Washington, D.C. 20549

FORM 10-Q

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2013

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Transition Period from _____ to _____
Commission File Number 0-23272

NPS PHARMACEUTICALS, INC.
(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or Other Jurisdiction of Incorporation or Organization)

87-0439579
(I.R.S. Employer Identification No.)

550 Hills Drive, Bedminster, New Jersey
(Address of Principal Executive Offices)

07921
(Zip Code)

(908) 450-5300

(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for at least the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," and large "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

The number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date is as follows:

Class	Outstanding at August 1, 2013
Common Stock \$.001 par value	101,429,319

NPS PHARMACEUTICALS, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

(1) Description of Business and Significant Accounting Policies

The accompanying unaudited condensed consolidated financial statements included herein have been prepared by NPS Pharmaceuticals, Inc. (NPS or the Company) in accordance with the rules and regulations of the United States Securities and Exchange Commission (SEC). The condensed consolidated financial statements are comprised of the financial statements of NPS and its subsidiaries collectively referred to as the Company. In management's opinion, the interim financial data presented includes all adjustments (consisting solely of normal recurring items) necessary for fair presentation. All intercompany accounts and transactions have been eliminated. Certain information required by U.S. generally accepted accounting principles has been condensed or omitted in accordance with rules and regulations of the SEC. Operating results for the three and six months ended June 30, 2013 are not necessarily indicative of the results that may be expected for any future period or for the year ending December 31, 2013.

These condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and the notes thereto for the year ended December 31, 2012, included in NPS' 2012 Annual Report on Form 10-K filed with the SEC.

The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions relating to reporting of the assets and liabilities and the disclosure of contingent assets and liabilities to prepare these condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period in conformity with U.S. generally accepted accounting principles. Actual results could differ from these estimates.

Subsequent Events

The Company has evaluated all events and transactions since June 30, 2013. The Company did not have any material recognized or non-recognized subsequent events.

Significant Accounting Policies

There were no material changes in the Company's significant accounting policies from those at December 31, 2012; however, the following information, which relates to the U.S. launch of Gattex in February 2013, is in addition to, and should be read in conjunction with, the accounting policies included in the Company's our Annual Report on Form 10-K for the year ended December 31, 2012.

Product Sales. Product sales represent U.S. sales of Gattex, which was approved by the U.S. Food and Drug Administration (FDA) in December 2012. The Company recognizes revenue from Gattex product sales when persuasive evidence of an arrangement exists, title to product and associated risk of loss has passed to the customer, the price is fixed or determinable, collection from the customer is reasonably assured, the Company has no further performance obligations, and returns can be reasonably estimated.

All prescriptions for Gattex, received directly by NPS from the patient's physician, are handled through NPS Advantage, the Company's data management and patient support program, which investigates and determines the patient's insurance coverage for Gattex. Once coverage is confirmed, NPS forwards the prescription to the specialty pharmacy (SP) who then re-confirms the coverage and dispenses Gattex to the patient. The Company sells Gattex directly to a limited number of SPs and a specialty distributor (SD) who dispense product to patients, hospitals or U.S. government entities. The Company invoices and records revenue when SPs or SD receives Gattex from the Company's third-party logistics warehouse. The Company's SPs order product to fill prescriptions that have been approved for reimbursement by payers.

Specific considerations for Gattex sold in the U.S. are as follows:

- *Rebates:* Allowances for rebates include mandated discounts under the Medicaid Drug Rebate Program. Rebates are amounts owed after the final dispensing of the product to a benefit plan participant and are based upon contractual agreements or legal requirements with public sector (e.g. Medicaid) benefit providers. The allowance for rebates is based on statutory discount rates and expected utilization. The Company's estimate for expected utilization for rebates is based in part on actual and pending prescriptions for which it has validated the insurance benefits.
- *Chargebacks:* Chargebacks are discounts that occur when contracted customers purchase from the Company's SPs or SD. Contracted customers, which currently consist primarily of Public Health Service institutions and Federal government entities purchasing via the Federal Supply Schedule, generally purchase the product at a discounted price. The Company's SPs or SD, in turn, charge back the difference between the price initially paid by the SP or SD and the discounted price paid to the SP or SD by the customer. The allowance for chargebacks is based on actual and expected sales to the SPs and SD.
- *SP and SD Fees and Deductions:* The Company's SPs and its SD are offered prompt payment discounts and are paid fees for their services and data.
- *Product returns:* The Company will accept product that is damaged or defective when shipped directly to the SP or SD from the Company's third-party logistics provider or for product that is returned with more than two (2) months remaining until the expiration date from its SP or SD only. The Company will not provide any credit for product that has been labeled for or sent to a patient. Product returned is generally not resalable as the product must be temperature-controlled throughout the supply chain and such control is difficult to confirm. The Company makes a reasonable estimate of future potential product returns based on the number of prescriptions that have been approved for reimbursement and sent to an SP with each corresponding shipment of Gattex that has been sent to each respective SP. The Company also has the visibility to see current inventory levels and the current shelf life at the SPs and SD and has the ability to control the amount of product that is sold to the SPs and SD. At the end of each reporting period, the Company determines a product returns reserve by evaluating the units held in its distribution channel, the underlying demand for such units and the risk of potential product returns. At June 30, 2013 the Company recorded a returns reserve of approximately \$143,000 that it believes could be returned in the future.

Product sales are recorded net of accruals for estimated rebates, chargebacks, discounts, and other deductions (collectively, sales deductions) and returns. With the exception of allowances for prompt payment, allowances for sales deductions and returns are included in accounts payable and accrued expenses in the accompanying consolidated balance sheets.

Inventory. Inventories are stated at the lower of cost or estimated realizable value. The Company determines the cost of inventory using the first-in, first-out, or FIFO, method. The Company capitalizes inventory costs associated with the Company's products after regulatory approval when, based on management's judgment, future commercialization is considered probable and the future economic benefit is expected to be realized; otherwise, such costs are expensed as research and development. The Company periodically analyzes its inventory levels to identify inventory that may expire prior to expected sale or has a cost basis in excess of its estimated realizable value, and writes-down such inventories as appropriate. In addition, the Company's products are subject to strict quality control and monitoring which the Company performs throughout the manufacturing process. If certain batches or units of product no longer meet quality specifications or become obsolete due to expiration, the Company records a charge to cost of goods sold to write down such unmarketable inventory to its estimated realizable value.

(2) Income (Loss) Per Common Share

The following table sets forth the components of basic and diluted income per common share for the three months ended June 30, 2012 due to net income in the three month period (in thousands, except per share data):

	Three Months Ended June 30, 2012
EPS Numerator – Basic:	
Net income	\$ <u>7,355</u>
EPS Denominator – Basic:	
Weighted-average number of shares of common stock outstanding	<u>86,903</u>
EPS Numerator – Diluted:	
Net income	7,355
Adjustment for interest and financing costs:	
Convertible notes	<u>244</u>
Net income	\$ <u>7,599</u>
EPS Denominator – Diluted:	
Weighted-average number of shares of common stock outstanding	<u>86,903</u>
Effect of dilutive securities:	
Stock options and awards	1,526
Convertible debt	<u>3,041</u>
Dilutive potential common shares	<u>4,567</u>
Weighted-average common shares and dilutive potential common shares	<u>91,470</u>
Basic net income per common share	\$ 0.08
Diluted net income per common share	\$ 0.08

Basic net income (loss) per common share is the amount of income (loss) for the period divided by the weighted average shares of common stock outstanding during the reporting period. Diluted income (loss) per common share is the amount of income (loss) for the period plus interest expense on convertible debt divided by the sum of weighted average shares of common stock outstanding during the reporting period and weighted average shares that would have been outstanding assuming the issuance of common shares for all dilutive potential common shares.

Potential common shares of approximately 6.3 million and 8.1 million during the three and six months ended June 30, 2013, respectively and 3.4 million and 7.6 million during the three and six months ended June 30, 2012, respectively that could potentially dilute basic income per share in the future were not included in the computation of diluted income (loss) per share because to do so would have been anti-dilutive for the periods presented. Potential dilutive common shares related to convertible debt were approximately 3.0 million common shares for the three and six months ended June 30, 2013, respectively and 0 and 3.0 million common shares for the three and six months ended June 30, 2012, respectively. Additionally, potential dilutive common shares related to stock options, restricted stock and restricted stock units were 3.3 million and 5.1 million common shares for the three and six months ended June 30, 2013, respectively, and 3.4 million and 4.6 million common shares, for the three and six months ended June 30, 2012, respectively.

(3) Fair Value Measurement

The Company's financial assets and liabilities are measured using inputs from the three levels of the fair value hierarchy. The three levels are as follows:

Level 1- Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2- Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (i.e., interest rates, yield curves, etc.), and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market corroborated inputs).

Level 3- Inputs are unobservable and reflect the Company's assumptions that market participants would use in pricing the asset or liability. The Company develops these inputs based on the best information available.

Summary of Assets Recorded at Fair Value

In accordance with the fair value hierarchy described above, the following table shows the fair value of the Company's financial assets (only marketable investment securities) that are required to be measured at fair value as of June 30, 2013 and December 31, 2012 (in thousands):

<i>As of June 30, 2013:</i>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Marketable investment securities	\$ 102,220	\$ 8,114	\$ -	\$ 110,334
<i>As of December 31, 2012:</i>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Marketable investment securities	\$ 67,723	\$ 15,521	\$ -	\$ 83,244

As of June 30, 2013 and December 31, 2012, the fair values of the Company's Level 2 securities were \$8.1 million and \$15.5 million, respectively. These securities are certificates of deposit or commercial paper issued by domestic companies with an original maturity of greater than ninety days but less than 18 months. These securities are currently rated A-1 or higher. The Company's cash equivalents are classified within Level 1 or Level 2 of the fair value hierarchy because they are valued using quoted market prices or broker or dealer quotations for similar assets. These investments are initially valued at the transaction price and subsequently valued utilizing third party pricing providers or other market observable data. Data used in the analysis include reportable trades, broker/dealer quotes, bids and offers, benchmark yields and credit spreads. The Company validates the prices provided by its third party pricing providers by reviewing their pricing methods, analyzing pricing inputs and confirming that the securities have traded in normally functioning markets. The Company did not adjust or override any fair value measurements provided by its pricing providers as of June 30, 2013 or December 31, 2012.

As of June 30, 2013 and December 31, 2012, the Company did not have any investments in Level 3 securities.

There were no transfers of assets or liabilities between level 1 and level 2 during the three or six months ended June 30, 2013 and 2012.

The carrying amounts reflected in the condensed consolidated balance sheets for certain short-term financial instruments including accounts receivable, accounts payable, accrued expenses, and other liabilities approximate fair value due to their short-term nature except that the estimated fair value and carrying value of a royalty liability to the Brigham and Women's Hospital related to sales of cinacalcet HCl using a discounted cash flow model is approximately \$4.1 million and \$5.6 million, respectively, at June 30, 2013 and \$4.8 million and \$6.6 million, respectively, at December 31, 2012.

Summary of Liabilities Recorded at Carrying Value

The fair and carrying value of our debt instruments are detailed as follows (in thousands):

	As of June 30, 2013		As of December 31, 2012	
	Fair Value	Carrying Value	Fair Value	Carrying Value
5.75% Convertible Notes	\$ 45,963	\$ 16,545	\$ 28,131	\$ 16,545
Sensipar Notes	66,911	67,593	79,129	80,234
PTH 1-84 (Europe, CIS and Turkey)				
-Secured Debt	30,097	42,790	28,605	42,816
Regpara-Secured Debt	41,058	36,252	48,887	36,252
Total	<u>\$ 184,029</u>	<u>\$ 163,180</u>	<u>\$ 184,752</u>	<u>\$ 175,847</u>

The fair values of the Company's convertible notes were estimated using the (i) terms of the convertible notes; (ii) rights, preferences, privileges, and restrictions of the underlying security; (iii) time until any restriction(s) are released; (iv) fundamental financial and other characteristics of the Company; (v) trading characteristics of the underlying security (exchange, volume, price, and volatility); and (vi) precedent sale transactions. The fair values of the Company's non-recourse Sensipar notes, PTH 1-84 (Europe, Commonwealth of Independent States (CIS) and Turkey)-secured debt and Regpara-secured debt were estimated using a discounted cash flow model. Within the hierarchy of fair value measurements, these are Level 3 fair values.

(4) Financial Instruments

Financial instruments that potentially subject the Company to concentrations of credit risk are accounts receivable and marketable investment securities. The majority of the Company's accounts receivable are payable by pharmaceutical companies and specialty pharmacies and collateral is generally not required from these companies. Substantially all of the Company's royalty revenues for the three and six months ended June 30, 2013 and 2012 were from three and four licensees, respectively, and substantially all of the Company's accounts receivable balances at June 30, 2013 and December 31, 2012 were from three licensees. Substantially all of the Company's product sales revenues for the three and six months ended June 30, 2013 and substantially all of the Company's trade accounts receivable balances at June 30, 2013 were from six specialty pharmacies. The Company's portfolio of marketable investment securities is subject to concentration limits set within the Company's investment policy that help to mitigate its credit exposure.

The following is a summary of the Company's marketable investment securities (in thousands):

	Amortized cost	Gross unrealized holding gains	Gross unrealized holding losses	Fair value
<i>As of June 30, 2013:</i>				
Debt securities:				
Corporate	\$ 72,083	\$ 1	\$ (110)	\$ 71,974

Summary of Contractual Maturities

Maturities of marketable investment securities are as follows at June 30, 2013 and December 31, 2012 (in thousands):

	<u>As of June 30, 2013</u>		<u>As of December 31, 2012</u>	
	<u>Amortized cost</u>	<u>Fair value</u>	<u>Amortized cost</u>	<u>Fair value</u>
Due within one year	\$ 94,236	\$ 94,179	\$ 65,637	\$ 65,632
Due after one year through five years	16,195	16,155	17,629	17,612
Due after five years through ten years	-	-	-	-
Due after ten years	-	-	-	-
Total debt securities	<u>\$ 110,431</u>	<u>\$ 110,334</u>	<u>\$ 83,266</u>	<u>\$ 83,244</u>

Impairments

No impairment losses were recognized through earnings related to available for sale securities during the three and six months ended June 30, 2013 and 2012.

Proceeds from Available for Sale Securities

The proceeds from maturities and sales of available for sale securities and resulting realized gains and losses, were as follows (in thousands):

	For the Three Months		For the Six Months	
	Ended June 30,		Ended June 30,	
	2013	2012	2013	2012
Proceeds from sales and maturities	\$ 18,650	\$ 29,386	\$ 46,657	\$ 56,582
Realized gains	2	3	2	3
Realized losses	-	-	-	-

(5) Inventory

Inventories, stated at the lower of cost or market, consisted of raw materials of \$27.0 million and finished goods of \$109,000 as of June 30, 2013. The Company began to capitalize inventory after the FDA approval of Gattex in December 2012. The Company acquired approximately \$16.6 million of Revestive raw materials and \$17.1 million of PTH raw materials related to the March 18, 2013 Transition and Termination Agreement with Takeda (See note 10). During the three months ended June 30, 2013, certain lots of this PTH inventory were designated for research and development activities and were accordingly expensed during the period.

(6) Long-term Debt

The following table reflects the carrying value of the Company's long-term debt under various financing arrangements as of June 30, 2013 and December 31, 2012 (in thousands):

	June 30, 2013	December 31, 2012
Convertible notes	\$ 16,545	\$ 16,545
Non-recourse debt	146,635	159,302
Total debt	163,180	175,847
Less current portion	7,603	6,278
Total long-term debt	\$ 155,577	\$ 169,569

(a) Convertible Notes

The Company has \$16.5 million of its 5.75% Convertible Notes (5.75% Convertible Notes) outstanding as of June 30, 2013. The 5.75% Convertible Notes originated from an August 2007 private placement of \$50.0 million in 5.75% Convertible Notes due August 7, 2014. The 5.75% Convertible Notes accrue interest at an annual rate of 5.75% payable quarterly in arrears on the first day of the succeeding calendar quarter commencing January 1, 2008. Accrued interest on the 5.75% Convertible Notes was \$0 as of June 30, 2013 and December 31, 2012. The holders may convert all or a portion of the 5.75% Convertible Notes into common stock at any time, subject to certain limitations, on or before August 7, 2014. The 5.75% Convertible Notes are convertible into common stock at a conversion price of \$5.44 per share (see below), subject to adjustments in certain events. The 5.75% Convertible Notes are unsecured debt obligations and rank equally in right of payment with all existing and future unsecured senior indebtedness. Since August 7, 2012, the Company has had the right to redeem any or all of the 5.75% Convertible Notes at a redemption price of 100% of their principal amount, plus accrued and unpaid interest to the day preceding the redemption date. The 5.75% Convertible Notes provide for certain events of default, including payment defaults, breaches of covenants and certain events of bankruptcy, insolvency and reorganization. The 5.75% Convertible Notes also provide that if there shall occur a fundamental change, as defined, at any time prior to the maturity of the Note, then the holder shall have the right, at the Holder's option, to require the Company to redeem the notes, or any portion thereof plus accrued interest and liquidated damages, if any. If a change of control, as defined, occurs and if the holder converts notes in connection with any such transaction, the Company will pay a make whole premium by increasing the conversion rate applicable to the notes. If any event of default occurs and is continuing, the principal amount of the 5.75% Convertible Notes, plus accrued and unpaid interest, if any, may be declared immediately due and payable. The Company incurred debt issuance costs of approximately \$600,000, which have been deferred and which are being amortized over a seven-year period, unless earlier converted, in

which case the unamortized costs are recorded in additional paid-in capital. The effective interest rate on the 5.75% Convertible Notes, including debt issuance costs, is 5.9%.

Pursuant to the Registration Rights Agreement, the Company has filed a shelf registration statement with the SEC, covering a resale of the common stock issuable upon conversion of the 5.75% Convertible Notes. The registration statement has been declared effective. The Company agreed to use its reasonable best efforts to keep the registration statement effective until the earlier of (i) the date as of which holders may sell all of the securities covered by the registration statement without restriction pursuant to Rule 144(k) promulgated under the Securities Act of 1933 or (ii) the date on which holders shall have sold all of the securities covered by the registration statement. If the Company fails to comply with these covenants or suspends use of the registration statement for periods of time that exceed what is permitted under the Registration Rights Agreement, the Company is required to pay liquidated damages in an amount equivalent to 1% per annum of (a) the principal amount of the notes outstanding, or (b) the conversion price of each underlying share of common stock that has been issued upon conversion of a note, in each case, until the Company is in compliance with these covenants. The Company believes the likelihood of such an event occurring is remote and, as such, the Company has not recorded a liability as of June 30, 2013.

(b) Non-recourse Debt

Sensipar and Mimpara-Secured Non-recourse Debt

As of June 30, 2013 and December 31, 2012, the outstanding principal balances on Sensipar and Mimpara-secured non-recourse debt were \$67.6 million and \$80.2 million, respectively. The Sensipar and Mimpara-secured debt is non-recourse to the Company and solely secured and serviced by Sensipar and Mimpara (cinacalcet HCl) royalties. The Company amended its agreement with Amgen effective September 30, 2011 whereby Amgen advanced \$145.0 million of Sensipar and Mimpara royalties to the Company (Sensipar Notes). The Sensipar Notes accrue interest at an annual rate of 9%, compounded quarterly and payable forty-five days after the close of each quarter. The payment of the royalty advance and discount shall be satisfied solely by Amgen's withholding of royalties and except in the event of a breach of certain customary representations and warranties under the agreement, the Company will have no obligation to repay any unsettled amount. The Company further amended the agreement with Amgen effective June 29, 2012, limiting the royalty offset of the royalty advance up to \$8.0 million per quarter with royalties in excess of \$8.0 million paid to the Company for the respective quarter, thereby extending the royalty advance repayment period. After the payment of the royalty advance and a 9 percent per annum discount on the balance of the advance, Amgen will resume paying NPS all royalties earned through December 31, 2018. As of June 30, 2013 and December 31, 2012, the Company classified \$6.5 million and \$6.3 million, respectively, of the Sensipar Notes as current based on royalty payments accrued as of June 30, 2013 and December 31, 2012. Accrued interest on the Sensipar Notes was approximately \$736,000 and \$874,000 as of June 30, 2013 and December 31, 2012, respectively. The Company incurred debt issuance costs of \$96,000, which are being amortized using the effective interest method. The effective interest rate on the Sensipar Notes, including debt issuance costs, is approximately 9%.

PTH 1-84-Secured (Europe, CIS and Turkey) Non-recourse Debt

As of June 30, 2013 and December 31, 2012, the outstanding principal balances on PTH 1-84-secured (Europe, CIS and Turkey) debt were \$42.8 million, respectively. In July 2007, the Company entered into an agreement with DRI Capital, or DRI, formerly Drug Royalty L.P.3, in which the Company sold to DRI its right to receive future royalty payments due under its license agreement with Takeda. Under the agreement, DRI paid the Company an up-front purchase price of \$50.0 million. If and when DRI receives two and a half times the amount paid to the Company, the agreement will terminate and the remainder of the royalties, if any, will revert back to the Company. In connection with the Company's July 2007 agreement with DRI, the Company granted DRI a security interest in its license agreement with Takeda for PTH 1-84 (Europe, CIS and Turkey) and certain of its patents and other intellectual property underlying that agreement. In the event of a default by NPS under the agreement with DRI, DRI would be entitled to enforce its security interest against the property described above. The Company determined the initial up-front purchase price is debt and is being amortized using the effective interest method over the estimated life of approximately 14 years. Accrued interest under the DRI agreement was \$0 as of June 30, 2013 and December 31, 2012, respectively. As of June 30, 2013, \$45.5 million has been paid to DRI. On March 18, 2013, Takeda terminated the license agreement and returned the rights to NPS (See note 10). NPS is obligated to use its commercially reasonable efforts to negotiate, execute and deliver a new license agreement for the licensed technology in the territory on terms similar to the Takeda agreement or any other arrangement for the exploitation of

the licensed technology, in each case providing for the payment of royalties or other consideration to the same extent and for the same period of time that royalties are currently payable to DRI. The Company is currently in discussions with DRI regarding the optimal product development strategy for PTH 1-84, which requires DRI's consent. This obligation is required for a period of twelve months following the termination of the Takeda agreement. If the Company does not complete such negotiation, execution and delivery and obtain DRI's consent, then DRI has the right to negotiate, execute and deliver a new license agreement for the licensed technology on terms no more extensive (when taken as a whole), without NPS' permission, than the terms contained in the Takeda agreement. The repayment of the remaining \$42.8 million is secured solely by future royalty payments arising from sales of the licensed product. The PTH 1-84-secured (Europe, CIS and Turkey) debt is non-recourse to the Company.

REGPARA-Secured Non-recourse Debt

As of June 30, 2013 and December 31, 2012, the outstanding principal balances on REGPARA-secured debt were \$36.3 million, respectively. In February 2010, the Company entered into an agreement with an affiliate of DRI, in which the Company sold to DRI its right to receive future royalty payments arising from sales of REGPARA[®] (cinacalcet HC1) under its license agreement with Kyowa Hakko Kirin. Under the agreement, DRI paid the Company an upfront purchase price of \$38.4 million. If and when DRI receives two and a half times the amount paid to the Company, the agreement will terminate and the remainder of the royalties, if any, will revert back to the Company. In connection with the Company's February 2010 agreement with DRI, the Company granted DRI a security interest in its license agreement with Kyowa Hakko Kirin for REGPARA and certain of its patents and other intellectual property underlying that agreement. In the event of a default by NPS under the agreement with DRI, DRI would be entitled to enforce its security interest against NPS and the property described above. The Company classified the initial upfront purchase price as debt which is being amortized using the effective interest method over the estimated life of approximately 10 years. As of June 30, 2013 and December 31, 2012, the Company classified \$1.1 million and \$0, respectively, of the REGPARA-secured debt as current based on royalty payments accrued as of June 30, 2013 and December 31, 2012. Accrued interest under the DRI agreement was \$1.4 million and \$3.1 million as of June 30, 2013 and December 31, 2012, respectively. Through June 30, 2013, \$24.1 million has been paid to DRI. The repayment of the remaining \$36.3 million principal as of June 30, 2013, is secured solely by future royalty payments arising from sales of REGPARA by Kyowa Hakko Kirin. The effective interest rate under the agreement, including issuance costs, is approximately 16.4%. The REGPARA-secured debt is non-recourse to the Company.

(7) Income Taxes

The Company accounts for penalties or interest related to uncertain tax positions as part of its provision for income taxes. Due to the Company's net operating loss carryforwards, any adjustment related to a liability would not be expected to result in a cash tax liability. Accordingly, the Company has not accrued for penalties or interest for the U.S. (both federal and state) as of June 30, 2013 and December 31, 2012. Assuming the continued existence of a full valuation allowance on the Company's net deferred tax assets, future recognition of any of the Company's unrecognized tax benefits would not impact the effective tax rate.

The Company files income tax returns in various jurisdictions with varying statutes of limitations. The statute of limitations for income tax audits in the U.S. will commence upon utilization of net operating losses and will expire three years from the filing of the tax return. In August 2012, the IRS completed its examination of the Company's U.S. federal income tax returns for the year ended December 31, 2009. There were no adjustments as a result of the examination. The Company is currently under audit by the State of New Jersey for the years 2007 to 2010. The Company does not expect any significant adjustments to its filed income tax returns.

(8) Commitments and Contingencies

The Company has agreed to indemnify, under certain circumstances, certain manufacturers and service providers from and against any and all losses, claims, damages or liabilities arising from services provided by such manufacturers and service providers or from any use, including clinical trials, or sale by the Company or any Company agent of any product supplied by the manufacturers. The Company has entered into long-term agreements with various third-party contract manufacturers for the production and packaging of the active pharmaceutical ingredient and drug product. Under the terms of these various contracts, the Company may be required to purchase certain minimum quantities of product each year.

(9) Stock Options

The Company recognized \$2.1 million and \$5.1 million of compensation expense during the three and six months ended June 30, 2013, respectively and \$1.6 million and \$3.5 million during the three and six months ended June 30, 2012, respectively, related to all stock based compensation. As of June 30, 2013, there was \$17.6 million of total unrecognized compensation cost related to all unvested share-based compensation arrangements that is expected to be recognized over a weighted-average period of 2.76 years.

During the year ended December 31, 2010, the Company's Board of Directors awarded a total of 1,130,700 performance condition options to certain of the Company's employees. Vesting of these options is subject to the Company achieving certain performance criteria established at the grant date and the individuals fulfilling a service condition (continued employment). As of June 30, 2013, the performance criteria of 825,340 of these options had been satisfied and will become exercisable based on the following vesting schedule: 25% on each of the first four anniversaries of the date of grant, which was February 20, 2010 (the date of grant). The Company recognized \$83,000 and \$244,000 of compensation expense during the three and six months ended June 30, 2013, respectively and \$32,000 and \$316,000 of compensation expense during the three and six months ended June 30, 2012, respectively, related to these options. The next performance criteria is the acceptance of the BLA filing for Natpara by the FDA. This acceptance would trigger approximately \$98,000 of compensation expense related to these options.

The Company utilized the Black-Scholes option pricing model to determine the grant date fair value of these awards. As of June 30, 2013, except for the 825,340 options discussed above, the Company does not believe that the achievement of the remaining performance criteria is probable and therefore, has not recognized any compensation expense related to these options during the three and six months ended June 30, 2013 and 2012, respectively. Compensation expense will be recognized only once the performance condition is probable of being achieved and then only the cumulative amount related to the service condition that has been fulfilled.

On May 7, 2013, the Company held its Annual Meeting of Stockholders. At the Annual Meeting, the Company's stockholders approved an amendment to the Company's 2005 Omnibus Incentive Plan to, among other things, increase by 3,500,000 the shares reserved for issuance under the Plan.

A summary of activity related to aggregate stock options under all plans is indicated in the following table (in thousands, except per share amounts):

	As of June 30, 2013			
	Number of options (in thousands)	Weighted average exercise price	Weighted average remaining contractual term (in years)	Aggregate intrinsic value (in thousands)
Options outstanding at beginning of year	7,390	\$ 6.75		
Options granted	1,910	8.91		
Options exercised	1,298	4.93		
Options forfeited/expired	373	13.57		
Options outstanding at June 30, 2013	<u>7,629</u>	7.27	7.54	\$ 61,009
Vested and expected to vest	<u>7,109</u>	7.18	7.42	\$ 57,540
Options exercisable at June 30, 2013	<u>3,614</u>	\$ 6.54	5.98	\$ 32,144

(10) Takeda Termination and Transition Agreement

On March 18, 2013, the Company entered into a Termination and Transition Agreement (the Agreement), with Takeda GmbH (Takeda GmbH), and Takeda Pharma A/S (Takeda Pharma and, together with Takeda GmbH, Takeda).

The Agreement provides for the termination of the license agreement, dated July 2, 2007, as amended, which granted Takeda Pharma the exclusive license to sell, market and commercialize recombinant human parathyroid hormone 1-84 [rDNA origin] (rhPTH 1-84) worldwide, except for the U.S., Israel, and Japan, and a non-exclusive license to manufacture and develop rhPTH 1-84 (the rhPTH 1-84 License Agreement). Pursuant to the rhPTH 1-84 License Agreement the rights were returned to the Company without consideration. Preotact is the brand name that Takeda Pharma has used to market rhPTH 1-84 for the treatment of osteoporosis in certain of its licensed territories. The Company is developing rhPTH 1-84 in the U.S. under the trade name Natpara for the treatment of hypoparathyroidism.

The Agreement also provides for the termination of the license agreement, dated September 24, 2007, as amended, which granted Takeda GmbH the exclusive license to develop and commercialize teduglutide worldwide, except for North America and Israel (the Revestive License Agreement). Takeda GmbH developed and obtained approval in the EU in August 2012 for teduglutide under the trade name Revestive for the treatment of Short Bowel Syndrome (SBS) in adults. The Company obtained U.S. Food and Drug Administration approval in the U.S. in December 2012 for teduglutide under the trade name Gattex for adult patients with SBS who are dependent on parenteral support. As a result of the termination of the License Agreements, the Company now has the exclusive rights worldwide to develop and commercialize teduglutide and PTH, except as noted in Note 6, whereby DRI would be owed a royalty for sales of PTH in the territory.

Takeda assigned to NPS its assets related to the two products, including all of its active pharmaceutical ingredient inventory and information related to the products' continued development, manufacture, and commercialization, including life cycle management assets. Takeda received 6.1 million shares of NPS common stock that were valued at \$54.9 million as of the date of the transaction. Takeda will also earn a \$30.0 million milestone payment in the first calendar year that combined worldwide net sales of both products exceed \$750 million. This milestone includes an early payment trigger upon a qualified change of control. NPS has the option of making this milestone payment in cash or NPS common stock.

The Company engaged an independent valuation firm to assist it in determining the fair value of the assets acquired. Using these fair values, the Company assigned \$16.6 million to the Revestive active pharmaceutical ingredient (API), \$17.1 million to the PTH API and \$20.7 million to the Revestive product rights. The Company capitalized the Revestive and PTH API as inventory and capitalized the product rights to intangibles, net on the Company's balance sheet due to the fact that Revestive and Preotact are approved in the EU for SBS and Osteoporosis, respectively.

(11) Capital Stock

In May 2013, the Company completed a public sale of 6,900,000 shares of its common stock at a per share price of \$14.53. Net proceeds to the Company from the sale totaled approximately \$93.5 million, after deducting expenses and the commission in connection with the offering paid by the Company.

(12) Recent Accounting Pronouncements

From time to time, new accounting pronouncements are issued by the FASB or other standard setting bodies that are adopted by the Company as of the specified effective date. Unless otherwise discussed, the Company believes that the impact of recently issued standards that are not yet effective will not have a material impact on its financial position, results of operations or disclosures upon adoption.

In February 2013, the FASB issued ASU 2013-02 *Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income* (ASU 2013-02), an Accounting Standards Update to the *Comprehensive Income Topic* in the Accounting Standards Codifications (ASC). This update requires separate presentation of the components that are reclassified out of accumulated other comprehensive income either on the face of the financial statements or in the notes to the financial statements. This update also requires companies to disclose the income statement line items impacted by any significant reclassifications, such as the realized gain on marketable investment securities. These items are required for both interim and annual reporting for public companies and became effective for the Company beginning with its quarterly report on Form 10-Q for the period ending March 31, 2013. The Company adopted this ASU on January 1, 2013. The adoption of this ASU did not have a material impact on the Company's financial position or results of operations.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Cautionary Statement Regarding Forward-Looking Statements

The following discussion and analysis is provided to further the reader's understanding of the condensed consolidated financial statements, financial condition and results of operations of NPS in this Quarterly Report on Form 10-Q. This discussion should be read in conjunction with the Consolidated Financial Statements and the accompanying notes included in our filings with the SEC, including our 2012 Annual Report on Form 10-K.

This Quarterly Report on Form 10-Q contains forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements represent our management’s judgment regarding future events. In many cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “plan,” “expect,” “anticipate,” “estimate,” “predict,” “intend,” “potential” or “continue” or the negative of these terms or other words of similar import, although some forward-looking statements are expressed differently. All statements other than statements of historical fact included in this Quarterly Report on Form 10-Q and the documents incorporated by reference into this report regarding our financial position, business strategy and plans or objectives for future operations are forward-looking statements. Without limiting the broader description of forward-looking statements above, we specifically note that statements regarding potential drug candidates, their potential therapeutic effect, the possibility of obtaining regulatory approval, any anticipated timelines for making FDA or other regulatory filings or submissions, or with respect to completion of milestones or targets with respect to regulatory filings, clinical studies, preclinical work and related matters, our ability or the ability of our collaborators to manufacture and sell any products, market acceptance, or our ability to earn a profit from sales or licenses of any drug candidate or to discover new drugs in the future are all forward-looking in nature. We cannot guarantee the accuracy of the forward-looking statements, and you should be aware that results and events could differ materially and adversely from those described in the forward-looking statements due to a number of factors, including:

- our ability to effectively outsource activities critical to the advancement of our product candidates;
- our and our collaborators’ ability to successfully complete clinical trials, timely make regulatory submissions, and receive required regulatory approvals and the length, time and cost of obtaining such regulatory approvals and commercializing products;
- our ability to secure additional funds;
- the successful completion of our strategic collaborations or changes in our relationships with our collaborators;
- competitive factors;
- our ability to maintain the level of our expenses consistent with our internal budgets and forecasts;
- our ability to successfully commercialize Gattex;
- the ability of our contract manufacturers to successfully produce adequate supplies of our product candidates and drug delivery devices to meet clinical trial and commercial launch requirements;
- variability of our royalty, license and other revenues;
- our ability to enter into and maintain agreements with current and future collaborators on commercially reasonable terms;
- the demand for securities of pharmaceutical and biotechnology companies in general and our common stock in particular;
- uncertainty regarding our patents and patent rights;
- any concerns about the safety of our products or product candidates;
- compliance with current or prospective governmental regulation;
- ability to obtain sufficient coverage or reimbursement by third-party payers and our ability to maintain coverage or reimbursement at anticipated levels;
- technological change; and
- general economic and market conditions.

You should also consider carefully the statements set forth in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2012 entitled “Risk Factors,” which address these and additional factors that could cause results or events to differ from those set forth in the forward-looking statements. All subsequent written and oral forward-looking statements attributable to us or to persons acting on our behalf are expressly qualified in their entirety by the applicable cautionary statements. In addition, new risks emerge from time to time and it is not possible for management to predict all such risk factors or to assess the impact of such risk factors on our business. Given these risks and uncertainties, you should not place undue reliance on these forward-looking statements. We undertake no obligation to update or revise these forward-looking statements.

Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to all such reports are available, free of charge, on our Internet website under “Investors—SEC Filings,” as soon as reasonably practicable after we file electronically such reports with, or furnish such reports to, the SEC. Our Internet website address is <http://www.npsp.com>. Information contained in or linked to through our website does not constitute a part of this Quarterly Report on Form 10-Q.

Overview

We are a biopharmaceutical company pioneering and delivering therapies that transform the lives of patients with rare diseases worldwide. Our lead product, Gattex® (U.S.)/Revestive® (EU) (teduglutide [rDNA origin]) for injection is approved for adult Short Bowel Syndrome (SBS) patients who are dependent on parenteral support. In February 2013, we launched and initiated commercial sales of Gattex in the U.S. We recently reacquired the rights to Revestive outside of the U.S. and have defined our international strategy for Gattex/Revestive and we are identifying key talent with country-specific expertise to support its introduction in Europe and other key markets. We expect the first ex-U.S. commercial sales of Gattex/Revestive to commence sales on an early access/named-patient basis in certain countries in late 2013 or early 2014. We are also preparing to engage in the pricing and reimbursement processes in key European countries with the goal of commercially launching Revestive in the first half of 2014. We have also developed Natpara® (rhPTH[1-84]) for the treatment of adult hypoparathyroidism and we expect to submit our Biologic License Application (BLA) to the FDA in the fourth quarter of 2013. Our earlier stage pipeline includes teduglutide for pediatric SBS and two calcilytic compounds, NPS790 and NPS795, with potential application in rare disorders involving increased calcium receptor activity, such as autosomal dominant hypocalcemia (ADH). We complement our proprietary programs with a royalty-based portfolio of products and product candidates that includes agreements with Amgen, GlaxoSmithKline, Janssen Pharmaceuticals (Janssen), and Kyowa Hakko Kirin.

Gattex is our novel recombinant analog of human glucagon-like peptide 2 (GLP-2), a protein involved in the rehabilitation of the intestinal lining. Gattex is used for the treatment of adults with SBS, who are dependent on parenteral support (parenteral nutrition and/or intravenous fluids). SBS is a highly disabling and potentially life-threatening chronic disorder. SBS results from surgical resection, congenital defect or disease-associated loss of absorption in the bowel in which patients are subsequently unable to maintain fluid, electrolyte, and nutrient balances on a conventional diet. Despite an adaptation that occurs generally in the two years after resection, many SBS patients require parenteral support to supplement and stabilize their nutritional and hydration needs. A National Institute of Health (NIH) publication reported that the annual mean costs of lifelong, complex home healthcare associated with PN/IV support ranged from \$185,000 to \$568,000, not including the indirect costs associated with disability and/or the dollar value that could be ascribed to the challenging daily living for these patients (Piamjariyakul 2010). In addition, parenteral support is associated with shortened life span, life-threatening complications including sepsis, blood clots or liver damage, and reduced quality-of-life due to the time required for and consequences of frequent access to an intravenous pump. Gattex is the first and only analog of GLP-2 proven to increase intestinal absorption and decrease or eliminate the need for parenteral support.

Natpara is our recombinant full-length human parathyroid hormone 1-84 (rhPTH 1-84) that we are developing as the first hormone replacement therapy for hypoparathyroidism, a rare hormone deficiency disorder in which patients are physiologically unable to regulate the levels of calcium and phosphates in their blood due to insufficient levels of endogenous parathyroid hormone (PTH). Endogenous PTH is the body’s principal regulator of serum calcium and phosphate levels. Hypoparathyroidism is associated with hypocalcemia, hyperphosphatemia, hypercalciuria (excessive urinary calcium excretion), and increased bone mineral density. It typically results from permanent injury to the parathyroid gland(s) during thyroid or parathyroid surgery or other surgical procedures in the neck, radiation to the neck region, autoimmune destruction of the parathyroid glands, or their congenital absence. Although rare, hypoparathyroidism can also result from genetic mutations. Current therapy is limited to

calcium supplementation and parenteral or metabolic forms of vitamin D. These palliative therapies are sometimes suboptimal and can also contribute to long-term health risks including kidney failure. Hypoparathyroidism is one of the few hormonal deficiency syndromes with no approved replacement therapy using the native hormone. If approved, Natpara could be the first treatment targeting the underlying cause of hypoparathyroidism by replacing the native hormone. In November 2011, we reported positive top-line results from our Phase 3 registration study of Natpara, known as REPLACE, which met the primary efficacy endpoint with a statistically higher responder rate versus placebo. A responder was defined as a 50 percent or greater reduction in oral calcium supplementation and active vitamin D therapy and a total serum calcium concentration that was maintained compared to baseline. The company has addressed certain previously reported fill-finish issues related to the manufacture of Natpara and expects to submit its Biologic License Application to the U.S. Food and Drug Administration (FDA) in the fourth quarter of 2013.

While SBS and hypoparathyroidism are relatively rare disorders, we believe these indications represent a substantial commercial opportunity to us due to the significant unmet need and lack of effective therapies, as well as the serious complications involved with and the chronic nature of these diseases.

In March 2013, we entered into a Termination and Transition Agreement, with Takeda GmbH and Takeda Pharma A/S (together, Takeda), which, among other things, terminated our existing license agreements with Takeda with respect to teduglutide and rhPTH 1-84. As a result of the transaction, we now have the exclusive rights worldwide to develop and commercialize teduglutide and rhPTH 1-84, subject to certain royalty payments for sales of rhPTH 1-84. NPS has begun initiating its international strategy for Revestive and is currently in the process of evaluating the commercial strategy outside of the U.S. for rhPTH 1-84. Takeda assigned to NPS its assets related to the two products, including all of its active pharmaceutical ingredient inventory and information related to the products' continued development, manufacture, and commercialization, including life cycle management assets. Preotact is the brand name that Takeda has used to market rhPTH 1-84 for the treatment of osteoporosis in certain of its licensed territories. We are currently in discussions with DRI regarding the optimal product development strategy for PTH 1-84, which requires DRI's consent.

In addition to teduglutide and rhPTH 1-84, we also retain exclusive rights worldwide to our earlier stage pipeline, which includes two calcilytic compounds, NPSP790 and NPSP795, which we believe may have clinical application in treating rare endocrine disorders.

In May 2013, we completed a public sale of 6,900,000 shares of our common stock at a per share price of \$14.53. We received net proceeds from the sale of approximately \$93.5 million, after deducting expenses and the commission in connection with the offering.

We have incurred cumulative losses from inception through June 30, 2013 of approximately \$1.0 billion. We expect to continue to incur operating losses over the next several quarters as we launch Gattex and Revestive and incur sales and marketing costs, incur pre-launch and launch costs for Natpara in the U.S., invest in the development of our pipeline and pursue in-licensing opportunities.

As a result of the marketing approval for Gattex and Revestive, we will no longer expense manufacturing costs relating to these products as research and development expenses. Instead, we will capitalize these costs as inventory as they are incurred. There will be no cost of goods sold associated with the sale of Gattex inventory that was on hand at the time of the FDA's approval of the NDA for Gattex. We expect that this will result in higher gross margins during the period that we sell off this supply than we will achieve once we begin selling Gattex that is manufactured after the date of the FDA's approval of our NDA for Gattex. Based on our current plans and assumptions, we believe that by the end of 2015, we will have sold off this supply of product on hand at the time of the FDA's approval of the NDA for Gattex. We also expect to record increased sales and incur additional marketing expenses relating to the commercialization of Gattex in the U.S. and our expansion into the international market.

Results of Operations

Three Months Ended June 30, 2013 and 2012

The following table summarizes selected operating statement data for the three months ended June 30, 2013 and 2012 (amounts in thousands):

	Three Months Ended	
	June 30,	
	2013	2012
Revenues:		
Product sales, net	\$ 4,801	\$ -
Royalties	31,704	28,517
Sale of royalty rights	-	25,000
Total revenues	<u>\$ 36,505</u>	<u>\$ 53,517</u>
Operating expenses:		
Cost of goods sold	\$ 473	\$ -
Research and development	\$ 30,888	\$ 32,641
% of total revenues	85 %	61 %
Selling, general and administrative	\$ 14,465	\$ 9,670
% of total revenues	40 %	18 %

Revenues. Total revenues are comprised of product sales of Gattex, which was launched in the U.S. in February 2013, and royalties from our licensees and collaborators. Royalty revenues fluctuate from quarter to quarter. Our revenues were \$36.5 million for the quarter ended June 30, 2013 compared to \$53.5 million for the quarter ended June 30, 2012. We recognized royalty revenue under our research and license agreements and product sales during the three months ended June 30, 2013 and 2012, respectively, as follows (amounts in thousands):

	Three Months Ended	
	June 30,	
	2013	2012
Product sales, net	\$ 4,801	\$ -
Royalties:		
Sensipar and Mimpara (cinacalcet HCl)	28,893	23,577
Regpara (cinacalcet HCl)	2,055	2,268
Preatact (parathyroid hormone (PTH 1-84))	-	1,897
Nucynta (tapentadol)	756	775
Total royalties	<u>31,704</u>	<u>28,517</u>
Sale of royalty rights - Sensipar	<u>-</u>	<u>25,000</u>
Total revenues	<u>\$ 36,505</u>	<u>\$ 53,517</u>

Product Sales, net. During the three months ended June 30, 2013, we recognized net product sales revenue of \$4.8 million for the sales of Gattex. As of August 2, 2013, 318 Gattex prescriptions have been received and 141 patients are currently on therapy. We received approval from the FDA in December 2012 and subsequently launched Gattex in February 2013. Product sales for the three months ended June 30, 2013 are not necessarily indicative of the results that may be expected for any future period or for the year ending December 31, 2013. We expect that product sales of Gattex will vary from period to period given the size of the patient population.

We record product sales net of allowances and accruals for prompt pay discounts, rebates and chargebacks under governmental programs (including Medicaid), product returns, and distribution-related fees. These allowances and accruals will continue to grow in relation to an increase in the sales of Gattex. The following table summarizes the provisions, and credits/payments, for government rebates and chargebacks, distribution-related fees, and returns and other sales-related deductions (in thousands):

	Rebates and Chargebacks	Distribution- Related Fees	Returns and Other Sales- Related Deductions	Total
Balance as of March 31, 2013	\$ 64	\$ 65	\$ 154	\$ 283
Provision related to current period sales	194	89	105	388
Credits/payments	(11)	(13)	(71)	(95)
Balance as of June 30, 2013	<u>\$ 247</u>	<u>\$ 141</u>	<u>\$ 188</u>	<u>\$ 576</u>

Royalties. The increase in royalty revenue earned from Amgen's sales of Sensipar and Mimpara (cinacalcet HCl) for the three months ended June 30, 2013 was primarily due to increased unit demand and a non-recurring favorable adjustment. We amended our agreement with Amgen, effective September 30, 2011, and Amgen began withholding the royalties on sales of Sensipar and Mimpara and credited them, net of the discount, to the Sensipar Notes issued pursuant to the amended agreement. In June 2012, we amended our agreement with Amgen and received a one-time non-refundable \$25.0 million payment in July 2012 in exchange for our rights to receive royalties under the license agreement that are earned after December 31, 2018. The amendment also limits the royalty offset of the royalty advance that we received from Amgen up to \$8.0 million per quarter with royalties in excess of \$8.0 million paid to us for the respective quarter, thereby extending the royalty advance repayment period. After the repayment of the royalty advance and a 9% per annum discount factor on the outstanding balance, Amgen will resume paying us all royalties earned through December 31, 2018.

During the three months ended June 30, 2013 and 2012, we recognized royalty revenue of \$2.1 million and \$2.3 million, respectively, from Kyowa Hakko Kirin for sales of REGPARA. The decrease was primarily due to unfavorable fluctuations in foreign exchange rates. In February 2010, we sold our rights to receive certain future royalty payments from Kyowa Hakko Kirin's sale of REGPARA to an affiliate of DRI. The agreement provides DRI with the right to receive payments related to sales of REGPARA occurring on or after July 1, 2009 and we therefore do not receive any such royalty payments until the REGPARA-secured debt is repaid.

For the three months ended June 30, 2013 and 2012, our revenues related to our agreement with Takeda for Preotact (parathyroid hormone (PTH 1-84)) were \$0 and \$1.9 million in royalty revenue, respectively. The decrease in royalty revenue was due to the Termination and Transition agreement with Takeda. On March 18, 2013, Takeda terminated this license agreement and returned the rights to NPS. In July 2007, we sold our rights to receive certain future royalty payments from Takeda's sale of PTH 1-84 in Europe, CIS and Turkey to DRI Capital (DRI) and we therefore do not receive any such royalty payments until the PTH 1-84-secured debt is repaid. Because we previously monetized our PTH 1-84 royalty rights as non-recourse debt, declines in PTH 1-84 sales will impact our royalty revenues but will have no material impact on our short-term liquidity.

During the three months ended June 30, 2013 and 2012, we recognized royalty revenue of \$756,000 and \$775,000, respectively, from Janssen Pharmaceuticals, Inc. for sales of Nucynta. The decrease in royalty revenue earned from Nucynta for the three months ended June 30, 2013 was primarily due to higher deductions from gross sales, which were partially offset by increased demand.

Cost of Goods Sold. Upon marketing approval from the FDA in December 2012, we began capitalizing inventory costs associated with commercial supplies of Gattex subsequent to receipt of marketing approval from the FDA. Costs for manufacturing supplies of Gattex prior to receipt of FDA approval were recognized as research and development expenses in the period that the costs were incurred. Therefore, these costs are not being included in cost of goods sold when revenue is recognized from the sale of those supplies of Gattex. Cost of goods sold for the second quarter of 2013 was \$473,000 and consisted primarily of royalty and packaging costs related to Gattex commercial supplies. Accordingly, we expect our current product gross margins to decrease from approximately 90% to the 80% to 85% range as we begin sales of product that has been capitalized to inventory. Based on our current plans and assumptions, we believe that by the end of 2015, we will have sold off this supply of product on hand at the time of the FDA's approval of the NDA for Gattex.

Research and Development. Our research and development expenses are categorized into two major areas: clinical development costs and product development costs.

Clinical development costs were \$5.2 million and \$8.5 million for the three months ended June 30, 2013 and 2012, respectively. Clinical development costs are primarily comprised of costs paid to outside parties to conduct and manage clinical trials related to Gattex and Natpara as well as costs associated with regulatory functions. Product development costs were \$19.1 million and \$18.6 million for the three months ended June 30, 2013 and 2012, respectively. Product development costs are costs related to the drug needed for our clinical studies.

Unallocated research and development costs were \$6.6 million and \$5.5 million for the three months ended June 30, 2013 and 2012, respectively. Unallocated research and development costs consist primarily of personnel, personnel related costs and overhead costs that relate to medical affairs and product development activities which have not been allocated directly to each program.

For the three months ended June 30, 2013, our research and development expenses decreased to \$30.9 million from \$32.6 million for the three months ended June 30, 2012. The decrease in research and development for the three months ended June 30, 2013 is primarily due to a \$3.3 million reduction in costs associated with clinical development activities for both Gattex and Natpara. Additionally, we no longer expense, as research and development, inventory production for Gattex given its approval in the fourth quarter of 2012 the impact of which was \$13.3 million. These decreases were partially offset by a \$13.7 million increase for the cost of preapproval PTH 1-84, which includes certain lots of inventory that were purchased from Takeda and designated for use in research and development during the quarter and a \$1.1 million increase in unallocated research and development which mainly consists of regulatory costs as well as personnel and personnel-related costs.

Selling, General and Administrative. Our selling, general and administrative expenses consist primarily of compensation for employees in executive, finance, legal and sales and sales and marketing functions as well as facility costs and professional fees for accounting and legal services. Our selling, general and administrative expenses increased to \$14.5 million for the three months ended June 30, 2013 from \$9.7 million for the three months ended June 30, 2012. The increase in selling, general and administrative expenses primarily relate to an increase in personnel and external costs related to launch activities for Gattex. As we begin our international expansion plans, we expect that these costs would continue to increase.

Interest Income. Interest income decreased to \$58,000 for the three months ended June 30, 2013 from \$76,000 from the comparative period in 2012.

Interest Expense. Our interest expense for the three months ended June 30, 2013 decreased to \$3.0 million compared to \$4.5 million for the three months ended June 30, 2012. Our long-term royalty forecasts for Preotact and REGPARA are used to calculate the implicit interest rate and the related interest expense for our non-recourse debt. Interest expense decreased due primarily to (i) the lower principal balance on our Sensipar Notes (\$649,000), (ii) a lower effective interest rate due to a decrease in the forecast of REGPARA royalties related to the non-recourse debt associated with the sale of certain of our REGPARA royalty rights (\$652,000) and (iii) a lower effective interest rate due to a decrease in the forecast of PTH 1-84 (Europe, CIS and Turkey) royalties related to the non-recourse debt associated with the sale of certain of our PTH 1-84 (Europe, CIS and Turkey) royalty rights (\$131,000).

Six Months Ended June 30, 2013 and 2012

The following table summarizes selected operating statement data for the six months ended June 30, 2013 and 2012 (amounts in thousands):

	Six Months Ended June 30,	
	2013	2012
Revenues:		
Product sales, net	\$ 5,455	\$ -
Royalties	56,484	51,441
Sale of royalty rights	-	25,000
Total revenues	<u>\$ 61,939</u>	<u>\$ 76,441</u>
Operating expenses:		
Cost of goods sold	\$ 538	\$ -
Research and development	\$ 46,583	\$ 52,840
% of total revenues	75 %	69 %
Selling, general and administrative	\$ 28,670	\$ 17,440
% of total revenues	46 %	23 %

Revenues. Our revenues were \$61.9 million for the six months ended June 30, 2013 compared to \$76.4 million for the six months ended June 30, 2012. We recognized royalty revenue under our research and license agreements and product sales during the six months ended June 30, 2013 and 2012, respectively, as follows (amounts in thousands):

	Six Months Ended June 30,	
	2013	2012
Product sales, net	\$ 5,455	\$ -
Royalties:		
Sensipar and Mimpara (cinacalcet HCl)	51,100	42,255
Regpara (cinacalcet HCl)	3,873	4,122
Preotact (parathyroid hormone (PTH 1-84))	-	3,703
Nucynta (tapentadol)	<u>1,511</u>	<u>1,361</u>
Total royalties	56,484	51,441
Sale of royalty rights - Sensipar	<u>-</u>	<u>25,000</u>
Total revenues	<u>\$ 61,939</u>	<u>\$ 76,441</u>

Product Sales, net. During the six months ended June 30, 2013, we recognized net product sales revenue of \$5.5 million for the sales of Gattex. As of August 2, 2013, 318 Gattex prescriptions have been received and 141 patients are currently on therapy. We received approval from the FDA in December 2012 and subsequently launched Gattex in February 2013. Product sales for the six months ended June 30, 2013 are not necessarily indicative of the results that may be expected for any future period or for the year ending December 31, 2013. We expect that product sales of Gattex will vary from period to period given the size of the patient population.

We record product sales net of allowances and accruals for prompt pay discounts, rebates and chargebacks under governmental programs (including Medicaid), product returns, and distribution-related fees. The following table summarizes the provisions, and credits/payments, for government rebates and chargebacks, distribution-related fees, and returns and other sales-related deductions (in thousands):

	Rebates and Chargebacks	Distribution- Related Fees	Returns and Other Sales- Related Deductions	Total
Balance as of December 31, 2012	\$ -	\$ -	\$ -	\$ -
Provision related to current period sales	258	154	265	677
Credits/payments	(11)	(13)	(77)	(101)
Balance as of June 30, 2013	<u>\$ 247</u>	<u>\$ 141</u>	<u>\$ 188</u>	<u>\$ 576</u>

Royalties. The increase in royalty revenue earned from Amgen's sales of Sensipar and Mimpara (cinacalcet HCl) for the six months ended June 30, 2013 was primarily due to increased unit demand and a non-recurring favorable adjustment. We amended our agreement with Amgen, effective September 30, 2011, and Amgen began withholding the royalties on sales of Sensipar and Mimpara and credited them, net of the discount, to the Sensipar Notes issued pursuant to the amended agreement. In June 2012, we amended our agreement with Amgen and received a one-time non-refundable \$25.0 million payment in July 2012 in exchange for our rights to receive royalties under the license agreement that are earned after December 31, 2018. The amendment also limits the royalty offset of the royalty advance that we received from Amgen up to \$8.0 million per quarter with royalties in excess of \$8.0 million paid to us for the respective quarter, thereby extending the royalty advance repayment period. After the repayment of the royalty advance and a 9% per annum discount factor on the outstanding balance, Amgen will resume paying us all royalties earned through December 31, 2018.

During the six months ended June 30, 2013 and 2012, we recognized royalty revenue of \$3.9 million and \$4.1 million, respectively, from Kyowa Hakko Kirin for sales of REGPARA. The decrease was primarily due to unfavorable fluctuations in foreign exchange rates. In February 2010, we sold our rights to receive certain future royalty payments from Kyowa Hakko Kirin's sale of REGPARA to an affiliate of DRI. The agreement provides DRI with the right to receive payments related to sales of REGPARA occurring on or after July 1, 2009 and we therefore do not receive any such royalty payments until the REGPARA-secured debt is repaid.

For the six months ended June 30, 2013 and 2012, our revenues related to our agreement with Takeda for Preotact (parathyroid hormone (PTH 1-84)) were \$0 and \$3.7 million in royalty revenue, respectively. The decrease in royalty revenue was primarily due to the Termination and Transition agreement with Takeda. On March 18, 2013, Takeda terminated this license agreement and returned the rights to NPS. The decrease in royalty revenue was also due to a technical production issue whereby, Takeda was unable to have batches of finished product manufactured that are consistently within specifications and we have been informed that as a result Takeda was no longer selling Preotact in their territories. In July 2007, we sold our rights to receive certain future royalty payments from Takeda's sale of PTH 1-84 in Europe, CIS and Turkey to DRI Capital (DRI) and we therefore do not receive any such royalty payments until the PTH 1-84-secured debt is repaid. Because we previously monetized our PTH 1-84 royalty rights as non-recourse debt, declines in PTH 1-84 sales will impact our royalty revenues but will have no material impact on our short-term liquidity.

During the six months ended June 30, 2013 and 2012, we recognized royalty revenue of \$1.5 million and \$1.4 million respectively, from Janssen Pharmaceuticals, Inc. for sales of Nucynta. The increase in royalty revenue earned from Nucynta for the six months ended June 30, 2013 was primarily due to increased demand.

Cost of Goods Sold. For the six months ended June 30, 2013, we began recognizing revenue and cost of goods sold from product sales of Gattex. Upon marketing approval from the FDA in December 2012, we began capitalizing inventory costs associated with commercial supplies of Gattex subsequent to receipt of marketing approval from the FDA. Costs for manufacturing supplies of Gattex prior to receipt of FDA approval were recognized as research and development expenses in the period that the costs were incurred. Therefore, these costs are not being included in cost of goods sold when revenue is recognized from the sale of those supplies of Gattex. Cost of goods sold for the six months ended June 30, 2013 was \$538,000 and consisted primarily of royalty and packaging costs related to Gattex commercial supplies. Accordingly, we expect our current product gross margins to decrease from approximately 90% to the 80% to 85% range as we begin sales of product that has been capitalized to inventory. Based on our current plans and assumptions, we believe that by the end of 2015, we will have sold off this supply of product on hand at the time of the FDA's approval of the NDA for Gattex.

Research and Development. Our research and development expenses are categorized into two major areas: clinical development costs and product development costs.

Clinical development costs were \$5.8 million and \$16.4 million for the six months ended June 30, 2013 and 2012, respectively. Clinical development costs are primarily comprised of costs paid to outside parties to conduct and manage clinical trials related to Gattex and Natpara as well as costs associated with regulatory functions. Product development costs were \$26.9 million and \$24.9 million for the six months ended June 30, 2013 and 2012, respectively. Product development costs are costs related to the drug needed for our clinical studies.

Unallocated research and development costs were \$13.9 million and \$11.5 million for the six months ended June 30, 2013 and 2012, respectively. Unallocated research and development costs consist primarily of personnel, personnel related costs and overhead costs that relate to medical affairs and product development activities which have not been allocated directly to each program.

For the six months ended June 30, 2013, our research and development expenses decreased to \$46.6 million from \$52.8 million for the six months ended June 30, 2012. The decrease in research and development expenses is primarily related to a \$10.6 million reduction in costs associated with clinical development activities and adjustments related to completion of certain clinical trials for both Gattex and Natpara. Additionally, we no longer expense, as research and development, inventory production for Gattex given its approval in the fourth quarter of 2012, the impact of which was \$16.8 million. These decreases were partially offset by a \$18.7 million increase for the cost of preapproval PTH 1-84, which includes certain lots of inventory that were purchased from Takeda and designated for use in research and development during the quarter and a \$2.4 million increase in unallocated research and development which mainly consists of regulatory costs as well as personnel and personnel-related costs.

Selling, General and Administrative. Our selling, general and administrative expenses consist primarily of compensation for employees in executive, finance, legal and sales and sales and marketing functions as well as facility costs and professional fees for accounting and legal services. Our selling, general and administrative expenses increased to \$28.7 million for the six months ended June 30, 2013 from \$17.4 million for the six months ended June 30, 2012, primarily due to an increase in personnel and external costs related to launch activities for Gattex. As we begin our international expansion plans, we expect that these costs would continue to increase.

Interest Income. Interest income decreased to \$113,000 for the six months ended June 30, 2013 from \$160,000 from the comparative period in 2012.

Interest Expense. Our interest expense for the six months ended June 30, 2013 decreased to \$6.4 million compared to \$10.0 million for the six months ended June 30, 2012. Our long-term royalty forecasts for Preotact and REGPARA are used to calculate the implicit interest rate and the related interest expense for our non-recourse debt. Interest expense decreased due primarily to (i) the lower principal balance on our Sensipar Notes (\$1.5 million), (ii) a lower effective interest rate due to a decrease in the forecast of REGPARA royalties related to the non-recourse debt associated with the sale of certain of our REGPARA royalty rights (\$1.1 million) and (iii) a lower effective interest rate due to a decrease in the forecast of PTH 1-84 (Europe, CIS and Turkey) royalties related to the non-recourse debt associated with the sale of certain of our PTH 1-84 (Europe, CIS and Turkey) royalty rights (\$941,000).

Liquidity and Capital Resources

The following table summarizes selected financial data (amounts in thousands):

	June 30, 2013	December 31, 2012
Cash, cash equivalents, and marketable investment securities	\$ 180,522	\$ 100,715
Total assets	281,485	151,109
Current debt	7,603	6,278
Non-current debt	155,577	169,569
Stockholders' equity (deficit)	\$ 85,056	\$ (54,641)

Currently, we are not a self-sustaining business and certain economic, operational and strategic factors may require us to secure additional funds. If we are unable to obtain sufficient funding at any time in the future, we may not be able to develop or commercialize our products, take advantage of business opportunities or respond to competitive pressures. Our current and anticipated operations require substantial capital. We expect that our existing capital resources including interest earned thereon will be sufficient to fund our current and planned operations through at least the next twelve months. However, our actual needs will depend on numerous factors, including the progress and scope of our internally funded development and commercialization activities related to the launch of Gattex and Revestive and the pre-launch of Natpara; our ability to comply with the terms of our research funding agreements; our ability to maintain existing collaborations; our decision to seek additional collaborators; the success of our collaborators in developing and marketing products under their respective collaborations with us; our success in producing clinical and commercial supplies of our product candidates on a timely basis sufficient to meet the needs of our clinical trials and commercial launch; the costs we incur in obtaining and enforcing patent and other proprietary rights or gaining the freedom to operate under the patents of others; and our success in acquiring and integrating complementary products, technologies or businesses. Our clinical trials may be modified or terminated for several reasons including the risk that our product candidates will demonstrate safety concerns; the risk that regulatory authorities may not approve our product candidates for further development or may require additional or expanded clinical trials to be performed; and the risk that our manufacturers may not be able to supply sufficient quantities of our drug candidates to support our clinical trials, our regulatory filing or commercial launch, which could lead to a disruption or cessation of the clinical trials, delay of clinical filing or commercial activities. We may also be required to conduct unanticipated preclinical or clinical trials to obtain regulatory approval of our product candidates, Natpara, NPS790 and NPS795. If any of the events that pose these risks comes to fruition, our actual capital needs may substantially exceed our anticipated capital needs and we may have to substantially modify or terminate current and planned clinical trials or postpone conducting future clinical trials. As a result, our business may be materially harmed, our stock price may be adversely affected, and our ability to raise additional capital may be impaired.

We may need to raise additional funds to support our long-term research, product development, and commercialization programs. We regularly consider various fund raising alternatives, including, for example, debt or equity financing, partnering of existing programs, monetizing of potential revenue streams, and merger and acquisition alternatives. We may also seek additional funding through strategic alliances, collaborations, or license agreements and other financing mechanisms. There can be no assurance that additional financing will be available on acceptable terms, if at all. If adequate funds are not available, we may be required to delay, reduce the scope of our efforts to commercialize Gattex and or Revestive, delay, reduce the scope of, or eliminate one or more of our research and development programs, or to obtain funds through arrangements with licensees or others that may require us to relinquish rights to certain of our technologies or product candidates that we may otherwise seek to develop or commercialize on our own.

We require cash to fund our operating expenses, to make capital expenditures, acquisitions and investments and to service our debt. We have financed operations since inception primarily through payments received under collaborative research and license agreements, the private and public issuance and sale of equity securities, and the issuance and sale of non-recourse debt, convertible debt and lease financing. Through June 30, 2013, we have recognized \$817.3 million of cumulative revenues from payments for research support, license fees, product sales, milestone and royalty payments, \$876.7 million from the sale of equity securities for cash and \$738.6 million from the sale of non-recourse debt and convertible debt for cash.

Our principal sources of liquidity are cash, cash equivalents, and marketable investment securities, which totaled \$180.5 million at June 30, 2013. The primary objectives for our marketable investment security portfolio are liquidity and safety of principal. Investments are intended to achieve the highest rate of return to us, consistent with these two objectives. Our investment policy limits investments to certain types of instruments issued by institutions with investment grade credit ratings and places restrictions on maturities and concentration by type and issuer.

The following table summarizes our cash flow activity for the six months ended June 30, 2013 and 2012 (amounts in thousands):

	Six Months Ended	
	June 30,	
	2013	2012
Net cash used in operating activities	\$ (18,162)	\$ (50,725)
Net cash used in investing activities	\$ (28,595)	\$ (1,499)
Net cash provided by financing activities	\$ 99,465	\$ 512

Net cash used in operating activities was \$18.2 million and \$50.7 million for the six months ended June 30, 2013 and 2012, respectively. The decrease in net cash used in 2013 was primarily due to the decrease in interest expense and non-cash royalty receivable related to the issuance of non-recourse Sensipar Notes to Amgen in the second quarter of 2012. The REGPARA royalty revenue is pledged to service the principal and interest on our non-recourse notes and is not available to fund operations. The decrease in net cash used was also related to the reduction in research and development costs associated with clinical development activities. The above decreases in net cash used in 2013 were partially offset by increased spending related to the launch of Gattex in the first half of 2013.

Net cash used in investing activities was \$28.6 million and \$1.5 million for the six months ended June 30, 2013 and 2012, respectively. The net cash used in investing activities during the six months ended June 30, 2013 and 2012 was primarily the result of investing excess cash that was not currently required to fund operations. Capital expenditures for the six months ended June 30, 2013 and 2012 were \$364,000 and \$628,000, respectively.

Net cash provided by financing activities was \$99.5 million and \$512,000 for the six months ended June 30, 2013 and 2012, respectively. Cash provided by financing activities during the six months ended June 30, 2013 primarily consisted of the \$93.5 million received from the public sale of 6.9 million common shares in May 2013 and approximately \$6.0 million received from the exercise of employee stock options and the sale of shares for the employee stock purchase plan. The net cash provided by financing activities for the six months ended June 30, 2012 was from the exercise of employee stock options and the sale of shares for the employee stock purchase plan.

We could receive future milestone payments from all our agreements of up to \$16.8 million in the aggregate if each of our current licensees accomplishes the specified research, development and/or sales milestones provided in the respective agreements. In addition, all of the agreements require the licensees to make royalty payments to us if they sell products covered by the terms of our license agreements; however, we do not control the subject matter, timing or resources applied by our licensees to their development programs. Thus, potential receipt of milestone and royalty payments from these licensees is largely beyond our control. Each of these agreements may be terminated before its scheduled expiration date by the respective licensee either for any reason or under certain conditions.

We have entered into certain license agreements that may require us to pay milestone payments or royalties. For example, we are required to make royalty payments to certain licensors on Gattex and Revestive net sales and cinacalcet HCl royalty revenues. We expect to enter into additional sponsored research and license agreements in the future.

We have entered into long-term agreements with certain manufacturers and suppliers that require us to make contractual payment to these organizations. We expect to enter into collaborative research, contract research, manufacturing, and supplier agreements in the future, which may require up-front payments and long-term commitments of cash.

Critical Accounting Policies and Estimates

A critical accounting policy is one that is both important to the portrayal of our financial condition and results of operations and a policy that requires management's most difficult, subjective or complex judgments. Such judgments are often the result of a need to make estimates about the effect of matters that are inherently uncertain. The preparation of our financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates. There were no significant changes in our critical accounting policies from those at December 31, 2012; however, the following information, which relates to the U.S. launch of Gattex in February 2013, is in addition to, and should be read in conjunction with, the accounting policies included in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2012.

Product Sales. Product sales represent U.S. sales of Gattex, which was approved by the FDA in December 2012. We recognize revenue from Gattex product sales when persuasive evidence of an arrangement exists, title to product and associated risk of loss has passed to the customer, the price is fixed or determinable, collection from the customer is reasonably assured, we have no further performance obligations, and returns can be reasonably estimated.

All prescriptions for Gattex, received directly by us from the patient's physician, are handled through NPS Advantage, our data management and patient support program, which investigates and determines the patient's insurance coverage for Gattex. Once coverage is confirmed, we forward the prescription to the specialty pharmacy (SP) who then re-confirms the coverage and dispenses Gattex to the patient. We sell Gattex directly to a limited number of SPs and a specialty distributor (SD) who dispense product to patients, hospitals or U.S. government entities. We invoice and record revenue upon the SPs' or SD's receipt of Gattex from our third-party logistics warehouse. Our SPs order product to fill prescriptions that have been approved for reimbursement by payers.

Specific considerations for Gattex sold in the U.S. are as follows:

- *Rebates:* Allowances for rebates include mandated discounts under the Medicaid Drug Rebate Program. Rebates are amounts owed after the final dispensing of the product to a benefit plan participant and are based upon contractual agreements or legal requirements with public sector (e.g. Medicaid) benefit providers. The allowance for rebates is based on statutory discount rates and expected utilization. Our estimate for expected utilization for rebates is based in part on actual and pending prescriptions for which we have validated the insurance benefits.
- *Chargebacks:* Chargebacks are discounts that occur when contracted customers purchase from our SPs or SD. Contracted customers, which currently consist primarily of Public Health Service institutions and Federal government entities purchasing via the Federal Supply Schedule, generally purchase the product at a discounted price. Our SPs or SD, in turn, charge back the difference between the price initially paid by the SP or SD and the discounted price paid to the SP or SD by the customer. The allowance for chargebacks is based on actual and expected sales to the SPs and SD.
- *SP and SD Fees and Deductions:* Our SPs and our SD are offered prompt payment discounts and are paid fees for their services and data.
- *Product returns:* We will accept product that is damaged or defective when shipped directly to the SP or SD from our third-party logistics provider or for product that is returned with more than two (2) months remaining until the expiration date from our SP or SD only. We will not provide any credit for product that has been labeled for or sent to a patient. Product returned is generally not resalable as the product must be temperature-controlled throughout the supply chain and such control is difficult to confirm. We make a reasonable estimate of future potential product returns based on the number of prescriptions that have been approved for reimbursement and sent to an SP with each corresponding shipment of Gattex that has been sent to each respective SP. We also have the visibility to see current inventory levels and the current shelf life at the SPs and SD and have the ability to control the amount of product that is sold to the SPs and SD. At the end of each reporting period, we determine a product returns reserve by evaluating the units held in our distribution channel, the underlying demand for such units and the risk of potential product returns. At June 30, 2013 we recorded a returns reserve of approximately \$143,000 that we believe could be returned in the future.

Product sales are recorded net of accruals for estimated rebates, chargebacks, discounts, and other deductions (collectively, sales deductions) and returns. With the exception of allowances for prompt payment, allowances for sales deductions and returns are included in accounts payable and accrued expenses in the accompanying consolidated balance sheets.

We analyze our arrangements entered into to determine whether the elements can be separated and accounted for individually or as a single unit of accounting. Allocation of revenue to individual elements that qualify for separate accounting is based on the estimated fair value of the respective elements.

New Accounting Standards

Refer to Note 12 in “Notes to Condensed Consolidated Financial Statements” for a discussion of new accounting standards.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Interest Rate Risk. Our interest rate risk exposure results from our investment portfolio, our convertible notes, and our non-recourse notes. Our primary objectives in managing our investment portfolio are to preserve principal, maintain proper liquidity to meet operating needs and maximize yields. The securities we hold in our investment portfolio are subject to interest rate risk. At any time, significant changes in interest rates can affect the fair value of the investment portfolio and its interest earnings. After a review of our marketable investment securities, we believe that in the event of a hypothetical ten percent increase in interest rates, the resulting decrease in fair market value of our marketable investment securities would be insignificant to the consolidated financial statements. Currently, we do not hedge these interest rate exposures. We have established policies and procedures to manage exposure to fluctuations in interest rates. We place our investments with high quality issuers and limit the amount of credit exposure to any one issuer and do not use derivative financial instruments in our investment portfolio. We invest in highly liquid, investment-grade securities and money market funds of various issues, types and maturities. These securities are classified as available for sale and, consequently, are recorded on the balance sheet at fair value with unrealized gains or losses reported as accumulated other comprehensive income as a separate component in stockholders’ deficit, unless a loss is considered other than temporary, in which case the loss is recognized in earnings.

Our 5.75% Convertible Notes due 2014 and our 9% non-recourse Sensipar Notes, each have a fixed interest rate. As of June 30, 2013, our Convertible Notes and Sensipar Notes had \$16.5 million and \$67.6 million, respectively, in aggregate principal amount outstanding. The fair value of the Convertible Notes is affected by changes in the interest rates and by changes in the price of our common stock. The fair value of the Sensipar Notes is affected by changes in interest rates and by historical and projected rates of royalty revenues from cinacalcet HCl sales.

Foreign Currency Risk. We have significant clinical and commercial-scale manufacturing agreements which are denominated in euros and Canadian dollars. As a result, our financial results could be affected by factors such as a change in the foreign currency exchange rate between the U.S. dollar and the Canadian dollar or euro, or by weak economic conditions in Canada or Europe. When the U.S. dollar strengthens against the Canadian dollar or euros, the cost of expenses in Canada or Europe decreases. When the U.S. dollar weakens against the Canadian dollar or euro, the cost of expenses in Canada or Europe increases. The monetary assets and liabilities in our foreign subsidiary which are impacted by the foreign currency fluctuations are cash, accounts payable, and certain accrued liabilities. A hypothetical ten percent increase or decrease in the exchange rate between the U.S. dollar and the Canadian dollar or euro from the June 30, 2013 rate would cause the fair value of such monetary assets and liabilities in our foreign subsidiary to change by an insignificant amount. We are not currently engaged in any foreign currency hedging activities.

Item 4. Controls and Procedures.

We maintain “disclosure controls and procedures” within the meaning of Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Our disclosure controls and procedures, or Disclosure Controls, are designed to ensure that information required to be disclosed by us in the reports we file under the Exchange Act, such as this Quarterly Report on Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the U.S. Securities and Exchange Commission’s rules and forms. Our Disclosure Controls are also designed to ensure that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating our Disclosure Controls, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating and implementing possible controls and procedures.

Evaluation of Disclosure Controls and Procedures. As of June 30, 2013, we evaluated the effectiveness of the design and operation of the Company’s disclosure controls and procedures, which was done under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer. Immediately following the Signatures section of the Quarterly report on Form 10-Q are certifications of our Chief Executive Officer and Chief Financial Officer, which are required in accordance with Rule 13a-14 of the Exchange Act. This Controls and Procedures section includes the information concerning the controls evaluation referred to in the certifications and it should be read in conjunction with the certifications for a more complete understanding of the topics presented. Based on the controls evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of the date of their evaluation, our disclosure controls and procedures were effective to accomplish their intended purpose.

Change in Internal Control over Financial Reporting. In the first quarter of 2013, we began generating revenues from sales of Gattex and began capitalizing inventory costs related to manufacturing Gattex and the acquisition of teduglutide and rhPTH 1-84 raw material related to the March 18, 2013 Transition and Termination Agreement with Takeda. (See note 10). The accounting for our net product sales and the capitalization of inventory is material to our financial position as of June 30, 2013 and results of operations for the three and six months ended June 30, 2013, and we believe the internal controls and procedures relating to the accounting for net product sales and the capitalization of inventory have a material effect on our internal control over financial reporting. See Note 1, “Accounting Policies” to our unaudited condensed consolidated financial statements contained in this Quarterly Report on Form 10-Q for further details.

We have expanded our internal controls under Section 404 of the Sarbanes-Oxley Act of 2002 and applicable rules and regulations to include controls with respect to our net product sales and our valuation of inventory. Except for these expanded controls, no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) occurred during 2013.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

There are no material litigation matters as of June 30, 2013.

Item 1A. Risk Factors.

In addition to the other information set forth in this Report, consider the factors discussed in Part 1, “Item 1A. Risk Factors” in the Company’s Annual Report filed on Form 10-K for the year ended December 31, 2012, which could materially affect our business, financial condition or future results. The risks described in the aforementioned report are not the only risks facing the Company. Additional risks and uncertainties not currently known to the Company or that it currently deems to be not material also may materially adversely affect the Company’s business, financial condition and or operating results.

Item 6. Exhibits.

<u>Exhibit Number</u>	<u>Description of Document</u>
31.1*	Rule 13a-14(a)/15d-14(a) Certification of Chief Executive Officer
31.2*	Rule 13a-14(a)/15d-14(a) Certification of Chief Financial Officer
32*	Section 1350 Certification of Periodic Financial Report by the Chief Executive Officer and Chief Financial Officer
