our significant subsidiaries for the payment of at least \$25,000,000, where such judgments are not discharged or stayed within 60 days after the date on which the right to appeal has expired or on which all rights to appeal have been extinguished; and (vii) certain events of bankruptcy, insolvency and reorganization involving us or any of our significant subsidiaries.

If an Event of Default involving bankruptcy, insolvency or reorganization events with respect to us (and not solely with respect to a significant subsidiary of ours) occurs, then the principal amount of, and all accrued and unpaid interest on, all of the Notes then outstanding will immediately become due and payable without any further action or notice by any person. If any other Event of Default occurs and is continuing, then, the Trustee, by notice to us, or noteholders of at least 25% of the aggregate principal amount of Notes then outstanding, by notice to us and the Trustee, may declare the principal amount of, and all accrued and unpaid interest on, all of the Notes then outstanding to become due and payable immediately. However, notwithstanding the foregoing, we may elect, at our option, that the sole remedy for an Event of Default relating to certain failures by us to comply with certain reporting covenants in the Indenture consists exclusively of the right of the noteholders to receive special interest on the Notes for up to 180 days at a specified rate per annum not exceeding 0.50% on the principal amount of the Notes.

As of January 3, 2023, the Notes had a gross principal balance of \$345.0 million and a balance of \$338.0 million, net of unamortized issuance costs of \$7.0 million. The unamortized balance of issuance costs was recorded as a contra-liability and netted with long-term debt on our condensed consolidated balance sheets. Total amortization expense was \$2.0 million and \$1.1 million in fiscal 2022 and fiscal 2021, respectively and was included in interest expense in the consolidated statements of income/(loss). The effective interest rate for the Notes was 0.96% as of January 3, 2023.

11. Leases

Components of lease expense were as follows (in thousands):

	Fiscal year		
	2022	2021	2020
Operating	\$ 140,351	\$ 131,834	\$ 129,431
Variable	81,585	73,909	58,863
Short-term	116	283	414
Total	<u>\$ 222,052</u>	<u>\$ 206,026</u>	<u>\$ 188,708</u>

Supplemental information related to leases (in thousands, except percentages):

	Fiscal Year	
	2022	2021
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows from operating leases	\$ 149,624	\$ 138,715
Right-of-use assets obtained in exchange for new operating lease liabilities	86,187	50,953
Weighted-average remaining lease term — operating leases (in years)	15.2	15.6
Weighted-average discount rate — operating leases	5.0 %	5.1 %

As of January 3, 2023, the maturities of our operating lease liabilities were as follows (in thousands):

2023	\$ 142,798
2024	129,087
2025	138,126
2026	136,831
2027	134,632
Thereafter	1,339,573
Total future lease payments	<u>2,021,047</u>
Less: Interest	<u>(648,452)</u>
Present value of lease liabilities	<u>\$ 1,372,595</u>

Operating lease liabilities include \$845.1 million related to options to extend lease terms that are reasonably certain of being exercised and exclude \$169.1 million of legally binding minimum lease payments for leases signed but not yet commenced.

12. Derivative

We terminated our interest rate swap agreement, which was designated as a cash flow hedge, in fiscal 2021. This interest rate swap, which would have matured on April 1, 2025, was established to manage our exposure to interest rate movements on our credit facility. The interest rate swap entitled us to receive a variable rate of interest based on the one-month LIBO rate in exchange for the payment of a fixed interest rate of 0.802%. The notional amount of the swap agreement was \$280.0 million through March 31, 2023 and \$140.0 million from April 1, 2023 through April 1, 2025. The differences between the variable LIBO rate and the interest rate swap rate were settled monthly. Prior to termination, the interest rate swap was determined to be an effective hedging agreement.

For derivatives designated as a cash flow hedge, changes in fair value are initially included as a component of accumulated other comprehensive loss (“AOCL”) and subsequently reclassified to earnings as interest expense when the hedged forecasted transaction occurs. Any ineffective portion of changes in the fair value are immediately recognized in earnings as interest expense. We classify cash inflows and outflows from derivatives within operating activities on the consolidated statements of cash flows. No gains or losses representing amounts excluded from the assessment of effectiveness were recognized in earnings in fiscal 2021 or fiscal 2020.

The following table summarizes the changes in AOCL, net of tax, related to the interest rate swap (in thousands):

	Fiscal year ended	
	December 28, 2021	December 29, 2020
Beginning balance	\$ (3,464)	\$ —
Other comprehensive loss before reclassifications	2,514	(4,612)
Amounts reclassified from AOCI	950	1,148
Other comprehensive loss, net of tax	3,464	(3,464)
Ending balance	<u>\$ —</u>	<u>\$ (3,464)</u>

We classified this interest rate swap within Level 2 of the valuation hierarchy described in Note 3. Our counterparty under this arrangement provided monthly statements of the market values of this instrument based on significant inputs that were observable or could be derived principally from, or corroborated by, observable market data for substantially the full term of the asset or liability. The impact on the derivative liability for our and the counterparty’s non-performance risk to the derivative trade was considered when measuring the fair value of derivative liability.

13. Other Noncurrent Liabilities

Other noncurrent liabilities consisted of (in thousands):

	Fiscal year ended	
	January 3, 2023	December 28, 2021
Non-qualified deferred compensation liabilities	\$ 78,286	\$ 92,012
Deferred consideration ⁽¹⁾	—	10,392
Contingent consideration and compensation liability	28,565	23,894
Other	18,159	21,102
Total	<u>\$ 125,010</u>	<u>\$ 147,400</u>

⁽¹⁾ The decrease during fiscal 2022 represents payment of deferred consideration per the Acquisition agreement.

14. Commitments and Contingencies

Purchase obligations, which include inventory purchases, equipment purchases, information technology and other miscellaneous commitments, were \$129.9 million and \$139.5 million at January 3, 2023 and December 28, 2021, respectively. These purchase obligations are primarily due within three years and recorded as liabilities when goods are received or services rendered. Real estate obligations, which include construction commitments, net of up-front landlord

construction contributions, and legally binding minimum lease payments for leases signed but not yet commenced, were \$252.4 million and \$151.6 million at January 3, 2023 and December 28, 2021, respectively.

The Acquisition agreement included a deferred consideration provision, of which the remaining balance of \$11.3 million is due in fiscal 2023. The Acquisition agreement also included a contingent consideration provision of which the remainder is payable annually from 2023 through 2027 and is based on achievement of revenue and profitability targets for the FRC brands other than North Italia and Flower Child with considerations made in the event we undergo a change in control or divest any FRC brand (other than North Italia and Flower Child) during the five years after Closing. The liability for this contingent consideration provision was \$28.6 million at January 3, 2023. See Note 2 for discussion of the fair value measurement of this liability. We are also required to provide financing to FRC in an amount sufficient to support achievement of these targets during the five years after Closing.

As credit guarantees to insurers, we had \$31.5 million and \$29.9 million at January 3, 2023 and December 28, 2021, respectively, in standby letters of credit related to our self-insurance liabilities. All standby letters of credit are renewable annually.

We retain the financial responsibility for a significant portion of our risks and associated liabilities with respect to workers' compensation, general liability, staff member health benefits, employment practices and other insurable risks. The accrued liabilities associated with these programs are based on our estimate of the ultimate costs to settle known claims, as well as claims incurred but not yet reported to us ("IBNR") as of the balance sheet date. The total accrued liability for our self-insured plans was \$71.9 million and \$67.6 million at January 3, 2023 and December 28, 2021, respectively.

On June 7, 2018, the California Department of Industrial Relations issued a \$4.2 million wage citation jointly against the Company and our vendor that provides janitorial services to eight of our Southern California restaurants, alleging that the janitorial vendor or its subcontractor failed to comply with various provisions of the California Labor Code (Wage Citation Case No. 35-CM-188798-16). The wage citation seeks to recover penalties and other monetary payments on behalf of the employees that worked for this vendor or its subcontractor. On June 28, 2018, we filed an appeal of the wage citation. On November 10, 2022, the parties participated in voluntary mediation and reached a tentative settlement on the wage citation. The settlement is subject to documentation and final agency approval. We have reserved an immaterial amount for settlement purposes.

On June 22, 2018, the Internal Revenue Service issued a Notice of Deficiency in which they disallowed a portion of our §199 Domestic Production Activities Deduction for tax years 2010, 2011 and 2012. On September 11, 2018, we petitioned the United States Tax Court for a redetermination of the deficiency. The tax court assigned docket number 18150-18 to our case. On April 29, 2022, the parties filed a Settlement Stipulation and a Proposed Stipulated Decision (the "Decision") with the tax court stipulating to the amount of income tax deficiency. On May 11, 2022, the court entered the Decision in accordance with the stipulation of the parties. We have recorded an immaterial amount in connection with the Decision.

Within the ordinary course of our business, we are subject to private lawsuits, government audits and investigations, administrative proceedings and other claims. These matters typically involve claims from customers, staff members and others related to operational and employment issues common to the foodservice industry. A number of these claims may exist at any given time, and some of the claims may be pled as class actions. From time to time, we are also involved in lawsuits with respect to infringements of, or challenges to, our registered trademarks and other intellectual property, both domestically and abroad. We could be affected by adverse publicity and litigation costs resulting from such allegations, regardless of whether they are valid or whether we are legally determined to be liable.

At this time, we believe that the amount of reasonably possible losses resulting from final disposition of any pending lawsuits, audits, investigations, proceedings and claims will not have a material adverse effect individually or in the aggregate on our financial position, results of operations or liquidity. It is possible, however, that our future results of operations for a particular quarter or fiscal year could be impacted by changes in circumstances relating to lawsuits, audits, proceedings or claims. Legal costs related to such claims are expensed as incurred.

We have employment agreements with certain of our executive officers that provide for payments to those officers in the event of an actual or constructive termination of their employment, including in the event of a termination without cause, an acquirer failure to assume or continue equity awards following a change in control of the Company or, otherwise, in the event of death or disability as defined in those agreements. Aggregate payments totaling approximately \$3.3 million, excluding accrued potential bonuses of \$2.0 million, which are subject to approval by the Compensation Committee, would have been required by those agreements had all such officers terminated their employment for reasons requiring such payments as of January 3, 2023. In addition, the employment agreement with our Chief Executive Officer specifies an annual founder's retirement benefit of \$650,000 for ten years, commencing six months after termination of his full-time employment.

15. Stockholders' Equity and Series A Convertible Preferred Stock

Common Stock Issuance

On June 15, 2021, we issued 3.125 million shares of our common stock for \$175.0 million. In connection with the issuance, we incurred direct and incremental costs of \$8.0 million.

Common Stock - Dividends and Share Repurchases

To preserve liquidity during the COVID-19 pandemic and in conjunction with the terms of our then-existing credit agreement, in March 2020, our Board suspended the quarterly dividend on our common stock. Prior to this suspension, our Board declared cash dividends of \$0.36 per common share for the first quarter of fiscal 2020. Our Board resumed our quarterly dividend in the second quarter of fiscal 2022, declaring \$0.81 per common share during fiscal 2022. Future decisions to pay or to increase or decrease dividends are at the discretion of the Board and will be dependent on our operating performance, financial condition, capital expenditure requirements, limitations on cash distributions pursuant to the terms and conditions of the Loan Agreement and applicable law, and such other factors that the Board considers relevant. (See Note 10 for further discussion of our long-term debt.)

On October 26, 2022, our Board increased the authorization to repurchase our common stock by 5.0 million shares to 61.0 million shares. Under this authorization, we have cumulatively repurchased 55.1 million shares at a total cost of \$1,765.6 million through January 3, 2023. During fiscal 2022, 2021 and 2020, we repurchased 2.0 million, 0.1 million and 0.1 million shares of our common stock at a cost of \$63.1 million, \$5.8 million and \$3.6 million, respectively. The increase from fiscal 2021 to 2022 is primarily due to the resumption of our share repurchase program in the second quarter of fiscal 2022 after the suspension that began in fiscal 2020 due to the impact of COVID-19 on our business and in conjunction with the terms of our Loan Agreement. Our objectives with regard to share repurchases have been to offset the dilution to our shares outstanding that results from equity compensation grants and to supplement our earnings per share growth. Repurchased common stock is reflected as a reduction of stockholders' equity in treasury stock.

Our share repurchase program does not have an expiration date, does not require us to purchase a specific number of shares and may be modified, suspended or terminated at any time. Share repurchases may be made from time to time in open market purchases, privately-negotiated transactions, accelerated share repurchase programs, issuer self-tender offers or otherwise. Future decisions to repurchase shares are at the discretion of the Board and are based on several factors, including current and forecasted operating cash flows, capital needs associated with new restaurant development and maintenance of existing locations, dividend payments, debt levels and cost of borrowing, obligations associated with the Acquisition, our share price and current market conditions. The timing and number of shares repurchased are also subject to legal constraints and covenants under our credit facility that limit share repurchases based on a defined ratio. (See Note 10 for further discussion of our long-term debt.)

Series A Convertible Preferred Stock

On April 20, 2020, we issued 200,000 shares of Series A Convertible Preferred Stock, par value \$0.01 per share (the “Series A preferred stock”) for an aggregate purchase price of \$200 million, or \$1,000 per share. In connection with the issuance, we incurred direct and incremental costs of \$10.3 million, including financial advisory fees, closing costs, legal expenses, a commitment fee and other offering-related expenses. These direct and incremental costs reduced the Series A preferred stock balance at the issuance date and were recognized through retained earnings on June 30, 2020, the first measurement date. Upon adoption of ASU 2020-06 in the first quarter of fiscal 2021, we recorded a \$4.8 million cumulative adjustment to retained earnings to reverse beneficial conversion features recorded during fiscal 2020.

The Series A preferred stock ranked senior to our common stock with respect to dividends and distributions on liquidation, winding-up and dissolution upon which each share of Series A preferred stock would be entitled to receive an amount per share equal to the greater of (i) the purchase price (without giving effect to the commitment fee), plus all accrued and unpaid dividends (the “Liquidation Preference”) and (ii) the amount that the holder of the Series A preferred stock would have been entitled to receive at such time if the Series A preferred stock were converted into common stock.

On June 15, 2021, we paid \$443.8 million in connection with the cash-settled conversion of 150,000 shares of our outstanding Series A preferred stock (effected through a repurchase agreement), which was recognized through additional paid in capital. We also share-settled the conversion of the remaining 50,000 shares of our outstanding Series A convertible preferred stock into 2,400,864 shares of our common stock. These are both based on the then current Liquidation Preference per share of \$1,067.42 and conversion price of \$22.23.

During the first quarter of fiscal 2021, we declared a cash dividend of \$5.1 million, or \$25.35 per share, on the Series A preferred stock. During the second quarter of fiscal 2021, \$13.6 million in payments were made in connection with the conversion of the Series A preferred stock, consisting of \$3.9 million, or \$19.72 per share, of accrued dividends and \$9.7 million of an inducement, which is also deemed to be a dividend.

16. Stock-Based Compensation

We maintain stock-based incentive plans under which incentive stock options, non-qualified stock options, stock appreciation rights, restricted shares and restricted share units may be granted to staff members, consultants and non-employee directors. Our current practice is to issue new shares, rather than treasury shares, upon stock option exercises, for restricted share grants and upon vesting of restricted share units. To date, we have only granted non-qualified stock options, restricted shares and restricted share units of common stock under these plans.

On March 24, 2022, our Board approved an amendment to our The Cheesecake Factory Incorporated Stock Incentive Plan to increase the number of shares of common stock reserved for grant under the plan to 19.8 million shares from 17.5 million shares. This amendment was approved by our stockholders at our annual meeting held on May 23, 2022. Approximately 4.7 million of these shares were available for grant as of January 3, 2023.

Stock options generally vest at 20% per year and expire eight to ten years from the date of grant. Restricted shares and restricted share units generally vest between three to five years from the date of grant and require that the staff member remains employed in good standing with the Company as of the vesting date. Certain restricted share units granted to executive officers contain performance-based vesting conditions. Performance goals are determined by the Board of Directors. The quantity of units that will vest ranges from 0% to 150% based on the level of achievement of the performance conditions. Equity awards for certain executive officers may vest earlier in the event of a change of control in which the acquirer fails to assume or continue such awards, as defined in the plan, or under certain circumstances described in such executive officers’ respective employment agreements. Compensation expense is recognized only for those options, restricted shares and restricted share units expected to vest, with forfeitures estimated based on our historical experience and future expectations.

The following table presents information related to stock-based compensation, net of forfeitures (in thousands):

	Fiscal Year		
	2022	2021	2020
Labor expenses	\$ 9,590	\$ 8,856	\$ 7,753
Other operating costs and expenses	321	311	309
General and administrative expenses	<u>14,515</u>	<u>13,821</u>	<u>13,288</u>
Total stock-based compensation	24,426	22,988	21,350
Income tax benefit	6,026	5,646	5,245
Total stock-based compensation, net of taxes	<u>\$ 18,399</u>	<u>\$ 17,342</u>	<u>\$ 16,105</u>
Capitalized stock-based compensation ⁽¹⁾	\$ 226	\$ 194	\$ 207

⁽¹⁾ It is our policy to capitalize the portion of stock-based compensation costs for our internal development department that relates to capitalizable activities such as the design and construction of new restaurants, remodeling existing locations and equipment installation. Capitalized stock-based compensation is included in property and equipment, net on the consolidated balance sheets.

Stock Options

We did not issue any stock options during fiscal 2022 or 2021. The weighted-average fair value at the grant date for options issued during fiscal 2020 was \$6.66 per share. The fair value of options issued was estimated utilizing the Black-Scholes valuation model with the following weighted-average assumptions: (a) an expected option term of 6.9 years, (b) expected stock price volatility of 25.7%, (c) a risk-free interest rate of 1.5% and (d) a dividend yield on our stock of 3.6%.

The expected option term represents the estimated period of time until exercise and is based on historical experience of similar options, giving consideration to the contractual terms, vesting schedules and expectations of future staff member behavior. Expected stock price volatility is based on a combination of the historical volatility of our stock and the implied volatility of actively traded options on our common stock. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant with an equivalent remaining term. The dividend yield is based on anticipated cash dividend payouts.

Stock option activity during fiscal 2022 was as follows:

	Shares (In thousands)	Weighted- Average Exercise Price (Per share)	Weighted- Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value ⁽¹⁾ (In thousands)
Outstanding at beginning of year	1,716	\$ 46.14	5.1	\$ 0
Granted	—	\$ —		
Exercised	(2)	\$ 40.16		
Forfeited or cancelled	(29)	\$ 48.19		
Outstanding at end of year	<u>1,685</u>	\$ 46.11	4.2	\$ 0
Exercisable at end of year	1,119	\$ 48.10	3.2	\$ 0

⁽¹⁾ Aggregate intrinsic value is calculated as the difference between our closing stock price at fiscal year end and the exercise price, multiplied by the number of in-the-money options and represents the pre-tax amount that would have been received by the option holders, had they all exercised their options on the fiscal year-end date.

The total intrinsic value of options exercised during fiscal 2022, 2021 and 2020 was \$4.9 million, \$7.1 million and \$0.1 million, respectively. As of January 3, 2023, total unrecognized stock-based compensation expense related to unvested stock options was \$2.5 million, which we expect to recognize over a weighted-average period of approximately 1.7 years.

Restricted Shares and Restricted Share Units

Restricted share and restricted share unit activity during fiscal 2022 was as follows:

	<u>Shares</u> <u>(In thousands)</u>	<u>Weighted-Average</u> <u>Fair Value</u> <u>(Per share)</u>
Outstanding at beginning of year	2,123	\$ 44.82
Granted.	941	\$ 36.84
Vested.	(407)	\$ 45.35
Forfeited.	<u>(145)</u>	\$ 41.53
Outstanding at end of year	<u>2,512</u>	\$ 41.93

Fair value of our restricted shares and restricted share units is based on our closing stock price on the date of grant. The weighted-average fair value for restricted shares and restricted share units issued during fiscal 2022, 2021 and 2020 was \$36.84, \$49.57 and \$37.94, respectively. The fair value of shares that vested during fiscal 2022, 2021 and 2020 was \$18.5 million, \$15.4 million and \$15.6 million, respectively. As of January 3, 2023, total unrecognized stock-based compensation expense related to unvested restricted shares and restricted share units was \$50.2 million, which we expect to recognize over a weighted-average period of approximately 2.9 years.

17. Employee Benefit Plans

We have defined contribution benefit plans in accordance with section 401(k) of the Internal Revenue Code (“401(k) Plans”) that are open to our staff members who meet certain compensation and eligibility requirements. Participation in the 401(k) Plans is currently open to staff members from our restaurant concepts, bakery facilities, corporate office and FRC headquarters. The 401(k) Plans allow participating staff members to defer the receipt of a portion of their compensation and contribute such amount to one or more investment options. Our executive officers and a select group of management and/or highly compensated staff members are not eligible to participate in the 401(k) Plans. We currently match in cash a certain percentage of the staff member contributions to the 401(k) Plans and also pay a portion of the administrative costs. Expense recognized in fiscal 2022, 2021 and 2020 was \$2.1 million, \$2.1 million and \$1.8 million, respectively.

We have also established non-qualified deferred compensation plans (“Non-Qualified Plans”) for our executive officers and a select group of management and/or highly compensated staff members. The Non-Qualified Plans allow participating staff members to defer the receipt of a portion of their base compensation and bonuses. Non-employee directors may also participate in the Non-Qualified Plans and defer the receipt of their earned director fees. We currently match in cash a certain percentage of the staff member contributions to the Non-Qualified Plans and also pay for the administrative costs. We do not match any contributions made by non-employee directors. Expense recognized in fiscal 2022, 2021 and 2020 was \$1.4 million, \$1.2 million and \$1.3 million, respectively.

While we are under no obligation to fund Non-Qualified Plan liabilities (in whole or in part), our current practice is to maintain company-owned life insurance contracts and other investments that are specifically designed to informally fund savings plans of this nature. These contracts are recorded at their cash surrender value as determined by the insurance carrier. Our consolidated balance sheets reflect investments in other assets and our obligation to participants in the Non-Qualified Plans in other noncurrent liabilities. Gains and losses related to our non-qualified deferred compensation assets and liabilities are reflected in interest and other expense, net in our consolidated statements of income/(loss).

We maintain self-insured medical and dental benefit plans for our staff members. The accrued liabilities associated with these programs are based on our estimate of the ultimate costs to settle known claims as well as claims

incurred but not yet reported to us as of the balance sheet date. The accrued liability for our self-insured benefit plans, which is included in other accrued expenses, was \$14.0 million and \$15.3 million as of January 3, 2023 and December 28, 2021, respectively. (See Note 1 for further discussion of accounting for our self-insurance liabilities.)

18. Income Taxes

The provision for income taxes consisted of the following (in thousands):

	Fiscal Year		
	2022	2021	2020
Income/(Loss) before income taxes	\$ 32,892	\$ 71,620	\$ (356,036)
Income tax provision/(benefit):			
Current:			
Federal	\$ 3,520	\$ 15,746	\$ (38,414)
State	4,895	4,350	2,971
Total current	<u>8,415</u>	<u>20,096</u>	<u>(35,443)</u>
Deferred:			
Federal	(17,733)	(20,434)	(52,607)
State	(913)	(415)	(14,621)
Total deferred	<u>(18,646)</u>	<u>(20,849)</u>	<u>(67,228)</u>
Total benefit	<u>\$ (10,231)</u>	<u>\$ (753)</u>	<u>\$ (102,671)</u>

The following reconciles the U.S. federal statutory rate to the effective tax rate:

	Fiscal Year		
	2022	2021	2020
U.S. federal statutory rate	21.0 %	21.0 %	21.0 %
State and district income taxes, net of federal benefit	8.9	4.2	2.6
Credit for FICA taxes paid on tips	(66.4)	(24.2)	2.1
Other credits and incentives	(10.7)	(4.2)	0.3
Impact of net operating loss carryback	0.0	(6.3)	3.4
Deferred compensation	9.7	(2.9)	0.6
Equity compensation	5.5	0.0	(0.4)
Uncertain tax positions	(2.3)	10.3	0.0
Non-deductible executive compensation	2.8	0.3	(0.1)
Other	0.4	0.7	(0.7)
Effective tax rate	<u>(31.1)%</u>	<u>(1.1)%</u>	<u>28.8 %</u>

On March 27, 2020, the CARES Act was signed into law. Intended to provide economic relief to those impacted by the COVID-19 pandemic, the CARES Act includes provisions allowing for the carryback of net operating losses generated in fiscal years 2018, 2019 and 2020 and technical amendments regarding the expensing of qualified improvement property (“QIP”). During fiscal 2021, we filed a refund claim in the amount of \$18.4 million for our fiscal 2020 net operating loss carryback, which was received during fiscal 2022. In January 2022, we filed amended returns for tax years 2018 and 2019 requesting total refunds of \$21.3 million for credits released by our fiscal 2020 loss carryback. These refunds have not yet been received. The effects of these claims were primarily included in our fiscal 2020 provision for income taxes, using estimates based on the best information available at the time we prepared our fiscal 2020 consolidated financial statements, and were adjusted to as-filed actual amounts in our fiscal 2021 provision for income taxes. These adjustments had a minor effect on our fiscal 2021 provision for income taxes. In our fiscal 2021 provision for income taxes, we also recorded the effects of accelerating the remittance of certain FICA taxes that had been deferred pursuant to the CARES Act. The accelerated remittance increased the value of our fiscal 2020 loss carryback by \$4.3 million. We made no further adjustments in our fiscal 2022 provision for income taxes relating to these amounts.

Following are the temporary differences that created our deferred tax assets and liabilities (in thousands):

	<u>January 3, 2023</u>	<u>December 28, 2021</u>
Deferred tax assets:		
Staff member benefits	\$ 31,325	\$ 36,295
Insurance reserves	14,374	12,897
Operating lease liability	323,094	315,403
Deferred income	35,928	33,075
Tax credit carryforwards	57,710	34,871
Goodwill	21,331	19,103
Stock-based compensation	10,769	10,122
State and foreign net operating loss carryforwards	2,435	3,005
Other	604	1,063
Subtotal	<u>497,570</u>	<u>465,834</u>
Less: Valuation allowance	<u>(1,223)</u>	<u>(1,036)</u>
Total	<u>\$ 496,347</u>	<u>\$ 464,798</u>
Deferred tax liabilities:		
Property and equipment	\$ (113,565)	\$ (109,019)
Prepaid expenses	(8,151)	(7,312)
Inventory	(8,399)	(7,802)
Accrued rent	(5,285)	(5,087)
Operating lease asset	(283,921)	(277,220)
Other	(781)	(724)
Total	<u>\$ (420,102)</u>	<u>\$ (407,164)</u>
Net deferred tax asset	<u>\$ 76,245</u>	<u>\$ 57,634</u>

At January 3, 2023 and December 28, 2021, we had \$56.5 million and \$33.6 million, respectively of U.S. federal credit carryforwards which begin to expire in 2038 and \$1.6 million and \$1.7 million, respectively, of state hiring and investment credits which begin to expire in 2024. At January 3, 2023 and December 28, 2021, we had \$2.5 million and \$2.7 million, respectively of foreign net operating loss carryforwards which begin to expire in 2038 and \$46.6 million and \$64.6 million, respectively, of state net operating loss carryforwards with statutory carryforward periods ranging from 5 years to no expiration period. The earliest year that a material state net operating loss will expire is 2032.

We assess the available evidence to estimate if these carryforwards and our other deferred tax assets will be realized. We concluded that a substantial portion of our deferred tax assets are more likely than not to be realized by reversals of existing taxable temporary differences and that forecasted future taxable income, exclusive of reversing temporary differences, will result in realization of a substantial portion of the remainder. We did not need to consider tax planning strategies in this analysis. Based on this evaluation, at January 3, 2023 and December 28, 2021 we carried a valuation allowance of \$1.2 million and \$1.0 million, respectively to reflect the amount that we will likely not realize. This assessment could change if estimates of future taxable income during the carryforward period are revised. The earliest tax year still subject to examination by a significant taxing jurisdiction is 2015.

At January 3, 2023, we had a reserve of \$3.8 million for uncertain tax positions, all of which would favorably impact our effective income tax rate if resolved in our favor. A reconciliation of the beginning and ending amount of our uncertain tax positions is as follows (in thousands):

	<u>Fiscal Year</u>		
	<u>2022</u>	<u>2021</u>	<u>2020</u>
Balance at beginning of year	\$ 4,799	\$ 655	\$ 704
Additions related to prior year tax positions	227	4,157	—
Additions related to current period tax positions	(54)	(13)	(49)
Reductions related to settlements with taxing authorities	(1,185)	—	—
Balance at end of year	<u>\$ 3,787</u>	<u>\$ 4,799</u>	<u>\$ 655</u>

At January 3, 2023 and December 28, 2021, we had \$2.2 million and \$3.6 million, respectively of accrued interest and penalties related to uncertain tax positions. None of the balance of uncertain tax positions at January 3, 2023 related to tax positions for which it is reasonably possible that the total amount could decrease during the next twelve months based on the lapses of statutes of limitations.

19. Segment Information

Our operating segments, the businesses for which our management reviews discrete financial information for decision-making purposes, are comprised of The Cheesecake Factory, North Italia, Flower Child, the other FRC brands, our bakery division and Grand Lux Cafe. Based on quantitative thresholds set forth in ASC 280, “Segment Reporting,” The Cheesecake Factory, North Italia and the other FRC brands are the only businesses that meet the criteria of a reportable operating segment. The remaining operating segments (Flower Child, our bakery division and Grand Lux Cafe) along with our businesses that don’t qualify as operating segments are combined in Other. Unallocated corporate expenses, capital expenditures and assets are also combined in Other.

Segment information is presented below (in thousands):

	Fiscal Year		
	2022	2021	2020
Revenues:			
The Cheesecake Factory restaurants	\$ 2,528,043	\$ 2,293,225	\$ 1,585,008
North Italia	228,622	171,901	102,585
Other FRC	237,552	182,175	96,856
Other	308,939	280,239	198,776
Total	<u>\$ 3,303,156</u>	<u>\$ 2,927,540</u>	<u>\$ 1,983,225</u>
Income/(loss) from operations:			
The Cheesecake Factory restaurants	\$ 220,765	\$ 242,599	\$ 45,540
North Italia	13,934	8,624	(77,371)

THE CHEESECAKE FACTORY INCORPORATED
CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER
PURSUANT TO EXCHANGE ACT RULES 13a-14(a) AND 15d-14(a)
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, David Overton, certify that:

1. I have reviewed this annual report on Form 10-K of The Cheesecake Factory Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report of The Cheesecake Factory Incorporated (the “Company”) on Form 10-K for the period ended January 3, 2023 as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, David Overton, Chairman of the Board and Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
